General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Mcdonalds Restaurant 0147575 Ground Water	735 Route 15 S Jefferson Twp. Morris County	Greg Chin Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	<p>This is a renewal permit action. The McDonalds in Lake Hopatcong, N.J. is an existing 5,558 sq. ft. fast food restaurant with seating for 107 patrons. The individual subsurface sewage disposal system (ISSDS) for the facility was originally approved by the Jefferson Township Health Department in 1988 with a design flow of 1,950 gpd. Since that time business has increased but the facility size has not changed. This resulted in an increased wastewater flow and hydraulic malfunction of the ISSDS. Actual flow monitoring has been performed and it has been determined that the design flow for this facility should be 3,745 gpd, which is consistent with the design flow criteria for "restaurant" or 35 gpd/seat. Therefore, because the design flow is in excess of 2,000 gpd a NJPDES-DGW permit is required. In order to alleviate the hydraulic malfunction the facility expanded the existing ISSDS. Sanitary waste generated by the facility is managed by a more recently constructed ISSDS in conjunction with the existing ISSDS. The existing ISSDS is ~ 2,500 sq. ft and the proposed ISSDS provides an additional 3,500 sq. ft. of infiltrative surface (35' x 100'). Wastewater will be discharged to the ground water of the State via these two (2) ISSDS's with a maximum of 1,250 gpd going to the existing ISSDS and 2,495 going to the more recently constructed ISSDS. Since the original design of the on-site subsurface sewage disposal system was reviewed and approved by the local administrative authority prior to January 1, 1990, this facility qualifies to be regulated under this individual NJPDES-DGW permit with condition similar to the conditions of the Department's NJPDES-DGW T-1 General Permit. The design flow for the facility will be 3,745 gpd</p>
Dennis Township Primary School NJ0141623 Ground Water	601 Hagan Road Dennis Twp. Cape May County	Brian Sage Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	<p>The Dennis Township Primary School is an existing school to serve a maximum population of 444 students and 70 administrative staff (teachers/staff/maintenance personnel, etc.). The existing school has a cafeteria. The existing school does not have shower facilities and/or science laboratories. The design volume of sanitary sewage is based upon 15 gallons per person per day based upon a day school, with cafeteria. The maximum design volume of sanitary sewage to be generated is 7,710 gallons per day.</p> <p>Sanitary wastewater generated by the facility will undergo primary treatment and will be discharged to the groundwater of the state via a subsurface disposal system. The subsurface disposal system has a maximum design capacity of 7,710 gpd. The subsurface disposal system consists of a minimum of a 12,600 square foot disposal area.</p>

Verducci's Specialty Market NJ0108294 Ground Water	176 US Highway 202 Raritan Twp. Hunterdon County	Keith Howell Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	<p>Verducci's Specialty Market Plaza is renewing their NJPDES-DGW permit through the NJDEP. This facility is an existing retail/office center located on a 5.09 acre site.</p> <p>At present there is Verducci's Specialty Market, pet store, insurance company, Sears, cleaners, gym with 6 showers, saddle retailer and a bedding retailer. The area for the facility is 40,133 square feet retail and 1,107 square feet office space for a total of 41,240 square feet. Sanitary wastewater generated from this facility is treated by an on-site recycling wastewater treatment plant (WTP) and discharged to the ground waters of the state via two (2) subsurface disposal beds totaling 1980 square feet. (2 disposal beds x 990 square feet each = 1980 square feet)</p> <p>The WTP is a treatment and a recycling system that reuses treated water as toilet flush water. The design capacity of the WTP was based on the design criteria for flows when the TWA was issued in 1987. However the disposal capacity of the facility is 1250 gal/day. There are two 990 square foot disposal beds. One of the disposal beds is used for the primary disposal. The second disposal bed is strictly a reserve disposal bed as stated in the "Engineer's Report" dated December 21, 1994. The wastewater travels from the stores/offices to a primary treatment area, which includes a grease trap and equalization tank. The treated wastewater then enters the WTP where it under goes primary treatment, polishing and disinfection. The treated wastewater is then recycled to be used as toilet flush water in the store/office complex. The excess wastewater not used in recycling is treated and sent to the subsurface disposal beds.</p> <p>Residuals are removed on a periodic basis and managed off-site at an approved residuals management facility. The Department is granting a reduction in the number of parameters that must be reported on the annual residuals "production" Waste Characterization Report (WCR) at monitoring location SL1A, pursuant to N.J.A.C. 7:14C-1.13(c). The implementation of this change to the residuals "production" WCR is based upon the effective date of the permit renewal and will be activated at the beginning of the corresponding calendar year.</p>
