Dear Reader:

The 2011 calendar year was another successful year for the nation in the reduction of fatal motor vehicle crashes. It is encouraging to see that nationwide, fatalities were down for the sixth straight year. In 2011, New Jersey recorded 586 fatal collisions that resulted in 627 deaths. This is an increase of 56 fatal collisions and 71 fatalities, averaging out to 1.71 motor vehicle fatalities per day. The law enforcement community, and certain non-profit organizations, will remain committed in their respective traffic and public safety efforts. Through enforcement and education of the motoring public, we will continue to work toward the reduction of motor vehicle fatalities on our roadways.

As traffic-related deaths continue to be the leading cause of accidental deaths in New Jersey and the nation, we must continue our efforts in traffic safety awareness. In 2011, the recorded nationwide death toll on our roadways was approximately 32,310 fatalities. This is an approximate 1.7% decrease from 2010. In addition, it is approximately 10,398 fewer deaths than were recorded 5 years ago in 2006.

On the following pages, you will find statistics concerning this past calendar year's fatal motor vehicle crashes. The information was compiled by the Fatal Accident Investigation Unit within the Division of State Police. This report constitutes a detailed look at the causes and results of fatal crashes throughout the state during 2011. With the continued efforts and cooperation of the public, and federal, state and local agencies, I am convinced that our traffic safety record will improve in the years ahead.

Sincerely,
