#### **Whitman Voices Support for DiFrancesco - Kosco Flood Aid Proposal**

"The recommendations outlined today by the Senate President are consistent with the discussions we have had since shortly after northern and central New Jersey were hit by floods associated with Tropical Storm Floyd.

"I am fully committed to the flexible use of grants and loans to alleviate some of the financial burden suffered by so many New Jersey residents.

"There are already state and federal programs in place that are meeting the most immediate and critical needs. We will continue to work with the Senate President and others to develop a comprehensive financial program of last resort that is fair, equitable and effective," she said.
