P.O. Box 520  
Trenton, NJ 08625-0520

Compiled December 2009

## **ACKNOWLEDGEMENTS**

Acknowledgement is made to the Library Research Center, Graduate School of Library Science, University of Illinois at Urbana-Champaign, whose Analyses of the 1979-1980 Illinois Public Library Statistics (1980) provided the model, general format and some of the analytical measures used in this publication.

Other useful data was obtained from Output Measures for Public Libraries: A Manual of Standardized Procedures, by Douglas Zweizig and Eleanor Jo Rodger, American Library Association ( Goals, Guidelines and Standards for Public Libraries Committee, Public Library Association), 1982.

The Bureau of Information Resources Management, Division of Administration, and New Jersey State Department of Education originally developed the computer programs used in this compilation. With the transfer of the State Library in 1996 from the Department of Education to an affiliation with Thomas Edison State College, the programs have been migrated to SAS for Windows. The staff members of the Library Development Bureau at the State Library have executed the programs.

## INTRODUCTION

**Analyses of New Jersey Public Library Statistics for 2008** interprets data obtained from the annual reports of 281 public libraries (not all libraries report). Using data published in **New Jersey Public Library Statistics for 2008**, this publication analyzes data in several different ways.

Libraries have been divided into groups by population and expenditure levels. Therefore, each library is listed twice. After each population or expenditure listing, a page follows which gives the arithmetic average, standard deviation, high, low, three percentile ranks and number of libraries reporting, calculated for each data element. The top half of each "averages and percentiles" page presents columns previously published in **New Jersey Public Library Statistics for 2008**. The bottom half of each page gives columns for this volume only. (Because of limitations of computer-formatted printing, some columns may appear in a different grouping, but all columns are listed in the same order on all pages.)

The **average** (arithmetic mean) is the sum of the data for all libraries in a group divided by the number of libraries in that group. The **standard deviation** is a measure of distribution around the average of the values for all libraries in the group. In a normal distribution, roughly two-thirds of the values fall within plus-or-minus one standard deviation from the mean. The **maximum** is the highest value reported for the group; the **minimum** is the lowest value reported. The three **percentile** ranks, **75th**, **50th**, and **25th**, are the values below which 75% of the group, 50% of the group and 25% of the group are found.

For items summarized from the **New Jersey Public Statistics for 2008**, see introductory pages of that publication for definitions of the column headings.

Each library is listed by **LIBRARY NAME**, **POPUL SERVED** (in the population listings), **TOTAL EXPENDS** (in the expenditures listing), and **CO**, a two-digit county code, for which a key is provided in the County/Statewide Summary.

Several ratios and percentages for each library were calculated from the data available, as defined above. They are as follows:

### **Explanation (All data are for 2008)**

**EQ VAL PER CAP (\$)** - **Equalized valuation per capita, in dollars:** "Equalized valuation" is the true value of real property within a local taxing district, computed from the aggregate assessed valuation and actual sales of property, and used to distribute equitably State school and library aid, apportion county taxes, and measure municipal Debt limits. The population count used is that listed in the **New Jersey Library Statistics** for this year.

**LOC TX SUP PER \$1,000 EV - Local tax support per \$1,000 in Equalized Valuation:** Local tax support (income) for the public library per \$1,000 in Equalized Valuation. This is a measure of the local support of the library compared to the true value of real property of the municipality or county.

**LOC TAX SUP PER CAP (\$)** - Local tax support per capita, in dollars: The library income from local tax sources, per capita. This is another measure of the local support of the library.

**LOC TAX SUP % OF TOT INC - Local tax support as a percentage of total income:** The percentage of the library's total current operating income from local tax support.

**PCSA % OF TOT INC - Per Capita State Library Aid as a percentage of total income:** The percentage of the library's total income from the category of state library aid known as "per capita" aid.

**PCSA % OF LOC TX SUP - PCSA - Per Capita State Library Aid as a percentage of the sum of local tax support and Per Capita State Library Aid:** The percentage of the library 's total budget from local-tax and statewide aid sources that Per Capita State Library Aid represents.

**SAL, W, B % OF TOT EXP - Salaries, wages and benefits as a percentage of total expenditures:** Percent of total expenditures spent for salaries, wages and benefits of library employees, including maintenance personnel.

**LIB MAT % OF TOT EXP - Library materials as a percentage of total expenditures:** Percent of total expenditures spent for all library materials.

**CIRC PER CAP - Circulations per capita:** Number of circulation transactions per capita of the population served.

**CIRC PER FTE - Circulation per full-time equivalent staff:** Number of circulation transactions per full-time equivalent staff (based on a minimum 30-hour week, or actual hours worked if greater than 30).

**CIRC PER VOL HELD - Circulations per volumes held:** Number of circulation transactions per cataloged volumes in the collection at the end of the year.

**CIRC PER HRS OPEN - Circulation per hour open:** Circulation transactions per hour. Statistics are based on total annual service hours, including branches if applicable.

**PROF % OF TOT STAFF - Professionals as a percentage of total staff:** Percent of total library staff holding a New Jersey Professional Librarian Certification.

**FTE PER M POP - Full-time equivalent staff per 1,000 population:** Number of full-time equivalent staff per 1,000 population.

**FTE PER WK HRS OPEN - Full-time equivalent staff per week hours open:** Number of full-time equivalent staff per number of hours main library was open for public service in a week.

**VOLS PER CAP - Volumes per capita:** Number of cataloged volumes in the collection at the end of the year, per capita.

**% VOLS ADDED - Percent of volumes added:** Percent of volumes held that were purchased and added to the collection.

**VOLUMES ADDED PER CAP - Volumes added per capita:** Number of cataloged volumes purchased and added per capita.

**TOT EXP PER CAP (\$) - Total expenditures per capita, in dollars:** Total library expenditures in dollars per capita.

**MAT EXP PER CAP (\$) - Materials expenditures per capita, in dollars:** Library materials expenditures in dollars per capita.

**TOT EXP PER CIRC (\$) - Total expenditures per circulation, in dollars:** Total library expenditures in dollars per circulation transaction.

**TOT EXP PER HR OPEN (\$) - Total expenditures per hour open, in dollars:** Total library expenditures in dollars per hour of library service (includes all branch service hours annually when applicable).

These ratios and percentages are shown first by county and statewide summary, then by regional subtotals. Next, the averages and percentiles of the printed and derived data are presented in statewide and regional summaries. Then, ratios and percentages are shown for each library individually within each population or expenditure group. After each population group or expenditure category, the averages and percentiles of the printed and derived data are given. The averages for ratios and percentages are based on data in each case for all libraries taken separately rather than the total of one data element divided by the total of another element.

A ranking of local tax support per \$1,000 of Equalized Valuation has been calculated. All computed values for the variable "**LOC TX SUP PER \$1,000 EV**" have been ranked from low to high for all 281 libraries reporting. Where a "." is printed, the variable has not been computed because data were not reported.

## Using the Tables

In order to make the tables in this volume as meaningful as possible, fields for which no data is available have been excluded from the calculations. When a data element cannot be computed, an X is printed in the column. In figuring averages and other statistics for the group, that library's ratio or percentage is deleted.

Although every effort has been made to include only meaningful information in the calculations, one or two libraries, which are very different from a group as a whole, can alter the averages enough that a truly representative picture is not shown, especially when the total group is small. This may be so in certain columns, especially in the largest population and highest expenditure categories, as well as the statewide totals. Because of very high values reported by some large libraries, those averages and standard deviations may be distorted. In such cases, the percentile rankings will be less influenced.

The annual survey for Per Capita State Aid provides the data for these tables. As with any human endeavor, there may be data entry errors.

This publication is intended to assist the public library director and board of trustees. To improve the usefulness and timeliness of the information collected, your comments and suggestions are welcomed and needed.
