Dear Reader:

This year was another successful year for the nation in the reduction of fatal motor vehicle crashes. In 2019, the recorded nationwide death toll on our roadways was 36,096 fatalities. This is an approximate decrease of 464 fatalities from 2018. In 2019, New Jersey recorded the same number of fatal collisions as in 2018 with 524 fatal crashes, however, 2019 recorded five fewer deaths with 558 fatalities. This represents an average of 1.53 motor vehicle fatalities per day. In an effort to continue this trend, the law enforcement community reaffirms its commitment to reducing these occurrences through enforcement and education of the motoring public.

As traffic-related deaths continue to be the leading cause of accidental deaths in New Jersey and the nation, we must continue our efforts in traffic safety awareness. State, county and local agencies along with our other non-profit partners remain steadfast in improving traffic and public safety efforts. Although the total number of fatal collisions in New Jersey remained unchanged from 2018, it is encouraging to note that pedalcyclist fatalities were down nearly 30%, and alcohol-involved crashes were down as well.

On the following pages, you will find statistics concerning this past calendar year's fatal motor vehicle crashes. The information was compiled by the Fatal Accident Investigation Unit within the Division of State Police. This report constitutes a detailed look at the causes and results of fatal crashes throughout the state during 2019. We are hopeful that with the continued efforts and cooperation of federal, state and local agencies, as well as the motoring public, that the number of traffic-related deaths continue to trend downward.

Sincerely,

Patrick J. Callahan
Colonel
