

iii. Identified with a durable cap, disc, or shiner bearing the name of the surveyor or firm responsible for setting the monument.

8. In the event a monument as specified in (d)7 above is impracticable to install due to physical conditions, the surveyor shall install the most appropriate material necessary to establish permanent, metal detectable monumentation.

9. In the event it is impossible to set a monument as specified in (d)7 above at the prescribed control points, an offset monument shall be set bearing a plate stamped with the word "offset."

10. In all cases listed in (d)8 and 9 above, the surveyor shall acknowledge in the monument installation certification, use of substituted material and/or the use of offset monumentation. Proper instrument sights shall be established and complete offset data shall be recorded with the monument certification to the municipality.

(e) A plat, also referred to as a plan of survey, shall be prepared either by the licensed professional land surveyor or under the supervision of the licensed professional land surveyor. Such plat shall show all matter relevant to a complete and clear exposition of the property.

(f) The items that must always be shown are:

1. Title block complying with N.J.A.C. 13:40-8;
2. The State, county and municipality in which the property is located and specific data as provided by the owner identifying the property or other pertinent identifying data as deemed appropriate by the surveyor, including block, lot number and address;
3. North arrow, identifying the horizontal datum of the survey (for example, NAD27, NAD83, magnetic, deed book and page, etc.) and scale;
4. The point of beginning;
5. Metes and bounds of the property in question; all measurements are to be indicated in feet and decimals of a foot except when legal requirements or professional custom and usage require another form of measurement;
6. Property corner markers, both found and set, and the relation of existing markers to the property corner or, if appropriate, to the boundary lines;
7. Street and street names and widths when such streets abut or adjoin the property in question. If the street is not open, the survey should so indicate;
8. Encroachments of structures both on the premises in question and/or adjoining properties;
9. Fences, tree rows, hedges, streams, ditches, building locations, easements and any physical occupation influencing property line determination;

10. In all cases, survey work shall be performed in accordance with currently accepted accuracy standards, but such accuracy standards may be limited by contractual agreements. Such limitations shall be appropriately noted on the final drawing.

(g) Notwithstanding any other provisions of these rules to the contrary, the following items may be omitted where contractual agreements with the client so provide:

1. Areas of established city lots or recorded subdivision map lots, unless the area is recited in the record deed of the property in question;
2. Fences and streams and ditches, unless such fences, streams and ditches are on or in close proximity to the property lines or otherwise affect the property lines in question;
3. Sidewalks, driveways, walkways or other traveled ways, unless such ways affect the property lines in question;
4. Utility lines, easements of right-of-way lines, except when recited in the record deed or when such utility lines, easements of right-of-way lines affect the use of adjacent properties or the property in question;
5. Location and type of building and other structures on the property in question; and
6. Metes and bounds description of the property.

(h) When any of the various items listed in (g) above are omitted, the plat or plan of survey should indicate the specific omitted items in a factual way that such omissions are made.

(i) Upon completing the plat or plan of survey, the licensed professional land surveyor shall provide the client an agreed upon number of prints of the survey drawing. Such print copies of the plat or plan of survey shall bear the signature and impression seal of the licensed professional land surveyor. Certification by the licensed professional land surveyor may be given when requested by the client.

1. The licensed professional land surveyor shall also supply a description of the property surveyed when the survey is to be used for conveyancing (title transfer or mortgage). This description must be suitable for use in a deed. The description shall be by metes and bounds or by reference to a filed plan, block and lot. If a filed plan, block and lot is utilized, the entire title of the filed plan shall be set forth along with, the filed plan number and the date on which the plan was recorded in the office of the County Recording Officer. If there is any deviation from the filed plan to the completed survey, a description by filed plan, block and lot, shall not be utilized. The deed description shall be consistent with both the survey provided and the documentation upon which the survey was based and shall be written in such a manner as to define the boundary lines of real property unambiguous and sufficient for a surveyor to lay it out on the ground. This description may be re-

produced on the survey plat itself or may be by separate document. If the deed description is provided on the survey plat, it must be titled "Deed Description." If a separate document is provided, the description shall be signed and sealed by the licensed professional land surveyor responsible for its preparation.

2. The term "referenced" shall not be utilized when referring to a filed plat when it is intended to meet the requirements of supplying the deed description listed in (i)1 above. It shall also be improper to use or reference a municipal tax map to comply with the requirements for deed description by reference to a filed plat. A tax map shall not be deemed a filed plan for the purpose of title transfer.

(j) No reproductions or photographic copies of a plan or survey shall be offered or issued by a licensee for use in any court, land transaction or filing in any public agency or office unless such copies shall bear the signature and impression seal of the licensed professional land surveyor.

(k) Tax assessment maps must be prepared by a licensed professional land surveyor, who is obligated to prepare such maps in full compliance with the legal requirements pertaining to such maps.

(l) Failure to comply with the provisions of this subsection and with applicable State laws and local ordinances may subject the licensed professional land surveyor to disciplinary action.

(m) Subdivision plats, whether classified as major or minor, preliminary or final, shall be prepared by a licensed professional land surveyor and shall be based on a new or existing current and accurate survey of the property being subdivided.

1. The licensee shall provide appropriate survey information, as set forth above, to permit a subsequent licensed professional land surveyor to accurately lay out newly described lots.

2. If a newly described lot will be adjacent to or abutting a perimeter line, the licensee shall ensure that the perimeter line is accurately established on the ground.

3. In all instances, including where deeds are used to record minor subdivisions and/or where an existing plat or plan of survey is used, only the licensee who prepared the boundary map on which the subdivision is based may provide the certification on the subdivision plat that the boundary survey is accurate and was prepared under his or her supervision, as required by the Map Filing Law, N.J.S.A. 46:23-9.11(n), and in accordance with N.J.A.C. 13:40-9, Responsible Charge of Engineering or Land Surveying Work.

(n) Maps prepared to show topographic data or planimetric data, which also delineate property lines or street right-of-way lines thereon shall be prepared by a licensed professional

land surveyor and shall identify the vertical datum and include reference to a benchmark on the site. Such survey information may be transferred to construction plans or other drawings if duly noted as to the date of the survey, by whom, and for whom it was prepared.

1. Advise the ultimate user in writing as set forth in (c) below of the impact of signing the corner marker waiver. Such advice shall include, but not be limited to:
