(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

The federal *No Child Left Behind (NCLB) Act* has imposed specific accountability and reporting requirements on states. The *NCLB* reports present school-, district-, and state-level information in those areas mandated by *NCLB*, which are as follows: status regarding Adequate Yearly Progress; information on highly qualified teachers; attendance and dropout data; and assessment data that has incorporated all of the conditions mandated under *NCLB* for meeting federally approved proficiency levels.

The results displayed on *NCLB* Reports are based on the state assessment data with the *NCLB* conditions applied. Additionally, the *NCLB* data incorporates the data appeals submitted by districts/schools that have been granted by the NJDOE. Therefore, the data in the *NCLB* Reports may be different from the data displayed on the NJ School Report Cards.

>>[New Jersey School Report Card](#)

The annual New Jersey School Report Card is required under a 1995 state law. It presents thirty-five fields of information for each school in the following categories: school environment, students, student performance indicators, staff, and district finances.

The assessment results displayed on the New Jersey School Report Cards are based on the state assessment data without any *NCLB* conditions applied. Therefore, the assessment data in the NJ School Report Card may be different from the assessment data displayed on the *NCLB* Reports where there have been *NCLB* conditions applied to the test results.

WELCOME TO THE NEW JERSEY SCHOOL REPORT CARD FOR 2011

One of the major goals of the Department of Education is to increase school- and district-level accountability for educational progress by communicating useful information to members of the public to be used in measuring how well their schools are doing. The New Jersey School Report Card has provided the public with information about every school in New Jersey since 1995 when the Legislature mandated the annual accountability report.

The 2011 edition of the New Jersey School Report Card offers the same level of information as last year. We encourage you to examine your school's report card to decide for yourself whether your school is making satisfactory progress in helping your child meet New Jersey's Core Curriculum Content Standards. If you would like to give the department feedback on the report card process, please contact us: reportcard@doe.state.nj.us.

Above all, the Department of Education urges you to become involved with your local schools. With the scrutiny and support of the community, our schools can and will provide an excellent education for all of our students.

NEW JERSEY DEPARTMENT OF EDUCATION

FRANKLIN TWP (35-1610)

Franklin Township, the largest township in Somerset County, occupies an area of 46.9 square miles in central New Jersey. The school community enjoys a population representative of diverse economic, ethnic, and social backgrounds and fifty-seven (57) different native languages. The Franklin Township Public School District is a Pre-K through grade 12 educational system which offers a six-hour full-time Kindergarten program. Our district is comprised of nine (9) schools with approximately 7,800 students and approximately 700 certificated staff members. Enrollment is projected to drop slightly next school year.

The Mission of the Franklin Township Public Schools is to provide excellent educational opportunities that meet or exceed New Jersey Core Curriculum Content Standards for every student; maintain an environment that engenders an appreciation of the value of every student; develop every student to his/her highest potential; and instill the attitudes, skills, and knowledge necessary to become independent, contributing members of a democratic, multi-cultural society.

Students receive instruction in a full range of academic subjects, the arts, and developmental activities. Offerings include integrated language arts and reading, mathematics, science, social studies, physical education, world language and culture, health, music, art, and computers. To meet the diverse needs of our students, we offer a variety of programs and services aligned with state mandates and the New Jersey Core Curriculum Standards. These programs enhance the educational experiences of our students, and include academic support, gifted and talented, English as a second language, bilingual instruction in Spanish and Gujarati, and Special Education programs.

Extended day programs are offered at all schools and include academic enrichment, tutorial support, performing groups, and recreational activities. A fee-based, before and after school childcare program is provided for grades K-6.

Students at the secondary level enjoy extensive co-curricular and interscholastic athletic programs and consistently place among the top in our county. Our fine, visual and performing arts program, including music, art, theater, and dance, has been recognized by the State in many areas. Middle and high school music students have performed at state concerts, corporate events, and the White House. After-school enrichment programs include activities such as: Mock Trial, Math League, Science League, Model United Nations, Academic League, and J.R.O.T.C.

High school graduates have attended Harvard, Princeton, Rutgers, Stanford, Yale, Massachusetts Institute of Technology and several other four-year colleges and universities. A wide variety of Advanced Placement courses are offered in the district providing students with college credit during their high school years.

A primary focus in our district is to create a culture of learning in the Franklin Township Public Schools by strengthening and expanding professional development and learning opportunities for all staff.

We will recruit, hire, and retain high quality teachers and continue to improve student achievement through curricular revision and instructional materials. This includes integrating on-going formative assessments into language arts literacy and mathematics classes to identify specific strengths and areas in need of improvement in order to implement differentiated, small group instruction that addresses students learning needs quickly and effectively.

As Superintendent, I remain committed to assuring that the District provides our young people with a high-quality education that ensures academic success.

Mr. Edward Q. Seto Superintendent

NEW JERSEY DEPARTMENT OF EDUCATION

FRANKLIN PARK (35-1610-080)

Franklin Park School is a pre-kindergarten through grade four elementary school servicing 1029 students. The school's 158 staff members are focused on the district's mission to provide excellent educational opportunities for every student and to lead each student to reach their highest potential. In addition, Franklin Park School continues to articulate a vision for the 2010-2011 school year which states:

We are all making a difference creating an independent child in a democratic, multicultural society, which values and appreciates every student.

We will provide each student with excellent educational opportunities to meet their highest potential.

We will instill attitudes, skills and knowledge through standards-based instruction and differentiated instruction.

We will offer leadership and service opportunities in a safe and inviting environment.

The Franklin Park School staff clearly defined their 2010-2011 school goals with the success of each individual student as their focus. These goals for academic and social success are realized through the cooperative and cohesive efforts of our staff, our parents and our students. The staff continues to research, analyze and implement strategies and techniques to guarantee an academic program to meet the diverse learning styles and needs of each student. These scientifically researched programs are core curriculum rich, with interdisciplinary approaches embedded to enhance the cultural experiences and opportunities within the learning environment at Franklin Park School. Continued development of the Reading, Writing and Mathematics workshop models, all of which align with New Jersey Core Curriculum Content Standards and Common Core Standards and which have proven to meet the diverse needs of the students, continue to be a primary focal point of the year's professional research and implementation.

More specifically, the school goals for the 2010-2011 school year are to increase students' volume of comprehension strategies to strengthen their ability to infer, predict, establish main ideas and provide supporting details, to expose students to tiered, higher level thinking questions, and to focus on small group, differentiated instruction and conferencing systems. In order to accomplish the goal of increasing students' volume of comprehension strategies for the purpose of strengthening their comprehension skills, classrooms have been set up to facilitate regular opportunities for collaborative work amongst students. Teachers provide planned, well-thought out questions that are evidenced in lesson plans and modeled for students. Students are encouraged to ask questions in addition to finding answers. One-on-one conferences conducted during the workshop models enable teachers to provide constructive feedback to students, while facilitating on-going assessment in order to shape instruction that addresses the identified needs of all learners. The workshop model places a great deal of emphasis on teacher and student reflection and encourages students to take ownership of their thinking and learning.

The school family has made a clear commitment to design an environment where students are engaged in learning and challenged to reach their potential on a daily basis. While maintaining a clear school wide identity, the administration and staff have formed smaller grade-level specific communities within the larger framework. This strategy allows each team of staff members, with the support of the administration and the building's literacy and mathematics coaches, the opportunity to dialogue about how to best meet the individual needs of students with appropriate and developmentally sound practices. Classroom environment, use of integrated technology, curriculum calendars and mapping, the workshop model, and improving conferencing techniques within this model are continual topics of focus.

A school wide identity is maintained through healthy dialogue among the staff, parents and students as they assess the needs of the school family and plan programs and activities to meet those specific needs. School wide initiatives include activities such as the Peacemaker Breakfast, Anti-Bullying programs, and innovative Cotsen in the Classroom programs delivered by Princeton University's Cotsen Children's Library.

Students of Franklin Park School enjoy an enriched program in Science and the Fine Arts. With a challenging program centered on the New Jersey Core Curriculum Content Standards and the Common Core standards, the students experience hands-on, discovery-based approaches to the Science Program. On-going laboratory experiences enhance in-depth inquiry and experimentation with projects relative to topics such as the physical and chemical changes (chemistry), forces in motion (physics), and weather and climate (earth science). All students participate in the Annual Science Fair, where parents and teachers work as a team to present several science opportunities for families to discover together, and students have the opportunity to apply the scientific method and exhibit their logical sense of experimentation. Through a partnership with 4H, students learn about topics such as chemistry, amazing science, and dinosaurs. In addition, teachers invite parents and students to Family Math and Family Science evenings where they find many fascinating discoveries. Students at Franklin Park School are also invited to audition for the third and fourth grade dance troupes.

The staff, the PTO and members of the community work together to maintain Franklin Park School as a safe, nurturing and stimulating learning environment. Each member accepts their role to make a difference. The PTO hosts monthly meetings to address topics relative to building needs and district initiatives to keep parents informed and up to date. During these meetings, building administration and the math and literacy coaches address topics of interest related to the curriculum, such as problem solving within mathematics, the workshop model of instruction and reporting achievement. In addition, the PTO has also sponsored Family Nights such as family picnics, Dinner and a Movie and Read-Aloud to a Parent nights.

Franklin Park parents work closely with the school staff to ensure a partnership founded in respect. On-going articulation and feedback result in planning for programs that are in the best interests of our children.

The dedication of the staff and involvement of the parents is the key to the success of Franklin Park School students in order to help them realize their greatest potential. Together, Franklin Park School will continue celebrating the possibilities.

GUIDE TO THE NEW JERSEY SCHOOL REPORT CARD 2011

INTRODUCTION

This report card issued in May 2012 contains data for the 2010-11 school year. Enrollment numbers are based on the October 15, 2010 NJSMART submission. The information in the report card is school-level data, except for the finance section which contains district-level information. For charter schools, however, the finance section is school-level. The source of the information contained in the New Jersey School Report Card is the school district or the charter school, unless otherwise indicated in this guide.

There are several general practices and rules that are used throughout the document. They are as follows:

- **SUPPRESSION:** In reporting any type of assessment results, an asterisk indicates that the data were suppressed in order to protect privacy. Suppression includes cell sizes of less than 11 students, proficiency levels that are greater than 90% partially proficient, and other combinations of small cell sizes that might not protect privacy if they were not suppressed.
- **ZERO:** A zero in a data field in most cases means that there is no data to report for that field for this report card year.
- **BLANK:** A blank in most cases means this data element does not apply to this school.
- **STATE AVERAGE:** Unless otherwise stated, state averages are computed by four school types as follows: vocational schools; Special Services School Districts/special education schools; all elementary schools (regular and charter); or all secondary schools (regular and charter).
- **FACULTY:** In fields that refer to faculty, this term includes classroom teachers and educational support services personnel, such as guidance counselors and librarians.
- **ADMINISTRATORS:** In fields that refer to administrators, this term includes the certificated personnel such as the superintendent, assistant superintendents, school business administrator, principals, assistant principals, supervisors, non-supervisory coordinators, and directors.

REPORT CARD FIELDS

The following sections explain the data in the various report card fields.

SCHOOL ENVIRONMENT

Average Class Size

Average class size for elementary schools (Pre-K-8) is based on the enrollment per grade divided by the total number of classrooms for that grade. For elementary grades, the state average is the statewide total enrollment for each grade divided by the statewide total number of classrooms in that grade.

Average Class size for secondary schools (9-12) is based on the total enrollment per grade divided by the total number

of English classes for the same grade. For secondary grades, the state average is the total enrollment for each grade divided by the total number of English classes for the same grade.

For Special Services School Districts and special education schools, average class size is calculated by dividing the total enrollment by the total number of classrooms.

Length of School Day

This is the amount of time a school is in session for a typical student on a normal school day.

Instructional Time

This is the amount of time per day that a typical student is engaged in instructional activities under the supervision of a certified teacher.

Student/Computer Ratio

This shows the average number of students served by each instructional, multimedia-capable computer with a manufacture date after July 1, 2007 that is available for the purposes of supervised instruction. The ratio is calculated by dividing the total enrollment by the total number of multimedia-capable computers that are used for instruction. In previous years, this data was collected based on the computers' processor, i.e. Pentium IV or Mac G4 or above. Due to the revised parameters, only the 2010-11 data are published in this report.

Internet Connectivity

This shows the numbers of instructional, multimedia-capable computers with a manufacture date after July 1, 2006 available for instruction at various locations and how many of those computers have a connection to the Internet. In previous years, this data was collected based on the computers' processor, i.e. Pentium IV or Mac G4 or above. Due to the revised parameters, only the 2009-10 data are published in this report.

Length of School Year (charter schools only)

This is the number of days in the regular school year.

School Waiting List (charter schools only)

The list contains numbers of students who are waiting for openings in the charter school roster as of the opening of school.

School Classrooms (charter schools only)

This is the number of classrooms in the school.

STUDENT INFORMATION

Enrollment by Grade

The enrollment has been obtained from the school districts' NJ SMART state submission. NJ Standards Measurement and Resource for Teaching (NJ SMART), is a comprehensive data warehouse, student level data reporting, and

unique statewide student identification (SID) system

Students with Disabilities

This shows the percentage of students with an Individualized Education Program (IEP), including speech, regardless of placement and programs. This is calculated by dividing the total number of students with IEPs by the total enrollment.

Language Diversity

This is the percentage of students in the school by first language spoken at home. The list includes up to seven languages in descending order of frequency plus “all others.” This is calculated by dividing the number of students who speak a given language by the total enrollment. There is a calculation for each language listed, including English and “all others.”

Limited English Proficient (LEP) Students

This is the percentage of LEP students in the school. It is calculated by dividing the total number of students who are in limited English proficient programs by the total enrollment.

Student Mobility Rate

This is the percentage of students who both entered and left during the school year. The calculation is derived from the sum of students entering and leaving after the October enrollment count divided by the total enrollment.

STUDENT PERFORMANCE INDICATORS

Assessments

Performance on State Tests – High School Proficiency Assessment (HSPA), and New Jersey Assessment of Skills and Knowledge (NJASK) 3, 4, 5, 6, 7, and 8

The statewide assessment system comprises state tests that are designed to measure student progress in the attainment of the Core Curriculum Content Standards. Under the *No Child Left Behind Act of 2001 (NCLB)*, all states are required to assess student progress in language arts and math in grades 3-8 and grade 11. The state also assesses science in grades four and eight.

High schools show assessment results from the 11th grade spring 2011 administration of the High School Proficiency Assessment (HSPA) in language arts and math. The HSPA is the test that students must pass in order to graduate from high school. Retests are not included in these results.

The data presented in this report card will differ slightly from the data in the *No Child Left Behind (NCLB)* reports required by federal law. The *NCLB* reports show assessment results in three grade spans after the application of *NCLB* rules for the purpose of calculating adequate yearly progress (AYP) and identifying schools in need of improvement. By contrast, the assessment results presented in this report card have had no restrictions or

conditions applied to them. These data are the state's assessment results that have been disaggregated into subgroups for all students who attend a school.

State assessments are administered with the assistance of test contractors who collect and tally the student-level data. The results are distributed to local districts that have an opportunity to correct any errors. The Department of Education's Office of Assessment conducts the final quality control of all test data and is the source of the assessment results for all state reports, including the New Jersey School Report Card. The assessment office also produces the annual state assessment summary report that differs slightly from the school report card. **The report card information contains only the scores of the students who physically attend that school, while the assessment summary for a school adds in the scores of the special education students who are sent to out-of-district placements.** The addition of these out-of-district scores creates some differences in totals when compared to the report card totals.

National Assessment of Educational Progress (NAEP)

The National Assessment of Educational Progress (NAEP) is the largest national assessment of what our nation's students know and can do. NAEP assesses fourth-, eighth-, and twelfth-grade students in subjects such as reading, mathematics, science, and writing. The National Assessment Governing Board, which sets NAEP policy, also develops the content frameworks for the assessment. NAEP is administered by the National Center for Education Statistics (NCES), located within the Institute of Education Sciences (IES) in the U.S. Department of Education, and the reporting of NAEP scores on state report cards is a federal mandate. The results of NAEP are also published as the Nation's Report Card, and are available for the nation, states, and, in some cases, urban districts. The NAEP scores on the report card include grades four and eight 2009 reading and math scores for New Jersey which are the last scores published. For more information, visit <http://nces.ed.gov/nationsreportcard/>.

Graduation Type

This field shows the percentages of students who met or otherwise satisfied the state's testing requirements for graduation in several different ways – passing both sections of HSPA (scale ≥ 200), exempt from passing the HSPA and via Alternative High School Assessment (AHSA), Appeals or Other processes.

The Alternative High School Assessment1 (AHSA) measures high school competency in selected areas of the Core Curriculum Content Standards. It is intended to offer an alternative means of meeting the state graduation proficiency test requirement. The AHSA is available to students who have met all high school graduation requirements except for demonstrating proficiency in selected areas of the Core Curriculum Content Standards. (N.J.S.A. 18A:7C-3 & N.J.A.C. 6A:8-4.1)

High School seniors who have not yet demonstrated proficiency on the High School Proficiency Assessment (HSPA) or the Alternate High School Assessment (AHSA) are eligible for an appeal. The appeal can only be made by the district. The district must make the determination that the student, though not meeting the minimum scores needed on the assessments, can perform in language arts literacy and in math at a high school level. The district submits, on behalf of the student, HSPA scores, AHSA results, work samples and any other evidence of performance in ELA and/or math. There is an Educational Proficiency Plan form, developed by the department, to aid districts in submitting the appeals. The

document is designed to be used while students are receiving intervention/remediation (as required in statute). The document also asks for the intervention plan, the results and duration of the interventions, parent and student signatures, dates of conferences with parents, etc. While the form is not required for an appeal, the data on the form is required.

Other includes those students who have not been able to demonstrate a scale score ≥ 200 on a single HSPA administration, but have shown proficiency in the different levels of the HSPA during any of the administrations given. An example would be a student who during all 3 administrations of HSPA does not reach a scale score ≥ 200 , but when looking at their individual proficiency on each section of the exam they have passed each section during the 3 administrations. These students would be considered eligible to graduate via other.

Scholastic Assessment Test (SAT)

The Scholastic Assessment Test is a voluntary test administered by the College Board, usually for the purpose of college admission. The percentile scores are the average scores of the students whose performance places them along a range from 1-99. The score listed under the 25th percentile means that a quarter of the students' scores fell below that point and the rest were above. Under the 50th percentile, half of the students' scores fell above that score and half fell below. In the 75th percentile, a quarter of the students' scores were above that score and the rest were below. The source of the data for the report card is the College Board.

Advanced Placement (AP)

This information is obtained from the College Board for students who have taken an advanced placement exam. It shows the classes offered at the school, the numbers of students in each class and the numbers who took the test for the course. The total number of students in class is a duplicated count because the same student may take multiple AP classes. The total number of test-takers may exceed the number of enrollees because students may take the test without taking the class.

NOTE: The AP numbers reported in this report card are based on a snapshot in time that allows the College Board to provide consistent data from year to year. The AP reports from the College Board contain data from files created in July which include approximately 97-99% of the test-takers. The database created by the July snapshot is not updated by College Board for reporting purposes. Therefore, the numbers in the report card can only be considered correct as of the cut-off date.

Advanced Placement Results Summary

This shows the total who scored 3 or greater on the AP tests. It is a duplicated number which means that a single student may be counted more than once in this total, if the student took more than one test and scored 3 or above.

Advanced Placement Participation Data

The percentage of students taking Advanced Placement tests is calculated by dividing the number of students who took at least one AP test by the total number of students enrolled in grades 11 and 12 based on the October 15 enrollment count.

National Occupational Competency Testing Institute (NOCTI) (vocational only)

The NOCTI develops and administers national job-ready examinations that include both written and performance tests

that measure a student's knowledge and skills for entry into an occupational field. The number of students taking the tests is listed, along with school and state average scores for written and performance tests.

Certification/Licensure and Required Examination Results (vocational only)

This section lists by program area the test results for those occupations that require a license, certification, or examination. The data reflect those students who were tested in an occupational program during the school year.

Other Performance Measures

Student Attendance Rate

These are the grade-level percentages of students on average who are present at school each day. They are calculated by dividing the sum of days present in each grade level by the sum of possible days present for all students in each grade. The school and state totals are calculated by the sum of days present in all applicable grade levels divided by the total possible days present for all students.

Dropout Rate (secondary only)

These are the percentages of students who dropped out of grades 9-12 presented by various subgroups. The percentages are calculated by dividing the number of students in grades 9 through 12 who dropped out of school during the school year by the October enrollment reported for grades 9 through 12.

Graduation Rate (secondary only)

The graduation rate is calculated by using the new federally required adjusted cohort graduation rate. The four-year adjusted cohort graduation rate is the number of students who graduate in four years divided by the number of students who form the adjusted cohort for the graduating class. From the beginning of 9th grade, students who are entering that grade for the first time form a cohort that is subsequently "adjusted" by adding any students who transfer into the cohort later during the 9th grade and the next three years and subtracting any students who transfer out, emigrate to another country, or die during that same period. For example, The 2007 freshmen plus "transfers in" minus "transfers out" over four years will be divided into the number of 2011 graduates for the 2011 adjusted cohort graduation rate. Students who drop out remain in the cohort for this calculation. The source of the data is the state's student-level record system called NJ SMART. The "Other" category includes all other students awarded a regular high school diploma by their school districts, including students who passed the alternative high school proficiency exams.

Student Suspensions

These are percentages of students who were suspended at least once during the school year. Students suspended more than one time are counted once. The percents are calculated by dividing the total number suspended by the total enrollment.

Student Expulsions

This shows the number of students who were expelled from the school and district during the year. The total represents the total number of students expelled statewide.

Completion Data (vocational only)

These are the percentages of students who successfully completed an occupational program categorized by their enrollment status. This is calculated by dividing the number of students in each enrollment status by the total graduates.

STAFF INFORMATION

Student/Administrator Ratio

This is the number of students per administrator in the school. It is calculated by dividing the total school enrollment in October by the number of administrators reported in full-time equivalents (FTEs). Where a single administrator has responsibility for more than one school, the FTE may represent the administrator as less than one.

Student/Faculty Ratio

This is the number of students per faculty member. It is calculated by dividing the reported October school enrollment by the combined full-time equivalents (FTEs) of classroom teachers and educational support services personnel assigned to the school as of October of the school year.

Faculty Attendance Rate

This is the average daily attendance for the faculty of the school. It is calculated by dividing the total number of days present by the total number of days contracted for all faculty members.

Faculty Mobility Rate

This represents the rate at which faculty members come and go during the school year. It is calculated by using the number of faculty who entered or left employment in the school after October 15 divided by the total number of faculty reported as of that same date.

Faculty and Administrator Credentials

These are percentages of faculty and administrative members in the school who hold a bachelor's, master's, or doctoral degree. For vocational and special services schools, there is also information about licenses or certification in addition to or in place of degrees.

National Board Certification

This shows the number of teachers at the school and district levels who have been certified by the National Board for Professional Teaching Standards. In addition to teachers actively working in the districts, the state total may also include teachers who work in nonpublic schools, as well as those who became administrators, have retired or are on leave. This rigorous certification is encouraged, but not required.

DISTRICT/CHARTER FINANCIAL DATA

This section containing the financial data is district-level information for all schools except charter schools. Charter schools are public schools that are operated under a charter granted by the Commissioner of Education. The school is independent

of the school district and managed by a board of trustees. In accordance with charter school law, the school district of residence must pay directly to the charter school for each student enrolled in the charter school who resides in the district an amount equal to 90% of the sum of the budget year equalization aid per pupil and the prebudget year general fund tax levy per pupil inflated by the Consumer Price Index (CPI) rate in effect at the time of the calculation. In addition, the school district of residence must pay directly to the charter school the security categorical aid attributable to the student and a percentage of the district's special education categorical aid equal to the percentage of the district's special education students enrolled in the charter school and, if applicable, 100% of preschool education aid.

The financial information for the charter schools shows school average compared to charter average, while all other school report cards show district average compared to a state average for districts of a similar budget type. Budget type refers to the grade span that a district must budget for. If a district sends its 9-12 students to another district, it has a budget type that is K-12 (the district pays tuition to the receiving district for the 9-12 students), but the district has an operating type of K-8.

Administrative and Faculty Personnel

These include the number of administrators in the district reported in FTEs in October of each year, the number of schools in the districts, the ratio of students to administrators, and the ratio of faculty to administrators in the district. Similar information at the school level is shown earlier in this report card. Administrators include certificated administrative personnel in the central office, principals and school administrators -- both supervisory and non-supervisory. The number of faculty per administrator is calculated by dividing the combined FTE of classroom teachers and educational support personnel by the FTE of administrators as reported in October.

Median Salary and Years of Experience of Administrative and Faculty Personnel

This contains the median salary -- half of the salaries are above the median and half are below -- for both administrators and faculty. It also contains the median years of experience based on total number of years in public education.

Teacher Salaries and Benefits

Total teacher salaries and benefits are represented as a percent of total expenditures for this category, as reported in the Per-Pupil Expenditure section that follows. The percent increase or decrease represents the change in expenditures in teacher salaries/benefits from one year to the next.

Administrative Salaries and Benefits

Total administrative salaries and benefits are represented as a percent of total expenditures for this category, as reported in the Per-Pupil Expenditure section that follows. The percent increase or decrease represents the change in expenditures in administrator salaries/benefits from one year to the next.

Revenues

This presents the total revenues from various sources reflecting the combination of the ways districts are funded through local taxes, state aid, federal aid, and other sources, such as local district surplus and tuition income.

Budgets and Per-pupil Expenditures

There are two district-wide costs per pupil amounts for three years that correspond to the rest of the data in the report card. First is the Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.

(1) The Budgetary Cost per Pupil that represents comparisons with districts of similar budget type. The components that comprise the budgetary cost per pupil are as follows: classroom instructional costs; support services (attendance and social work, health services, guidance office, child study team, library and other educational media); administrative costs (general administration, school administration, business administration, and improvement of instruction); operations/maintenance of plant; food services, and extracurricular costs. The total of these expenditures is divided by the average daily enrollment for a total budgetary cost per pupil.

(2) Second is the Total Cost Per Pupil which, in addition to all of the costs listed above for the budgetary cost, includes costs for tuition expenditures and payments to preschool providers; transportation; other current expenses (lease purchase interest, residential costs, and judgments against schools); equipment; facilities/acquisition; and restricted expenses less nonpublic services and adult schools. The total of these expenditures is divided by the average daily enrollment, combined with all students sent out of the district as reported on the ASSA (annual state aid collection) to calculate a total cost per pupil.
