*The Honorable Jon S. Corzine
Governor of the State of New Jersey*

*Honorable Members of the Senate and
Assembly of the State of New Jersey*

Dear Governor and Members of the Legislature:

Pursuant to N.J.S.A. 52:17B-5.5, I herewith submit, for your information and review, the fortieth annual report of crime in New Jersey. The annual report is based on crime statistics submitted to the New Jersey Uniform Crime Reporting System by every New Jersey law enforcement agency for the year 2007.

Effective law enforcement requires accurate crime statistics in order to identify the extent, type, and location of criminal activity. Criminal Justice administrators and planners have long recognized the Uniform Crime Reporting Program as the vehicle to accomplish this objective.

The success of the Uniform Crime Reporting System during 2007 could not have been realized without the cooperation extended by each of the 549 law enforcement agencies of the State, the New Jersey Chiefs of Police Association, and the County Prosecutors Association.

It is in the interest of more effective law enforcement to the eight million residents of New Jersey that the fortieth annual report is submitted.

Respectfully,

A handwritten signature in black ink, appearing to read "Anne Milgram".

SYNOPSIS: UNIFORM CRIME REPORTING PROGRAM

THE NEW JERSEY UNIFORM CRIME REPORTING SYSTEM

DEFINITION

The New Jersey Uniform Crime Reporting System is based upon the compilation, classification, and analysis of crime data reported by all New Jersey police agencies in accordance with the regulations prescribed by law.

DEVELOPMENT

The New Jersey Uniform Crime Reporting Law (N.J.S.A. 52:17 B-5.1 et. seq.) was enacted on May 16, 1966, and became effective January 1, 1967. Responsibility for the establishment, direction, control, and supervision of the Uniform Crime Reporting System was assigned to the State's Attorney General. The Attorney General authorized the New Jersey State Police to collect and collate the crime data received from law enforcement agencies within the state.

At the request of the Attorney General, the New Jersey State Police researched crime systems in operation throughout the nation in order to establish a firm foundation from which to grow. The most logical approach was the paralleling of the federal crime reporting system. There was a distinct need for a compatibility feature that would enhance both the state and federal systems through the data entry at both levels.

This compatibility has, as its nucleus, the standard classification of offenses established by the Federal Bureau of Investigation. Regardless of the label placed on a particular offense in the various states' systems, *i.e.*, felony, misdemeanor, disorderly persons, if the incident meets the federal standard it will be reported as an offense.

The terms "crime" and "offense" are used interchangeably in this publication, and refer to an act committed in violation of a law which is reportable under the guidelines of the Uniform Crime Reporting Program.

The New Jersey State Chiefs of Police Association has served the program in an advisory capacity since 1966. The contributions of this association have proved valuable to the success of the program. This association works in close harmony with the State Police as a means of improving the quality of reporting through recommended program standards, policies and procedures.

COLLECTION OF CRIME DATA

As required by statute, all law enforcement agencies in the state submit monthly and annual summary crime reports to the program. During the year 2007, offense and arrest data were received from 475 full-time municipal police departments, one (1) part-time municipal police departments, and the New Jersey State Police (acting as the reporting agent for the 76 municipalities without local police services). In addition to the 475 full-time municipal police departments there are 14 police departments contracted by other municipalities.

In addition to the above agencies, arrest data was received from the state's 21 prosecutors, sheriffs' departments, one (1) county police department, and three (3) county park police departments. In order to incorporate all New Jersey law enforcement agencies under the system, the ten (10) other state agencies with law enforcement responsibilities, excluding state police, as well as 14 college campus police departments were incorporated within the program. Collectively, a total of 547 law enforcement agencies submit the reports to the New Jersey State Police.

METHOD

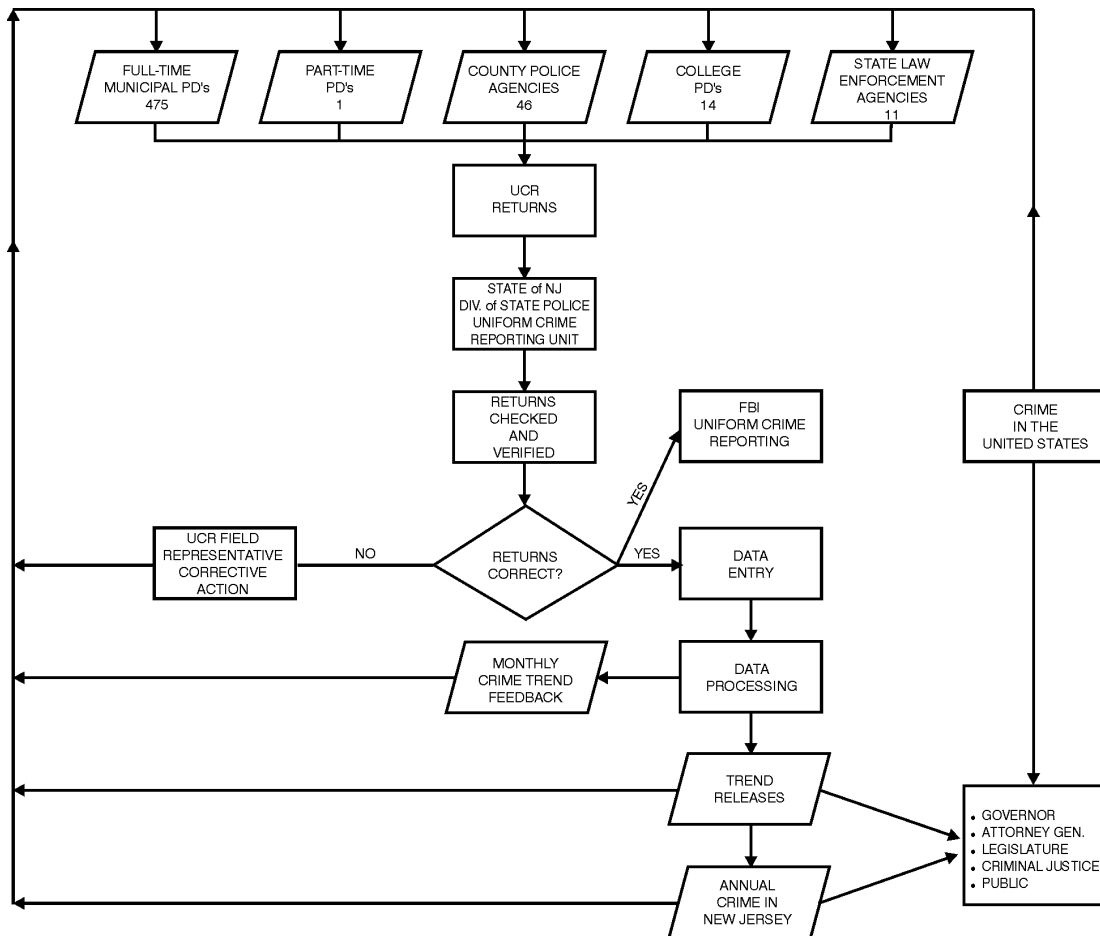

A State of New Jersey Uniform Crime Reporting Guide has been distributed to all contributors. It outlines reporting procedures in detail, and is complete to the extent of providing examples and illustrations. Field representatives provide additional instruction and clarification when required.

All reported offenses are related to the municipality in which they occur rather than to the agency which may conduct the investigation. The clearance is credited to the municipality in which the offense occurred. Each contributing agency is responsible for compiling its own reports. Law enforcement agencies report the number of known offenses according to the following categories: Homicide (Murder and Manslaughter), Rape, Robbery, Aggravated Assault, Burglary, Larceny-Theft, Motor Vehicle Theft, and Arson. The "Crime in New Jersey," and the Federal Bureau of Investigation's "Crime in the United States" publications exclude manslaughters, simple assaults, and arsons from the "Index" offenses. These are further referred to as "violent" and "nonviolent" crimes as

graphically illustrated in Section VII under "Municipal and County Offenses and Demographic Data," and Section II, "State Summary and Offense Analysis."

All reported offenses are compiled from a record of all criminal complaints received by police from victims or other sources, or discovered by the police during routine operations. Complaints determined to be unfounded are eliminated from this count. Analytical data pertaining to specific crime categories are also reported, *i.e.* total adult and juvenile arrests made during the month. Police killed or assaulted and arson data are also collected monthly. Police personnel information is submitted on an annual basis.

FLOW CHART OF UCR REPORTS

VERIFICATION PROCESSES

The uniformity and accuracy of data gathered from contributors must be safeguarded through various ways. Although guidelines and instructions are provided to each contributor, they are not the panaceas for the accuracy being sought.

The reports received by the Uniform Crime Reporting Unit are recorded and examined for mathematical accuracy and reasonableness of the interpretation of the offense classifications. Improper classifications, changes in reporting procedures, or actual change are identified in this manner. Errors of a minor nature are corrected by direct telephone contact with the contributors, while all other errors are resolved through a personal visit by a field representative to the reporting agency.

Further verification is accomplished through the analysis of statistical data accrued from the reports submitted. Fluctuations in crime rates noted from previous submissions are verified by the field representatives through their municipal counterpart.

FUNCTION

Police executives make use of this data in administrative, planning, and operational determinations for their respective jurisdictions. The State Police Uniform Crime Reporting Unit provides assistance to municipal police agencies through the individual analysis of statistics as they relate to specific crime problems within their jurisdiction. Police executives also use this data for identifying personnel and equipment needs. The Uniform Crime Reporting Program requirements not only have increased police efficiency in reporting and record keeping areas, but have helped police in their day to day operations.

Although the data collected on the offenses of manslaughter and simple assault are not presented in the annual report, they are required for the federal system. Data for these offenses is processed and provided for research purposes.

PROFILE OF NEW JERSEY

New Jersey is situated between the major industrial markets of New York and Philadelphia. The geographic location of the state has been a major factor in its growth and development. The many miles of interstate roadways within the state connect New Jersey directly with the neighboring states of New York, Pennsylvania, and Delaware. Additionally, New Jersey roadways accommodate large volumes of traffic as a corridor for commerce and travelers from throughout the United States.

The state is geographically composed of 21 counties which contain 566 incorporated municipalities. Nationally, New Jersey, although 46th in size, ranks tenth in population and first as the most densely populated state in the country. In addition to this density of 1,163.9 persons per square mile, New Jersey still has many miles of rural areas and sparsely settled communities. The areas of density are concentrated around the major urban centers and those venues most accessible for commuting.

Area in Square Miles	2006 Estimated Population	2000 Census Population	2006/2000 Percent Change	2006 Density per Square Mile	2000 Density per Square Mile
7,495.73	8,724,560	8,414,350	3.7	1,163.9	1,122.6

STATE, COUNTY AND MUNICIPAL PROFILES

The presentation of state, county and municipal profiles in this section is offered for the purpose of projecting, for the consideration of the reader, a group of recognizable factors which may affect the amount and type of crime that occurs from community to community. Selection of the areas of information to be related to individual municipalities was based on the immediacy and completeness of data available.

Population statistics presented here, and throughout this publication, were obtained from the Department of Labor, Division of Labor Market and Demographic Research.

Character of municipalities by urban, suburban and rural classifications, and square miles, were initially compiled by the Department of Community Affairs, Division of State and Regional Planning, Bureau of Statewide Planning, and will continue to be used for comparative purposes. Following is a list of categories used and a description of each category.

- URBAN CENTER Densely populated with extensive development.
- URBAN SUBURBAN Near an urban center but not as extremely developed and more residential areas.
- SUBURBAN Predominantly single family residential, within a short distance of an urban area.
- RURAL Scattered small communities and isolated single family dwellings.
- RURAL CENTER High density core area with surrounding rural municipalities.

Certain other socioeconomic factors present in varying degrees in all communities may have an influence on resulting crime rates. Obvious difficulties in the identification, documentation and measurement of these factors, however, precluded their application in this report.

Those factors presented were listed to affirm their existence within the county and community and to provide a base for consideration in the evaluation of that community's crime experience.

RESORT MUNICIPALITY CRIME RATES

On July 10, 1998, section 4 of P.L. 1966, c37(C.52:17B-5.4) was amended to require the Uniform Crime Report to include, in addition to the regular statistics, an alternative calculation that takes into account the seasonal population of resort municipalities.

The Department of Labor has been mandated to determine which municipalities qualify as resort municipalities and certify their annual mean population (which includes seasonal population estimates.)

CRIME FACTORS

In order to provide a meaningful statistical profile of crime within the State of New Jersey, each law enforcement agency must provide the Uniform Crime Reporting Unit with data that depicts specific crimes that are occurring within their jurisdiction. There is a need for compatibility with the National Uniform Crime Reporting System and, therefore, categories of offense classifications used within the state are identical with those of the National System. This results in equitable conclusions being drawn from the data submitted.

Reported Part 1 offenses and arrests are recorded in the municipality where they occurred, regardless of the outside investigative agency which may investigate, arrest, or otherwise dispose of the case.

The factors which influence crime rates are dependent upon characteristics of the community. When attempting to interpret the crime statistics presented herein, one should be aware of the social structure and factors that lead to or cause criminal behavior.

Crime rates in this publication are based on the stable population of the municipality. Municipalities that experience high population increases due to special events or commuters or with high seasonal populations, may indicate a higher crime rate per one thousand than may be normal for a municipality their size. A separate section provides statistics for resort municipalities using crime rates which include seasonal populations.

Set forth below are some factors which, by type and volume, will affect the crime rate that occurs from place to place:

- Density and size of the community population and the metropolitan areas of which it is a part.
- Composition of the population with reference particularly to age, sex and race.
- Economic status, including job availability, and mores of the population.
- Relative stability of population, including commuter, seasonal, and other transient types.
- Climate, including seasonal weather conditions.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (*i.e.*, prosecutorial, judicial, correctional, and probational).
- Crime reporting practices of the general citizenry.
- Attitudes of the public toward crime reporting.
- The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Cooperation of adjoining and overlapping police agencies.

THE POLICE POINT OF VIEW

The New Jersey State Police Uniform Crime Reporting Unit surveyed various police agencies of the state, attempting to ascertain their opinion concerning factors contributing to the increase or decrease of specific crimes in their municipality. One of the goals of the Uniform Crime Reporting Unit is to assist police in reducing crime by first identifying its extent, type and location. The following viewpoints are offered with the expectation of reaching this goal.

ROBBERY

Decreases:

- More stringent sentencing requirements under the State Criminal Code.
- Advanced technology in communications has led to increased exchanges of information between police departments.
- Highly visible foot patrols being deployed in commercial areas and densely populated residential areas.
- Use of Anti-crime Unit in high robbery areas.

Increases:

- Resort areas have shown an increasing seasonal population.
- Our highly mobile society provides easy access to areas which were previously difficult to reach.

BURGLARY

Decreases:

- Better deployment of police personnel, such as highly visible foot patrols in high density crime areas, and increased patrols during probable time and at probable locations of burglaries.
- More stringent sentencing requirements under the State's Criminal Code have been a deterrent.
- Crime Prevention Programs are being stressed in many communities and citizens have been taking a more active part by reporting suspicious persons or circumstances.

Increases:

- Extreme increases in population in certain areas have led to new housing in suburban and rural areas.
- Husband and wife are both working; leaving homes frequently unoccupied for long periods of time.

LARCENY

Decreases:

- Public awareness programs contribute to the decrease in thefts from parked vehicles.
- Improved or additional lighting deters criminal acts from occurring in parking areas.
- "Safe Streets" Programs and Anti-crime Units have been established in many communities.

Increases:

- Shoplifting is a theft that police have little or no control over. Store security forces are under the control of the store administration, and their policies vary from strict enforcement, arrest and prosecution, to only a warning. Policy change has been directed toward prosecuting the offenders rather than warning them, causing to some extent an increase in the number of shoplifting offenses reported to the police.
- Certain types of property such as CD players, radar detectors and radios are popular and present resale opportunities.
- Youth gang activity on the increase resulting in thefts from motor vehicles.

MOTOR VEHICLE THEFT

Decreases:

- Stronger sentencing of career criminals has been effective.
- Modern ignition systems and anti-theft devices act as a deterrent.
- Better lighting in parking lots has helped decrease motor vehicle thefts.

Increases:

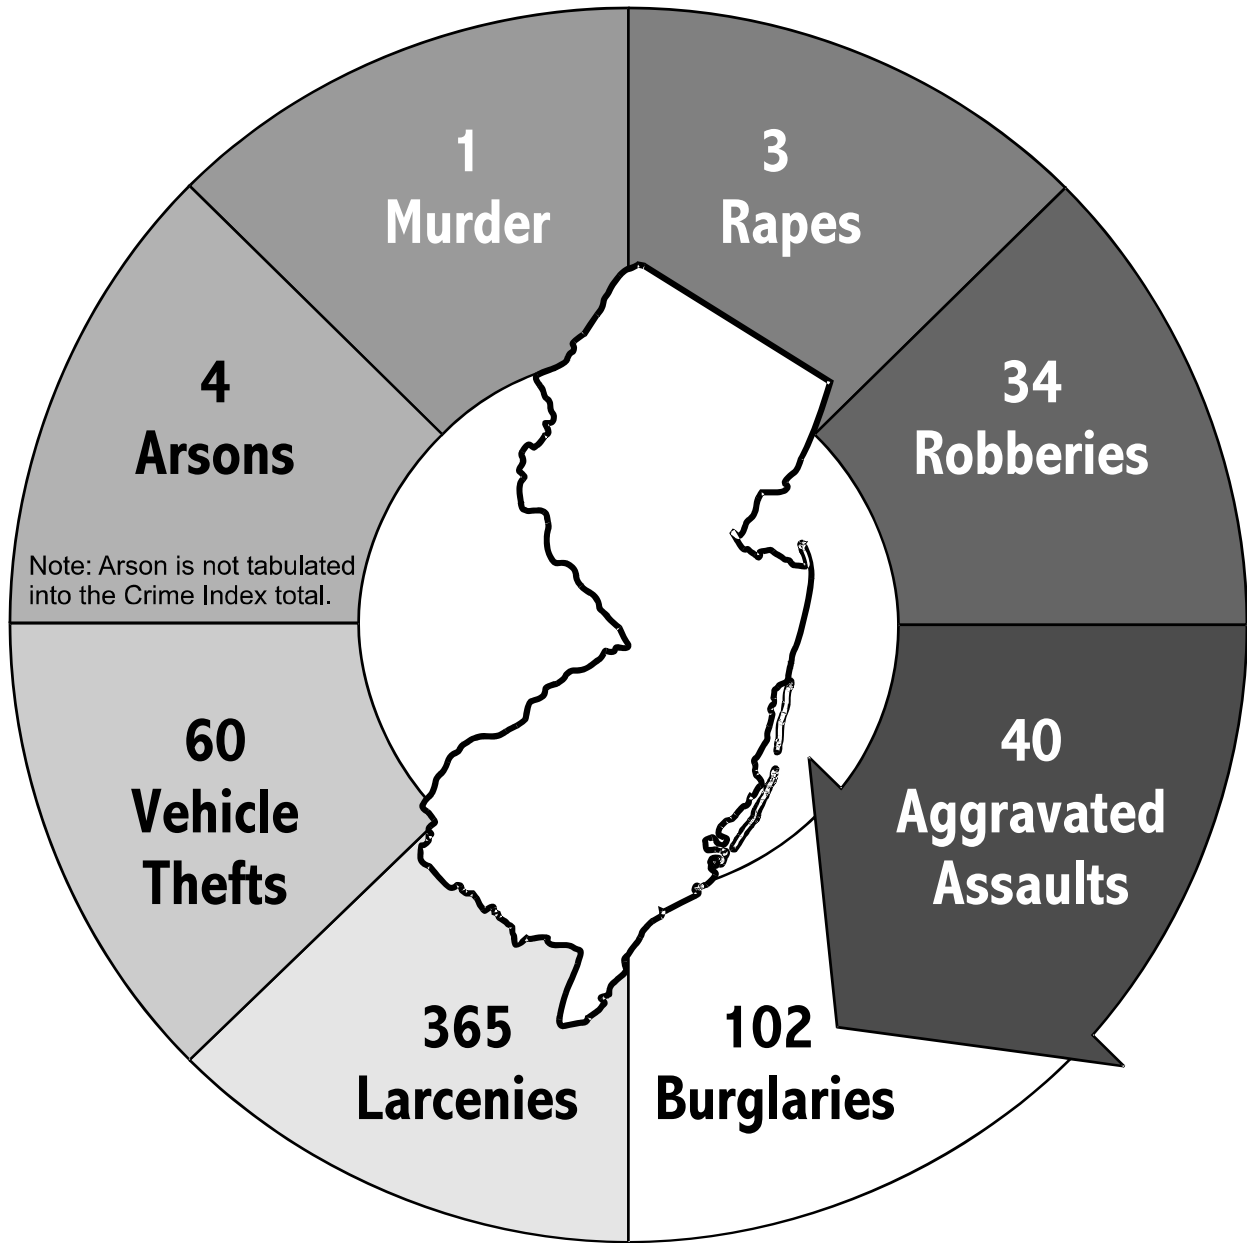

- The tremendous replacement cost of auto parts has contributed significantly to the increase in motor vehicle thefts for the purpose of auto parts resale.

MURDER

Definition

Murder is defined as the unlawful killing of a human being with malice aforethought. Any death due to a fight, argument, quarrel, assault, or commission of a crime is included. This Index offense is counted by police on the basis of their investigation without regard to findings of a court, jury or the decision of a prosecutor. Attempts to kill, are scored as aggravated assaults and not as murder. Suicides, accidental deaths, negligent manslaughters, and justifiable homicides are not counted, nor reflected in the murder classification.

VOLUME/RATE/TREND

- There were 381 murders reported to law enforcement agencies of the state in 2007, an 11 percent decrease compared to the 427 murders reported in 2006.

CRIME INDEX FOR POPULATION GROUPS – 2007

The presentation of crime statistics by population groups was made for the purpose of projecting, for consideration, the relative crime experience of communities of varying populations. Although the individual municipalities within the various groups may be geographically separated, their inclusion into a specific group was predicated by the similarity in population with the other municipalities within the group. Municipalities within the same group may differ widely when all factors are considered, but they do share the common bond of population size. The grouping of communities in this manner allows recognition of variances in the crime volumes, rates and clearances between the established groups.

Set forth below are the established municipal groupings as used in this section:

CRIME IN THE CITIES

CRIME IN THE CITIES

This section deals with serious crimes reported in the large urban cities of the state. These cities represent 19 percent of the population and historically account for one third of the reported Crime Index of the state.

This analysis involves the latest ten-year period 1998-2007 and endeavors further to identify crime trends in these urban areas.

The cities included in this analysis were initially categorized as urban municipalities (i.e., densely populated with extensive development) by the New Jersey Department of Community Affairs, Division of State and Regional Planning, Bureau of Statewide Planning, and will continue to be used for comparative purposes.

The criteria used in the selection of these cities were (1) classified as urban character and (2) have a population of 50,000 or more inhabitants.

For further comparative analysis, the urban cities were subdivided into two distinct groupings.

Group number one consisted of the state's six largest urban centers with populations of 80,000 or over and is categorized as "Major Urban."

The second group included the "Major Urban" and the additional urban communities with populations of 50,000 or more inhabitants, and is referred to as the "Urban 15."

"MAJOR URBAN"

- Camden City
- Elizabeth City
- Jersey City
- Newark City
- Paterson City
- Trenton City

"URBAN 15"

Distribution:

- Six major urban centers—Camden, Newark, Jersey City, Trenton, Paterson and Elizabeth—collectively represent 11 percent of New Jersey’s total population. These same urban centers, during the period 1998 through 2007 accounted for 22.1 percent of the state’s total crime.
- “Major Urban” centers from 1998 through 2007 accounted for 38 percent of all violent crime and 20 percent of the nonviolent crimes in the entire state.
- The 15 urban municipalities represent 18 percent of the state’s total population.
- “Urban 15” municipalities accounted for 33 percent of New Jersey’s total Crime Index. Violent crime was 53 percent of the state total, while nonviolent crime was 30 percent of the state total during this ten-year period.
- Sixty-five percent of all reported murders occurred in the “Urban 15” cities during this ten-year period.

STREET CRIME

There has never been a clear-cut definition for street crime within the criminal justice system. The nation's clearinghouse for the collection and dissemination of criminal statistics, the Federal Bureau of Investigation, has no criteria in the categorization of specific crimes to be designated or defined as "street crimes." More and more, this media term has been confused with the violent crime group of murder, rape, robbery, and aggravated assault.

Although any particular crime can and does occur on the street, this analysis, because of reporting constraints within the Uniform Crime Reporting System, is limited to defining street crimes as those offenses which occur, or are most likely to occur, on streets, highways, parking lots, etc.. These crimes include highway robbery, purse-snatching, theft from autos, theft of auto parts and accessories, theft of bicycles, and motor vehicle thefts. All are crimes against property and only one, highway robbery, falls in the violent crime group.

- During the ten-year period 1998-2007, the "Urban 15" cities accounted for 41 percent of the street crimes in the state.
- Seventy-one percent of all highway robberies in the state occurred in the "Urban 15" cities during the ten-year period.
- More than half of all motor vehicle thefts during the survey span occurred in these 15 urban municipalities.
- Thirty-one percent of all purse-snatchings during the survey span were perpetrated in the "Urban 15" cities.
- In 2007, Motor Vehicle Theft and Highway Robbery were at their lowest levels in this ten-year period.
- The accompanying table reflects percent distribution of street crime for the "Urban 15" cities for the years 1998-2007.

NEW JERSEY MUNICIPAL-COUNTY OFFENSE & DEMOGRAPHIC DATA

- All crime rates are based on permanent, year-round populations. Comparisons of crime rates between individual municipalities should not be made without giving major consideration to the volume of seasonal population, transients, tourists, and labor forces.
- All offenses are recorded in the municipality of occurrence, regardless of the outside investigative agency, i.e., Federal, State, County, College Campus Police.
- + Crime rates were not computed for municipalities with population less than 100.

RESORT MUNICIPALITIES

As required by P.L. 1998, c. 50, annual mean population estimates for resort municipalities in New Jersey have been used in the preparation of per capita crime statistics.

These estimates were prepared based upon the methodology prescribed in P.L. 1998, c. 50 using the latest available municipality estimates of year-round population from the U.S. Bureau of the Census. Please note that these resort population estimates should only be used for crime statistics purposes. While they fulfill the requirements of the law, the seasonal components of these estimates are not a complete measure of seasonal population because they include only those living in rental housing units or in vacant year-round housing. Not counted are the many day visitors and persons who occupy campgrounds, hotels, motels or bed and breakfast establishments or who stay with friends or relatives.

+ Crime rates were not computed for municipalities with populations under 100.

POLICE EMPLOYEE DATA

The Uniform Crime Reporting Program of New Jersey incorporates the collection of pertinent data relating to the police of the state. Information regarding police employees strength and trends are discussed in this section.

Individual listings of full-time state, county, university and college police departments are shown in tables within this section. Listings of municipal police departments will be found in Section VII.

The determination of police strength for any given area or municipality should be subject for serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. For example, the increased need for police service in a municipality which has a highly mobile or seasonal population differs from a municipality which has a relatively stable population. Some other factors, discussed elsewhere in this publication, relate to size, density of population, geographic location, character, and proximity to metropolitan areas. The tables and charts shown in this section should not be interpreted as recommended strength for any given municipality.

TOTAL POLICE EMPLOYEES

Total police employees are defined as the total number of full-time police officers and civilian police employees (clerks, dispatchers, mechanics, etc.) employed by all law enforcement agencies in the state.

- During 2007, there were 53,136 full-time police employees in New Jersey. This represents an increase of 1 percent when compared to the 52,531 full-time police employees in 2006.
- The number of full-time police officers increased 1 percent, from 39,723 in 2006 to 40,000 in 2007.
- The number of full-time civilian employees increased 3 percent, from 12,799 in 2006 to 13,136 in 2007.
- Seventy-five percent were sworn officers and the remaining 25 percent were civilian employees.

MUNICIPAL POLICE EMPLOYEES

This category consists of the number of police employees, including civilian personnel, employed full-time by municipalities of the state.

- During 2007, there were 26,266 municipal police employees, an increase of 1 percent compared to the 25,892 in 2006.
- For every 1,000 inhabitants of the state there were 3 municipal police employees.
- Essex County reported the largest increase in municipal police employees, an increase of 5 percent (157 employees).
- Both Atlantic and Cape May Counties recorded the highest police employee rate; 4.5 per 1,000 population; (this rate is computed on the static population and does not take into account the large influx of seasonal and recreational population).
- Hunterdon County recorded the lowest police employee rate of 1.4 per 1,000 population.

MUNICIPAL CIVILIAN POLICE EMPLOYEES

The personnel of each department differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. Employing civilians in police departments to perform clerical duties is in line with the thinking of many police administrators who recommended the use of civilians in this capacity. Thus, freeing the sworn personnel for actual police-related services.

- There were 4,510 municipal civilian police employees in 2007, an increase of 5 percent compared to the 4,306 in 2006.
- Seventeen percent of all municipal police employees were civilians.

MUNICIPAL POLICE OFFICERS

This includes the number of sworn police officers employed full-time by municipalities of the state. The police employee rate per 1,000 population presented here should not be construed as recommended ratios. The determination of police strength for any municipality should be based on the numerous factors that create the need for police services. These factors, as crime, vary in type and degree from place to place. Some examples are: seasonal population, geographic location, density and composition of the population.

- There were 21,756 full-time municipal police officers in 2007; this represents an increase of 1 percent when compared to the 21,586 full-time municipal police officers in 2006.
- The number of full-time municipal police officers was calculated at 2.5 per 1,000 population; this remains unchanged when compared to 2006.
- Sworn officers represented 83 percent of all municipal police employees.
- Atlantic County recorded the largest numerical increase (55) which represented a 6 percent increase of municipal police officers.
- The largest numerical decrease occurred in Essex County, a decrease of (36) municipal police officers, or 1 percent.
- Essex County, with 3.6 police officers per 1,000 inhabitants, recorded the highest rate of full-time municipal police officers.
- Hunterdon County recorded the lowest rate of full-time municipal officers with 1.3 police officers per 1,000 population.

OTHER POLICE (State Agencies)

In addition to the State Police, there are ten other state agencies reporting to the system. These agencies consist of: NJ Forest Fire Service, Department of Corrections, Department of Human Services, Division of Criminal Justice, Division of Fish and Wildlife, Office of Weights and Measures, Palisades Interstate Parkway, Port Authority NY/NJ, NJ Transit Police and New Jersey State Park Police. No rates were computed due to the variations in the types of police services rendered, and their statewide jurisdictions.

- Together, these agencies reported a total of 12,102 full-time employees; a decrease of less than one-half of one percent compared to the 12,143 police employees in 2006.
- There were 8,457 sworn police officers in 2007, a decrease of 1 percent compared to the 8,509 in 2006.
- Seventy percent were sworn personnel, while the remaining 30 percent were civilians.

COUNTY POLICE, SHERIFFS AND PROSECUTORS

The functions of county law enforcement vary widely throughout the state. The operation of one sheriff's department may be limited exclusively to civil areas and the administration of the county jail, or they may be actively involved in criminal matters throughout the county.

County police departments are varied in their activities in that some are responsible for enforcement throughout the county, while others may have as their primary mission the policing of county parklands. The responsibilities of county prosecutors' officers include criminal investigations, trial preparation, court presentation and special probes. Because of the difference in the types of police service rendered, rates for county law enforcement agencies are not presented here.

- County law enforcement agencies reported a total of 9,457 full-time police employees in 2007; an increase of 3 percent compared to 9,172 in 2006.
- There were 6,373 full-time sworn police officers employed by county agencies in 2007. This represents an increase of 3 percent compared to 6,185 in 2006.
- County police agencies reported 3,084 civilian police employees in 2007; an increase of 3 percent compared to 2,987 civilian employees in 2006.
- Sworn personnel accounted for 67 percent while the remaining 33 percent were civilians.

STATE POLICE

The New Jersey State Police is empowered to provide all phases of law enforcement throughout the state. It also renders, upon request, police services to all the law enforcement agencies in the state. No rates are used due to the variations in the nature and extent of the police services performed by the State Police.

- The New Jersey State Police reported 4,514 full-time police employees; a decrease of less than one-half of one percent compared to 4,527 in 2006.
- State Police employed 2,998 officers in 2007, this represented a decrease of 1 percent when compared to 3,037 in 2006.
- The State Police reported 1,516 civilian employees in 2007; an increase of 2 percent over the 1,490 reported in 2006.
- Sworn personnel accounted for 66 percent and civilians represented 34 percent of the total State Police employees.

LAW ENFORCEMENT OFFICERS KILLED & ASSAULTED SUMMARY

POLICE OFFICERS KILLED AND ASSAULTED

The killing or assault of a police officer has a harmful effect on society that reaches far beyond the overt act. Such occurrences constitute an immediate threat to the well-being of the community and serious breach of the internal security of the country. Today a young person who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society they are sworn to protect. This deplorable situation should be a subject of serious concern, for in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers acting in the line of duty is clearly demonstrated by the following information.

POLICE FELONIOUSLY KILLED

VOLUME/TREND

- In 2007, two police officers were feloniously killed while in the performance of their duties.
- On January 7, 2007, Paterson police received a call at approximately 1:30 AM of a shooting at the Broadway Fried Chicken. Paterson police officers arrived to find Officer Tyron Franklin and another man shot inside the restaurant.

Officer Franklin, who was off duty and unarmed at the time, had taken money out of his pocket to pay for food at the restaurant when a man attempted to rob him by taking his wallet. After a brief struggle, the suspect pulled out his weapon and fired several rounds at the officer striking him several times. Another man in the restaurant was also struck and wounded during the robbery. Officer Franklin was pronounced dead at St. Joseph's Regional Medical Center less than an hour later. The assailant fled the scene and was later apprehended after a massive manhunt and investigation.
- On March 3, 2007, Newark police received a call complaining of drag racing on a quiet industrial strip on the eastern edges of Newark. Newark Sgt. Tommaso Popolizio, an East District supervisor, was one of several police officers who responded to the scene to break up the drag racing. Sgt. Popolizio pulled over a suspects car and observed him toss a handgun out the window.

The suspect was arrested and placed alone in a patrol car, but managed to get his handcuffs in front of him and slip through a partition between the front and back seats. The suspect then drove off with the police cruiser, and Sgt Popolizio gave chase in a marked SUV, which collided with the stolen cruiser and flipped over near the gates of the Essex County Jail. Sgt. Popolizio was ejected from the SUV and died of massive head injuries.

The suspect was found shortly after the crash hiding in the tall grass off Doremus Avenue with no shoes and his hands still in handcuffs.

ASSAULTS ON POLICE OFFICERS

Police assault statistics are important to the police administrator who attempts to identify the causative factors of this type of criminal activity. Many factors contribute to police assaults, and circumstances vary from place to place. Identifying specific reasons for these assaults is therefore extremely difficult. The following information illustrates the frequency of these events, and any attempt at analysis of these assaults should include consideration of the unique variables present in each jurisdiction. Due to the broad field of services performed by many state and county police agencies, no assault rates are computed for total police officers.

VOLUME/TREND

- There were 3,006 police officers assaulted in 2007, a decrease of 3 percent when compared to the 3,092 in 2006.

ADDITIONAL ANALYSIS

- Twenty-seven percent (822) of the officers assaulted sustained injury.
- Physical Force, such as hands, fists and feet were used in 87 percent (2,623) of all police assaults.
- Twenty-six percent of police assaults occurred when officers responded to disturbance calls.
- Sixteen percent of the assaults on police officers occurred during the 2-hour period of 10:00 p.m. to 12 midnight.

CLEARANCES

- The police of New Jersey were successful in clearing 95 percent of the assaults directed at them.

ASSAULTS ON MUNICIPAL POLICE OFFICERS

VOLUME/TREND

- A total 2,588 of municipal police officers were assaulted during 2007, a 3 percent decrease compared to the 2,659 assaulted in 2006.
- The assault rate, for every 100 municipal officers, was 7.5, a 39 percent decrease compared to 2006.

ADDITIONAL ANALYSIS

- Twenty-three percent of the municipal officers assaulted sustained injury.
- Physical Force, such as hands, fists and feet were used in 86 percent of all municipal police assaults.
- Twenty-nine percent of the municipal police assaults occurred when officers responded to disturbance calls.
- Attempting Other Arrests accounted for 19 percent of municipal police assaults.

OTHER POLICE OFFICERS ASSAULTED

The following law enforcement agencies are dealt with separately and are not included when computing municipal assault rates; the services performed by these agencies vary greatly from the functions of municipal police agencies.

VOLUME/TREND

- County law enforcement agencies reported 80 officers assaulted with 57 sustaining injury.
- The New Jersey State Police reported 55 officers assaulted with 12 sustaining injury.
- Other state agencies with police powers reported 272 officers assaulted with 157 sustaining injury.
- University and college police agencies reported 11 officers assaulted with 7 sustaining injury.

Section Eleven

DOMESTIC VIOLENCE

INTRODUCTION

The violence within the American domicile has been recognized for decades by elements of government and society with little done to correct the problem. Only recently has this phenomenon begun to receive the attention it deserves. In an effort to understand, identify and treat the incidents of abuse occurring in the home, the State of New Jersey, through its legislature, has provided the means to gain a meaningful insight into this issue.

In 1982, the Domestic Violence Act was instituted to protect battered victims and study the complex problems that spark such aggressive behavior. This legislation also provided the opportunity to identify the causes of violence in the home and put forth a more comprehensive effort to combat the crime of Domestic Violence.

Improvements since the implementation of the Domestic Violence Act are continuing. Pursuant to a change in N.J.S.A. 2C:25-24 enacted June 9, 1999, arrest data is presented by county. Domestic Violence restraining order violations are now captured and reported. Revised investigation and reporting procedures by the police; improved processing of domestic complaints by the courts; mandatory in-service training for police and court personnel have all enabled the victim to come forward and implement the constitutional rights granted to all Americans.

The following pages of narrative and graphics in this chapter are the result of gathered data displaying the complexities of domestic violence found within the State of New Jersey. It is through analysis of this data that, hopefully, the keys to preventing future violence can be found.

DOMESTIC VIOLENCE STATISTICAL SUMMARY

Highlights of the 2007 domestic violence statistics are listed below:

- There were 71,901 domestic violence offenses reported by the police in 2007, a 3 percent decrease compared to the 73,749 reported in 2006.
- Murders decreased 10 percent in 2007 (38) when compared to 2006 (42).
- Assaults accounted for 44 percent (31,661) and harassment accounted for 42 percent (30,055) of the reported offenses in 2007.
- Arrests were made in 31 percent (22,279) of the offenses reported for 2007, a decrease of 2 percent when compared to arrests made in 2006.
- The most frequent day of domestic violence occurrences was Sunday (12,735).
- For the twenty-fifth consecutive year, the most frequent hours of domestic violence incidents were between 8:00 p.m. and midnight, when 27 percent (19,301) of the offenses were reported.
- Children were involved or present during 33 percent of all domestic violence offenses occurring in 2007. Specifically, 5 percent (3,796) were involved and 28 percent (19,945) were present.
- Wives were the victims in 20 percent (14,550) and ex-wives were the victims in 3 percent (2,433) of the reported domestic violence offenses in 2007. Overall, females were victims in 76 percent (54,873) of all domestic violence offenses.
- The number of domestic violence complaints that had prior court orders issued against the offender decreased from 15,481 in 2006 to 14,339 in 2007. This is a decrease of 7 percent.
- Alcohol and/or drugs were involved in 28 percent (20,227) of the reported offenses occurring in 2007. Alcohol involvement alone accounted for 25 percent (18,003) of the total domestic violence offenses reported.
- Persons age 60 or over were victims in 3 percent (2,385) of all reported domestic violence offenses that occurred in 2007. Elderly were the victims in 11 percent (4) of the domestic violence murders (38).
- Domestic violence does not occur at a regular frequency, but when viewed as a ratio of its occurrence to a fixed time interval, one act of domestic violence would occur every 7 minutes and 19 seconds.
- Domestic violence offenses arising from a dating relationship accounted for 15 percent (10,646) of the state total.
- There were 2,950 total arrests involving domestic violence restraining orders reported by police in 2007. Of these, 1,695 were arrests for violations of a restraining order **only**, while 1,255 were arrests for violations of a restraining order **with** an offense arrest.

BIAS INCIDENT SUMMARY

INTRODUCTION

Crimes motivated by hate and bias tend to erode the basic fabric of society. Bias incidents having a racial, religious, ethnic, sexual or gender component as well as crimes against individuals with a handicap, manifest themselves in a wide spectrum of criminal activities. These bias incidents jeopardize the active and open pursuit of freedom and opportunity. They attack our citizens based on their race, religion, ethnic heritage, sexual orientation, handicap, or gender. Closely linked to such heritage are individual values, beliefs, and identities.

Realizing that no agency within the state was collecting complete data on bias incidents, a broad-based Ad Hoc committee was created to develop a comprehensive statewide reporting system. As a result of the committee's recommendation, Attorney General Executive Directive No. 1987-3 was issued mandating all New Jersey law enforcement agencies to begin reporting bias incident offenses to the Division of State Police, Uniform Crime Reporting Unit, on a monthly basis, effective January 1, 1988. On August 15, 1996, legislation was enacted which enhanced the state's definition of a bias incident to include crimes that are gender or handicap-motivated.

The directive was instituted to capture vital data in an effort to identify the problem. This information permits proper evaluation of progress in preventing bias crime and assist with necessary planning for the future.

This is the twentieth annual publication concerning bias crimes, which contains comparisons to the previous year's statistics. The published statistics and graphs are the result of data submitted by the police community of New Jersey.

Hopefully, the information contained in this publication will be of value to various segments of society and serve its intended purpose.

BIAS INCIDENT STATISTICAL SUMMARY

Highlights of the 2007 bias incident offense statistics are listed below:

- New Jersey law enforcement agencies reported 783 bias incident investigations, resulting in 809 target-type based bias incident offenses in 2007, a 2% decrease compared to 2006.
- Harassment accounted for 44% (353) of all bias incident offenses.
- Criminal mischief and damage to property accounted for 36% (291) of all bias incident offenses.
- Racial bias accounted for 48% (392) of all bias incident crimes in 2007.
- The target category of person accounted for 61% (492) of all bias offenses.
- The Black race represented the most frequent racial group victimized by bias crime, accounting for 40% (325) of all bias offenses.
- The Jewish religion represented the most frequent religious group victimized by bias crime, accounting for 30% (239) of all bias offenses.
- The Hispanic ethnicity represented the most frequent ethnic group victimized by bias crime, accounting for 5% (38) of all bias offenses.
- The most frequent day of occurrence was Friday (130 offenses).
- The most frequent month of occurrence was October (116 offenses).
- The most frequent place of occurrence was a school building, where 24% (198 offenses) of all bias incidents occurred.
- Forty-five percent (367) of all bias incident offenses were cleared with 32% (119) being cleared by arrest, and 68% (248) being exceptionally cleared.
- A total of 137 arrests (86 adults and 51 juveniles) were made resulting from bias incidents. Compared to 2006, arrests decreased 9 percent.

GLOSSARY OF TERMS

ADULT	For Uniform Crime Reporting purposes, a person aged 18 or over.
AMERICAN INDIAN or ALASKAN NATIVE	A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.
ARREST RATE	The number of arrests for Part I and Part II offenses for each unit of population, generally per 1,000.
ASIAN or PACIFIC ISLANDER	A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example: China, India, Japan, Korea, the Philippine Islands, and Samoa.
BLACK	A person having origins in any of the black racial groups of Africa, characterized by dark skin pigmentation.
CLEARANCE	For Uniform Crime Reporting purposes, the solution to a particular crime, usually by the arrest of the offender.
CLEARED BY ARREST	For Uniform Crime Reporting purposes, an offense is cleared when the offender has been identified, sufficient evidence has been obtained to formally charge and the offender has been ordered to appear in court.
CRIME INDEX	The total of the seven major offenses used to measure the extent, fluctuation and distribution of crime in a geographical area. The following crimes make up the index: Murder, rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft; these offenses are referred to as Index offenses.
CRIME RATE	The number of Index offenses reported for each unit of population per 1,000.
CRIMES AGAINST PERSONS	Consists of the following Index offenses: Murder, rape, and aggravated assault.
CRIMES AGAINST PROPERTY	Consists of the following Index offenses: Robbery, burglary, larceny-theft, and motor vehicle theft.
DAY	For Uniform Crime Reporting purposes, the hours from 6:00 a.m. to 6:00 p.m.
ETHNIC ORIGIN	Having or originating from linguistic or cultural ties with a specific group.
EXCEPTIONAL CLEARANCE	For Uniform Crime Reporting purposes, an offense is cleared exceptionally when an offender has been identified or located and sufficient evidence to charge has been obtained, but there is some reason beyond police control that prohibits the offender from being brought before the court.
HIERARCHY RULE	For Uniform Crime Reporting purposes, each crime or attempted crime is counted in only one offense category. If several offenses are committed, simply glance down the list of Part I offenses and stop at the first offense recognized from the facts given; this offense is the correct classification for this criminal activity.
HISPANIC	A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.
JUVENILE	For Uniform Crime Reporting purposes, a person under the age of 18.
JUVENILE CLEARANCE	Those crimes where the offenders are identified as juveniles.

NIGHT	For Uniform Crime Reporting purposes, the hours from 6:00 p.m. to 6:00 a.m.
NONVIOLENT CRIME	Consists of the following Index offenses: Burglary, larceny-theft, and motor vehicle theft.
POPULATION	Is the year-round population of the municipality shown in the most recent State population estimates published by the Department of Labor, except that in the year of promulgation of a Federal decennial census, the census figures shall be used.
RESORT MUNICIPALITY	Is a municipality which, because of its recreational, entertainment or amusement characteristics or facilities or its close proximity to such characteristics or facilities, experiences a total increase during the seasonal period in the number of persons temporarily resident therein of 25 percent or more of its population.
SEASONAL POPULATION	Is the average of the estimated number of persons temporarily resident in the municipality during the three consecutive months when the temporary population is greatest.
TEMPORARY RESIDENT	Means the occupying for any period of time during the seasonal period by any person not counted as a resident of the municipality for population purposes of an accommodation in a rented residential unit or vacation home.
UNFOUNDED	Classification of reported crimes that are found to be false or baseless.
VIOLENT CRIME	Consists of the following Index offenses: Murder, rape, robbery, and aggravated assault.
WHITE	A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

CALCULATIONS OF RATES AND TRENDS

- 1. Crime Rate per 1,000 inhabitants:** This represents the number of Index offenses per 1,000 inhabitants. For example: What is the crime rate for a municipality with 513 Index offenses (murder, rape, robbery, aggravated assault, burglary, larceny-theft and motor vehicle theft), with a population of 8,280?

$$513 \text{ (Index offenses)} \div 8,280 \text{ (population)} = .061957 \times 1,000 = 62.0 \text{ (crime per 1,000 inhabitants)}$$

- 2. Crime Trend:** A crime trend shows the extent to which crime increased or decreased. This is done by comparing a period of the current year with the same period of a previous year. For example: A municipality experienced 264 Index offenses in a previous year and 513 Index offenses in the current year. What is the percent of the increase?

$$513 \text{ (current year Index offenses)} - 264 \text{ (previous year Index offenses)} = 249 \text{ (numerical increase)}$$
$$249 \text{ (numerical increase)} \div 264 \text{ (previous year)} = .943 \times 100 = +94\% \text{ (percent change)}$$

NOTE: If there were more Index offenses in a previous year than in the current year, we would have a percentage decrease.

- 3. Number of Police personnel per 1,000 inhabitants:** This is calculated in the same manner as a crime rate. For example: A municipality with a population of 8,280 and 28 police personnel. How many officers are there per 1,000 population?

$$28 \text{ (police personnel)} \div 8,280 \text{ (population)} = .00338 \times 1,000 = 3.4 \text{ (police personnel per 1,000 inhabitants)}$$

NOTE: This formula can be applied to either total police personnel or just police officers per 1,000 inhabitants.

- 4. Police Assaulted Rate:** This is calculated at a rate per 100 police officers. For example: A municipality with 25 officers had five of them assaulted during the month. What is the police assaulted rate?

$$5 \text{ (police officers assaulted)} \div 25 \text{ (police officers)} = .2 \times 100 = 20 \text{ (police assaulted per 100 officers)}$$

- 5. Clearance Rate:** This refers to the percent of Index offenses cleared (solved), over a specific period of time. For example: A municipality with 513 Index offenses in a chosen time frame, cleared 95 of these offenses. What is the clearance rate?

$$95 \text{ (Index offenses cleared)} \div 513 \text{ (Index offenses)} = .185 \times 100 = 18.5 \text{ (percent cleared)}$$

- 6. Annual Mean Population:** Is determined for each municipality designated a resort municipality by use of the following formula:

$$AMP = \frac{12P + 3SP}{12}$$

Where **AMP** equals Annual Mean Population; **P** equals Population; **SP** equals Seasonal Population.
