

THE COST OF INACTION

"Every increase in the dollars devoted to pension and health benefits is a decrease in dollars invested in other priorities.

We will miss...

...The opportunity to give our young children the chance to be successful with a quality education no matter where they live.

We will miss...

...The opportunity to give a second chance to those battling drug addiction or reentering society from prison to become valued and contributing members of the community.

We will miss...

...The opportunity to boost take home pay for working class taxpayers by providing tax relief and the new jobs that that tax relief will produce which leads to fulfilling careers."

- Governor Christie
