Re: Estimated Fair Market Value of the Radio Stations Owned by New Jersey Public Broadcast Authority as of October 1, 2010

Dear Mr. Jonas and Mr. Williams:

BIA Advisory Services, LLC (d/b/a BIA/Kelsey) has prepared this report to arrive at the fair market value of the radio stations owned by New Jersey Public Broadcast Authority (NJPBA) as of October 1, 2010, per your request.

Respectfully Submitted,

BIA/Kelsey Group

STATEMENT OF
INTRODUCTION

STATEMENT OF INTRODUCTION

The State of New Jersey, Department of the Treasury, Division of Administration has retained BIA/Kelsey Group ("BIA") to estimate the fair market value of the radio stations owned by New Jersey Public Broadcast Authority (NJPBA) as of October 1, 2010.

While preparing this report, BIA/Kelsey was not provided with any historical and projected financial statements or any other information about the stations. In the course of the appraisal and analysis, BIA/Kelsey relied on BIA/Kelsey's Media Access Pro for recent station sales information.

PURPOSE AND METHODOLOGY

This report determines, as of October 1, 2010, the fair market value of the radio stations owned by NJPBA. It is being prepared for financial reporting purposes.

To determine first the fair market values of these radio stations, the appraiser has considered three approaches to value. These are the cost approach, the market approach, and the income approach.

The cost approach is that approach which measures value by determining the current cost of an asset and deducting depreciation, that is, physical deterioration and functional and economic obsolescence. In its simplest form, it is nothing more than current replacement cost less all depreciation.

The market approach is that approach to value in which recent sales and offering prices of comparable properties are analyzed to arrive at an indication of the most probable selling price of the subject property.

The income approach is that approach to value in which income generated by the subject property is analyzed and projected over a specified time period and capitalized at an appropriate market rate to arrive at the property's value.

The appraiser has chosen the market approach due to the non-commercial nature of this station as part of the non-commercial FM band.

For the purposes of this report, the definition of fair market value, in place and in use, is: the value of property for a specific use or to a specific user, reflecting the extent to which the property contributes to the utility and/or profitability of the enterprise of which it is a part.

RIGHTS AND LIMITING CONDITIONS

It should be noted that this report has been prepared exclusively for the State of New Jersey, Department of the Treasury and is not to be reproduced in whole or in part for any reason without the express written consent of the State of New Jersey, and that of BIA/Kelsey.

The appraisers assume no responsibility for matters of a legal nature affecting the property appraised. The appraisers also assumed property free and clear of all liens and other encumbrances. The information provided by the clients was assumed to be accurate and no steps were taken to independently verify the material.

This appraisal is valid only for the appraisal date or dates specified herein and only for the appraisal purpose specified herein. The client warrants that any reports, analyses, or other documents prepared for it by the appraisers will be used only in compliance with all applicable laws and regulations.

STATEMENT OF APPRAISERS' INDEPENDENCE

The statements of fact contained in this report are, to the best of the appraisers' knowledge, true and correct.

The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and is our personal, unbiased professional analyses, opinions and conclusions.

BIA/Kelsey has no present or prospective interest in the property that is the subject of this report, and has no personal interest or bias with respect to the parties involved.

BIA/Kelsey's compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of, this report.

The contents of this report should in no way be construed as a recommendation regarding any investment in, or otherwise contribution of funds to NJPBA or any other entity.

No one provided significant professional assistance to the persons signing this report.

FAIR MARKET VALUATION OF THE NJPBA RADIO STATIONS

FAIR MARKET VALUATION OF THE NJPBA RADIO STATIONS

Overview

NJPBA owns nine Class A radio stations licensed to the following cities, operating on specific frequencies with specified power (Effective Radiated Power – ERP) and antenna height above average terrain (HAAT):

Station	City of License	ERP	HAAT
WNJB FM	Bridgeton, NJ	2.5 kW	220'
WNJMFM	Manahawkin, NJ	0.2 kW	259'
WNJN FM	Atlantic City, NJ	6.0 kW	276'
WNJO FM	Toms River, NJ	4.0 kW	121'
WNJP FM	Sussex, NJ	0.45 kW	637'
WNJS FM	Berlin, NJ	0.08 kW	942'
WNJT FM	Trenton, NJ	0.11 kW	689'
WNJY FM	Netcong, NJ	0.52 kW	430'
WNJZ FM	Cape May, NJ	6.0 kW	236'

Valuation Methodology

The State of New Jersey has engaged BIA/Kelsey to provide current fair market valuations of these radio stations as of October 1, 2010. The appraiser has chosen the market approach for calculating the fair market value of the station as a going concern.

Fair Market Valuation of NJPBA Stations

BIA/Kelsey analyzed merger and acquisition transactions of non-commercial radios stations to arrive at the fair market value of these radio stations. BIA/Kelsey was able to find 21 relevant transactions between January 2010 and September 2010. This information is shown in Table 1.

For each of the non-commercial stations that were sold during that time BIA/Kelsey analyzed purchase price versus population coverage reachable by the stations' 60 dBu signal contour. This sales price per population reached can be used to relate the non-commercial station's ability to generate revenues with donor contributions and local business underwriting. The sales price of each of the stations was divided by the number of pops reachable by a 60 dBu signal to calculate price per pop.

The median price per pop of a 60 dBu signals computed to be $2.98. Below is a table showing the 60 dBu signal coverage and the radio stations' population for the nine NJPBA stations and the estimated value of these stations when multiplied by the 60 dBu calculated median price per pop of $2.98. In total the value of these nine stations is approximately $4.3 million.

Calls	City of License	Population Served under 60 dBu Contour	Value of Station
WNJB	Bridgeton	157,668	$469,000
WNJM	Manahawkin	48,509	$144,000
WNJN	Atlantic City	189,140	$563,000
WNJO	Toms River	166,526	$496,000
WNJP	Sussex	135,585	$403,000
WNJS	Berlin	47,570	$142,000
WNJT	Trenton	428,571	$1,275,000
WNJY	Netcong	195,173	$581,000
WNJZ	Cape May	73,721	$219,000
		TOTAL:	**$4,292,000**

Mark R. Fratrik, Ph. D.

Mark R. Fratrik is a Vice President for BIA Financial Network, Inc. (BIA), which offers merchant banking and financial and strategic advisory services for the media, telecommunications, and related industries. For more than 18 years BIA has assisted clients in increasing value by providing a wide range of services related to acquisitions, mergers, divestitures, operations, integration, growth and changes in strategic direction.

Prior to joining BIA in January 2001, Mr. Fratrik served NAB for 15 years as Vice President/Economist. While at NAB, Mr. Fratrik conducted primary research about the broadcasting and related industries. He has conducted several research studies including "Independent Radio Voices in Radio Markets," "Format Availability After Consolidation," "Interference from Low Power FM Stations to Existing Stations," and "The 1990 Children's Radio Act: Its Impact on the Amount of Educational and Informational Programming." Also, Mr. Fratrik has written/co-authored numerous articles for publication including FM Subcarrier Market Report/Technology Guide, These Taxing Times: A Tax Guide for Broadcasters, and Strategic Planning Handbook for Broadcasters.

Before joining NAB in 1985, Mr. Fratrik worked for the Federal Trade Commission in the Bureau of Economics where he spent five years conducting analyses of industry practices to evaluate overall economic impact. Throughout his career, Mr. Fratrik has researched and spoken at numerous conferences on new media technologies including DTV datacasting. Also, Mr. Fratrik has worked closely with broadcasters in determining what opportunities lay in the spectrum as well as exploring regulatory matters concerning the spectrum.

Mr. Fratrik received his B.A. in mathematics and economics from State University of New York at Binghamton and his master's and doctoral degrees in economics from Texas A&M in College Station, Texas.

Re: Technical Overview of Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, licensed to Berlin, Manahawkin, Toms River, Netcong, Atlantic City, Cape May Court House, Trenton, Sussex and Bridgeton, New Jersey, respectively, as of October 13, 2010

Dear Mr. Jonas and Mr. Williams:

Pursuant to your request, BIA Advisory Services, LLC (d/b/a BIA/Kelsey) has inspected selected tangible assets and technical facilities of WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, for the purpose of performing an on-site engineering due diligence of the stations' facilities, note technical concerns, and provide an estimate of future capital expenditures, as of October 13, 2010.

Respectfully Submitted,

BIA Advisory Services, LLC

Geoffrey C. Price
Vice President

STATEMENT OF INTRODUCTION

STATEMENT OF INTRODUCTION

BIA Advisory Services, LLC (d/b/a BIA/Kelsey) has been authorized by the State of New Jersey to perform an on-site engineering due diligence of the broadcast facilities of Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, note technical concerns, and provide an estimate of future capital expenditures for the stations, as of October 13, 2010. These stations operate as part of the New Jersey Network, a statewide public broadcasting network. Sidney E. Shumate, a broadcast engineer with BIA/Kelsey, visited some of the stations' facilities on October 13, 2010. For the remaining stations, Mr. Shumate relied on an inventory provided by New Jersey Network.

In the course of the report, BIA/Kelsey was provided with industry related data and other information. BIA/Kelsey has made no investigation as to the accuracy of this data or to the title of any of the assets.

Purpose and Methodology

The purpose of this report is to relate the results of an on-site engineering due diligence of the New Jersey Network's radio facilities. This report is being prepared in order to determine the condition of the stations' facilities, note any technical deficiencies, and determine what the stations' future capital expenditure needs may be.

While calculating future capital expenditures for the stations, the appraiser used current industry equipment prices appearing in appropriate manufacturers' price lists and catalogs or solicited current market data from dealers of used equipment as well as relying upon published used equipment price lists, catalogs, and listings in trade magazines and publications. The appraiser also discussed current market trends with used equipment dealers/brokers and manufacturers.

Appraisal Certificate

This engineering due diligence of the New Jersey Network radio stations has been made for the purpose of performing an on-site engineering inspection of the stations' transmitter facilities, note technical concerns, and provide an estimate of future capital expenditures for the stations, as of October 13, 2010.

The appraiser was not informed of any serious structural deficiencies with any of the stations' facilities and technical equipment, except if stated elsewhere in this report. BIA/Kelsey assumes no responsibility for conformity to specific local and Federal government requirements or for any hidden defects in either the real or personal property.

Rights and Limiting Conditions

It should be noted that this report on the technical facilities of the New Jersey Network radio stations has been prepared exclusively for State of New Jersey, including any advisors and designees, and is not to be reproduced in whole or in part for any reason without the express written consent of State of New Jersey and BIA/Kelsey.

The appraisers assume no responsibility for matters of a legal nature affecting the properties inspected. The appraisers also assumed property free and clear of all liens and other encumbrances. The information provided by the clients was assumed to be accurate and no steps were taken to independently verify the material.

This report is valid only for the report date or dates specified herein and only for the appraisal purpose specified herein. The client warrants that any reports, analyses, or other documents prepared for it by the appraisers will be used only in compliance with all applicable laws and regulations.

Statement of Appraisers' Independence

- The statements of fact contained in this report are, to the best of the appraisers' knowledge, true and correct.
- The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, are our personal, unbiased professional analyses, opinions and conclusions.
- BIA/Kelsey has no present or prospective interest in the properties that are the subject of this report, and has no personal interest or bias with respect to the parties involved
- BIA/Kelsey's compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of, this report.
- BIA/Kelsey's analyses, opinions and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice (USPAP).
- No one provided significant professional assistance to the persons signing this report.

TECHNICAL OVERVIEW

TECHNICAL OVERVIEW OF NEW JERSEY NETWORK RADIO STATIONS

The tangible assets of the nine New Jersey Network (NJN) radio stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, all programmed from studios in Trenton, New Jersey that the appraiser inspected and identified include: towers, FM antenna systems, FM transmitter equipment, technical equipment, microwave equipment, satellite equipment, program/production materials and supplies, furniture and fixtures, office equipment, and spare parts. All comments regarding the condition of the tangible assets are based on observations made during the appraiser's inspection on October 13, 2010.

An inspection of the NJN radio studios in Trenton, and three of the transmitter sites, WNJT-FM near Trenton, WNJS-FM, near Berlin, and WNJN, near May's Landing, was performed by Sidney E. Shumate for the BIA Advisory Services, LLC (d.b.a. BIA/Kelsey), on October 13, 2010. Mr. Rick Williams, Assistant Director, NJN Engineering conducted tours of the studio and office site and transmitting facilities. Mr. Williams provided information concerning the radio stations' technical equipment, engineering maintenance procedures, and operating practices, and provided an equipment inventory for all sites, and photographs for the sites not visited. Unless otherwise stated in this report, all references to the condition of an asset or assets apply as of the date of the appraiser's inspection. This report represents an overview of the technical facilities based on information provided by station personnel or based on the inspector's visual observation during a combined due diligence inspection and appraisal inspection and inventory. No measurements, other than the recording of transmitter readings and informal off-air listening tests, were performed in order to verify proper operation or compliance with any federal laws on any equipment in the facilities or in the field. All references to the condition of the assets are as of the date of the appraiser's inspection.

Stations Overview

All nine of the NJN Radio Stations simulcast the same statewide networked program feed, originating from the NJN radio studios in Trenton.

WNJS-FM is a Class A radio station allotted to Berlin, New Jersey. WNJS-FM operates with an effective radiated power (ERP) of 20 watts vertically-polarized, and one watt horizontally-polarized, at a height above average terrain (HAAT) of 781 feet, on an assigned frequency of 88.1 megahertz (MHz). WNJS-FM also holds a construction permit, BPED-20070907ABW, to increase the vertically-polarized ERP to 80 watts, and increase the HAAT to 942 feet. According to Mr. Williams, the CP is expected to be completed by November 2010.

WNJM-FM is a Class A FM radio station licensed to Manahawkin, New Jersey. WNJM-FM operates with an ERP of 200 watts vertically-polarized, one watt horizontally-polarized, at a HAAT of 259 feet, on an assigned frequency of 89.9 MHz.

WNJO is a Class A FM radio station licensed to Toms River, New Jersey. WNJO operates with an ERP of four kilowatts (kW) vertically-polarized, one watt horizontally-polarized, at a HAAT of 121 feet, on an assigned frequency of 90.3 MHz.

WNJY is a Class A FM radio station licensed to Netcong, New Jersey. WNJY operates with an ERP of 520 watts vertically-polarized and one watt horizontally-polarized, at a HAAT of 430 feet, on an assigned frequency of 89.3 MHz.

WNJN is a Class A FM radio station licensed to Atlantic City, New Jersey. WNJN operates with an ERP of 6.0 kW vertically-polarized, 25 watts horizontally-polarized, at a HAAT of 276 feet, on an assigned frequency of 89.7 MHz.

WNJZ is a Class A FM radio station licensed to Cape May Court House, New Jersey. WNJZ operates with an ERP of 6.0 kW circularly-polarized, at a HAAT of 236 feet, on an assigned frequency of 90.3 MHz.

WNJT-FM is a Class A radio station licensed to Trenton, New Jersey. WNJT-FM operates with an ERP of 110 watts vertically-polarized, at a HAAT of 689 feet, on an assigned frequency of 88.1 MHz.

WNJP is a Class A FM radio station licensed to Sussex, New Jersey. WNJP operates with an ERP of 450 watts circularly-polarized, at a HAAT of 637 feet on an assigned frequency of 88.5 MHz.

WNJB-FM is a Class A radio station licensed to Bridgeton, New Jersey. WNJB-FM operates with an ERP of 2.5 kW vertically-polarized and one watt horizontally-polarized, at a HAAT of 220 feet on an assigned frequency of 89.3 MHz.

All nine stations are licensed to the New Jersey Public Broadcasting Authority (NJPBA), which was established in 1968 by the State Legislature.

Overview of Station Facilities

Studios and Office Facility of the New Jersey Network Radio Stations

The studio and office facilities of WNJS-FM, WNJM-FM, WNJO, WNJY, WNJN, WNJZ, WNJT-FM, WNJP, and WNJB-FM are located at 25 South Stockton Street in Trenton. The building is primarily occupied by the New Jersey Public Broadcasting Authority (NJPBA), of which NJN Radio is a part and utilizes space in said building. Management, financial, and engineering staff and offices are shared with the television operations. Two primary radio studios, a combination interview studio and telethon phone room, a workroom equipped with an audio editor, a radio programming office, and an equipment rack room are located on the fourth floor. The rest of the fourth floor is occupied by NJN Television operations and engineering offices. The satellite receive equipment, network audio processing, and studio-to-transmitter link (STL) equipment is located on the sixth floor, and a NJN radio-owned satellite receive dish is installed on the roof of the building with a weighted fixed mount. The engineering department, as well as the NJN management and financial staff, are shared by NJN's radio and television operations. The studios were relocated and rebuilt within the past two years, with new-appearing technical furniture custom-built by the television production carpenter shop on-site. The studios were attractively appointed, and the studio technical furniture and main equipment appeared to be clean, well maintained, and in good working order. The condition of the office furniture and chairs ranged from average to heavy wear and tear.

Studio Equipment of the NJN Radio Stations

The NJN Radio Stations own and maintain technical equipment for use in the radio stations' daily broadcast operations. At the NJN Radio studios in Trenton, this equipment includes: Wheatstone and Behringer audio consoles, Broadcast Electronics AudioVault digital audio storage and editing systems, Electro-Voice microphones mounted on shock mounts and O.C. white boom arms, Leitch slave clock display systems, RTS intercom and cue systems, Sony digital audio tape recorders, Sony portable digital audio recorders, 360 systems and Denon audio cart recorders, audio distribution, digital encoding and decoding, and switching equipment by Grass Valley and Leitch, Telos and Radio Systems studio telephone interface systems, Orban audio processing, TFT EAS systems, ADC and Bittree audio patch panels, Bose, Fostex, Wohler, Electro-Voice, JBL, and Crown audio monitoring, ESE timers, Microvision control interface relays, and Tascam cassette recorders. Overall, the technical equipment appeared to have been well-maintained and to be in fair-to-good condition.

The NJPBA owns a one-meter Ku band satellite receive antenna located on the roof of the studios. The satellite receive equipment includes Satellite Systems downconvertors, Comstream receivers, and Microphase Communications demodulators. The satellite receive equipment appeared to be in overall fair condition.

At the time of the appraiser's inspection, the custom studio technical furniture appeared to be in good condition, but the office furniture and studio chairs appeared to be in overall fair condition. Overall, except where noted, the tangible assets of the NJN Radio Stations appeared to be in fair-to-good condition.

NJN Radio Program Delivery Network

The stations are connected with an extensive microwave relay audio system starting out as digitally encoded audio subcarriers piggybacked on the NJN television digital microwave STL and intercity relay system. The NJN television STL and intercity relay system utilizes Microwave Radio dual-stream equipment, and was installed new, along with upgrading the radio audio relay system to digital encoding, during the television digital transition. From the television transmitter sites, the digitally encoded radio program feed is carried on 950 MHz band radio STL links to all but one NJN radio station, WNJO in Toms River, which retransmits a signal received over-the-air.

At the studios, the audio feed is processed by an Orban audio processor, and then encoded onto digital subcarriers in a dual-redundant 13 GHz television STL microwave system, with the backup side using a Microwave Radio Digi-Pro subcarrier encoder, and the primary side utilizing a Moseley digital audio subcarrier encoder. This STL link transmits to the WNJT(TV) Trenton transmitter site northeast of Trenton, where the WNJT-FM transmitter site is also co-located. From this point the television relay system, with the radio audio digitally encoded and piggybacked, splits north and south.

The northern leg relays to the WNJB(TV) New Brunswick transmitter site, via a 7 GHz digital television STL link. At New Brunswick, the radio network feed is passed onto a 944.5 MHz radio STL link using Moseley equipment, feeding two sites; the NJN Sussex TV tower on Hamburg Mountain, which serves as the WNJP transmitter site, and to the WNJY transmitter site at Netcong.

The southern radio program feed leg leaves the Trenton transmitter site via a 7 GHz TV microwave relay link to the Mt. Holly relay site, where a second television 7 GHz TV microwave relay link relays the signal to the co-located WNJS-TV and WNJS-FM transmitter site in Waterford Township. From the WNJS-FM transmitter site, the radio network signal is again digitally encoded and transmitted via a 945 MHz radio STL link, utilizing Moseley equipment; this STL link is received at three locations. The first receive site for the 945 MHz STL link is at the WNJB-FM transmitter site near Bridgeton. The second receive site for the 945 MHz STL link is at the WNJN transmitter site at Mays Landing, where the signal is then retransmitted on a 949.5 MHz STL link to the WNJZ transmitter site at Cape May Court House. The third receive site for the 945 MHz STL link transmitted from the WNJS-FM transmitter site is at the WNJM-FM transmitter site at Manahawkin. The signal from the WNJM-FM transmitter at Manahawkin is then received over-the-air at the WNJO transmitter site at Seaside Park, and retransmitted on WNJO.

The television microwave relay equipment on which the signal is piggybacked, the digital encoders and decoders, and the 950 MHz band radio STL link equipment that was inspected, along with the Scala and Mark STL antennas and Andrew and Cablewave coaxial transmission lines, all appeared to be in fair-to-good condition.

NJN Radio Transmitter Sites

The tower space and equipment shelter space for all of the NJN radio stations are leased from other state agencies, incorporated cities or townships, private entities, or owned by the NJPBA. The transmitter sites for WNJS-FM, WNJT-FM, WNJP, and the New Brunswick STL subcarrier relay point are co-located at NJN television transmitter sites, and the Mt. Holly relay site primarily serves the television intercity relay system.

WNJS-FM Transmitter Site

The WNJS-FM transmitter site is co-located at the WNJS(TV) transmitter site on Arrowhead Drive, in Waterford Township, near Berlin, and southeast of Camden. The antenna system consists of a DB Products DB-225 antenna array with 16 bays vertically polarized and one bay horizontally polarized, 900 feet of transmission line, and a RF splitter system that combines the FM signal and STL signal onto one transmission line. The transmitter is a Harris Digit exciter and a Vocom Products 100 watt FM RF amplifier. Other transmitter equipment includes: Burk and Gentner remote control systems and Belar monitoring equipment. All antenna system and transmitter equipment appeared to be in fair-to-good condition. Other technical equipment at this site includes an Orban audio processor, and an Nvision powered rack frame with digital audio distribution modules. It was noted that some of the Gentner remote control system components, both in the rack and spares, need new backup batteries. As a result of the digital upgrade realignment, there are two good spare Orban audio processors that have been removed from individual sites and stored at this site. WNJS-FM's Construction Permit lists a SWR FMEES/1-DA directional antenna, which is scheduled to arrive and be installed by November 2010. The currently licensed DB Products antenna will remain on the tower as an auxiliary antenna.

WNJM-FM Transmitter Site

The WNJM-FM transmitter site is located at 1001 Beach Avenue, in Manahawkin. The antenna system consists of a two-station combiner; the SWR three-bay antenna and transmission line are leased and shared. The transmitter is a Crown FM250E 250 watt FM transmitter. Other transmitter equipment includes a Gentner remote control system and Belar monitoring equipment. Other technical equipment includes a pair of Fostex powered loudspeakers and a metal equipment rack.

WNJO(FM) Transmitter Site

The WNJO transmitter site is located at 13th Avenue and Barnegat Avenue in Seaside Park. The transmitting and receive antennas are mounted on a water tower. The transmitter, transmitter equipment and technical equipment are mounted in a weatherproof, air-conditioned cabinet similar to those commonly used at cellular sites, which is mounted atop a four foot square metal platform supported by four 4-foot high concrete piers. The antenna system consists of a Jampro two-bay FM antenna and 150 feet of 7/8 inch coaxial transmission line. The transmitter consists of a Crown FM150 exciter and a Crown PA2000, a two kW FM RF amplifier. Other transmitter equipment includes: Sine Systems remote control systems, Belar monitoring equipment, and Modulation Sciences audio processing. Other technical equipment includes a temperature monitor, a pair of Fostex powered loudspeakers, and an Inovonics professional FM receiver with associated off-air antenna.

WNJY Transmitter Site

The WNJY transmitter site is located at the intersection of Route 206 and Route 80, Mountain Road, in Netcong. The antenna system consists of a Scala two-bay FM antenna and 250 feet of 7/8 inch coaxial transmission line. The transmitter is a Crown FM300 FM transmitter. Other transmitter equipment includes: Orban audio processing and Belar monitoring equipment. Other technical equipment includes a pair of Fostex powered loudspeakers and a metal equipment rack.

WNJN(FM) Transmitter Site

The WNJN transmitter site is located adjacent to the west parking lot, on the grounds of the Atlantic Coast Community College, in Mays Landing. The antenna system consists of a Jampro three-bay FM antenna, 250 feet of 1 5/8 inch coaxial transmission line, and an Andrew air dryer. The transmitter is a Harris PT-2CD, a 2.2 kW FM transmitter. Other transmitter equipment includes: Gentner remote control and Belar monitoring equipment. All antenna system and transmitter equipment appeared to be in fair-to-good condition.

WNJZ(TV) Transmitter Site

The WNJZ transmitter site is located adjacent to the J.F. Kelly Construction building, at 916 Route 9 North, in Cape May Court House. The antenna system consists of a SWR three-bay FM antenna, Cablewave 1 5/8 inch coaxial transmission line, and a Cablewave air dryer. The transmitter is a Broadcast Electronics (BE) FM-2C, equipped with a BE FXi exciter. Other transmitter equipment includes: Orban audio processing, Gentner remote control and Belar monitoring equipment. Other technical equipment includes a metal equipment rack.

WNJT-FM Transmitter Site

The WNJT-FM transmitter site is at the end of Grover's Mill Road, one-half mile east of the intersection of US Route 1 and Interstate 295. The site is co-located with the WNJT-TV transmitter site. The antenna system consists of a dB Products five-bay FM antenna and 800 feet of 7/8 inch coaxial transmission line. The transmitter consists of a Harris Digit exciter. Other transmitter equipment includes: Orban audio processing, Belar monitoring equipment and a Gentner Silence Sensor. All antenna system and transmitter equipment appeared to be in fair-to-good condition.

WNJP(FM) Transmitter Site

The WNJP transmitter site is located at a NJPBA-owned tower identified as the "Sussex" TV tower, FCC ASR# 1045122, located one-half mile southeast of NJ Route 517 and Sand Point Road in Hardistonville, New Jersey. The WNJP antenna system consists of a Jampro two-bay FM antenna and 225 feet of 7/8 inch coaxial transmission line. The transmitter is a Harris Quest 500 watt FM transmitter. Other transmitter equipment includes: Orban audio processing and Belar monitoring equipment. The other technical equipment includes a metal equipment rack.

WNJB-FM Transmitter Site

The WNJB-FM transmitter site is located at 637 Bridgeton Avenue (a.k.a. County Road 666), in Bridgeton. The antenna system consists of a Jampro four-bay FM antenna and 250 feet of 1 5/8 inch coaxial transmission line. The transmitter is a Harris Quest 500 watt FM transmitter. Other transmitter equipment includes: a Gentner remote control system and Belar monitoring equipment. The other technical equipment includes a Wohler audio monitor and a metal equipment rack.

Immediate Technical Concerns

It was noted that several pieces of the Gentner remote control system needed new backup batteries to operate properly.

Long-Term Technical Concerns

At the studio site, the uninterruptible power supply (UPS) and emergency generator power is limited and shared with the television operations. At the transmitter sites, the radio transmitters are dependent on the co-located television stations or site owners for emergency power.

No EPA hazard issues were noted at these sites. None of the equipment appears to be old enough to contain components containing PCB's. The emergency power generators, where they exist, are the responsibility of other entities at all transmitter sites.

The automation and digital storage systems for the NJN Radio stations are primarily custom rebuilt PC's with Broadcast Equipment AudioVault software installed. The age and reliability of these custom systems is unknown. However, much of the stations' programming is announcement-minimized public broadcasting live or network-delivered talk programming, making only limited demands for the storage and playback of programming and announcements.

Also, much of the other technical equipment in the rebuilt studios are of high quality, but had been reused in the rebuilding of the studios, and are aging. While the microphones found in the studios were of high quality, as most of them are Electro-Voice RE-20's, many of the microphone stands were missing their microphones, unusual for a talk radio programmed facility, unless there have been security concerns for the microphones.

The stations appear to have very limited remote production capability of their own. While a single Telos Zephyr digital audio codec was noted, this may be primarily used for

receiving networked programming; no matching remote codec or remote production kit was noted. The NJN radio stations do not own any remote production vans or other vehicles.

In-Band On-Channel Digital Radio: HD Radio™

The NJN Radio Stations are all transmitting a single-program stream, utilizing analog FM transmission. There are no current plans to upgrade the network' stations to HD Radio. The NJN radio stations are all Class A stations, many of which are operating with primarily vertical polarity and reduced power, as necessary to protect older co-channel and adjacent channel stations. At the initially authorized 1% IBOC subcarrier levels, and even at the now available 10% level, the stations would have transmitted an extremely weak IBOC signal; less than a watt in some cases. Also, the studios and radio signal distribution system would have to be upgraded to carry additional channels in order to take advantage of the multicast capability of IBOC.

Capital Expenditures and Recommendations

The following projected capital expenditure requirements and recommendations are based, in part, on conditions observed during an inspection of the studios and offices, and three of the nine transmitter sites, of the New Jersey Network Radio Stations on October 13, 2010. The capital expenditures proposed for this period are made with the assumption that the stations' program formats and production needs will remain substantially unchanged for this period. The capital expenditures assume that the current dependency upon the television station's microwave relay system as part of the radio network's program STL system will continue, and that only the radio stations' STL equipment, including the modules attached to the television microwave relay systems, are being maintained by the radio stations' capital expenditure budget.

Remainder of 2010

Item	Cost
Replace backup batteries or install small UPS units to provide power backup to remote control system.	$2,000
Total	**$2,000**

2011

Item	Cost
Find and build new transmitter site for existing, un-built FM station CP for central northern New Jersey location that lost its site commitment.	$80,000
Total	**$80,000**

2012

Item	Cost
Expand network with applied for Low Power FM CPs.	$150,000
Total	**$150,000**

Future Annual Capital Expense Projections

A continuing Capital Expense budget of approximately $300,000 per year, adjusted for inflation, should be used for future budgetary planning to maintain the existing plant.

APPENDIX A

QUALIFICATIONS

Qualifications
Of
Geoffrey C. Price

Geoffrey C. Price is a Vice President for BIA/Kelsey (BIA), a financial consulting firm specializing in the fair market valuations, asset appraisals, strategic analyses, and business plans of broadcast and telecommunications properties. In his current position at BIA, Mr. Price is responsible for the managing and operating of the company's nationwide leading Consulting Group. Mr. Price has been at BIA since 1988 and has appraised hundreds of media and telecommunications properties worth in aggregate in the tens of billions of dollars.

As a Vice President with BIA, Mr. Price has been responsible for the preparation of asset appraisals, valuation studies, strategic consulting assignments, and litigation support for clients in the communications and broadcast industries. He has also been responsible at BIA for assisting many publicly traded and privately held broadcast companies with their valuation needs associated with FASB 141/142. In addition, Mr. Price is part of the business development team at BIA and is responsible for the client relationships with many of the largest broadcast companies nationwide. Mr. Price's appraisal and valuation experience is diverse, including reports for firms in the cellular, paging, SMR, cable, print, tower, and broadcast industries.

Prior to joining BIA, Mr. Price was employed by ADT Security Systems, Inc. in its Accounting Center located in Alexandria, Virginia. Mr. Price earned his B.S. degree in Finance from Virginia Polytechnic Institute and State University in Blacksburg, Virginia. Mr. Price received his M.B.A. from George Mason University in Fairfax, Virginia.

Qualifications
Of
Sidney E. Shumate

Sidney E. Shumate is the Senior Appraiser and Director of Engineering for the BIA/Kelsey, a financial consulting firm. At BIA/Kelsey, Mr. Shumate is primarily engaged in the appraisal of tangible assets of broadcasting, print, Internet and related media properties, expert witness support, and preparation of business plans and technical evaluation reports.

Mr. Shumate received his B.S. degree in Electrical Engineering from West Virginia University Institute of Technology, and received EIT certification in 1975. He holds a General Class Radiotelephone Operators License, and a Virginia Contractor's License endorsed for building, electrical, and specialty construction. He is a member and former chapter Chairman of the **Institute of Electrical and Electronics Engineers (IEEE)**, and is also a member and currently serves on the Advisory Committee (ADCOM) of the **IEEE Broadcast Technology Society.**

Mr. Shumate started as an engineer and DJ at WSLW, White Sulphur Springs, WV, in 1973, and later served as Chief Engineer of WMON, while in college. Since receiving his degree he has served at different times as Senior Engineer, Assistant Chief, and, from 1979 to 1995, as Director of Engineering at WVIR-TV in Charlottesville, VA. In between, he was a Senior Engineer at WPGH-TV, Pittsburgh, Pennsylvania, and was Director of Engineering for WAFF-TV in Huntsville, AL, where he was also responsible for WHOS and WDRM-FM in Decatur, AL.

In Charlottesville, he relocated the studios to new facilities in 1984, and in 1985, made WVIR-TV the first stereo TV station in VA. In 1992, he upgraded the transmitter facilities to be a five-megawatt, omnidirectional transmitter site incorporating the largest common-mode TV transmitter built to date. Mr. Shumate attended Thales first IOT-based transmitter school. He also designed and built microwave relay systems, ENG and EFP vans, a news bureau in Staunton, Virginia, and a translator with a special nulling antenna system at Massanutten Peak.

Mr. Shumate is also the owner of Blue Ridge Video Services, and, from 1988 to 2006, was also the founder, promoter, builder, original owner, and General Manager of WVGV-TV (now

WVNS-TV), Lewisburg, WV. Prior to joining BIA/Kelsey in 1997, Mr. Shumate was employed by High Mountain Broadcasting, Inc. to relocate and upgrade WVSX (TV).

While at BIA/Kelsey, Mr. Shumate has presented papers at the 1998 ("Methods and Costs of Installing Initial and Interim DTV Transmission Facilities on Existing Towers"), and 2006 ("Evaluating Your HD Radio™ Coverage") NAB Broadcast Engineering Conferences.

NEW JERSEY NETWORK RADIO STATIONS

APPRAISAL OF TANGIBLE ASSETS

AS OF OCTOBER 1, 2010

PREPARED FOR
STATE OF NEW JERSEY
DEPARTMENT OF THE TREASURY, DIVISION OF ADMINISTRATION

Project No. 4050129

BIA Kelsey

January 28, 2011

Mr. Michael Jonas, Operations Manager
Mr. Rick Williams, Assistant Director, NJN Engineering
50 West State Street, 8th Floor
PO Box 211
Trenton, New Jersey 08625-0211
Phone: (609) 777-5257

Re: Estimate of the fair value of the tangible assets, in place and in use, of Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, licensed to Berlin, Manahawkin, Toms River, Netcong, Atlantic City, Cape May Court House, Trenton, Sussex and Bridgeton, New Jersey, respectively.

Dear Mr. Jonas and Mr. Williams:

Pursuant to your request, BIA Advisory Services, LLC (d/b/a BIA/Kelsey) has prepared an appraisal to arrive at an opinion as to the fair value of the tangible assets, in place and in use, that are associated with Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, as of October 1, 2010. Fair value is synonymous with fair market value.

Based on the data, analyses, and conclusions set forth in the report that follows, it is our opinion that the values of the appraised assets, as of October 1, 2010, are as stated in the following value summary.

Respectfully Submitted,
BIA/KELSEY

Geoffrey C. Price
Vice President

STATEMENT OF INTRODUCTION

STATEMENT OF INTRODUCTION

BIA/Kelsey has been retained by the State of New Jersey to estimate the fair value of the tangible assets, in place and in use, of Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, assigned to Berlin, Manahawkin, Toms River, Netcong, Atlantic City, Cape May Court House, Trenton, Sussex and Bridgeton, New Jersey, as of October 1, 2010. These stations operate as part of the New Jersey Network, a statewide public broadcasting network. This report is being prepared for financial reporting purposes.

In this document we have appraised the tangible assets of the aforementioned New Jersey Network radio stations. For this purpose, Mr. Sidney E. Shumate, a Broadcast Engineer with BIA/Kelsey, visited the New Jersey Network's studios in Trenton and three of the stations' transmitter facilities on October 13, 2010 to inspect the tangible assets and to acquire data necessary for the appraisal. The tangible asset inventories for the remaining stations were provided by the New Jersey Network.

The value of the stations' tangible assets is based upon each specific asset's replacement cost, with a provision for observed depreciation or, where appropriate, the cost of comparable used assets of like age and condition.

In the course of the appraisal, BIA/Kelsey was provided with equipment prices, industry related data, and other information. In the course of the appraisal, the analysts relied on BIA/Kelsey's *Investing in Radio 2010, 3rd Edition*, *Media Access Pro Radio Analyzer* and *Coverage Map Data*; and other industry related data.

IDENTIFICATION OF THE PROPERTY

WNJS-FM is a Class A FM radio station allotted to Berlin, New Jersey. WNJS-FM operates with an effective radiated power (ERP) of 20 watts vertically-polarized, and one watt horizontally-polarized, at a height above average terrain (HAAT) of 781 feet, on an assigned frequency of 88.1 megahertz (MHz). WNJS-FM also holds a construction permit (CP), BPED-20070907ABW, to increase the vertically-polarized ERP to 80 watts, and increase the HAAT to 942 feet. The station had begun

implementing the CP as of the October 1, 2010 valuation date and expected to complete construction by the end of October.

WNJM-FM is a Class A FM radio station licensed to Manahawkin, New Jersey. WNJM-FM operates with an ERP of 200 watts vertically-polarized, one watt horizontally-polarized, at a HAAT of 259 feet, on an assigned frequency of 89.9 MHz.

WNJO is a Class A FM radio station licensed to Toms River, New Jersey. WNJO operates with an ERP of four kilowatts (kW) vertically-polarized, one watt horizontally-polarized, at a HAAT of 121 feet, on an assigned frequency of 90.3 MHz.

WNJY is a Class A FM radio station licensed to Netcong, New Jersey. WNJY operates with an ERP of 520 watts vertically-polarized and one watt horizontally-polarized, at a HAAT of 430 feet, on an assigned frequency of 89.3 MHz.

WNJN-FM is a Class A radio station licensed to Atlantic City, New Jersey. WNJN-FM operates with an ERP of 6.0 kW vertically-polarized, 25 watts horizontally-polarized, at a HAAT of 276 feet, on an assigned frequency of 89.7 MHz.

WNJZ is a Class A FM radio station licensed to Cape May Court House, New Jersey. WNJZ operates with an ERP of 6.0 kW circularly-polarized, at a HAAT of 236 feet, on an assigned frequency of 90.3 MHz.

WNJT-FM is a Class A radio station licensed to Trenton, New Jersey. WNJT-FM operates with an ERP of 110 watts vertically-polarized, at a HAAT of 689 feet, on an assigned frequency of 88.1 MHz. WNJT-FM hold a CP (BPED-19990716MB) for a new satellite station licensed to Bernardsville, New Jersey. The CP was granted in July 1999 and has been extended to 2012, according to Mr. Rick Williams of NJPBA. According to Mr. Williams, the satellite station has not been constructed.

WNJP is a Class A FM radio station licensed to Sussex, New Jersey. WNJP operates with an ERP of 450 watts circularly-polarized, at a HAAT of 637 feet on an assigned frequency of 88.5 MHz.

WNJB-FM is a Class A radio station licensed to Bridgeton, New Jersey. WNJB-FM operates with an ERP of 2.5 kW vertically-polarized and one watt horizontally-polarized, at a HAAT of 220 feet on an assigned frequency of 89.3 MHz.

All nine stations are licensed to the New Jersey Public Broadcasting Authority (NJPBA), which was founded in 1968 by an act of the New Jersey State Legislature.

All nine of the NJN radio stations lease their tower equipment shelter space. The transmitter sites for WNJS-FM, WNJT-FM, WNJP, and the New Brunswick studio-to-transmitter link (STL) subcarrier relay point, are co-located at NJN television transmitter sites.

The WNJS-FM transmitter site is co-located at the WNJS(TV) transmitter site on Arrowhead Drive, in Waterford Township, near Berlin. The WNJM-FM transmitter site is located at 1001 Beach Avenue, in Manahawkin. The WNJO transmitter site is located at 13th Avenue and Barnegat Avenue in Seaside Park. The WNJY transmitter site is located at the intersection of Route 206 and Route 80, Mountain Road, in Netcong. The WNJN-FM transmitter site is located adjacent to the west parking lot, on the grounds of the Atlantic Coast Community College in Mays Landing, New Jersey. The WNJZ transmitter site is located adjacent to the J.F. Kelly Construction building, at 916 Route 9 North, in Cape May Court House. The WNJT-FM transmitter site is at the end of Grover's Mill Road, one-half mile east of the intersection of US Route 1 and Interstate 295. The WNJP transmitter site is located on a NJN-owned tower identified as the "Sussex" TV tower, FCC ASR# 1045122, located 1/2 mile southeast of NJ Route 517 and Sand Point Road in Hardistonville, New Jersey. The WNJB-FM transmitter site is located at 637 Bridgeton Avenue (also known as County Road 666), in Bridgeton.

The stations' studio and office facilities are located at 25 South Stockton Street in Trenton. The building is primarily occupied by the New Jersey Public Broadcasting Authority (NJPBA), of which the NJN radio division utilizes space in said building. Management, financial, and engineering staff and offices are shared with the television operations. NJN radio primarily occupies only three studios, a workroom, a programming office, space in the racks in two rack rooms, and space on the roof for a satellite dish. The real estate at this location is primarily occupied by the television operations of NJN, and is not included in this appraisal.

The tangible assets of Radio Stations WNJS-FM, WNJM-FM, WNJO, WNJY, WNJN, WNJZ, WNJT-FM, WNJP and WNJB-FM that the appraiser identified and inspected include: towers, FM antenna system, FM transmitter equipment, technical equipment, ENG/EFP equipment, microwave equipment, satellite equipment, program/production materials and supplies, furniture and fixtures, office equipment, and spare parts.

PURPOSE AND METHODOLOGY

The purpose of this appraisal is to determine, as of October 1, 2010, the fair value of the tangible assets, in place and in use, comprising Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM. This appraisal is being prepared for financial reporting purposes.

Valuation of the tangible assets of the stations is based on industry guidelines and the techniques described in Revenue Procedure 75-39. In valuing the tangible assets, the appraiser has considered three approaches to value. These are the cost approach, the market approach, and the income approach.

The **cost approach** is that approach which measures value by determining the current cost of an asset and deducting depreciation, that is, physical deterioration and functional and economic obsolescence. In its simplest form, it is nothing more than current replacement cost less all depreciation.

The **market approach** is that approach to value in which recent sales and offering prices of comparable properties are analyzed to arrive at an indication of the most probable selling price of the subject property.

The **income approach** is that approach to value in which income generated by the subject property is analyzed and projected over a specified time period and capitalized at an appropriate market rate to arrive at the property's value.

The appraiser has chosen both the cost and market approaches as most appropriate for the tangible assets. The value of the stations' tangible assets is based upon each specific asset's replacement

cost, with a provision for depreciation or, where appropriate, the cost of comparable used assets of like age and condition.

For the purposes of this report, the definition of **fair value, in place and in use**, is: the value of property for a specific use or to a specific user, reflecting the extent to which the property contributes to the utility and/or profitability of the enterprise of which it is a part.

The fair value, in place and in use, of WNJS-FM, WNJM-FM, WNJO, WNJY, WNJN, WNJZ, WNJT-FM, WNJP and WNJB-FM's tangible assets have been determined by comparing the assets, in place and in use, to that part of the communications industry with a direct need and identical use for the specific asset.

The valuation of technical and non-technical equipment has been conducted on the basis of new replacement cost less a provision for all forms of depreciation or, in the case of those assets readily available on the used equipment market, the market approach. The appraiser used current communications industry equipment prices appearing in appropriate manufacturers' price lists and catalogs, solicited current market data from dealers of used broadcast equipment, and relied upon published used equipment price lists, catalogs, and listings in trade magazines and publications. The appraiser also discussed current market trends with used equipment dealers/brokers and manufacturers.

The in place and in use value of the tangible assets has been determined by taking into consideration such expenses as design time, engineering, supervision, labor and materials for installation, testing, proof-of-performance measurements, outside consulting fees, freight, administrative costs, contractor contingency fees, overhead, profit, contractor quantity discounts, and capitalized interest expenses.

Estimates of equipment depreciation are based upon further consideration of wear and tear from use, loss of utility due to operational problems, and technological and economic obsolescence.

A summary of the asset values is set forth in the preceding Value Summary.

APPRAISAL CERTIFICATE

This appraisal of the tangible assets of Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, licensed to Berlin, Manahawkin, Toms River, Netcong, Atlantic City, Cape May Court House, Trenton, Sussex and Bridgeton, New Jersey, has been made for the purpose of expressing an expert opinion as to the fair value of the tangible assets, in place and in use, of the stations, as of October 1, 2010.

The appraiser was informed of no serious structural deficiencies, except if stated previously in this report. BIA/Kelsey assumes no responsibility for conformity to specific local and Federal government requirements or for any hidden defects in either the real or personal property.

RIGHTS AND LIMITING CONDITIONS

It should be noted that the appraisal of the tangible assets of Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM has been prepared exclusively for State of New Jersey and is not to be reproduced in whole or in part for any reason without the express written consent of State of New Jersey and that of BIA/Kelsey.

The appraisers assume no responsibility for matters of a legal nature affecting the property appraised. The appraisers also assumed property free and clear of all liens and other encumbrances. The information provided by the clients was assumed to be accurate and no steps were taken to independently verify the material.

This appraisal is valid only for the appraisal date or dates specified herein and only for the appraisal purpose specified herein. The client warrants that any reports, analyses, or other documents prepared for it by the appraisers will be used only in compliance with all applicable laws and regulations.

STATEMENT OF APPRAISERS' INDEPENDENCE

- The statements of fact contained in this report are, to the best of the appraisers' knowledge, true and correct.

- The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and is our personal, unbiased professional analyses, opinions and conclusions.

- BIA/Kelsey has no present or prospective interest in the property that is the subject of this report, and has no personal interest or bias with respect to the parties involved.

- BIA/Kelsey's compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of, this report.

- BIA/Kelsey's analyses, opinions and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice (USPAP).

- No one provided significant professional assistance to the persons signing this report.

TANGIBLE ASSET OVERVIEW

TANGIBLE ASSET OVERVIEW

The tangible assets of the nine New Jersey Network (NJN) Radio Stations WNJS-FM, WNJM-FM, WNJO(FM), WNJY(FM), WNJN(FM), WNJZ(FM), WNJT-FM, WNJP(FM) and WNJB-FM, all programmed from studios in Trenton, New Jersey that the appraiser valued include: towers, FM antenna systems, FM transmitter equipment, technical equipment, ENG/EFP equipment, microwave equipment, satellite equipment, program/production materials and supplies, furniture and fixtures, office equipment, and spare parts. An inspection of the NJN radio studios in Trenton, and three of the nine transmitter sites, WNJT-FM, WNJS, and WNJN, was performed by Sidney E. Shumate for the BIA Advisory Services, LLC (d/b/a BIA/Kelsey), on October 13, 2010. All comments regarding condition are based on observations made during the appraiser's inspection.

WNJS-FM is a Class A FM radio station allotted to Berlin, New Jersey. WNJS-FM operates with an effective radiated power (ERP) of 20 watts vertically-polarized, and one watt horizontally-polarized, at a height above average terrain (HAAT) of 781 feet, on an assigned frequency of 88.1 megahertz (MHz). WNJS-FM also holds a construction permit (CP), BPED-20070907ABW, to increase the vertically-polarized ERP to 80 watts, and increase the HAAT to 942 feet. Mr. Williams expects to complete construction of the CP November 2010.

WNJM-FM is a Class A FM radio station licensed to Manahawkin, New Jersey. WNJM-FM operates with an ERP of 200 watts vertically-polarized, one watt horizontally-polarized, at a HAAT of 259 feet, on an assigned frequency of 89.9 MHz.

WNJO is a Class A FM radio station licensed to Toms River, New Jersey. WNJO operates with an ERP of four kilowatts (kW) vertically-polarized, one watt horizontally-polarized, at a HAAT of 121 feet, on an assigned frequency of 90.3 MHz.

WNJY is a Class A FM radio station licensed to Netcong, New Jersey. WNJY operates with an ERP of 520 watts vertically-polarized and one watt horizontally-polarized, at a HAAT of 430 feet, on an assigned frequency of 89.3 MHz.

WNJN-FM is a Class A radio station licensed to Atlantic City, New Jersey. WNJN-FM operates with an ERP of 6.0 kW vertically-polarized, 25 watts horizontally-polarized, at a HAAT of 276 feet, on an assigned frequency of 89.7 MHz.

WNJZ is a Class A FM radio station licensed to Cape May Court House, New Jersey. WNJZ operates with an ERP of 6.0 kW circularly-polarized, at a HAAT of 236 feet, on an assigned frequency of 90.3 MHz.

WNJT-FM is a Class A radio station licensed to Trenton, New Jersey. WNJT-FM operates with an ERP of 110 watts vertically-polarized, at a HAAT of 689 feet, on an assigned frequency of 88.1 MHz. WNJT-FM hold a CP (BPED-19990716MB) for a new satellite station licensed to Bernardsville, New Jersey. The CP was granted in July 1999 and has been extended to 2012, according to Mr. Rick Williams of NJPBA. According to Mr. Williams, the satellite station has not been constructed.

WNJP is a Class A FM radio station licensed to Sussex, New Jersey. WNJP operates with an ERP of 450 watts circularly-polarized, at a HAAT of 637 feet on an assigned frequency of 88.5 MHz.

WNJB-FM is a Class A radio station licensed to Bridgeton, New Jersey. WNJB-FM operates with an ERP of 2.5 kW vertically-polarized and one watt horizontally-polarized, at a HAAT of 220 feet on an assigned frequency of 89.3 MHz.

All nine stations are licensed to the New Jersey Public Broadcasting Authority (NJPBA), which was founded in 1968 by an act of the New Jersey State Legislature.

All nine of the NJN radio stations lease their tower equipment shelter space. The transmitter sites for WNJS-FM, WNJT-FM, WNJP, and the New Brunswick studio-to-transmitter link (STL) subcarrier relay point, are co-located at NJN television transmitter sites.

The WNJS-FM transmitter site is co-located at the WNJS(TV) transmitter site on Arrowhead Drive, in Waterford Township, near Berlin. The antenna system consists of a DB Products DB-225 antenna array with 16 bays vertically polarized and one bay horizontally polarized, 900 feet of transmission line, and a RF splitter system that combines the FM signal and STL signal onto one transmission

line. WNJS-FM's Construction Permit lists a SWR FMEES/1-DA directional antenna, which is scheduled to arrive and be installed by November 2010. The currently licensed DB Products antenna will remain on the tower as an auxiliary antenna. The transmitter is a Harris Digit exciter and a Vocom Products 100 watt FM RF amplifier. Other transmitter equipment includes: Burk and Gentner remote control systems, and Belar monitoring equipment. All antenna system and transmitter equipment appeared to be in fair-to-good condition.

The WNJM-FM transmitter site is located at 1001 Beach Avenue, in Manahawkin. The antenna system consists of a two-station combiner; the SWR three-bay antenna and transmission line are leased and shared. The transmitter is a Crown FM250E 250 watt FM transmitter. Other transmitter equipment includes a Gentner remote control system.

The WNJO transmitter site is located at 13th Avenue and Barnegat Avenue in Seaside Park. The antenna is mounted on a water tower. The antenna system consists of a Jampro two-bay FM antenna and 150 feet of 7/8 inch coaxial transmission line. The transmitter consists of a Crown FM150 exciter and Crown PA2000, a two kW FM RF amplifier. Other transmitter equipment includes: Sine Systems remote control systems, Belar monitoring, and Modulation Sciences audio processing.

The WNJY transmitter site is located at the intersection of Route 206 and Route 80, Mountain Road, in Netcong. The antenna system consists of a Scala two-bay FM antenna and 250 feet of 7/8 inch coaxial transmission line. The transmitter is a Crown FM300 FM transmitter. Other transmitter equipment includes Belar monitoring equipment.

The WNJN-FM transmitter site is located adjacent to the west parking lot, on the grounds of the Atlantic Coast Community College in Mays Landing, New Jersey. The antenna system consists of a Jampro three-bay FM antenna, 250 feet of 1 5/8 inch coaxial transmission line, and an Andrew air dryer. The transmitter is a Harris PT-2CD 2.2 kW FM transmitter. Other transmitter equipment includes: Gentner remote control and Belar monitoring equipment. All antenna system and transmitter equipment appeared to be in fair-to-good condition.

The WNJZ transmitter site is located adjacent to the J.F. Kelly Construction building, at 916 Route 9 North, in Cape May Court House. The antenna system consists of a SWR three-bay FM antenna, Cablewave 1 5/8 inch coaxial transmission line, and a Cablewave air dryer. The transmitter is a

Broadcast Electronics (BE) FM-2C, equipped with a BE Fxi exciter. Other transmitter equipment includes: Gentner remote control and Belar monitoring equipment.

The WNJT-FM transmitter site is at the end of Grover's Mill Road, one-half mile east of the intersection of US Route 1 and Interstate 295. The site is co-located with the WNJN-TV transmitter site. The antenna system consists of a dB Products five-bay FM antenna and 800 feet of 7/8 inch coaxial transmission line. The transmitter consists of a Harris Digit exciter. Other transmitter equipment includes Belar monitoring equipment. All antenna system and transmitter equipment appeared to be in fair-to-good condition.

The WNJP transmitter site is located on a NJN-owned tower identified as the "Sussex" TV tower, FCC ASR# 1045122, located 1/2 mile southeast of NJ Route 517 and Sand Point Road in Hardistonville, New Jersey. The WNJP antenna system consists of a Jampro 2-bay FM antenna and 225 feet of 7/8 inch coaxial transmission line. The transmitter is a Harris Quest 500 watt FM transmitter. Other transmitter equipment includes Belar monitoring equipment.

The WNJB-FM transmitter site is located at 637 Bridgeton Avenue (also known as County Road 666), in Bridgeton. The antenna system consists of a Jampro four-bay FM antenna and 250 feet of 1 5/8 inch coaxial transmission line. The transmitter is a Harris Quest 500 watt FM transmitter. Other transmitter equipment includes: a Gentner remote control system and Belar monitoring equipment.

The stations' studio and office facilities are located at 25 South Stockton Street in Trenton. The building is owned and primarily occupied by the New Jersey Public Broadcasting Authority (NJPBA), of which the NJN radio division utilizes the space in said building. Management, financial, and engineering staff and offices are shared with the television operations. NJN radio primarily occupies only three studios, a workroom, a programming office, space in the racks in two rack rooms, and space on the roof for a satellite dish. The real estate at this location is primarily occupied by the television operations of NJN, and is not included in this appraisal.

The nine NJN Radio Stations own and maintain technical equipment for use in their daily broadcast operations. At the NJN Radio studios in Trenton, this equipment includes: Wheatstone and Behringer audio consoles; Broadcast Electronics AudioVault digital audio storage and editing systems; Electro-Voice microphones mounted on shock mounts and O.C. white boom arms; Leitch

slave clock display systems; RTS intercom and cue systems; Sony digital audio tape recorders; Sony portable digital audio recorders; 360 systems and Denon audio cart recorders; Grass Valley and Leitch audio distribution, digital encoding and decoding, and switching equipment; Telos and Radio Systems studio telephone interface systems; Orban audio processing, TFT EAS systems; ADC and Bittree audio patch panels; Bose, Fostex, Wohler, Electro-Voice, JBL, and Crown audio monitoring; ESE timers; Microvision control interface relays; and Tascam cassette recorders. Overall, the technical equipment appeared to have been well-maintained and to be in fair-to-good condition.

The stations are connected with an extensive microwave relay audio system, consisting in part of audio subcarriers piggybacked on the NJN television digital microwave system, which utilizes Microwave Radio dual-stream equipment. A set of subcarrier relay equipment at the NJN WNJB-TV New Brunswick television transmitter site also serves as part of the STL links for NJN radio. This equipment appeared to be in nearly-new condition. Several of the NJN radio sites serve as relay points, and NJN Radio maintains a separate, stand-alone microwave relay site in Mt. Holly. The rest of the system connecting the stations, utilized Moseley and Microwave Radio STL transmitters, receivers, digital audio encoders, and digital audio decoders, all appeared to be in fair to good condition. Other microwave relay equipment included Scala and Mark STL antennas, and Andrew and Cablewave coaxial transmission lines, all appeared to be in fair-to-good condition where inspected.

The NJPBA owns a one-meter Ku band satellite receive antenna located on the roof of the studios. The satellite receive equipment includes Satellite Systems down-convertors, Comstream receivers, and Microphase Communications demodulators. The satellite receive equipment appeared to be in overall fair condition.

Other equipment inspected includes program/production materials and supplies, furniture and fixtures, office equipment, and spare parts. At the time of the appraiser's inspection, the custom studio technical furniture appeared to be in good condition, but the office furniture and studio chairs appeared to be in overall fair condition. Overall, except where noted, the tangible assets of the NJN Radio Stations appeared to be in fair-to-good condition.

Qualifications
Of
Geoffrey C. Price

Geoffrey C. Price is a Vice President for BIA/Kelsey (BIA), a financial consulting firm specializing in the fair market valuations, asset appraisals, strategic analyses, and business plans of broadcast and telecommunications properties. In his current position at BIA, Mr. Price is responsible for the managing and operating of the company's nationwide leading Consulting Group. Mr. Price has been at BIA since 1988 and has appraised hundreds of media and telecommunications properties worth in aggregate in the tens of billions of dollars.

As a Vice President with BIA, Mr. Price has been responsible for the preparation of asset appraisals, valuation studies, strategic consulting assignments, and litigation support for clients in the communications and broadcast industries. He has also been responsible at BIA for assisting many publicly traded and privately held broadcast companies with their valuation needs associated with FASB 141/142. In addition, Mr. Price is part of the business development team at BIA and is responsible for the client relationships with many of the largest broadcast companies nationwide. Mr. Price's appraisal and valuation experience is diverse, including reports for firms in the cellular, paging, SMR, cable, print, tower, and broadcast industries.

Prior to joining BIA, Mr. Price was employed by ADT Security Systems, Inc. in its Accounting Center located in Alexandria, Virginia. Mr. Price earned his B.S. degree in Finance from Virginia Polytechnic Institute and State University in Blacksburg, Virginia. Mr. Price received his M.B.A. from George Mason University in Fairfax, Virginia.

Qualifications
Of
Sidney E. Shumate

Sidney E. Shumate is the Senior Appraiser and Director of Engineering for the BIA/Kelsey, a financial consulting firm. At BIA/Kelsey, Mr. Shumate is primarily engaged in the appraisal of tangible assets of broadcasting, print, Internet and related media properties, expert witness support, and preparation of business plans and technical evaluation reports.

Mr. Shumate received his B.S. degree in Electrical Engineering from West Virginia University Institute of Technology, and received EIT certification in 1975. He holds a General Class Radiotelephone Operators License, and a Virginia Contractor's License endorsed for building, electrical, and specialty construction. He is a member and former chapter Chairman of the **Institute of Electrical and Electronics Engineers (IEEE)**, and is also a member and currently serves on the Advisory Committee (ADCOM) of the **IEEE Broadcast Technology Society.**

Mr. Shumate started as an engineer and DJ at WSLW, White Sulphur Springs, WV, in 1973, and later served as Chief Engineer of WMON, while in college. Since receiving his degree he has served at different times as Senior Engineer, Assistant Chief, and, from 1979 to 1995, as Director of Engineering at WVIR-TV in Charlottesville, VA. In between, he was a Senior Engineer at WPGH-TV, Pittsburgh, Pennsylvania, and was Director of Engineering for WAFF-TV in Huntsville, AL, where he was also responsible for WHOS and WDRM-FM in Decatur, AL.

In Charlottesville, he relocated the studios to new facilities in 1984, and in 1985, made WVIR-TV the first stereo TV station in VA. In 1992, he upgraded the transmitter facilities to be a five-megawatt, omnidirectional transmitter site incorporating the largest common-mode TV transmitter built to date. Mr. Shumate attended Thales first IOT-based transmitter school. He also designed and built microwave relay systems, ENG and EFP vans, a news bureau in Staunton, Virginia, and a translator with a special nulling antenna system at Massanutten Peak.

Mr. Shumate is also the owner of Blue Ridge Video Services, and, from 1988 to 2006, was also the founder, promoter, builder, original owner, and General Manager of WVGV-TV (now WVNS-TV),

Lewisburg, WV. Prior to joining BIA/Kelsey in 1997, Mr. Shumate was employed by High Mountain Broadcasting, Inc. to relocate and upgrade WVSX (TV).

While at BIA/Kelsey, Mr. Shumate has presented papers at the 1998 ("Methods and Costs of Installing Initial and Interim DTV Transmission Facilities on Existing Towers"), and 2006 ("Evaluating Your HD Radio™ Coverage") NAB Broadcast Engineering Conferences.

Re: Estimate of the Fair Market Value of the Intangible Assets of the radio stations owned by the New Jersey Public Broadcast Authority (NJPBA), as of October 1, 2010

Dear Mr. Jonas:

Pursuant to your request, BIA Advisory Services, LLC (d/b/a "BIA/Kelsey") has prepared appraisals to arrive at an opinion as to the Fair Market Value of the tangible and intangible assets of the radio stations owned by the New Jersey Public Broadcast Authority (NJPBA), as of October 1, 2010. Fair Market Value is defined later in this report.

The valuation of the tangible assets is contained in another report, however, the total value of the tangible assets is used in this report.

Based on the data, analyses, and conclusions set forth in the report that follows, it is our opinion that the fair market values of these tangible and intangible assets, as of October 1, 2010, are as stated in the following value summary.

Respectfully Submitted,

BIA ADVISORY SERVICES, LLC (d/b/a BIA/Kelsey)

William Redpath, ASA, CFA, CPA, ABV, CIPM
Vice President

STATEMENT OF INTRODUCTION

STATEMENT OF INTRODUCTION

BIA/Kelsey has been retained by NJPBA to estimate the Fair Market Value of the intangible assets of the radio stations owned by NJPBA, as of October 1, 2010.

In this document, we have appraised the intangible assets that are separable from goodwill. The methodology, life, and value of each of the intangible assets are stated in the text of that particular asset. The most appropriate methods available were used in valuing these intangible assets.

In the course of the appraisal, BIA/Kelsey was provided with station-related data and other information. BIA/Kelsey also spoke with Mike Jonas, and Rick Williams, Operations Manager and Assistant Director of NJN Engineering, in connection with our analysis. BIA/Kelsey has made no investigation as to the accuracy of this data or to the title of the assets.

IDENTIFICATION OF THE PROPERTY

As of October 1, 2010, NJPBA was the licensee of WNJB-FM, WNJM-FM, WNJN-FM, WNJO(FM), WNJP(FM), WNJS-FM, WNJT-FM, WNJY(FM), WNJZ(FM).

In a separate valuation report, BIA/Kelsey estimated the fair market value of those radio stations, in asset sales, as going concerns, at $4,292,000, as of October 1, 2010. The purpose of this report is to identify the intangible assets and estimate their fair market values for review by the Department of the Treasury of the State of New Jersey.

BIA/Kelsey estimated the fair market value of the tangible assets, in place and in use, of the radio stations of NJPBA, as of October 1, 2010, in a separate report. The total value of the tangible assets from that report will be used in this report.

BIA/Kelsey has been retained by NJPBA to estimate the fair market values of the intangible assets that could be separated from goodwill. Those assets are: (1) FCC licenses; (2) the Contributors Base Asset; and (3) a Underwriters Base Asset.

All of these intangible assets meet the following tests[1]:

(1) those assets are capable of being separated or divided from the acquired entity and sold, transferred, licensed, rented, or exchanged; or

(2) those assets arise from contractual or other legal rights (regardless of whether those rights are transferable or separate from the acquired entity or from other rights and obligations).

Details pertaining to the assets valued are included in the report.

PURPOSE, INTENDED USE AND METHODOLOGY

The purpose of this appraisal is to estimate, as of October 1, 2010, the fair market value of these intangible assets. This report is intended to be used for internal review by the Department of the Treasury of the State of New Jersey.

In valuing the intangible assets, I have considered three approaches to value. These are the cost approach, the market approach, and the income approach.

The **cost approach** is that approach which measures value by determining the current cost of an asset and deducting depreciation, that is, physical deterioration and functional and economic obsolescence. In its simplest form, it is nothing more than current replacement cost less all depreciation.

The **market approach** is that approach to value in which recent sales and offering prices of comparable properties are analyzed to arrive at an indication of the most probable selling price of the subject property.

The **income approach** is that approach to value in which income generated by the subject property is analyzed and projected over a specified time period and capitalized at an appropriate market rate to arrive at the property's value.

[1] Source: Statement of Financial Accounting Standards No. 141; June 2001.

I have chosen the market approach for the FCC licenses, and an income approach for the Contributors Base Asset and the Underwriters Base Asset, as explained in the individual asset valuations in this report.

For the purposes of this report, the definition of fair value, according to the Glossary in the American Society of Appraisers' Business Valuation Standards, is:

- **Fair Market Value** - "The price, expressed in terms of cash equivalents, at which property would change hands between a hypothetical willing and able buyer and a hypothetical willing and able seller, acting at arm's length in an open and unrestricted market, when neither is under compulsion to buy or sell and when both have reasonable knowledge of the relevant facts."

RIGHTS AND LIMITING CONDITIONS

This appraisal of the intangible assets of NJPBA has been prepared for the internal review of the Department of the Treasury of the State of New Jersey, and any other use of this report is invalid.

It should be noted that the appraisal of the intangible assets of NJPBA has been prepared exclusively for the Department of the Treasury of the State of New Jersey (DTNJ) and is not to be reproduced in whole or in part for any reason without the express written consent of DTNJ and BIA/Kelsey.

It should be noted that these intangible assets are a part of the going concern enterprise value of the radio stations of NJPBA. The values of these assets are a part of, not in addition to, the fair market value, in an asset sale, as a going concern, of those radio stations.

The appraiser assumes no responsibility for matters of a legal nature affecting the property appraised. The appraiser also assumes property free and clear of all liens and other encumbrances. The information provided by the client was assumed to be accurate and no steps were taken to independently verify the material.

This appraisal is valid only for the appraisal date or dates specified herein and only for the appraisal purpose specified herein. The client warrants that any reports, analyses, or other documents

prepared for it by the appraiser will be used only in compliance with all applicable laws and regulations.

No site visit to the studio or offices of NJPBA was conducted in the completion of this report.

STATEMENT OF APPRAISERS' INDEPENDENCE

We certify to the best of our knowledge and belief:

The statements of fact contained in this report are true and correct.

The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, unbiased professional analyses, opinions and conclusions.

BIA/Kelsey and we have no present or prospective interest in the property that is the subject of this report, and we have no personal interest or bias with respect to the parties involved.

BIA/Kelsey's and our compensation are not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

I hereby certify that, to the best of our knowledge and belief, the statements of fact contained in the report are true and correct, and this report has been prepared in conformity with the Uniform Standards of Professional Appraisal Practice of The Appraisal Foundation and the Principles and Code of Ethics of the American Society of Appraisers, and the Statement on Standards for Valuation Services #1 from the American Institute of Certified Public Accountants.

No one provided significant professional assistance to the person signing this report.

The American Society of Appraisers has a mandatory recertification program for all of its Senior members. Mr. Redpath is in compliance with that program.

INTANGIBLE ASSETS
VALUATION

INTANGIBLE ASSETS VALUATION

There are three (3) categories of intangible assets: (1) FCC Licenses; (2) Contributors Base Asset; and (3) Underwriters Base Asset. The fair values of these assets, by category, are seen in the Value Summary.

The values of these assets, and their remaining useful lives, are stated in the preceding value summary and the following text. In certain tables, numbers may not exactly sum due to internal rounding.

FCC LICENSES

BIA Advisory Services, LLC ("BIA/Kelsey") has prepared a valuation analysis of the FCC licenses of Radio Stations WNJS-FM, WNJM(FM), WNJO(FM), WNJY(FM), WNJN-FM, WNJZ(FM), WNJT-FM, WNJB-FM and WNJP(FM), as of October 1, 2010.

The FCC licenses held by WNJS-FM, WNJM, WNJO, WNJY, WNJN-FM, WNJZ, WNJT-FM, WNJB-FM, and WNJP dictate the stations' operating guidelines as specified by the Federal Communications Commission (FCC). The FCC licenses specify the transmitting power, antenna height and location the stations must use while broadcasting. These parameters effectively define the area over which the stations may broadcast.

FCC rules and regulations also affect program content, by proscribing certain types of programming and requiring the programming to be "in the public interest." Additionally, the FCC must approve any transfer WNJS-FM, WNJM, WNJO, WNJY, WNJN-FM, WNJZ, WNJT-FM, WNJB-FM, and WNJP's licenses and has the power to revoke the stations' licenses or assign them to another party at the end of each eight-year license period.

WNJS-FM is a Class A radio station allotted to Berlin, New Jersey. WNJS-FM operates with an effective radiated power (ERP) of 20 watts vertically-polarized, and one watt horizontally-polarized, at a height above average terrain (HAAT) of 781 feet, on an assigned frequency of 88.1 megahertz (MHz). WNJS-FM also holds a construction permit (CP) to increase the vertically-polarized ERP to 80 watts, and increase the HAAT to 942 feet. The station had begun implementing the CP as of the October 1, 2010 valuation date and expected to complete construction by the end of October.

WNJM is a Class A FM radio station licensed to Manahawkin, New Jersey. WNJM operates with an ERP of 200 watts vertically-polarized, one watt horizontally-polarized, at a HAAT of 259 feet, on an assigned frequency of 89.9 MHz.

WNJO is a Class A FM radio station licensed to Toms River, New Jersey. WNJO operates with an ERP of four kilowatts (kW) vertically-polarized, one watt horizontally-polarized, at a HAAT of 121 feet, on an assigned frequency of 90.3 MHz.

WNJY is a Class A FM radio station licensed to Netcong, New Jersey. WNJY operates with an ERP of 520 watts vertically-polarized and one watt horizontally-polarized, at a HAAT of 430 feet, on an assigned frequency of 89.3 MHz.

WNJN-FM is a Class A radio station licensed to Atlantic City, New Jersey. WNJN-FM operates with an ERP of 6.0 kW vertically-polarized, 25 watts horizontally-polarized, at a HAAT of 276 feet, on an assigned frequency of 89.7 MHz.

WNJZ is a Class A FM radio station licensed to Cape May Court House, New Jersey. WNJZ operates with an ERP of 6.0 kW circularly-polarized, at a HAAT of 236 feet, on an assigned frequency of 90.3 MHz.

WNJT-FM is a Class A radio station licensed to Trenton, New Jersey. WNJT-FM operates with an ERP of 110 watts vertically-polarized, at a HAAT of 689 feet, on an assigned frequency of 88.1 MHz. WNJT-FM hold a CP (BPED-19990716MB) for a new satellite station licensed to Bernardsville, New Jersey. The CP was granted in July 1999 and has been extended to 2012, according to Mr. Rick Williams of NJPBA. According to Mr. Williams, the satellite station has not been constructed.

WNJP is a Class A FM radio station licensed to Sussex, New Jersey. WNJP operates with an ERP of 450 watts circularly-polarized, at a HAAT of 637 feet on an assigned frequency of 88.5 MHz.

WNJB-FM is a Class A radio station licensed to Bridgeton, New Jersey. WNJB-FM operates with an ERP of 2.5 kW vertically-polarized and one watt horizontally-polarized, at a HAAT of 220 feet on an assigned frequency of 89.3 MHz.

A basic assumption in our valuation of these FCC licenses was that these radio stations were new radio stations, signing on-the-air as of the date of this valuation, October 1, 2010. We assumed the competitive situation that existed in the market as of that date, except that these stations were just beginning operations. In doing so, we extract the value of going concern and any other assets acquired, and are strictly valuing the FCC licenses. We have estimated the combined fair market value of the FCC licenses of the radio stations to be $2,658,000.

The values of the NJPBA's FCC licenses have been estimated using the market approach with the exception of WNJM-FM, WNJS-FM, and WNJZ, which have been valued using the cost approach. Because these radio stations are operated as non-commercial FM radio stations, the appraiser

believes that valuing the radio FCC licenses using a market approach is more appropriate than using the income approach. BIA/Kelsey analyzed merger and acquisition transactions of non-commercial radios stations to arrive at the fair market value of these radio stations. BIA/Kelsey was able to find 21 relevant transactions between January 2010 and September 2010. This information is shown in Table 1.

For each of the non-commercial stations that were sold during that time BIA/Kelsey analyzed purchase price versus population coverage reachable by the stations' 60 dBu signal contour. The sales price of each of the stations was divided by the number of pops reachable by a 60 dBu signal to calculate price per pop.

Table 1 – Comparable Sales Information									
CALLS	Freq.	City of License	State	Market	Mkt Rank	60 dBu Cov. Pop	Sales Price ($)000s	Sales Date	Price Per Pop.

WCIN	91.3	Tunkhannock	PA	Wilkes Barre-Scranton, PA	70	274,219	275	06/10	$1.00
WSMR	89.1	Sarasota	FL	Sarasota-Bradenton, FL	73	696,197	1,275	08/10	$1.83
WDYN	89.7	Chattanooga	TN	Chattanooga, TN	106	852,508	2,500	08/10	$2.93
KRLJ	89.9	Jackson	MO	Unrated		104,428	220	08/10	$2.11
KBCP	90.7	Sealy	TX	Unrated		21,194	65	08/10	$3.07
KTRU	91.7	Houston	TX	Houston-Galveston, TX	6	3,416,534	9,500	08/10	$2.78
WHSS	89.5	Hamilton	OH	Cincinnati, OH	28	98,701	156	09/10	$1.58
WSRX	89.5	Naples	FL	Ft. Myers-Naples-Marco Island, FL	62	342,935	2,000	09/10	$5.83
KXWA	89.7	Loveland	CO	Ft. Collins-Greeley, CO	120	953,785	3,050	09/10	$3.20
								Average	**$3.38**
								Median	**$2.98**

The median price per pop of the 60 dBu signals computed to be $2.98. Below is a table showing the 60 dBu signal coverage and the radio stations' population for the nine NJPBA stations and the estimated "stick" value of these radio stations when multiplied by the 60 dBu calculated median price per pop of $2.98.

Calls	City of License	Population Served under 60 dBu Contour	"Stick" Value
WNJB	Bridgeton	157,668	$469,000
WNJM	Manahawkin	48,509	$144,000
WNJN	Atlantic City	189,140	$563,000
WNJO	Toms River	166,526	$496,000
WNJP	Sussex	135,585	$403,000
WNJS	Berlin	47,570	$142,000
WNJT	Trenton	428,571	$1,275,000
WNJY	Netcong	195,173	$581,000
WNJZ	Cape May	73,721	$219,000

We have estimated that the following construction costs would be incurred for sufficient technical equipment and for the structuring of operational facilities for the nine FM stations: WNJB-FM, $195,000; WNJM-FM, $195,000; WNJN-FM, $219,000; WNJO, $188,000; WNJP, $177,000; WNJS-FM, $272,000; WNJT-FM, $248,000; WNJY, $177,000; and WNJZ $217,000. The construction cost estimates assume the minimum necessary technical plant required in order for the stations to begin their broadcast operations. The estimate construction cost figures are exclusive of land, buildings, towers, and associated improvements as it is assumed that the new stations would lease both their transmitter sites and studio and office locations. Deducting the aforementioned construction costs from the estimated "stick" values results in the following FCC licenses for the radio stations: WNJB-FM, $274,000; WNJN-FM, $344,000; WNJO, $308,000; WNJP, $226,000; WNJT-FM, $1,027,000; and WNJY, $404,000.

We attempted to value WNJM-FM, WNJS-FM, and WNJZ's FCC licenses using the market approach, but were unable to return a positive number due to the construction costs being higher than the arrived at "stick" value figure for each of the stations. As a result, the values of WNJM, WNJS, and WNJZ's FCC licenses are based on their replacement costs. The appraiser estimates this replacement value, based on estimated legal, consulting, engineering, and in-house charges to be $25,000 for each station.

WNJB-FM's FCC License:	**$274,000**
WNJM-FM's FCC License:	**25,000**
WNJN-FM's FCC License:	**344,000**
WNJO(FM)'s FCC License:	**308,000**
WNJP(FM)'s FCC License:	**226,000**
WNJS-FM's FCC License:	**25,000**
WNJT-FM's FCC License:	**1,027,000**
WNJY(FM)'s FCC License:	**404,000**
WNJZ(FM)'s FCC License:	**25,000**
Total FCC License Value:	**$2,658,000**

CONTRIBUTORS BASE ASSET

The value of the Contributors Base Asset is equal to the present value of all the net cash flows that would be expected to be received from the contributors base in the future, given projected future revenues and its expected life.

To estimate the survival rate for the radio division's contributors base, I reviewed data from DonorCentrics Executive Program Overview report on NJN's Annual TV Gifts for Fiscal Year 2010. This report had contributor attrition data for the NJN television stations. Because no such data was supplied to us for NJN's radio stations, I used this attrition data for the radio stations.

In this section of this report is the sheet the contributor attrition data. Fiscal years end on June 30 of each year. The data is by number of contributors, not contributor revenue. Such data was not available for an attrition analysis.

I summed the "Renew" and "Additional" number for each year FY 2007 through FY 2010 and divided by the total number of contributors from the previous fiscal year.

The survival rates calculated to 46.25% in FY 2007, 39.57% in FY 2008, 41.76% in FY 2009 and 48.35% in FY 2010. The average of the four survival rates is 43.98%, and I will use that as the projected annual survival rate going forward.

As seen on Table 2, I projected revenues for this contributors base through FY 2024. This projection is my estimate of the revenues to be earned in the future from the contributors who were already contributing to NJN Radio, as of October 1, 2010.

Based on our knowledge of the not-for-profit radio industry and discussions with Mike Jonas, it is our belief that non-for-profit radio stations would continue operating even if they did not receive these underwriters' revenues. Therefore, I did not deduct operating expenses or deduct contributory asset charges for contributing assets, such as tangible assets, working capital and an assembled workforce asset. Also, because this is an asset for a non-for-profit entity, I did not deduct any tax payments.

The annual net benefits, which equal each year's projected revenues, are then discounted to present value using an after-tax discount rate of 10.00% (see Appendix B for an explanation).

The present value of the discounted cash flows generated by the Contributors Base Asset, as of October 1, 2010, is $51,587, which is the value of this asset. The estimated remaining useful life of this asset is about 14 years.

Fair Market Value: $51,587

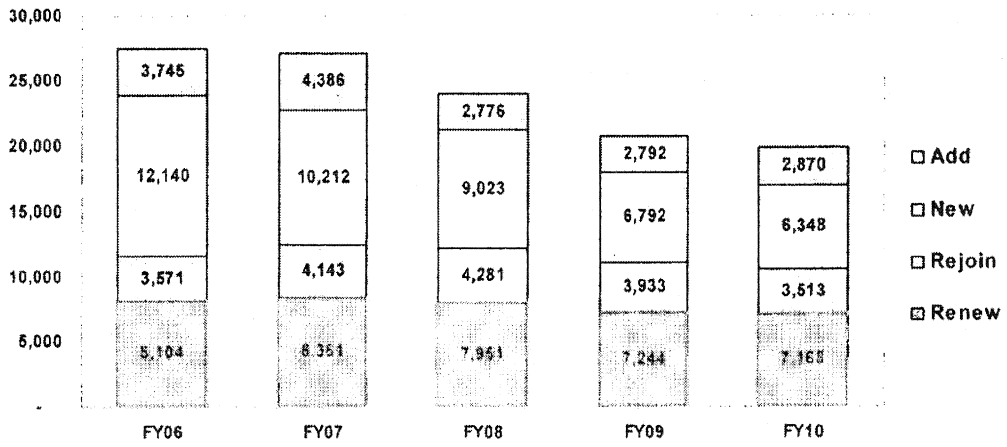

Gift Type Comparison: Section C

Regardless of station database coding, ***donor***Centrics™ uses standardized gift-timing rules to determine whether a donor is new, renewed, rejoined or gave additional gifts. Standardized business rules based on gift timing make it possible to benchmark and compare performance across all stations or to allow a single station to analyze performance when station rules change.

- **New**: the first gift on a donor's record.
- **Renewal**: a gift within 9 to 17 months of the previous membership gift.
- **Rejoin**: any gift made 17 or more months after the previous membership gift.
- **Additional**: gifts made from 0 to 9 months after a membership gift.

Donor Counts by Gift Type

	FY06	FY07	FY08	FY09	FY10	*09-10 %Change*	*06-10 %Change*
Renew	**8,104**	**8,361**	**7,951**	**7,244**	**7,168**	*-1.0%*	*-11.5%*
Rejoin	**3,571**	**4,143**	**4,281**	**3,933**	**3,513**	*-10.7%*	*-1.6%*
New	**12,140**	**10,212**	**9,023**	**6,792**	**6,348**	*-6.5%*	*-47.7%*

				Total Present Value of Net Benefits:			**$51,587**

UNDERWRITERS BASE ASSET

The value of the Underwriters Base Asset is equal to the present value of all the net cash flows that would be expected to be received from the underwriters base in the future, given projected future revenues and its expected life.

To estimate the survival rate for the radio division's underwriters base, we reviewed historical underwriter data for NJN Radio for each fiscal year from FY 1999 through FY 2009. We did not have sufficient data to do an actuarially sound analysis, so we instead analyzed the number of underwriters who continued with NJN Radio in the year after they served as an underwriter in order to estimate an annual survival rate. The results can be seen in this section of the report.

In terms of revenue, the average survival rate was 33.4%, and that is the projected survival rate that I used as the projected annual survival rate going forward.

As seen on Table 3, I projected revenues for this underwriters contributors base through FY 2021. This projection is my estimate of the revenues to be earned in the future from the underwriters who were already underwriting NJN Radio, as of October 1, 2010.

Based on our knowledge of the not-for-profit radio industry and discussions with Mike Jonas, it is our belief that non-for-profit radio stations would continue operating even if they did not receive these contributors' donations. Therefore, I did not deduct operating expenses or deduct contributory asset charges for contributing assets, such as tangible assets, working capital and an assembled workforce asset. Also, because this is an asset for a non-for-profit entity, I did not deduct any tax payments.

The annual net benefits, which equal each year's projected revenues, are then discounted to present value using an after-tax discount rate of 10.00% (see Appendix B for an explanation).

The present value of the discounted cash flows generated by the Underwriters Base Asset, as of October 1, 2010, is $46,893, which is the value of this asset. The estimated remaining useful life of this asset is about 11 years.

Fair Market Value: $46,893

NJN Radio					
Year	Underwriter Count	Sum	# of Underwriters that Survived from Prev. Year	Underwriter Revenue that Survived from Prev. Year	Revenue Survival %
1999	5	$ 6,897

EXHIBIT A
WARA ANALYSIS

WEIGHTED AVERAGE RETURN ON ASSETS ANALYSIS

In considering the discount rates to use on the intangible assets in this report, I began by considering the after-tax Weighted Average Cost of Capital ("WACC") for the radio stations of NJPBA.

Because the fair market value report of the nine subject NJPBA radio stations used only a market valuation approach, not an income valuation approach, there was no WACC determined for the radio stations in that report.

I did a valuation of commercial radio stations and commercial radio networks in another valuation report, as of October 1, 2010, in which an income valuation approach was used. The after-tax WACC in that report was 8.35%. I think that is the appropriate WACC to use in this report.

I then used a Weighted Average Return on Assets ("WARA") to reconcile the overall WACC to the returns on the assets that constitute this business enterprise.

Weighted Average Return on Assets ("WARA")

The WARA for the Consumer Division can be seen on Table A-4. The value-weighted after-tax returns on assets sum to 8.350%, which is my estimated after-tax WACC.

Table A-1

Weighted Average Return on Assets

	Asset Value	Percentage of Value	After-Tax Rate of Return	WARA	Remaining Life
Tangible Assets	$692,921	16.14%	6.00%	0.97%	Varies by Category
FCC Licenses	2,658,000	61.93%	8.00%	4.95%	Indefinite
Contributors Base Asset	51,587	1.20%	10.00%	0.12%	14 years
Underwriters Base Asset	46,893	1.09%	10.00%	0.11%	11 years
Goodwill	842,599	19.63%	11.20%	2.20%	Indefinite
Total	**$4,292,000**	**100.00%**		**8.35%**	

EXHIBIT B
QUALIFICATIONS

Qualifications
Of
William Redpath, ASA, CFA, CIPM, CPA, ABV

William Redpath is a Vice President for BIA/Kelsey, a financial and strategic consulting firm with an expertise in the appraisal of broadcasting, cable, and telecommunications properties and preparation of financial presentations for communications clients. Prior to joining BIA/Kelsey in 1985, Mr. Redpath was a Senior Financial Analyst with NBC in New York.

Mr. Redpath earned his B.A. degree in Economics and Political Science from Indiana University and his M.B.A. from The University of Chicago.

After completing his formal education, Mr. Redpath was a staff auditor in the Cincinnati office of Arthur Andersen & Co. from 1980 to 1982. Subsequent to that, he was Assistant Financial Manager of WISH-TV, Indianapolis. He then joined the Internal Audit Department at ABC, New York, where he worked on numerous audits, including those of WXYZ(AM) (now WXYT), WRIF(FM) and WXYZ(TV), Detroit, after which he joined NBC.

Mr. Redpath has prepared hundreds of valuations of business enterprises, privately-held equity interests, and purchase price allocations for financial and tax reporting purposes. He has been an expert witness in numerous litigations. He has authored articles for the BCFM Journal and other professional journals on intangible asset valuation. He has testified in state courts, United States District Court and United States Bankruptcy Court on valuation matters.

Mr. Redpath is a Certified Public Accountant licensed in the Commonwealth of Virginia. He is a member of the American Institute of Certified Public Accountants, from which he has earned the Accredited in Business Valuation (ABV) designation. He is also an Accredited Senior Appraiser (ASA) in Business Valuation with the American Society of Appraisers, a Chartered Financial Analyst (CFA), and he holds the Certificate in Investment Performance Measurement (CIPM) designation from the CFA Institute.

Qualifications
Of
Geoffrey C. Price

Geoffrey C. Price is a Vice President for BIA/Kelsey, a financial and strategic consulting firm specializing in the fair market valuations, asset appraisals, strategic analyses, and business plans of broadcast and telecommunications properties. In his current position at BIA/Kelsey, Mr. Price is responsible for the managing and operating of the company's nationwide leading Consulting Group. Mr. Price has been at BIA/Kelsey since 1988 and has appraised hundreds of media and telecommunications properties worth in aggregate in the tens of billions of dollars.

As a Vice President with BIA/Kelsey, Mr. Price has been responsible for the preparation of asset appraisals, valuation studies, strategic consulting assignments, and litigation support for clients in the communications and broadcast industries. He has also been responsible at BIA/Kelsey for assisting many publicly traded and privately held broadcast companies with their valuation needs associated with FASB 141/142. In addition, Mr. Price is part of the business development team at BIA/Kelsey and is responsible for the client relationships with many of the largest broadcast companies nationwide. Mr. Price's appraisal and valuation experience is diverse, including reports for firms in the cellular, paging, SMR, cable, print, tower, and broadcast industries.

Prior to joining BIA/Kelsey, Mr. Price was employed by ADT Security Systems, Inc. in its Accounting Center located in Alexandria, Virginia. Mr. Price earned his B.S. degree in Finance from Virginia Polytechnic Institute and State University in Blacksburg, Virginia. Mr. Price received his M.B.A. from George Mason University in Fairfax, Virginia.

Re: Estimated Fair Market Value of the Television Stations Owned by New Jersey Public Broadcast Authority as of December 1, 2010

Dear Mr. Jonas and Mr. Williams:

BIA Advisory Services, LLC (d/b/a BIA/Kelsey) has prepared this report to arrive at the fair market value of the television stations owned by New Jersey Public Broadcast Authority (NJPBA) as of December 1, 2010.

Respectfully Submitted,

BIA/Kelsey Group

Mark R. Fratrik, Ph. D.
Vice President

FAIR MARKET VALUATION OF THE NJPBA TELEVISION STATIONS **9**

QUALIFICATIONS **15**

STATEMENT OF INTRODUCTION

STATEMENT OF INTRODUCTION

The State of New Jersey, Department of the Treasury, Division of Administration has retained BIA/Kelsey Advisory Services, LLC (d/b/a BIA/Kelsey) to estimate the fair market value of the television stations and translators owned by New Jersey Public Broadcast Authority (NJPBA) as of December 1, 2010.

While preparing this report, BIA/Kelsey was not provided with any historical and projected financial statements or any other information about the stations. In the course of the appraisal and analysis, BIA/Kelsey relied on BIA/Kelsey's Media Access Pro for recent station sales information.

PURPOSE AND METHODOLOGY

This report determines, as of December 1, 2010, the fair market value of the television stations owned by NJPBA. It is being prepared for financial reporting purposes.

To determine the fair market values of these television stations, the appraiser has considered three approaches to value. These are the cost approach, the market approach, and the income approach.

The cost approach is that approach which measures value by determining the current cost of an asset and deducting depreciation, that is, physical deterioration and functional and economic obsolescence. In its simplest form, it is nothing more than current replacement cost less all depreciation.

The market approach is that approach to value in which recent sales and offering prices of comparable properties are analyzed to arrive at an indication of the most probable selling price of the subject property.

The income approach is that approach to value in which income generated by the subject property is analyzed and projected over a specified time period and capitalized at an appropriate market rate to arrive at the property's value.

The appraiser has chosen the market approach due to the non-commercial nature of these stations as licensed as a non-commercial television stations.

The Business Valuation Committee of the American Society of Appraisers defines fair market value as the price, expressed in terms of cash equivalents, at which property would change hands, between a hypothetical willing and able buyer and a hypothetical willing and able seller, acting at arm's length in an open and unrestricted market, when neither is under compulsion to buy or sell and when both have reasonable knowledge of the relevant facts.

RIGHTS AND LIMITING CONDITIONS

It should be noted that this report has been prepared exclusively for the State of New Jersey, Department of the Treasury and is not to be reproduced in whole or in part for any reason without the express written consent of the State of New Jersey, and that of BIA.

The appraisers assume no responsibility for matters of a legal nature affecting the property appraised. The appraisers also assumed property free and clear of all liens and other encumbrances. The information provided by the clients was assumed to be accurate and no steps were taken to independently verify the material.

This appraisal is valid only for the appraisal date or dates specified herein and only for the appraisal purpose specified herein. The client warrants that any reports, analyses, or other documents prepared for it by the appraisers will be used only in compliance with all applicable laws and regulations.

STATEMENT OF APPRAISERS' INDEPENDENCE

The statements of fact contained in this report are, to the best of the appraisers' knowledge, true and correct.

The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and is our personal, unbiased professional analyses, opinions and conclusions.

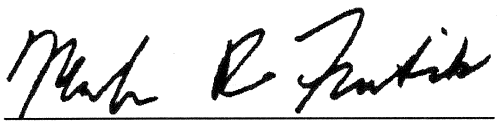

BIA/Kelsey has no present or prospective interest in the property that is the subject of this report, and has no personal interest or bias with respect to the parties involved.

BIA/Kelsey's compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of, this report.

The contents of this report should in no way be construed as a recommendation regarding any investment in, or otherwise contribution of funds to NJPBA or any other entity.

No one provided significant professional assistance to the persons signing this report.

FAIR MARKET VALUATION OF THE NJPBA TELEVISION STATIONS

FAIR MARKET VALUATION OF THE NJPBA TELEVISION STATIONS

Overview

NJPBA owns four non-commercial full-power television stations and three translators licensed[1] to the following cities, operating on specific channels with specified power (Effective Radiated Power – ERP) and antenna height above average terrain (HAAT):

Station	City of License	ERP	HAAT
WNJB	New Brunswick, NJ	17.9 kW	705'[2]
WNJN	Montclair, NJ	200 kW	764'
WNJS	Camden, NJ	197 kW	886'
WNJT	Trenton, NJ	46 kW	873'
W36AZ	Sussex, NJ	14.6 kW	509'
W49BE	Hackettstown, NJ	10 kW	518'
W43CH	Belvidere, NJ	1 kW	814

Valuation Methodology

The State of New Jersey has engaged BIA/Kelsey to provide current fair market valuations of these television stations as of December 1, 2010. The appraiser has chosen the market approach for calculating the fair market value of the station as a going concern.

---

[1] Note that the three translator stations have construction permits (CPs) for digital operations. At present, there is no Federal Communications Commission mandate to convert translators to digital service.

[2] Due to interference issues with WABC(TV) in the New York, NY market and WGAL(TV) in the Lancaster, PA market, WNJB is operating under a Special Temporary Authority (STA), file number BDSTA-20100107ADL, with 40.82 kW of ERP from an antenna HAAT of 715 feet.

Fair Market Valuation of NJPBA Stations

BIA/Kelsey analyzed merger and acquisition transactions of non-commercial televisions stations and translators to arrive at the fair market value of these television stations and translators. BIA/Kelsey was able to find three relevant transactions of non-commercial television stations and seven translators between January 2009 and November 2010. This information is shown in Tables 1 and 2.

For each of the non-commercial stations that were sold during that time BIA/Kelsey analyzed purchase price versus television households within these stations local television markets. Per the rules covering local non-commercial television stations, all local cable systems and Direct Broadcast Satellite services provide coverage of all local non-commercial television stations to subscribers in those markets.[3] This sales price per local television household can be used to relate the non-commercial station's ability to generate revenues with donor contributions and local business underwriting. The sales price of each of the stations was divided by the number of television households within each of markets served by the television stations sold to calculate price per television household.

The average and median prices per television household computed to be $2.30 and $2.33, respectively. Below is a table showing the television households served by the four NJPBA stations and the estimated value of these stations when multiplied by the calculated average price per television household of $2.30. In total the value of these four stations is approximately $47 million.

[3] DBS services have to provide all local commercial and non-commercial television stations if they provide any local television stations within a particular market. This portion of the statute is commonly referred to as "carry One – Carry All."

Calls	City of License	Television Households w/n Local Television Market	Value of Station
WNJB	New Brunswick	7,279,000	$16,741,700
WNJN	Montclair	7,279,000	$16,741,700
WNJS	Camden	2,930,000	$6,739,000
WNJT	Trenton	2,930,000	$6,739,000
		TOTAL:	**$46,961,400**

For each of the translators that were sold during that time, BIA/Kelsey analyzed purchase price versus population coverage reachable by the translators' 60 dBu signal contour. The sales price of each of the stations was divided by the number of pops reachable by a 60 dBu signal to calculate price per pop.

The average and median price per pop of a 60 dBu signals computed to be $0.18 and $0.13, respectively. Below is a table showing the 60 dBu signal coverage and the translators population for the three NJPBA translators and the estimated value of these stations when multiplied by $0.15, the average of the 60 dBu calculated median and average prices per pop. In total the value of these three translators is approximately $90 thousand.

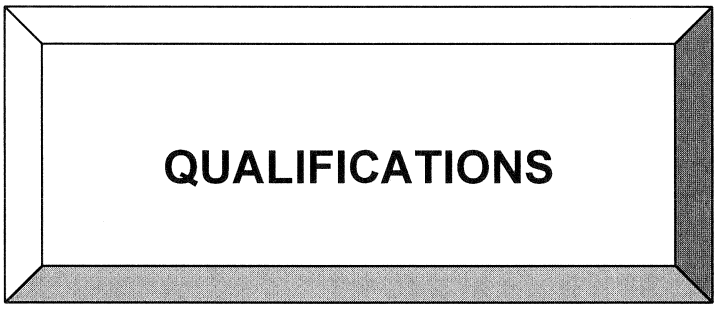

Calls	City of License	Population Served under 60 dBu Contour	Value of Station
W36AZ	Sussex, NJ	270,446	$40,567
W49BE	Hackettstown, NJ	271,421	$40,713
W43CH	Belvidere, NJ	61,439	$9,216
		TOTAL:	**$90,496**

Mark R. Fratrik, Ph. D.

Mark R. Fratrik is a Vice President for BIA/Kelsey Financial Network, Inc. (BIA), which offers merchant banking and financial and strategic advisory services for the media, telecommunications, and related industries. For more than 18 years BIA/Kelsey has assisted clients in increasing value by providing a wide range of services related to acquisitions, mergers, divestitures, operations, integration, growth and changes in strategic direction.

Prior to joining BIA/Kelsey in January 2001, Mr. Fratrik served NAB for 15 years as Vice President/Economist. While at NAB, Mr. Fratrik conducted primary research about the broadcasting and related industries. He has conducted several research studies including "Independent Radio Voices in Radio Markets," "Format Availability After Consolidation," "Interference from Low Power FM Stations to Existing Stations," and "The 1990 Children's Radio Act: Its Impact on the Amount of Educational and Informational Programming." Also, Mr. Fratrik has written/co-authored numerous articles for publication including FM Subcarrier Market Report/Technology Guide, These Taxing Times: A Tax Guide for Broadcasters, and Strategic Planning Handbook for Broadcasters.

Before joining NAB in 1985, Mr. Fratrik worked for the Federal Trade Commission in the Bureau of Economics where he spent five years conducting analyses of industry practices to evaluate overall economic impact. Throughout his career, Mr. Fratrik has researched and spoken at numerous conferences on new media technologies including DTV datacasting. Also, Mr. Fratrik has worked closely with broadcasters in determining what opportunities lay in the spectrum as well as exploring regulatory matters concerning the spectrum.

Mr. Fratrik received his B.A. in mathematics and economics from State University of New York at Binghamton and his master's and doctoral degrees in economics from Texas A&M in College Station, Texas.

TECHNICAL OVERVIEW OF NEW JERSEY NETWORK TELEVISION STATIONS

Re: Technical Overview of Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH, licensed to Montclair, New Brunswick, Trenton, Camden, Sussex, Hackettstown and Belvidere, New Jersey, respectively, as of December 1, 2010

Dear Mr. Jonas and Mr. Williams:

Pursuant to your request, BIA Advisory Services, LLC (d/b/a BIA/Kelsey) has inspected selected tangible assets and technical facilities of WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH, for the purpose of performing an on-site engineering due diligence of the stations' facilities, note technical concerns, and provide an estimate of future capital expenditures, as of December 1, 2010.

Respectfully Submitted,

BIA Advisory Services, LLC

Geoffrey C. Price
Vice President

STATEMENT OF INTRODUCTION

STATEMENT OF INTRODUCTION

BIA Advisory Services, LLC (d/b/a BIA/Kelsey) has been authorized by the State of New Jersey to perform an on-site engineering due diligence of the broadcast facilities of Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH, note technical concerns, and provide an estimate of future capital expenditures for the stations, as of December 1, 2010. These stations operate as part of the New Jersey Network, a statewide public broadcasting network. Sidney E. Shumate, a broadcast engineer contracted by BIA/Kelsey, visited some of the stations' facilities on November 18, 19 and 23, 2010. For the remaining stations, Mr. Shumate relied on an inventory provided by New Jersey Network.

In the course of the report, BIA/Kelsey was provided with industry related data and other information. BIA/Kelsey has made no investigation as to the accuracy of this data or to the title of any of the assets.

Purpose and Methodology

The purpose of this report is to relate the results of an on-site engineering due diligence of the New Jersey Network's television facilities. This report is being prepared in order to determine the condition of the stations' facilities, note any technical deficiencies, and determine what the stations' future capital expenditure needs may be.

While calculating future capital expenditures for the stations, the appraiser used current industry equipment prices appearing in appropriate manufacturers' price lists and catalogs or solicited current market data from dealers of used equipment as well as relying upon published used equipment price lists, catalogs, and listings in trade magazines and publications. The appraiser also discussed current market trends with used equipment dealers/brokers and manufacturers.

Appraisal Certificate

This engineering due diligence of the New Jersey Network television stations has been made for the purpose of performing an on-site engineering inspection of the stations' transmitter facilities, note technical concerns, and provide an estimate of future capital expenditures for the stations, as of December 1, 2010.

The appraiser was not informed of any serious structural deficiencies with any of the stations' facilities and technical equipment, except if stated elsewhere in this report. BIA/Kelsey assumes no responsibility for conformity to specific local and Federal government requirements or for any hidden defects in either the real or personal property.

Rights and Limiting Conditions

It should be noted that this report on the technical facilities of the New Jersey Network television stations has been prepared exclusively for State of New Jersey, including any advisors and designees, and is not to be reproduced in whole or in part for any reason without the express written consent of State of New Jersey and BIA/Kelsey.

The appraisers assume no responsibility for matters of a legal nature affecting the properties inspected. The appraisers also assumed property free and clear of all liens and other encumbrances. The information provided by the clients was assumed to be accurate and no steps were taken to independently verify the material.

This report is valid only for the report date or dates specified herein and only for the appraisal purpose specified herein. The client warrants that any reports, analyses, or other documents prepared for it by the appraisers will be used only in compliance with all applicable laws and regulations.

Statement of Appraisers' Independence

- The statements of fact contained in this report are, to the best of the appraisers' knowledge, true and correct.
- The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, are our personal, unbiased professional analyses, opinions and conclusions.
- BIA/Kelsey has no present or prospective interest in the properties that are the subject of this report, and has no personal interest or bias with respect to the parties involved
- BIA/Kelsey's compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of, this report.
- BIA/Kelsey's analyses, opinions and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice (USPAP).
- No one provided significant professional assistance to the persons signing this report.

TECHNICAL OVERVIEW

TECHNICAL OVERVIEW OF NEW JERSEY NETWORK TELEVISION STATIONS

The tangible assets of the four New Jersey Network (NJN) full power Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and three Television Translators W36AZ, W49BE and W43CH, all programmed from studios in Trenton, New Jersey, that the appraiser inspected and identified include: land, leasehold improvements, buildings, towers, television antenna systems, television transmitter equipment, technical equipment, ENG/EFP equipment, microwave equipment, translator equipment, satellite equipment, two-way radio equipment, ENG/EFP vehicles, program/production materials and supplies, furniture and fixtures, office equipment, test equipment, tools, and spare parts.

An inspection and appraisal inventory of the NJN television technical operations center (TOC) in Trenton, and the WNJT(TV) transmitter site, was performed by Sidney E. Shumate for BIA Advisory Services, LLC, (d/b/a BIA/Kelsey), on November 18-19 and 22-23, 2010. The WNJS(TV) transmitter site had been visited and inspected by the appraiser on October 13, 2010, as part of a recent and related appraisal of the radio tangible assets of NJN. The appraiser was provided with an inventory of all technical assets, a schedule of real estate owned and leased by NJN, engineering diagrams of the Trenton studios, and other related financial and technical records. Mr. Richard Williams, Assistant Director of Engineering for NJN, conducted the tour of the Trenton studios, and of the visited radio and television transmitter sites, and provided information concerning the radio stations technical equipment, engineering maintenance procedures, and operating practices. The appraiser compared his appraisal inventories to the NJN inventory, supplementing where necessary, and then relied primarily on the NJN inventory to value the uninventoried sites on a Mass Appraisal basis.

When performing a Mass Appraisal, it is assumed, except as noted, that the uninspected sites are of similar age and condition to the sites inspected. The assets are discussed below. This report represents an overview of the technical facilities based on information provided by station personnel or based on the inspector's visual observation during a combined due diligence inspection and appraisal inspection and inventory. No measurements, other than the recording of transmitter readings and informal off-air tests, were performed in order to verify proper operation

or compliance with any federal laws on any equipment in the facilities or in the field. All comments regarding the condition of the tangible assets at the inspected sites are based on observations made during the appraiser's inspections. Unless otherwise stated in this report, all references to the condition of an asset or assets apply as of the date of the appraiser's inspection.

Stations Overview

All four of the NJN television stations and the three television translators are licensed to the New Jersey Public Broadcasting Authority (NJPBA), which was founded in 1968 by an act of the New Jersey State Legislature.

WNJN(TV), licensed to Montclair, New Jersey, is a non-commercial UHF digital television (DTV) station, licensed to transmit on Channel 51 with an effective radiated power (ERP) of 200 kilowatts (kW), with a non-directional pattern, at an antenna height above average terrain (HAAT) of 764 feet. NJPBA also holds a Construction Permit (CP) for WNJN, BPEDT-20080620ALF, to increase ERP to 443 kW at a HAAT of 778 feet.

WNJB(TV), licensed to New Brunswick, New Jersey, is a non-commercial DTV station, licensed to transmit on VHF Channel 8 with an ERP of 17.9 kW, at a HAAT of 705 feet, utilizing a directional pattern. Due to interference issues with WABC(TV) in the New York, NY market and WGAL(TV) in the Lancaster, PA market, WNJB is operating under a Special Temporary Authority (STA), file number BDSTA-20100107ADL, with 40.82 kW of ERP from an antenna HAAT of 715 feet. NJPBA has submitted an application for WNJB, BMPEDT-20100107ACX, to increase ERP to 21.72 kW at a HAAT of 715 feet.

WNJT(TV), licensed to Trenton, New Jersey, is a non-commercial UHF DTV station, licensed to transmit on Channel 43 with an ERP of 46 kW, at a HAAT of 873 feet, with a non-directional pattern. NJPBA also holds a CP for WNJT, BPEDT-20080620AGH, to increase ERP to 59.4 kW.

WNJS(TV), licensed to Camden, New Jersey, is a non-commercial UHF DTV station, licensed to transmit on Channel 22 with an ERP of 197 kW, at a HAAT of 866 feet, with a non-directional pattern. NJPBA also holds a CP for WNJS, BPEDT-20080620ALH, to increase ERP to 566 kW. WNJS identifies itself as Channel 23, its former analog channel.

W36AZ is a UHF television low power analog translator licensed to Sussex, New Jersey. W36AZ is licensed to transmit on Channel 36 with 14.6 kW of ERP, at a height above ground level of 53 feet.

W49BE is a UHF television low power analog translator licensed to Hackettstown, New Jersey. W49BE is licensed to transmit on Channel 49 with 10 kW of ERP, at a height above ground level of 138 feet.

W43CH is a UHF television low power analog translator licensed to Belvidere, New Jersey. W43CH is licensed to transmit on Channel 43 with 1 kW of ERP, at a height above ground level of 115 feet.

Overview of Station Facilities

Studios and Offices of the New Jersey Network Television Stations

All four of the NJN Television Stations normally simulcast the same statewide-networked program feed, originating from the NJN Technical Operations Center (TOC) in Trenton. The TOC, with four full production studios, live production control rooms, multiple post-production facilities, master control facilities, main newsroom for the state network, and operations and executive offices, occupy a 100,000 square foot building with six stories above ground, basement electrical and woodworking shops, and a sub-basement containing an emergency generator and main power conditioning, switching, and power and telephone distribution equipment. The sixth floor includes a microwave and satellite equipment room, with the rest being rooftop on which the satellite receive antennas are mounted. An approximately 60 foot tall self-supporting studio-to-transmitter link (STL) tower, which appeared to be in good condition, is mounted atop the sixth floor equipment room. This facility, constructed specifically for NJN's use in 1992, is owned by the State of New Jersey and leased by NJN, and is located at 25 South Stockton Street, in Trenton.

The NJN radio studios are co-located at the Trenton TOC. The radio studios, work room, tape storage room and office occupy six rooms, primarily on the fourth floor, and rack space in the central rack room and sixth floor microwave and satellite equipment room. In addition, the

NJN radio stations maintain one satellite dish on the roof. The rest of the building is occupied by the television operations, and by administrative, operations, and engineering offices and shops that support both the television and radio operations.

The NJN Newark studios occupy three leased floors of a hotel building, and are located at 50 Park Place, in Newark, New Jersey. NJN also operates a news bureau, identified as the South Jersey News Bureau, located near Atlantic City, in leased office space located at Room E035, Richard Stockton State College, in Pomona. The appraiser was not contracted to visit the Newark studios and the South Jersey News Bureau, and relied on the NJN inventory, financial records, and information from Mr. Williams, for this paragraph of the report.

Studio Equipment of the New Jersey Network Television Operations

With respect to NJN Television stations WNJT, WNJN, WNJB, and WNJS, NJPBA owns and maintaisn technical equipment for use in their daily broadcast operations. The air control rooms, the "master control" center that controls the distribution of the signals to the transmitter sites, have been recently refitted (2008-09) with new Barco and Miranda Kaliedo visual monitoring systems, are completely automated and digital, providing a nearly tapeless operating environment. The air control rooms utilize video and audio storage of most, if not all, programming and announcements on Omneon video servers. The NJN stations can receive, store and transmit programming in High Definition. Most local origination is in standard definition, often up-converted from analog. While the production suites are being converted to second or third generation AVID desktop editing suites, many with High Definition capability, the live studios are operating with aging production switching systems, manufactured primarily by Grass Valley, often dating to the original equipping of the TOC in 1992. The studios were designed to support both analog video and audio, and serial digital standard definition signal distribution when they were installed in the early 1990's. The studios have both aging analog and more recent serial digital routing systems manufactured by Grass Valley and nVision. The studio cameras are standard definition, studio configured Sony cameras, capable of being switched from 4:3 to 16:9 aspect ratios. The news operation is utilizing primarily Sony serial digital standard definition field camcorders, and editing equipment that is a mix of analog and desktop editing system equipment to produce the news. Where videotape is still being used, Sony MPEG IMX digital multi-format recorders are the primary choice of format, with aging capability for BetacamSP, Betacam, Umatic and 1 inch type C still available for use in utilizing archive and injesting (converting to digital) outside source material arriving on videotape.

Other equipment in use at the NJN television studios and production suites in Trenton includes: Grass Valley, Panasonic, Yamaha and Mackie audio consoles; JBL, Electro-Voice, Crown, Symetrix, Fostex, Roland, and Wohler audio monitoring; RTS intercom and cue systems; Leitch master and slave clock display systems; Vinten studio pedestals and pan-tilt heads; QTV teleprompters; Mole, Strand-Century, Kliegl, and Desisti lighting fixtures and elevator-equipped studio lighting systems; Colortran studio dimming systems; Electro-Voice, Shure and Sony wired and wireless microphones; Sony, Ikegami, Panasonic, Electrohome, and JVC video monitoring; Tektronix and Videotek waveform monitoring; Orban, Symetrix, Rane and Yamaha audio processing; 360 systems digital audio storage and editing systems; Evertz, Leitch, and Grass Valley routing, distribution, and format conversion systems; Sony, Tektronix and For-A frame synchronizers; and ADC video and audio patch panels and audio and video studio interface wiring panels. The Trenton studio technical equipment, except as noted, appeared to be in overall fair-to-good condition.

NJN Television Program Delivery Network

The stations are connected with an extensive, two-way, microwave relay system and electronic newsgathering microwave link system. Most of the 2GHz microwave transmitters and receivers used for newsgathering, have been replaced by new NuComm microwave equipment, controlled by Troll remote control systems, within the past two years, as per the nationwide swap-out of equipment agreement resulting from the FCC microwave band realignment. NuComm and older Microwave Radio Twin Stream and FLR-series transmitters and receivers are used for the STL and Intercity Relay links. The NJN Radio stations also utilize additional subcarriers on the television station's microwave relay system for a major part of their signal relay system, out to the co-located television and radio transmitter sites.

The microwave STL relay system delivers the television signals from the TOC, in downtown Trenton, to the co-located WNJT and WNJT-FM transmitter site located in the northeast suburbs of Trenton, via two-way 13 GHz microwave television relay links.

From the WNJT transmitter site, the signal path splits north and south. The northern leg utilizes microwave relay links to the WNJB New Brunswick television transmitter site in Warren Township. From the WNJB site, microwave relay links feed to the WNJN television transmitter in Montclair. The microwave relay system also extends to the Newark Studios. From the WNJB

site, the radio audio signals are relayed onward via NJN radio's 944 MHz FM radio STL links, one to Hamburg Mountain, where television translator W36AZ and the WNJP FM transmitter are located, and one to WNJY (FM) at Netcong.

The southern microwave relay link leaves the WNJT transmitter site, and is relayed, via 7 GHz television microwave relay links to the Mt. Laurel (formerly Mt. Holly) microwave relay site at 1020 Briggs Road, in Mt. Laurel. From the Mt. Laurel site, the signal is again relayed via 7 GHz television microwave relay links to the WNJS Camden television transmitter site in Waterford Township, at which the WNJS-FM radio transmitter is co-located. From the Waterford Township site, television microwave relay links extend to the Stockton Microwave relay site tower located at 46 W. Jimmie Leeds Road, at Stockton State College, near Pomona, NJ, near where the NJN South Jersey News Bureau is located. The radio audio signals arriving via the television microwave relay system are also demodulated and relayed from the WNJS (TV) and WNJS-FM Waterford Township site via NJN radio's 945 MHz radio STL links to WNJZ, WNJN-FM, WNJM-FM, and from WNJM-FM over the air to WNJO(FM).

At the three television translator sites, W36AZ, W43CH, and W49BE, the primary digital television program feed is received off-the-air from the associated full-power DTV transmitter, and down-converted to provide a single analog program feed to the still-analog translator transmitters.

The microwave relay antennas and transmission line systems utilize a mix of Andrew, Mark, Cablewave, Nurad, Microwave Radio and RFS equipment. Overall, the inspected microwave relay systems, not including the nearly new NuComm equipment, appeared to be in fair-to-good condition.

The Trenton operations center has multiple satellite receive antennas mounted atop the roof; the larger dishes have permanent roof mounts and range up to 5 meters in size, several of which are heater-equipped for snow or ice conditions. The satellite dish antennas include those by ADC, Vertex, Miralite and Andrew Receivers include MPEG receivers by Standard and General Instruments. The satellite receive equipment appeared to be in overall fair condition.

Other tangible assets inspected include program/production materials and supplies, furniture and fixtures, office equipment, and spare parts. At the time of the appraiser's inspection, the custom wood and Formica studio technical furniture, which had been primarily

professionally built in-house, appeared to be in overall good condition. The office furniture and studio chairs appeared to be in overall fair-to-good condition. Overall, except where noted, the tangible assets of the NJN Television Network appeared to be in fair-to-good condition.

NJN Vehicles

The general-use vehicles utilized by the NJN are part of the state motor pool and, therefore, are not included in the appraisal. Parking space for the general-use vehicles and NJN employees is in the parking garage across the street, which is part of the Motor Vehicles Commission offices.

The specialty ENG/EFP and production vehicles owned and utilized by the New Jersey Public Broadcasting Authority include a production remote truck utilizing a box-bed mounted on a cab-over Sterling chassis. This production remote truck is equipped with roll-in racks for rapid reconfiguration, and capable of High Definition digital production. A separate satellite uplink truck is also equipped for microwave relay use. Two ENG microwave relay vans are based out of Trenton. The newer van is equipped for multiple-camera basic operation and editing as well as microwave relay, while the older van is a basic ENG microwave relay-only truck. The NJN production truck, the satellite truck, and the newer ENG van, are parked in garages that are part of the NJN TOC building, and the oldest ENG truck is parked on adjacent, fenced-in property. The NJN ENG/EFP vehicles appeared to be in average-to-good condition for their age and use.

WNJT Transmitter Site

The WNJT transmitter site is located at 301 Grover's Mill Road in Lawrence Township, Mercer County, on the northeast outskirts of Trenton near the intersection of U.S. Route 1 and I-295. This land is owned by the Division of Parks and Forestry (DEP) and currently leased by NJN. However, the purchase of this land by NJPBA is reported by NJN to be in negotiation. NJPBA owns the transmitter building and an 900-foot tall Stainless G-8 guyed tower structure at this site, which was constructed in 1971.

The building appeared to be in fair to good condition. The relatively recent Comark analog television transmitter, made obsolete by the digital transition in June 2009, and now surplus, is still installed and in place.

The tower appeared to be in fair condition, with weakening of the outer northwest tower anchor due to ground water damage resulting from a beaver dam, for which corrective funding has been authorized. In addition, a calculation error during a pre-digital refit tower analysis, performed by the tower manufacturer, resulted in a tower overloading error created during refitting for digital transmission.

The antenna system for WNJT includes a Dielectric TUA-04-12/48H-1-R wideband antenna, approximately 1,000 feet of rigid transmission line, and a multi-station combiner that is currently in use by the DTV transmission and for a lessee, and previously for the analog transmission. The antenna system appeared to be in good condition. The WNJT DTV transmitter is a Thales solid state UHF transmitter in good condition. Other transmitter equipment includes Sencore, Belar and Tektronix monitoring, and Access remote control systems, all of which appeared to be in overall fair-to-good condition.

WNJS Transmitter Site

The WNJS transmitter site is located at 1647 Arrowhead Drive in Waterford Township, Camden County. The appraiser visited and inspected this site as part of the radio appraisal and due diligence inspection in October 2010, but inventoried only the radio equipment during the visit. The ownership of the land at this transmitter site continues to be in dispute. Reportedly, the land was transferred from the Division of Parks and Forestry (DEP) in 1971 for a consideration of $26,200, but the DEP disputed the ownership in 1998, and Governor Hughes never signed off on the resolution agreement. This issue remains unresolved. NJPBA owns the transmitter building and an 820-foot guyed tower structure at this site, which was constructed in 1972. The WNJS antenna system includes a Dielectric TFU-30GBH-R 06 DC non-directional UHF pylon antenna, and 900 feet of rigid transmission line. The WNJS DTV transmitter is a Thales TDU-2-12KOO LV solid state UHF Channel 22 DTV transmitter, which has been upgraded by Thales from a 1.25 to 12 kilowatt output. WNJS-FM's transmitter and antenna are co-located at this site. The obsolete analog television transmitter, now a surplus asset, is still in place. The building, tower, and equipment appeared to be in overall fair-to-good condition.

WNJN Transmitter Site

The land is leased at the WNJN transmitter site, located at 42 Clove Road, Montclair (Little Falls), in Passaic County. The appraiser did not inspect this site, so this section of the

report is based on the NJN inventory and records alone. NJPBA owns the transmitter building and a 567-foot tall Stainless 656-SS self-supporting tower structure at this site, which was constructed in 1973. The WNJN antenna system includes a Dielectric TFU-30GBH-R 08 DC non-directional DTV top-mount pylon antenna and 600 feet of rigid transmission line. The WNJN DTV transmitter is a Thales TDU2-12KOO Channel 51 UHF transmitter.

WNJB Transmitter Site

The WNJB transmitter site is located at 7 Geiger Lane, in Warren Township, Somerset County. The appraiser did not inspect this site, so this section of the report is based on the NJN inventory and records alone. At this site, the land, transmitter building and a 353-foot tall Stainless G-8 guyed tower structure are owned by the NJPBA. The site, including the building and tower, is listed in the NJN inventory as having been originally constructed in 1971-1972. The WNJB antenna system includes a top-mount Dielectric TVU-32GTH/6HV-R 06/S190 antenna system that is used to transmit a VHF DTV signal, and 400 feet of rigid transmission line. The WNJB DTV transmitter is a Thales TDV2K50LV solid-state Channel 8 VHF DTV transmitter.

NJN Translators

The appraiser did not inspect the translator sites, so this section of the report is based on the NJN inventory and records, and other information provided by Mr. Williams.

The W36AZ translator is located on Hamburg Mountain, on land leased from the Division of Fish, Game and Wildlife (DEP) and accessed via leased use of a right-of-way easement held by Service Electric Cable TV Company, leading from Sand Point Road, Hardyston Township, Sussex County, to the transmitter site. The equipment shelter and tower at this site are owned by NJPBA.

The W43CH translator occupies leased building and tower space at 1 Demeter Road, in Washington, New Jersey, and the W49BE translator occupies leased building and tower space near the intersection of Thomas Drive and Cheryl Drive, in Hackettstown, New Jersey.

The Mt. Laurel microwave relay site utilizes leased equipment shelter and tower space at 1020 Briggs Road, Mt. Laurel. At the Stockton Microwave relay site, NJPBA leases the land

and equipment shelter space from Richard Stockton State College, and owns a 90-foot tall Rohn self-supporting tower, located at 46 W. Jimmie Leeds Road, in Pomona.

The NJN television translators utilize Information Transmission Systems translator transmitters and Scala antennas.

Three, now terminated sites, for the W25BB TV translator, located on Pittstown Road (County Road 615) in Frenchtown, for TV Booster WNJB2(58) located on Hope-Blairstown Road in Blairstown, and for TV Booster WNJB1(58), located on West Bangs Avenue at Route 18 in Long Branch, all in New Jersey utilized leased land, equipment shelter space and tower space. Despite being terminated, they are still represented on the NJN equipment inventory.

Digital Conversion Status of the Television Translators

The three owned active NJN Television translators are reported as having not been upgraded to digital, and currently utilize DTV converters to down-convert the over-the air digital signal from the television stations, for analog re-transmission. The FCC currently has open a Notice of Proposed Rulemaking (NPRM) that proposes to establish a date of June 12, 2012, three years from the initial date of conversion to digital broadcasting for full power television stations, as the date by which all remaining analog television transmissions, including LPTV stations, Class A television stations, and television translators, must convert to digital transmission. Final action on this NPRM is expected in the Spring of 2011.

Immediate Technical Concerns

Continuing problems with beaver dams near the WNJT Tower site have weakened the northwest tower anchoring point, requiring reinforcement of the anchor. An estimate, dated as of December 2003, of the repair costs recommended a budget of $127,000 for the repairs; adjusted for inflation using the CPI-U, this value would now be approximately $151,000. Funding has been requested from the Treasury Capital Fund for this work, and it is anticipated that the work will be completed and capitalized in 2011.

The Federal Communications Commission (FCC) normally allows only three years for television construction permits to be completed, or the CP will be cancelled. Obtaining a waiver

of this deadline, called "tolling" the CP, now requires a significant showing of reason for the delay. When reviewing the FCC records, it was noted that the file numbers of the power increase CPs for WNJT (file #BPEDT-20080620AGH) and for WNJS (file #BPEDT-20080620ALH), indicate that their time to construct will expire in mid-2011. If the power upgrades have already been performed, the license applications to note completion of the modifications should have already been submitted to the FCC. If not, they should be completed to prevent incursion against the stations' protected signal contours.

Long-Term Technical Concerns

Based on recent actions in progress at the FCC, it can be expected that the three translators will need to be converted to digital operation no later than June 12, 2012.

Mr. Williams reported that during the calculation of the modifications for the WNJT tower for refitting for digital operation, an error occurred in the computerized tower analysis calculations. This error was not discovered and revealed until after the modifications had been made. This has resulted in a stress overload condition of the WNJT tower. Repairs are expected to be completed in December 2010.

Continuing digital conversion of studio technical infrastructure, news and live on-air operations, to High Definition-capability facilities is a concern.

No EPA hazard issues were noted at these sites. None of the equipment appeared to be old enough to contain components containing PCB's.

Capital Expenditures and Recommendations

The following projected capital expenditure requirements and recommendations are based, in part, on conditions observed during an inspection of the studios and offices, and three of the nine transmitter sites, of the NJN Radio Stations on October 13, 2010 and the Television Stations on November 18-19 and 22-23, 2010. The capital expenditures proposed for 2011-2013 are made with the assumption that the stations' program formats and production needs will

remain substantially unchanged for this period. The capital expenditures assume that the current dependency upon the television station's microwave relay system as part of the radio network's program STL system will continue, and that only the radio stations' STL equipment, including the modules attached to the television microwave relay systems, are being maintained by the radio station's capital expenditure budget.

Remainder of 2010

Item	Cost
Address correction of tower overloading condition at WNJT tower	$ 106,000
Total	**$ 106,000**

2011

Item	Cost
Tower painting, guy wire coating, and strobe replacement.	$ 250,000
Completion of transmitter power upgrade construction permits.	100,000
Reinforce northwest anchor of WNJT(TV) tower.	151,000
Ongoing HD digital conversion of studio facilities.	250,000
Total	**$ 751,000**

2012

Item	Cost
Tower painting, guy wire coating, and strobe replacement.	$ 250,000
Upgrade three translator sites to digital transmission.	225,000
Ongoing HD digital conversion of studio facilities.	250,000
Total	**$ 725,000**

2013

Item	Cost
Tower painting, guy wire coating, and strobe replacement.	$ 250,000
Ongoing HD digital conversion of studio facilities.	300,000
Total	**$ 550,000**

Future Annual Capital Expense Projections

In addition to the above specific capital expenses, a continuing Capital Expense budget of approximately $450,000 per year, adjusted for inflation, should be used for future budgetary planning to maintain the existing plant. Consideration of adding emergency power to the other three transmitter sites, by comparison a relatively low priority, should be made starting in 2014 or later.

APPENDIX A

QUALIFICATIONS

Qualifications
Of
Geoffrey C. Price

Geoffrey C. Price is a Vice President for BIA/Kelsey (BIA), a financial consulting firm specializing in the fair market valuations, asset appraisals, strategic analyses, and business plans of broadcast and telecommunications properties. In his current position at BIA, Mr. Price is responsible for the managing and operating of the company's nationwide leading Consulting Group. Mr. Price has been at BIA since 1988 and has appraised hundreds of media and telecommunications properties worth in aggregate in the tens of billions of dollars.

As a Vice President with BIA, Mr. Price has been responsible for the preparation of asset appraisals, valuation studies, strategic consulting assignments, and litigation support for clients in the communications and broadcast industries. He has also been responsible at BIA for assisting many publicly traded and privately held broadcast companies with their valuation needs associated with FASB 141/142. In addition, Mr. Price is part of the business development team at BIA and is responsible for the client relationships with many of the largest broadcast companies nationwide. Mr. Price's appraisal and valuation experience is diverse, including reports for firms in the cellular, paging, SMR, cable, print, tower, and broadcast industries.

Prior to joining BIA, Mr. Price was employed by ADT Security Systems, Inc. in its Accounting Center located in Alexandria, Virginia. Mr. Price earned his B.S. degree in Finance from Virginia Polytechnic Institute and State University in Blacksburg, Virginia. Mr. Price received his M.B.A. from George Mason University in Fairfax, Virginia.

Qualifications
Of
Sidney E. Shumate

Sidney E. Shumate is the Senior Appraiser and Director of Engineering for the BIA/Kelsey, a financial consulting firm. At BIA/Kelsey, Mr. Shumate is primarily engaged in the appraisal of tangible assets of broadcasting, print, Internet and related media properties, expert witness support, and preparation of business plans and technical evaluation reports.

Mr. Shumate received his B.S. degree in Electrical Engineering from West Virginia University Institute of Technology, and received EIT certification in 1975. He holds a General Class Radiotelephone Operators License, and a Virginia Contractor's License endorsed for building, electrical, and specialty construction. He is a member and former chapter Chairman of the **Institute of Electrical and Electronics Engineers (IEEE)**, and is also a member and currently serves on the Advisory Committee (ADCOM) of the **IEEE Broadcast Technology Society.**

Mr. Shumate started as an engineer and DJ at WSLW, White Sulphur Springs, WV, in 1973, and later served as Chief Engineer of WMON, while in college. Since receiving his degree he has served at different times as Senior Engineer, Assistant Chief, and, from 1979 to 1995, as Director of Engineering at WVIR-TV in Charlottesville, VA. In between, he was a Senior Engineer at WPGH-TV, Pittsburgh, Pennsylvania, and was Director of Engineering for WAFF-TV in Huntsville, AL, where he was also responsible for WHOS and WDRM-FM in Decatur, AL.

In Charlottesville, he relocated the studios to new facilities in 1984, and in 1985, made WVIR-TV the first stereo TV station in VA. In 1992, he upgraded the transmitter facilities to be a five-megawatt, omnidirectional transmitter site incorporating the largest common-mode TV transmitter built to date. Mr. Shumate attended Thales first IOT-based transmitter school. He also designed and built microwave relay systems, ENG and EFP vans, a news bureau in Staunton, Virginia, and a translator with a special nulling antenna system at Massanutten Peak.

Mr. Shumate is also the owner of Blue Ridge Video Services, and, from 1988 to 2006, was also the founder, promoter, builder, original owner, and General Manager of WVGV-TV (now

WVNS-TV), Lewisburg, WV. Prior to joining BIA/Kelsey in 1997, Mr. Shumate was employed by High Mountain Broadcasting, Inc. to relocate and upgrade WVSX (TV).

While at BIA/Kelsey, Mr. Shumate has presented papers at the 1998 ("Methods and Costs of Installing Initial and Interim DTV Transmission Facilities on Existing Towers"), and 2006 ("Evaluating Your HD Radio™ Coverage") NAB Broadcast Engineering Conferences.

Re: Estimate of the fair value of the tangible assets, in place and in use, of Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH, licensed to Montclair, New Brunswick, Trenton, Camden, Sussex, Hackettstown and Belvidere, New Jersey, respectively.

Dear Mr. Jonas and Mr. Williams:

Pursuant to your request, BIA Advisory Services, LLC (d/b/a BIA/Kelsey) has prepared an appraisal to arrive at an opinion as to the fair value of the tangible assets, in place and in use, that are associated with Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH, as of December 1, 2010. Fair value is synonymous with fair market value.

Based on the data, analyses, and conclusions set forth in the report that follows, it is our opinion that the values of the appraised assets, as of December 1, 2010, are as stated in the following value summary.

Respectfully Submitted,
BIA/KELSEY

Geoffrey C. Price
Vice President

STATEMENT OF INTRODUCTION

STATEMENT OF INTRODUCTION

BIA/Kelsey has been retained by the State of New Jersey to estimate the fair value of the tangible assets, in place and in use, of Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH, assigned to Montclair, New Brunswick, Trenton, Camden, Sussex, Hackettstown and Belvidere, New Jersey, respectively, as of December 1, 2010. These stations operate as part of the New Jersey Network, a statewide public broadcasting network. This report is being prepared for financial reporting purposes.

In this document we have appraised the tangible assets of the aforementioned New Jersey Network television stations. For this purpose, Mr. Sidney E. Shumate, a Broadcast Engineer contracted by BIA/Kelsey, visited the New Jersey Network's studios in Trenton and three of the stations' transmitter facilities on November 18-19 and 22-23, 2010 to inspect the tangible assets and to acquire data necessary for the appraisal. The tangible asset inventories for the remaining stations were provided by the New Jersey Network.

The value of the stations' tangible assets is based upon each specific asset's replacement cost, with a provision for observed depreciation or, where appropriate, the cost of comparable used assets of like age and condition.

In the course of the appraisal, BIA/Kelsey was provided with equipment prices, industry related data, and other information. In the course of the appraisal, the analysts relied on BIA/Kelsey's *Investing in Television 2010, 4th Edition*, *Media Access Pro Television Analyzer* and *Coverage Map Data*; and other industry related data.

IDENTIFICATION OF THE PROPERTY

WNJN(TV), licensed to Montclair, New Jersey, is a non-commercial UHF digital television (DTV) station, licensed to transmit on Channel 51 with an effective radiated power (ERP) of 200 kilowatts (kW), with a non-directional pattern, at an antenna height above average terrain (HAAT) of 764 feet. New Jersey Public Broadcasting Authority (NJPBA) also holds a Construction Permit (CP) for WNJN, BPEDT-20080620ALF, to increase ERP to 443 kW at a HAAT of 778 feet.

WNJB(TV), licensed to New Brunswick, New Jersey, is a non-commercial DTV station, licensed to transmit on VHF Channel 8 with an ERP of 17.9 kW, at a HAAT of 705 feet, utilizing a directional pattern. Due to interference issues with WABC(TV) in the New York, NY market and WGAL(TV) in the Lancaster, PA market, WNJB is temporarily operating under a Special Temporary Authority (STA), file number BDSTA-20100107ADL, with 40.82 kW of ERP from an antenna HAAT of 715 feet.

WNJT(TV), licensed to Trenton, New Jersey, is a non-commercial UHF DTV station, licensed to transmit on Channel 43 with an ERP of 46 kW, at a HAAT of 873 feet, with a non-directional pattern. NJPBA also holds a CP for WNJT, BPEDT-20080620AGH, to increase ERP to 59.4 kW.

WNJS(TV), licensed to Camden, New Jersey, is a non-commercial UHF DTV station, licensed to transmit on Channel 22 with an ERP of 197 kW, at a HAAT of 866 feet, with a non-directional pattern. NJPBA also holds a CP for WNJS, BPEDT-20080620ALH, to increase ERP to 566 kW. WNJT identifies itself as Channel 23, its former analog channel.

W36AZ is a UHF television translator licensed to Sussex, New Jersey. W36AZ is licensed to transmit on Channel 36 with 14.6 kW of ERP, at a height above ground level of 53 feet.

W49BE is a UHF television translator licensed to Hackettstown, New Jersey. W49BE is licensed to transmit on Channel 49 with 10 kW of ERP, at a height above ground level of 138 feet.

W43CH is a UHF television translator licensed to Belvidere, New Jersey. W43CH is licensed to transmit on Channel 43 with 1 kW of ERP, at a height above ground level of 115 feet.

The tangible assets of Television Stations WNJN, WNJB, WNJT, WNJS, W36AZ, W49BE and W43CH that the appraiser identified and inspected include: land, leasehold improvements, buildings, towers, television antenna systems, television transmitter equipment, technical equipment, ENG/EFP[1] equipment, microwave equipment, translator equipment, satellite equipment, two-way radio equipment, ENG/EFP vehicles, program/production materials and supplies, furniture and fixtures, office equipment, test equipment, tools, and spare parts.

[1] ENG/EFP = Electronic News Gathering/Electronic Field Production

PURPOSE AND METHODOLOGY

The purpose of this appraisal is to determine, as of December 1, 2010, the fair value of the tangible assets, in place and in use, comprising Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH. This appraisal is being prepared for financial reporting purposes.

Valuation of the tangible assets of the stations is based on industry guidelines and the techniques described in Revenue Procedure 75-39. In valuing the tangible assets, the appraiser has considered three approaches to value. These are the cost approach, the market approach, and the income approach.

The **cost approach** is that approach which measures value by determining the current cost of an asset and deducting depreciation, that is, physical deterioration and functional and economic obsolescence. In its simplest form, it is nothing more than current replacement cost less all depreciation.

The **market approach** is that approach to value in which recent sales and offering prices of comparable properties are analyzed to arrive at an indication of the most probable selling price of the subject property.

The **income approach** is that approach to value in which income generated by the subject property is analyzed and projected over a specified time period and capitalized at an appropriate market rate to arrive at the property's value.

The appraiser has chosen both the cost and market approaches as most appropriate for the tangible assets. The value of the stations' tangible assets is based upon each specific asset's replacement cost, with a provision for depreciation or, where appropriate, the cost of comparable used assets of like age and condition.

For the purposes of this report, the definition of **fair value, in place and in use**, is: the value of property for a specific use or to a specific user, reflecting the extent to which the property contributes to the utility and/or profitability of the enterprise of which it is a part.

The fair value, in place and in use, of WNJN, WNJB, WNJT, WNJS, W36AZ, W49BE and W43CH's tangible assets have been determined by comparing the assets, in place and in use, to that part of the communications industry with a direct need and identical use for the specific asset.

The valuation of technical and non-technical equipment has been conducted on the basis of new replacement cost less a provision for all forms of depreciation or, in the case of those assets readily available on the used equipment market, the market approach. The appraiser used current communications industry equipment prices appearing in appropriate manufacturers' price lists and catalogs, solicited current market data from dealers of used broadcast equipment, and relied upon published used equipment price lists, catalogs, and listings in trade magazines and publications. The appraiser also discussed current market trends with used equipment dealers/brokers and manufacturers.

The in place and in use value of the tangible assets has been determined by taking into consideration such expenses as design time, engineering, supervision, labor and materials for installation, testing, proof-of-performance measurements, outside consulting fees, freight, administrative costs, contractor contingency fees, overhead, profit, contractor quantity discounts, and capitalized interest expenses.

Estimates of equipment depreciation are based upon further consideration of wear and tear from use, loss of utility due to operational problems, and technological and economic obsolescence.

A summary of the asset values is set forth in the preceding Value Summary.

APPRAISAL CERTIFICATE

This appraisal of the tangible assets of Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH, licensed to Montclair, New Brunswick, Trenton, Camden, Sussex, Hackettstown and Belvidere, New Jersey, has been made for the purpose of expressing an expert opinion as to the fair value of the tangible assets, in place and in use, of the stations, as of December 1, 2010.

The appraiser was informed of no serious structural deficiencies, except if stated previously in this report. BIA/Kelsey assumes no responsibility for conformity to specific local and Federal government requirements or for any hidden defects in either the real or personal property.

RIGHTS AND LIMITING CONDITIONS

It should be noted that the appraisal of the tangible assets of Television Stations WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and Television Translators W36AZ, W49BE and W43CH has been prepared exclusively for State of New Jersey and is not to be reproduced in whole or in part for any reason without the express written consent of State of New Jersey and that of BIA/Kelsey.

The appraisers assume no responsibility for matters of a legal nature affecting the property appraised. The appraisers also assumed property free and clear of all liens and other encumbrances. The information provided by the clients was assumed to be accurate and no steps were taken to independently verify the material.

This appraisal is valid only for the appraisal date or dates specified herein and only for the appraisal purpose specified herein. The client warrants that any reports, analyses, or other documents prepared for it by the appraisers will be used only in compliance with all applicable laws and regulations.

STATEMENT OF APPRAISERS' INDEPENDENCE

- The statements of fact contained in this report are, to the best of the appraisers' knowledge, true and correct.

- The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and is our personal, unbiased professional analyses, opinions and conclusions.

- BIA/Kelsey has no present or prospective interest in the property that is the subject of this report, and has no personal interest or bias with respect to the parties involved.

- BIA/Kelsey's compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of, this report.

- BIA/Kelsey's analyses, opinions and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice (USPAP).

- No one provided significant professional assistance to the persons signing this report.

TANGIBLE ASSET OVERVIEW

TANGIBLE ASSET OVERVIEW

The tangible assets of the four New Jersey Network (NJN) Television Stations, WNJN(TV), WNJB(TV), WNJT(TV), WNJS(TV), and television translators W36AZ, W49BE and W43CH, all programmed from studios in Trenton, New Jersey, that the appraiser valued include: land, leasehold improvements, buildings, towers, television antenna systems, television transmitter equipment, technical equipment, ENG/EFP[2] equipment, microwave equipment, translator equipment, satellite equipment, two-way radio equipment, ENG/EFP vehicles, program/production materials and supplies, furniture and fixtures, office equipment, test equipment, tools, and spare parts.

An inspection and appraisal inventory of the NJN Television Technical Operations Center (TOC) in Trenton, and the WNJT transmitter site, was performed by Mr. Sidney E. Shumate for BIA Advisory Services, LLC, (d.b.a. BIA/Kelsey), on November 18, 19, and 23, 2010. In addition, the WNJS transmitter site was visited and inspected by the appraiser on October 13, 2010, as part of a recent and related appraisal of the radio tangible assets of NJN. The appraiser was provided with an inventory of all technical assets, a listing of real estate used by NJN, and other financial records. Mr. Richard Williams, Assistant Director of Engineering for NJN, conducted the tour of the Trenton studios, and of the visited radio and television transmitter sites. The appraiser compared his appraisal inventories to the NJN inventory, supplementing where necessary, and then relied primarily on the NJN inventory to value the un-inventoried sites on a Mass Appraisal basis. When performing a Mass Appraisal, it is assumed, except as noted, that the un-inspected sites are of similar age and condition to the sites inspected. The assets are discussed below. All comments regarding the condition of tangible assets at the inspected sites are based on observations made during the appraiser's inspections.

All four of the NJN television stations, and the three television translators, are licensed to the New Jersey Public Broadcasting Authority (NJPBA), which was founded in 1968 by an act of the New Jersey State Legislature.

[2] ENG/EFP = Electronic News Gathering/Electronic Field Production

WNJN(TV), licensed to Montclair, New Jersey, is a non-commercial UHF digital television (DTV) station, licensed to transmit on Channel 51 with an effective radiated power (ERP) of 200 kilowatts (kW), with a non-directional pattern, at an antenna height above average terrain (HAAT) of 764 feet. NJPBA also holds a Construction Permit (CP) for WNJN, BPEDT-20080620ALF, to increase ERP to 443 kW at a HAAT of 778 feet.

WNJB(TV), licensed to New Brunswick, New Jersey, is a non-commercial DTV station, licensed to transmit on VHF Channel 8 with an ERP of 17.9 kW, at a HAAT of 705 feet, utilizing a directional pattern. Due to interference issues with WABC(TV) in the New York, NY market and WGAL(TV) in the Lancaster, PA market, WNJB is temporarily operating under a Special Temporary Authority (STA), file number BDSTA-20100107ADL, with 40.82 kW of ERP from an antenna HAAT of 715 feet.

WNJT(TV), licensed to Trenton, New Jersey, is a non-commercial UHF DTV station, licensed to transmit on Channel 43 with an ERP of 46 kW, at a HAAT of 873 feet, with a non-directional pattern. NJPBA also holds a CP for WNJT, BPEDT-20080620AGH, to increase ERP to 59.4 kW.

WNJS(TV), licensed to Camden, New Jersey, is a non-commercial UHF DTV station, licensed to transmit on Channel 22 with an ERP of 197 kW, at a HAAT of 866 feet, with a non-directional pattern. NJPBA also holds a CP for WNJS, BPEDT-20080620ALH, to increase ERP to 566 kW. WNJT identifies itself as Channel 23, its former analog channel.

W36AZ is a UHF television low power analog translator licensed to Sussex, New Jersey. W36AZ is licensed to transmit on Channel 36 with 14.6 kW of ERP, at a height above ground level of 53 feet.

W49BE is a UHF television low power analog translator licensed to Hackettstown, New Jersey. W49BE is licensed to transmit on Channel 49 with 10 kW of ERP, at a height above ground level of 138 feet.

W43CH is a UHF television low power analog translator licensed to Belvidere, New Jersey. W43CH is licensed to transmit on Channel 43 with 1 kW of ERP, at a height above ground level of 115 feet.

The Trenton Technical Operations Center, with four full production studios, live production control rooms, multiple post-production facilities, master control facilities, main newsroom for the state network, and operations and executive offices, occupy a 100,000 square foot building with six stories, including basement shops and a sub-basement containing an emergency generator and main power conditioning, switching, and distribution equipment. The sixth floor is part equipment room and part roof. The satellite receive antennas are mounted on the roof portion. An approximately 60 foot tall self-supporting studio-to-transmitter link (STL) tower, which appeared to be in good condition, is mounted atop this building. This facility, constructed specifically for the NJN's use in the early 1990's, is owned by the State of New Jersey and leased by NJN, and is located at 25 South Stockton Street, in Trenton.

The NJN Newark studios occupy three leased floors of a hotel building, and are located at 50 Park Place, in Newark, New Jersey. NJN also operates a news bureau, identified as the South Jersey News Bureau, located near Atlantic City, in leased office space located in Room E035 at Richard Stockton State College, in Pomona, New Jersey.

The WNJT transmitter site is located at 301 Grover's Mill Road in Lawrence Township, Mercer County, on the northeast outskirts of Trenton near the intersection of U. S. Route 1 and I-295. This land is owned by the New Jersey Department of Environmental Protection (DEP) and currently leased by NJPBA; however, the purchase of this land by NJPBA is reported by NJPBA to be in negotiation. WNJT owns the transmitter building and an 812 foot tall Stainless G-8 guyed tower structure at this site, which was constructed in 1971. The building appeared to be in fair to good condition. The tower appeared to be in fair condition, with weakening of one tower anchor due to ground water damage resulting from a beaver dam (for which corrective funding has already been authorized). The antenna system for WNJT includes a Dielectric TUA-04-12/48H-1-R wideband antenna, approximately 1,000 feet of rigid transmission line, and a multi-station combiner that is currently in use by the DTV transmission and for a lessee, and previously for the analog transmission. The antenna system appears to be in good condition. The WNJT DTV transmitter is a Thales solid state UHF transmitter that appeared to be in good condition. Other transmitter equipment includes Sencore, Belar and Tektronix monitoring, and Access remote control systems, all of which appeared to be in overall fair-to-good condition.

The land is leased at the WNJN transmitter site, located at 42 Clove Road in Montclair (Little Falls), in Passaic County. WNJN owns the transmitter building and a 567 foot tall Stainless 656-SS self-

supporting tower structure at this site, which was constructed in 1973. The WNJN antenna system includes a Dielectric TFU-30GBH-R 08 DC non-directional DTV top-mount pylon antenna and 600 feet of rigid transmission line. The WNJN DTV transmitter is a Thales TDU2-12KOO Channel 51 UHF transmitter.

The ownership of the land at the WNJS transmitter site continues to be in dispute. Reportedly, the land was transferred from the Division of Parks and Forestry (DEP) in 1971 for $26,200, but the DEP disputed the ownership in 1998, and Governor Hughes never signed off on the resolution agreement. This issue remains unresolved. The WNJS transmitter site is located at 1647 Arrowhead Drive, in Waterford Township, Camden County. NJPBA owns the transmitter building and an 820 foot guyed tower structure at this site, which was constructed in 1972. The WNJS antenna system includes a Dielectric TFU-30GBH-R 06 DC non-directional UHF pylon antenna, and 900 feet of rigid transmission line. The WNJS DTV transmitter is a Thales TDU-2-12KOO LV solid state UHF Channel 22 DTV transmitter, which has been upgraded by Thales from a 1.25 to 12 kilowatt output.

At the WNJB transmitter site the land, transmitter building and a 353 foot tall Stainless G-8 guyed tower structure are owned by NJPBA. The WNJB transmitter site is located at 7 Geiger Lane, in Warren Township, Somerset County, and was purchased and the site, including the building and tower, is listed in the NJN inventory as having been originally constructed in 1971-1972. The WNJB antenna system includes a top-mount Dielectric TVU-32GTH/6HV-R 06/S190 antenna system that is used to transmit a VHF DTV signal, and 400 feet of rigid transmission line. The WNJB DTV transmitter is a Thales TDV2K50LV solid-state Channel 8 VHF DTV transmitter.

The W36AZ translator is located on Hamburg Mountain, on land leased from the Department of Fish, Game and Wildlife (DEP) and accessed via a leased right-of-way easement held by Service Electric Cable TV Company, leading from Sand Point Road, Hardyston Township, Sussex County, to the transmitter site. The equipment shelter and tower at this site are owned by NJPBA.

The W43CH translator occupies leased building and tower space at 1 Demeter Road, in Washington, New Jersey, and the W49BE translator occupies leased building and tower space near the intersection of Thomas Drive and Cheryl Drive, in Hackettstown.

The Mt. Laurel microwave relay site utilizes leased equipment shelter and tower space at 1020 Briggs Road, in Mt. Laurel. At the Stockton Microwave relay site, NJPBA leases the land and

equipment shelter space from Richard Stockton State College, and owns a 90 foot tall Rohn self-supporting tower, located at 46 West Jimmie Leeds Road, in Pomona.
The three owned and active NJN television translators have not been upgraded to digital, and utilize DTV converters to down-convert the over-the air signal to an analog transmission. The translators utilize Information Transmission Systems translator transmitters, and Scala antennas.

Three, now terminated sites, for the W25BB TV translator, located on Pittstown Road (County Road 615) in Frenchtown, for TV Booster WNJB2(58) located on Hope-Blairstown Road in Blairstown, New Jersey, and for TV Booster WNJB1(58), located on West Bangs Avenue at Route 18 in Long Branch, utilized leased land, equipment shelter space and tower space. Despite being terminated, they are still represented on the NJN equipment inventory.

With respect to NJN Television stations WNJT, WNJN, WNJB, and WNJS, NJPBA owns and maintains technical equipment for use in the television station network's daily broadcast operations. The air control rooms (often called master control at other stations) have been recently refitted (2008-09) with new Barco and Miranda Kaliedo visual monitoring systems, are completely automated, and utilize video and audio storage of most, if not all, programming and announcements on Omneon video servers, providing a nearly tapeless operating environment. NJN can receive, store and transmit programming in High Definition. Most local origination is in standard definition, often up-converted from analog. While the production suites are being converted to second or third generation AVID desktop editing suites, many with High Definition capability, the live studios are operating with aging production switching systems, primarily by Grass Valley, often dating back to the original equipping of the TOC in 1992. The studio cameras are standard definition Sony studio configuration cameras, capable of being switched from 4:3 to 16:9 ratios. The studios have both aging analog and more recent serial digital routing systems, by Grass Valley and nVision. The news operation is utilizing primarily Sony serial digital standard definition field camcorders, and editing equipment that is a mix of analog and desktop editing system equipment to produce the news. Where videotape is still being used, Sony MPEG IMX digital multi-format recorders are the primary choice of format, with aging capability for BetacamSP, Betacam, Umatic and 1 inch type C still available for use in utilizing archive material.

Other equipment in use at the NJN television studios and production suites in Trenton includes: Grass Valley, Panasonic, Yamaha and Mackie audio consoles; JBL, Electro-Voice, Crown, Symetrix, Fostex, Roland, and Wohler audio monitoring; RTS intercom and cue systems; Leitch

slave clocks and Evertz digital sync and clock driver system; Vinten studio pedestals and pan-tilt heads; QTV teleprompters; Mole, Strand-Century, Kliegl, and Desisti lighting fixtures and elevator-equipped studio lighting systems; Colortran studio dimming systems; Electro-Voice, Shure and Sony wired and wireless microphones; Sony, Ikegami, Panasonic, Electrohome, and JVC video monitoring; Tektronix and Videotek waveform monitoring; Orban, Symetrix, Rane and Yamaha audio processing; 360 systems digital audio storage and editing systems; Evertz, Leitch, and Grass Valley routing, distribution, and format conversion systems; Sony, Tektronix and For-A frame synchronizers; and ADC video and audio patch panels and audio and video studio interface wiring panels. The Trenton studio technical equipment, except as noted, appeared to be in overall fair-to-good condition.

The stations are connected with an extensive microwave relay system and newsgathering system. Most of the microwave transmitters and receivers have been replaced by new NuComm microwave equipment, including Troll remote control systems, within the past two years, as per the nationwide swap-out of equipment agreement resulting from the FCC microwave band realignment. Some links are still utilizing older Microwave Radio Twin Stream and FLR-series transmitters and receivers. The NJN Radio stations also utilize additional subcarriers on the television station's microwave relay system for a major part of their signal relay system. The microwave relay antennas and transmission line systems utilize a mix of Andrew, Mark, Cablewave, Nurad, Microwave Radio and RFS equipment. Overall, the microwave relay systems, not including the nearly new NuComm equipment, appeared to be in fair-to-good condition.

The general-use vehicles utilized by the NJN are part of the State of New Jersey motor pool and not included in the appraisal. The specialty ENG/EFP and production vehicles utilized by the NJN include a box-van production remote truck equipped with roll-in racks for rapid reconfiguration, and capable of High Definition digital production, a satellite uplink truck also equipped for microwave relay use, and ENG microwave relay vans, all but one of which are equipped for multiple camera basic operation and editing.

The Trenton operations center has multiple satellite receive antennas mounted atop the roof; the larger dishes have permanent roof mounts and range up to six meters in size, several of which are heater-equipped for snow or ice conditions. The satellite dish antennas include those by ADC, Vertex, Miralite and Andrew. Receivers include MPEG receivers by Standard and General Instruments. The satellite receive equipment appeared to be in overall fair condition.

Other equipment inspected includes program/production materials and supplies, furniture and fixtures, office equipment, and spare parts. At the time of the appraiser's inspection, the custom wood and Formica studio technical furniture, which had been primarily professionally built in-house, was in overall good condition. The office furniture and studio chairs were in overall fair-to-good condition. Overall, except where noted, the tangible assets of the NJN Television Network appeared to be in fair-to-good condition.

OTHER ASSET VALUATION

The other assets at the New Jersey Network television stations, as of December 1, 2010, that have not been valued elsewhere in this report are promotional materials and surplus equipment at the stations. The replacement cost of the stations' other assets has been determined by the current market value of items of similar utility and condition. The appraiser determined the cost of replacement of said items.

Most of these assets have been valued based on the appraisers' knowledge of the prices paid on the open market for comparable used items. The values of the other asset categories are noted in the following text, and in the preceding value summary.

EXHIBITS

EXHIBIT 1

TANGIBLE ASSET INVENTORY

Category 1 : Land

WNJT Television Transmitter Site 301 Grover's Mill Road Lawrence Township, New Jersey	***Quantity***	***Value***
LAND, USE, 3260 BRUNSWICK PIKE not owned, purchase in negotiation	1	*

Re: Estimate of the Fair Market Value of the Intangible Assets of the television stations owned by the New Jersey Public Broadcast Authority (NJPBA), as of December 1, 2010

Dear Mr. Jonas:

Pursuant to your request, BIA/Kelsey Advisory Services, LLC (d/b/a "BIA/Kelsey") has prepared appraisals to arrive at an opinion as to the Fair Market Value of the tangible and intangible assets of the television stations owned by the New Jersey Public Broadcast Authority (NJPBA), as of December 1, 2010. Fair Market Value is defined later in this report.

The valuation of the tangible assets is contained in another report, however, the total value of the tangible assets is used in this report.

Based on the data, analyses, and conclusions set forth in the report that follows, it is our opinion that the fair market values of these tangible and intangible assets, as of December 1, 2010, are as stated in the following value summary.

Respectfully Submitted,

BIA/Kelsey ADVISORY SERVICES, LLC (d/b/a BIA/Kelsey)

William Redpath

William Redpath, ASA, CFA, CPA, ABV, CIPM
Vice President

STATEMENT OF INTRODUCTION

STATEMENT OF INTRODUCTION

BIA/Kelsey has been retained by NJPBA to estimate the Fair Market Value of the intangible assets of the television stations owned by NJPBA, as of December 1, 2010.

In this document, we have appraised the intangible assets that are separable from goodwill. The methodology, life, and value of each of the intangible assets are stated in the text of that particular asset. The most appropriate methods available were used in valuing these intangible assets.

In the course of the appraisal, BIA/Kelsey was provided with station-related data and other information. BIA/Kelsey also spoke with Mike Jonas, and Rick Williams, Operations Manager and Assistant Director of NJN Engineering, in connection with our analysis. BIA/Kelsey has made no investigation as to the accuracy of this data or to the title of the assets.

IDENTIFICATION OF THE PROPERTY

As of December 1, 2010, NJPBA was the licensee of WNJB(TV), WNJN(TV), WNJS(TV), WNJT(TV), W36AZ, W49BE and W43CH.

In a separate valuation report, BIA/Kelsey estimated the fair market value of those television stations, in an asset sale, as going concerns, at $47,051,896, as of December 1, 2010. The purpose of this report is to identify the intangible assets and estimate their fair market values for review by the Department of the Treasury of the State of New Jersey.

BIA/Kelsey estimated the fair market value of the tangible assets, in place and in use, of the television stations of NJPBA, as of December 1, 2010, in a separate report. The total value of the tangible assets from that report will be used in this report.

BIA/Kelsey has been retained by NJPBA to estimate the fair market values of the intangible assets that could be separated from goodwill. Those assets are: (1) FCC licenses; (2) the Contributors Base Asset; and (3) an Underwriters Base Asset and (4) Income Agreements.

All of these intangible assets meet the following tests[1]:

(1) those assets are capable of being separated or divided from the acquired entity and sold, transferred, licensed, rented, or exchanged; or

(2) those assets arise from contractual or other legal rights (regardless of whether those rights are transferable or separate from the acquired entity or from other rights and obligations).

Details pertaining to the assets valued are included in the report.

PURPOSE, INTENDED USE AND METHODOLOGY

The purpose of this appraisal is to estimate, as of December 1, 2010, the fair market value of these intangible assets. This report is intended to be used for internal review by the Department of the Treasury of the State of New Jersey.

In valuing the intangible assets, I have considered three approaches to value. These are the cost approach, the market approach, and the income approach.

The **cost approach** is that approach which measures value by determining the current cost of an asset and deducting depreciation, that is, physical deterioration and functional and economic obsolescence. In its simplest form, it is nothing more than current replacement cost less all depreciation.

The **market approach** is that approach to value in which recent sales and offering prices of comparable properties are analyzed to arrive at an indication of the most probable selling price of the subject property.

The **income approach** is that approach to value in which income generated by the subject property is analyzed and projected over a specified time period and capitalized at an appropriate market rate to arrive at the property's value.

[1] Source: Statement of Financial Accounting Standards No. 141; June 2001.

I have chosen the market approach for the FCC licenses, and an income approach for the Contributors Base Asset, the Underwriters Base Asset and the Income Agreements, as explained in the individual asset valuations in this report.

For the purposes of this report, the definition of Fair Market Value, according to the Glossary in the American Society of Appraisers' Business Valuation Standards, is:

- **Fair Market Value** - "The price, expressed in terms of cash equivalents, at which property would change hands between a hypothetical willing and able buyer and a hypothetical willing and able seller, acting at arm's length in an open and unrestricted market, when neither is under compulsion to buy or sell and when both have reasonable knowledge of the relevant facts."

RIGHTS AND LIMITING CONDITIONS

This appraisal of the intangible assets of NJPBA has been prepared for the internal review of the Department of the Treasury of the State of New Jersey, and any other use of this report is invalid.

It should be noted that the appraisal of the intangible assets of NJPBA has been prepared exclusively for the Department of the Treasury of the State of New Jersey (DTNJ) and is not to be reproduced in whole or in part for any reason without the express written consent of DTNJ and BIA/Kelsey.

It should be noted that these intangible assets are a part of the going concern enterprise value of the television stations of NJPBA. The values of these assets are a part of, not in addition to, the fair market value, in an asset sale, as a going concern, of those television stations. Also, the fact that the sum of these assets is greater than the estimated fair market value of these television stations, in an asset sale, as a going concern, does not affect the fair market value of these television stations.

The appraiser assumes no responsibility for matters of a legal nature affecting the property appraised. The appraiser also assumes property free and clear of all liens and other encumbrances. The information provided by the client was assumed to be accurate and no steps were taken to independently verify the material.

This appraisal is valid only for the appraisal date or dates specified herein and only for the appraisal purpose specified herein. The client warrants that any reports, analyses, or other documents prepared for it by the appraiser will be used only in compliance with all applicable laws and regulations.

No site visit to the studio or offices of NJPBA was conducted in the completion of this report.

STATEMENT OF APPRAISERS' INDEPENDENCE

We certify to the best of our knowledge and belief:

The statements of fact contained in this report are true and correct.

The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, unbiased professional analyses, opinions and conclusions.

BIA/Kelsey and we have no present or prospective interest in the property that is the subject of this report, and we have no personal interest or bias with respect to the parties involved.

BIA/Kelsey's and our compensation are not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

I hereby certify that, to the best of our knowledge and belief, the statements of fact contained in the report are true and correct, and this report has been prepared in conformity with the Uniform Standards of Professional Appraisal Practice of The Appraisal Foundation and the Principles and Code of Ethics of the American Society of Appraisers, and the Statement on Standards for Valuation Services #1 from the American Institute of Certified Public Accountants.

No one provided significant professional assistance to the person signing this report.

The American Society of Appraisers has a mandatory recertification program for all of its Senior members. Mr. Redpath is in compliance with that program.

INTANGIBLE ASSETS
VALUATION

INTANGIBLE ASSETS VALUATION

There are four (4) categories of intangible assets: (1) FCC Licenses; (2) Contributors Base Asset; and (3) Underwriters Base Asset, and (4) Income Agreements. The fair values of these assets, by category, are seen in the Value Summary.

The values of these assets, and their remaining useful lives, are stated in the preceding value summary and the following text. In certain tables, numbers may not exactly sum due to internal rounding.

FCC LICENSES

WNJB(TV), WNJN(TV), WNJS(TV), WNJT(TV), W36AZ, W49BE and W43CH
New Jersey Public Broadcasting Authority Television Network

BIA/Kelsey Advisory Services, LLC ("BIA/Kelsey") has prepared a valuation analysis of the FCC licenses of Television Stations WNJB(TV), WNJN(TV), WNJS(TV), and WNJT(TV), and Translator Stations W36AZ, W49BE, and W43CH, as of December 1, 2010.

WNJB is licensed to broadcast on digital Channel 8 and operates with 17.9 kilowatts (kW) of power from an antenna height above average terrain (HAAT) of 215 meters. WNJB is licensed to New Brunswick, NJ and operates in the New York, NY TV market (ranked 1st of 210 rated Nielsen TV markets). Due to interference issues with WABC(TV) in the New York, NY market and WGAL(TV) in the Lancaster, PA market, WNJB is operating under a Special Temporary Authority (STA), file number BDSTA-20100107ADL, with 40.82 kW of ERP from an antenna HAAT of 218 meters.

WNJN, licensed to Montclair, NJ, broadcasts on digital Channel 51 and operates with 200 kW of power from an antenna HAAT of 233 meters. The station holds a construction permit (CP) to upgrade its power to 443 kW and its HAAT to 237 meters. WNJN also operates in the New York, NY TV market.

WNJS, licensed to Camden, NJ, broadcasts on digital Channel 22 and operates with 197 kW of power from an antenna HAAT of 264 meters. The station holds a CP to upgrade its power to 566 kW and its HAAT to 265 meters. WNJS operates in the Philadelphia, PA TV market (ranked 4th of 210 rated Nielsen TV markets).

WNJT, licensed to Trenton, NJ, broadcasts on digital Channel 43 and operates with 46 kW of power from an antenna HAAT of 266 meters. The station holds a CP to upgrade its power to 59.4 kW. WNJT also operates in the Philadelphia, PA TV market.

W36AZ, licensed to Sussex, NJ, broadcasts on Channel 36 with 14.6 kW of ERP from an antenna HAAT of 509 feet. The station acts as a translator station for WNJB.

W49BE, licensed to Hackettstown, NJ, broadcasts on Channel 49 with 10 kW of ERP from an antenna HAAT of 518 feet. The station also acts as a translator station for WNJB.

W43CH, licensed to Belvidere, NJ, broadcasts on Channel 43 with 1.0 kW of ERP from an antenna HAAT of 814 feet. The station acts as a translator station for WNJT.

All seven stations are licensed to the New Jersey Public Broadcasting Authority (NJPBA), which was founded in 1968 by an act of the New Jersey State Legislature.

A basic assumption in our valuation of these FCC licenses was that these television stations were new television stations, signing on-the-air as of the date of this valuation, December 1, 2010. We assumed the competitive situation that existed in the market as of that date, except that these stations were just beginning operations. In doing so, we extract the value of going concern and any other assets acquired, and are strictly valuing the FCC licenses. We have estimated the combined fair market value of the FCC licenses of the television stations to be $39,899,000.

The values of the NJPBA's FCC licenses have been estimated using the market approach. Because these television stations are operated as non-commercial television stations, the appraiser believes that valuing the television FCC licenses using a market approach is more appropriate than using the income approach. BIA/Kelsey analyzed merger and acquisition transactions of non-commercial televisions stations to arrive at the fair market value of these television stations. BIA/Kelsey was able to find three relevant full power television station transactions over the last two years. This information is shown in Table 1. BIA/Kelsey was able to find seven relevant translator transactions over the last two years. This information is shown in Table 2.

For each of the non-commercial television stations that were sold during that time BIA/Kelsey analyzed purchase price versus television household coverage reachable by the stations' 41 dBu signal contour. The sales price of each of the stations was divided by the number of television households reachable by the 41 dBu signal to calculate price per TV household.

Table 1 – Comparable Sales Information of Non-Commercial Full-Power Television Stations

CALLS	Channel	City of License	State	Market	Mkt Rank	Market TV Households	Sales Price ($)000s	Sales Date	Price Per TV Household
KALO	38	Honolulu	HI	Honolulu, HI	72	429,000	1,000	06/09	$2.33
WCMZ-TV	28	Flint	MI	Flint-Saginaw-Bay City, MI	69	441,000	1,000	01/10	$2.27
WQEX	26	Pittsburgh	PA	Pittsburgh, PA	24	1,145,000	3,000	11/10	$2.62
								Average	**$2.30**
								Median	**$2.33**

Table 2 – Comparable Sales Information of Translators

CALLS	Channel	City of License	State	Market	Mkt Rank	60 dBU Coverage Pop	Sales Price ($)000s	Sales Date	Price Per Pop.
K32IJ	32	Cortez	CO	Albuquerque-Santa Fe, NM	46	17,300	5	03/09	$0.29
WDCI-LP	57	Chicago	IL	Chicago, IL	3	927,748	300	01/10	$0.32
WPDN-LP	65	Pittsburgh	PA	Pittsburgh, PA	24	1,504,016	200	01/10	$0.13
WDYC-LP	36	Cincinnati	OH	Cincinnati, OH	33	1,568,252	150	01/10	$0.10
K25FZ	25	Grand Junction	CO	Grand Junction-Montrose, CO	184	114,048	8	03/10	$0.07
WGPS-LP	51	Sebring	FL	Tampa-St Petersburg-Sarasota, FL	14	81,043	9	05/10	$0.11
KYTL-LP	53	Twin Falls	ID	Twin Falls, ID	192	87,934	18	10/10	$0.20
								Average	**$0.18**
								Median	**$0.13**

The average and median price per TV household of the 41 dBu signals computed to be $2.30 and $2.33, respectively. Below is a table showing the television households served by the four NJPBA stations and the estimated value of these stations when multiplied by the calculated average price per television household of $2.30.

Calls	City of License	Television Households w/n Local Television Market	Value of Station
WNJB	New Brunswick	7,279,000	$16,741,700
WNJN	Montclair	7,279,000	$16,741,700
WNJS	Camden	2,930,000	$6,739,000
WNJT	Trenton	2,930,000	$6,739,000

For each of the translators that were sold during that time, BIA/Kelsey analyzed purchase price versus population coverage reachable by the translators' 64 dBu signal contour. The sales price of each of the stations was divided by the number of pops reachable by a 64 dBu signal to calculate price per pop.

The average and median price per pop of a 64 dBu signals computed to be $0.18 and $0.13, respectively. Below is a table showing the 64 dBu signal coverage and the translators population for the three NJPBA translators and the estimated value of these stations when multiplied by $0.15, the average of the 64 dBu calculated median and average prices per pop.

Calls	City of License	Population Served under 64 dBu Contour	Value of Station
W36AZ	Sussex, NJ	270,446	$40,567
W49BE	Hackettstown, NJ	271,421	$40,713
W43CH	Belvidere, NJ	61,439	$9,216

Because W36AZ and W49BE operate with WNJB as translators and W43CH operates with WNJT as a translator, we have combined the station values in order to determine the "stick" value of both broadcast operations. Therefore, the fair value of WNJB/W36AZ/W49B calculates to $16,822,280 and the fair value of WNJT/W43CH calculates to $6,748,216.

We have estimated that the following construction costs would be incurred for sufficient technical equipment and for the structuring of operational facilities for the four television stations and three

translators: WNJB/W36AZ/W49BE, $1,055,000; WNJN, $2,255,000; WNJS, $2,319,000; and WNJT/W43CH, $1,522,000. The construction cost estimates assume the minimum necessary technical plant required in order for the stations to begin their broadcast operations. The estimate construction cost figures are exclusive of land, buildings, towers, and associated improvements as it is assumed that the new stations would lease both their transmitter sites and studio and office locations. Deducting the aforementioned construction costs from the estimated "stick" values results in the following FCC licenses for the television stations/translators: WNJB/W36AZ/W49BE, $15,767,000; WNJN, $14,486,000; WNJS, $4,420,000; and WNJT/W43CH, $5,226,000.

WNJB/W36AZ/W49BE's FCC Licenses:	**$15,767,000**
WNJN's FCC License:	**14,486,000**
WNJS's FCC License:	**4,420,000**
WNJT/W43CH's FCC Licenses:	**5,226,000**
Total FCC License Value:	**$39,899,000**

CONTRIBUTORS BASE ASSET

The value of the Contributors Base Asset is equal to the present value of all the net cash flows that would be expected to be received from the contributors base in the future, given projected future revenues and its expected life.

To estimate the survival rate for the television division's contributors base, I reviewed data from DonorCentrics Executive Program Overview report on NJN's Annual TV Gifts for Fiscal Year 2010. This report had contributor attrition data for the NJN television stations.

In this section of this report is the sheet the contributor attrition data. Fiscal years end on June 30 of each year. The data is by number of contributors, not contributor revenue. Such data was not available for an attrition analysis.

I summed the "Renew" and "Additional" number for each year FY 2007 through FY 2010 and divided by the total number of contributors from the previous fiscal year.

The survival rates calculated to 46.25% in FY 2007, 39.57% in FY 2008, 41.76% in FY 2009 and 48.35% in FY 2010. The average of the four survival rates is 43.98%, and I will use that as the projected annual survival rate going forward.

As seen on Table 2, I projected revenues for this contributors base through FY 2028. This projection is my estimate of the revenues to be earned in the future from the contributors who were already contributing to NJN Television, as of December 1, 2010.

Based on our knowledge of the not-for-profit television industry and discussions with Mike Jonas, it is our belief that non-for-profit television stations would continue operating even if they did not receive these underwriters' revenues. Therefore, I did not deduct operating expenses or deduct contributory asset charges for contributing assets, such as tangible assets, working capital and an assembled workforce asset. Also, because this is an asset for a non-for-profit entity, I did not deduct any tax payments.

The annual net benefits, which equal each year's projected revenues, are then discounted to present value using an after-tax discount rate of 10.00% (see Appendix B for an explanation).

The present value of the discounted cash flows generated by the Contributors Base Asset, as of December 1, 2010, is $1,459,286, which is the value of this asset. The estimated remaining useful life of this asset is about 18 years.

Fair Market Value: $1,459,286

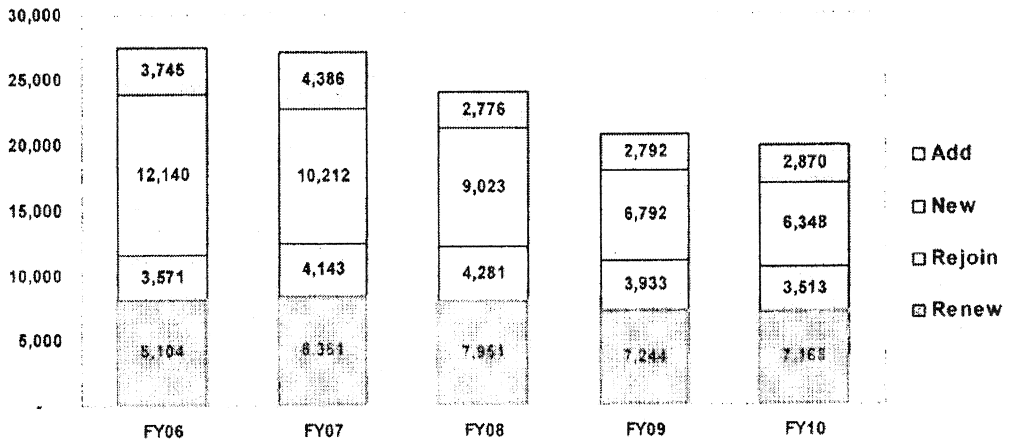

Gift Type Comparison: Section C

Regardless of station database coding, ***donor***Centrics™ uses standardized gift-timing rules to determine whether a donor is new, renewed, rejoined or gave additional gifts. Standardized business rules based on gift timing make it possible to benchmark and compare performance across all stations or to allow a single station to analyze performance when station rules change.

- **New**: the first gift on a donor's record.
- **Renewal**: a gift within 9 to 17 months of the previous membership gift.
- **Rejoin**: any gift made 17 or more months after the previous membership gift.
- **Additional**: gifts made from 0 to 9 months after a membership gift.

Donor Counts by Gift Type

	FY06	FY07	FY08	FY09	FY10	*09-10 %Change*	*06-10 %Change*

UNDERWRITERS BASE ASSET

The value of the Underwriters Base Asset is equal to the present value of all the net cash flows that would be expected to be received from the underwriters base in the future, given projected future revenues and its expected life.

To estimate the survival rate for the television division's underwriters base, we reviewed historical underwriter data for NJN Television for each fiscal year from FY 1996 through FY 2009. We did not have sufficient data to do an actuarially sound analysis, so we instead analyzed the number of underwriters who continued with NJN Television in the year after they served as an underwriter in order to estimate an annual survival rate. The results can be seen in this section of the report.

In terms of revenue, the average survival rate was 58.3%, and that is the projected survival rate that I used as the projected annual survival rate going forward.

As seen on Table 3, I projected revenues for this underwriters contributors base through FY 2025. This projection is my estimate of the revenues to be earned in the future from the underwriters who were already underwriting NJN Television, as of December 1, 2010.

Based on our knowledge of the not-for-profit television industry and discussions with Mike Jonas, it is our belief that non-for-profit television stations would continue operating even if they did not receive these underwriters' donations. Therefore, I did not deduct operating expenses or deduct contributory asset charges for contributing assets, such as tangible assets, working capital and an assembled workforce asset. Also, because this is an asset for a non-for-profit entity, I did not deduct any tax payments.

The annual net benefits, which equal each year's projected revenues, are then discounted to present value using an after-tax discount rate of 10.00% (see Appendix B for an explanation).

The present value of the discounted cash flows generated by the Underwriters Base Asset, as of December 1, 2010, is $2,031,406, which is the value of this asset. The estimated remaining useful life of this asset is about 15 years.

Fair Market Value: $2,031,406

NJN Television					
Year	Underwriter Count	Sum	# of Underwriters that Survived from Prev. Year	Underwriter Revenue that Survived from Prev. Year	Survival %
1996	80	3,319,265			
1997	40	1,851,887	14	1,314,489	39.6%

[1] Fiscal years end June 30.

TOWER SPACE INCOME AGREEMENTS

An intangible asset that is present at the NJPBA television stations exists in the form of 36 agreements between the station and entities doing business in New Jersey. The subject agreements permit the companies to lease tower and building space from the NJPBA television stations for use in their daily business operations. Because the owner of the stations receives incremental revenues and profits as a result of these agreements, and because these agreements have determinable lives defined by their contract terms, these agreements are amortizable intangible assets.

The specifics concerning each agreement, as of the December 1, 2010 valuation date, are as shown in the following table. The agreements were valued through the end of their current terms.

Federal and state taxes were subtracted from the projected incremental cash flows. For tax purposes, this asset is amortizable over a fifteen-year period. As such, the appraiser has added back each year's amortization amount to the projected incremental cash flow.

Finally, the net benefits of the agreements were discounted at various rates, depending on the length of the initial term. The weighted average discount rate for all of the agreements was 5.35%. The appraiser added 400 basis points to the December 1, 2010 "risk-free" rates shown below:

1-year T-Bill rate: 0.28% + 400 basis points = 4.28%
2-year T-Bill rate: 0.53% + 400 basis points = 4.53%
5-year T-Bill rate: 1.64% + 400 basis points = 5.64%
10-year T-Bill rate: 2.97% + 400 basis points = 6.97%

Tower and Building Space Income Agreements

EXHIBIT A
WARA ANALYSIS

WEIGHTED AVERAGE RETURN ON ASSETS ANALYSIS

In considering the discount rates to use on the intangible assets in this report, I began by considering the after-tax Weighted Average Cost of Capital ("WACC") for the television stations of NJPBA.

Because the fair market value report of the nine subject NJPBA television stations used only a market valuation approach, not an income valuation approach, there was no WACC determined for the television stations in that report.

BIA/Kelsey had previously performed a Weighted Average Cost of Capital analysis, as of November 30, 2010, for a commercial television station valuation project. Based on input from that analysis, my estimate of the after-tax WACC for television stations, as of that date was 7.71%. I think that is the appropriate WACC to use in this report.

I then used a Weighted Average Return on Assets ("WARA") to reconcile the overall WACC of 7.71% to the returns on the assets that constitute this enterprise.

Weighted Average Return on Assets ("WARA")

The WARA for the NJPBA Television Stations can be seen on Table A-1. I thought it was best to use the same after-tax returns for the tangible assets, FCC licenses, Contributors Base Asset and the Underwriters Base Asset that were used in the NJPBA Radio Stations report. The return on the Income Agreements asset of 5.35% makes the sum of the value-weighted after-tax returns on assets sum to 7.32%, which is below the 7.71% estimated after-tax WACC.

However, to get the returns on the various assets to sum to the 7.71% after-tax WACC, one would have to increase the return on the Income Agreements Asset to 16.5%. In my opinion, that is far too

high for what is nearly a risk-free asset to the NJPBA Television Stations, so I will keep the return on the Income Agreements asset at 5.35%.

Please note that even though the individual assets of the NJPBA Television Stations sum to $69,955,646, that does not change our estimate of the fair market value of the NJPBA Television Stations, in an asset sale, as going concerns, which was $47,051,896, as of December 1, 2010.

Table A-1

Weighted Average Return on Assets

	Asset Value	Percentage of Value	After-Tax Rate of Return	WARA	Remaining Life
Tangible Assets	$24,091,723	34.44%	6.00%	2.07%	Varies by Category
FCC Licenses	39,899,000	57.03%	8.00%	4.56%	Indefinite
Contributors Base Asset	1,459,286	2.09%	10.00%	0.21%	14 years
Underwriters Base Asset	2,031,406	2.90%	10.00%	0.29%	11 years
Income Agreements	2,474,231	3.54%	5.35%	0.19%	Varies by Agreement
Total	**$69,955,646**	**100.00%**		**7.32%**	

EXHIBIT B
QUALIFICATIONS

Qualifications
Of
William Redpath, ASA, CFA, CIPM, CPA, ABV

William Redpath is a Vice President for BIA/Kelsey, a financial and strategic consulting firm with an expertise in the appraisal of broadcasting, cable, and telecommunications properties and preparation of financial presentations for communications clients. Prior to joining BIA/Kelsey in 1985, Mr. Redpath was a Senior Financial Analyst with NBC in New York.

Mr. Redpath earned his B.A. degree in Economics and Political Science from Indiana University and his M.B.A. from The University of Chicago.

After completing his formal education, Mr. Redpath was a staff auditor in the Cincinnati office of Arthur Andersen & Co. from 1980 to 1982. Subsequent to that, he was Assistant Financial Manager of WISH-TV, Indianapolis. He then joined the Internal Audit Department at ABC, New York, where he worked on numerous audits, including those of WXYZ(AM) (now WXYT), WRIF(FM) and WXYZ(TV), Detroit, after which he joined NBC.

Mr. Redpath has prepared hundreds of valuations of business enterprises, privately-held equity interests, and purchase price allocations for financial and tax reporting purposes. He has been an expert witness in numerous litigations. He has authored articles for the BCFM Journal and other professional journals on intangible asset valuation. He has testified in state courts, United States District Court and United States Bankruptcy Court on valuation matters.

Mr. Redpath is a Certified Public Accountant licensed in the Commonwealth of Virginia. He is a member of the American Institute of Certified Public Accountants, from which he has earned the Accredited in Business Valuation (ABV) designation. He is also an Accredited Senior Appraiser (ASA) in Business Valuation with the American Society of Appraisers, a Chartered Financial Analyst (CFA), and he holds the Certificate in Investment Performance Measurement (CIPM) designation from the CFA Institute.

Qualifications
Of
Geoffrey C. Price

Geoffrey C. Price is a Vice President for BIA/Kelsey, a financial and strategic consulting firm specializing in the fair market valuations, asset appraisals, strategic analyses, and business plans of broadcast and telecommunications properties. In his current position at BIA/Kelsey, Mr. Price is responsible for the managing and operating of the company's nationwide leading Consulting Group. Mr. Price has been at BIA/Kelsey since 1988 and has appraised hundreds of media and telecommunications properties worth in aggregate in the tens of billions of dollars.

As a Vice President with BIA/Kelsey, Mr. Price has been responsible for the preparation of asset appraisals, valuation studies, strategic consulting assignments, and litigation support for clients in the communications and broadcast industries. He has also been responsible at BIA/Kelsey for assisting many publicly traded and privately held broadcast companies with their valuation needs associated with FASB 141/142. In addition, Mr. Price is part of the business development team at BIA/Kelsey and is responsible for the client relationships with many of the largest broadcast companies nationwide. Mr. Price's appraisal and valuation experience is diverse, including reports for firms in the cellular, paging, SMR, cable, print, tower, and broadcast industries.

Prior to joining BIA/Kelsey, Mr. Price was employed by ADT Security Systems, Inc. in its Accounting Center located in Alexandria, Virginia. Mr. Price earned his B.S. degree in Finance from Virginia Polytechnic Institute and State University in Blacksburg, Virginia. Mr. Price received his M.B.A. from George Mason University in Fairfax, Virginia.

Qualifications
Of
Suzanne M. Ackley

Suzanne M. Ackley is the Senior Research Analyst with BIA/Kelsey, the premier financial and strategic consulting firm specializing in the appraisal and fair market valuation of broadcasting, cable, and telecommunications properties and preparation of bank presentations for communications clients. BIA/Kelsey is a subsidiary of BIA/Kelsey Financial Network, Inc. Ms. Ackley has been at BIA/Kelsey since 1994.

Ms. Ackley has performed hundreds of asset allocation assignments for some of the largest media companies in the nation, as well as many regional and national financial institutions. Ms. Ackley has been responsible for appraising intangible assets, including: FCC licenses, network affiliation agreements, advertiser base assets, retransmission consent agreements, syndicated programming agreements, sports broadcast rights agreements, favorable and unfavorable facility leases, and income leases for acquisitions and fresh-start accounting purposes. She has also assisted in the appraisal of tangible assets of radio, television, tower, outdoor advertising and communications properties. Ms. Ackley has also been responsible for assisting many publicly traded and privately held broadcast companies with their valuation needs associated with FASB 141/142. She has also assisted in the preparation and production of valuation studies for communication and media properties, FCC license swaps, operational audits, due diligence, financial reviews, evaluations of technical facilities, fairness opinions, comparable sales analyses, and feasibility studies for start-up radio and television stations.

As Senior Research Analyst, Ms. Ackley has been responsible for researching and preparing local market analyses, industry overviews, and national economic overviews. Additionally, Ms. Ackley is responsible for researching and creating the maps, graphics, charts, and demographic/economic tables used in BIA/Kelsey's fair valuations. She has conducted several research studies, including an analysis of the power ratios of radio stations in Arbitron rated markets.

Ms. Ackley earned a Bachelor of Arts (B.A.) in English Writing from George Mason University in Fairfax, Virginia. She also received a Master of Education (M.Ed.) in Secondary English from George Mason University. In addition, Ms. Ackley received an Associate of Applied Science (A.A.S.) in Business Management with a Specialization in Finance from the Northern Virginia Community College in Manassas, Virginia. The A.A.S. degree was conferred Magna Cum Laude.

State of New Jersey
New Jersey Public Broadcasting System
New Jersey Network
Standard Terms and Conditions

1. STANDARD TERMS AND CONDITIONS APPLICABLE TO THE CONTRACT:

Unless the bidder is specifically instructed otherwise in the Request for Proposals (RFP), the following terms and conditions shall apply to the Contract between the Contractor and the New Jersey Public Broadcasting System ("NJPBA" or the "State"). These terms are in addition to the terms and conditions set forth in the RFP and should be read in conjunction with same unless the RFP specifically indicates otherwise. In the event the Contractor has presented terms and conditions which conflict with the State's, the State's terms and conditions shall prevail, unless the Contractor is notified in writing of the State's specific acceptance of some or all of the Contractor's terms and conditions.

2. STATE LAW REQUIRING MANDATORY COMPLIANCE BY ALL CONTRACTORS:

The statutes, laws or codes cited herein are available for review at the New Jersey State Library, 185 West State Street, Trenton, New Jersey 08625.

2.1 BUSINESS REGISTRATION:

As a condition to entering into a State Contract, pursuant to N.J.S.A. 52:32-44, the State is prohibited from entering into a Contract with an entity unless the bidder and each subcontractor named in the bid proposal has a valid Business Registration Certificate on file with the Division of Revenue.

The Contractor and any subcontractor providing goods or performing services under the Contract, and each of their affiliates, shall, during the term of the Contract, collect and remit to the Director of the Division of Taxation in the Department of the Treasury the use tax due pursuant to the Sales and Use Tax Act, P.L. 1966, c. 30 (N.J.S.A. 54:32B-1 et seq.) on all their sales of tangible personal property delivered into the State. Any questions in this regard can be directed to the Division of Revenue at (609) 292-1730. Form NJ-REG can be filed online at http://www.state.nj.us/treasury/revenue/busregcert.htm.

2.2 ANTI-DISCRIMINATION:

All parties to any Contract with the State agree not to discriminate in employment and agree to abide by all anti-discrimination laws including those contained within N.J.S.A. 10:2-1 through N.J.S.A. 10:2-4, N.J.S.A.l0:5-1 et seq. and N.J.S.A.l0:5-31 through 10:5-38, and all rules and regulations issued thereunder are hereby incorporated by reference.

2.3 PREVAILING WAGE ACT:

The New Jersey Prevailing Wage Act, N.J.S.A. 34:11-56.26 et seq. is hereby made part of every Contract entered into on behalf of the State of New Jersey except those Contracts which are not within the contemplation of the New Jersey Prevailing Wage Act. The bidder's signature on this proposal is his guarantee that neither he nor any subcontractors he might employ to perform the work covered by this proposal has been suspended or debarred by the Commissioner, Department of Labor for violation of the provisions of the Prevailing Wage Act and/or the Public Works Contractor Registration Acts; the bidder's signature on the proposal is also his guarantee that he and any subcontractors he might employ to perform the work covered by this proposal shall comply with the provisions of the Prevailing Wage and Public Works Contractor Registration Acts, where required.

2.4 AMERICANS WITH DISABILITIES ACT:

The Contractor must comply with all provisions of the Americans with Disabilities Act (ADA), P.L 101-336, in accordance with 42 U.S.C. 12101, et seq.

2.5 MACBRIDE PRINCIPLES:

The bidder must certify pursuant to N.J.S.A. 52:34-12.2 that it either has no ongoing business activities in Northern Ireland and does not maintain a physical presence therein or that it will take lawful steps in good faith to conduct any business operations it has in Northern Ireland in accordance with the MacBride principles of nondiscrimination in employment as set forth in N.J.S.A. 52:18A-89.5 and in conformance with the United

Kingdom's Fair Employment (Northern Ireland) Act of 1989, and permit independent monitoring of their compliance with those principles.

2.6 PAY TO PLAY PROHIBITIONS:

a. Definitions - For the purpose of this section, the following shall be defined as follows:

1) Contribution - means a contribution reportable as a recipient under The New Jersey Campaign Contributions and Expenditures Reporting Act., P.L. 1973, c83 (N.J.S.A. 19:44A-1 et seq.), and implementing regulations set forth at N.J.A.C. 19:25-7 and N.J.A.C. 19:25-10.1 et seq. Contributions in excess of $300 during a reporting period are deemed "reportable" under these laws.

2) Business Entity - means any natural or legal person, business corporation, professional services corporation, Limited Liability Company, partnership, limited partnership, business trust, association or any other legal commercial entity organized under the laws of New Jersey or any other state or foreign jurisdiction, but does not include non profit or not for profit corporations. The definition of a business entity includes:

A. all principals who own or control more than 10 percent of the profits or assets of a business entity or 10 percent of the stock in the case of a business entity that is a corporation for profit, as appropriate and for a for profit entity, the following:

(i) in the case of a corporation: the corporation, any officer of the corporation, and any person or business entity that owns or controls 10% or more of the stock of the corporation;
(ii) in the case of a general partnership: the partnership and any partner;
(iii) in the case of a limited partnership: the limited partnership and any partner;
(iv) in the case of a professional corporation: the professional corporation and any shareholder or officer;
(v) in the case of a limited liability company: the limited liability company and any member;
(vi) in the case of a limited liability partnership: the limited liability partnership and any partner;
(vii) in the case of a sole proprietorship: the proprietor; and
(viii) n the case of any other form of entity organized under the laws of this State or any other state or foreign jurisdiction: the entity and any principal, officer, or partner thereof;

B. any subsidiaries directly or indirectly controlled by the business entity;

C. any political organization organized under section 527 of the Internal Revenue Code that is directly or indirectly controlled by the business entity, other than a candidate committee, election fund, or political party committee; and

D. if a business entity is a natural person, that person's spouse or civil union partner, or child residing in the same household provided, however, that, unless a contribution made by such spouse, civil union partner, or child is to a candidate for whom the contributor is entitled to vote or to a political party committee within whose jurisdiction the contributor resides unless such contribution is in violation of section 9 of Chapter 51.

b. Breach of Terms of Chapter 51 or EO 117 is a Breach of Retention Agreement - It shall be a breach of the terms of the Retention Agreement for the Business Entity to do any of the following:

1) make or solicit a contribution in violation of the Chapter 51 or EO 117;
2) knowingly conceal or misrepresent a contribution given or received;
3) make or solicit contributions through intermediaries for the purpose of concealing or misrepresenting the source of the contribution;
4) make or solicit any contribution on the condition or with the agreement that it will be contributed to a campaign committee or any candidate of holder of the public office of Governor, or of Lieutenant Governor, or to any State, county or municipal party committee, or any legislative leadership committee;
5) engage or employ a lobbyist or consultant with the intent or understanding that such lobbyist or consultant would make or solicit any contribution, which if made or solicited by the business entity itself, would subject that entity to the restrictions of Chapter 51 or EO117;

6) fund contributions made by third parties, including consultants, attorneys, family members, and employees;
7) engage in any exchange of contributions to circumvent the intent of the Chapter 51 or EO 117;or
8) directly or indirectly through or by any other person or means, do any act which would subject that entity to the restrictions of the Chapter 51 or EO 117.

2.10 SERVICE PERFORMANCE WITHIN U.S:

Pursuant to N.J.S.A. 52:34-13.2, all Contracts primarily for services shall be performed within the United States, except when the Treasurer certifies in writing a finding that a required service cannot be provided by a Contractor or subcontractor within the United States and the certification is approved by the State Treasurer.

A shift to performance of services outside the United States during the term of the Contract shall be deemed a breach of Contract. If, during the term of the Contract, the Contractor or subcontractor, proceeds to shift the performance of any of the services outside the United States, the Contractor shall be deemed to be in breach of its Contract, which Contract shall be subject to termination for cause pursuant to Section 3.3(b)(1) of the Standard Terms and Conditions, unless previously approved by the Treasurer.

2.11 COMPLIANCE – LAWS:

The Contractor must comply with all local, state and federal laws, rules and regulations applicable to this Contract and to the services performed hereunder.

3. INDEMNIFICATION AND INSURANCE

3.1 INDEMNIFICATION FOR THIRD PARTY CLAIMS - The Contractor shall indemnify and hold harmless the State of New Jersey, the NJPBA, and its employees, agents and affiliates from and against any and all damages, losses, liabilities and expenses including,, without limitation, reasonable attorneys' fees, arising out of or resulting from:

a. any act or omission, event or occurrence that was or shall be caused by the Contractor, its employees, agents or affiliates relating to the business and operations of the Contractor of the NJPBA;

b. any libel, slander, illegal competition or trade practice, infringement of trademarks, trade names, or program titles, violation of rights of privacy, and infringement of copyrights and proprietary rights, including intellectual property rights, resulting from or relating to any programming produced or furnished by the Contractor; and

c. any breach by the Contractor of any of its obligations, representations, warranties, covenants or other agreements made by the Contractor in the Contract.

The Contractor's indemnification and liability under this section is not limited by, but is in additional to the insurance obligations contained in Section 3.2 of these Terms and Conditions.

3.2 INSURANCE - The Contractor shall secure and maintain in force for the term of the Contract insurance as provided herein. All required insurance shall be provided by insurance companies with an A- VIII or better rating by A.M. Best & Company. The Contractor shall provide the State with current certificates of insurance for all coverages and renewals thereof, naming the State as an Additional Insured and shall contain the provision that the insurance provided in the certificate shall not be canceled for any reason except after sixty (60) days written notice to the Treasurer of the State of New Jersey.

The insurance to be provided by the Contractor shall be as follows:

a. Comprehensive General Liability Insurance or its equivalent: The minimum limit of liability shall be $1,000,000 per occurrence as a combined single limit for bodily injury and property damage. The above required Comprehensive General Liability Insurance policy or its equivalent shall name the State, its officers, and employees as Additional Insureds. The coverage to be provided under these policies shall be at least as broad as that provided by the standard basic, unamended, and unendorsed Comprehensive General Liability Insurance occurrence coverage forms or its equivalent currently in use in the State of New Jersey, which shall not be circumscribed by any endorsement limiting the breadth of coverage.

b. Automobile liability insurance which shall be written to cover any automobile used by the insured. Limits of liability for bodily injury and property damage shall not be less than $1 million per occurrence as a combined single limit. State of New Jersey, its officers and employees shall be named Additional Insureds. Physical damage insurance covering automobiles shall name the State of New Jersey Loss Payee to any State owned vehicles.

c. Worker's Compensation Insurance applicable to the laws of the State of New Jersey and Employers Liability Insurance with limits not less than:

$2,000,000 BODILY INJURY, EACH OCCURRENCE
$2,000,000 DISEASE EACH EMPLOYEE
$2,000,000 DISEASE AGGREGATE LIMIT

d. Broadcast libel and errors/omissions insurance of at least $5,000,000. The State of New Jersey shall be named Additional Insured by endorsement to this policy. The policy must be endorsed to cover Cyber Risk Multimedia/Technology Errors and Omissions. Any exclusion of coverage for actions by a governmental authority must be amended to exclude the State of New Jersey in their capacity as owner.

e. All Risk property insurance covering real and personal property of the State, including property in vehicles and while in transit, for the replacement cost of the property. State shall be named loss payee under the property insurance.

f. Umbrella Liability Insurance in an amount not less than $10 million per occurrence and in the aggregate naming the State of New Jersey as Additional Insured.

4. TERMS GOVERNING OPERATING CONTRACT(S)

4.1 CONTRACTOR IS INDEPENDENT CONTRACTOR:

The Contractor's status shall be that of any independent Contractor and not as an employee of the State.

4.2 TERMINATION OF CONTRACT

a. For Cause

The NJPBA may terminate the Contract (i) immediately by giving written notice if, in the reasonable good faith discretion of the NJPBA, the Station is operated by the Contractor in a manner contrary to the best interests of NJPBA, the public interest, convenience and necessity, FCC rules and regulations, the Communications Act of 1934, as amended, or other applicable law; or (ii) if Contractor otherwise breaches its obligations under the Contract and the Contractor fails to cure such breach within thirty (30) days of written notice from the PBA.

b. Upon termination of the Contract, NJPBA shall assume complete operational responsibility for the Station, and the Contractor shall be relieved of all obligations under the Contract except for: obligations incurred prior to the effective date of the termination; the obligation to provide a final accounting pursuant to the Contract and the obligation to cooperate with NJPBA to wind up Contractor's operation of the Station in an orderly fashion.

c. In the event of termination under this section, the Contractor shall be compensated for work performed in accordance with the Contract, up to the date of termination. Such compensation may be subject to adjustments.

4.3 SUBCONTRACTING OR ASSIGNMENT:

The Contractor may not subcontract other than as identified in the Contractor's proposal or assigns its responsibilities under the Contract, in whole or in part, without the prior written consent of the NJPBA. Such consent, if granted, shall not relieve the Contractor of any of his responsibilities under the Contract.

State of New Jersey
New Jersey Public Broadcasting System
New Jersey Network
Standard Terms and Conditions

4.4 NO CONTRACTUAL RELATIONSHIP BETWEEN SUBCONTRACTORS AND STATE:

Nothing contained in any of the Contract documents, including the RFP and vendor's bid or proposal shall be construed as creating any Contractual relationship between any subcontractor and the State.

4.5 MERGERS, ACQUISITIONS:

If, during the term of this Contract, the Contractor shall merge with or be acquired by another firm, the Contractor shall give notice to the NJPBA as soon as practicable and in no event longer than 30 days after said merger or acquisition. The Contractor shall provide such documents as may be requested by the NJPBA which may include but need not be limited to the following:

a. Corporate resolutions prepared by the awarded Contractor and new entity ratifying acceptance of the original Contract, terms, conditions and prices.
b. State of New Jersey Bidders Application reflecting all updated information including ownership disclosure, pursuant to provision 1.5.
c. Vendor Federal Employer Identification Number.

The documents must be submitted within 30 days of the request. Failure to do so may result in termination of the Contract for cause.

If, at any time during the term of the Contract, the Contractor's partnership, limited liability company, limited liability partnership, professional corporation, or corporation shall dissolve, the NJPBA must be so notified. All responsible parties of the dissolved business entity must submit to the NJPBA in writing, the names of the parties proposed to perform the Contract, and the names of the parties to whom payment should be made. No payment shall be made until all parties to the dissolved business entity submit the required documents to the NJPBA.

4.6 APPLICABLE LAW AND JURISDICTION:

This Contract and any and all litigation arising therefrom or related thereto shall be governed by the applicable laws, regulations and rules of evidence of the State of New Jersey without reference to conflict of laws principles and shall be filed in the appropriate Division of the New Jersey Superior Court. The State does not consent to federal court jurisdiction.

4.7. CONTRACT AMENDMENT:

The Contract may only be amended by written agreement of the State and the Contractor.

4.8 MAINTENANCE OF RECORDS:

The Contractor shall maintain records for products and/or services delivered against the Contract for a period of three (3) years from the date of final payment unless otherwise specified in the RFP. Such records shall be made available to the State upon request.

4.9 AVAILABILITY OF FUNDS: The State's obligation to make any payment under the Contract is contingent upon the availability of appropriated funds and receipt of revenues from which payment for Contract purposes can be made. No legal liability on the part of the State for payment of any money shall arise unless and until funds are appropriated each fiscal year to the using agency by the State Legislature and made available through receipt of revenues.

United States of America

FEDERAL COMMUNICATIONS COMMISSION

FM BROADCAST STATION CONSTRUCTION PERMIT

Official Mailing Address:

NEW JERSEY PUBLIC BROADCASTING AUTHORITY
PO BOX 777
TRENTON NJ 08625

Authorizing Official:

Dale E. Bickel
Senior Engineer
Audio Division
Media Bureau

Facility ID: 93886

Call Sign: 990716MB

Permit File Number: BPED-19990716MB

Grant Date: February 27, 2009

This permit expires 3:00 a.m. local time, February 27, 2012.

Subject to the provisions of the Communications Act of 1934, as amended, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this permit, the permittee is hereby authorized to construct the radio transmitting apparatus herein described. Installation and adjustment of equipment not specifically set forth herein shall be in accordance with representations contained in the permittee's application for construction permit except for such modifications as are presently permitted, without application, by the Commission's Rules.

Commission rules which became effective on February 16, 1999, have a bearing on this construction permit. See Report & Order, Streamlining of Mass Media Applications, MM Docket No. 98-43, 13 FCC RCD 23056, Para. 77-90 (November 25, 1998); 63 Fed. Reg. 70039 (December 18, 1998). Pursuant to these rules, this construction permit will be subject to automatic forfeiture unless construction is complete and an application for license to cover is filed prior to expiration. See Section 73.3598.

Equipment and program tests shall be conducted only pursuant to Sections 73.1610 and 73.1620 of the Commission's Rules.

Name of Permittee: NEW JERSEY PUBLIC BROADCASTING AUTHORITY

Station Location: NJ-BERNARDSVILLE

Frequency (MHz): 88.9

Channel: 205

Class: A

Hours of Operation: Unlimited

Transmitter: Type Accepted. See Sections 73.1660, 73.1665 and 73.1670 of the Commission's Rules.

Transmitter output power: As required to achieve authorized ERP.

Antenna type: Directional

Antenna Coordinates: North Latitude: 40 deg 40 min 26 sec

West Longitude: 74 deg 33 min 06 sec

	Horizontally Polarized Antenna	Vertically Polarized Antenna
Effective radiated power in the Horizontal Plane (kW):		1.90
Height of radiation center above ground (Meters):		43
Height of radiation center above mean sea level (Meters):		172
Height of radiation center above average terrain (Meters):		79

Antenna structure registration number: Not Required

Overall height of antenna structure above ground: 44 Meters

Obstruction marking and lighting specifications for antenna structure:

It is to be expressly understood that the issuance of these specifications is in no way to be considered as precluding additional or modified marking or lighting as may hereafter be required under the provisions of Section 303(q) of the Communications Act of 1934, as amended.

None Required

Special operating conditions or restrictions:

1 The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

2 Pursuant to 47 C.F.R. Sections 73.7002(c) and 73.7005(b) the permittee/licensee is required to construct and operate for a period of four years of on-air operations technical facilities substantially as proposed and shall not downgrade service to the area on which the preference was based.

Special operating conditions or restrictions:

3 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee shall submit the results of a complete proof-of-performance to establish the horizontal plane radiation patterns for both the horizontally and vertically polarized radiation components. This proof-of-performance may be accomplished using the complete full size antenna, or individual bays therefrom, mounted on a supporting structure of identical dimensions and configuration as the proposed structure, including all braces, ladders, conduits, coaxial lines, and other appurtenances; or using a carefully manufactured scale model of the entire antenna, or individual bays therefrom, mounted on an equally scaled model of the proposed supporting structure, including all appurtenances. Engineering exhibits should include a description of the antenna testing facilities and equipment employed, including appropriate photographs or sketches and a description of the testing procedures, including scale factor, measurements frequency, and equipment calibration.

4 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee shall submit an affidavit from a licensed surveyor to establish that the directional antenna has been oriented at the proper azimuth.

5 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee/licensee shall submit an affidavit that the installation of the directional antenna system was overseen by a qualified engineer. This affidavit shall include a certification by the engineer that the antenna was installed pursuant to the manufacturer's instructions and list the qualifications of the certifying engineer.

6 The relative field strength of neither the measured horizontally nor vertically polarized radiation component shall exceed at any azimuth the value indicated on the composite radiation pattern authorized by this construction permit.

A relative field strength of 1.0 on the composite radiation pattern herein authorized corresponds to the following effective radiated power:

1.90 kilowatts (vertically polarized only)

Principal minima and their associated field strength limits:

40 degrees True: 1.619 kilowatts
140 to 170 degrees True: 0.060 kilowatts
200 degrees True: 0.307 kilowatts
240 degrees True: 0.112 kilowatts

7 Waiver of the main studio rule, 47 CFR Section 73.1125, IS GRANTED to permit the station authorized in this construction permit to operate as a satellite of WNJT FM, Facility ID No. 48488, Trenton, NJ. The permittee shall abide by all representations made in the waiver request.

Re: New Public FM Station
Bernardsville, New Jersey
FIN 93886
FCC File No. BPED-19990716MB
FRN: 0004368007

Dear Ms. Dortch:

On behalf of the New Jersey Public Broadcasting Authority (NJPBA), we hereby file a six-month status report in connection with tolling of the above-referenced construction permit, as directed in the Bureau's email message dated September 1, 2010 extending tolling.

The referenced permit was granted on February 27, 2009 and expires on February 27, 2012. NJPBA's application was tentatively selected as comparatively superior to competing applicant World Revivals, Inc. (WRI) in NCE MX Group No. 980911 (see Letter to Applicants from Mass Media Bureau (Bureau), DA 05-2101, released July 29, 2005). WRI on September 1, 2005 filed a Petition to Deny (Petition) the tentative selection of NJPBA's Bernardsville application. Following completion of the pleading cycle, the Bureau denied WRI's Petition and granted NJPBA's application (see Letter to Applicants, DA 09-524, released February 27, 2009). On March 18, 2009, WRI filed a Petition for Reconsideration of the Bureau's denial of WRI's Petition. NJPBA on April 10, 2009 filed an Opposition to that Petition for Reconsideration. WRI's Petition for Reconsideration remains pending, so the permit remains encumbered by administrative review.

Please address any questions regarding this status report to this office.

Respectfully submitted,

SCHWARTZ, WOODS & MILLER

REQUEST FOR PROPOSALS
FOR
SALE OF THE NEW JERSEY NETWORK (NJN) RADIO BROADCAST NETWORK
AND
REQUEST FOR PROPOSALS
FOR
OPERATION OF THE NEW JERSEY NETWORK (NJN) TELEVISION BROADCAST NETWORK

QUESTIONS AND ANSWERS – FEBRUARY 24, 2011

Questions related to the NJN Radio Sale RFP

1. **Q:** Page 6, Section 7.5(a) refers to "entities" that would be part of any Radio Sale Agreement; and page 8, Section 7.12 asks for a description of "any partnerships, new entities, new corporations, operating contracts or other arrangements or agreements" that would be undertaken in acquisition of the NJN Radio Network. Therefore, will New Jersey accept a bid from two entities for radio stations where the two entities have the intention of splitting the radio stations between them if they are the successful bidder?

A: The State will consider such a bid, so long as the qualifications of each entity (independently) satisfy Transfer Act and RFP requirements.

2. **Q:** Page 7, Section 7.9 requests inclusion in the bid of staff lists and an organizational chart. Subsection (b) asks for "proposed plans, if any, for offering post-employment opportunities to former staff of the NJPBA." Will all current NJN state employees and/or NJN Foundation employees be available to be interviewed by the successful bidder?

A: With respect to current NJN state employees, to the extent possible, the State will cooperate to make available current NJN state employees to be interviewed by the successful bidder. With respect to employees of the NJN Foundation, that is a decision for the NJN Foundation, which is a private 501(c)(3) nonprofit corporation and the successful bidder will need to contact and make its own arrangements with the NJN Foundation at the appropriate time.

3. **Q:** On page 7, in Section 7.10, there is a request for plans for the operation of the Stations prior to the FCC's grant of the license under a short-term management and operating agreement. This section and the discussion of the Letter of Intent in Attachment E, page 44, address some of the details that must be included in these plans. More specifically, however,

and to assist in the formulation of these plans, will the bidder have immediate access to cash flow from income streams such as underwriting, earned income and member contributions? What will be the status of current employees during this O & M period?

A: For the purpose of the response, respondents should assume the ability to access only revenues earned following the time their entity commence operations. Revenues earned prior to commencement, but not realized until after that date are the property of the State. Respondents should also assume that no State resources, including State employees, will be available beginning July 1, 2011 and thereafter.

4. Q: Referring to page 9, Section 8.0, is it possible for the bidder to receive a copy of the proposal (Form of Letter of Intent) in MS-Word format?

A: Respondents should comment on the letter of intent in narrative form. Specific negotiations will take place at the time finalists are selected.

5. Q: Page 36, "Organizational Overview" states: "Upon enactment of the Transfer Act, all funds received by the FNJB will no longer be for the exclusive support and promotion of the NJPBA but for the support of public broadcasting in New Jersey." Please clarify what is/will be the status of the NJN Foundation, and whether bidders will have access to the Foundation and its relevant member and underwriting contract files, etc.

A: All membership records will be treated in compliance with CPB's donor requirements. See: http://www.cpb.org/stations/certification/cert5.html. Please also see the Transfer Act with respect to the status of the NJN Foundation.

6. Q: Page 37, "Program Delivery Network" states that if different entities are chosen to manage and operate the NJN Radio and Television Networks, they will be responsible for entering into arrangements to share the infrastructure. Does this mean that if there is a new NJN Television operator, that operator will be required to continue to provide program delivery services for the radio stations?

A: Yes.

7. Q: Page 44, Section 4(b), Attachment E: Form of Letter of Intent, states: "...if the Agreement is not executed within fifteen (30) days from the date of executing this LOI..." On page 46, Section 13, it states "LOI shall expire if not replaced by the Agreement...within 30 days after signing of this LOI by buyer and seller..." Please clarify the timeframe within which an Agreement must be executed, i.e., 15 or 30 days.

A: The time frame is 30 days.

8. **Q:** Page 45, Section 5, "Closing," refers to a closing "...on a mutually acceptable date within ten (10) business days following the date on which the FCC's consent to the assignment of the Station's FCC authorizations from Seller to Buyer is received..." Please clarify whether this refers to the FCC's initial consent or to an FCC Final Order.

A: Closing after the FCC's initial consent is contemplated.

9. **Q:** Page 15 et seq.: Section 2.2, Coverage Map: How was the Population Served under the 60 dBu Contour determined? How do these figures correspond to Arbitron's 6+ populations for the measured markets in New Jersey?

A: See BIA/Kelsey appraisals on this website.

Page 24, Section 2.3, FCC Filings, Bernardsville, NJ Construction Permit:

10. **Q:** What is the nature of the FCC administrative proceeding that has this CP tolled?

A: Prospective bidders should refer to the FCC submission regarding the tolling of the Bernardsville construction permit, a copy of which is posted on this website.

11. **Q:** What are the special FCC operating conditions to which this site must comply?

A: Prospective bidders should refer to the Bernardsville construction permit, a copy of which is posted on this website.

12. **Q:** What is the status of the tower commitment at this site?

A: Three new potential transmission sites have been identified and site assurance negotiations are on hold. Site details will be shared with those respondents selected as finalists.

13. **Q:** What is the status of any negotiations with citizens groups opposing the facility?

A: A group of residents opposed the original site. That site has been dropped from further consideration. Subsequent sites identified by the NJPBA have established transmitters or are pending township construction approval.

Translators/LPFM:

14. **Q:** What is the status of the station W285EE 104.9 FM in Clinton, NJ?

A: The license for W285EE, Clinton, New Jersey has been surrendered to the FCC. That station is not part of the NJN Radio Sale RFP.

15. Q: Are there any pending applications for LPFM frequencies?

A: No, but NJPBA has pending several FM translator applications that are not contemplated to be a part of any Transaction.

Page 32, Section 6, Audience Data:

16. Q: Does NJN Radio purchase Arbitron ratings information, either directly or through the Radio Research Consortium?

A: The NJPBA purchased audience ratings through the Radio Research Consortium.

17. Q: If yes, what is the charge? And does the Agreement automatically accrue to the new owner?

A: The current NJPBA agreement with the Radio Research Consortium is for $2,000 for FY '11 and includes minimal audience data. The Agreement expires on June 30, 2011 and there are no provisions in the Agreement which will cause the Agreement to automatically renew or accrue to a new owner.

Page 33-34, Section 7.1, Sources of Revenue and Expenses:

18. Q: Is there any programming-related revenue specific to NJN Radio?

A: No.

19. Q: What are the current annual costs for NPR membership?

A: $12,000.

20. Q: What are the current annual costs for each NPR program broadcast on NJN Radio?

A: NPR:

Program	Annual Cost
All Things Considered	$12,628
Morning Edition	$28,861
The Diane Rehm Show	$6,248

Fresh Air (Fresh Air Weekend)	$11,138
Hearing Voices	$1,811
On The Media	$906
Only a Game	$1,811
Talk of the Nation	$4,332
Tell Me More	$4,332
Car Talk	$12,774
Wait Wait... Don't Tell Me!	$3,728

Annual NPR Programming Cost: $90,336

21. **Q:** Are there any other program acquisition costs?

A: NJN Radio has programming agreements with American Public Media (APM) and Public Radio International (PRI).

PRI	Program	Annual Cost
	BBC Newshour	$12,432
	Living On Earth	$1,900
	Zorba Paster on your Health	$1,888
	The Sound of Young America	$4532

Annual PRI Programming Cost: $20,752

APM	Program	Annual Cost
	A Prairie Home Companion	$21,508
	Marketplace	$17,196
	As It Happens	$3,056

Annual APM Programming Cost: $41,760

22. **Q:** What current contracts or obligations of any kind would automatically accrue to the new owner or otherwise create an encumbrance for the new owner?

A: There may be some contract or obligation details that arise during due diligence. They will be addressed at that time.

Page 35, Section 7.2, Membership and Underwriting Details:

23. **Q:** How are the underwriters specific to radio (currently 34) determined?

A: Specific radio underwriting contracts are attributed to radio underwriting revenue.

24. **Q:** Who has been responsible for generating underwriting income for radio?

A: Underwriting income to date for both radio and television has been an activity of the NJN Foundation through a four person department which includes a manager/acct rep, an account rep, a producer for U/W announcements and a clerk/assistant for traffic and administration.

25. **Q:** How will the list of current and past radio underwriters, including contact names and history, be made available to the new owner?

A: Files will be made available via ProTracks software and other file transfers.

26. **Q:** How is the number of members for radio (currently 769) determined?

A: Donors responding to on-air radio drives via phone or web self identify as radio donors. There are radio specific renewals mailed and e-mailed, and any donor at any time can direct that their donation be to the benefit of either radio or television.

27. **Q:** Are they segregated in the overall NJN membership lists for purposes of mailing, email, and the like?

A: Lists can be segregated.

28. **Q:** How many fundraisers has NJN Radio conducted over the past two years?

A: Four, two each year.

29. **Q:** What were the results for both membership and membership revenue?

A:

March 09:	169 pledges	$14,967.00 revenue	members total: 616
Oct 09:	178 pledges	$14,744.99 revenue	members total: 697
April 10:	185 pledges	$13,216.00 revenue	members total: 598
Oct 10:	188 pledges	$16,510.00 revenue	members total: 616

30. Q: Given that year-to-year membership data exists, why does the analysis of membership going forward (Appraisal of Intangible Assets, p. 16-17) use a television metric to project churn?

A: See "Appraisal of the Intangible Assets of the Radio Stations", section "Contributors Base Asset."

31. Q: How will all historical data on radio-specific memberships, including names and donations, be transferred to the new owner?

A: Transfer of the data may be accomplished using Team Approach software or other means to be negotiated. All transfers must meet CPB's donor list requirements noted here: http://www.cpb.org/stations/certification/cert5.html.

Page 37, Section 9.3, Program Delivery Network:

32. Q: Is any part of the Network owned or leased directly by NJN Radio?

A: No. Radio infrastructure is commingled with TV infrastructure. Operating details will be negotiated.

Page 38 et seq.: Section 9.4, Transmitter Sites:

33. Q: Is there documentation of the lease/trade agreement(s) associated with the tower and transmitter site (including all housing for electronics) at each location?

A: Answer reserved for due diligence phase.

34. Q: Would any lease/trade arrangements with non-NJPBA entities be assigned to the new owner without modification?

A: Answer reserved for due diligence phase.

35. Q: Does NJN Radio solely own the electronics cabinet at the WNJO transmitter site?

A: Answer reserved for due diligence phase.

36. Q: Where specifically are the electronics housed at all the other sites?

A: The NJPBA inventory contains equipment purchase dates and site identification. See also "New Jersey Network Radio Stations Appraisal of Tangible Assets – Exhibit 1 – Tangible Asset Inventory."

37. **Q:** What was the purchase date of the major equipment items—particularly the transmitters—at each site?

A: The NJPBA inventory contains equipment purchase dates and site identification.

38. **Q:** What is the rack space and square footage allocated to the FM transmitter equipment at each other site?

A: Typically, one ninety inch rack, with approximately 10 to 15 RU's of available space.

39. **Q:** Is there room for an additional out-building (approx. 12' x 12') to be located on each other site?

A: Four sites are co-located with NJPBA TV facilities and have adequate space for additional equipment. The remaining sites would require surveys and lease negotiations.

40. **Q:** Is there separate power distribution and metering for the FM transmitter equipment at each site?

A: Power and transmission facilities are integrated with NJPBA TV operations. Several sites separate metered power.

(1) WNJT-FM 88.1 FM, Trenton, New Jersey; *No*
(2) WNJS-FM 88.1 FM, Berlin, New Jersey; *No*
(3) WNJM 89.9 FM, Manahawkin, New Jersey; *Yes*
(4) WNJO 90.3 FM, Toms River, New Jersey; *Yes*
(5) WNJY 89.3 FM, Netcong, New Jersey; *No*
(6) WNJN-FM 89.7 FM, Atlantic City, New Jersey; *No*
(7) WNJZ 90.3 FM, Cape May Court House, New Jersey; *No*
(8) WNJP 88.5 FM, Sussex, New Jersey; *No*
(9) WNJB-FM 89.3 FM, Bridgeton, New Jersey; *No*
(10) New Construction Permit1, Bernardsville, New Jersey (upon construction and licensing of the new station). Not Available

41. **Q:** What is the line voltage and current of the power feeders to each site?

A:
(1) WNJT-FM 88.1 FM, Trenton, New Jersey; *265/465 800 Amp*
(2) WNJS-FM 88.1 FM, Berlin, New Jersey; *277/480 800 Amp*
(3) WNJM 89.9 FM, Manahawkin, New Jersey; *120/240 100 Amp*
(4) WNJO 90.3 FM, Toms River, New Jersey; *120/208 60 Amp*
(5) WNJY 89.3 FM, Netcong, New Jersey; *3 Ø 120/208 100 Amp*

(6) WNJN-FM 89.7 FM, Atlantic City, New Jersey; *3 Ø 120/208 100 Amp*
(7) WNJZ 90.3 FM, Cape May Court House, New Jersey; *120/240 200 Amp*
(8) WNJP 88.5 FM, Sussex, New Jersey; *120/240 200 Amp*
(9) WNJB-FM 89.3 FM, Bridgeton, New Jersey; *120/208 100 Amp*
(10) New Construction Permit1, Bernardsville, New Jersey (upon construction and licensing of the new station). Not Available

42. **Q:** What is the average monthly cost for electricity at each site? Other utilities?

A: Power use typically runs $250/month at metered sites.

43. **Q:** Is there Generator emergency power capacity and availability at each site?

A: Sites co-located with NJPBA TV operations or shared with other State and local authorities have backup power.

44. **Q:** How many tons of HVAC capacity is apportioned to the FM transmitter equipment at each site?

A: A 5-ton supply is used at WNJO, other sites have shared capacity.

45. **Q:** Is there tower capacity available for additional ancillary antennas per site?

A: Additional tower capacity would require engineering studies and or negotiated lease terms.

46. **Q:** What is the condition of the coax cables at each site?

A: Cabling is checked periodically and is in satisfactory condition.

47. **Q:** Is there room for a 3.8M satellite downlink dish, and an associated concrete support slab approximately 6' x 6', to be constructed on the grounds of each site within the parameters of current lease/trade agreements?

A: Four sites are co-located with NJPBA TV facilities and have adequate space for additional equipment. The remaining sites would require surveys and lease negotiations.

Fair Market Value of the NJN Radio Stations:

48. Q: Of the 21 transactions listed in the Comparable Sales Information table (p. 11) 14 were for stations with religious formats. Why wasn't the analysis limited to facilities providing a public radio service?

A: See BIA/Kelsey appraisals on this website.

Questions related to the NJN Television Operations RFP

49. Q: Can you provide a list of the tower tenants and the current rent for each? We note that the line item 'tower rentals' increased significantly from 2009 to 2010.

A: The list of tower tenants and current rents will be made available during the "due diligence" phase of the negotiation. To clarify "tower rentals" figures – the 2010 figure includes a substantial lump sum payment, and two monthly payments that are not a part of the "tower rentals" revenue, but were booked there for administrative convenience. The 2009 figure for "tower rentals" is accurate. The projected 2011 figure for "tower rentals" is currently forecast at $1.3 million.

50. Q: Who will pay for the "FCC-required main studio staff required for operation of the NJN Television Network"?

A: Pursuant to FCC requirements, NJPBA, as FCC licensee, will pay for these staff, although the operator may propose to reimburse NJPBA for some or all of those staff costs.

51. Q: Where will they be housed?

A: NJPBA main studio staff will work at the FCC-required main studio for the applicable station(s).

52. Q: What will their role be?

A: Prospective bidders are urged to consult with their own FCC counsel regarding FCC licensee control of personnel and the roles of FCC-required main studio staff in management and operating agreements.

53. **Q:** There is a requirement in this section that the operating entity must meet the qualification criteria for Corporation for Public Broadcasting financial support. Did the State mean to limit the RFP to existing licensees only?

A: No. Respondents that meet CPB criteria or are already CPB qualified will be considered.

54. **Q:** Since the State is not transferring its existing television license, for the submission of the television RFP will this requirement be waived by the State for a non-profit entity which intends to manage/operate the station?

A: CPB qualification is desirable. If a bidder does not (and cannot) meet the qualifications for CPB financial support, it should so state and indicate which CPB criteria it does meet and which it does not meet.

55. **Q:** What current NJN programs are included in the six hours of New Jersey-centric news and information programming referred to in this section of the RFP?

A: We invite respondents to describe their programming vision that included New Jersey-centric programs. This vision may or may not include existing programs.

56. **Q:** Will the State provide financial assistance to the operating entity as it has done for other business ventures?

A: The operating entity or entities is free to apply for State financial assistance and economic development assistance programs, however, no State funding is guaranteed.

57. **Q:** Will EDA funds be available?

A: Respondents should inquire at the New Jersey Economic Development Authority (EDA) regarding eligibility for EDA programs.

58. **Q:** Since the State is going to maintain the licenses, will the State pay the license fees and all the associated costs?

A: Fees will be negotiated.

59. **Q:** If the State will have ultimate authority, power and control over matters including station finances, personnel and programming, will the State have to approve hiring and termination?

A: Prospective bidders are urged to consult with their own FCC counsel regarding FCC licensee control requirements, including control over personnel matters.

60. **Q:** Page 1, Section 1.2; page 15, Section 2 of Attachment B (Information on the NJN Television Network); and throughout Attachment C (Technical Overview of New Jersey Network Television Stations) provide details about the television stations and their associated antenna assets which includes four (4) transmitters (WNJT, Trenton, WNJB, New Brunswick, WNJN, Montclair and WNJS, Camden). In addition three (3) translators are identified (W36AZ, Sussex, W49BE Hackettstown and W43CH, Belvidere). In Attachment D, Inventory of 2010 Main Antennas, an additional translator, W25BB, Pittstown and two (2) boosters, WNJB2, Blairstown and WNJB1 Long Branch are identified. What is the disposition of the assets at these additional locations? For example, the assets associated with the Pittstown, Blairstown and Long Branch locations have the word "terminated" following the asset identifiers (i.e. W25BB, TV-Translator, Terminated). What is meant by "terminated"? Also, what is the status of the Hackettstown Translator, W49BE, since the lease with Centenary College expired in May of 2010.

A: The assets of W25BB Pittstown, WNJB2 Blairstown, and WNJB1 Long Branch are still carried on the State inventory; however, the operations at these facilities have been terminated and the FCC licenses are no longer valid.

Hackettstown Translator, W49BE, lease with Centenary College expired in May of 2010. NJN is currently operating under the terms of the expired lease.

61. **Q:** Page 6, Section 8.5(c) requests that the bidder provide certification of or proof that it is either qualified or can meet the qualification criteria for Corporation for Public Broadcasting financial support. Typically, the licensee of a noncommercial educational television station is the applicant for financial support from the Corporation for Public Broadcasting. Being that the New Jersey Public Broadcasting Authority will continue to hold the noncommercial educational television licenses of the New Jersey Network, is the information requested in Section 8.5(c) applicable to this particular Request for Proposals and, if so, what role will the operator take in connection with an application for financial support from the Corporation for Public Broadcasting?

A: The NJPBA will be the licensee and also the entity that is "qualified" by CPB to receive funding. In order for the NJPBA to remain qualified, the operator must operate in congruence with the CPB criteria for qualified stations and supply information to the NJPBA sufficient to report compliance to CPB.

62. **Q:** Page 7, Section 8.8(b) requests that the bidder provide an initial NJN Network programming grid. Being that the New Jersey Public Broadcasting Authority will continue to hold the noncommercial educational television licenses of the New Jersey Network, what role will the operator take in connection with NJN's ongoing PBS membership?

A: In general, operational responsibilities including vendor relations and contracts will be assumed by the operator. Any variations from that assumption will be negotiated.

63. **Q:** Page 7, Section 8.9 requests disclosure of the bidder's proposed plans, if any, for offering post-employment opportunities to former staff of the New Jersey Public Broadcasting Authority. Will a bidder providing employment to such individuals assume any existing obligations of the New Jersey Public Broadcasting Authority with respect to such former staff, for example, unfunded pension and other benefit plans? In addition, if such individuals are currently parties to collective bargaining agreements, will they continue to be so upon becoming employees of the bidder?

A: The new operator will assume no obligations related to prior employment.

64. **Q:** Page 31, Section 9.1 of Attachment B (Information on NJN Television Network): Will the successful bidder have access to the Master Control Facility in Trenton and, if so, what are the terms and conditions pursuant to which such access would be provided?

A: Prospective bidders that desire access to the Master Control Facility in Trenton should describe those needs in response to Section 8.8(a) of the NJN Television Operations RFP and propose acquisition, lease or other terms for such access.

65. **Q:** Pages 32-34, Section 9.2, 9.3 and 9.4 of Attachment B (Information on NJN Television Network): Will the successful bidder have access to the equipment, vehicles and other items listed in the aforementioned Sections, and, if so, what are the terms and conditions pursuant to which such access would be provided?

A: Terms and conditions for any State owned facilities or equipment will be negotiated.

66. **Q:** Attachment D (Inventory - Computer Assets), inventories various equipment items and software applications. May bidders assume that all of the database technology, software applications, content management systems and equipment items required to sustain the NJN web site, and especially its streaming content and services, are among these inventoried items? In addition, may bidders assume that the NJN internet domain name and all of its features and functionality will transfer to the successful bidder?

A: These issues will be negotiated. However, bidders should assume that to the extent possible all equipment, software, intellectual property necessary for the successful operation will be transferred or otherwise made available to the successful bidder.

67. Q: Page 2, 2.0 says the State Treasurer "has begun to .... (b) identify methods and mechanisms required to transfer NJPBA assets and liabilities." Please disclose details about State Treasurer's conclusions and describe in detail what is meant by "methods and mechanisms." Has NJPBA reviewed any of its conclusions, even if temporary ones, with the FCC? If so, what have been the FCC's reactions?

A: The State has retained FCC counsel. Prospective bidders are urged to consult with their own FCC counsel regarding applicable FCC requirements, including the requirements for operators and managers of noncommercial educational broadcast stations.

68. Q: Page 2, 2.0 (d) says, "Assuring that the operators of the NJN Television Network can fulfill the responsibilities of maintaining a New Jersey-focused public broadcasting operation." What is mean by the word "assuring," and what sorts of indicia will be used to determine the degree/quality or compliance with the assurance?

A: The State has retained FCC counsel and is interested in the ability and capacity of respondents to perform. Prospective bidders are referred to Sections 8.0 (Required Components of the Proposal) and 11.0 (Selection Process) of the NJN Television Operations RFP.

69. Q: Page 2 and Page 3, 2.0 also says that the Transfer Act authorized the Stare Treasurer to solicit proposals to and to "negotiate a contract to delegate responsibility for the operation and management of the NJN Television Network ...." Has NJN discussed the concepts of how it proposes to delegate responsibility for the management and operation with the FCC and if so what sort of guidance has NJN received (from the FCC or from counsel) about how to accomplish such delegation in a manner consistent with FCC regulations and guidelines? If NJN has not yet discussed this delegation concept with the FCC, when does it propose to do so?

A: The State has retained FCC counsel. Prospective bidders are urged to consult with their own FCC counsel regarding applicable FCC requirements, including the requirements for operators and managers of noncommercial educational broadcast station.

70. **Q:** Page 3, 3.0 addresses the not-for-profit which is the bidder. Is it sufficient that the not-for-profit has been formed but has not yet applied to IRS for 501-C-3 determination letter?

A: Prospective bidders should refer to Section 8.5(d) of the NJN Television Operations RFP which states that a bidder may demonstrate its nonprofit educational qualifications or demonstrate intent to qualify with a plan and timeline for doing so.

71. **Q:** Page 6, 8.6 of TV RFP asks for the total value of all consideration to be paid to the State Treasurer under the proposed agreement, "consisted with FCC requirements for noncommercial educational stations." Please explain in more detail what you are requesting and the relationship to FCC requirements. What specific requirements are you referencing?

A: The State has retained FCC counsel. Prospective bidders are urged to consult with their own FCC counsel regarding applicable FCC requirements, including the requirements for operators and managers of noncommercial educational broadcast stations.

72. **Q:** Page 7, 8.6 (b) addresses reimbursement for all direct and indirect operating costs for the NJN TV Network ... "consistent with FCC requirements for agreement to manage and operate noncommercial educational broadcasting stations." Has NJN addressed the management and operational plan set forth in the Transfer Act with the FCC?

A: No. The State has retained FCC counsel. Prospective bidders are urged to consult with their own FCC counsel regarding applicable FCC requirements, including the requirements for operators and managers of noncommercial educational broadcast stations.

73. **Q:** Has NJN received any written guidance from the FCC and/or from counsel about the types of requirements/provisions that ought to be included in the Television Operating Agreement ("TOA")? Please provide copies of any such guidance/opinions/memorandum.

A: No. The State has retained FCC counsel. Prospective bidders are urged to consult with their FCC counsel regarding applicable FCC requirements, including the requirements for operators and managers of noncommercial educational broadcast stations.

74. **Q:** Please provide a copy of any budget NJN created identifying categories and amounts of those sorts of direct and indirect expenses it envisions may be reimbursed?

A: No such budget document has been created.

75. **Q:** Does NJN envision having any continuing employees associated with the NJN TV stations and if so, how many, what levels, what sorts of salary expectations and identify whether such employees are unionized.

A: Pursuant to FCC requirements, NJPBA, as FCC licensee, will pay for FCC-required main studio employees, although the operator may propose to reimburse NJPBA for some or all of those staff costs. Prospective bidders are urged to consult with their own FCC counsel regarding FCC licensee control of personnel and the roles of FCC-required main studio staff in management and operating agreements.

76. **Q:** 8.6 addresses the creation of a fund into which anticipated capital costs are to be paid and as the source from which capital costs are to be made.

i. Who will control this fund?
i. To whom will it belong?
ii. To whom will interest belong?

A: We have asked bidders to tell us how they will manage future capital costs.

77. **Q:** Page 8, 8.9 asks for information about proposed staffing. Please provide schedules of existing employees, their present positions, present salary and whether they are unionized. Does NJN propose to terminate (and incur any termination/benefit costs involved with such termination) all employees other than those bidder seeks to retain? Do any employees have personal contracts? If yes, can they be provided? Are there professional service contracts? If so, please provide any the bidder will be requested to consider assuming. Please provide copies of all union contracts covering any employee of NJN.

A: Successful bidders will not assume any former employee obligations or contracts. With respect to information regarding current employees (salaries, positions, contracts etc.), answers to those questions will be shared to the extent permitted by law with those respondents selected as finalists.

78. **Q:** Page 10/Page 11, 11.11 suggests that after execution of the Letter of Intent the bidders will be permitted to perform due diligence, including the inspection of the facilities. Is it possible to perform an inspection of the facilities, including an assessment of existing equipment, on or about March 1, 2011?

A: No, due diligence inspections and assessments are not possible prior to March 1, 2011.

79. **Q:** Page 12, 11.11 also suggests the TOA will be made available once the Letter of Intent has been executed. Is there an existing version or even draft of the TOA which can be disclosed?

A: Prospective bidders are referred to Attachment E, Letter of Intent, Section 5(b). The Television Operating Agreement will be negotiated by the parties based on the terms of the Letter of Intent.

80. **Q:** Please disclose Nielsen (and any other ratings whether internally or externally generated) ratings and demographic studies about NJN programming and viewership for the last 3 years.

A: NJPBA has recently terminated its Nielsen contract, and under terms of that agreement may no longer make use of the historical data. In the event a new operator enters into an agreement with Nielsen, it is reasonable to negotiate for access to that historical data and the NJPBA will have no objection to it being made available to the new operator by Nielsen.

81. **Q:** The valuation of the assets does not seem to consider the age or condition of those assets. Were they depreciated? What is the book value? What was the method used to value them?

A: See BIA/Kelsey appraisals on this website.

Page 38 /Page 39:

82. **Q:** 1 (b) that Operator assumes no obligations of Licensee other than those specific leases, contracts, agreements etc, it "specifically agrees to assume." When will all contracts and agreements of NJN be available for examination?

A: These items will be made available to the winning bidder(s) during the due diligence phase of the Letter of Intent.

83. **Q:** Section 3 states that Licensee has the ultimate authority and power over personnel, finances and programming. What is the mechanism the Licensee envisions to exercise such authority?

A: The State has retained FCC counsel. Prospective bidders are urged to consult with their own FCC counsel regarding applicable FCC requirements, including FCC licensee control analysis for management and operating agreements.

84. Q: The Standard Terms and Conditions address insurance requirements. Please disclose all claims made against Licensee over past 5 years, whether same resulted in settlement, payment or otherwise.

A: Appropriate loss data will be made available with respondents selected as finalists.

Request for Proposals Pursuant to the
New Jersey Public Broadcasting System Transfer Act
General Questions and Answers

Question:

"I am working with a client in preparing a proposal in response to the above-referenced RFP. The RFP states that proposals must be submitted by email in microsoft word format. My client's proposal will be submitted in ms word format, however, the proposal will include attachments which are in a pdf format. Please confirm that the use of pdf attachments to the proposal is acceptable."

Answer:

To clarify the format for responses: All responses are expected to be provided in MSWORD as instructed in the RFPS. However, attachments to proposals that cannot be accommodated in MSWORD can be provided in PDF format.
