ANNUAL REPORT
Fiscal Year 2011

Business Employment Incentive Program (BEIP) Annual Report FY2011

In accordance with P.L. 2003, c.166, the New Jersey Economic Development Authority (EDA), submits this report detailing Fiscal Year 2011 activity for the Business Employment Incentive Program (BEIP).

As required by statute, the report includes the following: the number of BEIP agreements entered into by the State during FY2011 with a description of each; number of jobs created under each project; new income tax revenue received from withholdings; the amounts awarded to each project as grants; and, an update on the status of projects under each agreement.

Program Description

Created in 1996, BEIP continues to be a vital economic tool for the State of New Jersey during these challenging economic times, supporting the relocation and/or expansion of over four hundred companies, the actual creation of over 93,000 jobs, and the estimated total capital investment of over \$12.3 billion in New Jersey.

The program is administered by the EDA, which awards grants to qualified applicants for up to 10 years. These grants can equal 10% to 80% (criteria for percentage discussed below) of the total amount of state withholding taxes generated by the grantees' newly created jobs during the calendar year. The State retains the balance of the withholding tax revenue generated by the new jobs. Point-of-final purchase retail facilities are not eligible for BEIP grants.

To qualify for the program, a business must demonstrate that the BEIP grant is a "material factor" in the company's decision to relocate to or expand in New Jersey. In addition, an applicant must demonstrate that it is economically viable, and that it will create a minimum number of net new jobs (a minimum of 25 net new jobs must be created, unless the company is within the high technology or biotechnology industries, in which case the net new job creation minimum is 10). Qualifying businesses must also maintain the project in New Jersey for at least 1.5 times the number of years of the grant.

An applicant is given greater consideration if it demonstrates the creation of jobs that pay an average of 1.5 times the minimum wage during the grant agreement.

Other factors taken into consideration that can enhance an applicant's percentage award include:

- Job creation numbers;
- Number of jobs at risk of leaving New Jersey;
- Ratio of private to public investment;
- Amount of capital investment in the project;
- Average wage of the new jobs;
- Whether the project also involves construction or renovation; and
- Type of industry (companies within the high technology, biotechnology, pharmaceutical, financial services and logistics industries receive an enhanced award)

Furthermore, a bonus adjustment of up to an additional 30% can be awarded to the applicant for any one or a combination of the following:

- Location in Planning Area 1 or 2 of the State's Development and Redevelopment Plan or in an existing building(s) that have been 100% vacant for 12 months;
- Location in Planning Area 1 or 2 and the creation of 500 or more jobs or in an existing building(s) that have been 100% vacant for 12 months;
- Location in a former Urban Coordinating Council municipality or other distressed municipality as designated by DCA;
- Location in a brownfields site for first occupants after issuance of a No Further Action letter by DEP;
- Location in center designated by the State Planning Commission, or in a municipality with an endorsed plan;
- 10% or more of the employees receive an IRS qualified transportation benefit of at least \$30;
- Location in an area designated by the municipality as an "area in need of redevelopment";
- Whether the project is linked to housing creation or redevelopment utilizing at least 25% of the buildable area of the site;
- Company is working cooperatively with a public or non-profit university on research and development.

The State Treasurer must certify that the amount of the withholdings received from the business for the new employees at least equals the grant amount. Grant payments begin only after a review by EDA and the Department of Taxation which certifies that the jobs have actually been created and in existence for a year.

Overall BEIP Activity

From the inception of BEIP in 1996 through June 30, 2011, the EDA has executed 448 BEIP agreements valued at over \$1.4 billion over the term of the grants, supporting the creation of an estimated 82,860 new jobs, and leveraging over \$12.3 billion in total public/private investment. ***To date, BEIP grants have spurred the actual creation of 93,336 actual jobs, surpassing original estimates from the companies at the time of application. Over \$1 billion has been disbursed to date for the creation of these jobs.***

FY2011 BEIP Activity

During FY2011, the EDA executed 33 BEIP agreements worth an estimated \$73.2 million over the term of the grants (*Note: Executed projects are those in which the EDA Board has approved the project and a signed agreement between the company and the EDA has been finalized*).

The 33 projects are expected to create approximately 3,632 new jobs over the next two years. During FY2011, businesses representing these 33 projects have reported the actual creation of

267 new jobs. These projects are also anticipated to invest just over \$165 million in private funds in New Jersey.

EDA disbursed nearly \$178 million in FY2011 for previously executed BEIP grants.

Attached, as *Exhibit A*, is a list of all the projects which executed a BEIP grant agreement in FY2011, including the date of execution, award percentage, grant term, estimated job creation total, jobs created to date, estimated grant award total, total project investment, new gross income tax (estimated on projects creating jobs)¹, project location, originating city/state, and legislative district.

To date, there has been no disbursement to projects that executed in FY2011. (*Note: In many cases, no new withholding tax has yet been reported to the EDA by the company, as the recipient companies are not required to do so until they have reached their minimum job creation threshold*).

Also, attached, as *Exhibit B*, is a chart reflecting all BEIP grants executed to date since the inception of the program, including the FY2011 projects.

Budgetary Impact of BEIP Program

EDA's BEIP disbursement annual appropriation for FY2011 was \$175 million, and is being held at that same level for FY2012.

Highlights

Beginning in Winter 2010, EDA began a close working relationship with Lt. Governor Kim Guadagno in her role overseeing Governor Chris Christie's New Jersey Partnership for Action – a public-private partnership of three interconnected and highly focused organizational elements that serve as the hub for all economic development activity in New Jersey. As a result of Lt. Governor Guadagno's proactive outreach to businesses seeking to expand in or relocate to New Jersey, there have been several major successes.

EDA coordinates closely with Governor Christie, his policy office, and Lt. Governor Guadagno to ensure that all assistance programs align with the needs of the business community. This is evidenced by recent enhancements to the Business Retention and Relocation Assistance Grant (BRRAG) Program - a grant of corporation business tax credits (or insurance premiums tax credits as applicable) to businesses to assist them in retaining jobs and developing projects that relocate within the state. Utilized frequently in combination, BEIP and BRRAG have proven to be powerful incentives that have resulted in several major job creation and retention wins for the State of New Jersey.

¹ The Gross Income Tax (GIT) estimates are only reported for companies that have created jobs and achieved their Minimum Employment Threshold (MET). The MET for Tech companies is 10 jobs; for all others it is 25 jobs.

Additionally, Governor Christie recently introduced his “State Strategic Job Growth Plan” in October 2011 and, in November 2011, the EDA Board of Directors took action to enhance the EDA’s policy for reviewing BEIP applications to ensure alignment with the Plan.

The Governor’s plan specifically calls out the importance of New Jersey’s “world-class colleges and universities that not only educate but have the potential to invest in research and development with the private sector.” Under the policy revision, the EDA changed its scoring criteria utilized in determining the grant award under BEIP as relates to companies that are working cooperatively with public or non-profit universities on research and development.

Prior to the change, a company was given a 10% bonus if they were “within 5 miles of and working cooperatively with a public or non-profit university on research and development.” In order to more effectively promote the collaboration between the private sector and New Jersey’s institutions of higher education, EDA removed the language requiring the BEIP facility be located within 5 miles of the public or non-profit university, allowing all companies seeking to collaborate with New Jersey higher educational facilities in this manner to benefit from the bonus scoring.

Below are examples of three of the many businesses assisted through BEIP under the Christie Administration.

PNY Technologies, Parsippany

PNY Technologies, headquartered in Parsippany, manufactures computer graphics cards, PC memory, flash drives, and flash cards. The New Jersey Partnership for Action worked diligently to keep this company in New Jersey after PNY had outgrown its existing, leased facility in Parsippany. To support PNY’s expansion in New Jersey, EDA provided a BEIP grant worth an estimated \$580,000 over 10 years based on the company’s expected creation of 100 new jobs. This assistance enabled the company to purchase an adjacent 650,000 sq. ft. vacant property (formerly occupied by Pfizer.) PNY will also benefit from a \$455,000 BRRAG and \$636,488 Sales and Use Tax Exemption (STX) to help it maintain its staff of 325. The expansion represents the private investment of over \$25 million.

Futurewei Technologies, Bridgewater

Futurewei Technologies, a telecommunications equipment company, received a BEIP grant worth an estimated \$1.3 million over ten years from the EDA to support its growth in Bridgewater. Futurewei Technologies is a U.S. subsidiary of China-based Huawei Technologies, a leading telecom provider with products in over 100 countries. This assistance will enable the company to remain in New Jersey and expand by 35,000 – 45,000 sq. feet in Bridgewater, as opposed to relocating to a competing site in Philadelphia. As a result of this assistance, Futurewei expects to create 90 new jobs over the next two years. Futurewei Technologies engages in the research and development, manufacturing, sales, and marketing of wireless and wire line networking and telecommunications equipment. The company provides enterprise network solutions including video conferencing and networking solutions.

Aricent Inc., East Brunswick

Aricent provides communications software and related services for the communications industry. The company's products support the development of mobile devices and applications, wireless and wireline infrastructure, and carrier operational and business systems. Aricent Inc. received a BEIP grant worth just over \$2.3 million over 10 years based on the creation of 100 new jobs. This assistance enabled the company to relocate a portion of its operations from Palo Alto, CA and Tarrytown, NY to East Brunswick, resulting in an estimated 100 new jobs and \$1.6 million in capital investment.

BEIP Program History

See *Exhibit C* for a year-by-year summary of major changes made to the Business Employment Incentive Program since its inception in 1996.

BEIP Monthly Updates

* The recipient has two calendar years from the date of the board approval, or if the project involves construction, 2 calendar years from the date of issuance of the Certificate of Occupancy, to create the estimated new jobs.

Overview of Legislative/Regulatory Changes

In September 2003, following a review by the NJ Business Incentives Study Commission made up of government officials and business leaders, legislative amendments were made to the BEIP Act to enhance the program, making it available to a larger range of businesses, with more targeted focus on technology-based industries. The amendments were as follows:

- Lowered Minimum Eligibility Threshold (MET) for all applicants. Originally, a business had to create 75 new jobs to be eligible (unless they were located in a targeted municipality, in which case the threshold was 25); the threshold is now 25, regardless of location. However, if the company is within the tech/biotechnology industry, the MET is 10.
- An additional 5% was added to the score for specific growth industries; i.e., high tech/biotechnology, pharmaceuticals, financial services, transportation and logistics.
- BEIP was changed to cap the award at up to 50% of state withholding, but with an additional increase of up to 30% if the company utilized Smart Growth principles, or, located in close proximity to and working cooperatively with a public or non-profit university on research and development.
- The 2003 amendments gave EDA the power to issue bonds, backed by a State contract, to fund the payment of BEIP grants in any year in which a State appropriation was not available for grants. That practice is no longer undertaken.¹

In 2004, New Jersey Policy Perspective (NJPP), a not for -profit and nonpartisan research and educational organization, published the report "Taking Care of Business—Does it Cost Too Much?" which analyzed BEIP to determine the program's effectiveness and made recommendations for improvements. In response to the report, the State Treasurer asked Rutgers University's Edward J. Bloustein School of Policy and Planning to study the program, as well as the NJPP's recommendations, and to make any other recommendations necessary to more effectively manage the program.

Based on the Rutgers' study, the EDA Board of Directors adopted a number of modifications to the program in October 2004, including requiring BEIP recipients to maintain 80% of their statewide employment (documented at the time of application) for the grant commitment period, and imposing new guidelines governing additional funding for jobs created in excess of the initial employment committed.

In October 2004, the EDA Board of Directors adopted additional modifications to enhance the program based on internal program review, including regulations allowing the Authority to: seek full repayment of funds if a company moves out of state; withhold, reduce or terminate payment of a grant or any portion thereof should a BEIP recipient default on the grant agreement; and, recapture grant monies already paid to the company in the event of default.

In order to increase public access to information, the EDA also began posting regularly updated reports of BEIP activity on the EDA website.

Below is a summary of the new rules that governed BEIP companies approved after October 2004.

- Net Increase in Jobs - Statewide Compliance -- All companies and any of their subsidiaries eligible under the grant agreement must maintain at least 80% of their statewide base employment number indicated at the time of approval throughout the Commitment Duration, generally 15 years.

¹ This amendment also authorized EDA to use bond proceeds to support Designated Industries Economic Growth and Development projects. In 2003, the Joint Budget Oversight Committee approved an EDA bond resolution totaling \$60 million to fund such projects. To date, the EDA had committed \$35 million of these bond funds for the following programs: \$10 million for Springboard II Fund providing recoverable grants to start-up life sciences and high tech companies; \$10 million for investment in the new Garden State Life Sciences Venture Fund, and \$15 million for the expansion/construction of technology commercialization centers within the newly established Innovation Zones in Camden, Newark and the greater New Brunswick area.

- New Employment Commitment Cap -- The annual payments will be capped at the dollar amount equal to 20% above the original New Employment Commitment (NEC), adjusted annually by the CPI. Companies with 100 employees or less at the time of approval are exempt from cap. The cap may be lifted, at EDA's discretion, when companies are making significant leasehold improvements or renovations to accommodate growth at site, or when manufacturing companies make a significant capital investment

New rules were also adopted in 2004 impacting all BEIP recipients that addressed full recapture, sliding scale recapture, withholding of grant payments and grant award percentage adjustments

On January 4, 2008, legislation was enacted that clarified the prevailing wage applicability to workers engaged in construction or renovation incident to certain Authority assisted projects. Not less than prevailing wage rate must be paid to workers employed in the performance of any construction contract undertaken in connection with Authority financial assistance, including BEIP.

The prevailing wage requirement applies unless the work performed under the contract is performed on a facility owned by a landlord of the entity receiving the assistance and less than 55% of the facility is leased by the entity at the time of the contract and under any agreement to subsequently lease the facility. The prevailing wage requirement is also exempted from construction commencing more than two years after an entity has executed with the Authority a commitment letter regarding Authority financial assistance and the first payment or other provision of the assistance is received.
