SUBCHAPTER 1. INTRODUCTION AND PURPOSE

10:37-1.1 Introduction and purpose

(a) Since the enactment of the Community Mental Health Services Act in 1957, there has been a broad expansion of public funding sources administered by the State and utilized to support community mental health services. In addition to grant-in-aid, there are funds from Title XX of the Federal Social Security Act, State Community Care and Screening purchase of service contracts, the State Capital Improvement Program and two State-funded demonstration community mental health centers. This amended chapter represents an integration of these multiple funding sources and the minimal requirements that are applicable to all of them. These requirements are conceptually based upon the Division's four operating principles: Normalization, Level of Functioning, Advocacy and Unified Services, which are described in a companion document titled "Principal Statement." Within the context of these principles, however, the Division encourages innovative implementation and a variety of comprehensive service models, developed in response to local needs and talents.
