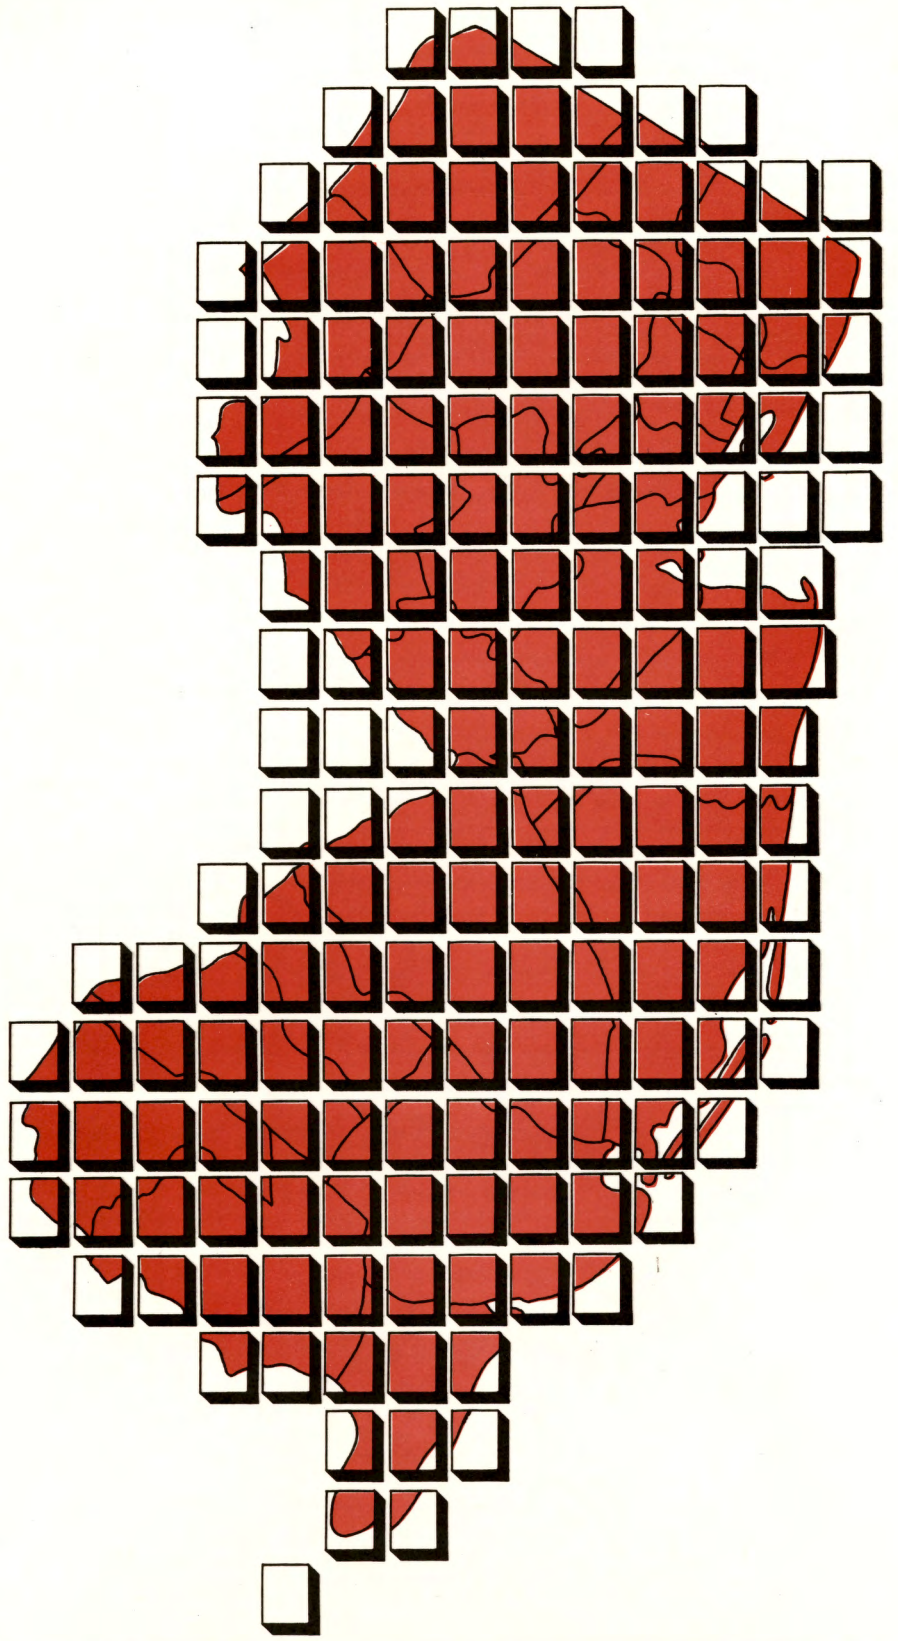
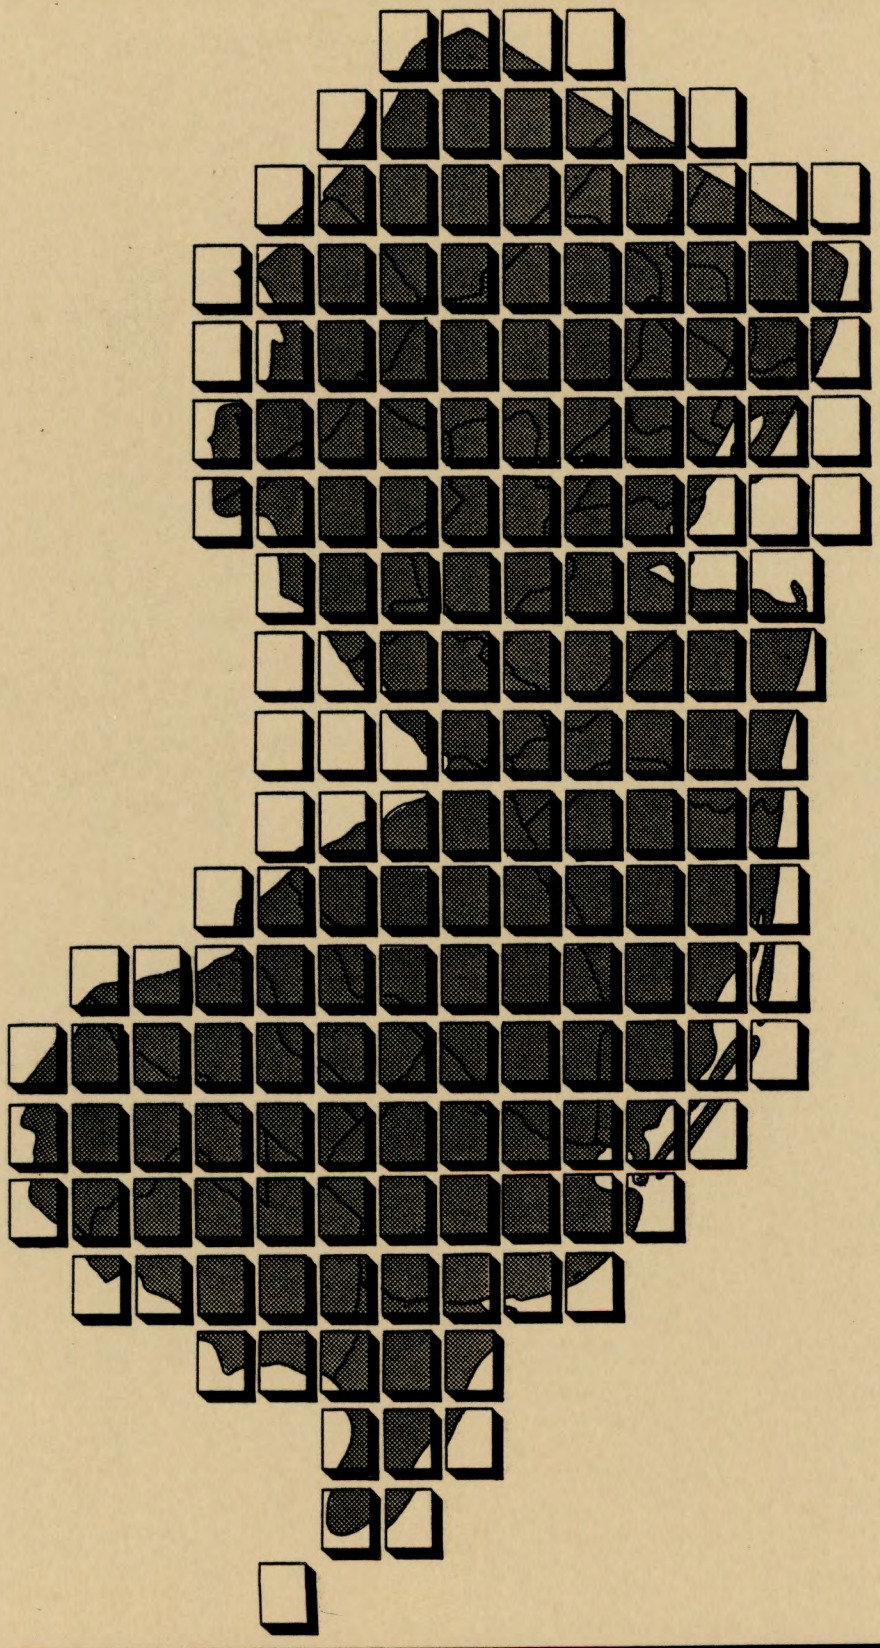
Environmental Information Inventory



New Jersey Department of Environmental Protection

Environmental Information Inventory



New Jersey Department of Environmental Protection

The Environmental Information Inventory was prepared by the Natural Resources Group within the Department of Environmental Protection. It was developed as a reference guide for state, local, and federal government agencies. The Inventory provides an overview of where our programs affect land areas within the State. Our intent is to allow ease of reference to these programs in order to improve our services for environmental protection in New Jersey.

If you would like additional information concerning participation in this program, you may contact:

Robert A. Marshall, Special Assistant for Natural Resource Policy and Planning, Office of the Assistant Commissioner for Natural Resources, NJDEP, CN402, Trenton, NJ 08625 1-609-292-3541

Thomas F. Hampton, Office of Natural Lands Management, Division of Parks & Forestry, NJDEP, CN404, Trenton, NJ 08625 1-609-984-1339

Curt Gellerman, Principal Planner, Office of Green Acres, NJDEP, CN404, Trenton, NJ 08625 1-609-292-2454

John M. Moceri, Supervisor, Graphic Arts Section, Office of Green Acres, NJDEP, CN404, Trenton, NJ 08625 1-609-292-2454

You may also contact the offices listed in the Map Information Sheet prepared for each map category.

Special thanks to: Assistant Commissioners Helen C. Fenske and George J. Tyler, for their support and encouragement; Serge Rey, Special Assistant, for his devoted effort in developing this project; special staff members within each Division of DEP who offered insight as to individual agency coordination problems; the cartographers of DEP who, most of all, recognize that a basis for understanding amongst our agencies can be found in mapping.

ENVIRONMENTAL INFORMATION INVENTORY – a working tool for a state and local partnership in environmental planning.

"Environmental protection" includes not only the protection of our natural resources but the protection and enhancement of economic and social conditions which contribute to the overall well-being of our neighborhoods, our communities, our townships, our counties, and our state. Perspectives vary greatly between private interests and public interests, even amongst our levels of government.

The developer sees a wooded lot as an area to be cleared for housing. A forester may see this same lot as containing a harvestable commodity of lumber with potential for reforestation. The preservationist may see this same lot as unique habitat for endangered or threatened species which should be protected . . . A local planner may view the developer's plan as a means for providing much needed low or middle income housing. The chamber of commerce may view this development as providing attraction for business and tax rateables . . . The local environmental commission may side with the preservationist. The county, regional, and state planner, in an attempt to balance their views from a broader perspective, may lose the closeness to the issue required for pragmatic evaluation.

The New Jersey Department of Environmental Protection is responsible for the protection of New Jersey's environment. The Department faces conflicts and compromises concerning uses of New Jersey's resources on a daily basis. In response, the Department is in the process of developing the Environmental Information Inventory. The Inventory concept recognizes the value of varied perceptions of "environmental protection" and the benefits to be derived from a sharing of viewpoints.

* * *

The mechanics of the system involve the use of USGS quadrangles at a reduced one inch to the mile scale, an easily reproduceable 8½" x 11" format. The maps were produced from full scale, film positive, black line, USGS quadrangles at a cost of $1.95 each. Participating divisions in DEP purchased a set of mylars of the 173 quadrangles covering the state for less than $350. This represents the sole, up-front cost of participation.

Selected divisions within DEP were asked to map their essential planning information: e.g., jurisdictional boundaries; areas of key concern; managed lands; areas where grants have been made for planning, acquisition, and development. The criteria for selection of just what to map included: (1) What land areas are we involved with?; (2) What information must we furnish to other agencies on a day-to-day basis?; (3) What information do we want other agencies to be aware of?

These questions are important. There are direct benefits in knowing that programs conflict, complement, or have no relationship. There are indirect benefits in allowing all agencies to reference programs in a common format.

Each map contains a title, the name of the agency that prepared the map, the date of its preparation, and the dates of revisions. Areas of concern may be noted by symbol, boundaries, or jurisdictional lines.

There is no attempt at this small scale to show specific concerns or provide precise boundaries. Rather, the symbols are "indicators" of involvement, referencing the 1:24000 scale USGS quadrangles and other types of mapping which provide definite boundaries or give more detailed information. The use of USGS quadrangles as a common base map simplifies cross referencing of agency involvement.

Each agency which prepares a map set also prepares a Map Information Sheet. This contains the address and phone number of the preparing agency, instructions as to how to use each map and, very importantly, a listing of more detailed information available. This may include information as to availability of aerial photography, other types of mapping, environmental reports, or on-site surveys.

* * *

The orientation of this program concerns sharing of information, an "opening up" of the tremendous informational resources amongst various levels of government. The intent is to have DEP serve as the nucleus for coordinating environmental planning information. In this way, other departments and levels of government may find it beneficial to coordinate or reference their programs in a similar fashion.

Map availability indices will be prepared and distributed. These indices can be used by state, county, and municipal planners to collect the maps most useful to them in notebook form, enabling them to readily evaluate the various programs and environmental protection efforts of other agencies for a given site. Since the environmental information is gathered by quadrangle, quadrangles will serve as building blocks for construction of the perspective desired by the planner. A township planner may request from appropriate agencies those quadrangles covering the township. An environmental commission may choose to assemble a composite based on watersheds. A regional planner will request those quadrangles covering the region. The notebook format makes it easy to add or rearrange maps in a particular notebook as needs change or as new maps are developed.

The program is directed for use by managers, regulators, and planners of land. The program is simple and inexpensive. It does not require an increase in budgets or an added layer of bureaucracy or staffing. Its success will depend upon independent effort and a coordinated commitment.

* * *

The Department prepared a prototype for the Environmental Information Inventory involving the quadrangles of Monmouth County. Monmouth County was selected for its wide range of significant environmental features as well as environmental concerns common to other counties within the State.

The Department has been very much encouraged by the generous support offered by the Monmouth County Planning Board and Park System in the development of the Inventory program. This support and assistance was critical to our understanding of what is needed, what is useful, what is practical. All important to this process is the continued receipt of constructive comments so that this Department may improve its level of service to the people of New Jersey for the protection of our environment.

* * *

As we increase awareness of regulations and protection efforts, regulations and land use constraints may be viewed more and more as a safeguard not only to the quality of land but the value of land, both for protection as well as development. Increasingly, private rights may be viewed as the right to unspoiled air, water, and land.

This program is aimed at the development of a working tool for a state and local partnership in environmental planning. It is only a step, but hopefully a significant one in understanding, appreciating, and integrating our efforts towards environmental protection.

Division of Parks and Forestry

The maps prepared by the Division of Parks and Forestry reflect the diversity of the Division's responsibilities and activities throughout New Jersey. They also serve a greater purpose, and that is, to provide a uniform mapping approach enabling any individual or organization to obtain general information regarding the division's activities.

The information provided on these maps generally depict the following categories:

1. Areas administered by the Division of Parks and Forestry. These areas include but are not limited to, State Parks, Forests, and Marinas;

2. Historic and cultural resources located throughout New Jersey;

3. Designated Natural Areas and lands placed on the Register of Natural Areas;

4. Lands controlled by the New Jersey Natural Lands Trust.

These maps help to provide a more coordinated planning approach within the Department of Environmental Protection, and they may also serve as a data base for the needs of municipal, county, and private concerns. It is anticipated that the use of these maps will vary from the professional planning staffs for local governments, to the individual who is interested in locating potential areas for outdoor recreation and education use.

°NEW JERSEY'S NATURAL AREAS SYSTEM

Natural Areas are defined by statute as areas of land or water which have retained their primeval character (although not necessarily pristine and undisturbed) and areas having rare or vanishing species of plant and animal life or similar features of interest which qualify for special preservation. The Natural Areas Act of 1961 was passed to enable the Department of Environmental Protection (DEP) to acquire, maintain, and preserve natural areas. The Natural Areas System Act of 1967 authorized DEP to establish a Natural Areas System and a register of naturally significant areas.

The Natural Areas System protects habitat and natural features but does not eliminate all uses. To date the system includes 41 natural areas located throughout the state, totalling 21,619 acres. All areas are state owned. Most areas are managed by the Division of Parks and Forestry. The others are managed by the Division of Fish, Game and Wildlife. All of the areas are open to the public, though some forms of recreation and public access are restricted in the environmentally sensitive areas.

The register includes properties which are state owned and not within Natural Areas System as well as properties which are privately owned which meet the criteria for naturally significant areas. This document serves notice that a site contains significant natural features or habitat. The register does not provide direct regulatory jurisdiction and does not alter ownership or use of the land. Its utility lies in its value as an informational source to the property owner and the public in general. Often, property owners are unaware of the natural value of their property. By providing this information, an individual may forego or modify plans for altering the site.

°MAPPING

The maps provided give general location and approximate boundaries of areas that are part of the Natural Areas System and register sites. These maps should be used only as general indications of these boundaries and not to determine the exact boundaries for public use or access.

°OTHER INFORMATION

The Office of Natural Lands Management can provide map up-dates and detailed information about the System and register. As management plans for individual natural areas are completed, they too will be available. This information may be obtained from the Office of Natural Lands Management, Division of Parks and Forestry, New Jersey Department of Environmental Protection, Trenton, New Jersey 08625, (609) 984-1339.

NATURAL AREAS
MAPPING INDEX

		QUAD #
1.	BURSCH SUGAR MAPLE NATURAL AREA: 25 acres (±) in Hope Township, Warren County. The area is an example of a northeastern climax forest; a northern mesic habitat of sugar maple-mixed hardwood type.	23
2.	DRYDEN KUSER NATURAL AREA: 850 acres (±) in Montague Township, Sussex County. The area illustrates the ecological balance and processes of a northern bog habitat.	2
3.	DUNNFIELD CREEK NATURAL AREA: 100 acres (±) in Pahaquarry Township, Warren County. The Appalachian Trail and other trails intertwine this natural area's range of habitats which include the northern drier and mesic forests and a hemlock ravine.	22, 23
4.	JOHNSONBURG NATURAL AREA: 11 acres (±) in Frelinghuysen Township, Warren County. This area is an example of a cross section of northern hardwood forest types.	25
5.	OSMUN FOREST NATURAL AREA: 10 acres (±) in Knowlton Township, Warren County. An area of typical northeastern mixed hardwood forest, demonstrating the gradual succession of a northern mesic habitat.	23
6.	SUNFISH POND NATURAL AREA: 100 acres (±) in Pahaquarry Township, Warren County. A National Natural Landmark and lake of glacial origin surrounded by hardwood forest and a portion of the Appalachian Trail.	12, 23
7.	TILLMAN RAVINE NATURAL AREA: 500 acres (±) in Walpack, Sandystone Township, Sussex County. The area illustrates various geologic forms and northern mesic habitats of mixed oak (upper) and hemlocks - mixed hardwoods (lower).	6
8.	WHITTINGHAM NATURAL AREA: 400 acres (±) in Fredon Township, Sussex County. A northern swamp and floodplain forest with rare species of ferns on limestone cliffs.	14

NATURAL AREAS
MAPPING INDEX

		QUAD #
9.	BEARFORT MOUNTAIN NATURAL AREA: 1,200 acres (±) in West Milford Township, Passaic County. The area illustrates a range of northern habitats including scrub oak (uplands) and hardwood swamp (lowland on southern end.)	9, 14
10.	BLACK RIVER WILDLIFE MANAGEMENT AREA: 2,200 acres (±) in Chester and Washington Townships, Morris County. An area providing examples of northern mesic, marsh and northern floodplain habitats.	37
11.	DEER PARK POND NATURAL AREA: 2,500 acres (±) in Allamuchy and Hopatcong Townships, Warren County. The area illustrates a hardwood forest and old fields in various stages of succession and contains Deer Park Pond.	25
12.	FARNY NATURAL AREA: 600 acres (±) in Rockaway Township, Morris County. An area having herbaceous plant life along small streams which is in contrast to the surrounding hardwood forest; characteristic of the Highlands.	28
13.	HACKLEBARNEY NATURAL AREA: 275 acres (±) in Chester and Washington Townships, Morris County. The area is characterized by a boulder strewn river ravine forested by northern mesic hemlock mixed hardwood.	37, 48
14.	KEN LOCKWOOD GORGE NATURAL AREA: 260 acres (±) in Lebanon Township, Hunterdon County. An example of a northern mesic hemlock-mixed hardwood habitat with highly varied understory and ground cover.	46, 47
15.	RAMAPO LAKE NATURAL AREA: 1,800 acres (±) in Wanaque, Ringwood and Oakland Townships in Passaic and Bergen Counties. An area of northern upland habitats.	18, 19
16.	WAWAYANDA HEMLOCK RAVINE NATURAL AREA: 400 acres (±) in Vernon Township, Sussex County. Northern mesic hemlock - mixed and oak-hickory hardwood forest habitat; an area of outstanding scenic quality.	9

NATURAL AREAS
MAPPING INDEX

		QUAD #
17.	WAWAYANDA SWAMP NATURAL AREA: 2,000 acres (±) in Vernon and West Milford Townships, Sussex and Passaic Counties. An extensive complex of northern swamp habitats (red and white cedar), northeastern forests (maple-ash, oak-hickory) and a glacially - formed, spring-fed pond.	9
18.	BULL'S ISLAND FLOOD PLAIN NATURAL AREA: 30 acres (±) in Delaware Township, Hunterdon County. The area is a northern floodplain habitat. Frequent flooding of this area has caused a shifting of vegetation to that favoring moist conditions.	66
19.	COOK NATURAL AREA: 52 acres (±) in South Brunswick Township, Middlesex County. This area is a freshwater marsh habitat.	79
20.	LIBERTY PARK NATURAL AREA: 60 acres (±) in Jersey City, Hudson County. The Natural Area is predominantly a salt marsh, one of the few remaining salt marshes along New York Bay.	53
21.	READINGTON NATURAL AREA: 37 acres (±) in Readington Township, Hunterdon County. An area illustrating secondary field succession.	48, 59
22.	TROY MEADOWS NATURAL AREA: 294 acres (±) in Parsippany and Troy Hills, Morris County. This area contains remnant wetland conditions of Glacial Lake Passaic, fresh water marsh habitat and northern swamp and floodplain habitat. The area is a National Natural Landmark.	39, 40
23.	WASHINGTON CROSSING NATURAL AREA: 100 acres (±) in Hopewell Township, Mercer County. The area is a large alluvial floodplain in the Piedmont region characterized by rounded hills and broad valleys. The primary areas of the site includes old fields and mixed hardwood forests.	76, 77
24.	CHEESEQUAKE MARSH NATURAL AREA: 450 acres (±) in Old Bridge Township, Middlesex County. An area with unusual diversity of plant communities including hardwood forest, cedar swamp, mature white pine stand, fresh water swamp, floodplain, Pine Barrens, and salt marsh.	72

		NATURAL AREAS MAPPING INDEX QUAD #
25.	RANCOCAS NATURAL AREA: 80 acres (±) in Westhampton Township, Burlington County. An area containing a fresh water marsh and southern floodplain habitat with a pine-oak forest and one of the largest stands of wild rice in New Jersey.	95, 105
26.	SWIMMING RIVER NATURAL AREA: 107 acres (±) in the Borough of Tinton Falls, Monmouth County. An area of diversity in topography and habitat, including a fresh water pond, fresh water marsh, salt water marsh woodlands, fields and an estuary. Special plants include a stand of wild rice.	83
27.	ABSEGAMI TRAIL NATURAL AREA: 100 acres (±) in Bass River Township, Atlantic County. An area which contains southern white cedar and pine-oak forests and a southern bog habitat.	133, 146
28.	BATSTO NATURAL AREA: 350 acres (±) in Mullica Township, Atlantic County and Washington Township, Burlington County. An area having plant associations typical of a southern swamp, Pine Barrens bog and floodplain habitats.	131
29.	CAPE MAY POINT NATURAL AREA: 160 acres (±) in West Cape May Township, Cape May County. An area containing sand dune and fresh water marsh habitats. It is outstanding for migratory bird observation, particularly raptors.	177
30.	CAPE MAY WETLANDS NATURAL AREA: 1,750 acres (±) in Avalon Borough, Dennis and Middle Townships, Cape May County. An area having the ecosystem complex of tidal salt marsh habitat.	172, 173, 176
31.	CEDAR SWAMP NATURAL AREA: 754 acres (±) in Woodland Township, Burlington County. An outstanding example of a southern swamp and floodplain habitat; southern white cedar with red maple and pine-oak forests.	107
32.	GREAT BAY NATURAL AREA: 395 acres (±) in Little Egg Harbor Township, Ocean County. This area contains a salt marsh habitat and is an excellent example of a New Jersey bay ecosystem.	147

NATURAL AREAS
MAPPING INDEX

QUAD #

33. ISLAND BEACH NORTHERN NATURAL AREA: 700 acres (±) in Ocean Township, Ocean County. This area is an example of a natural barrier island, having vegetation patterns that change with the topographic features. — 111, 123

34. ISLAND BEACH RESEARCH AREA AND WILDLIFE SANCTUARY: 1,200 acres (±) in Ocean Township, Ocean County. Barrier island habitat with an extensive salt water marsh and fresh water bogs containing ferns and cranberries. — 123

35. MANAHAWKIN NATURAL AREA: 64 acres (±) in Stafford Township, Ocean County. This area is a mature bottomland hardwood forest; a rare example of this level of maturity and a National Natural Landmark. — 135

36. MARTHA BOG: 200 acres (±) in Washington and Bass River Townships, Atlantic County. An area containing a variety of Pinelands habitats; upland thickets, cedar swamps and open bogs. — 132

37. NORTH BRIGANTINE NATURAL AREA: 678 acres (±) in the Municipality of Brigantine, Atlantic County. This sand dune and salt marsh habitat adjoins Brigantine National Wildlife Refuge. — 159

38. OSWEGO RIVER NATURAL AREA: 100 acres (±) in Washington Township, Atlantic County. An area containing a variety of Pinelands habitats with upland thicket, white cedar bogs, open bog, pine-oak Pine Barren forest. — 132

39. PARVIN NATURAL AREA: 500 acres (±) in Pittsgrove Township, Salem County. A mixed oak and pitch pine forest on the Pine Barrens fringe with over 300 plant species and a diverse animal population. — 140

40. STRATHMERE NATURAL AREA: 80 acres (±) in Upper Township, Cape May County. A dune habitat on a spit formation. — 173

41. SWAN POINT NATURAL AREA: 147 acres (±) in Brick Township, Ocean County. A tidal salt marsh habitat having nesting colonies of shore birds and vegetation that is typical of the salt marsh ecosystem. — 101

This information sheet was
prepared October 25, 1984

°AUTHORITY

The New Jersey Natural Lands Trust is a non-profit corporation established within the Department of Environmental Protection pursuant to Chapter 425, Public Laws of 1968. The purpose of the corporation is to acquire and hold lands determined to be significant as: Natural Areas; unique habitats; lands dedicated to passive recreation. These properties are administered for the benefit and enjoyment of all citizens of New Jersey.

The powers and duties of the Trust are vested in a Board of eleven trustees, six trustees being appointed by the Governor and five representatives of the State. The representatives of the State are: 1) a member of the State House Commission, designated by the Governor; 2) the State Treasurer; 3) Commissioner of the Department of Environmental Protection; and 4) two members of the staff of DEP, as designated by the Commissioner.

°MAPPING

The maps provided give general location of properties owned or controlled through easements by the Trust. These maps provide general indications of property areas and do not indicate precise boundaries. For map up-dates or more detailed information contact the Office of Natural Lands Management, Division of Parks and Forestry, New Jersey Department of Environmental Protection, CN404, Trenton, New Jersey 08625, (609) 984-1339.

NEW JERSEY AND NATIONAL REGISTERS
OF HISTORIC PLACES
Office of New Jersey Heritage
Division of Parks and Forestry
CN404, Trenton, New Jersey 08625
(609)292-2023

This information sheet was prepared on October 25, 1984

°STATE AND NATIONAL REGISTER PROGRAM

The National Register of Historic Places is the official list of America's historic and cultural resources. Districts, sites, buildings, structures and objects of significance in American history, architecture, archeology, culture, and engineering on the national, state, or local level are eligible for the National Register. The New Jersey Register of Historic Places is the official list of New Jersey's cultural resources. These Registers, though far from complete, are an important planning tool and document of the physical remains of New Jersey's past. The State and National Registers provide a degree of review and protection with regard to public encroachments.

°AUTHORITY

Review and Compliance - National Register

Section 106 of the National Historic Preservation Act of 1966, as amended, provides for the review of federal projects which may effect cultural resources listed with the National Register of Historic Places or cultural resources eligible for this listing. It is the responsibility of the Federal agency to present the State Historic Preservation Officer (SHPO) with adequate information on Register listings, or potentially eligible listings, and any effect the project may have on such listings. The SHPO's consultation comments generally include an opinion of eligibility. If cultural resources are identified which may be adversely affected by the proposed project, the Federal agency must work with the Advisory Council on Historic Preservation to resolve conflicts.

Review and Compliance - State Register

The State Register Law provides a review procedure for state, county, or municipal undertakings which may encroach upon State Register properties. In accordance with N.J.S.A. 13:1B-15.131, it is the responsibility of the state, county, or municipality to determine whether any of their undertakings encroach upon State Register properties and, if so, to provide information on project description, purpose and effect upon State Register properties to the Commissioner of the New Jersey Department of Environmental Protection. The Commissioner solicits the advice and recommendations of the New Jersey Historic Sites Council, an advisory body of public members appointed by the Governor. All State Register encroachment projects require authorization from the

Commissioner. An encroachment is an undertaking which will have an impact on a State Register property; it does not include routine maintenance. Review and authorization procedures are outlined in Section 6 of N.J.A.C. 7:4-1.1 et. seq., "Regulations and Procedures Concerning the New Jersey Register of Historic Places," copies of which are available upon request from the Office of New Jersey Heritage.

°MAPPING

The maps provided give general location of sites and their category of significance in federal and state programs. These maps should only be used as general guides for obtaining more detailed information and cannot be used for regulatory compliance. In addition, county and municipal historic preservation programs may vary with regard to information listed.

National Register listings - properties, districts or sites listed on the National Register of Historic Places. (All National Register properties are also listed on the State Register).

State Register listings - properties, districts or sites listed solely on the State Register of Historic Places.

Determination of Eligibility/SHPO Opinion - properties, districts or sites designated as eligible for the National Register.

State Historic Sites - properties, districts or sites owned by the State of New Jersey and administered as historic sites. Most State Historic Sites are included on the State and National Registers.

°OTHER INFORMATION

Additional information is available through the SHPO office. This includes:

°Detailed boundary delineations for all mapped sites.

°Register forms (with additional historic/research information) on all State and National Register sites.

°County, local or state-wide surveys undertaken to identify properties, districts or sites potentially eligible for National and State Register listing. This includes both above-ground and potential archaeological sites.

°Cultural resource reports conducted in conjunction with public undertakings.

NEW JERSEY AND NATIONAL REGISTERS
OF HISTORIC PLACES

Questions regarding these maps or requests for more detailed information should be made through the Office of New Jersey Heritage, Division of Parks and Forestry, NJDEP, CN404, Trenton, New Jersey 08625, (609)292-2023.

NEW JERSEY AND NATIONAL REGISTERS OF HISTORIC PLACES

DEP, Parks & Forestry, Office of New Jersey Heritage

Date Prepared : 8/7/84 Revision :

Mapped by the Army Map Service
Edited and published by the Geological Survey

Control by USC&GS and New Jersey Geodetic Survey

Topography from aerial photographs by photogrammetric methods. Aerial photographs taken 1942–1943. Field check 1943. Culture revised by the Geological Survey 1954

Polyconic projection. 1927 North American datum
10,000-foot grid based on New Jersey coordinate system
1000-meter Universal Transverse Mercator grid ticks, zone 18, shown in blue

Red tint indicates areas in which only landmark buildings are shown

Revisions shown in purple compiled by the Geological Survey from aerial photographs taken 1970. This information not field checked

Purple tint indicates extension of urban areas

PARKS AND FORESTRY ADMINISTERED
PROPERTIES, Division of Parks
and Forestry, NJDEP, CN404,
Trenton, New Jersey 08625
(609) 292-4852

This information sheet was
prepared on October 25, 1984

°MAPPING

The Division of Parks and Forestry has prepared these maps to show the areas within its jurisdiction. The bold lines indicate the property boundary. Note that these maps have been prepared as accurately as possible; however, there are limits to the accuracy of these maps and, in addition, new properties are frequently acquired. As such, these maps should only be used as general indications of property lines and should not be used to determine private property ownerships or, more importantly, boundaries for public access. For map up-dates or more detailed information, contact the Division of Parks and Forestry, Bureau of Planning, Engineering and Maintenance, NJDEP, CN404, Trenton, New Jersey 08625, (609) 292-4852.

°OTHER INFORMATION

The Division of Parks and Forestry can provide detailed information pertaining to individual parks, forests and other facilities maintained by the Division. This includes listings of activities and facilities available, park attendance, natural and cultural resources, access to facilities, acreage and forestry resource data. This information may be obtained from the Division of Parks and Forestry, Bureau of Planning, Engineering and Maintenance, NJDEP, CN404, Trenton, New Jersey 08625, (609) 292-4852.

°MAPPING

The Division of Fish, Game and Wildlife has prepared these maps to show the areas within its jurisdiction. The bold lines indicate the property boundary. Note that these maps have been prepared as accurately as possible; however, there are limits to the accuracy of these maps and, in addition, new properties are frequently acquired. As such, these maps should only be used as general indications of property lines and should not be used to determine private property ownerships or, more importantly, boundaries for public access. For map up-dates or more detailed information concerning these facilities, contact the Division of Fish, Game and Wildlife, NJDEP, CN 400, Trenton, New Jersey 08625, (609) 292-9480
