ANNUAL REPORT
Fiscal Year 2012

Business Employment Incentive Program (BEIP) Annual Report FY2012

In accordance with P.L. 2003, c.166, the New Jersey Economic Development Authority (EDA), submits this report detailing Fiscal Year 2012 activity for the Business Employment Incentive Program (BEIP).

As required by statute, the report includes the following: the number of BEIP agreements entered into by the State during FY2012 with a description of each; number of jobs created under each project; new income tax revenue received from withholdings; the amounts awarded to each project as grants; and, an update on the status of projects under each agreement.

Program Description

Created in 1996, BEIP continues to be a vital economic tool for the State of New Jersey during these challenging economic times, supporting the relocation and/or expansion of nearly five hundred companies, the creation of over 100,000 jobs, and the estimated total capital investment of over \$12.6 billion in New Jersey.

The program is administered by the EDA, which awards grants to qualified applicants for up to 10 years. These grants can equal 10% to 80% (criteria for percentage discussed below) of the total amount of state withholding taxes generated by the grantees' newly created jobs during the calendar year. The State retains the balance of the withholding tax revenue generated by the new jobs. Point-of-final purchase retail facilities are not eligible for BEIP grants.

To qualify for the program, a business must demonstrate that the BEIP grant is a "material factor" in the company's decision to relocate to or expand in New Jersey. In addition, an applicant must demonstrate that it is economically viable, and that it will create a minimum number of net new jobs (a minimum of 25 net new jobs must be created, unless the company is within the high technology or biotechnology industries, in which case the net new job creation minimum is 10). Qualifying businesses must also maintain the project in New Jersey for at least 1.5 times the number of years of the grant.

An applicant is given greater consideration if it demonstrates the creation of jobs that pay an average of 1.5 times the minimum wage during the grant agreement.

Other factors taken into consideration that can enhance an applicant's percentage award include:

- Job creation numbers;
- Number of jobs at risk of leaving New Jersey;
- Ratio of private to public investment;
- Amount of capital investment in the project;
- Average wage of the new jobs;
- Whether the project also involves construction or renovation; and
- Type of industry (companies within the high technology, biotechnology, pharmaceutical, financial services and logistics industries receive an enhanced award)

Furthermore, a bonus adjustment of up to an additional 30% can be awarded to the applicant for any one or a combination of the following:

- Location in Planning Area 1 or 2 of the State's Development and Redevelopment Plan or in an existing building(s) that have been 100% vacant for 12 months;
- Location in Planning Area 1 or 2 and the creation of 500 or more jobs or in an existing building(s) that have been 100% vacant for 12 months;
- Location in a former Urban Coordinating Council municipality or other distressed municipality as designated by DCA;
- Location in a brownfields site for first occupants after issuance of a No Further Action letter by DEP;
- Location in center designated by the State Planning Commission, or in a municipality with an endorsed plan;
- 10% or more of the employees receive an IRS qualified transportation benefit of at least \$30;
- Location in an area designated by the municipality as an "area in need of redevelopment";
- Whether the project is linked to housing creation or redevelopment utilizing at least 25% of the buildable area of the site;
- Company is working cooperatively with a public or non-profit university on research and development.
- Business is located within Federally-owned or former Federally-owned land recommended for closure by the Base Realignment and Closing Commission and approved by the President on September 8, 2005 and U.S. House of Representatives on October 27, 2005 or within a facility used as a base for military activity that may include Federal offices and private businesses

The State Treasurer must certify that the amount of the withholdings received from the business for the new employees at least equals the grant amount. Grant payments begin only after a review by EDA and the Department of Taxation which certifies that the jobs have actually been created and in existence for a year.

Overall BEIP Activity

From the inception of BEIP in 1996 through June 30, 2012, the EDA has executed 472 BEIP agreements valued at over \$1.5 billion over the term of the grants and leveraging over \$12.6 billion in total public/private investment. ***To date, BEIP grants have spurred the creation of 100,897 actual jobs, surpassing original estimates from the companies at the time of application. Over \$1.2 billion has been disbursed to date for the creation of these jobs.***

FY2012 BEIP Activity

During FY2012, the EDA executed 41 BEIP agreements worth an estimated \$71.9 million over the term of the grants (*Note: Executed projects are those in which the EDA Board has approved the project and an agreement between the company and the EDA has been executed*).

The 41 projects are expected to create approximately 3,892 new jobs over the next two years. During FY2012, businesses representing these 33 projects have reported the actual creation of 224 new jobs. These projects are also anticipated to invest just over \$349 million in private funds in New Jersey.

Attached, as *Exhibit A*, is a list of all the projects which executed a BEIP grant agreement in FY2012, including the date of execution, award percentage, grant term, estimated job creation total, jobs created to date, estimated grant award total, total project investment, new gross income tax (estimated on projects creating jobs)¹, project location, originating city/state, and legislative district.

To date, there has been no disbursement to projects that executed in FY2012. (*Note: In many cases, no new withholding tax has yet been reported to the EDA by the company, as the recipient companies are not required to do so until they have reached their minimum job creation threshold*).

Also, attached, as *Exhibit B*, is a chart reflecting all BEIP grants executed to date since the inception of the program, including the FY2012 projects.

Budgetary Impact of BEIP Program

EDA's annual appropriation for BEIP disbursement in FY2012 was \$175 million, and is being held at that same level for FY2013.

Highlights

EDA continues to work closely with Lt. Governor Kim Guadagno in her role overseeing Governor Chris Christie's New Jersey Partnership for Action – a public-private partnership of three interconnected and highly focused organizations that serve as the hub for all economic development activity in New Jersey. As a result of Lt. Governor Guadagno's proactive outreach to businesses seeking to expand in or relocate to New Jersey, there have been several major successes that contributed to economic growth in New Jersey.

EDA coordinates closely with Governor Christie, his policy office, and Lt. Governor Guadagno to ensure that all assistance programs align with the needs of the business community. This is evidenced by recent enhancements to the Business Retention and Relocation Assistance Grant (BRRAG) Program - a grant of corporation business tax credits (or insurance premiums tax credits as applicable) to businesses to assist them in retaining jobs and developing projects that may relocate within the state. Utilized frequently in combination, BEIP and BRRAG have proven to be powerful incentives that have resulted in several major job creation and retention wins for the State of New Jersey.

¹ The Gross Income Tax (GIT) estimates are only reported for companies that have created jobs and achieved their Minimum Employment Threshold (MET). The MET for Tech companies is 10 jobs; for all others it is 25 jobs.

Additionally, Governor Christie recently introduced his “State Strategic Job Growth Plan” in October 2011 and, in November 2011, the EDA Board of Directors took action to enhance the EDA’s policy for reviewing BEIP applications to ensure alignment with the Plan.

The Governor’s plan specifically calls out the importance of New Jersey’s “world-class colleges and universities that not only educate but have the potential to invest in research and development with the private sector.” Under the policy revision, the EDA changed its scoring criteria utilized in determining the grant award under BEIP as relates to companies that are working cooperatively with public or non-profit universities on research and development.

Prior to the change, a company was given a 10% bonus if they were “within 5 miles of and working cooperatively with a public or non-profit university on research and development.” In order to more effectively promote the collaboration between the private sector and New Jersey’s institutions of higher education, EDA removed the language requiring the BEIP facility be located within 5 miles of the public or non-profit university, allowing all companies seeking to collaborate with New Jersey higher educational facilities in this manner to benefit from the bonus scoring.

Below are examples of three of the many businesses assisted through BEIP under the Christie Administration.

Church & Dwight Co., Inc., Ewing/Princeton/Lakewood

EDA executed a BEIP grant with Church & Dwight for just over \$2.6 million, a BRRAG for just over \$13.5 million, and a \$2.5 million Sales and Use Tax Exemption to relocate its corporate headquarters to a 250,000 s.f. facility in Ewing Township. Church & Dwight is a publicly held consumer products company, known best for its Arm & Hammer Baking Soda. Among the brand names produced by Church & Dwight include: Arm & Hammer, Trojan, Oxiclean, Spinbrush, First Response, Nair, Orajel, and Xtra. This assistance would enable the company to keep its operations in New Jersey instead of relocating the facility to a competing location in Pennsylvania. This assistance is expected to result in the retention of 1,004 jobs in New Jersey (514 in Ewing, 250 in Lakewood, 240 in Princeton), the creation of 133 new jobs (105 in Ewing), and \$79.5 million in capital investment. At the groundbreaking ceremony for the new Ewing headquarters, company executives commended the pro-business efforts of the Christie Administration and credited the State’s incentives and customer service provided through the decision-making process with keeping the company in New Jersey.

Allergan Inc., Bridgewater

EDA executed a BEIP grant with Allergan, Inc for nearly \$15 million to open a new 100,000 s.f. R&D facility in Bridgewater. Allergan, Inc. is a multi-specialty health care company focused on ophthalmology, neuro science, medical aesthetics, dermatology, obesity intervention, and urologics. This assistance, which will leverage \$11.6 million in capital investment, will enable the company to create an estimated 387 high-wage pharmaceutical jobs in New Jersey as opposed to a competing site in Pennsylvania. In September 2012, Allergan joined federal, state

and local government officials, community leaders, physicians and employees to celebrate its commitment to New Jersey with a ribbon-cutting of the new facility.

Watson Pharmaceuticals, North Brunswick

EDA executed a BEIP grant with Watson Pharmaceuticals for nearly \$600,000 to create 50 new R&D positions at EDA's Commercialization Center for Innovative Technologies (CCIT) IN North Brunswick. Watson Pharmaceuticals is a global generic pharmaceutical company engaged in the development, manufacturing, marketing, sale, and distribution of generic, brand, and biologic pharmaceutical products. The company previously received BEIP assistance in 2010 related to the creation of 300 new jobs in Parsippany. Lt. Governor Guadagno and the New Jersey Business Action Center played a major role in keeping this company in New Jersey.

BEIP Program History

See *Exhibit C* for a year-by-year summary of major changes made to the Business Employment Incentive Program since its inception in 1996.

BEIP Monthly Updates

For monthly updates on executed BEIP projects, please visit the EDA's website at <http://www.njeda.com/beipactivity>.

Exhibit C

Overview of Legislative/Regulatory Changes

In September 2003, following a review by the NJ Business Incentives Study Commission made up of government officials and business leaders, legislative amendments were made to the BEIP Act to enhance the program, making it available to a larger range of businesses, with more targeted focus on technology-based industries. The amendments were as follows:

- Lowered Minimum Eligibility Threshold (MET) for all applicants. Originally, a business had to create 75 new jobs to be eligible (unless they were located in a targeted municipality, in which case the threshold was 25); the threshold is now 25, regardless of location. However, if the company is within the tech/biotechnology industry, the MET is 10.
- An additional 5% was added to the score for specific growth industries; i.e., high tech/biotechnology, pharmaceuticals, financial services, transportation and logistics.
- BEIP was changed to cap the award at up to 50% of state withholding, but with an additional increase of up to 30% if the company utilized Smart Growth principles, or, located in close proximity to and working cooperatively with a public or non-profit university on research and development.
- The 2003 amendments gave EDA the power to issue bonds, backed by a State contract, to fund the payment of BEIP grants in any year in which a State appropriation was not available for grants. That practice is no longer undertaken.¹

In 2004, New Jersey Policy Perspective (NJPP), a not for -profit and nonpartisan research and educational organization, published the report “Taking Care of Business—Does it Cost Too Much?” which analyzed BEIP to determine the program’s effectiveness and made recommendations for improvements. In response to the report, the State Treasurer asked Rutgers University’s Edward J. Bloustein School of Policy and Planning to study the program, as well as the NJPP’s recommendations, and to make any other recommendations necessary to more effectively manage the program.

Based on the Rutgers’ study, the EDA Board of Directors adopted a number of modifications to the program in October 2004, including requiring BEIP recipients to maintain 80% of their statewide employment (documented at the time of application) for the grant commitment period, and imposing new guidelines governing additional funding for jobs created in excess of the initial employment committed.

In October 2004, the EDA Board of Directors adopted additional modifications to enhance the program based on internal program review, including regulations allowing the Authority to: seek full repayment of funds if a company moves out of state; withhold, reduce or terminate payment of a grant or any portion thereof should a BEIP recipient default on the grant agreement; and, recapture grant monies already paid to the company in the event of default.

In order to increase public access to information, the EDA also began posting regularly updated reports of BEIP activity on the EDA website.

¹ This amendment also authorized EDA to use bond proceeds to support Designated Industries Economic Growth and Development projects. In 2003, the Joint Budget Oversight Committee (JBOC) approved an EDA bond resolution totaling \$60 million to fund such projects. To date, the EDA had committed \$35 million of these bond funds for the following programs: \$10 million for Springboard II Fund providing recoverable grants to start-up life sciences and high tech companies; \$10 million for investment in the new Garden State Life Sciences Venture Fund, and \$15 million for the expansion/construction of technology commercialization centers within the newly established Innovation Zones in Camden, Newark and the greater New Brunswick area. In May 2011, JBOC approved EDA’s proposal to deploy approximately \$13 million in funds from BEIP bond proceeds to support technology and life science industry in New Jersey through the Edison Innovation Fund.

Below is a summary of the new rules that governed BEIP companies approved after October 2004.

- Net Increase in Jobs - Statewide Compliance -- All companies and any of their subsidiaries eligible under the grant agreement must maintain at least 80% of their statewide base employment number indicated at the time of approval throughout the Commitment Duration, generally 15 years.
- New Employment Commitment Cap -- The annual payments will be capped at the dollar amount equal to 20% above the original New Employment Commitment (NEC), adjusted annually by the CPI. Companies with 100 employees or less at the time of approval are exempt from cap. The cap may be lifted, at EDA's discretion, when companies are making significant leasehold improvements or renovations to accommodate growth at site, or when manufacturing companies make a significant capital investment

New rules were also adopted in 2004 impacting all BEIP recipients that addressed full recapture, sliding scale recapture, withholding of grant payments and grant award percentage adjustments

On January 4, 2008, legislation was enacted that clarified the prevailing wage applicability to workers engaged in construction or renovation incident to certain Authority assisted projects. Not less than prevailing wage rate must be paid to workers employed in the performance of any construction contract undertaken in connection with Authority financial assistance, including BEIP.

The prevailing wage requirement applies unless the work performed under the contract is performed on a facility owned by a landlord of the entity receiving the assistance and less than 55% of the facility is leased by the entity at the time of the contract and under any agreement to subsequently lease the facility. The prevailing wage requirement is also exempted from construction commencing more than two years after an entity has executed with the Authority a commitment letter regarding Authority financial assistance and the first payment or other provision of the assistance is received.

In October 2011, Governor Christie introduced his "State Strategic Job Growth Plan" which emphasized the importance of New Jersey's "world-class colleges and universities that not only educate but have the potential to invest in research and development with the private sector." In November 2011, the EDA Board of Directors took action to enhance the EDA's policy for reviewing BEIP applications to ensure alignment with the Plan. Under the policy revision, the EDA changed its scoring criteria utilized in determining the grant award under BEIP as relates to companies that are working cooperatively with public or non-profit universities on research and development.

Prior to the change, a company was given a 10% bonus if they were "within 5 miles of and working cooperatively with a public or non-profit university on research and development." In order to more effectively promote the collaboration between the private sector and New Jersey's institutions of higher education, EDA removed the language requiring the BEIP facility be located within 5 miles of the public or non-profit university, allowing all companies seeking to collaborate with New Jersey higher educational facilities in this manner to benefit from the bonus scoring.

Additionally, the EDA Board took further action in February 2012 to bolster the Fort Monmouth Economic Revitalization Authority's efforts to promote economic development and job creation at Fort Monmouth, which was chosen for closure by the Federal Base Realignment and Closing (BRAC) Commission and resulted in a negative economic impact to the Monmouth County region, particularly in the municipalities of Eatontown, Oceanport and Tinton Falls. The EDA Board approved a policy revision which provides for allows for BEIP applicants that are seeking to create jobs at facilities located within the Fort's 1,127 acres to be provided bonus scoring of 15 percent under the BEIP calculation used to determine grant awards. In the interest of further encouraging statewide economic activity, the Board also approved extending this bonus scoring to other NJ military installations that have allowed private businesses on base (i.e. Picatinny Arsenal and the William J. Hughes Technical Center of the FAA.) The Board's action aligns with other policy enhancements to EDA programs which identify facilities within Federally-owned land approved for closure by BRAC to be eligible for economic development incentives.

The most recent BEIP scoring provisions surrounding higher education and former military bases chosen for closure by BRAC were added by amendment to the rules implementing BEIP effective June 18, 2012.
