Sukhrob Khalilov

Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized."Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

Following the record breaking April, May data preserved the momentum with 10.1 million, the best May ever. This represents 2.2% increase over similar period last year. Domestic traffic fell 0.5% but all the growth was attributable to a 7.2% gain in the international sector. This pushed YTD up 1.6%. Relatively high load factors and seat capacity expansion in international destinations were the main contributors in May's traffic increase. With carriers reporting solid summer booking, we remain optimistic for further passenger growth at our airports. Region's cargo posted a modest 0.2% increase as domestic fell 9.4% and international grew 5.6%.
