PROTECTION**

**HAZARDOUS DISCHARGE SITE REMEDIATION FUND**

**2007 ANNUAL REPORT**

**Prepared February 2008**

## **Hazardous Discharge Site Remediation Fund**

### **2007 Annual Report**

The New Jersey Economic Development Authority (EDA) and the New Jersey Department of Environmental Protection (DEP) offer assistance to municipalities, businesses, developers and community groups at various stages of the brownfield restoration process, from planning to cleanup and redevelopment.

The Hazardous Discharge Site Remediation Fund (HDSRF) has been an integral component of this assistance since 1993; helping to transform underutilized and contaminated sites into environmentally sound, productive properties. This is particularly important in the redevelopment of older urban areas so vital to achieving the smart growth objectives of the State's Master Plan.

The EDA and the DEP, which jointly administer the program, are pleased to report the results of activities for calendar year 2007 under the HDSRF in accordance with N.J.S 58:10B-6.

The DEP first reviews applications to determine eligibility, reasonableness of costs, and the scope of work needed to investigate and remediate each site. The EDA manages the Fund and makes grants or loans to projects the DEP determines are eligible. Since the program was established, over \$145 million in assistance has been provided to over 1,200 projects.

Municipalities, counties and redevelopment agencies may apply for grants up to \$3 million per year for investigation and remediation activities on properties they own or for which they hold a tax sale certificate and have a comprehensive plan or realistic opportunity to develop within three years. Furthermore, an additional \$2 million is available to municipalities that contain Brownfields Development Areas. Private parties required to perform remediation activities and individuals who want to conduct such actions voluntarily may qualify for low-interest loans of up to \$1 million per year if they are unable to obtain private funding.

Funds may be provided for preliminary assessments for onsite inspections and to review historical ownership and site use to determine if contamination may be present at the sites; site investigations to characterize suspected contamination through preliminary intrusive investigation work; remedial investigations to determine the extent of contamination present; and remedial actions to effectuate cleanup of impacted portions of the sites.

Municipalities that utilize the HDSRF enjoy two significant advantages. First, the remediation of and return to productive use of dormant, contaminated properties rids communities of abandoned and, possibly, dangerous eyesores. Second, once sites are remediated and improved, they can once again provide ratable assets for the municipality.

Businesses and private individuals using HDSRF monies to investigate and clean up contaminated properties like former gas stations and industrial properties can enhance the surrounding community by improving the environment and properties values while stimulating new investment.

This report provides details of the HDSRF's financing activity during the year and includes a list of the projects financed, by county (Exhibit A) for the period of January 1, 2007 through December 31, 2007.

### **2007 Activity**

In 2007, the EDA closed a total of 6 loans and 76 grants amounting to nearly \$23.4 million, providing assistance to businesses, private individuals, and municipal governmental entities for the investigation and clean up of contaminated sites throughout New Jersey.

The following chart illustrates the allocation of funds for each eligibility category, total approvals for the year, and total disbursements. (See addendum for category descriptions.)

<b>Funding Category</b>	<b>2007 Allocations</b>	<b>2007 Approvals</b>	<b>2006 Disbursements</b>
<b>1</b>	<b>\$4,086,737.77</b>	<b>\$0.00</b>	<b>\$194,565.63</b>
<b>2</b>	<b>\$30,650,533.27</b>	<b>\$34,591,671.00</b>	<b>\$10,409,600.08</b>
<b>3</b>	<b>\$30,650,533.27</b>	<b>\$1,458,916.00</b>	<b>\$590,335.51</b>
<b>4</b>	<b>\$10,216,844.42</b>	<b>\$2,253,354.00</b>	<b>\$785,740.11</b>
<b>5</b>	<b>\$6,130,106.65</b>	<b>\$0.00</b>	<b>\$120,047.38</b>
<b>6</b>	<b>\$5,000,000.00</b>	<b>\$587,861.00</b>	<b>\$485,877.61</b>
<b>7</b>	<b>\$20,433,688.85</b>	<b>\$0.00</b>	<b>\$0.00</b>
<b>Total</b>	<b>\$107,168,444.23</b>	<b>\$38,891,802.00</b>	<b>\$12,556,166.32</b>

The original statute prescribed a specific method for determining the funding priority of projects that receive approvals from the DEP and EDA. Upon receiving EDA Board approval, applicants have a certain period of time to submit closing documents, including an executed contract for remediation services, in order to draw down on the available funds. Private individuals have 90 days to submit these documents and close their loan or grant award, while municipal governmental entities have 180 days prior to the elapse of the closing deadline.

Pursuant to N.J.S.A. 58-10B-7, an extension may be requested in writing explaining the reasons for the delay. If the defined period of time should elapse for any reason, the commitment loses

funding priority to that of newer applicants unless this period is extended. If the applicant submits the required evidence at some point after the defined time period has elapsed, the Fund is obligated to honor the commitment if monies are available in the Fund.

### **2008 Available Funds**

The Fund's available cash balance as of January 31, 2008 is approximately \$73 million after deductions for outstanding commitments, undisbursed loans and grants and financing for anticipated NJRA transferred projects. This amount includes loan repayments, interest earnings, and surcharges collected through year's end. This amount does not include the pending 2008 appropriation.

Below is a chart, which demonstrates HDSRDF allocation by category, which was revised under recent amendments to the statute (see addendum for new category descriptions.)

#### **Hazardous Discharge Site Remediation Fund Allocation by Category**

<b>Funding Category</b>	<b>Allocation</b>
<b>1</b>	<b>\$4,090,345.98</b>
<b>2</b>	<b>\$30,677,594.84</b>
<b>3</b>	<b>\$30,677,594.84</b>
<b>4</b>	<b>\$10,225,864.95</b>
<b>5</b>	<b>\$6,135,518.97</b>
<b>6</b>	<b>\$4,412,139.00</b>
<b>7</b>	<b>\$20,451,729.89</b>
<b>Total</b>	<b>\$106,670,788.47</b>

### **Assessment of Current Funding Levels to Meet Obligations**

Below is an accounting of the project applications that are in process:

		<u>Application Request</u>
Municipal projects awaiting financing by EDA:	33 projects	\$7,784,542
Private projects awaiting financing by EDA:	11 projects	\$1,633,177
Municipal projects under review by DEP:	21 projects	\$12,051,543
Private projects under review by DEP:	10 projects	\$2,117,824
Non-Profit Projects under review by NJDEP	1 project	\$30,624
<b>Totals</b>	<b>76 projects</b>	<b>\$23,617,710</b>

## **Project Examples**

The Fund's successful track record is statewide: hundreds of projects have moved forward, resulting in the investigation and remediation of many sites that are now viable, tax-ratable assets to the communities in which they are located.

### *City of Newark (Nat Turner Park)*

The project site had been previously utilized as a mixture of residential, commercial and industrial uses which has potential environmental areas of concern (AOCs).

The City of Newark requested grant funding to perform Site Investigation (SI) activities in the amount of \$108,216. The City of Newark currently owns the project site and has satisfied Proof of Site Control. It is the City's intent, upon completion of the environmental investigation activities, to redevelop the project site as a park.

### *City of Millville (Millville Senior Housing)*

The project site is a former landfill, which has AOCs.

The City of Millville requested grant funding to perform Remedial Action (RA) in the amount of \$833,127. The City currently owns the project site and has satisfied Proof of Site Control. It is the City's intent, upon completion of the environmental investigation activities, to redevelop the project site for senior housing.

According to the amended HDSRF legislation, a grant can be awarded to a municipality, county or redevelopment entity authorized to exercise redevelopment powers up to 50% of the cost of the RA for projects involving the redevelopment of contaminated property for affordable housing. DCA will deed restrict the project site for purposes of guaranteeing affordable housing use for the next 45 years.

### *City of Hoboken (Old Todd Shipyard)*

The project site, currently vacant, is a former shipyard, which has AOCs based on investigation activities performed to date.

The City of Hoboken currently owns the project site and has satisfied Proof of Site Control. The City sought \$19,893 to perform remedial investigation (RI), which in combination with past financial assistance, brings total funding to date up to \$90,661. It is the City's intent, upon completion of environmental investigation activities, to redevelop the project site for industrial re-use.

## **Recommendations**

The 13-member Brownfields Redevelopment Task Force (BRTF), created in 1998 under Section 5 of the New Jersey Brownfield and Contaminated Site Remediation Act, among other duties, coordinates State policy on brownfields redevelopment.

As part of its' responsibilities to make recommendations to the Governor and the Legislature on means to better promote the redevelopment of brownfields, the Task Force is conducting a

review of all available financing under the Hazardous Discharge Site Remediation Fund (HDSRF), Brownfields Reimbursement and other key programs.

Accordingly, EDA would reserve making any recommendations for additional modifications or other improvements on brownfields financing, pending a final report by the BRTF and any formal recommendations by the Action Council on the Economy (ACE) subcommittee on Brownfields.

A brief Addendum is attached which highlights the history of the Fund and the various categories of eligibility along with observations on the impact of recent statutory changes, including a report of 2007 BDA activity. Should you need any additional information about the contents of this report, please contact Marcus J. Saldutti, Legislative Officer, EDA at (609) 292-2072.

## ADDENDUM

### I. Fund History

In 1993, the Legislature amended and supplemented P.L. 1983, c.330, formerly known as the "Environmental Cleanup and Responsibility Act" to become the "Industrial Site Recovery Act." The Legislature sought these changes to promote certainty in the regulatory process that would serve to facilitate the remediation of contaminated sites and promote the redevelopment of existing industrial sites around the State. In addition to regulatory reform, the Legislature sought to alleviate the financial burdens that have been imposed on individuals, corporations and municipal government entities that have either voluntarily or involuntarily remediated contaminated sites. This assistance came in the form of a \$45 million appropriation from the Hazardous Discharge Bond Act of 1986 to a new fund entitled the Hazardous Discharge Site Remediation Fund (the "Fund"), which the EDA jointly administers with the Department of Environmental Protection ("DEP"). The Fund received an additional \$10 million from the Economic Recovery Fund in its initial capitalization, and in 1997, the Legislature appropriated an additional \$20 million from the Hazardous Discharge Bond Act of 1986 to the Fund making a total of \$75 million available for the remediation of contaminated sites.

The responsibilities associated with administering the Fund have been divided between the EDA and the DEP. Initial contact and proposals for funding are made through the DEP, which has streamlined the environmental review process to provide timely approvals. Once environmental approvals and eligible project costs have been determined by the DEP, the applications are forwarded to the EDA so that eligible parties may access the financing available to them through this Fund.

Upon receiving these applications, the EDA conducts a financial review and forwards them to its Board of Directors with a recommendation for funding. The DEP and EDA have adhered to a strict interpretation of the law in implementing this Fund. As a consequence of this interpretation, the Fund is truly the last resort to finance potential remediations. Applicants do not possess insurance and in most cases have little or no collateral to secure loans made by the Fund. Under normal circumstances, these applications would not meet the EDA's credit criteria for funding. Each Fund application is reviewed therefore in light of the legislative intent behind the program that dictates to the EDA that these more risky loans should be made for the general public good that will be achieved through such remediations.

In 1997, the Act was amended to create two new eligibility categories that the EDA and DEP implemented in early 1998: Category 8 provides matching grants for individuals using innovative technology for remediation; Category 9 provides matching grants or loan guarantees for persons or businesses that implement limited restricted use or unrestricted use remedial actions. As a result, Category 10 is now the "catch all" category, which was formerly Category 8. These new categories were created by allocating 5% each from Category 5 and Category 6.

In 1999, the Legislature revised the qualification for municipalities to receive certain grants for remediation investigations from the Fund. The law requires a municipality either to have a comprehensive Brownfields redevelopment plan in place, or to demonstrate to the EDA that a property has a realistic opportunity of being developed or redeveloped within three years of the completion of the remediation. The law further requires a municipality or the New Jersey

Redevelopment Authority to actually own the real property prior to receiving a grant for remedial investigation from the Fund. The law ensures that a municipality does not spend funds without having made a substantial commitment to the development of the Brownfields site.

In 2003, legislation was passed dedicating an additional \$40 million to aid in replenishing the Fund. In addition, New Jersey Voters approved a State Constitutional amendment in November 2003 which permits the State to use a surplus in Corporate Business Tax revenues dedicated to the Petroleum Underground Storage Tank Remediation, Upgrade, and Closure Program to provide a new and reliable long-term funding source for the Hazardous Discharge Site Remediation Fund.

In 2005, legislation was passed creating new and expanded uses of HDSRF funds for municipalities, counties and redevelopment entities. The new legislation provides grant funds for recreation areas, conservation areas and projects involving affordable housing, in addition to providing additional grant funds on a priority basis and dedicated case management in the Department of Environmental Protection to municipalities with areas designated as a Brownfields Development Area.

In 2006, Governor Jon Corzine, signed legislation that changes the limits on grants from the Hazardous Discharge Site Remediation Fund to municipalities, counties and redevelopment agencies authorized to exercise redevelopment powers pursuant to N.J.S.A.40A:12A-4. The law previously limited grants to those entities to 75% of the total costs of the remediation. The new law authorizes grants to those entities for up to 100% of the costs of the preliminary assessment, site investigation and remedial investigation regardless of the date the application for funding was submitted to the Department of Environmental Protection. It authorizes grants for up to 75% of the costs of the remedial action of a contaminated site for applications received by the department after September 15, 2005.

In 2007, Governor Jon Corzine signed legislation that removed the 70% cap on the amount of grant money that could be awarded from the fund. This allowed projects that were initially approved as loans, to subsequently be converted to grants in 2007.

## **II. Funding Categories**

As defined in the Act, financial assistance and grants from the Fund were provided for the following purposes and obligated on an annual basis in the defined percentages. An additional funding category was also created by the legislation, C.58:10B-25.3, to establish a pilot program for awarding grants to non-profit organizations. Funding for the pilot program is capped at \$5,000,000 by statute.

The non-profit category is listed as item 7 below because it appears last in the legislation; however it is reported as item 6 in the above charts to comport with technical aspects of EDA's tracking system.

**2005 Funding Categories:**

**(1) Loans to Persons in a Qualifying Municipality:** Moneys shall be allocated for financial assistance to persons, for remediation of real property located in a qualifying municipality as defined in section 1 of P.L.1978, c.14 (C.52:27D-178).

**(2) Municipalities, Counties and Redevelopment Entities:**

(a) Moneys shall be allocated to: municipalities, counties, or redevelopment entities authorized to exercise redevelopment powers pursuant to section 4 of P.L.1992, c.79 (C.40A:12A-4).

(i) BDAs: projects in brownfield development areas pursuant to subsection f. of section 27 of P.L.1993, c.139 (C.58:10B-5),

(ii) Matching grants for innovative technology: matching grants up to a cumulative total amount from the fund of \$5,000,000 per year of up to 75% of the costs of the remedial action for projects involving the redevelopment of contaminated property for recreation and conservation purposes, provided that the use of the property for recreation and conservation purposes is included in the comprehensive plan for the development or redevelopment of contaminated property, or up to 50% of the costs of the remedial action for projects involving the redevelopment of contaminated property for affordable housing pursuant to P.L.1985, c.222 (C.52:27D-301 et seq.).

(iii) Matching grants for unrestricted or limited restricted use cleanup: grants for preliminary assessment, site investigation or remedial investigation of a contaminated site.

(iv) Matching grants for recreation, conservation and affordable housing: financial assistance for the implementation of a remedial action.

(v) Financial assistance for remediation activities at sites that have been contaminated by a discharge of a hazardous substance or hazardous waste, or at which there is an imminent and significant threat of a discharge of a hazardous substance or hazardous waste, and the discharge or threatened discharge poses or would pose an imminent and significant threat to a drinking water source, to human health, or to a sensitive or significant ecological area; or

(b) persons for financial assistance for remediation activities at sites that have been contaminated by a discharge of a hazardous substance or hazardous waste, or at which there is an imminent and significant threat of a discharge of a hazardous substance or hazardous waste, and the discharge or threatened discharge poses or would pose an imminent and significant threat to a drinking water source, to human health, or to a sensitive or significant ecological area.

**(3) Private Loans for Voluntary Remediation:** Moneys shall be allocated for financial assistance to persons who voluntarily perform a remediation of a hazardous substance or hazardous waste discharge;

**(4) Innocent Party Grants:** Moneys shall be allocated for grants to persons who own real property on which there has been a discharge of a hazardous substance or a hazardous waste and that person qualifies for an innocent party grant. A person qualifies for an innocent party grant if that person acquired the property prior to December 31, 1983, the hazardous substance or hazardous waste that was discharged at the property was not used by the person at that site, and that person certifies that he did not discharge any hazardous substance or hazardous waste at an area where a discharge is discovered. A grant authorized pursuant to this paragraph may be for up to 50% of the remediation costs at the area of concern for which the person qualifies for an innocent party grant, except that no grant awarded pursuant to this paragraph to any person may exceed \$1,000,000;

**(5) Private Loans for Environmental Opportunity Zones:** Moneys shall be allocated for (a) financial assistance to persons who own and plan to remediate an environmental opportunity zone for which an exemption from real property taxes has been granted pursuant to section 5 of P.L.1995, c.413 (C.54:4-3.154), or (b) matching grants for up to 25% of the project costs to qualifying persons, municipalities, counties, and redevelopment entities authorized to exercise redevelopment powers pursuant to section 4 of P.L.1992, c.79 (C.40A:12A-4), who propose to perform a remedial action that uses an innovative technology, or for the implementation of a limited restricted use remedial action or an unrestricted use remedial action except that no grant awarded pursuant to this paragraph may exceed \$250,000; and

**(6) Catch all:** Twenty percent of the moneys in the remediation fund shall be allocated for financial assistance or grants for any of the purposes enumerated in paragraphs (1) through (5).

**(7) Non-profits:** The Department of Environmental Protection, in consultation with the New Jersey Economic Development Authority, shall develop a pilot program to award grants from the Hazardous Discharge Site Remediation Fund established pursuant to section 26 of P.L.1993, c.139 (C.58:10B-4) to nonprofit organizations described in section 501(c)(3) of the federal Internal Revenue Code, 26 U.S.C. s.501(c)(3), that are exempt from taxation pursuant to section 501(a) of the federal Internal Revenue Code, 26 U.S.C. s.501(a), for the preliminary assessment, site investigation, and remedial investigation of real property that has been contaminated or is suspected of being contaminated by the discharge of a hazardous substance. All of the limitations and conditions for the award of financial assistance and grants applicable to municipalities pursuant to the provisions of the "Brownfield and Contaminated Site Remediation Act," P.L.1997, c.278 (C.58:10B-1.1 et al.) shall apply to the award of grants to a nonprofit organization pursuant to this section. The total amount awarded pursuant to this pilot program shall not exceed \$5,000,000.

### **III. Impact of funding category changes, including the addition of Brownfields Development Areas and remedial action financing.**

In 2007 the EDA closed a total of 6 loans and 76 grants amounting to nearly \$23.4 million, while in 2006 EDA closed a total of 1 loans and 43 grants amounting to nearly \$10.8 million. In 2005 EDA closed a total of 4 loans and 47 grants amounting to over \$3.6 million.

In addition and as mentioned above, there have been recent legislative changes allowing for a portion of funding of remedial action for affordable housing, recreation and open space. Furthermore, the statutory increase in money available, an additional \$2 million on top of \$3 million per year, to municipalities that contain Brownfields Development Areas (BDAs) has resulted in an increase in demand and also in money being drawn from the fund.

Under the Brownfields Development Area approach, EPA works with communities affected by multiple brownfields to design and implement remediation and reuse plans for these properties simultaneously. The BDA approach enables remediation and reuse to occur in a coordinated fashion. In the process, we invite the various stakeholders, including owners of contaminated properties, potentially responsible parties, developers, community groups, technical experts for the local government and residents, and residents themselves, to participate in this cleanup and revitalization approach. A synopsis of 2007 BDA activity is as follows:

- Camden Redevelopment Agency (CRA) - Harrison Avenue Landfill was a 85 acre landfill and CRA intends to redevelop the project site into a recreation center (Salvation Army/Kroc Center). CRA received a BDA designation for this project site and \$4,888,877 in grant funding as of 12/31/06 and was approved for the following grant award in 2007:
  - \$4,770,150 for remedial investigation and remedial action activities, which was approved in December 2007 and has not yet closed.
- Harrison Redevelopment Agency (Harrison) - Spiegel Trucking, Inc. is a warehouse and Harrison intends to redevelop the project site for recreational use. Harrison has received a BDA designation and was approved for the following grant awards in 2007:
  - \$862,940 for remedial investigation and remedial action activities, which was approved in October 2007 and has not yet closed.
  - \$4,003,046 for remedial investigation and remedial action activities, which was approved in December 2007 and has not yet closed.
- Milltown-Ford Redevelopment Agency (Milltown) - Milltown-Ford Redevelopment Area was a former tire company and Milltown intends to redevelop the project site for mixed-use development. Milltown has received a BDA designation and \$6,657,596 in grant funding as of 12/31/06 and was approved for the following grant award in 2007:
  - \$5,000,000 for remedial action activities, which was approved in December 2007 and has not yet closed.

- Palmyra Borough (Palmyra) - BDA- Route 73 South consists of 26 mixed-use sites over 186 acres and Palmyra intends to redevelop the project site for mixed-use and recreational use. Palmyra received a BDA designation and \$2,614,237 in grant funding as of 12/31/06 and received the following grant award in 2007:
  - \$1,903,913 for site investigation activities, which was approved in August 2007 and closed on November 2007.

EDA will continue to monitor the effect of the various legislative changes that have occurred to improve the operation and efficiency of this resource and to foster its continuity.
