Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily)" refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

Regional passenger traffic rose only 0.7 percent in August on a 0.2 percent capacity reduction. Domestic traffic fell 1.1 percent on a 2.8 percent seat reduction. International markets grew 3.9 percent on a 4.7 percent seat increase. The region's August traffic growth fell slightly behind ATA and ACI August averages. ATA reported 0.6 percent domestic, 5.2 percent international and 1.2 percent system growth. Regional freight increased 16.8 percent, down from the 20.2 percent Y-T-D pace, but consistent with industry predictions for slower growth in the second half of the year.
