ANALYSES OF NEW JERSEY PUBLIC LIBRARY STATISTICS FOR 1982

Prepared under the direction of the
Office of Library Planning and Development
from reports submitted by the public libraries of New Jersey

Barbara F. Weaver
Assistant Commissioner of Education and State Librarian

Compiled by
Oliver P. Gillock, Jr.

New Jersey State Department of Education
Division of the State Library
185 W. State Street
Trenton, New Jersey 08625-0520

January 1984

ACKNOWLEDGMENTS

Thanks are given to the Library Research Center, Graduate School of Library Science, University of Illinois of Urbana-Campaign, whose **Analyses of the 1979-80 Illinois Public Library Statistics** (1980) provided the model, general format and some of the analytical measures used in this publication.

Other useful data was obtained from **Output Measures for Public Libraries: A Manual of Standardized Procedures**, by Douglas Zweizig and Eleanor Jo Rodger, American Library Association (Goals, Guidelines and Standards for Public Libraries Committee, Public Library Association), 1982.

Staff of the Library Development Bureau who provided encouragement and assistance were Henry J. Michniewski, Robert A. Drescher, Selma P. Kessler and Richard Colucci.

The computer programs needed for this compilation were developed by the Bureau of Data Processing, Division of Administration, New Jersey State Department of Education.

Word-processing of the introductory material in this volume was done by Donna G. Wooton. Cover design was by Carol J. Du Bois.

PREFACE

This publication is an experimental one, produced from data previously gathered and published in **New Jersey Public Library Statistics for 1982**. Made possible by the inputting of 1982 data into the public library data base, the purpose of this volume is to add meaning to the statistics of New Jersey's diverse public libraries.

By reducing such large amounts as equalized valuation to a per-capita basis and by looking at circulation of library materials in light of the number of volumes held, for example, libraries small and large can be viewed in a new way.

The choice of the statistics analyzed was dictated by those measures published in the **New Jersey Public Library Statistics for 1982** (including changes listed in the errata sheet dated January 9, 1984). Only those measures published could be compared with each other, to form the columns printed here. Staff of the Library Development Bureau assisted the compiler in choosing the measures to be analyzed.

For the 1982 statistics, all data reported on numbered lines has been input into the public library data base. Therefore, it would be possible to expand the **1982 Analyses...** volume to include many new measures. Since this publication is intended to assist the public library director and board of trustees, your comments and suggestions are welcomed and needed. Please send me your ideas at your earliest convenience.

Oliver P. Gillock, Jr.

Development
New Jersey State Library

INTRODUCTION

Analyses of New Jersey Public Library Statistics for 1982 interprets data obtained from the annual reports of 304 public libraries. Using data published in **New Jersey Public Library Statistics for 1982**, this publication analyses data in several different ways.

The libraries have been divided into groups by population and expenditure levels. Therefore, each library is listed twice. After each population or expenditure listing, a page follows which gives the arithmetic average, standard deviation, high, low, three percentile ranks and number of libraries reporting, calculated for each data element. The top of each "averages and percentiles" page presents columns previously published in **New Jersey Public Library Statistics for 1982**. The bottom of each page gives columns for this volume. (Because of limitations of computer-formatted printing, some columns may appear in a different grouping, but all columns are listed in the same order on all pages.)

The **average** (arithmetic mean) is the sum of all libraries in a group divided by the number of libraries in that group. The **standard deviation** is a measure of distribution around the average of the values for all libraries in the group. In a normal distribution, roughly two-thirds of the values fall within plus-or-minus one standard deviation from the mean. The **maximum** is the highest value reported for the group; the **minimum** is the lowest value reported. The three **percentile** ranks, **75th**, **50th**, and **25th**, are the values below which 75% of the group, 50% of the group, and 25% of the group are found.

For items summarized from the **New Jersey Public Library Statistics for 1982**, see pages 2-4 of that publication for definitions of the column headings.

Each library is listed by **LIBRARY NAME**, **POPUL SERVED 1982** (in the population listings), or **TOTAL EXPENDS** (in the expenditures listing) and **CO**, a two-digit **COUNTY** code, for which a key is provided in the County/Statewide Summary.

Several ratios and percentages for each library were calculated from the data available, as defined above. They are as follows:

Column Heading	Explanation (All data is for 1982)
EQ VAL PER CAP (\$)	Equalized valuation per capita, in dollars: "Equalized valuation" is the true value of real property within a local taxing district, computed from the aggregate assessed valuation and actual sales of property, and used to distribute equitably State school and library aid, apportion county taxes, and measure municipal debt limits.
LOC TX SUP PER \$1000 EV	Local tax support per \$1,000 in Equalized Valuation: Local tax support (income) for the public library per \$1,000 in Equalized Valuation. This is a measure of the local support of the library compared to the true value of real property of the municipality or county.
LOC TAX SUP PER CAP (\$)	Local tax support per capita, in dollars: The library income from local tax sources, per capita. This is another measure of the local support of the library.
LOC TAX SUP % OF TOT INC	Local tax support as a percentage of total income: The percentage of the library's total current operating income from local tax support.

Column Heading	Explanation
PCSA % OF TOT INC	Per Capita State Library Aid as a percentage of total income: The percentage of the library's total income from the category of state library aid known as "per capita" aid.
PCSA % OF LOC TX SUP + PCSA	Per Capita State Library Aid as a percentage of the sum of local tax support and Per Capita State Library Aid: The percentage of the library's total budget from local-tax and state-aid sources that Per Capita State Library Aid represents.
SAL, W, B % OF TOT EXP	Salaries, wages and benefits as a percentage of total expenditures: Percent of total expenditures spent for salaries, wages and benefits of library employees, including maintenance personnel.
LIB MAT % OF TOT EXP	Library materials as a percentage of total expenditures: Percent of total expenditures spent for all library materials.
CIRC PER CAP	Circulations per capita: Number of circulation transactions per capita of the population served.
CIRC PER FTE	Circulations per full-time equivalent staff: Number of circulation transactions per full-time equivalent staff (based on a minimum 30-hour week, or actual).
CIRC PER VOL HELD	Circulations per volumes held: Number of circulation transactions per cataloged volumes in the collection at the end of the year.
CIRC PER HRS OPEN	Circulations per hours open: Total weekly circulation transactions per number of hours main library was open for public service in a week.
PROF % OF TOT STAFF	Professionals as a percentage of total staff: Percent of total library staff holding a New Jersey Professional Librarian Certification.
FTE PER M POP	Full-time equivalent staff per 1,000 population: Number of full-time equivalent staff per 1,000 population.
FTE PER WK HRS OPEN	Full-time equivalent staff per week hours open: Number of full-time equivalent staff per number of hours main library was open for public service in a week.
VOLS PER CAP	Volumes per capita: Number of cataloged volumes in the collection at the end of the year, per capita.
% VOLS ADDED	Percent of volumes added: Percent of volumes held that were purchased and added to the collection.

Column Heading	Explanation
VOLUMES ADDED PER CAP	Volumes added per capita: Number of cataloged volumes purchased and added per capita.
TOT EXP PER CAP (\$)	Total expenditures per capita, in dollars: Total library expenditures in dollars per capita.
MAT EXP PER CAP (\$)	Materials expenditures per capita, in dollars: Library materials expenditures in dollars per capita.
TOT EXP PER CIRC (\$)	Total expenditures per circulation, in dollars: Total library expenditures in dollars per circulation transaction.
TOT EXP PER HR OPEN (\$)	Total expenditures per hours open, in dollars: Total library expenditures in dollars per number of hours main library was open for public service in a week.

These ratios and percentages are shown first by county and statewide summary. Next, the averages and percentiles of the printed and derived data are presented in statewide summary. Then, ratios and percentages are shown for each library individually within each population or expenditure group. After each population group or expenditure category, the averages and percentiles of the printed and derived data are given.

The averages for ratios and percentages are based on data in each case for all libraries taken separately rather than the total of one data element divided by the total of another element.

Comparisons Among Groups of Libraries

Study of the averages gives a good general picture of each population group and each expenditure level. The average of each data element not only describes the group as a whole but also can provide interesting comparisons with other groups. For example, a county library may wish to compare its member libraries and itself with other county library systems.

Comparisons among different population groups or expenditure categories can suggest general trends. For example, local tax support per capita increases from \$1.43 in the \$0-9,999 expenditure category, to \$3.27 in the \$10,000-24,999 group, then \$6.09, \$8.79, dips to \$7.46 in the \$75,000-99,999 group, then increases to \$10.80, \$12.10, \$13.03, dips again to \$12.35, then increases from \$13.07 to \$13.48 in the \$750,000-999,999 group, then drops to \$13.22 in the over-\$1,000,000 category. The average library's local tax support per capita in New Jersey is \$9.81.

Library materials as a percentage of total expenditures decreases with population and tends downward with increasing expenditure levels: the four population categories under 10,000 have averages of 17.0, 20.6, 19.4 and 18.6, respectively. Those over 10,000 population decrease from 16.1 percent, then 14.6, 12.7, 13.3, 12.6, 12.3, and finally go up to 14.5 at the over-100,000 category, with a New Jersey average of 16.3. By the twelve expenditure groupings, this measure begins at 20.2 percent for those in the \$0-9,999 category, then 20.3 (\$10,000-24,999), 19.2 (\$25,000-49,999), 17.9 (\$50,000-74,999), followed by most remaining categories trending down, ending with 13.0 for the over-\$1,000,000 category.

The percent of total staff with a professional librarian's certificate tends to rise as the population and expenditure categories rise, but only to a certain point. Among the smallest population category, under 2,500, 26.2 percent was the average reported (this may be due to erroneous reporting, or may be a result of the earlier certification "grandparent" clause); for the 2,500-4,999 category, 11.9 percent, then 19.6, 23.2, 25.5, 30.2, 26.2, 30.1, 27.1, 27.4 and peaking at 30.6, with a statewide average of 24.4. Among expenditure categories, this measure begins at 2.8 percent for the \$0-9,999 category, rises and drops from 20.2 to 13.3, then increases from 23.8 (\$50,000-74,999), then 23.3, 28.5, 27.8, 29.2, 28.6, 29.6, 27.1, and 32.6 (\$1,000,000 or over).

As can be seen in the tables below, equalized valuation per capita trends downward as population increases, but does not change as substantially when total expenditures increase, with the exception of the over-\$1,000,000 category. Local tax support per \$1000 in equalized valuation, on the other hand, appears to increase as both population and expenditure levels rise. Local tax support as a percentage of total income generally rises through the \$350,000-499,000 expenditure categories, then decreases slightly in the larger libraries to about the statewide average. Similarly, salaries, wages and benefits as a percentage of total expenditures increases generally with population and expenditure levels, dropping only in the largest population group and largest expenditure category. Like the percentage of professional staff measure, that of the number of full-time equivalents per 1,000 population begins above the state average at the smallest population category, falls and then rises to 0.61 in the 25,000-37,499 group, while rising steadily in the expenditure table and falling only in the \$1,000,000-or-over category.

Suggested Use Of The Tables

Individual libraries can readily be compared with others in the same population-size group or the same expenditure category. For example, the Bergenfield Free Public Library serves a population of 25,715 and has total expenditures of \$428,320. It is listed individually in the tables for "Population=25,000-37,499" and "Total Expenditures = \$350,000-499,999." When compared with other libraries in the same population group (see page 34, "Averages and Percentiles of Statistics...Population = 25,000-37,499"), Bergenfield's local tax support per capita is \$13.67, above the group average of \$11.32, and higher than 50% of the libraries in its population group, since the 50th percentile is \$11.19. Its 8.7 circulations per capita is 1.5 times the average of 5.7 and above the 75th percentile of 8.4. Other evidence of active collection use is that of circulations per volume held, which at 2.5 is well above the group average of 1.8 and higher than 75% of the libraries in its population group (at 2.2). Bergenfield holds 3.51 volumes per capita, above the group's average of 3.25 and somewhat higher than 50% of the libraries (2.83).

When compared to other libraries in the same expenditure category, Bergenfield's local tax support per capita remains above the 50th percentile (\$11.62), but its circulations per capita falls below the 75th percentile, which is 9.6. Bergenfield's total expenditures per circulation is \$1.91, well below the expenditure category average of \$2.83 and below the 25th percentile (\$1.94).

With this brief example, it can be seen that any library can compare itself not only with other libraries but with other groups of libraries.

In order to make the tables in this volume as meaningful as possible, data which are missing have been excluded from the calculations. Where a data element cannot be computed, an X is printed in the column. In figuring averages and other statistics for the group, that library's ratio or percentage is deleted.

A final word of caution on interpretation of the tables in this volume. Although every effort has been made to include only meaningful information in the calculations, one or two libraries which are very different from the group as a whole can alter the averages enough that a truly representative picture is not shown, especially when the total group is small. This may be so in certain columns, especially in the largest population group and highest expenditure category, as well as the statewide totals. Because of very high values reported by some large libraries, those averages and standard deviations may be distorted. In such cases, the percentile rankings will be less influenced.
