LAW

91-09 Recommendation to Increase Funding and Delegate Authority to Executive Director to Effectuate the Acquisition of Relocation Materials Required by Certain Utilities Affected by the Turnpike Interchange 6 to Interchange 9 Widening Program.

2009 Capital Construction Program

Original: \$10,000,000

Supplement: \$10,000,000

Revised: \$20,000,000

At the December 10, 2007 Commission Meeting authority was delegated to the Executive Director to approve the purchase of materials needed in the relocation of certain utilities being affected by the Interchanges 6 to 9 Widening. The affected pipelines are: Colonial Pipeline (petroleum); Sunoco (petroleum); and Transco/Williams (natural gas). The original estimate was based on a Preliminary Design of the entire Widening Program. Since that time, the Authority has worked with the affected utility companies and others, analyzed the requirements in more detail, and developed a conceptual relocation agreed to by all parties. As a result of this collaboration and design progression, additional funds are necessary to accomplish the timely movement of the affected utilities and to allow the widening construction to proceed in an expedient manner.
