Midtown Bus Terminal Replacement

Building a New, World-Class Midtown Bus Terminal

From eyesore to eye-popping. From antiquated to state-of-the-art.

The Port Authority is redeveloping the Midtown Bus Terminal, delivering to commuters and residents of the bistate region a state-of-the-art, reliable and efficient connection among our communities.

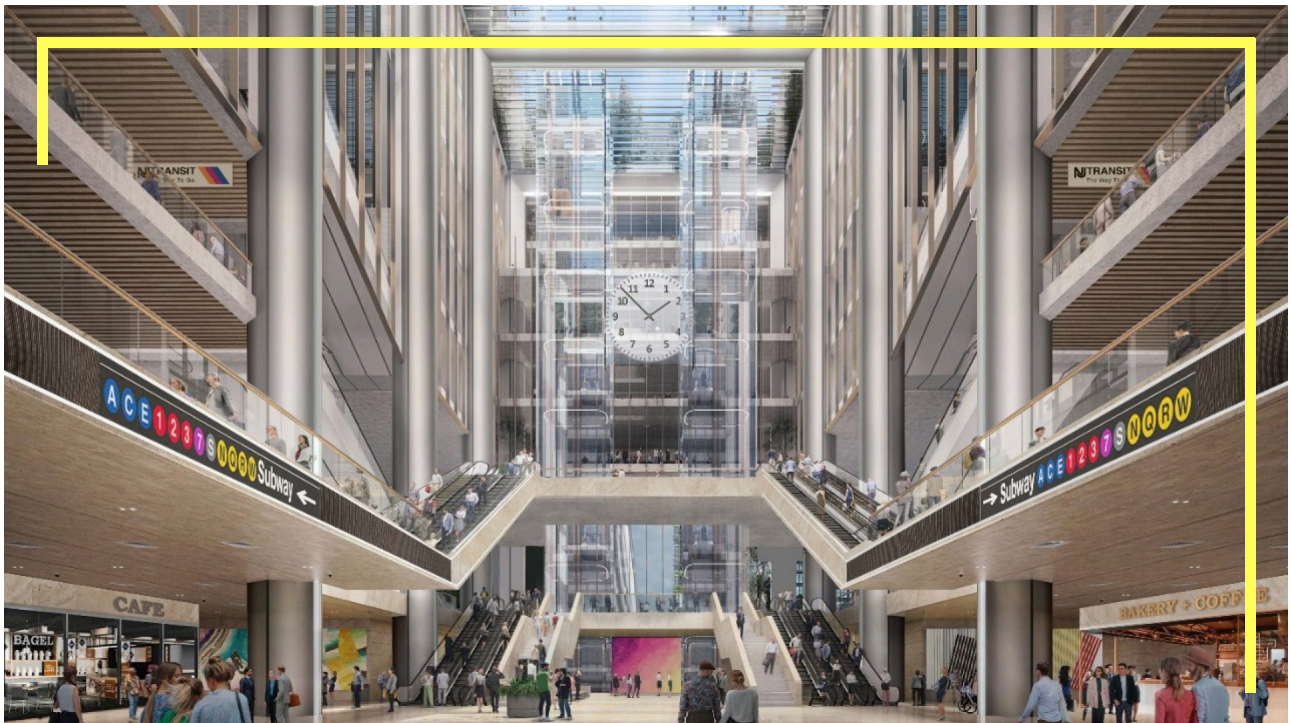

The new facility will include a stunning 2.1-million-square-foot main bus terminal with a light-filled atrium entrance, a separate bus storage and staging building, and new ramps leading directly into and out of the Lincoln Tunnel. It will add capacity and meet projected commuter growth, provide a best-in-class customer experience, enhance the surrounding community, and will be designed to be net zero emissions, serving all-electric buses and implementing cutting edge technology throughout. At the end of construction, 3.5 acres of publicly accessible green space will be created on Port Authority property.
