The cabinet or primary storage area shall be located in the cashiers' cage or in another secure place, the location and physical characteristics of which shall be approved by the Commission. Secondary storage areas shall be used for the storage of surplus cards. Cards maintained in secondary storage areas shall not be distributed to gaming pits or tables for use in gaming until the cards have been moved to a primary storage area. All secondary storage areas shall be located in secure areas, the location and physical characteristics of which shall be approved by the Commission. Nothing herein shall preclude a casino licensee from having a separate storage area for the cards to be used at the game of poker; provided, however, the location and physical characteristics of the separate storage area shall be approved by the Commission.

(b) All primary, secondary and poker storage areas, other than the cashiers' cage, shall have two separate locks. The casino security department shall maintain one key and the casino department or cashiers' cage shall maintain the other key; provided, however, that no person employed by the casino department below the table games shift manager in the organizational hierarchy shall have access to the casino department key for the primary and secondary storage areas and no person below the poker shift supervisor in the organizational hierarchy shall have access to the casino department key to the poker storage area. Cards stored in a cabinet within the cashiers' cage shall be secured by a lock, the key to which shall be maintained by a tables games shift manager or casino supervisor thereof.

(d) If removed from the primary storage area, the table games shift manager or casino supervisor thereof and the casino security officer who removed the decks shall distribute sufficient decks to the poker shift supervisor and to the pit boss who shall then distribute the decks to the dealer at each table. If removed from the poker storage area, the decks shall be removed by the poker shift supervisor, in the presence of the casino security officer, and transported to the poker pit stand. Subsequently, the poker shift supervisor shall distribute the decks to the dealer at each poker table either directly or through the floorperson assigned to supervise the dealer. If needed, the poker shift supervisor or floorperson shall place the appropriate replacement cards into the deck from the cards held in reserve at the pit stand. Upon insertion of the replacement cards into the deck, the poker shift supervisor or floorperson shall re-examine the front of each card and the back of each card to ensure a consistent shading pattern and to ensure that the condition of the deck with the inclusion of the replacement cards has sufficient quality in order to maintain the integrity of gaming at poker. If the integrity of gaming at poker would in any way be compromised by the use of the deck with the replacement cards, the entire deck of cards shall be placed in a sealed envelope or container, identified with the date and time and shall be signed by the poker shift supervisor. The poker shift supervisor shall maintain the envelope or container in a secure place within the pit stand until collection by a casino security officer.

3. Cards in the pit stand shall be placed in a locked compartment, keys to which shall be in the possession of the poker shift supervisor or supervisor thereof or the pit boss or casino supervisor thereof.

floorperson. Card inspection at the gaming table shall require each pack to be used to be sorted into sequence and into suit to assure that all cards are in the deck. The dealer shall also check the back of each card to assure that it is not flawed, scratched or marked in any way.

1. If, after checking the cards, the dealer finds that a card is unsuitable for use, a poker shift supervisor or casino supervisor shall bring a substitute card from the card reserve in the pit stand.

2. The unsuitable card shall be placed in a sealed envelope or container, identified by table number, date, and time and shall be signed by the dealer and floorperson assigned to that table. If the casino maintains a separate storage area for poker cards, a poker shift supervisor or supervisor thereof may collect all extra decks in card reserve for the game of poker. If collected, all sealed decks shall either be canceled or destroyed or returned to the storage area.

(n) When the envelopes or containers of used cards and reserve cards with broken seals are returned to the casino security department, they shall be inspected for tampering, marks, alterations, missing or additional cards or anything that might indicate unfair play.

"Base plate" means the interior shelf of the dealing shoe on which the cards rest.

(b) Cards used to game at blackjack, pai gow poker, minibaccarat, red dog, caribbean stud poker, let it ride poker, three card poker, fast action hold 'em, casino war and double down stud shall be dealt from a manual or automated dealing shoe which shall be secured to the gaming table when the table is open for gaming activity and secured in a locked compartment when the table is not open for gaming activity. Cards used to game at baccarat shall be dealt from a dealing shoe which shall be secured in a locked compartment when the table is not open for gaming activity. Notwithstanding the foregoing, cards used to game at pai gow poker, double down stud and three card poker may be dealt from the dealer's hand in accordance with N.J.A.C. 19:47-11.8A, 17.8 and 20.8, respectively.

(c) A device which automatically shuffles cards may be utilized at the game of blackjack, pai gow poker, minibaccarat, red dog, poker, caribbean stud poker, let it ride poker, three card poker, fast action hold 'em, casino war and double down stud in addition to a manual or automated dealing shoe, provided that:

2. The security of an automated card shuffling device conforms to the security of any dealing shoe used at the gaming table pursuant to (b) above.

(d) Each manual or automated dealing shoe shall be designed and constructed with such features as the Commission may require to maintain the integrity of the game at which such shoe is used. Such features shall include, at a minimum, the following:

1. At least the first four inches of the base plate shall be white;

2. The sides of the shoe below the base plate shall be transparent or have a transparent sealed cutout unless the dealing shoe is otherwise constructed to prevent any object from being placed into or removed from the portion of the dealing shoe below the base plate and to permit the inspection of this portion of the shoe; and

3. A stop underneath the top of the face plate shall preclude the next card to be dealt from being moved upwards for more than one-eighth inch distance; and

4. Each dealing shoe used in blackjack shall have a mark on the side of the shoe that enables the dealer, after aligning the stack of cards against the shoe in accordance with N.J.A.C. 19:47-2.5(d), to insert the cutting card in such stack so that approximately one quarter of the stack is behind the cutting card.

(e) A baccarat dealing shoe, in addition to meeting the requirements of (d)1 through 3 above, shall also adhere to the following specifications:

1. A removable lid shall be opaque from the point where it meets the face plate to a point at least four inches from the face plate;

(f) A pai gow poker dealing shoe, in addition to meeting the requirements of (d) above, may, in the discretion of the casino licensee, also contain a device approved by the Commission on the front of the face plate so as to preclude the players from viewing the next card to be dealt.

(g) All dealing shoes and shuffling devices in the casino and casino simulcasting facility shall be inspected at the beginning of each gaming day by a floorperson assigned to the table prior to cards being placed in them. 19:46-1.26 Slot machines and bill changers; identification; signs; meters; other devices

(a) Unless otherwise authorized by the Commission, each slot machine in a casino shall have the following identifying features:

1. A logic board serial number permanently imprinted, impressed, affixed or engraved on each logic board installed in the slot machine;

2. An asset number that is permanently imprinted, impressed, engraved or affixed on the outside cabinet of the machine by the casino licensee. The asset number must be conspicuous and clearly visible to persons involved in removing or replacing the slot drop bucket or slot drop box in the slot machine and through the casino licensee's closed circuit camera coverage system. The size and location of the asset number are subject to prior approval by the Commission;

3. A sign conspicuously located on the front of the machine that automatically illuminates and a bell that automatically rings when a player has won a jackpot not paid automatically and totally by the machine and which advises the player to see an attendant to receive full payment;

4. A mechanical, electrical or electronic device that automatically precludes a player from operating the slot machine after a jackpot requiring a manual payout has been hit and which requires the machine to be reset by an attendant in such circumstances;

5. A display on the front of the slot machine that includes the information required by N.J.A.C. 19:45-1.37(a)4;

6. A light on the pedestal above the slot machine that automatically illuminates when the door to the machine or any device connected thereto which may affect the operation of the slot machine is opened;

7. A location number that is affixed to the outside of the machine. The location number must be conspicuous and clearly visible to persons involved in removing or

replacing the slot drop bucket or slot drop box in the slot machine and through the casino licensee's closed circuit camera coverage system. The size and location of the location number are subject to prior approval by the Commission;

8. A manufacturer's serial number affixed to the outside of the slot machine cabinet in a location as approved by the Commission; and

9. A labelling system that enables the Division to determine that the reel mechanisms are installed in the machine in the same manner as when the slot machine was inspected and approved.

(b) Unless otherwise authorized by the Commission, each bill changer shall have the following identifying features:

1. An asset number that is permanently imprinted, affixed or impressed on the outside cabinet of the bill changer or the slot machine to which it is attached. The asset number must be conspicuous and clearly visible to persons involved in removing or replacing the slot cash storage box in the bill changer, clearly visible through the casino licensee's closed circuit camera coverage system and must correspond to the asset number affixed to the slot machine in accordance with (a) above. The size and location of the asset number are subject to prior approval by the Commission;

2. A display on the front of the bill changer that clearly indicates the denomination of the currency or coupon inserted therein;

3. A display on the front of the bill changer that clearly indicates the amount of coins or slot tokens dispensed by the slot machine all-purpose hopper after currency or a coupon has been inserted and accepted; and

4. A display on the front of the bill changer that indicates a malfunction or which informs the patron that the bill changer is out of service.

(c) Unless otherwise authorized by the Commission, each slot machine in a casino shall be equipped with the following:

1. A mechanical, electrical or electronic device, to be known as an "in-meter," that continuously and automatically counts the number of coins or slot tokens placed by patrons into the machine for the purpose of activating play;

2. A mechanical, electrical or electronic device, to be known as a "drop-meter," that continuously and automatically counts the number of coins or slot tokens that are dropped into the machine's slot drop bucket or slot drop box;

3. For each hopper in a slot machine, a separate mechanical, electrical or electronic device, to be known as a "jackpot meter," that continuously and automatically counts, for that hopper only, the number of coins, prize tokens or slot tokens that are automatically paid by the machine from the corresponding hopper and that displays the aggregate number so counted; provided, however, that:

i. In lieu of the jackpot meter for a payout-only hopper displaying the number of coins, slot tokens or prize tokens paid out from that hopper, each casino licensee that uses a slot machine which is capable of converting the number of coins, slot tokens or prize tokens paid out from a payout-only hopper into its machine denomination equivalent, may, in accordance with its internal controls approved by the Commission, set the jackpot meter connected to each payout-only hopper in that slot machine to continuously and automatically count and display the aggregate number of coins, slot tokens or prize tokens paid out from that hopper by its machine denomination equivalent (for example, the jackpot meter on a 25¢ slot machine may record the payout of one \$3.00 prize token as the payout of "12" quarters); and

ii. Each slot machine with multiple hoppers may have a single jackpot meter to count and display the aggregate number of coins, slot tokens or prize tokens paid out from that machine's hoppers provided that:

(1) Each hopper is connected to that meter;

(2) The jackpot meter counts and displays, in accordance with (c)3i above, the aggregate number of coins, slot tokens or prize tokens paid out from a payout-only hopper by its machine denomination equivalent; and

(3) Each payout-only hopper has a separate payout-only jackpot meter;

4. A mechanical, electrical or electronic device, to be known as a "manual jackpot meter," that continuously and automatically records the number of coins or slot tokens to be paid manually;

5. A mechanical, electrical or electronic device, to be known as a "win meter," visible from the front of the machine, that, upon a player hitting a winning combination, advises the player of the number of coins, prize tokens or slot tokens for that round that have been paid to the player by the machine from the corresponding hopper; provided, however, that multiple win meters, as provided in (c)5i or ii below after approval of the casino licensee's internal controls therefor, shall be used on each multiple hopper slot machine whenever one or more winning combinations that are hit on the same round of play at the machine entitle the winning player to automatically receive coins, slot tokens or prize tokens from both hoppers and each hopper contains a different denomination of coins, slot tokens or prize tokens, as follows:

i. A separate win meter for each hopper that, for the round in which a winning combination is hit, advises the winning player of the actual number of coins, slot tokens or prize tokens won from that hopper only; or

ii. A win meter to which each hopper is connected that advises the winning player of the aggregate number of coins, slot tokens or prize tokens won on that round from both hoppers after first converting the aggregate number of any coins, slot tokens or prize tokens won on that round from a payout-only hopper into its machine denomination equivalent, and a separate payout-only win meter connected to each payout-only hopper (for example, a win meter on a 25¢ slot machine may, pursuant to this paragraph, record the payout, on the same round of play, of one \$3.00 prize token and two quarters as the payout of "14" quarters, provided there is a separate payout-only win meter advising the patron that one prize token was paid out); and

6. An on/off switch located in an accessible place in the interior of the slot machine which will control the current utilized in the operation of the slot machine.

(d) Unless otherwise authorized by the Commission, each slot machine that has an attached bill changer shall also be equipped with the mechanical, electrical or electronic devices that are required by N.J.A.C. 19:45-1.37(e).

(e) In addition to the above requirements, each slot machine in a casino shall have such devices, equipment, features and capabilities as may be required by the Commission for that particular model of slot machine after the prototype model is tested and examined by the Division.
