General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF SOLID AND HAZARDOUS WASTE
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection, Division of Solid and Hazardous Waste has tentatively approved an application made by the Pollution Control Financing Authority of Camden County to renew their Solid Waste Facility Permit to operate an existing sanitary landfill in accordance with N.J.A.C. 7:26-1 *et seq.* and by authority of N.J.S.A. 13:1E-1 *et seq.*

The landfill is located at 9600 River Road in Pennsauken Township, Camden County. The landfill is owned and operated by the Pollution Control Financing Authority of Camden County, located at 729 Hylton Road, Pennsauken, New Jersey. This landfill is a state-of-the-art, double composite lined facility. The flow of waste to the landfill is limited due to the operation of the Camden County Resource Recovery Facility. Incinerator ash is not disposed of at the landfill. Some by-pass waste is handled when the incinerator reaches capacity or is down for repairs. The Intermediate Processing Facility (IPF) building was originally used as a solid waste baler facility. Now it serves as a vehicle maintenance area and as a tire chipping area for a research, development and demonstration (RD&D) project.

The permit action prepared by the Department is based on the administrative record that is on file at the offices of the Department, Division of Solid and Hazardous Waste, Office of Permitting and Technical Programs, located at 401 E. State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 9:00 A.M. and 4:00 P.M. Appointment for inspection may be made in writing to the Office of Permitting and Technical Programs, by fax at (609) 633-9839 or by calling (609) 984-5950. Requests should be made to the attention of Ms. Rebecca Croke, file custodian. Copies of the tentative approval and the project fact sheet are also available for review at that office and the office of Pat Gudis, Pennsauken Township Clerk, located at 5605 N. Crescent Blvd., Pennsauken, New Jersey, 08110.

Comments on the tentative approval or a request that the Department hold a non-adversarial public hearing must be submitted in writing to the person specified below during the public comment period which begins on the date of the publication of this notice and closes on December 22, 2002.

All interested persons, including the applicant, who believe any aspect of the tentative approval is inappropriate shall raise all reasonably ascertainable issues and submit all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period. All supporting materials shall be included in full and may not be incorporated by reference, unless they are already part of the administrative record in the same proceeding, or consist of State or Federal statutes and regulations or other generally available reference materials.

Any interested person who reasonably requires additional time within which to supplement the administrative record should request, in writing, an extension of the public comment period, and the Department will exercise reasonable discretion in setting the closing date for public comment. The Department will publish subsequent notice of any decision to extend the period for public comment. Any notice of an extension of the public comment period will clearly set forth the closing date of such extension.

If any request for a public hearing, in the opinion of the Department, raises significant issues of fact relevant to the proposed agency action during the public comment period, a public hearing will be scheduled regarding the proposed agency action. The Department will publish subsequent notice of a scheduled hearing.

The Department will respond to all relevant comments submitted during the public comment period. These comments and the Department's responses will be set forth in a response document which will become part of the administrative record upon which the Department will base its final decision. Any person who has submitted relevant written comments will receive notification of the Department's final decision.

Written comments should be submitted to:

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER QUALITY
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection (the Department) intends to issue a generic TREATMENT WORKS APPROVAL (TWA) Number 02-3487-4SG, in accordance with N.J.A.C. 7:9A-3.9.

On August 5, 2002, N.J.A.C. 7:50 was amended to allow for an Alternative Design Treatment Systems Pilot Program. The purpose of that five-year program is to assess five different alternative technologies designed to reduce nitrogen loadings from septic systems. The Ashco RFS III system will be permitted for use on lots as small as 1.5 acres. The following four technologies will be permitted for use on lots as small as one acre: Amphidrome Sequencing Batch Reactors, AWT Environmental Trickling Filters, Bio-Microbics FAST, Cromoglass Sequencing Batch Reactors. Since these systems are outside the design specifications of N.J.A.C. 7:9A, they are required to obtain a TWA. The Department is issuing this generic TWA to facilitate the approval process so that the Pinelands Commission is given adequate time to complete its pilot program.

The Department is satisfied that these systems will function as well as or better than conventional onsite wastewater treatment and disposal systems. In addition, the Department is satisfied that the Pinelands pilot program will ensure adequate maintenance and inspection for these systems. Only those proposed projects under the jurisdiction of the Pinelands Commission are eligible for approval under this TWA.

The administrative record for the draft generic TWA is available for inspection at the offices of the Department, Bureau of Nonpoint Pollution Control (BNPC) at 401 East State Street, in the City of Trenton, Mercer County, New Jersey. It is available for inspection between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, by appointment. Questions regarding the TWA or appointments for inspection of the file may be scheduled by calling BNPC at (609)-633-7021 or (609) 292-0407. Copies of the administrative record may be obtained upon payment of the Department's normal charges for copies by contacting the Department.

Interested persons may submit written comments within 30 days of the date of this public notice to the following address: New Jersey Department of Environmental Protection, Division of Water Quality, Bureau of Nonpoint Pollution Control, P.O. Box 029, Trenton, NJ 008625-0029, Attn: Pinelands TWA.

All comments submitted during the comment period will be considered by the Department in making a final decision. The Department will respond to all significant and timely comments when a final decision is issued. The applicant, and each person who has submitted comments, will receive written notice of the Department's final decision.

The current population is about 850 students with a design capacity population of 1,104 and a design flow of 12,500 gallons per day. This design flow was based on existing per capita data and a 200% safety factor. Sanitary wastewater is treated to meet the Drinking Water Quality Standards for all parameters of concern, except fecal coliform. Although UV disinfection is provided, unsaturated native soils beneath the four subsurface disposal areas are utilized to achieve GWQS for fecal coliform bacteria. Each disposal bed is 4,800 square feet with a total area of 19,200 square feet. Four monitor wells are sampled quarterly to demonstrate compliance with the Ground Water Quality Standards at the downgradient property boundary.

HMF Associates was a proposed 900,000 sq. ft. office complex. During the public comment period on the draft NJPDES-DGW permit, commentors correctly indicated that the consistency determination was in conflict with the Department's rules at N.J.A.C. 7:15, which were in effect at the time of that decision, and with previous application of those rules. Specifically, the project's design flow of 90,000 gpd , and not the actual discharge flow of 19,931 gpd, should have been used to determine the applicability of N.J.A.C. 7:15-5.1. This section states that a domestic treatment works that requires a NJPDES discharge permit and that has a design capacity of 20,000 gpd or larger requires an amendment to a wastewater management plan.

The design flow for the facility, based upon N.J.A.C. 7:14A-23.3(a), is 22,500 gallons per day (75 3 bedroom or larger units @ 300 gpd/unit). The wastewater is proposed to be treated to groundwater quality standards prior to disposal to subsurface disposal fields. The treated effluent will be discharged to two subsurface disposal beds providing a total of 49,600 ft2 of infiltrative area. Disposal area 1 shall provide a minimum of 39,600 ft2 of disposal area, and shall receive a maximum discharge of 15,000 gpd (maximum loading rate of 0.38 gpd/ft2). Disposal area 2 shall provide a minimum of 10,000 ft2 of disposal area, and shall receive a maximum discharge of 7,500 gpd (maximum loading rate of 0.75 gpd/ft2). The flow from the facility shall be limited to a maximum of 22,500 gpd. Residuals generated in the treatment process shall be periodically removed from the primary settling tank to an approved residual management facility.

The facility also includes a cafeteria, meeting rooms and administrative offices. Laundry generated from the facility is processed off-site by a professional laundry service. The design flow for the facility, based upon N.J.A.C. 7:9A-7.4(d), is 13,500 gallons per day (90 beds @ 150 gpd/bed). The wastewater is proposed to be treated to groundwater quality standards prior to disposal to a subsurface disposal system. The treated effluent will be discharged to two subsurface disposal beds providing a total of 34,650 ft² of infiltrative area. The flow from the facility shall be limited to a maximum of 13,500 gpd. Residuals generated in the treatment process shall be periodically removed from the primary settling tank to an approved residual management facility.</p>
<p>Landis Sewerage Authority</p> <p>NJPDES Permit No. NJ0025364</p> <p>Ground Water</p>	<p>1776 S. Mill Road Vineland City, NJ</p> <p>Cumberland County</p>	<p>Brian Sage</p> <p>Bureau of Nonpoint Pollution Control</p> <p>(609) 633-7021</p>	II-A	<p>This major modification to the NJPDES-DGW permit incorporates the requirements for beneficial reuse of the treated wastewater. The modification establishes limitations for Total Suspended Solids, Fecal Coliform, Total Residual Chlorine and Turbidity in order to reuse the treated effluent in areas with unrestricted public access. Upon review of the Landis Sewerage Authority (Landis) effluent data the Department has determined that Landis has the technical ability to satisfy the high-level treatment requirements for public access beneficial reuse. Therefore, when Landis directs their effluent to an authorized reuse location, the effluent limitations for public access beneficial reuse identified in this permit shall be met and additionally, the limitations and monitoring conditions outlined in the permit shall be applicable.</p>
<p>Colts Neck High School</p> <p>NJPDES Permit No. NJ0109355</p> <p>Ground Water</p>	<p>Five Points Rd. & Route 537 Colts Neck Twp., NJ</p> <p>Monmouth County</p>	<p>Ron Bannister</p> <p>Bureau of Nonpoint Pollution Control</p> <p>(609) 633-7021</p>	II-A	<p>This is a renewal NJPDES--DGW permit for Colts Neck High School. Colts Neck High School is an existing high school serving grades 9 through 12. The functional capacity of the school, including students and staff is 1,390 people. The school includes a cafeteria, gymnasium, science laboratories, and art and home management training facilities.</p> <p>The sanitary wastewater design flow from the school is approximately 32,500 gpd. However, the school utilizes a wastewater recycling and treatment system that recycles the majority of the wastewater through the school's toilets. Because the majority of the wastewater is recycled, the treatment system has been designed to discharge only 6,000 gpd of effluent to ground water. Two subsurface disposal beds totaling 13,600 square feet are utilized to dispose of the effluent. All residuals generated by the facility are managed off-site at an approved residuals management facility.</p>

Potable water is treated to remove iron and manganese, which are filtered out. The discharge to Greenwich Township Sewage Treatment Plant consists of filter backwash, i.e. water used to clear solids from the filters along with the solids themselves.</p> <p>The proposed modification consists entirely in allowing the permittee to calculate flows at two locations instead of metering them, and in modifying the description for two other flow measurements so as to allow metering to occur in more accessible locations. The flows to be calculated are from systems which each have one incoming and two outgoing flows, the second of which can be calculated by subtraction.</p> <p>Submitted to <i>Gloucester County Times</i> for newspaper publication.</p>
