Dear Reader:

The year 2009 was another successful year for the State of New Jersey in the reduction of fatal motor vehicle crashes. Although the decrease in motor vehicle fatalities wasn't as drastic as between 2007-2008, it was still encouraging to see that the fatalities were down for the third straight year. In 2009, New Jersey recorded 550 fatal collisions that resulted in 584 deaths. This is a decrease of 5 fatal collisions and 6 fatalities, averaging out to 1.60 motor vehicle fatalities per day. The New Jersey State Police, as well as all law enforcement agencies and certain non-profit organizations, are committed in its effort, through enforcement and education of the motoring public, to continue the reduction of motor vehicle fatalities on our roadways.

As traffic related deaths continue to be the leading cause of death in New Jersey and the nation, we, as a society, must continue our efforts in traffic safety awareness. In 2009, the nationwide death toll recorded on our roadways was approximately 33,960. This is nearly a 9% decrease from 2008. In addition, it is approximately 10,000 less deaths than what was recorded 5 years ago in 2004!

On the following pages you will find statistics of the fatal motor vehicle accident records compiled by the Fatal Accident Investigation Unit of the Division of State Police for 2009. This report constitutes a detailed look at the causes and results of fatal crashes throughout the state during 2009. With the continued efforts and cooperation of the public, federal, state and local agencies, I am convinced that our traffic safety records will continue to improve in the years ahead.

Sincerely,
