General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

The calculated waste water flow generated from the proposed Wawa is 2,722 gpd. (5,773 square feet X 0.125gpd) + (16 fueling pumps X 125gpd) = 2,722gpd discharge. Effluent will be directed to Two (2) subsurface disposal beds with a total area of 4,382 square feet. (68.5 feet X 32 feet) X 2 = 4,382 square feet. All waste water generated from this facility will be sanitary only. All Residuals generated at this site will be managed off-site at an approved residuals management facility.

The prepared MRP is intended to conform to a Program 1 residual (N.J.A.C. 7:14A-20.7(h)1) based on the level of pollutant concentration, pathogen reduction and vector attraction reduction achieved. Program 1 MRP is suitable for distribution and marketing as a soil amendment or fertilizer. The comment period ends 30 days after publication in the Asbury Park Press newspaper.
Warren County District Landfill NJPDES Permit No. NJ0163333 SIU	500 Mt Pisgah Ave. Oxford, NJ 07863 Warren County	Gary Torres Bureau of Pretreatment and Residuals (609) 633-3823	Belvidere Sewage Treatment Plant (STP) and Hackettstown Municipal Utilities Authority (HMUA) STP	This action is an emergency permit to allow Warren County District Landfill (WCDL) to discharge industrial wastewater for treatment at the Pequest River Municipal Utilities Authority (PRMUA) Belvidere STP and the Hackettstown Municipal Utilities Authority (HMUA) STP for six months. Leachate, a wastewater generated when stormwater seeps through solid waste, is presently collected and pumped to PRMUA Oxford STP under a separate permit, NJ0102598. However, the Oxford STP was unable to consistently treat the increasing ammonia concentrations in the leachate adequately. Both Belvidere STP and the Hackettstown Municipal Utilities Authority (HMUA) STP have treatment equipment specifically designed for removal of ammonia. Therefore an emergency permit was issued to allow leachate to be transported to two other sewage treatment plants for treatment during the time needed for design and construction of additional treatment equipment at WCDL and/or at the PRMUA Oxford STP. Design of the treatment equipment is underway. However, the Department only received data needed to develop conditions for renew of permit NJ0102598 on September 25, 2006, and has issued a second emergency permit under NJ0163333 to allow time to complete the renewal process with appropriate changes to protect Oxford STP. The comment period ends 30 days after publication in the Express newspaper.
Sussex County MUA – Upper Wallkill Valley NJPDES Permit No. NJ0109525 Residuals Permit (Category V)	34 South Route 94 Lafayette, NJ 07848 Sussex County	Jim Lunski Bureau of Pretreatment and Residuals (609) 633-3823	N/A	This draft NJPDES Residual Renewal Permit Action contains the conditions necessary to regulate the operation of an existing residuals composting facility with a maximum capacity of 5.9 dry metric tons per day and the distribution of the resultant marketable residual product. The prepared marketable residual product (MRP) is intended to conform to a Program 1 residual (N.J.A.C. 7:14A-20.7(h)1) based on the level of pollutant concentration, pathogen reduction and vector attraction reduction achieved. Program 1 MRP is suitable for distribution and marketing as a soil amendment or fertilizer. The comment period ends 30 days after publication in the New Jersey Herald newspaper.
