## Dear Business Owner, Entrepreneur, Investor, Manager or Intermediary,

On this website, we hope to convey a sense of who we are as a firm: our strategy, our culture, our people and our investment parameters. Our goal is not to be the biggest or the best-known private equity investor. Our goal is to be the best partner possible for entrepreneurs and owners of businesses who want a long-term investor behind them to fulfill a strategy of business growth while working with people they respect and enjoy.

We are not short-term holders of companies for a quick profit. Our investor base and structure permit us to invest new capital in a business over the course of 10 years and own it for up to 20 years. We view growing a company with a conservative balance of equity and debt as the most sensible and best risk-adjusted way to create value for our partners, our investors, and ourselves, and have a great time doing it.

Our partners are business people who have built truly great companies and want to keep building lasting value. They care and can choose their partners. Culture and fit is the top priority for our partner companies. Like us, they are discreet, have a concern about excessive debt, and do not want the world knowing their financial statements and strategies.

While our partners know that disciplined financial performance is the essential lifeblood of a great company, they also believe that ownership brings other obligations: to dedicated employees and their communities, to long standing customers, suppliers, and business partners, and to the needs of the non-profit world surrounding them.

We look forward to learning about your company's fundamental purpose. To discuss a potential relationship with our firm, please contact either of us.
