Student absences provide important information about a school's culture and climate. Research shows that absences impact a student's ability to succeed in school. The New Jersey Department of Education used input from New Jersey communities to select chronic absenteeism as its measure of school quality and student success for the ESSA accountability plan. **Chronic absenteeism** is defined as being absent for 10% or more of the days enrolled during the school year. A student who is not present for any reason, whether excused, unexcused, or for disciplinary action, is considered absent unless permitted by state statute or regulations.

Chronic Absenteeism

This table shows the number and percentage of students in grades K-12 both overall and by student group who were chronically absent during the school year. The last two columns show the chronic absenteeism state average for students in the grades offered and whether the rate for each student group was above the state average ("Not Met") or less than or equal to the state average ("Met").

Student Group	Number of students chronically absent	Percent of students chronically absent	State Average	Met State Average
Schoolwide	34	7.6	10.2	Met

Other Information:	While a great focus is placed on academics, equally important is the social development of students at this young age. Students receive ample time at each grade level to develop their skills in working with and interacting with peers. Character development and social groups highlight the activities that students participate in on a regular basis. Technology is critical to the educational experience at George Washington School. Teachers use iPads to prepare and execute lessons. Web-based and multimedia applications are used throughout the school. Internet access, digital media players, desktop computers, hand-held devices, and state of the art projectors in each classroom offer opportunities for students to extend their learning and interactions outside the school walls and across the world. Recent increases in the number of devices in the school building allow for increased use in all grade levels. Online student programs in reading and math allow for students to practice their skills online both in school and at home.
