7:11-2.6 Equivalent sustained supply: Spruce Run/Round Valley Reservoirs System

(a) In operating the Spruce Run/Round Valley Reservoirs System to augment natural stream flow during a period of low runoff, optimum dependable supply is attained at the confluence of the Millstone River where the combined flow from the tributaries to the Raritan River above that point becomes effective.

(b) Each application for the diversion, withdrawal or allocation of water from the Raritan River Basin is, therefore, to be evaluated, and differentiation in rates, charges and assessments shall be made on the basis of quantities of water to be supplied, distance between the facility and point of diversion, the cost in making such water available, the place where the water is to be used, and the character of such use.

7:11-2.7 Production Factor

(a) For any depletive diversion at any location above the confluence of the Millstone and Raritan Rivers, the inverse ratio between any upstream allocation and its equivalent in sustained supply at the confluence is expressed as the Production Factor for that allocation.

(b) For any depletive diversion at or below the confluence of the Raritan and Millstone Rivers, the Production Factor shall be considered to be unity (1.0).

(c) The total daily allotment charge set forth in N.J.A.C. 7:11-2.4 shall be multiplied by the Production Factor for a given allocation.

Such user shall pay a monthly standby charge instead of a demand charge, but shall in all other respects comply with the rules for the use of water from the Delaware and Raritan Canal-Spruce Run/Round Valley Reservoirs System.

(b) The New Jersey Water Supply Authority reserves the right to revoke such standby service classification at any time on 30 days written notice to the user.

(c) Such revocation shall not prejudice the right of the user to submit an application for normal water use either prior to or following the effective date of revocation.

7:11-4.4 Debt service cost component

(a) The debt service costs component is based upon the amount to be included for debt service costs with respect to each annual payment period or portion thereof, and will be that amount accruing in the bond year (starting on August 1 of each calendar year and ending on the next following July 31) or corresponding portion thereof, commencing during the fiscal year (starting on July 1 of each calendar year and ending on the next following June 30) within which such annual payment period or portion thereof falls. The debt service costs include the aggregate amounts payable during the specified period for:

1. Interest accruing during such period on the bonds, but not including any interest accruing on the State loan bonds which is to be deferred and added to principal, until payment in respect of such deferred interest is to commence;

2. That portion of each required principal payment or mandatory redemption or sinking fund payment on the Authority bonds (together, "principal installment") which would accrue during such period;

3. Such additional amounts as are required to provide a debt service coverage in accordance with the following schedule:

Twelve Month Period Beginning on	Coverage Percent of Gross Debt Service
2/1/91	105 percent
2/1/92	110 percent
2/1/93	115 percent
2/1/94	120 percent; and

4. Any amounts payable into any debt service reserve fund established for any authority bonds.

(b) The following Debt Service rates, based on a sales base of 16.097 million gallons per day, apply to all water purchasers who entered into a water purchase contract before July 1, 1990, the date upon which the Authority commenced operation of the Manasquan Reservoir System (Initial Water Purchase Contract) and began to make uninterruptible service available to the purchasers ("System Operation Date").

(Coverage 120 percent)

(c) A delayed water purchase surcharge will be assessed to all water purchasers who enter into a water purchase contract for an uninterruptible service commencing subsequent to the system operation date (delayed water purchase contract). This includes a purchaser under an initial water purchase contract which provides for an increase in the amount of uninterruptible service effective subsequent to the system operation date.

(d) In place of the imposition upon any delayed water purchaser of delayed water purchaser surcharges with respect to any one or more items, a delayed water purchaser may, at the time of entry into a delayed water purchase contract, make a single lump sum payment in respect of such items in a manner to be agreed upon between the Authority and the delayed water purchaser.

 In (b) decreased the rate.

7:11-4.5 Payments

(a) The annual payment consists of the aggregate amount projected by the Authority to be payable to the Authority by the purchaser during each annual payment period for uninterruptible service. This is derived by multiplying the applicable rates and charges in the rate schedule in effect for the relevant annual payment period by the number of gallons available to purchaser on an annual uninterruptible service basis (subject to the provisions of the water purchase contract) and subject to adjustment to reflect:

1. Any delayed water purchaser surcharges applicable to the purchaser;
2. Any credits to allocate benefits of any delayed water purchaser surcharges to the purchaser; and
3. Other charges, credits or adjustments provided for in the water purchase contracts.

(b) The annual payment period shall commence on July 1 and end on the next ensuing June 30.

(c) The purchaser shall make quarterly water payments for uninterruptible service not later than the 10th day of January, April, July and October in each year for uninterruptible service with respect to the calendar quarter ending on the last day of the immediately preceding month. The amount of the quarterly water payments shall be derived by dividing the amount of the purchaser's annual payment or adjusted annual payment for any fiscal year by four or in such other or different required quarterly payments of which the Authority gives notice to the purchaser pursuant to the water purchase contract.

(d) The Authority will notify the purchaser not later than 30 days prior to the beginning of each annual payment period of the amount of the purchaser's annual payment for uninterruptible service and, if the Authority determines that the quarterly water payments under the water purchase contracts should be made on a basis other than in equal installments, in order to permit the Authority to meet its obligations as they become due, it will, concurrently with such notice, provide the purchaser with a schedule of the amounts of each of the quarterly water payments to be made by the purchaser.

7:11-4.6 Uninterruptible service

(a) The rates, charges and debt service assessments per mg of water set forth for the rate schedule for uninterruptible service under initial water purchase contracts for the fiscal year are based upon:

1. The projected annual requirements for the fiscal year, after deducting therefrom projected net revenues in connection with the ownership or operation of the Manasquan Reservoir System from sources other than payment for uninterruptible service except to the extent that such other revenues are to be applied to obligations not included in such projected annual requirements. Such other obligations include payments, credits or rebates to purchasers for:

- i. Delayed water purchase surcharges collected;
- ii. Compensation for any amounts charged to system water purchasers in prior fiscal years by reason of default in payment of any obligation under any water purchase contract which obligation is subsequently collected by the Authority; and
- iii. Distribution of the proceeds of surplus water sold.

(b) The rate is obtained by dividing the adjusted projected annual requirements set forth in (a)1 above by the number of mg per day of Manasquan Reservoir System water which are required by the terms of all water supply contracts for uninterruptible service during the fiscal year, multiplied by 365.

(c) The Authority may exclude for any period, for purposes of the computation in (a) and (b) above, the uninterruptible service provided in any water purchase contract if an event of default has occurred. This will not affect the Authority's right to enforce the provisions of the water purchase contract against the defaulting party; however, any payment received from a defaulting water purveyor for such uninterruptible service with respect to such period shall be rebated or credited to the non-defaulting purchasers.

(d) The purchaser will not be required to make payment to the extent that the Authority does not make water available under the terms of the contract for uninterruptible service.

7:11-4.7 Short term service

(a) The rates for short-term service shall be an amount per mg of water equal to the sum of the debt service component established in N.J.A.C. 7:11-4.4, and the operations and maintenance component established in N.J.A.C. 7:11-4.3.

(b) The monthly payment for water provided to the purchaser pursuant to short-term service shall be based upon the Manasquan Reservoir System water actually consumed at the rate per mg stated in (a) above.

(c) Payment for water provided to the purchaser pursuant to short-term service shall be made within 30 days following receipt of the Authority's invoice.

(d) Payments received in any fiscal year with respect to short-term service during such year shall not be included in actual or projected revenues for such year for purposes of determining the rates applicable to that year but shall be included in revenues for the fiscal year succeeding the year in which payment is received for purposes of determining the rates for uninterruptible service in such succeeding fiscal year.

7:11-4.8 Standby service

(a) The rates for standby service shall consist of:

1. A standby charge established in N.J.A.C. 7:11-4.9 for each month during which standby service is available equal to the capacity, in mgd per day, of the purchaser's withdrawal facilities to be served by such standby service multiplied by the rate per mg for uninterruptible service set forth in N.J.A.C. 7:11-4.3 and 4.4; and

2. A charge for water actually consumed in any month at the rate per mg of water established by the rates for short-term service as set forth in N.J.A.C. 7:11-4.7 at the time of such consumption, minus the standby charge for such month.

(b) Payment for water provided to the purchaser pursuant to standby service shall be made within 30 days following receipt of the Authority's invoice.

(c) Payments received in any fiscal year pursuant to (a)1 and 2 above shall not be included in actual or projected revenues for that year for purposes of determining the rates applicable to such year but shall be included in revenues for the fiscal year succeeding that in which payment is received for the purpose of determining the rates for uninterruptible service in the succeeding fiscal year.

7:11-4.9 Standby charge

A purchaser classified under standby service shall pay a monthly minimum charge based on the capacity of the purchaser's withdrawal system as specified below. Said purchaser shall also pay for all water withdrawn during the month in excess of such monthly standby charge based on charges as set forth under N.J.A.C. 7:11-4.3 and 4.4.
