In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

FiberMark Inc. – Warren Glen Facility NJPDES Permit No. NJ0004448 DSW Major	1 County Road, Route 519 Bloomsbury, NJ 08804 Hunterdon County	Jason Lonardo Bureau of Point Source Permitting Region 1 (609) 633-3869	Musconetcong River FW2-TM (C2) 02040105160070	This application is for a renewal of a NJPDES permit to discharge a long-term average 4.484 MGD of treated and untreated industrial wastewater. This facility, classified under the Standard Industrial Classification (SIC) code of 2621, is a non-integrated wood fiber furnish paper mill where fine paper is produced from purchased pulp (wood fiber furnish subdivision). As per a letter from Victor Camporine, Environmental Manager for Fibermark Inc., dated June 18, 2001 and received by the Department on June 19, 2001, the permittee has diverted the non-contact cooling water and storm water from DSN005A to the treatment system of outfall DSN001A, thus eliminating outfall DSN005A. Therefore, limitation and monitoring conditions for DSN005A have been removed from the permit as there is no further discharge from DSN005A. Outfall DSN001A will discharge an average of 1.434 MGD (1.22 MGD from DSN001A plus 0.214 MGD from DSN005A) of treated processed wastewater (including non-contact cooling water and storm water) from the papermaking process and class II landfill leachate. Outfall DSN004A discharges approximately 3.05 MGD of sand filter backwash and overflow, overflow from the treatment plant, and stormwater run -off from the roof adjacent to the boiler. The existing permit contains two stormwater outfalls; DSN002A and DSN003A. Outfall DSN002A discharges approximately 0.005 MGD of stormwater run -off from roof drains. Outfall DSN003A discharges approximately 0.005 MGD of stormwater run-off from the converting departments roof drains. The renewal application requested the addition of three new stormwater outfalls; DSN006A, DSN007A, and DSN008A. DSN006A discharges approximately 0.06 MGD of stormwater run-off from a concrete trench. Outfall DSN007A discharges approximately 0.001 MGD of stormwater run-off from the trench north of the river. DSN008A discharges approximately 0.001 MGD of stormwater run-off from the warehouse roof drains. These stormwater outfalls will be authorized to discharge under the Stormwater Master General Permit NJ0088315. As a result, the Department has proposed the removal of outfalls DSN002A and DSN003A from the existing NJPDES/DSW permit.

This facility, classified under the Standard Industrial Classification (SIC) code of 2621, is a non-integrated wood fiber furnish paper mill where lightweight paper is produced from purchased pulp (primarily the wood fiber furnish subdivision). Approximately 0.282 MGD and 0.014 MGD of treated wastewater is discharged through DSN001A and DSN002A respectively.
