ANALYSES OF NEW JERSEY PUBLIC LIBRARY STATISTICS FOR 1997

Prepared from annual reports submitted
by the public libraries of New Jersey

John H. Livingstone, Jr.
State Librarian

Compiled by
Robert K. Fortenbaugh
Assistant Coordinator, Library Programs

New Jersey State Library
Affiliated with Thomas Edison State College
PO Box 520
Trenton, New Jersey 08625-0520

October 1998

ACKNOWLEDGMENTS

Acknowledgment is made to the Library Research Center, Graduate School of Library Science, University of Illinois at Urbana-Champaign, whose **Analyses of the 1979-80 Illinois Public Library Statistics** (1980) provided the model, general format and some of the analytical measures used in this publication.

Other useful data was obtained from **Output Measures for Public Libraries: A Manual of Standardized Procedures**, by Douglas Zweizig and Eleanor Jo Rodger, American Library Association (Goals, Guidelines and Standards for Public Libraries Committee, Public Library Association), 1982.

The computer programs used in this compilation were originally developed by the Bureau of Information Resources Management, Division of Administration, New Jersey State Department of Education. With the transfer of the State Library in 1997 from the Department of Education to an affiliation with Thomas Edison State College, the programs have been migrated to SAS for Windows. The programs have been executed by the staff of the Library Development Bureau at the State Library.

PREFACE

Made possible by the entering of 1997 data into the public library database, the purpose of this volume is to add meaning to the statistics of New Jersey's diverse public libraries. By reducing such large amounts as equalized valuation to a per-capita basis or by looking at circulation of library materials compared to the number of volumes owned, for example, libraries of all sizes can be viewed in a new way.

As this publication is intended to assist the public library director and board of trustees, your comments and suggestions are welcomed and needed. Please send me your ideas at your earliest convenience.

Robert K. Fortenbaugh
Assistant Coordinator, Library Programs
New Jersey State Library

FTE PER M POP - Full-time equivalent staff per 1,000 population: Number of full-time equivalent staff per 1,000 population.

FTE PER WK HRS OPEN - Full-time equivalent staff per week hours open: Number of full-time equivalent staff per number of hours main library was open for public service in a week.

VOLS PER CAP - Volumes per capita: Number of cataloged volumes in the collection at the end of the year, per capita.

% VOLS ADDED - Percent of volumes added: Percent of volumes held that were purchased and added to the collection.

VOLUMES ADDED PER CAP - Volumes added per capita: Number of cataloged volumes purchased and added per capita.

TOT EXP PER CAP (\$) - Total expenditures per capita, in dollars: Total library expenditures in dollars per capita.

MAT EXP PER CAP (\$) - Materials expenditures per capita, in dollars: Library materials expenditures in dollars per capita.

TOT EXP PER CIRC (\$) - Total expenditures per circulation, in dollars: Total library expenditures in dollars per circulation transaction.

TOT EXP PER HR OPEN (\$) - Total expenditures per hours open, in dollars: Total library expenditures in dollars per number of hours main library was open for public service in a week.

These ratios and percentages are shown first by county and statewide summary, then by regional subtotals. Next, the averages and percentiles of the printed and derived data are presented in statewide and regional summaries. Then, ratios and percentages are shown for each library individually within each population or expenditure group. After each population group or expenditure category, the averages and percentiles of the printed and derived data are given. The averages for ratios and percentages are based on data in each case for all libraries taken separately rather than the total of one data element divided by the total of another element.

A ranking of local tax support per \$1,000 of Equalized Valuation has been continued. All computed values for the variable "LOC TX SUP PER \$1,000 EV" have been ranked from low to high for all 294 libraries reporting. Where a "." is printed, the variable has not been computed because data were not reported.

Suggested Use of the Tables

Individual libraries can readily be compared with others in the same population-served group or the same expenditure category. For example, the Parsippany-Troy Hills Public Library serves a population of 49,574 and has total expenditures of \$1,609,606. It is listed individually in the tables for "**Population=37,500-49,999**" and "**Total Expenditures= \$1,000,000-2,000,000.**" When compared with other libraries in the same population group (see page 42, "**Averages and Percentiles of Statistics ... Population = 37,500-49,999**"), Parsippany's local tax support per capita is \$29.33, just below the group average of \$29.58. Its 8.7 **circulations per capita** are at the 75th percentile of 8.7. Another measure of collection use is that of **circulations per volume held** which at 2.7 is also at the 75th percentile in a group whose average is 2.0. Parsippany holds 3.21 **volumes per capita**, below the 50th percentile in the group.

When compared to the other 38 libraries in the same expenditure category (see page 72), Parsippany's **local tax support per capita** (\$29.33) is well below the 50th percentile (\$38.60), while its **circulations per capita** (8.7) are above the 50th percentile (7.5). Parsippany's **total expenditure per circulation** is \$3.73, placing it below the 25th percentile in this group (\$4.23).

With this brief example, it can be seen that any library can compare itself not only with other libraries but with other groups of libraries.

In order to make the tables in this volume as meaningful as possible, data which are missing have been excluded from the calculations. Where a data element cannot be computed, an X is printed in the column. In figuring averages and other statistics for the group, that library's ratio or percentage is deleted. A final word of caution on interpretation of the tables in this volume. Although every effort has been made to include only meaningful information in the calculations, one or two libraries which are very different from group as a whole can alter the averages enough that a truly representative picture is not shown, especially when the total group is small. This may be so in certain columns, especially in the largest population and highest expenditure categories, as well as the statewide totals. Because of very high values reported by some large libraries, those averages and standard deviations may be distorted. In such cases, the percentile rankings will be less influenced.
