TRENTON, N. J.:

THE TRENTON ELECTRIC PRINTING CO.

1891.

REPORT

OF THE

STATE BOARD OF EDUCATION.

To the Honorable the Senate and General Assembly of the State of New Jersey :

In accordance with law, the annual report of the State Board of Education is hereby presented for the school year ending August 31st, 1890.

In the report of the State Superintendent of Public Instruction and the accompanying tables, transmitted herewith, will be found full statistics respecting the working of the public school system.

At a meeting of the board, held April 8th, 1890, the apportionment of the State school tax among the counties for the year 1890-91 was reported by the State Comptroller as follows :

Atlantic, \$23,878.96 ; Bergen, \$52,340.16 ; Burlington, \$78,945.34 ; Camden, \$83,282.09 ; Cape May, \$14,515.70 ; Cumberland, \$47,119.50 ; Essex, \$425,728.70 ; Gloucester, \$47,700.65 ; Hudson, \$374,529.40 ; Hunterdon, \$65,893.42 ; Mercer, \$125,147.81 ; Middlesex, \$61,589.77 ; Monmouth, \$118,278.21 ; Morris, \$68,412.09 ; Ocean, \$13,573.04 ; Passaic, \$112,154.13 ; Salem, \$48,311.08 ; Somerset, \$52,591.03 ; Sussex, \$31,907.62 ; Union, \$90,210.57 ; Warren, \$59,150.71.

The reserve fund, being ten per centum of the total amount of the State school tax, was apportioned among the counties by the board as follows :

Atlantic, \$9,312.90 ; Bergen, \$5,234.02 ; Burlington, \$7,894.53 ; Camden, \$18,253.21 ; Cape May, \$1,451.57 ; Cumberland, \$6,711.95 ; Essex, \$37,572.87 ; Gloucester, \$4,270.07 ; Hudson, \$37,452.94 ; Hunterdon, \$790 ; Mercer, \$5,108.22 ; Middlesex, \$8,283.97 ; Monmouth, \$9,027.83 ; Morris, \$6,841.21 ; Ocean, \$8,857.30 ; Passaic, \$11,215.41 ; Salem, \$1,606.11 ; Sussex, \$4,705.76 ; Union, \$9,021.06 ; Warren, \$5,915.07.

The total amount expended for all purposes connected with the school system of the State was \$3,502,976.81. Of this amount

\$2,708,807.37 was expended for the current expenses of the schools, and \$638,800.62 was expended for building and repairing school-houses. The balance, \$155,368.82, was the amount paid from the school fund for the following purposes: Office expenses of the Department of Public Instruction; State Normal School; Farnum Preparatory School; School for Deaf Mutes; School Libraries; Teachers' Institutes; expenses of this board, and expenses of the care of the School Fund. The total value of the school property in the State is \$8,629,793, an increase of \$329,183. The total number of children in the State between the ages of five and eighteen years is 410,512, an increase of 11,460.

During the year the board appointed the following County Superintendents:

Burlington, Edgar Haas, re-elected; Camden, Charles S. Albertson, vice F. R. Brace; Cape May, Vincent O. Miller, re-elected; Gloucester, James Gallaher, vice William Milligan; Mercer, Lloyd Wilber, re-elected; Middlesex, H. Brewster Willis, re-elected; Monmouth, Samuel Lockwood, re-elected; Morris, James O. Cooper, vice B. C. Megie, deceased; Ocean, Edward M. Lonan, re-elected; Somerset, William T. F. Ayers, re-elected; Sussex, Luther Hill, re-elected.

LEON ABBETT,
President.

STATE OF NEW JERSEY,
DEPARTMENT OF PUBLIC INSTRUCTION,
TRENTON, N. J., February 1st, 1891. }

To the State Board of Education :

GENTLEMEN—In compliance with the requirements of the School law, I herewith present to you my report for the school year which ended on the 31st of August, 1890, with the statistical tables, and the reports of the city and county superintendents. Notwithstanding every possible effort has been made by this office to get prompt reports from the school districts, the delinquencies and errors have made it impossible for me to compile the statistics earlier.

Respectfully yours,

EDWIN O. CHAPMAN,

State Superintendent.

ANNUAL REPORT.

Again I am able to report a very marked improvement in the school-houses of the State. The old, inconvenient and unhealthy structures are, too, slowly but surely disappearing, and in their places we are able to point to houses that are built with an intelligent regard for the comfort and health of the pupils, particular attention having been given to all the details of heating, lighting, furnishing, room for clothing, &c. This improvement is by no means limited to the cities and larger villages, but is to be noted, also, in the smaller and sparsely populated districts. Nor is it confined to the new school-houses, for the old ones, wherever possible, are being constantly improved, with the same careful attention to the details which are now considered essential, but which, a few years ago, were entirely overlooked, or considered of little or no importance.

A still greater improvement, which cannot be shown in our statistics, is to be noted in the qualifications of our teachers and the methods of instruction. This is due, partly, to the care that is taken in examinations and to the Teachers' Institutes, but more to the voluntary efforts of the teachers themselves. In nearly all the counties the teachers are organized into associations, which meet for self-improvement monthly, bi-monthly or quarterly, thus supplementing the work done at the annual institutes. School boards have been quick to appreciate our efforts in this direction, and they exercise greater caution in the employment of teachers. They are also more liberal in the matter of salaries, which show an increase over those of the previous year.

The attendance of pupils has not been as satisfactory as might be wished, but, on the whole, there has been no falling off except in the matter of regularity.

A full summary of general statistics is here presented :

SUMMARY OF STATISTICS.

	1888-89.	1889-90.	Increase or decrease.
REVENUE.			
State school tax appropriated by the State.....	\$1,939,235 00	\$1,995,260 00	\$56,025 00 increase.
Additional State appropriation.....	100,000 00	100,000 00	
Township school tax.....	47,224 04	30,589 25	16,634 79 decrease.
Interest of surplus revenue.....	32,262 04	31,982 99	279 05 decrease.
District and city tax for teachers' salaries.....	523,797 72	504,618 51	21,179 21 decrease.
District and city tax for building and repairing school-houses.....	678,548 22	638,800 62	39,747 60 decrease.
Total amount for maintaining the schools.....	2,644,518 80	2,662,451 75	17,931 95 increase.
Total amount, including that raised for building.....	3,323,067 02	3,301,251 37	21,815 65 decrease.
Value of school property.....	8,300,610 00	8,629,793 00	329,183 00 increase.
DISTRICT SCHOOL TAX.			
Number of districts that raise tax to pay teachers' salaries.....	250	278	2 decrease.
Number of districts that raise tax to build or repair school-houses.....	416	398	18 decrease.
Number of districts that raise no tax.....	855	901	16 increase.
COST OF EDUCATION.			
Average cost per pupil, calculated on total school census.....	\$6 63	\$6 57	\$0 06 decrease.
Average cost per pupil, calculated on enrolled attendance.....	11 63	11 52	11 decrease.
Average cost per pupil, calculated on average attendance.....	18 98	20 23	1 25 increase.
NUMBER OF TEACHERS.			
Males.....	802	822	20 increase.
Females.....	3,497	3,643	146 increase.
SALARIES OF TEACHERS.			
Average salary per month paid to male teachers.....	\$71 86	\$76 02	\$4 16 increase.
Average salary per month paid to female teachers.....	42 76	43 62	86 increase.
TEACHERS' CERTIFICATES (COUNTY).			
First Grade.....	{ Number granted to males.... 65	44	21 decrease.
	{ Number granted to females.... 76	85	9 increase.
Second Grade.....	{ Number granted to males.... 91	84	7 decrease.
	{ Number granted to females.... 299	283	16 decrease.
Third Grade.....	{ Number granted to males.... 265	304	39 increase.
	{ Number granted to females.... 973	980	7 increase.
Total number granted to males.....	421	432	11 increase.
Total number granted to females.....	1,348	1,348	
Total number granted.....	1,769	1,780	11 increase.
Number of applicants rejected.....	939	1,051	112 increase.
Per cent. of rejections out of total number examined.....	.347	.371	.024 increase.

SUMMARY OF STATISTICS—Continued.

	1888-89.	1889-90.	Increase or decrease.
SCHOOL DISTRICTS, HOUSES, ETC.			
Number of townships and cities.....	286	293	7 increase.
Number of school districts.....	1,379	1,383	4 increase.
Number of school buildings.....	1,642	1,663	21 increase.
Number of school buildings owned.....	1,595	1,621	26 increase.
Number of school buildings rented.....	47	52	5 increase.
Number of school departments.....	4,285	4,345	60 increase.
Number of unsectarian private schools.....	124	142	18 increase.
Number of sectarian private schools.....	111	114	3 increase.
Number of school visits by county superintendents.....	5,183	4,689	494 decrease.
Average number of visits for each district.....	3.81	3.49	.32 decrease.
CONDITION OF SCHOOL PROPERTY.			
Number of buildings denominated very poor...	69	55	14 decrease.
Number poor.....	105	94	11 decrease.
Number medium.....	239	274	35 increase.
Number good.....	567	562	5 decrease.
Number very good.....	662	678	16 increase.
Number of new buildings erected.....	32	30	2 decrease.
Number of buildings repaired, refurnished or remodeled.....	51	53	2 increase.
VALUATION OF SCHOOL PROPERTY.			
Number of buildings valued at \$100 or less.....	23	20	3 decrease.
Number valued between \$100 and \$500.....	237	214	23 decrease.
Number valued between \$500 and \$1,000.....	481	500	19 increase.
Number valued between \$1,000 and \$5,000.....	535	576	21 increase.
Number valued between \$5,000 and \$10,000.....	103	105	2 increase.
Number valued between \$10,000 and \$20,000.....	84	87	3 increase.
Number valued between \$20,000 and \$40,000.....	75	84	9 increase.
Number valued above \$40,000.....	37	35	2 decrease.
Average value.....	\$5,267 00	\$5,324 00	\$57 00 increase.
ATTENDANCE.			
Total school census between five and eighteen years of age.....	399,052	410,512	11,460 increase.
Total enrollment in the public schools.....	227,441	234,072	6,631 increase.
Number attending the public schools ten months.....	8,552	9,499	947 increase.
Number attending between eight and ten months.....	71,846	73,301	1,455 increase.
Number attending between six and eight months.....	43,533	44,866	1,333 increase.
Number attending between four and six months.....	34,512	36,467	1,955 increase.
Number attending less than four months.....	68,998	69,939	941 increase.
Average attendance upon the public schools....	139,272	133,286	5,986 decrease.
Number of children the public schools will seat.....	213,450	223,946	10,496 increase.
Number attending private schools.....	45,765	47,279	1,514 increase.
Number attending no school.....	115,726	126,070	10,344 increase.

SUMMARY OF STATISTICS—Continued.

	1888-89.	1889-90.	Increase or decrease.
PERCENTAGE OF ATTENDANCE.			
Percentage attending ten months.....	.038	.040	.002 increase.
Percentage attending between eight and ten months.....	.316	.313	.003 decrease.
Percentage attending between six and eight months.....	.191	.192	.001 increase.
Percentage attending between four and six months.....	.152	.156	.004 increase.
Percentage attending less than four months.....	.303	.299	.004 decrease.
Percentage of average attendance.....	.612	.569	.043 decrease.
Percentage attending public schools.....	.587	.575	.012 decrease.
Percentage attending private schools.....	.117	.116	.001 decrease.
Percentage attending no school.....	.296	.309	.013 increase.
Percentage of census the schools will accommodate.....	.530	.545	.015 increase.
SCHOOL TERMS.			
Number of districts that maintained school less than six months.....	8	8
Number that maintained school six months but less than nine months.....	45	42	3 decrease.
Number that maintained school nine months or more.....	1,326	1,333	7 increase.
Average time the schools have been kept open.	{ 9 months, 10 days.	{ 9 months, 12 days.	} 2 days increase.
DISTRICT SCHOOL CENSUS.			
Number of districts with less than forty-five children.....	199	214	15 increase.
Number having between forty-five and eighty children.....	647	643	4 decrease.
Number having between eighty and one hundred and twenty children.....	223	222	1 decrease.
Number having between one hundred and twenty and two hundred children.....	135	121	14 decrease.
Number having between two hundred and five hundred children.....	105	107	2 increase.
Number having more than five hundred children.....	70	76	6 increase.
Average number in the districts, excluding the cities.....	113	129	16 increase.
Average number in the districts, including the cities.....	284	297	13 increase.

REVENUES FOR SCHOOL PURPOSES.

It is a wise provision of our school law that the moneys appropriated by the State must be used for teachers' salaries and fuel only, with the exception of \$20 for each district for incidental expenses, and that the school-houses must be erected, furnished and kept in repair with moneys raised by local district taxes.

The increase in the State appropriation (the proceeds of the State school tax), which is shown in the preceding summary, is due entirely to the increase in the school census of children between the ages of five and eighteen years, \$5 being collected and appropriated for each child. The table shows an increase over the previous year in the amount received from all sources for the maintenance of the schools; but for teachers' salaries and for building and repairing there has been a decrease in district taxes. This may be accounted for by the fact that in the previous year there was a large increase in both of these items.

Of the 1,383 districts in the State, 278 raised district taxes to supplement the amounts received from the State for teachers' salaries, and 398 raised district taxes for building. In Hudson and Union counties all but one district were thus taxed; in Essex all but four; in Camden all but ten, and in Bergen all but fifteen. In Cape May and Gloucester, more than half of the districts raised local taxes for these purposes.

In Table IV., accompanying this report, will be found these statistics for each of the counties.

The whole amount expended in maintaining the schools during the year was \$2,662,451.75, an increase over the previous year of \$17,931.95. This is an increase of less than three-fourths of one per cent., the school census showing an increase of nearly three per cent., and the enrollment in the schools about the same increase.

SCHOOL-HOUSES.

The total value of the school-houses and grounds of the State is estimated at \$8,629,793, an increase of \$329,183 over the estimate of the previous year. No part of this increase is due to an appreciation of values, but wholly to the new property acquired and to repairs and alterations.

The following table shows the valuations in the several counties, compared with the valuations given in my last report:

VALUATIONS OF SCHOOL PROPERTY.

	1889-90.	1888-89.
Atlantic	\$170,950	\$172,090
Bergen	333,500	323,450
Burlington	261,900	256,750
Camden	613,050	547,375
Cape May.....	76,100	73,800
Cumberland.....	199,550	194,000
Essex	2,039,825	1,920,175
Gloucester.....	139,700	138,200
Hudson.....	1,219,930	1,157,650
Hunterdon.....	222,350	207,100
Mercer.....	411,418	366,130
Middlesex	364,950	363,700
Monmouth.....	388,250	468,400
Morris.....	305,730	294,900
Ocean	81,100	71,650
Passaic.....	567,950	545,400
Salem	124,700	126,250
Somerset.....	134,900	134,800
Sussex.....	130,250	128,300
Union.....	577,350	555,350
Warren.....	256,340	255,640

A comparison of the above figures shows that the school properties in Atlantic, Monmouth and Salem counties have decreased in value, while in all the other counties the valuations have increased. Ocean shows an increase of 13 per cent.; Mercer, 12 per cent.; Camden, 10 per cent.; Hunterdon, 7 per cent.; Essex, 6 per cent., and Hudson, 5 per cent.

The total number of school-houses in the State is 1,673, an increase of 31 over the number reported in the previous year. Of these, 678 are reported as "very good;" 562 as "good;" 274 as "medium;" 94 as "poor," and 55 as "very poor." The figures in my last report were 662 "very good;" 567 "good;" 239 "medium;" 105 "poor," and 69 "very poor." It must be borne in mind that the standard for a good school is being raised year by year, so that these figures show a greater improvement than is apparent in their values.

In the matter of school room in the country districts, the villages and the smaller cities, with few exceptions, room and seating capacity are provided for all the children who attend or ought to attend school; in the larger cities, where the population is increasing rapidly, additional school room is not provided to keep pace with the growing demand, and there is still a lack of school facilities.

The percentage of the total school census of children between the ages of five and eighteen years that the schools of each of the cities will accommodate, is shown as follows, with the same percentage for the four previous years :

Cities, &c.	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.
Long Branch.....	.85	.73	.51	.57	.54
Salem84	.83	.84	.85	.65
Woodbury72	.61	.60	.60	.60
Millville.....	.69	.86	.75	.68	.66
Montclair69	.66	.85	.86	.71
Lambertville.....	.65	.64	.60	.60	.60
East Orange64

Phillipsburg61	.56	.66	.65	.65
Dover.....	.60	.58	.50	.57	.62
Princeton59	.59	.55	.57	.51
Passaic.....	.59	.48	.55	.59	.48
Burlington55	.53	.59	.59	.43
Bayonne.....	.51	.51	.47	.50	.44
Bordentown.....	.51	.51	.51	.50	.51
Camden50	.30	.30	.46	.44
Perth Amboy.....	.46	.28	.28	.27	.30
Trenton.....	.43	.44	.40	.40	.40
Paterson.....	.43	.43	.48	.41	.41
New Brunswick.....	.41	.49	.41	.42	.46
Morristown.....	.41	.43	.46	.42	.46
Newark41	.42	.40	.43	.41
Gloucester City.....	.39	.40	.43	.43	.43
Elizabeth36	.33	.32	.29	.30
Orange34	.30	.31	.34	.34
Hoboken.....	.31	.33	.35	.39	.35
Jersey City.....	.25	.25	.27	.31	.32

These figures may be misleading without a word of explanation. It must not be inferred from them that the eleven cities that show a slight decrease in the percentage of children that they can accommodate have not added to their school facilities during the year, but that they have not provided additional school room as rapidly as their school population increased. Nor do the figures show so large a degree of illiteracy as they may appear to. In previous reports I have made a careful estimate of the number of children that leave school before the age of eighteen, and the number that are enrolled in

the census, but have not yet commenced their attendance. I have thus accounted for about thirty per cent. of the school census. If we add to this the percentage that are attending other than public schools, we diminish very materially the suspicion of illiteracy.

In the above list are eleven cities that furnish accommodations for less than one-half of their school population. In the following table these figures are compared with others showing the number of children enrolled in the schools during the year, the number attending private schools, and the number attending no school :

CITIES.	Percentage the schools will accommodate.	Percentage enrolled.	Percentage attending private schools.	Percentage attending no school.
Perth Amboy.....	.46	.49	.31	.30
Trenton.....	.43	.57	.18	.25
Paterson.....	.48	.57	.10	.33
New Brunswick.....	.41	.47	.24	.29
Morristown.....	.41	.43	.27	.30
Newark.....	.41	.45	.15	.40
Gloicester City.....	.39	.53	.20	.19
Elizabeth.....	.36	.48	.34	.28
Orange.....	.34	.36	.33	.31
Hoboken.....	.31	.41	.10	.49
Jersey City.....	.25	.32	.19	.58

If, in each of the five cities named above that report more than thirty per cent. of the children as attending no school, my estimate be correct as to the number that have received a fair education, there still remains too large a number who appear to be growing up without any school training at all. But it is fair to suppose that many of them will be found in the schools before they reach the age of eighteen. It may be noted, too, that the four large cities that report the largest percentage as attending no school also report the smallest percentage as attending private schools. It is very probable that the census takers report many as attending no school, who are really in attendance at a private school.

With respect to the number of rooms in each, the school-houses of the State may be classified as follows :

COUNTIES.	One room.	Two rooms.	More than two rooms.
Atlantic.....	35	6	12
Bergen.....	38	20	16
Burlington.....	92	14	16
Camden.....	40	13	29
Cape May.....	19	7	5
Cumberland.....	48	20	19
Essex.....	10	14	67
Gloucester.....	37	23	11
Hudson.....	2	5	47
Hunterdon.....	83	15	12
Mercer.....	52	3	26
Middlesex.....	51	13	20
Monmouth.....	86	26	14
Morris.....	77	22	14
Ocean.....	42	7	6
Passaic.....	32	3	24
Salem.....	53	14	8
Somerset.....	61	5	6
Sussex.....	85	12	3
Union.....	8	4	27
Warren.....	81	6	7
Total.....	1,032	252	389

The number of one-room houses is decreasing year by year, while the number of larger houses is steadily increasing. In my last report the figures were—one room, 1,040; two rooms, 249; more than two rooms, 353.

Thirty new school-houses were erected during the year, making the total number 1,673. Of these 52 are rented, the others owned by the districts; 1,233 are constructed of wood; 368 of brick and 72 of stone. Three hundred and seventy-eight buildings are provided with efficient systems of ventilation. In this important matter there has been a noteworthy improvement during the year. My last report gave the number with such approved systems of ventilation as 337.

Full statistics as to the condition of the school-houses of all the counties, and also for the cities by themselves, are given in the accompanying Tables VII., VIII., IX. and X.

FURNITURE AND SUPPLIES.

In the matter of furniture and such supplies as should be found in every school-house, I am able to report a steady improvement from year to year. Last year there were 231 buildings furnished with the old-fashioned, home-made seats and desks; this year the number is reduced to 219. In Somerset and Union counties they have entirely disappeared, and there is but one house so furnished in each of the counties of Camden, Gloucester and Middlesex.

About 92 per cent. of all the schools are provided with maps and charts; 84 per cent. have unabridged dictionaries and about two-thirds of them have globes. The value of all other school apparatus has increased during the year from \$39,004 to \$43,269.

The number of schools that are not provided with sufficient black-boards is reduced since last year from 262 to 245. Fifty-eight per cent. of all the schools have school libraries, established and augmented year by year by the State appropriations. Full statistics of all these details are given in Tables XI. and XII.

SCHOOL CENSUS.

The increase in the census of children of school age in the entire State is about the same as in the previous year—.029. The increase in the cities is about .012.

The variations in the census for the past three years is shown as follows:

Counties.	Increase.			Decrease.		
	1889-90.	1888-89.	1887-88.	1889-90.	1888-89.	1887-88.

It will be seen that the greatest increase in the census is in those counties that have the large cities, while in the counties that have few or no large towns the census is a decrease. The large decrease reported from Camden county is probably due to an error, made

either in this year or in the previous year in the city of Camden. The census in the cities has such an important bearing upon the returns from the entire counties that I present the figures for the cities as follows :

Cities.	Increase.			Decrease.		
	1889-90.	1888-89.	1887-88.	1889-90.	1888-89.	1887-88.
Atlantic City.....	.005	.064	.184
Bayonne.....	.016	.087	.006

Woodbury.....	.07092018

The returns from Long Branch, as well as those from Camden, cannot be correct, if those for previous years were correct. As the census taken each year is the basis for the annual State school tax and the State appropriation, too great care cannot be taken by boards of education to have it correct. Any unusual variation in the returns should receive the closest scrutiny, and if enumerators have been careless the census should be taken again. With the two exceptions noted, all of the variations in the above table may be reasonably

explained, except in the figures for New Brunswick, where there was evidently an error in the census of the previous year. The greatest increase is to be found in the largest cities, while some of the small cities are declining in school population. In many country districts there is also a steady decline.

The following shows in convenient form the comparative increase of school population in the counties over the previous year :

Essex066
Hudson055
Mercer054
Passaic048
Middlesex045
Bergen033
Gloucester029
Cape May.....	.023
Ocean021
Monmouth014
Somerset012
Cumberland011
Union01
Atlantic.....	.006

The following counties report a decrease :

Burlington001
Sussex.....	.006
Warren014
Salem022
Morris... ..	.026
Hunterdon026
Camden.....	.066

The cities that report an increase are :

New Brunswick...	.149
Perth Amboy.....	.105
Millville089
Dover.....	.083
Hoboken079
Newark078
Trenton072
Montclair071
Woodbury.....	.07

Princeton.....	.035
Burlington.....	.041
Camden118
Long Branch.....	.126

ATTENDANCE OF PUPILS.

The whole number of children of school age in the State, as enumerated by the last census, was 410,512, and 234,072 attended the public schools during the whole or a part of the year. As returned by the census takers, the whole number who attended private schools was 34,850, and 78,906 were reported as attending no school.

The following statistics relating to attendance during the past four years are of interest :

	1889-90.	1888-89.	1887-88.	1886-87.
Per cent. of census attending the public schools.....	.57	.57	.59	.61
Per cent. of census attending the private schools.....	.12	.11	.12	.10
Per cent. of census attending no school during the year.....	.31	.32	.29	.29
Per cent. of total enrollment attending ten months.....	.04	.04	.05	.05
Per cent. of total enrollment attending between eight and ten months.....	.31	.32	.29	.29
Per cent. of total enrollment attending between six and eight months.....	.19	.19	.18	.18
Per cent. of total enrollment attending between four and six months.....	.16	.15	.16	.16
Per cent. of total enrollment attending less than four months.....	.30	.30	.32	.32

The most remarkable thing about these statistics is these slight variation from year to year. The attendance is not falling off, and of those enrolled on the school registers there is a slight improvement. If more ample school facilities were provided in the large cities, I am certain that there would be a larger proportion of the children enrolled, and a larger attendance of those enrolled.

In the proportion of the entire school census enrolled in the public schools for some period during the year, the counties compare as follows:

	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.
Cape May88	.89	.88	.85	.85
Gloucester86	.82	.82	.84	.79
Atlantic.....	.85	.74	.75	.80	.75
Sussex84	.84	.85	.87	.85
Cumberland.....	.83	.83	.84	.84	.82
Salem82	.81	.81	.85	.81
Hunterdon.....	.81	.80	.80	.80	.77
Ocean80	.85	.80	.80	.78
Burlington72	.67	.66	.66	.68
Camden72	.62	.64	.69	.67
Somerset.....	.71	.73	.75	.73	.72
Monmouth.....	.70	.68	.70	.69	.70
Union67	.53	.54	.53	.53
Morris65	.67	.68	.67	.67
Bergen64	.61	.66	.64	.64
Middlesex63	.64	.62	.60	.59
Mercer62	.56	.56	.55	.56
Warren61	.77	.89	.81	.82
Passaic.....	.57	.58	.58	.67	.66
Essex48	.49	.48	.50	.50
Hudson38	.42	.43	.45	.48

Decided improvement is shown in Burlington, Camden, Union and Mercer counties. The counties highest in the list are those in which the conditions for attendance are most unfavorable, where the roads are bad, for a considerable portion of the year, the districts are larger, and where the children may find employment at home during the summer. That more than eighty per cent. of the entire number of children in Sussex and Hunterdon, for instance, should be found enrolled in the school registers is quite remarkable.

The counties lowest in the above list are those that contain the large cities. The percentage of the school census found enrolled in all the cities is here given:

	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.
Millville89	.82	.87	.93	.89
Woodbury84	.73	.81	.87
Atlantic City76	.66	.69	.84	.74
Bridgeton.....	.76	.69	.69	.70	.70
Camden74	.58	.62	.69	.65
Salem73	.73	.73	.86	.67
Montclair72	.71	.68	.69
Dover.....	.71	.73	.65	.70
East Orange.....	.70	.69
Passaic69	.62	.60	.63	.55
Long Branch.....	.67	.53	.51	.54
Rahway66	.65	.68	.66	.68
Bavonne.....	.64	.72	.70	.71
Bloomfield59	.62	.60	.59
Phillipsburg59	.61	.69	.72	.72
Plainfield59	.57	.67	.63	.60
Paterson.....	.57	.56	.56	.68	.67
Trenton57	.53	.50	.46	.50
Burlington55	.56	.54	.59
Princeton55	.55	.54	.64
Gloucester City52	.54	.59	.60	.64
Lambertville.....	.50	.48	.48	.51
Perth Amboy.....	.49	.40	.39	.41	.45
Elizabeth.....	.48	.44	.43	.43	.43
New Brunswick.....	.47	.48	.44	.47	.49
Bordentown.....	.45	.43	.46	.44
Newark45	.48	.44	.47	.49
Morristown43	.45	.47	.48	.51
Hoboken41	.42	.45	.42	.44
Orange36	.34	.36	.35	.36
Jersey City.....	.32	.38	.39	.43	.46

We note an important increase of enrollment in Woodbury, Atlantic City, Bridgeton, Camden, Passaic, Long Branch, Trenton, Perth Amboy and Elizabeth, and a decided decrease in Bayonne, Phillipsburg, Gloucester City, Morristown, Newark and Jersey City.

REGULARITY AND PUNCTUALITY OF PUPILS.

Statistics as to absenteeism and tardiness have been carefully gathered and compiled, and are presented below. The absentees is, for the entire State, one per cent. below that of the previous year, and the cases of tardiness are reduced five-hundredths of one per cent.

COUNTIES.	Average enrollment in each room.	Average daily attendance.	Average number of cases of tardiness per day for each room.	Average daily percentage of absentees.
Atlantic.....	39	30	1.29	.21
Bergen.....	39	31	.74	.31
Burlington.....	36	27	1.37	.27
Camden.....	45	33	1.05	.23
Cape May.....	42	30	1.31	.15
Camberland.....	40	34	1.18	.18
Essex.....	42	37	.37	.17
Gloucester.....	35	29	1.62	.06
Hudson.....	41	39	1.34	.17
Hunterdon.....	30	25	.98	.18
Mercer.....	34	28	1.27	.10
Middlesex.....	39	35	.50	.22
Monmouth.....	42	33	.84	.16
Morris.....	38	33	.88	.33
Ocean.....	36	24	1.46	.20
Passaic.....	42	37	1.23	.18
Salem.....	32	26	1.01	.19
Somerset.....	32	26	.92	.19
Sussex.....	27	21	1.41	.22
Union.....	37	32	.74	.14
Warren.....	33	28	.81	.15
Total.....	37	30	1.06	.19

From the above we gather that the absenteeism averages about nineteen per cent. Eleven of the counties report a better attendance than this, Gloucester leading the list with only an average of five per cent. In Bergen and Morris counties the absenteeism is altogether too large, and steps should be taken to correct it.

The same statistics are given for the cities as follows:

CITIES.	CITIES.			
	Average enrollment in each room.	Average daily attendance.	Average number of cases of tardiness per day for each room.	Average daily percentage of absenteeism.
Atlantic City	47	38	.44	.19
Bayonne	39	38	.82	.17
Bloomfield	35	31	.63	.11
Bordentown	34	29	.33	.18
Bridgeton	44	38	1.42	.14
Burlington	45	37	1.82	.17
Camden	43	33	.94	.23
Dover	52	61	.75	.02
East Orange	33	32	.19	.03
Elizabeth	42	39	.94	.07
Houcouster City	57	38	.67	.33
Hoboken	42	36	.89	.14
Jersey City	87	35	1.60	.30
Lambertville	34	23	.78	.18
Long Branch	46	42	.99	.09
Millville	32	28	.11	.12
Montclair	40	31	.95	.22
Morristown	38	34	.69	.11
Newark	49	44	.08	.10
New Brunswick	35	35	.95	.05
Orange	37	34	.24	.08
Passaic	42	37	1.08	.12
Paterson	45	39	.99	.13
Perth Amboy	43	39	.28	.09
Phillipsburg	32	30	.75	.06
Plainfield	35	32	.10	.09
Princeton	40	27	4.11	.82
Rahway	40	32	.90	.20
Salem	31	28	.79	.11
Trenton	39	33	.93	.16
Woodbury	40	33	2.32	.17
Total	40	35	.89	.14

This is a much better showing than that made by the entire counties with the cities included. In Elizabeth, Long Branch, New Brunswick, Orange, Perth Amboy, Phillipsburg and Plainfield, the absences have been less than 10 per cent. of the enrollment; in East Orange they have been reduced to 3 per cent., and in Dover to 2 per cent. Newark also makes a good report, of only 10 per cent. of absences and less than one in five hundred pupils tardy.

The average daily attendance for the entire State is 81 per cent. of the children registered; in the cities alone, 86 per cent. The great number of cases of tardiness in Princeton and Woodbury are unaccounted for.

THE SCHOOL TERM.

The law requires the schools to be kept open not less than 9 school months of 20 school days each. The average for the entire State was 9 months and 12 days. The average for the cities was 10 months. These averages have varied but very slightly for a number of years.

In average lengths of their school terms, the counties compare as follows: Bergen and Hudson, 10 months and 4 days; Essex, 10 months and 2 days; Mercer, Passaic and Somerset, 10 months; Union, 9 months and 18 days; Hunterdon, 9 months and 16 days; Camden, Middlesex and Morris, 9 months and 14 days; Salem, Sussex and Warren, 9 months and 12 days; Gloucester and Monmouth, 9 months and 10 days; Burlington and Cumberland, 9 months and 4 days; Cape May, 9 months and 2 days. The average term in Atlantic and Ocean counties was a few days short of 9 months, owing to the closing of a few schools on account of sickness.

In the cities, the longest average term was in Millville—10 months and 14 days. In Bordentown, Burlington, Camden and Gloucester City, the average term was 10 months and 10 days; in Bloomfield, East Orange, Orange and Newark, 10 months and 4 days; in Montclair, 10 months and 2 days; in Elizabeth, 9 months and 16 days; New Brunswick, 9 months and 14 days; Atlantic City and Bridgeton, 9 months and 10 days; and in Jersey City and Long Branch, 9 months and 6 days. In each of the other fifteen cities, the average term was 10 months.

TEACHERS AND METHODS.

Four thousand four hundred and sixty-five teachers are employed in the State, an increase of 166 over the number employed in the previous year. Of these, 822 are men, an increase of 20 over the previous year, and 3,643 are women, an increase of 146. More than one-half of the teachers—2,259—are employed in the cities. Of the city teachers, 158 are men and 2,101 are women. Of the teachers employed in the cities, about 7 per cent. are men, while the proportion of men in the districts outside of the cities is 37 per cent.

The County Superintendents all report efficient and constantly improving service, and what personal observation I have been able to make confirms these reports. It is difficult to gather statistics which will show improvements in methods or results, but for some years I have gathered figures upon some important points which are collated as follows:

USE OF TEXT-BOOKS, ETC.

COUNTIES.	Number of teachers too closely confined to text-books in hearing recitations.	Number of teachers not too closely confined to text books in hearing recitations.	Average number of studies pursued in the schools.	Average number of recitations heard daily.
Atlantic.....	80	71	22	19

Woodbury.....		17	17	16	
Total.....	108	2,161	9	9	

There is nothing that makes the inefficiency of a teacher more apparent than his manner of conducting a recitation. The teacher who cons his text-book for question and answer is certainly not to be ranked very high in the scale of efficiency. It is the extent of this defect that we have endeavored to find and to give in the above tables. Some allowance must be made for the fact that the local superintendents are becoming more critical upon this point every year, but their standards may generally be accepted as correct. It is encouraging to note a constant improvement in this important feature of school work, the number of teachers who thus improperly use the text-books having been reduced since my previous report, in the entire State, from 638 to 470, and in the cities, from 244 to 108.

An excessive number of daily recitations indicates imperfect classification, or an inability to connect branches of study and classes in general exercises. From the city reports we gather that the average number of daily recitations is nine. As the average for the entire State is fifteen, the teacher in the country district must attempt many

more within the five and a half hours of the daily school session. In fact, the averages reported from Ocean and Sussex counties are twenty-five and twenty-three, respectively. In the ungraded schools there must, of necessity, be more recitations than in the cities, but these numbers are much too large to be consistent with good work. In this matter we are glad to note an improvement in Atlantic, Burlington, Cape May, Salem and Sussex counties.

TEACHERS' SALARIES.

The average monthly salaries paid to men was \$76.02, and to women \$43.62. This is an increase over the previous year of \$4.16 for men and eighty-six cents for women. For all the teachers of the State, the average monthly salary was \$49.58, an increase of \$1.39.

As the average school term was nine and six-tenths months, we find the average yearly salaries may be presented as follows for the past two years:

	1889-90.	1888-89.
For men.....	\$729 79	\$682 67
For women.....	418 75	406 22
For all.....	475 97	457 81

In the cities, the average monthly salaries paid to men was \$138.21; to women, \$49.02. As compared with the previous year, this is a decrease of \$8.86 for men and of twenty-two cents for women. For all the teachers, the average has decreased from \$56.01 to \$55.26. As the schools were open in the cities an average of ten months, we may reckon the average yearly salaries as follows:

	1889-90.	1888-89.
For men.....	\$1,382 10	\$1,470 70
For women.....	490 20	492 60
For all	552 60	560 10

The changes in the average monthly salaries in the several counties are here shown:

COUNTIES.	Increase in the average salary paid to men.	Decrease in the average salary paid to men.	Increase in the average salary paid to women.	Decrease in the average salary paid to women.
Atlantic.....		\$3 00		\$3 17
Bergen.....	\$1 33		\$0 84	
Burlington.....		21 17		84
Camden.....	8 75		2 23	
Cape May.....		07	1 59	
Cumberland.....	46			98
Essex.....		1 72		18
Gloucester.....	3 51		98	
Hudson.....		17 96		81
Hunterdon.....		97	2 18	
Mercer.....	30 73		5 43	
Middlesex.....		4 78	1 25	
Monmouth.....	1 11		20	
Morris.....		2 73	1 57	
Ocean.....	83		1 86	
Passaic.....	13 38		4 65	
Salem.....	2 82		1 98	
Somerset.....	6 71		1 16	
Sussex.....	64		99	
Union.....		4 63		14
Warren.....	41		41	

Eleven counties report an increase in the salaries of both men and women; five counties report a decrease in both. In Cumberland, the salaries of the men have been increased and the salaries of the women decreased. In Cape May, Hunterdon, Middlesex and Morris, the women have received more and the men less. The increase to both men and women in Mercer and Passaic counties is notably large, as is the increase to the salaries of men in Camden, Passaic and Somerset.

Similar statistics for the cities are as follows:

CITIES.	Increase in the average salary paid to men.	Decrease in the average salary paid to men.	Increase in the average salary paid to women.	Decrease in the average salary paid to women.
	Atlantic City.....		\$8 00	\$3 00
Bayonne.....	\$25 00		11 91	
Bloomfield.....		69 00		\$0 43
Bordentown.....				75
Bridgeton.....		37 00		3 24
Burlington.....				
Camden.....	5 85		10 00	
Dover.....			41	
East Orange.....			80	
Elizabeth.....			55	
Gloucester City.....				
Hoboken.....				
Jersey City.....	3 29			6 04
Lambertville.....				
Long Branch.....		64 00	3 25	
Millville.....			16	
Montclair.....		53 33		2 55
Morristown.....			1 96	
Newark.....				
New Brunswick.....		26 57		68
Orange.....				
Passaic.....				4 00
Paterson.....	13 00		1 00	
Perth Amboy.....		15 00	3 57	
Phillipsburg.....			2 13	
Plainfield.....	10 00		2 50	
Princeton.....	10 84		1 18	
Rahway.....				47
Salem.....		6 00		17
Trenton.....	67		2 17	
Woodbury.....		10 00		04

From the above we gather that in only six of the cities have the salaries of both men and women been increased, and in the same number of cities they have both been decreased. Jersey City is the only city that has increased the salaries of the men and reduced those of the women. The largest increase in the salaries of both has been in Bayonne and Camden.

TEACHERS' CERTIFICATES.

In the issue of State certificates, great care has been taken by the State Board of Examiners to maintain the high value in which they have been held in past years. Bearing the seal of the State, they should be a reliable guarantee of ability not only in this State, but wherever they may be taken.

During the year there have been issued 25 State certificates of the first grade, 16 of the second grade, and 20 of the third grade. In the previous year, there were issued 26 of the first grade, 13 of the second grade and 10 of the third grade.

One thousand seven hundred and eighty county certificates have been issued during the year, classified as follows: First grade, 129; second grade, 367; third grade, 1,284. In Table XX. will be found full statistics for all the counties.

The grade of the certificates now held by the teachers in each of the counties is shown as follows:

COUNTIES.	STATE CERTIFICATES.			COUNTY CERTIFICATES.			CITY CERTIFICATES.			Special certificates.
	First grade.	Second grade.	Third grade.	First grade.	Second grade.	Third grade.	First grade.	Second grade.	Third grade.

The standing of our teachers, as indicated by their certificates, is steadily improving. Comparing the figures above with those presented for the previous year, we find that thirty-three more teachers hold first grade State certificates, and the number holding third grade county certificates has been decreased by eighty-five.

CERTIFICATES TO GRADUATES OF THE NORMAL SCHOOL.

In addition to the State certificates issued by the State Board of Examiners, there have been issued to the year's graduates of the Normal School eleven certificates of the second grade, and forty-six certificates of the third grade, the former being given to the graduates of the advanced course, and the lower grade to those of the elementary course.

The names of these graduates are here given:

February Class.

ADVANCED COURSE.

NAME.	RESIDENCE.	Date of issue.	Date of expiration.
Maggie M Bantle.....	Bordentown, Burlington county.....	January 31, 1890.	January 31, 1900.

Carrie M. Wardell.....	Long Branch, Monmouth county.....	" "	" "
S. Louise Wardell.....	Red Bank, Monmouth county.....	" "	" "
Grace K. Weatherby.....	New Brunswick, Middlesex county.....	" "	" "

Since the Normal School was founded, it has graduated 1,439 teachers, 358 of whom taught in the State during the past year. This is about 85 per cent. of those who have graduated in the past ten years. In addition to these, 213 of the teachers of the past year have taken a part of the Normal School course.

I show, as follows, in which counties these Normal School graduates and undergraduates were employed last year :

COUNTIES.	Graduates.	Undergraduates.
Atlantic.....	3	4
Bergen.....	29	9

TERMS OF SERVICE OF TEACHERS.

A frequent changing of teachers always interferes with school work, and is a reflection upon the ability and success of the teachers. Taking our State as a whole, our teachers are changed less frequently than in most other States. For a number of years we have gathered the statistics that are presented in the following table, and they show an almost constant improvement. In my last report, the average time of service in the same school was four years and six months. In the following table, the average for the past year is shown as four years and nine months:

COUNTIES.	Number who have been in the same school one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty five years.	AVERAGE TIME.		Longest time by any one teacher, in years.
								Years.	Months.

Union.....	49	68	22	23	13	13	6	7	29
Warren.....	57	59	25	10	3	1	4	9	24
Total.....	1,286	1,695	797	386	245	103	63	4	9

From the above it appears that about 29 per cent. of all the teachers have taught in the same school for 1 year; about 36 per cent. have so taught from 1 to 5 years; 18 per cent. from 5 to 10 years; 9 per cent. from 10 to 15 years; 5½ per cent. from 15 to 20 years; and 5½ per cent. more than 20 years.

The best showing in this respect is made by the county of Camden. The other counties that exceed the average of four years and nine months are Essex, Hudson, Union, Passaic, Mercer, Cumberland and Middlesex. These are the counties that contain the large cities where

the teachers are retained for a much longer time than in the country districts.

The statistics for all the cities are here presented :

CITIES.	Number who have been in the same school one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	AVERAGE TIME.		Longest time by any one teacher, in years.

Total.....	333	712	557	304	208	93	52	7	8

Only 15 per cent. of the city teachers have taught in the same schools only 1 year or less ; 31 per cent. have been retained from 1 to 5 years ; 25 per cent. for a period of from 5 to 10 years ; 13 per cent. from 10 to 15 years ; 9 per cent. from 15 to 20 years, and about 6 per cent. have remained in the same school more than 20 years.

The average for all the teachers of the cities is 7 years and 9 months. Gloucester City leads the list, with an average of 14 years and 4 months. The other cities that exceed the average are in the following order: Princeton, Lambertville, New Brunswick, Rahway, Newark, Elizabeth, Trenton, Hoboken, Burlington, Millville, Jersey City, Camden, Orange and Paterson.

TOTAL EXPERIENCE OF TEACHERS.

The following table, showing the average experience of the teachers, is of interest :

COUNTIES.	Number who have been teaching one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	AVERAGE TIME.		Longest time by any one teacher, in years.

Total.....	614	1,463	1,036	610	411	183	148	8	2

Less than 14 per cent. of all the teachers have had an experience of 1 year or less; 33 per cent. have taught from 1 to 5 years; 23 per cent. from 5 to 10 years; 14 per cent. from 10 to 15 years; 9 per cent. from 15 to 20 years, and more than 7 per cent. have an experience of more than 20 years.

The average experience of all the teachers of the State is eight years and two months. The counties that show an average higher than this average are: Essex, Camden, Union, Gloucester, Passaic, Bergen, Hudson, Mercer, Salem, Middlesex, Cape May and Monmouth.

That the experience of the city teachers is larger than that of the teachers in the districts outside of the cities, may be seen in the following table :

CITIES.	Number who have been teaching one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	AVERAGE TIME.		Longest time by any one teacher, in years.

Total.....	231	656	547	346	266	114	99	9	8	

The above figures indicate that of all the teachers employed in the cities, only 10 per cent. have an experience limited to 1 year or less; 29 per cent. have an experience of from 1 to 5 years; 24 per cent. of from 5 to 10 years; 15 per cent. of from 10 to 15 years; 12 per cent. of from 15 to 20 years, and nearly 9½ per cent. have taught more than 20 years.

The average experience of all the city teachers is nine years and eight months. The cities that exceed this average are stated in the following order: Princeton, Gloucester City, Salem, New Brunswick, Lambertville, Elizabeth, Millville, Newark, Rahway, Burlington, Trenton, Woodbury, Bordentown, Bloomfield, Montclair, Plainfield and Hoboken.

DISTRICT SCHOOL LIBRARIES.

The following schools have established or added to their free school libraries during the year:

Atlantic county, third application, No. 32; fourth application, No. 47; fifth application, No. 1 (Texas Avenue School); seventh application, Nos. 1 (Indiana Avenue and New Jersey Avenue Schools), 17 and 38; eighth application, No. 18; tenth application, No. 1 (Pennsylvania Avenue School); eleventh application, No. 16; twelfth application, No. 15.

Bergen county, first application, Nos. 16 and 17; second application, Nos. 23 and 39 (School No. 2); third application, Nos. 21 and 61; fourth application, No. 25; fifth application, No. 21½; seventh application, No. 39 (School No. 1); eighth application, Nos. 12 and 42; ninth application, No. 31; eleventh application, Nos. 5 and 45; seventeenth application, No. 37.

Burlington county, first application, No. 32; second application, No. 22; fifth application, No. 50.

Camden county, first application, No. 3 (Sordentown School); second application, No. 37; third application, Nos. 6 and 8; fifth application, No. 16; twelfth application, No. 21.

Cape May county, sixth application, No. 26.

Cumberland county, third application, No. 12; fourth application, Nos. 13 and 16.

Essex county, first application, Nos. 4 (School No. 3) and 44 (School No. 5); second application, Nos. 4 (School No. 2) and 43 (Washington Street and Marshall Street Schools); third application, No. 43 (Hamburg Place and Camden Street Schools); fifth application, Nos. 7 (Centre Primary School), 10, 30 and 43 (Burnet Street, Chestnut Street and Miller Street Schools); sixth application, Nos. 22, 43 (Walnut Street and South Eighth Street Schools) and 44 (Valley School); seventh application, No. 43 (Oliver Street School); eighth application, Nos. 8 (School No. 2) and 44 (Park Avenue School); ninth application, Nos. 7 (Berkeley and Brookside Schools) and 43 (Webster Street and Eighteenth Avenue Schools); tenth application, Nos. 43 (Central Avenue School) and 44 (Lincoln Avenue School); eleventh application, No. 44 (High School); twelfth application, Nos. 4 (School No. 1) and 20; thirteenth application, Nos. 7 (Centre Grammar School) and 8 (School No. 1).

Gloucester county, second application, Nos. 21 and 41; third application, No. 1 (School No. 6); sixth application, Nos. 31, 43 and 54; seventh application, Nos. 1 (Schools Nos. 4 and 5) and 27; eighth application, No. 1 (School No. 3); eleventh application, No. 1 (School No. 2); fourteenth application, No. 1 (School No. 1).

Hudson county, first application, Nos. 13 (School No. 20) and 15 (School No. 6); second application, No. 13 (Schools Nos. 4, 6 and 11); third application, No. 10, 13 (School No. 1) and 17 (School No. 1); fourth application, No. 15 (School No. 1); sixth application, No. 13 (High School); seventh application, No. 13 (School No. 12); ninth application, No. 13 (School No. 14).

Hunterdon county, first application, Nos. 54 and 95; second application, Nos. 15 and 74; third application, No. 108 (School No. 1); fourth application, No. 9; fifth application, Nos. 62 and 85; eleventh application, No. 67.

Mercer county, first application, Nos. 7, 19 (Centre Street School), 39 (School No. 1) and 53; third application, Nos. 3, 11 and 19 (High School).

Middlesex county, first application, Nos. 5, 9, 10, 42, 45, 66, 70, 77 and 78; second application, Nos. 4, 7, 13, 47, 57, 63 and 69; third application, Nos. 3, 17, 24, 31, 55, 61 and 64; fourth application, Nos. 37, 53 and 62; fifth application, No. 65; eighth application, Nos. 38 and 73 (Hale Street School); tenth application, No. 39; eleventh application, No. 73 (Carman Street, Guilden Street and French Street Schools); twelfth application, No. 73 (Livingston Avenue School); fourteenth application, No. 73 (Bayard Street School).

Moumouth county, first application, Nos. 60 and 70; second application, Nos. 7 (School No. 2) and 72; third application, No. 69; fourth application, Nos. 7 (School No. 1) and 75 (School No. 2); fifth application, Nos. 58 and 78 (School No. 1); seventh application, No. 38; tenth application, No. 75 (School No. 1); eleventh application, No. 49.

Morris county, first application, Nos. 6, 50 and 106; third application, Nos. 31, 85 and 97; fourth application, Nos. 13 and 95 (School No. 1); fifth application, No. 87; sixth application, Nos. 48, 74 and 81; seventh application, No. 52; eighth application, Nos. 20 and 72; eleventh application, No. 69; nineteenth application, No. 82.

Ocean county, first application, No. 14.

Passaic county, first application, No. 1; second application, Nos. 35 (School No. 6) and 38; third application, No. 35 (School No. 11); fourth application, No. 16; sixth application, Nos. 2 and 13; seventh application, No. 14; ninth application, No. 35 (School No. 10).

Salem county, first application, Nos. 21 and 26 (School No. 3); second application, No. 26 (School No. 2); third application, Nos. 26 (School No. 1) and 44.

Somerset county, first application, Nos. 15, 16, 42, 43, 60 and 65; second application, Nos. 13, 35, 40, 44, 50, 53, 59, 63, 68 and 73; third application, No. 18; fourth application, Nos. 7, 28 (Schools Nos. 1 and 2) and 31; sixth application, No. 12; seventh application, No. 66; eighth application, No. 11.

Sussex county, first application, No. 55; fourth application, No. 116; ninth application, No. 103.

Union county, first application, No. 5 (School No. 5); second application, Nos. 6 and 23; third application, No. 22; fourth application, Nos. 5 (Battin High School and School No. 3) and 25; fifth application, Nos. 2 and 5 (School No. 4); sixth application, No.

15; eighth application, Nos. 4, 5 (School No. 2) and 20; ninth application, No. 5 (School No. 1); tenth application, Nos. 14 and 27; fourteenth application, No. 18.

Warren county, sixth application, Nos. 32 and 50.

Nine hundred and seventy-four schools have established school libraries, an increase of thirty-nine since my last report; three hundred and sixty-four have made the first application, an increase of two; one hundred and eighty-six have made the second application, an increase of three; one hundred and twenty-six have made the third application, an increase of ten; eighty have made the fourth application, an increase of one; sixty-two have made the fifth application, an increase of ten; thirty-five have made the sixth application, a decrease of five; thirty-six have made the seventh application, an increase of five; twenty-five have made the eighth application, an increase of four; seventeen have made the ninth application, an increase of two; thirteen have made the tenth application, a decrease of four; thirteen have made the eleventh application, an increase of six; six have made the twelfth application, an increase of three; two have made the thirteenth application, a decrease of one; three have made the fourteenth application, an increase of three; one has made the sixteenth application, a decrease of one; one has made the seventeenth application, an increase of one; none have made the eighteenth application, a decrease of one; one has made the nineteenth application, an increase of one. The total number of applications is three thousand and twenty-five, an increase of two hundred and thirty five.

The following table shows, by counties, the number of schools having libraries, and the number of payments made to the several school districts:

SCHOOL REPORT.

Warren	6 52	8 62	14 07
Total	\$6 57	\$11 52	\$20 23

Taking the school census as a basis, the average cost, per child, is six cents lower than in the previous year; taking the number of children enrolled in the schools as such basis, the average cost, per child, is two cents lower.

A comparison of these figures with those in my report for the previous year, shows an increase in the following counties of the average cost per child, based upon the number of children enrolled in the schools—the amount of the increase is named with each county: Bergen, \$2.63; Union, \$2.49; Essex, \$2.38; Sussex, \$1.06; Burlington, 99 cents; Morris, 70 cents; Gloucester, 56 cents; Somerset, 54 cents; Hunterdon, 29 cents; Ocean, 24 cents; Cape May, 6 cents; Monmouth, 3 cents; Middlesex, 1 cent.

A decrease in the cost per capita, reckoned upon the same basis, is shown in the following counties: Passaic, \$4.51; Camden, \$3.37; Mercer, \$2.25; Cumberland, 66 cents; Hudson, 63 cents; Salem, 54 cents; Atlantic, 28 cents; Warren, 3 cents.

The statistics for the cities are given as follows:

CITIES.	Number of months the schools have been kept open.	Aggregate current expenses.	Per capita expense on total school census.	Per capita expense on enrolled attendance.	Per capita expense on average attendance.

Woodbury.....	10	12,107 40	9 50	12 18	31 24
Total.....	10	\$1,577,123 17	\$6 13	\$12 83	\$19 13

Based upon the school census, the average cost per child of maintaining the schools in the cities has increased thirty-eight cents over that of the previous year. Based upon the number of children instructed in the schools, the cost has increased ninety-three cents.

Basing the cost per capita upon the number of children enrolled and instructed in the schools, we find an increase over the previous year in the following nineteen cities: Passaic, \$7.90; Bloomfield, \$6.04; Trenton, \$2.78; Bordentown, \$2.61; Woodbury, \$2.23; Montclair, \$1.62; Newark, \$1.40; Bayonne, \$1.19; Paterson, \$1.09; Perth Amboy, 79 cents; Rahway, 79 cents; Lambertville, 76 cents; Elizabeth, 69 cents; Burlington, 53 cents; Phillipsburg, 39 cents; Millville, 31 cents; Salem, 6 cents; Dover, 5 cents; Plainfield, 1 cent.

In the following eleven cities there has been a reduction: Long Branch, \$2.17; Orange, \$1.18; Bridgeton, \$1.01; Atlantic City, 70 cents; Princeton, 49 cents; Camden, 31 cents; Jersey City, 31 cents; Gloucester City, 27 cents; Morristown, 25 cents; New Brunswick, 16 cents; Hoboken, 13 cents.

EVENING SCHOOLS.

Winter evening schools have been held in eleven cities, two less than in the previous year. Jersey City, Orange, Paterson and Woodbury have disappeared from the list, and Elizabeth and Hoboken have been added.

The total cost of the evening schools, as given below, was \$2,460.99 less than in the previous year; the number of pupils enrolled was 2,261 less; the number of teachers employed was 65 less. The total number of evenings the schools were kept open was 796, an average for each of the eleven cities of 72 evenings. The average attendance was about 46 per cent. of the entire number enrolled during the sessions. The average salary paid to the teachers was \$10.13 per week, as against \$6.41 in the previous year.

The following table gives the statistics for each of the cities :

CITIES.	Number of evenings the schools have been kept open.	Number enrolled.	Average evening attendance.	Number of teachers.	Average salary per week to teachers.	Total appropriation for evening schools.
Camden.....	72	869	333	18	\$13 50	\$933 60
Elizabeth.....	40	202	103	5	15 00	424 00

APPORTIONMENT OF RESERVE FUND.

Ninety per cent. of the State school tax is appropriated to the county where it is raised. Ten per cent. of the tax is reserved until the entire tax is paid by the several counties, and is apportioned among the counties in proportion to their needs. The proportion that the number of children bears to the amount of property to be taxed varies as much in the different counties, as do also the conditions under which the schools are supported, that, were it not for this wise provision of our school law, some counties would receive more than twice as much per child as other counties.

The rate of taxation for the year was .00322803+ based on the census of May, 1889. The \$100,000 appropriated from the income of the school fund was \$0.250591+ per child.

SCHOOL REPORT.

INDUSTRIAL AND MANUAL TRAINING.

A distinction is made between the industrial and the manual training schools. The former are technical in character, with a State Board of Supervision, and receive their State appropriations under the act of 1881. Manual training is pursued in the public schools, under the local school boards, and appropriations are made for its support under other acts.

For the technical schools, Newark has received during the year \$5,000, its fifth appropriation from the State; Hoboken has received \$1,500, its third appropriation.

For manual training, Paterson has received its fourth appropriation, \$2,000; Montclair its third, \$2,000; Orange its third, \$1,750; Vineland its third, \$1,000; the Town of Union its second, \$554 66; Morristown its second, \$300; Garfield its first, \$800; South Orange its first, \$1,000; Weehawken its first, \$500; Passaic its first, \$500, making a total sum of \$16,904.66 appropriated by the State during the year for these purposes.

Full reports of these schools are given in the Appendix.

DISTRICT INDEBTEDNESS.

I present, as follows, the statistics relating to the bonded indebtedness of the school districts of the State. The amount paid off during the year was \$82,707.39, the amount incurred was \$123,100, leaving the total amount of indebtedness, on September 1st, 1890, \$1,130,662.16:

DISTRICTS.		Amount of indebtedness September 1st, 1889.	Amount incurred during the year.	Nature of security.	Date of issue.	When payable.	Rate of interest.	Amount paid during the year.	Amount outstanding September 1st, 1890.

APPENDIX.

REPORTS OF COUNTY SUPERINTENDENTS.

ATLANTIC COUNTY.

S. R. MORSE, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

I herewith submit my annual written report, in connection with my statistical report, of the schools of Atlantic county, for the school year ending August 31st, 1890.

The past year has been one of marked progress in the public schools of Atlantic county. There has been no trouble of consequence in any of the schools requiring the attention of the County Superintendent.

There were few changes in district clerks or trustees at the commencement of the year, and comparatively few changes in teachers, which accounts, in a great measure, for the success of the schools.

The attendance has been better than ever before, and the pupils have shown an increased interest in their studies.

The parents and patrons of our schools have taken a livelier interest in the schools.

All of the school officers, in so far as my knowledge extends, have performed their duties cheerfully and faithfully.

In most cases amounts of money required by the trustees have been voted freely. This is shown by the increase in the total amount received for schools, exclusive of the amount for building and repairing.

Last year the total amount was \$53,737.67, while this year it is \$60,229.91.

There has been but one new school-house built, that at Hammon-ton, which was necessary on account of the rapid growth of the town.

There have been some good improvements made to school buildings.

One or two more districts have voted for free text-books. I am in hopes the few remaining may soon be able to do likewise.

I regret to say that each year the number of male teachers decreases, probably owing to small salaries—small compared with those in the northern part of the State and other States.

The average salary paid to male teachers during the year was \$59, and to female teachers \$43.66. I think it doubtful if in any other county in the State the average salary of female teachers is as near that of the male teachers as in our county.

The valuation of school property has increased during the year, being now \$170,950.

INCREASE IN CENSUS.

Each year a steady increase in the school census is shown. This year the increase is .006 over last year, while the number enrolled and the general attendance has increased much more.

The amount received from all sources the last year was an increase of about \$8,000 over the previous year.

The average salary paid to male teachers shows an increase, as does that of female teachers.

THE GRADED COURSE OF STUDY.

As each year passes, the result of our system of grading all of the schools in the county, and having a uniform course of study, shows conclusively that it is of the greatest benefit to our schools.

It has now been successfully operated for over twelve years, and I find nothing but commendation for its workings.

It is true it makes increased labor for the County Superintendent, but it repays that a thousandfold in the satisfaction of the good work accomplished by the pupils.

The teachers all seem to be in hearty accord with the system. I find none who, after trying it one year, do not acknowledge the vast improvement over other systems.

COUNTY GRADUATION.

The graduating class of 1890, which was one of our best, was held at Hammonton on the evening of November 21st, 1890. Twenty-four pupils graduated from the regular course and 13 from the advanced course.

ARBOR AND NATIONAL DAY.

A new feature was introduced the past year, viz., National Day. One-half of the day was devoted to planting trees, shrubbery, &c., with appropriate exercises—speeches, recitations and songs; and the other session was devoted to raising the stars and stripes, accompanied by national hymns, speeches and recitations, which we hope may create and sustain a love of country in all the hereafter. The plan seemed a perfect success, in which nearly every school participated, many flags being raised.

EDUCATIONAL PUBLICATIONS.

Nearly if not every teacher in our county took one or more educational papers, through which much good is daily worked out. No good teacher will be without an educational journal at the least, and some take several.

TEACHERS' ASSOCIATION.

Meetings of the association are still held and well attended. We are indebted to Principal Deremer, of Vineland, for much valuable instruction.

EXAMINATIONS.

I have been ably assisted in the regular quarterly examinations by W. B. Matthews, B. F. Harding and Henry Krebs. We have granted 11 first grade, 18 second grade and 47 third grade certificates. There have been 40 applicants rejected, and no certificates renewed or revoked.

The number of teachers holding first grade State certificates is 3; second grade, 2; third grade, 3; first grade county, 29; second grade, 39; third grade, 20; city certificates, 4.

TEACHERS' INSTITUTE.

The annual Teachers' Institute was held in the Opera House, Atlantic City, the counties of Camden, Gloucester and Salem uniting with Atlantic in union institute. It was in every way a success, so much so that the same counties will again unite next year at the same place. Able instruction was given by Miss Lelia Patridge, Principal

of the Penna. Summer School; Dr. Edw. Brooks, author of Brooks' Series of Mathematics; Dr. Lewis Mason, of Boston; Prof. John Woodhull, of New York city; City Superintendent Charles Jacobus, of New Brunswick, N. J.; Prof. Green, of the State Normal School; Mrs. Hallock, of Brooklyn, N. Y., and others. The institute continued three days, every teacher in Atlantic county being in attendance.

BERGEN COUNTY.

JOHN TERHUNE, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

SIR—In submitting this, my fifth annual report, I have only to refer you to the increased amount of taxes voted, for convincing evidence that the public sentiment is in sympathy with our public schools.

The resources for 1890-91 are—

From State school tax.....	\$52,340 16	
From \$100,000 appropriation.....	2,916 39	
From interest of surplus revenue.....	1,795 08	
		\$57,051 63
From district tax for teachers' salaries.....	\$36,153 00	
From district tax for other purposes.....	35,424 87	
		71,577 87
From balances due the districts.....		25,244 53
		<hr/>
		\$153,874 03

Number of visitors present at Arbor Day exercises.....	1,880	795	

SCHOOL-HOUSES.

Districts Nos. 10, 19 and 51 have built large, substantial school-houses, containing one more room each than is required for present use. This is a wise and economical provision.

Districts 46, 35 and 6 have enlarged their buildings for an additional teacher.

Districts 33, 32, 40 and 63 have each added one to their corps of instructors.

District No. 57, known as the Darlington District, has been particularly fortunate.

Mr. Theodore A. Havemeyer, the millionaire sugar refiner and philanthropist, is building a two-story stone structure, beautiful in design, at a cost of \$15,000, to be donated to the district. The lower floor will be used for school purposes and the upper for a chapel or lecture-room. This will be the most imposing edifice in the county for the number of children to be accommodated.

Several districts have procured musical instruments during the year. We now have in the 70 districts, 26 organs valued at \$1,695, and 10 pianos valued at \$2,250.

SCHOOL LIBRARIES.

Districts 16 and 17 have made their first application, and additions secured in Nos. 6, 12, 13, 15, 21, 21½, 23, 25, 31, 33, 37, 39 (schools 1 and 2), 40, 42 and 61.

The following districts have taken advantage of the "Library Act" the greatest number of times, and deserve commendation therefor: No. 37 has received from the State \$180; No. 6, \$170; Nos. 15 and 45, each \$120; No. 40, \$110; Nos. 31 and 39, each \$100; Nos. 12 and 42, each \$90; Nos. 36 and 62, each \$80.

Fifty districts out of 70 have made application, but the annual report required by the State Department, concerning the condition of libraries, has been rendered by only 26 districts, and a very small per cent. of these are complete and correct.

When I read the "Verdicts on Good Reading," by such men as Thomas Jefferson, Henry Clay, Patrick Henry, John C. Calhoun, George Washington, Benjamin Franklin, Daniel Webster and Emerson, I feel that something should be done at once to arouse the teachers and trustees, especially in rural districts, to interest themselves in their school libraries. Remember, that if a taste for good reading is not acquired during school life, it is seldom attained thereafter.

Sir John Herschel said: "Were I to pray for a taste that should stand me in stead under every variety of circumstances, and be a source of happiness and cheerfulness to me during life, and a shield against its ills, however things might go amiss and the world frown upon me, it would be a taste for reading."

ARBOR DAY.

Preparations for the observation of Arbor Day, consisting of a programme, address and report blank, were distributed at the meeting of the Teachers' Association March 15th. Subsequently I issued a circular containing a notice of the day appointed by the Governor, and a copy of the valuable suggestions furnished by our State Superintendent.

Reports were received from every district in the county, and the following is a brief summary from them:

"Forty-one districts carried out the programme in full; 19 adhered very closely to it, varying only in a few songs or recitations; 7 deviated to a considerable extent, and 3 held no exercises of any character.

"Thirty-four addresses were made by resident ministers, in addition to those of principals and trustees.

“One hundred and sixty-nine trees were planted, besides shrubs, vines and flowers, and 1,205 trees are at present growing on school property. The fact that beds of beautiful flowers are found on the school grounds of nearly all the rural districts, which less than a decade ago could not exist, speaks volumes for the progress in esthetic culture.

“Eighteen schools were presented with flags on that day, and 2 districts had previously procured them. One thousand eight hundred and eighty visitors attended the exercises in 62 districts, of which 5 report over 100 present; 7 over 50; 16 over 25, and 34 less than 25.”

The teachers speak of Arbor Day as being our most profitable holiday, and report that the interest manifested by the people at its celebration is increasing. The results are beneficial to the school, in attracting parents there who otherwise never cross its threshold; and observers say that the instruction received is noticeably illustrated at many homes.

TEACHERS' ASSOCIATION.

Five meetings of the Teachers' Association were held, as usual. The following talented and professional instructors gave us the benefit of their experience with the subjects named: “Music in the Public Schools”—Prof. Luther Whiting Mason, recently director of music in the Empire of Japan, and formerly director in the public schools of Boston. “Form Study and Drawing”—Mrs. Hannah J. Carter, professor of this subject at the College for the Training of Teachers, New York city. “Literature”—Hon. Wm. E. Maxwell, Superintendent of the city of Brooklyn. “History: How to Teach It”—John J. Anderson, Ph.D., author of a series of school histories. “Teachers' Work”—Hon. Wm. N. Barringer, Superintendent of Newark. “A Glimpse of the Exterior and Interior of the Public Buildings in our National Capital, Illustrated by Oxy-Hydrogen Light”—Principal W. F. Robinson, Grammar School, Elizabeth.

The average attendance for the year was 47 per cent. This is a decrease in attendance, compared with last year, of 3 per cent. This decrease is accounted for very readily, and does not indicate a lack of interest. Two of the days appointed proved to be very stormy, and a third fell upon the Saturday preceding the Teachers' Institute. At the remaining two sessions the attendance numbered 92 and 93.

Another cause of decrease is the attendance of a number of our progressive principals at the University School of Pedagogy, on Saturdays, in New York city.

Taking all things and circumstances into consideration, the past year of the association was more progressive and satisfactory than any of its predecessors.

TEACHERS' INSTITUTE.

The annual institute was held on Monday, Tuesday and Wednesday of Thanksgiving week. I select this week for the reason that it is a broken week, and also for the purpose of giving the pupils a rest after twelve weeks of study.

Our corps of instructors consisted of State Superintendent Chapman, Dr. Edward Brooks, Miss Emma L. Johnson, Prof. Langdon S. Thompson, Superintendent O. M. Brands, Principal B. C. Gregory, Dr. J. M. Green and myself.

Dr. Brooks occupied a long period of each session in the development of mental science and moral culture. On Tuesday evening his lecture on "The Value of the Ideal," at the Opera House, was highly appreciated by a large audience.

It did not take the teachers long to discover that a master-mind was handling the subject of mental science, and was presenting it in such a simple and forcible manner that all could comprehend.

When the programme had been completed and the time for dismissal arrived, all seemed loath to depart. I sincerely believe, from the interest and enthusiasm manifested, that had not so many teachers made arrangements to spend Thanksgiving day at distant places, a continuation of the institute would have been demanded by a unanimous vote. The institute was so thoroughly successful that I dread the approach of another, on account of the apparent impossibility of duplicating it with the amount of money at our disposal. One hundred dollars is not sufficient to procure the grade of instruction expected, and should be increased to permit us to keep abreast with the spirit of the times.

ANNUAL EXAMINATION.

Directions and questions, in conformity with the new outline of subjects for the different grades, were mailed to the teachers on Friday, May 23d, and the examination commenced the following Monday, continuing five days.

The returns reported 358 pupils entitled to the following credentials: 10 post grade diplomas of the first grade; 22 first grade diplomas; 12 post grade diplomas of the second grade; 100 second grade diplomas; 74 post certificates of the third grade; 140 certificates of merit.

The outline for the examination has, in a great measure, caused a more orderly and systematic pursuance of subjects. This is a matter of vital importance in ungraded schools, and should receive much attention and consideration from supervisors.

COMMENCEMENTS.

A large majority of the schools have appropriate exercises at the close of the year, for the purpose of awarding diplomas and certificates earned by the pupils.

Parents and friends take pleasure in attending these so-called commencements, and they have become not only popular, but beneficial to the interests of our schools.

Some districts that had not procured flags by Arbor Day, had them presented at their closing exercises. About one-half of the schools are now in possession of handsome flags, the most of which were gifts from Grand Army Posts.

The schools at Hackensack, Englewood and Rutherford issue diplomas of their own design, as their curriculums extend beyond that of the county course. At these commencements tickets for admission are limited to the seating capacities of the largest halls and churches, and the exercises are academic in character.

CONCLUSION.

While the year has been one of general prosperity, I must not omit to state that we have had some dissensions in a few districts, the settlement of which required the assistance of the courts. We have also had some differences of opinion in interpreting the law, and in some cases the law, rules and decisions have been wholly disregarded. I have notified the proper authority as per directions, and the necessary discipline is promised.

BURLINGTON COUNTY.

EDGAR HAAS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

SIR—Herewith I respectfully submit my fifteenth annual report of the condition of the public schools of Burlington county, for the year ending August 31st, 1890.

The finances for the coming year are as follows :

Amount of interest from surplus revenue.....	\$4,363 92
Amount of interest from surplus revenue for the Batsto portion of Pleasant Mills district of Atlantic county, containing 26 children.....	7 36
Amount from State appropriation of \$100,000.....	3,855 36
Amount apportioned out of the reserve fund by the State Board of Education.....	7,894 53
Amount reserved by the county, being 90 per cent. of the State school tax.....	71,050 81
Total amount apportioned to all the districts of the county.....	87,164 62
Amount apportioned to each child from the surplus revenue.....	.283169
Amount apportioned to each child from the State appropriation of \$100,000.....	.250592
Amount apportioned to each child from the reserve fund of 10 per cent. of the State school tax.....	.513132
Total amount apportioned to each child in those districts that have more than 69 children.....	5.373261
Amount of district school tax voted to be used for the payment of teachers' salaries.....	3,850 00
Amount of district school tax voted to be used for building, purchasing, hiring, repairing or furnishing public school-houses.....	9,686 00

Balance in the hands of township collectors, to be used for building and repairing public school-houses, &c..	\$4,978 16
Balance in the hands of township collectors, exclusive of moneys for building and repairing purposes.....	17,639 73
Total amount for teachers' salaries, fuel and incidentals	108,654 35
Total amount for building and repairing public school-houses, &c.....	14,664 16
Total amount for all school purposes.....	123,318 51
Number of districts that must receive \$275.....	15
Number of districts that must receive \$375.....	40
Number of children in the county, according to the school census of 1889, upon which the apportionment above was made..	15,385

For the year just ending, August 31st, 1890, we have—

The average monthly salary for male teachers.....	\$60 71
The average monthly salary for female teachers.....	38 81
The value of the public school property in the county..	261,900 00
The school census.....	15,205
The number of children enrolled in the school register..	10,211
Average number of children in attendance during the year	5,362
Estimated number of children attending private school..	1,468
Estimated number of children that attended no school..	2,590
The number of children the school-houses will seat....	11,922
Number of male teachers in the county.....	45
Number of female teachers in the county.....	153
Average number of months the schools were kept open during the year	9.2
Number of visits to schools made by the County Superintendent during the year.....	402

The enrollment in the school register is 67.1 per cent. of the school census, being 1.3 per cent. more than that of last year; the average attendance during the year is 52.5 per cent. of the enrollment, being .6 per cent. more than that of last year; the number of children attending private schools is 9.6 per cent. of the census, being 2.3 per cent. less than that of last year; the number that did not attend any school is 17 per cent. of the census, being 4.2 per cent. less than that of last year; the seating capacity of the school-houses is 79 per cent. of the census, being 2.5 per cent. more than that of last year; the average time for which the schools were kept open during the year is nine and two-tenths months, being .2 per cent. less than that of last year. The school in District No. 48 was kept open for twelve

months; 49 schools were kept open for ten months and upward; 48 for nine months and upward; 6 for eight months and upward; 5 for seven months and upward; 1 for six months, and 1 for five and one-half months. The schools in Districts Nos. 25, 54, 89, 95, 98, 100, 101, 103, 104 and 109, were closed for the want of a sufficient number of pupils; and those in Districts Nos. 33, 88 and 99 for want of sufficient funds, the districts being poor.

The schools in Districts Nos. 15, 16 and 73 had each a number of pupils to pass the diploma grade examination; the diplomas to said pupils were presented by their respective principals.

The examinations for teachers' certificates were held at the regular times, and in addition to these there were some applicants that were examined specially, through the permission of the State Superintendent, while some two or three received permits to last until the next regular examination.

NUMBER OF CERTIFICATES GRANTED.

First grade to males.....	2
First grade to females.....	8
Second grade to males.....	2
Second grade to females.....	15
Third grade to males.....	13
Third grade to females.....	65
Total.....	105

NUMBER OF APPLICANTS REJECTED.

Males in all grades.....	23
Females in all grades.....	69
Total.....	92

The rejected is 46.7 per cent. of the whole number of applicants, being nearly one-half.

This is to be accounted for only by reason of the young applicants not being sufficiently schooled, and by reason of the older ones, in a great degree, forsaking the scientific principles of technical study for the heterogeneous conglomerations of would-be writers in the "new departure." But we need not despair, for we already see the times clamorous for a return to the true and substantial, and that in response we already see in the horizon of demand the dawn of the old light that ever lighted the way of development of the intellect of the world.

Districts Nos. 32, 112, 22 and 50 are the only ones that received library aid from the State during the year, the first two having received it for the first time.

Lloyd District, No. 6, put a new floor in its house, and with some other general repairs and new desks, the house is now comfortable and convenient.

Georgetown District, No. 10, made general repairs to its house in the way of wainscot, painting, &c., and now, with new desks, it is quite comfortable, though too small for convenience. It would have been better to have replaced it with a new one.

Cinnaminson District, No. 23, was compelled to build another house for another primary department, at a cost of \$1,450; it is 23 feet wide by 33 feet long, with a seating capacity of about 50 pupils. The district has now seven departments in all.

Moorestown District, No. 29, was also compelled to build another house. It is located at Stanwick; it is of brick, and 30 feet by 40 feet on the ground plan, and two stories of 12 feet each in height, and furnished with the most approved style of desks, black-boards, &c., and with hot-air furnaces in the cellar, and ventilation flues connected with the chimneys. The sanitary arrangements are all that can be desired. The whole cost is about \$4,000.

Lumberton District, No. 69, divided the lower story of her large house into two rooms, and newly fitted them up for occupancy by the school. The upper story, heretofore occupied as one room, is now used as a public hall.

East Bass River District, No. 108, furnished its room with elegant new desks of the very latest pattern, at a cost of about \$100.

Arbor Day was observed with much interest by most of the schools of the county, although but one-half of them sent in written reports. The day is growing more and more in favor among the people year by year. In order that you might have a better idea of the interest manifested, I sent you the 55 reports made to me by the teachers.

Meetings of the township boards of school trustees were held as usual. Their attendance this year was unusually good. Accounts were compared, the features of the new laws explained, and many suggestions as to the employment of better teachers given.

Through the willingness of the trustees of Districts Nos. 54 and 96, and the approval of the State Superintendent as Secretary of the State Board of Education, portions of these districts were taken to form a new district, to be known as Mount Relief, and numbered 97, to meet the claims of a number of children living at least six miles from the nearest school. The apportionment of the State moneys was accordingly made, giving the district \$275. During the fall the trustees will build a small house, though sufficiently large to meet all their wants.

The interest of the teachers in their association still continues to

grow. The average attendance for the year is about 60. Questions of various interest were discussed, but the chief business was the study of the Calculus in its various forms and applications.

One word as to the examination of applicants for teachers' certificates of the third grade. Of late the questions prepared for them are easy, but as a general thing some of the studies are too lengthy for the ground they cover, requiring too much time for their full answer. In consequence of this some are compelled to come another day to complete their examination, in another set of questions, and this, to those from the lower part of my county, as well as to those in other counties living a great distance from the place of examination, becomes a serious matter of expense. Would it not be better to cover the ground with questions requiring shorter answers, that the applicants might finish their examination in the one day allotted to it? I verily believe that in this way we should soon have a better preparation, both academical and pedagogical, on the part of applicants for better results in their papers, and this, too, in the allotted time.

CAMDEN COUNTY.

REV. F. R. BRACE, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent:

SIR—Herewith I present my annual report for the year ending August 31st, 1890.

The year ended has been another one of progress, both in the work done in the school-room and in the building of school-houses.

The teachers, as a rule, have been very earnest and diligent and successful. New methods, that have been deemed good, have been tried by them, often with great success. Wherever it has been possible, new and improved appliances, to help explain and illustrate the different branches taught, have been put into the school-rooms.

Three new buildings have been erected and one enlarged. The buildings that have been erected within the past three years in Nos. 4, 12 and 43, and those that have been enlarged in Nos. 5 and 46, are very commodious and well furnished, and present a very pleasing exterior. The one in No. 12 is to be supplied with the Smead-Wills system of ventilation, and is expected to be one of the best school buildings in the State, with all the appointments and appliances necessary to accomplish the best results.

In addition to the public money received from the State, the districts have continued to raise by district tax the amounts necessary to carry on their work.

As the annual examination of pupils in all the branches in two successive weeks was found to be too great a strain on their entire system, it was determined to divide the examination and take some branches in January and some in each month thereafter, up to May, giving two days in each month thereto. While this added greatly to the cost and labor connected with the examination, it was found to be a great improvement on the old plan. Very satisfactory work was done by the pupils.

A goodly number of the schools now have cabinet organs to assist in the opening exercises of the schools, and to aid in teaching music, or in the performance of calisthenic exercises. Haddonfield has an excellent piano.

A very successful joint institute, with Atlantic, Gloucester and Salem counties, was held in Atlantic City October 23d to 25th.

During the year, at the Teachers' Associations, held once in two months, valuable lectures have been delivered by Dr. Geo. Morris Philips, of the Normal School, Westchester, Pa.; Prof. B. C. Gregory, of Trenton; Prof. C. Jacobus, of New Brunswick, and Prof. A. B. Guilford, of Jersey City. Thus the work has gone on the past year as in preceding years.

The last twenty years have seen immense progress in everything connected with education, the subjects taught, the methods adopted, the appliances used. It is almost impossible for those not immediately connected with the work to conceive of the advance made. Twenty years ago, in most of the schools in this county, only the rudiments of the elementary branches were taught, and these often in a very imperfect manner. There was no system of instruction of a well-defined character. Indeed, for the county there was no system at all. Not a county in New Jersey, or elsewhere, so far as I know, unless that county was conterminous with a city, had any system. It was found that in many schools English grammar, or anything that made any approach to it, was ignored. Geography had but small space allotted to it, and even arithmetic was often thrust into a corner. Such studies as physiology, natural philosophy, bookkeeping, &c., were unknown, except in a very few instances. Now, a well-defined

course of study is pursued in every school, and most of the schools teach the branches which were supposed to belong to academies. This course of study was adopted eighteen years ago, and so influential was it in bringing up the standard of education in this county, that it was adopted, one after the other, by all the counties in our State, and by many counties all over the land. This course of study has been gradually amended and improved so as to meet the needs of the times. As a result, we have not only work in other branches than those previously taught, but better work done in those branches previously taught. It has been found that the development of the different faculties of the mind makes a stronger mind—a mind readier to grasp any form of truth, physical, mental, moral.

Such progress has been made that the graduates of our schools are ready to enter the Normal School, and with one year's additional training ready to enter the scientific department of the State College.

In my efforts to promote the interests of education, I have been seconded by nearly all the teachers. Occasionally there has been an exception. Trustees and friends of education, and notably the press, have all given their aid.

In the matter of school buildings, the greatest improvements have been made. Old school-houses have been torn down or greatly enlarged, the rooms have been made larger, the ceilings higher and improved furniture put in. Black-boards cover the walls; maps, charts, globes, dictionaries and libraries are found in most of them.

Thirty-five new school-houses have been built. The valuation of school property outside of Camden and Gloucester cities in 1871 was \$35,750. This year it is \$177,050. In the entire county the advance has been from \$189,750 to \$613,050.

The standard of qualification for teachers has been raised. It was with difficulty that the vast majority could pass a third grade examination. Only in exceptional cases was a first or even a second grade certificate obtained. Now the majority hold State certificates or county certificates of a first or second grade.

Not only Teachers' Institutes, but Teachers' Associations have been regularly held, at least as often as once in two months, and the best talent of the State and elsewhere obtained to instruct the teachers and help them to do better work.

Teachers' salaries in the county have greatly increased; those of male teachers from an average of \$52.99 per month to \$111.79, and those of female teachers from an average of \$33.50 per month to \$41.73.

In the transmission of the school moneys from the township collectors and city treasurers to the county collectors, and from them to the State treasurer, and then back through the same channels to the school district, not one cent has been lost.

For the statistics of the past year allow me to refer you to the various statistical reports already sent in.

In closing my report, permit me to say that, during the years of my superintendency, neither politics nor denominationalism has ever been allowed to affect the administration of the affairs of this office. Trustees have been appointed without my knowing or seeking to know to what political party they belonged, and the only test of qualification for a teacher has been intellectual and moral fitness.

CAPE MAY COUNTY.

VINCENT O. MILLER, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

I herewith present my annual report for the school year ending August 31st, 1890.

We have received from State school tax and \$100,000 appropriation	\$15,214 09
Township tax.....	3,131 00
Surplus revenue.....	740 96
District tax (teachers' salaries).....	1,474 96
District tax (building and repairs).....	5,715 20
Total school moneys received.....	\$26,276 21
A decrease from last year of.....	1,945 04

The average paid to male teachers is \$53.78, a decrease of \$1.33 per month from last year; to female teachers, \$34.68, an increase over last year of \$1.97 per month.

A union institute of Cumberland and Cape May teachers was held at Cape May City during October; Dr. Edward Brooks, of Philadelphia, and Miss Lelia A. Patridge, of the Penna. Summer School of Methods, acting as principal instructors. The institute was one of great value to the teachers.

The county examination of pupils was held in March, with very satisfactory results.

Some of the trustees failed to pay a single visit to the schools under their charge during the year. It is not too harsh to say that the schools of these districts would be benefited by their retirement from so responsible positions.

I have visited all the schools of the county twice or oftener during the year.

CUMBERLAND COUNTY.

CHARLES G. HAMPTON, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

SIR—I herewith present my annual report for the school year ending August 31st, 1890.

Received from State school tax.....	\$48,293 97
Received from apportionment from \$100,000.....	3,009 45
Received from interest on surplus revenue.....	1,766 13
Received from district tax for teachers' salaries.....	19,566 54
Received from district tax for building and repairs.....	11,550 48
	\$84,186 57
Total school moneys received.....	\$84,186 57

There has been a slight increase in teachers' salaries above that of former years, but the salary is yet too small in some districts, caused

mainly by the eagerness of young teachers to secure positions near home.

The school-houses, with two notable exceptions, are of convenient size and location, and in a good state of repair. While some of them still contain the old style desks and seats, the most are provided with modern furniture, and others will be refurnished in the near future. Districts Nos. 20 and 25, both situate in intelligent and thriving communities, need new school-houses badly, and only await the revival of farming interests to secure them.

The schools have been ably conducted during the year, and the pupils have made fair and encouraging progress. What they need now to further increase their usefulness, and to receive greater benefit from the money expended for their support, is to arouse the parents, and more particularly the trustees, to a proper sense of their responsibilities in relation to the public schools.

ESSEX COUNTY.

CHARLES M. DAVIS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

In obedience to law, I have the honor to present this report concerning the public schools of Essex county, for the year ending August 31st, 1890.

The schools in Newark are under the charge of Superintendent Wm. N. Barringer; in Orange, of Superintendent U. W. Cutts; those in the townships, under the immediate supervision of the County Superintendent.

The children are distributed as follows :

	Newark.	Orange.	Townships.	Total.
On census roll.....	55,527	5,420	13,082	74,029
On school register.....	25,137	1,964	8,243	35,344
Average attendance.....	16,995	1,287	5,622	23,904
In private schools.....	8,328	1,800	2,148	12,276
In no school.....	22,062	1,843	2,504	26,409

The private schools are chiefly parochial. Of the 22,062 reported as attending no school in Newark, 3,147 attended evening school during the winter months.

The amounts received to maintain the schools during the year were the following :

	Newark.	Orange.	Townships.	Total.
From the State.....	\$314,262 03	\$30,667 81	\$77,011 60	\$394,941 44
From district and township tax	170,836 37	5,500 00	122,394 90	325,731 27
	<u>\$485,098 40</u>	<u>\$36,167 81</u>	<u>\$199,406 50</u>	<u>\$720,672 71</u>

The expenditures have been—

	Newark.	Orange.	Townships.	Total.
For teachers' salaries.....	\$324,700 00	\$25,700 00	\$111,467 14	\$461,867 14
For fuel and incidentals.....	71,882 37	4,362 58	30,434 20	106,679 15
Building and repairing (including debt and interest)..	87,415 00	5,395 28	38,212 39	131,022 67
	<u>\$483,997 37</u>	<u>\$35,457 86</u>	<u>\$180,113 73</u>	<u>\$699,568 96</u>

This total of \$699,568.96 does not express the whole work done for schools during the year. In addition to the \$131,022.67 spent in the *whole county* for building, repairing, paying bonds and interest, the *townships* have issued their bonds for about \$100,000 to pay for building new school-houses.

For land and buildings Franklin township has expended \$15,000; Bloomfield, \$25,000; Montclair, \$25,000; Livingston, \$1,200; South Orange, \$13,000; West Orange, \$21,000; amounting to \$100,200 in the six townships. East Orange is erecting a High School building to cost about \$75,000. Montclair expects to build one next year. There is a constant demand for more school-rooms. With the exception of two or three districts in the remote parts of the county, there is a rapid increase in the number of children of school age. The school-rooms are full, and in several districts it has been found necessary to hire rooms until new houses can be built.

The value of school property is—

In Newark.....	\$1,328,375
In Orange.....	165,000
In townships.....	546,450
Total.....	<u>\$2,039,825</u>

There have been employed 29 male teachers (1 more than in the previous year), at an average salary of \$1,109, and 158 female teachers (13 more than in the previous year), at an average salary of \$488.50. The highest salary paid to a male teacher is \$3,000; the lowest, \$421. The one is principal of a superior graded school; the other, the sole teacher in a country school, with an average attendance of 22 pupils. The schools have been open a little more than ten months on an average.

Only two districts failed to vote a tax for school purposes; one of these had a sufficient balance on hand, the other had a small balance, but not enough to justify its failure, especially as it is a \$375 district. There were four districts which received \$375 each, and one \$275.

The sentiment is becoming more general, that where the size and density of population render such a course practicable, school districts should be made of townships. Accordingly, as announced in my last report, the two districts of Franklin township were united in 1889. During the year for which this report is made, the two districts of Belleville have been consolidated, and the township of East Orange now forms one district, known as School District No. 45. There are four wards in this township, each being represented in the board of trustees by two members. The four handsome school-houses are valued at \$160,000, and a High School building, the foundation of which is already laid, and for which \$75,000 has been appropriated, will be ready for use at the beginning of the next school year.

Manual training, in some of its various forms, is getting an entrance into the schools, soon, it is hoped, to take possession of them all. Reforms, especially educational, move with proverbial slowness; but, like revolutions, they never go backward. All the graded schools have introduced kindergarten methods more or less adapted to the public school system; and several have added manual work—mechanical for the boys and sewing for the girls. A number of ungraded country schools, also, are working in this line. The industrial work of the Montclair School has made still further progress by the erection of a machine shop with a steam engine, turning lathes and all necessary tools and instruments. The report of Superintendent Spalding gives full information about them. This district has also a cooking school for girls in full operation.

As trustees become better acquainted with what the schools require, not only as to buildings, furniture, books and other supplies, but also as to the qualification of teachers—for on them depends the result of all this expense of money and labor—more pains are taken to secure the services of the most scholarly and efficient teachers. Where the citizens vote liberal supplies, this is easily done; but in the poorer districts (happily quite few in this county) teachers of less capability are employed; yet, there are exceptions even in these places. There is, however, a very general desire among the teachers for higher pro-

fessional attainments. This is shown, as has been stated in previous reports, by the fact that teachers from a goodly number of our schools, at a considerable outlay of time and money, attend courses of instruction offered in New York city, on Friday afternoons and Saturday mornings. But all who wished could not do this; to accommodate these—to arouse those who were not interested—and for other good and satisfactory reasons, steps towards establishing a County Normal Class were taken early in the year. It gives me great pleasure to report that these efforts were successful, and that an Essex County Normal Class is an established institution. The board of trustees of East Orange have very generously granted the use of the High School rooms in Ashland for the meetings of the class, which numbers about 80 members.

The sessions are held on the second Saturday of each month, from 9 A. M. to 1 P. M., from October to May, inclusive. Instructors of proved ability in their respective subjects were secured.

The course of study for the present year was adopted after careful consultation with those best acquainted with the needs of the teachers; "the outline for study," and the subjects of the respective lectures, were carefully prepared by the instructors; and the members of the classes had sufficient time allowed in which to make preparation for the lectures, when, also, opportunities are given to ask questions and discuss the subjects.

The County Superintendents are directed to "make a statement of the work they have performed in connection with the duties of their office." To do this in my case would require a record of all my work for the year; for my whole time has been given to the duties of my office—in considering the questions of altering district boundaries, consolidating or dividing districts; inquiring into the character of the school buildings, the lighting, ventilating and general convenience of the same; consulting with school officers and principals; keeping acquainted with the financial condition of each district; communicating with the citizens of the respective districts and endeavoring to cultivate in them a warm sentiment in favor of their schools; in examining, selecting, advising and helping the teachers; in visiting and generally supervising the schools; and in doing whatever else would tend to make the public schools of Essex county do what they are intended to do—to train our boys and girls to be pure, true, active, intelligent and useful men and women, and, therefore, good citizens.

It is, then, with great pleasure that I can report a greater readiness of the people to sustain the schools liberally; continued faithfulness on the part of the officers; increased efficiency of teachers; and, therefore, in most respects, a very satisfactory condition of the public schools of the county.

GLOUCESTER COUNTY.

WILLIAM MILLIGAN, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

I have the honor to submit my twenty-fourth and last annual report of the schools of Gloucester county.

SCHOOL-HOUSES.

Two new brick buildings were erected during the year just closed in District No. 1 (Woodbury), one at each end of the town, for the accommodation of the white children.

Each building contains four good-sized school-rooms, and plenty of closets for the use of teachers and pupils. The one at the north end has all four rooms occupied, while the other has one room vacant. These buildings are heated and ventilated by the Smead-Wills system, which has given entire satisfaction.

A building in the northeastern part of the city was erected a few years ago for the use of the colored children, but one room was left unfinished. This year this room was finished and furnished, and it is now occupied. The trustees furnished all of the rooms with the best furniture that could be procured, and slate black-boards were placed in all of the rooms.

A new and commodious building has also been built in District No. 39 (Nortonville). A large number of the houses were repainted during the year and necessary repairs made.

SCHOOLS.

The attendance at the schools was very good, owing to the very open winter and the freedom which the children had from the usual diseases incident to childhood.

On account of trouble between the glassblowers and the owners of the factories, the boys employed were sent to the day schools, and the night schools were not opened.

The examination of the schools was held at the usual time and a large number were graduated.

The usual commencement and closing exercises were held in the districts, and they were all attended by large and appreciative audiences.

TEACHERS.

We have a large number of excellent teachers, and some who are not as earnest and conscientious as one would desire. Our associations have been regularly held and the teachers enjoy them. The County Institute was held at Atlantic City, in connection with the counties of Camden, Salem and Atlantic, during the last three days of October.

ARBOR DAY.

Arbor Day was well observed by the schools. Not many trees were planted, as our school grounds do not need them, but selections and compositions relating to trees and tree-planting were read, speeches made and songs sung, the people generally taking part in the exercises.

TEACHERS' EXAMINATIONS.

These were regularly held at the appointed times and the results have been given in the table of statistics.

I cannot close this, my final report, without returning my sincere thanks to the State Board of Education, and to the State Superintendent and to his very efficient assistant, Mr. Betts, who has so many years given me his sympathy and advice, and to the trustees and teachers of the county, who have so ably assisted me in building up the cause of education in the county.

HUDSON COUNTY.

REV. GEORGE C. HOUGHTON, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

Since my last annual report the school work in the county has shown a marked improvement in many respects. With the exception of two districts there is now a manifest endeavor, on the part of school trustees, to obtain the services of a fully equipped teaching corps, irrespective of local influence—the desire to serve the educational interest of the schools rather than the needs of those who want to become teachers. The higher standard which you have inaugurated for the qualification of the teaching profession in this State is bearing fruit, and school boards perceive that there is a marvelous difference between the results attained by one who hears lessons from nine to three, and one who teaches from knowledge already well digested.

I wish that I could justly report that there are no more than two districts where the school-houses are kept in a cleanly and orderly condition. In some instances, one can make some allowance for floors which may not be scrupulously clean. A long and muddy tramp to school will necessarily leave its mark in the school-room. But a daily cleansing of the school-house, and the use of mats, will reduce this to a minimum.

I have never visited a cleaner and more orderly and systematic school than No. 6, in Bayonne; the same care shown in the work of the class-rooms is bestowed upon all parts of the building. While I do not in anywise disparage the excellent work done in other schools of this district and elsewhere, I do wish to emphasize my commendation of the painstaking and earnest attention to every detail in the management and instruction given by Mr. Earl and his able corps of teachers. The arrival and departure of the children, and their strict attention to the proper uses of door-mats; the orderly manner in which the largest number of pupils pass up and down the stairs; the neat appearance of every one in the class-rooms; the admirable deportment of the scholars, and their ready response to questions.

framed impromptu—all these things impress one most favorably, and indeed make No. 6 a model school.

No. 1, in Bayonne, is an admirable school, under the able management of Mr. H. E. Harris, a progressive man. Primary work is a feature of this school.

No. 4 is a school with a great deal of laborious work and many difficulties to retard its progress. It is a pleasure therefore to note Miss Wilson's phenomenal success.

No. 2 is doing a good work. Mr. Vroom is one who is always alert to whatever is in the line of advancement.

Nos. 3 and 5 are old buildings and badly ventilated. Good work can only be done in these schools under great drawbacks, although the principals and teachers endeavor faithfully to do all that can be accomplished. Mr. Atwater demonstrates a great deal of his teaching through the medium of the stereopticon, in which he is eminently successful.

In Harrison, as I have heretofore reported, there is an immediate need of greater school-room facilities. Three years ago I recommended that another school-house should be built, and I think that during the present year something will be done to supply the necessity.

Kearny has done much in the way of improvement, and the new ordinance creating the board of education is mainly responsible for such advancement as this district has made during the past year. Ground has been purchased for a new school.

Bulls Ferry, Secaucus, East New Durham and East New York are all engaged in the usual tenor of their work.

South New Durham is a very progressive district, and the two school-houses are crowded beyond their normal capacity. Additional facilities must be provided before another year.

North New Durham has added to its school building, and Miss Carmody receives the fully merited support and encouragement of the trustees.

Guttenberg has made a large and greatly needed addition to its school, and in West New York (District No. 10) the annex has proved to be inadequate to the large number of children applying for admission. A new and commodious building is called for and will undoubtedly be erected before the opening of another year.

In the town of Union (District No. 6), one of the model schools of this State, the work is foremost in every department. Industrial education has had a great triumph in this school. While the board of education was ready to support Mr. Ortel in the "project," the people generally were somewhat inclined to regard "industrial education" as a fad. But since it has had its day of trial, there are none now so skeptical as to refuse help and encouragement.

The new school in West Hoboken is already full and doing excellent work under Miss Contessa's management.

The new school-house in Weehawken is an ornament to the township, and a worthy addition to the list of modern school-houses. When this district falls into line in the matter of industrial education, for which they have admirable facilities, another important step forward will be made by the excellent board of trustees, which is otherwise so liberally minded, in Weehawken. The whole section of the northern part of the county is badly set off in districts, and some consolidation or rearrangement of Districts 1, 2, 3, 4, 5, 8, 9 and 10 must be made in the near future. I hope to accomplish something in this much-needed way before the opening of the new year.

The work of industrial education in the city of Hoboken has had a phenomenal success.

They have continued the same courses in the various departments as stated in detail in my former reports. They have found in actual practice that it has been of much advantage in the formation of these classes, to take a whole class from the public schools and keep it intact, while receiving their mechanical instruction in the Industrial School. It cultivates a healthy and pleasant rivalry and competition, which results in a marked improvement in their work. Where they are strangers to each other, there is timidity and lack of confidence which does not manifest itself when the class companionship is maintained.

The attendance during the past term has been regular and satisfactory. The numbers instructed in the various departments were as follows, viz., wood-working, 240; cooking, 350; clay modeling and wood-carving, 240; sewing, 600; total, 1,430.

The premises used for the various departments in the Martha Institute have been rented for another year.

No change has been made in the number of teachers except that Miss Harms, in charge of the embroidery work, has been for the present discontinued. The salaries paid continue the same as before.

In May last there was a very successful exhibition of the work of Industrial Schools. The various products were arranged with much taste and skill by the teachers and pupils, with the co-operation of the trustees, who had suitable arrangements made as to proper lighting, &c., so that the exhibits could be seen to advantage. The interest manifested by the public was all that could be desired. The attendance was overwhelming—people from every part of Hudson county, from the adjoining counties, and from New York and Brooklyn, visited the exhibition, and were profuse in their praises of the proficiency manifested, when the limited opportunities afforded are taken into consideration. The sewing class' exhibits attracted the attention of the lady visitors, who minutely examined the specimens. The gentlemen visitors took much interest in the boys' work. The latter were pleased immensely to find their handiwork attract so much attention.

The clay modeling was noteworthy and was much praised. The local newspaper press lent their assistance, and gave quite an amount of their space toward giving their readers a full account of all that was to be seen. At future exhibitions, the board will endeavor to procure more room, so that their visitors will not have to undergo so much unpleasantness among crushing crowds.

Taken altogether, the response and interest manifested by the citizens was very gratifying to those who managed the exhibition.

DEPARTMENT OF WOOD-WORKING (CARPENTRY).

There is an appreciable improvement in the work of this department, the result of sending whole classes from the schools, instead of selecting "bright scholars." Better results can be obtained from a class that is intact than from one that is made up of selections from various classes. Ten classes, averaging 17.3 to each class, received instruction in this department during the last year, each class being taught three times a week. The attendance was punctual and the department excellent. Two new benches have been added to those already in use, providing accommodation for a class of 20 pupils. The additional benches were necessary, owing to the fact that all the boys in the classes allotted to this department are now instructed. In the classes in the public schools, co-education has been introduced; in classes which number 36 pupils, the boys are sometimes a majority; hence they had to provide for their accommodation in this department.

The tools are in first-class condition, and will last for an indefinite period. New T squares were made by the pupils, thereby saving considerable expense; they are better and more durable than any which we could buy.

The drawing which preceded each lesson in carpentry presented a plan and elevation of each joint or article to be constructed. Their work made an interesting collection; many of the boys have preserved them. I think during the coming year it would be advisable to require them to ink in their drawings, thereby preventing the many erasures that necessarily follow from lead-pencil work.

A new feature was introduced during the year, viz., the tying of knots and their application; it proved very beneficial, as it provides an excellent method of training the eye and hand. The work might with advantage be extended to another year, introducing more complicated joints and problems in construction, which would be of advantage to those whose future occupations will be of a mechanical nature.

A class may be taken every Saturday morning during the coming term to visit some place of industry, such as the navy yard, paper and iron mills, the museum of art, and machine shops, where ideas

and tastes would be developed and opportunities offered to study the characteristics of different kinds of work, thus enabling the boys, when they leave school, to intelligently choose an occupation suited to their dispositions. Many a good machinist is lost in a poor tailor, and *vice versa*.

The exhibition, I think, served a very useful purpose, as it brought the work before our citizens and others adjacent to us. It also furnished an incentive for better work on the part of the boys; they could see that their work was to be looked at and criticised by the public.

DEPARTMENT OF DOMESTIC ECONOMY (COOKING).

The general attendance has been good, with decided improvement in scholarship in some of the classes, with a weekly average of 345. Some eleven classes are receiving the full course in plain cookery, and one class is completing the advanced course, which includes the more expensive soups, entrees, salads and desserts.

It can hardly be expected to make professional cooks in their short course, but we do believe if school girls once master the elementary principles that are illustrated in the lessons, with practice at home and encouragement from parents and teachers, a skill will be acquired sufficient to do all that is necessary in plain family living, as the course is sufficient to enable a girl to prepare a single meal in any emergency, or to instruct others when necessary.

Bread-making forms an important lesson, and one always received with interest, and practiced at home with very good success.

An addition of two fine meat-charts will greatly increase the interest in marketing lessons. The normal class has supplied one position with a teacher (Miss Pond), and I understand she is giving satisfaction.

Many of the children show their appreciation for what is done for their improvement by expressions of gratitude.

DEPARTMENT OF WOOD-CARVING, MODELING AND DRAWING.

The work accomplished by the boys in the wood-carving classes last year was better in many respects than that of the previous year, owing, in a great degree, to the study of form when in the modeling classes.

They were able, before the year closed, to utilize their carvings, many of them making boxes, while others showed their ingenuity by making stools and cabinets of their panels at home.

The work of the first year is elementary, but when it is carried forward a second year, some develop considerable artistic feeling in

modeling and finishing leaves and forms of various designs, and can make their work both attractive and useful.

The attendance during the year was excellent, there being 252 taught each week, with an average of 18 in a class.

In the modeling class, the work commenced with simple forms like the sphere and cube, always studying and analyzing the forms first before making them in clay, thus developing the power of observation.

Before the year closed, the boys made copies in clay from plaster casts, many of them really excellent.

It is surprising to see how rapidly they acquire facility in the use of their hands, and at the same time learn to use their eyes, looking for and appreciating the beautiful in nature.

DEPARTMENT OF SEWING.

The same interest which has characterized this work from its start is yet maintained by the pupils in this department. Seventeen classes are taught; these classes are formed from two classes of the same grade in the public schools, making an average of about 30 pupils in a class.

The attendance is above the average, the classes taught being the same as those taught in the ordinary branches.

The opportunity given to the public to see specimens of the work, and to judge of its nature and value, has proved an incentive to increased carefulness and neatness. Four classes will finish the course in sewing this year. The stitches learned, and a knowledge of the materials used, cannot fail to show practical results, and it is in the homes of the city where the benefits of this branch of industrial work are most apparent.

The treasurer's report shows a satisfactory and economical management of their finances.

In conclusion, I desire to say that in looking back over the last year's work, I feel satisfied that they have been gaining. They have been the means of imparting instruction to many who will feel its good effect throughout their entire lives.

The cooking and sewing, I am quite confident, has improved the habits and comforts of many families who would never in any other way have had any opportunity to realize how much a little knowledge relative to their domestic economy can add to their happiness. I also feel that the general public has begun to appreciate that industrial education should be supported for the good which it does. The prejudice which was at first encountered is fast wearing away. The overwhelming crowds which flocked from all parts to see the exhibi-

tion proves that the public has begun to estimate industrial education at its true value.

Taking together the exhibits of meritorious work done in Union Hill and Hoboken, in manual training, I am glad to report that Hudson county is steadily improving its opportunities, and by next fall I believe that other localities in the county will find that their common school work can be greatly benefited by incorporating into the school system industrial education.

HUNTERDON COUNTY.

E. M. HEATH, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

My second annual report of the condition of the public schools of Hunterdon county, for the year ending August 31st, 1890, is herewith presented. The following is a brief statement of my statistical report :

Amount of money received from the \$100,000 fund.....	\$2,329 51
Amount of money received from State school tax.....	60,094 08
Amount of money received from surplus revenue.....	3,297 43

Total amount apportioned to the several districts..	<u>\$65,721 02</u>
---	--------------------

Number of children included in census of 1889.....	9,296
Nine districts numbering less than 45 each, aggregating 298 children, receive.....	\$2,475 00
Thirty-five districts numbering 45 and less than 55 each, aggregating 1,693 children, receive.....	13,125 00
Sixty three districts numbering 55 and over, aggregating 7,305 children, receive.....	50,121 02

Amount per child to districts numbering 55 and upwards	\$6.861193
Average number of months the schools have been kept open	9.87
Number of children enrolled.....	7,308
Number of male teachers employed.....	67
Number of female teachers employed.....	89
Average monthly salary of male teachers.....	\$48 70
Average monthly salary of female teachers.....	34 20
Estimated number of children attending private schools..	345
Estimated number of children attending no school.....	1,374
Number of children the school-houses will seat.....	7,669

The school census for the coming year is 9,053, being a decrease from last year's census of 243. The seating capacity of the public school buildings of the county is nearly 84 per cent. of the census, and nearly 5 per cent. greater than the enrollment. Of the 110 school buildings in the county, 83 have been denominated very good; 14 as good; 9 medium and 4 poor. Quite a number of districts have repaired and refurnished their houses, but no new buildings have been erected during the year.

The grade of certificate held by the teachers of our county the past year is as follows: 7 hold first State; 7 second State; 3 third State; 28 first county; 36 second county, and 69 third county. A great number of these teachers are earnest, painstaking, enthusiastic workers, and do not receive adequate pay for their labors. Quite unsatisfactory are the library reports. Many of the districts have lost both their record and books, and the report is only approximately correct. Districts Nos. 9, 62 and 74 have added to their libraries, and Nos. 95 and 108 have started new ones and received their first appropriations.

Our institute was held at Flemington, December 2d, 3d and 4th. It was ably conducted by the State Superintendent, Dr. Brooks and Miss Patridge, who gave to it a practical and beneficial turn. There was a good attendance and much interest was manifested by most of our teachers, who, by their attention, gleaned much of profit from this institute. Two classes of teachers, both small, never receive any benefit at institutes. The first class are either too indolent to learn anything, or too stupid to apply what they learn. The second class know entirely too much (?) to derive any benefit from institute work. Representatives of this class employ their time in taking conspicuous positions, perusing newspapers, or, if opportunity offers, exhibiting their "wondrous learning," by sneering at the doubts and difficulties of others, and dogmatically asserting their own positive knowledge. Hunterdon county has but few of either class; but she is ready and willing to spare all that she has of both.

MAPS, CHARTS, &C.

A large State map, together with charts and other school apparatus, have been introduced into nearly all the districts of our county. These have been of very great help to both teachers and pupils.

TEACHERS' CERTIFICATES.

The results of the examination for teachers' certificates are as follows:

First grade to males.....	2
First grade to females.....	6
Second grade to males.....	7
Second grade to females.....	24
Third grade to males.....	27
Third grade to females	82
	<hr/>
Total granted	148
Males in all grades rejected.....	15
Females in all grades rejected.....	36
	<hr/>
Total rejected	51

TEACHERS' ASSOCIATIONS.

Two flourishing Teachers' Associations, one in the upper, the other in the lower part of the county, have been organized. Meetings have been held at convenient points, and a good degree of interest has been manifested by teachers and friends of education. Methods of teaching and different phases of school-room work were discussed. The attendance of teachers has been good, showing a desire for improvement, the object of the associations being the mutual improvement of the members. An interest in improved methods has been awakened and a desire to know more aroused. Teachers new in the work recognize the importance of professional knowledge. Another object of the associations is to awaken an interest in educational matters among the people where the meetings are held, and to put them in sympathy with the teacher and his work.

In conclusion, I wish to say that in many respects the past year has been one of marked improvement and success, and the outlook for the present school year is very promising.

MERCER COUNTY.

LLOYD WILBUR, M.D., SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

The statistical report now being required to be so full and comprehensive, I shall deviate from my custom of giving a synopsis of our financial condition here, as it would be a mere repetition of what is elsewhere more fully stated, and, therefore, certainly unnecessary. I do not think the schools of our county have ever had a more prosperous and successful year than the one just passed, nor one in which the people have manifested a more hearty interest in their condition and progress.

The new duties that are, from time to time, laid on the County Superintendents by the educational department of our State government are so manifestly necessary and important, that I think they are everywhere taken up with great willingness and alacrity, albeit they leave little time for leisure.

It is, of course, hardly necessary to mention that the routine work of the year has been attended to to the best of my ability, and that marked progress in some lines is to be noticed.

There is one thing that I can mention with emphasis, and with some pride. The qualifications of the great body of our teachers are far in advance of what I have ever before been able to report, a state of things, I think, largely due to the fact of increased strictness in our examinations since the third-grade certificate has been made to count for its full value on the amount of work required to be done in order to obtain the higher grades, and to a richer leavening of Normal graduates, whom, it gives me pleasure to say, we find everywhere acceptable. It is, of course, needless to say, that improvements in the corps of instructors are quickly reflected in the character and behavior of the pupils. And this is very plainly marked.

In one of the townships there is quite a number of Indian boys from Carlisle attending the winter schools. And I wish to say of

them, that their quick obedience and alert anticipation of the wishes of the teachers, as well as their intelligent comprehension of explanations and illustrations addressed to them, are worthy of all praise.

A branch of the service to which I have this year paid special attention is the matter of school visitations, spending at each school as large a portion of the day as possible. Besides the required semi-annual visits, I have, in numerous instances, made other visits, especially to the schools that I have thought most needed supervision, such as those under the charge of teachers of limited experience. I have made these calls at unexpected moments, and have been much gratified at finding the schools in excellent trim, and full of vitality and interest in the work.

The year now closing has been one of great enterprise in the matter of improving present school buildings and laying plans for new ones. In the new district just formed in Hamilton township, they have erected a school building of such perfection in all its appointments that I cannot resist the temptation of specially referring to some of them. It is a three-story building, in Gothic style, forty-two feet by seventy in size, with pressed brick front, built in the centre of a large lot, making it impossible that it should ever be darkened by adjoining buildings. It has two rooms on the first floor and two on the second, each room being twenty-four feet by forty in size, having also cloak-rooms and teachers' private rooms, and a beautiful assembly room on the third floor, thirty feet square. It is finished inside with the best of Georgia yellow pine of the best workmanship. The whole building is made fire proof by the use of the New Jersey Wire Cloth Company's fire-proof lathing. The heating and ventilating is with the Smead, Wills & Co.'s heater, which, with the dry closet system added, makes an arrangement that is simply perfect. The heat is uniform and the air as pure in the evening as when the day began.

We have now at last a pretty complete uniformity of books throughout the county, which, besides rendering work more easy for the teacher and more profitable to the pupil, is also much more economical for those parents that occasionally move from one district to another. But, after all, the only *effective* economy in book buying is to be seen where districts furnish all the books, as they can be had much more cheaply when purchased in quantities.

Our institute this year was postponed till May, instead of being held in the fall, as was at first intended, being delayed on account of the continued illness of some members of our faculty of instructors. But what then seemed a calamity may, in reality, have proved an advantage, as our meeting was not embarrassed or pressed upon by the demands of other counties. The result was a thoroughly practical and almost ideal institute, made up of professional instruction entirely, as the law founding the institutes contemplated, and pro-

nounced to be the most satisfactory meeting of the kind that we have yet held. Full reports were published in the county papers, a service for which, as for many other favors so kindly rendered our department during the year, I wish to return them our warmest thanks.

MIDDLESEX COUNTY.

H. BREWSTER WILLIS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

The following brief report of the progress and condition of the public schools of Middlesex county is respectfully submitted. The past year, in many respects, has been one of great encouragement.

NEW SCHOOL-HOUSES.

District No. 2, Dunellen, has increased its school accommodations by the erection of an additional new school-house, in the northern portion of the borough, at a cost of \$6,000. The building is spacious, well-lighted, heated and seated.

The board of trustees and citizens of the borough are to be congratulated for their enterprise in educational matters.

The "Old Curiosity Shop," at Fresh Ponds, District No. 48, which has only been tolerated for the sake of the pupils, has at last disappeared, and in its stead appears a new school building with all the modern improvements. The district deserves much credit, as the battle for better accommodations has been a long one.

ENLARGEMENT OF SCHOOL-HOUSES.

District No. 75, Highland Park, and District No. 31, Washington, have made very desirable additions, and are among the best school-houses in the county.

INCREASED SEATING CAPACITY.

District No. 24, Woodbridge, District No. 39, Raritan, and District No. 56, Jamesburg, have increased their seating capacity, and have now ample accommodations.

GENERAL IMPROVEMENT.

A large number of districts have painted, enclosed and otherwise improved their school property. Our school buildings, with their surroundings, admit of a favorable comparison with those of any other county.

The valuation of school property in the county, as seen by the statistical report, is on the increase. With a few exceptions, the school-houses are in good condition and well furnished.

TEACHERS' CERTIFICATES.

The number of applicants for teachers' certificates is less than that of last year, but a greater proportion of certificates issued are of the first and second grade, showing a gratifying advancement.

Most of the teachers are efficient and faithful, doing good and conscientious work, although, in many cases, poorly paid.

SCHOOL WORK.

Regulations for governing the school, and a schedule of daily exercises, carefully prepared and presented to the board of trustees for their approval and signature, have been of signal benefit to the teachers.

TOWNSHIP MEETINGS.

Most of the township school meetings were well attended. All phases of school work were freely discussed, and important school business transacted.

SCHOOL VISITATIONS.

Each school, and the departments of each school, have been inspected, at least twice, by me during the past school year. There has been an increase of 800 children in school attendance.

READING CIRCLE.

The necessity of a systematic course of professional reading has been earnestly pressed upon the teachers of the county, resulting in three distinct organizations, having their respective places of meeting at Metuchen, Jamesburg and South Amboy.

The course of reading adopted for the present year is Hailman's "History of Pedagogy," Spencer's "Education" and the "Chataquan." The unanimity with which the teachers have joined the movement, and their readiness to assume the duties of membership, exhibit a commendable desire for advancement in professional knowledge, and give promises of greater efficiency in school work.

NATIONAL EMBLEM.

At the suggestion of the County Superintendent, a successful effort was made to erect our national emblem on every school property in the county. Teachers and pupils entered heartily into the movement, and collected (exclusive of the amount raised in cities) nearly \$3,000 for the purchase of flags and flag-staffs.

TEACHERS' INSTITUTE.

The County Institute, held in the New Brunswick High School building, December 2d and 3d, 1889, was a very successful one.

The teachers were heartily welcomed in an address by C. E. Spencer, Esq., President of the New Brunswick Board of Education, and other addresses were delivered by the State Superintendent, Hon. E. O. Chapman, on "Educational Needs;" Mr. William Campbell, on "The British System of Elementary Education;" Prof. Nicholas Murray Butler, on "Industrial Work," and by Dr. Edward Brooks, on "The Value of the Ideal." Principal P. S. Hulsizer presented a paper on "Characteristics of the Coming Teacher," and Principal A. H. Wilson, one on the "Reading Circle." The subject of music was ably presented by Prof. Butts, and drawing by Prof. Thompson.

MUSIC.

Vocal music is being taught in a number of our schools, with marked success.

CONCLUSION.

Some new features of our school work are in the line of advancement, with gratifying indications of steady improvement.

With a few exceptions, school officers have discharged their duties with promptness and care.

MONMOUTH COUNTY.

SAMUEL LOCKWOOD, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent:

SIR—I have the honor to report to you the school work for the year beginning September 1st, 1889, and ending August 31st, 1890.

The following summary furnishes the factors on which was based the apportionment of school moneys for Monmouth county for the year beginning September 1st, 1890, and ending August 31st, 1891:

Number of children in the county, according to census of 1889.....	19,076
Interest from surplus revenue.....	\$2,561 02
State appropriation from the \$100,000.....	4,780 29
Appropriation from the \$5, or State school tax.....	115,478 21
Total amount of school moneys.....	122,819 52

\$375 districts, having not more than 58 children nor less than 45 each.....	15
Districts receiving each \$275, having less than 45 children each.....	8
Number of children in these 21 districts.....	1,019
Amount appropriated to the children of these 21 districts.....	\$7,825 00
Average per child for the above.....	7.6802
Number of children in the districts which number more than 58.....	18,057
Amount from all sources to each child in the above districts.....	\$6.3684

It may seem surprising that even to-day any should be found content with unsuitable and uncomfortable school-houses. Hence, the attempt to arouse a proper sense of the situation is, in a rural community, sometimes an educational task, needing precept on precept, appeal upon appeal, for a series of years. I am glad that only twice in the whole history of public education has condemnation of a school-house by official edict been practiced in our county. After five years of expostulation in vain, it seemed that nothing more remained for me to do in respect of the Jerseyville District. I had caused the building to be examined by experts—a carpenter and a mason. The hygiene was simply shocking, and the children were packed to discomfort. The experts decided that neither by repairing or enlarging could the structure be made “suitable.” But for all this the district twice voted down the proposition for a new school-house. At this juncture, with commendable promptness, the State Superintendent stepped in and made personal inspection, then instructed me to condemn the building; meeting after meeting was now held, but with an adverse vote. I had advised that \$1,000 be raised. At last the good sense of the citizens prevailed, and the sum of \$1,200 was voted, and now a school-house is under way of which the community will feel proud.

A few of our school-houses are still not what they should be. But when compared with the situation twenty-years ago, there is matter for congratulation. In 1868 our school property was about \$91,000. To-day it is very close to \$400,000. Yet, wherever my judgment has been accepted, economy has been the rule, providing the twofold object was attained—room for good work and hygienic conditions. At a meeting of officials the writer became the object of an objurgic blessing for “filling the county with palaces.”

Perhaps a few figures may help to dispel this idea of palatial extravagance. The first year of real work under the school law was 1868. The reported child census for that year was 14,084, with a school enrollment of 9,030. Several school buildings then were the

property of religious bodies, but in reporting were counted in as public school property, the total being \$91,029.27. Let us compare *then* and *now*:

1868.

The child census of 1868.....	14,084
Enrollment in the schools.....	9,030
Valuation of school property.....	\$91,029 27
Amount to each child in census.....	6 46
Amount to each child enrolled.....	10 08

1890.

The child census of 1890.....	18,750
Enrollment in the schools.....	13,030
Valuation of school property.....	\$388,250 00
Amount to each child in census.....	20 27
Amount to each child enrolled.....	29 78

In the above no account is taken of fractions. The exhibit is striking, and if the former state of discomfort—and in many instances crowding to positive demoralization—be compared with the present accommodations, in kind and amount, the idea of extravagance is simply ridiculous. He who still hankers “just for saving” for the days of sheep-skin sidings, and knot-hole ventilation, and slab seats, and insinuates “surface teaching,” must be allowed the fact that when the ferruled ruler was the only apparatus recognized, an “iron rule” prevailed, and the master did go to the bottom of things; yet, singularly, though entertaining a feeling appreciation of this personal attention, pupils did not like to go to school. The mourners are few over the departure of “those good old toughening days.”

Monmouth has not been behind in the prominence given to the “dear old flag.” Early in October the colors were raised over the Whitesville school-house with impressive ceremonies, and addresses to the school. In the character of this patriotic service it was the initial one in the State. Flag-raising at schools has been a very frequent occurrence during the year. While heartily encouraging all this, it has afforded me greater interest when it was an entirely voluntary movement. I have tried to impress the difference between buncombe and intelligent devotion. The flag should not be a fetich, but a symbol. While not ignoring sentiment, I would bring principle to the fore. I heard an advanced school boy read a composition on a noted battle in the Revolution. He said: “The British fled, like the cowards that they were!” I asked if it would not honor the soldier of the Revolution more to write of him as conquering brave men, rather than cowards; and instanced Napoleon asking a courtier how his soldiers regarded the English: “Sire,” was the answer, “the French have

learned to respect the enemy, but not to fear him." It is an open question if our home history is well taught in the schools.

Arbor Day was kept with spirit. I regret, however, that in some places the young trees are illy cared for, and in some others they are destroyed from sheer wantonness by mischievous boys. The teacher should aim to inculcate tree conservation as well as tree planting. Where the home influence is either sterile or destructive, it is not easy to create genuine love and respect for a tree. Still, I think we are doing a good deal. I must select three cases in which the pupils are made to act as guardians to this species of school property. Hence, the Keyport school has now a superb grove of maples; the Freehold school, besides its maple trees, is clad in a rich robe of ampelopsis; the school at Asbury Park is noted for its flower-beds of choice roses, tulips, hyacinths, &c. And in these schools not a tree or a plant touched ruthlessly by a pupil. I can aver, such facts in Monmouth, not many years ago, would have been regarded as phenomenal.

The failures of candidates at the teachers' examinations were fewer this year than ever before. With regard to the new ordinance in respect to the second grade, I am afraid it has somewhat discounted scholarship. There is a difference between the knowledge of a rule and the knowledge of its application. Hence, I have sometimes rejected on the second grade that which I have passed in the third grade. The solution of a question in arithmetic may be such as to obtain the correct result. But it may be bungling or cumbersome. So far as analysis or citation of the book rules go, a sentence may be correctly parsed. Yet, the language, both written and spoken, of the candidate may be inelegant and even ungrammatical. Surely, then, in the second grade this *application* quality should be emphasized on a higher pitch than in the third grade. Would it not, then, be well to strengthen the new ordinance on this line, also to formulate a requirement that to entitle to this remission of repeating work, a marking of 85 must be got on geography, arithmetic, grammar, theory and practice of teaching?

I believe a sister State is insisting as a qualification for examination, that candidates shall have received instruction in the art of teaching. Something in this direction seems much needed. For this purpose might not a normal Saturday class be instituted in the counties, the State designating the text-book, and the County Superintendent selecting the instructors from the most intelligent teachers in his county.

As regards the geology of the State, New Jersey stands peerless in the apparatus in this direction furnished her schools. The atlas of maps on her geology is a marvel of scientific thoroughness, and a grand monument to the late Prof. George H. Cook, the State Geologist. But to many of our teachers this superb collection is of no use

whatever. They do not understand them, and seem to be content to have it so. In some schools I have found the walls decorated by them, as if they might be wall maps. Such exposure would soon ruin these exquisite maps, which are of a quality like fine engravings. Hoping to infuse a spirit of investigation in this direction, I gave a series of Saturday lectures on geology to teachers, in which I was greatly aided by the generous offer of my friend Professor Newberry, of the Columbia College School of Mines, of duplicates from the fine museum of paleontology of that institution.

That a law so good in its purpose as the one which commands the sending of the children to school should be so ineffective, is a painful fact. In some instances this neglect comes of parents who, without education themselves, seem unconscious of their misfortune. It is true, however, that sometimes poverty is back of this seeming remissness; there is inability to clothe the children—too often the result of the intemperance of the father. However, whatever of remedy there may be in the law it is only when it is enforced, which is not done generally, for want of some one empowered to execute it. In Long Branch a truant officer receives from the teacher a daily notice of such absences which need his attention, and the parents receive a call from this officer. I have wondered how it would act if the local constable anywhere had the power of arresting truants and habitual non-attendants, receiving from the town collector a fee for each arrest, the same being charged to the district.

I am glad to report that we are advancing on the entire line, and that work of extraordinary merit is now to be found in some of our primaries. Here, truly, is to be seen the teaching art. The school-room to these little ones is a delight—pleasure and progress proceed *pari passu*. Where such work is done these little ones are loving links between the teacher and the parent. Alas, when promotion begins the links loosen and soon fall. Even in the miserable "boarding round" system there was a relation between them, such as it was. At present the separation is wide. Here, too, comes in the fact that home study is much less than formerly. Thus it would look as if the parent had less sympathy to-day, either with the teacher or the difficulties of the child. The truth is, however, that the studies are more numerous, and differently conducted. The parent dislikes to help in arithmetic, "because the sums are not done as they were in Daboll." And so with the language lessons, as grammar was not taught so when she went to school. However, as a good reader holds the key to all knowledge, and as it is not possible to give pupils the amount of practice in this art that is needed, parents should encourage reading aloud at home, not from the school-book, but from the newspaper and the magazine, and this would be working with the teacher.

It still remains true that some trustees are not up to the modern idea of what the school-house and the teacher should be. To such,

slovenliness of person and dress, dirty shoes and school-room floor to match, are not worth the notice either in teacher or pupil. To such the spectacle of the pedagogue in his shirt sleeves, hurriedly slipping on his coat at sight of the Superintendent coming, has in it nothing funny.

The County Institute was held at Freehold in November. Of a teachers' roll of 225, but 5 were absent, and of these only 1 without an accepted excuse. This fact of itself speaks well for the loyalty and orderly bearing of our teachers. There is hardly room for details of the conduct of the institute. The State Superintendent was with us, and addressed the teachers with encouraging words. I will only mention a little departure from the usual way. Instead of the public lecture, one evening was given to a sociable, to allow the teachers to make one another's acquaintance, and the experiment proved a happy one.

MORRIS COUNTY.

JAMES O. COOPER, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent:

SIR—I very respectfully submit herewith my first annual report of the public schools of Morris county for the year ending August 31st, 1890.

Owing to my recent appointment (June, 1890), my report is very unsatisfactory to myself, and fear it may be to you; but hope that one year's experience may enable me to make my next report much more interesting and complete.

The last census report shows an increase of 60 in the number of school children in the county over that of the previous year, the present number being 14,280.

Our school buildings will comfortably seat 9,925 pupils, and as the average number who have attended school during the time it has been kept open is only 5,409, you see that ample seating capacity is provided. There is one exception to this rule, and that is in Dover. Here, owing to the very rapid growth of the town, more children have presented themselves for admission into their school than could be accommodated, so that the trustees have been obliged to rent three rooms in other buildings, in which about 140 children are provided for. It is probable that an addition to the present building will be constructed ere I report to you again.

Two hundred and thirty applicants for teachers' certificates have been examined during the year, and 112 certificates granted; 118 failed to get the required averages.

The total valuation of school property in the county is \$305,430. On this valuation there is an indebtedness of \$18,508.62, or about 6 per cent.

OCEAN COUNTY.

E. M. LONAN, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent:

I herewith present to you my report for the year ending August 31st, 1890.

I am very much annoyed at the tardiness of some of the district clerks in sending in their annual reports. Although I have written time and again, as yet ten of them have failed to send me their reports.

Examinations have been regularly held. While we have a large number of candidates at the May examination, the examinations held at the other appointed times are very slimly attended. At our last examination we had 11 candidates, and 3 of them failed to secure their certificates.

I don't believe we stand in need of so many examinations. I should suppose two yearly would answer every purpose. I regret so much losing the services of my friend Hon. A. C. B. Havens. Mr. Havens served as examiner for the last nineteen years. As an examiner he has few equals and no superior—firm, genial, kind and decided. On account of Mr. Havens being elected county clerk, he declined serving on the board. Last year Professor Winslow acted as one of my examiners. He also was very efficient, but Essex county called him from us, to our great loss and their gain. Professor Winslow will "fill the bill" in any High School he may have charge of. My friend Mr. Peter Tilton is now my examiner. I have known him for years, and he will honor the position.

Observation shows that the scholastic wealth of the county is rapidly increasing, owing to the rapid growth of the shore resorts.

Since 1886, four schools have been established, with a valuation of about \$15,000.

During the last year Dover Chapel, No. 33, has erected a large and commodious building, furnished with first-class modern furniture, including slate black-boards, maps, &c. Metedeconk has also erected a suitable and cozy building, also furnished with modern desks, slate black-boards, &c. Cedar Grove, No. 27, has erected a new house in place of the old one, which, for many years, had been too small to accommodate the children of the district.

All this is very gratifying to me. We have now left only one school-house marked very poor in our county. Some of the districts have added new furniture; old black-boards have been replaced by new ones of slate; maps, charts and globes are receiving their proper share of attention, and a general advancement is being made all along the educational line. Suffice it to say, that the majority of our teachers are thoroughly in earnest with their work, as shown by the number who successfully attend the examinations for the higher grades.

During the year the certificates granted were: First grade, 7; second grade, 9, and third grade, 41; rejected, 11.

This county consists of 11 townships and 4 boroughs. It has 52 school districts with 70 departments, and a seating capacity of 86 per cent. of the school census of the county. I am pleased to record a gradual and healthy increase in the percentage of the census enrolled in the schools of this county.

Four of our teachers received diplomas at the graduation exercises of the New Jersey Teachers' Reading Circle, held at Trenton in December last. It is notable that said teachers are to retain their respective positions for the ensuing year, thus proving that reading circle work is a great incentive to other and more thorough school-room work.

PASSAIC COUNTY.

REV. J. C. CRUIKSHANK, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

It is a pleasure to gather up and account the progressive work of the public schools. They are the efficient safeguards of American genius. The public school teachers are the sentinels on duty—the picket-guard. They breathe true Americanism, raise the standard of holy patriotism above clerical dictation or political intermeddling. They teach the children the language of the Declaration of Independence, the Constitution of the United States, the laws of the land and the right use of the election ballot. They educate the children in no foreign tongue, no alien thought, and in no denominational creeds. The words of John Adams, the motto visible in many school-rooms, “the whole people must take upon themselves the education of the whole people.” The genuine American will adopt the words of General Grant as his own, “Not a dollar in money appropriated to the support of free schools shall be appropriated to the support of any sectarian or political institution.” The teachers of the public schools of New Jersey, unfettered by denominative restrictions, constitute the State vigilant committee of national freedom. In the public schools the children of all stations, of all parties, of all ancestries, of all creeds, meet, mingle and grow up together in bonds of mutual union and respect, an honor to a great and enlightened nation. In the public schools the educated children come to understand the rights and privileges of American citizenship. Thus, under all circumstances, maintain, build up high, higher, the public schools.

The school registers, the index of progress, record the attendance of 16,698 out of the number of children in the county of 29,020. The district clerks estimate the number attending private schools at 3,742, and attending no school at 8,580, in their reports. In the rural districts the population and the school children are becoming less—a great diminution—but are increasing in the villages springing up along the railroads and in the cities. The seating capacity in these districts is more than abundant, but in the villages and cities to which

they have resorted, the seating capacity is greatly deficient, to the extent of about 4,000.

The funds available to carry on instruction in the schools of the county to August 31st, 1891, are from the—

State school fund.....	\$6,939 38
State school tax.....	112,154 13
County interest, surplus revenue.	1,168 38
	\$120,261 89

The district tax in the county for building, repairing, fuel, incidentals, and to supplement the salaries of the teachers, is reported to be \$178,764.48. This is the amount in the aggregate. The amount to each particular object has not been given.

Three new school-houses have been built and occupied during the year past, and 3 more will be ready to be occupied by January, 1891. Some school buildings have been repaired and beautified, and grounds ornamented.

Arbor Day was joyfully remembered by the schools. The school children and teachers had a relief from studies and a hearty relish for the refreshments furnished.

Two additional libraries have been added to the 15, which, with the 14 in the Paterson schools, have a make up of 31 for the county.

The County Institute was held November 14th and 15th, and was largely attended by the friends of education. An address of encouragement from the County Superintendent, and of welcome to the teachers, from Mr. Watts Cook, President of the Paterson Board of Education, were, with the reading of the Scriptures and prayer, the opening exercises. Addresses were delivered by Dr. Nicholas Murray Butler, member of the State Board; by Mr. James L. Hays, Chairman of the State Normal Board; J. M. Green, Principal of the State Normal; Professor Apgar, of the State Normal; State Superintendent Chapman, Professor Rheinhardt, formerly of the Paterson High School; Rev. Dr. Shaw, on the "Historical Grandeur of the Bible," and Dr. Anderson, of the Adelphi Academy, Brooklyn, on "Athletic Exercises." It was the most enthusiastic, instructive and entertaining institute ever held in the county.

The number of teachers' certificates given at the regular examinations were, first grade, 3; second grade, 3; third grade, 26; total, 32. Failed 15. Applicants to the Scientific College failed. Because the college is free, applicants overlook the required qualifications, and only know what preparation is necessary by a failure to pass the examination.

Confined by an attack of la grippe, injured by a fall, and kept in the room for nearly three months, visitations to the schools and school

departments count up to 148. School visitation is variable, interesting and amusing. Encourage the children, gain their confidence, tell them to show off "oddities and have fun," and then the way is open for examination. The school census for 1889 was 27,688, and for 1890, 29,020—increase, 1,332.

SALEM COUNTY.

ROBERT GWYNNE, JR., SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

DEAR SIR—The schools of our county the past year have been well attended, and, in a majority of them, faithful and efficient work has been done. Where there has been failure, it has been caused in every instance by the inefficiency and lack of skill and tact on the part of the teacher. I have noted 24 teachers the past year who have not done commendable work. All were teaching on certificates of the third grade, and had held such certificates, without making effort to secure those of higher grades, from one to twelve years. Not one had any training in the profession before entering on the work as teacher. I noted that these were the ones irregular in attendance at our Teachers' Association meetings; indifferent as to the annual institute; careless as to suggestions made to them concerning work in their school-rooms, and, most of them, regarding subscriptions to educational journals as useless waste of money. There were 90 teachers employed in our district schools last year, so that more than a fourth of our whole teaching force was poor. This is a large percentage. I can see no remedy excepting a radical change is made in our system of licensing teachers, and attendance at a training school for a specified term, before entering the profession, be made compulsory. I know that there are good teachers who never attended a Normal School—we have some in this county. And all who attend

Normal Schools and graduate therefrom are not good teachers. But one who has had training as a teacher must be better qualified to take charge of a school than one who has simply studied to pass an examination in the third grade. And the teachers of a training school would have a much better opportunity of deciding who would and who would not make teachers (because they would have the practical work ever before them) than have the examiners at our county examinations, for the best teachers do not always pass the best examinations. We now expect the teacher to prepare himself or herself in theory and practice of teaching before receiving a certificate. A review of the papers shows that the answers to the questions one would regard as practical are ones that would never be given by a live, earnest, progressive teacher, while the answers to the theoretical questions are decidedly theoretical, not to say hazy.

The Superintendent is often not consulted when a teacher is to be employed, and frequently he is compelled to face the unpleasant fact that a teacher, whose work he has condemned and tried to keep out of the profession by legitimate means, is firmly anchored in another school for another year. All engagements of teachers should be subject to the approval of the Superintendent.

Nearly every teacher in the county attended the institute at Atlantic City in October, 1889. The few who did not attend furnished good and sufficient reasons for their absence. The instruction given was practical, and I have found many evidences of its application in our schools.

Two meetings of our County Association were held—one in January and one in April. Prof. W. T. Deremer was our principal instructor, speaking on "Moral Training" and "Drawing" at the first meeting, and on "Map Drawing" at the second.

At the regular teachers' examinations, 3 first grade, 11 second grade and 53 third grade certificates have been granted.

The regular examinations were held in the schools in March and May, and papers satisfactory in every respect were received from 366 pupils. These examinations will be much more successful when teachers lose the idea that the Superintendent's opinion of their ability and worth is based upon the number of certificates granted to their pupils.

Arbor Day was observed by nearly every school in the county and a number of trees and shrubs planted. Trees planted in former years have been carefully attended to and are now thrifty, and are affectionately regarded by the pupils. The sentiment of Arbor Day is a beautiful one, and is becoming more and more appreciated.

During the month of July, Prof. E. S. Richards conducted a Summer School in the city of Salem. It was in reality a training school, as all who attended were teachers or those who expected to be teachers. I am happy to testify that this school was valuable to edu-

ational work here, for instruction of a professional trend was given. It is to be hoped that this school, which opened so auspiciously, will grow in patronage and consequent usefulness.

But 3 districts have taken advantage of the library fund this year, Nos. 21, 44 and 26, though nearly every school has added to its equipment.

Districts 8, 14, 26, 44, 45 and 68 have placed modern furniture in their schools the past year. District 44 has built an addition, a second story, doubling the capacity of its building. District No. 26 put modern furniture and slate boards in its Colored School, No. 1, and painted all of its school buildings—a commendable improvement.

Districts 18 and 42 still have school buildings which are a disgrace to the age. The latter has an excuse, as the district is poor. But District No. 18 should have better buildings. I notified the trustees that I should condemn the buildings, but upon the pleas of the inhabitants of the district, who urged the failure of the crops for several seasons past as a reason for their inability to provide better ones at this time, I postponed the condemnation for one year. Next year the improvement must be made.

In May I divided District No. 68, making a new district, to which was given the name and number of Alliance Pioneer, No. 71. A neat two-story building has been erected in the district. The inhabitants are all Jewish exiles, and their children are enthusiastic pupils.

The visitations of trustees of nine-tenths of our schools the past year have been few and far between.

I have been particularly impressed the past year with the work of our primary teachers. The primary department of the schools of the city of Salem, under Miss Lucy J. Ellis and her seven assistants; the primary at Woodstown, under Miss Annie Bradway; that at Pennsgrove, under Miss Abbie Kidd and Mrs. Annie Barber; that at Alloway, under Miss Sallie Ayars, and that at Elmer, under Miss Louie Garwood, were models. Something should be done to spare such teachers the necessity of passing frequent examinations. I respectfully suggest that provision be made giving third grade State certificates to those engaged exclusively in primary grades, and who have done faithful and efficient work for a specified term of years.

SOMERSET COUNTY.

W. T. F. AYERS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

The following statement concerning the condition, work and requirements of the Somerset county public schools, for the year ending August 31st, 1890, we believe indicates progressive tendencies, and is herewith respectfully submitted.

The amount of money raised this year for all school purposes is \$69,214.07, a sum \$7,868.99 in excess of the amount for the preceding fiscal year. The present valuation of school property also shows an increase over the last preceding estimate, being \$134,000.

The total number of children in actual attendance at the schools is 5,052, while the average attendance is 2,811, or about 56 per cent. of the whole.

The education of the masses means their uplifting, and that this is the meter of modern civilization is universally conceded. It should be the aim of all, therefore, who are in any way engaged in school work, to increase this average to its fullest extent. Success in this direction cannot be overrated.

A convenient, desirable school-house has been built in District No. 52. The school property in District No. 35 has undergone important alterations. The grounds have been graded and improved, with the prospect of their being kept in an equally good condition. The school-house has been remodeled and its interior beautified, and a commendable spirit of enterprise has marked the whole undertaking. Of the 71 school buildings under county supervision, 48 are in first-class order, or very good; 12 are good; 4 medium; 1 poor and 6 very poor.

It appears from these facts that the balance is largely in favor of liberality and advancement in respect to school accommodations. There should be no exception to this rule. The very poor school-houses should be replaced with better ones. Those of the poor and medium class should put on a new appearance. Voters have shown

a disposition to be generous in the matter of taxes—the amount of district tax having been increased year by year. They will not regret their action if its results in improved school appliances, comfortable, healthful and convenient surroundings for their children, commend themselves to their hearts and consciences.

The work of the schools for the year has been generally satisfactory. An increasing interest is constantly being manifested on the part of their patrons in their rank and character. The demand for thoroughly competent and qualified teachers is becoming imperative, and we believe the teachers themselves realize its necessity and justice. The County Teachers' Association bears witness to the fact of their endeavors to raise the standard of excellence in their profession, and, individually, to attain unto the same. At its sessions the practical expositions are those received with favor. School-room work shown in actual, experimental teaching, &c., always claims the attention of an interested audience. We venture to say, also, that the circulation of educational papers is increased every year, while the State Reading Circle has a large membership. United and persistent effort of this character must bear fruit in the increased efficiency which it aims to create.

The regular teachers' examinations have been held at the appointed times, and the certificates granted are as follows, viz. :

Number of first grade granted to males.....	2
Number of first grade granted to females.....	4
Number of second grade granted to males.....	5
Number of second grade granted to females.....	17
Number of third grade granted to males.....	10
Number of third grade granted to females.....	41
Total number granted to males.....	17
Total number granted to females.....	62
	<hr/>
Total number granted.....	79
Number of male applicants rejected.....	5
Number of female applicants rejected.....	31
	<hr/>
Total number rejected.....	36

There have been 38 pupils graduated from our county schools during the year.

The annual commencement of the North Plainfield Public School was held on June 26th, 1890. The graduating class was composed of 21 members. The prosperity of this school continues and is assured.

The third annual commencement of the Somerville Public School took place June 26th, 1890. An interesting programme was rendered to the satisfaction of the audience, which was unusually large. Seventeen members composed the class.

Revised outlines of study have recently been prepared by the board of education for the future graduates of this school, and increased thoroughness in its closing examinations has been provided for. It is designed to place it, if possible, on an equal footing with the best schools of its kind in the State.

Our schools are somewhat deficient perhaps in two directions. In one of these, considerable progress is already due, while in the other attempts should have been made towards accomplishment, but we can find none to mention. We have reference to the lack of proper Kindergarten work and the absence of manual training, neither of which have the place their importance demands. We still too often find the smallest children receiving the smallest amount of attention, while, probably, the reverse should be the case.

Many children leave school between the ages of twelve and fourteen years to earn a livelihood. With some intellectual training, they find themselves chiefly dependent upon a training of the senses (which they have never received) for their support; upon an aptness in mechanical work and a quickness of perception, in the acquirement of which they have had no assistance. Manual training proposes to supply this need. Carpentry, wood-carving, clay modeling, sewing classes, &c., &c., are means to this end. Our teachers and school trustees should, by all means, be investigating their practicability and utility.

The co-operation of those in authority is desirable in every instance, and while it generally characterizes the school officers in our county, in some cases it might be more pronounced. Good results, we think, would follow the enactment of a law by the Legislature, to the effect that the trustees of schools be compelled to meet the County Superintendent at their township meetings.

School visitations have been regularly made. Arbor Day was quite universally observed in the usual manner. School work, in a word, is being systematically performed, with correspondingly good results.

SUSSEX COUNTY.

LUTHER HILL, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

I herewith submit my fifteenth annual report of the condition of schools for the county which I have the honor to represent.

Our written statement will briefly outline the work that has been done for the year. Every feature of the County Superintendent's work, together with his hopes and failures, his pleasant experiences and his trials, has been written and rewritten from year to year in the annual report, until we find ourselves repeating what has often been said.

The statistical tables present about the same conditions as last year. The decline in the school census, though chronic, is much less than in previous years, the census being only 33 below that of last year. The schools have been kept open the same time as last year, with about an equal enrollment and attendance. Salaries paid male teachers have increased an average per month of 64 cents, and those of females 99 cents.

Some difficulty has occurred in reconciling the variations in the reports of the collectors and clerks for correct entry into the financial statements required in the new blanks for the annual report, and doubtless there are errors in the classification of the expenditures, but the excellent account-books provided by the State for the use of the clerks ought to obviate this difficulty in the future.

There is still a healthy demand for *successful* teachers. This demand can be only partially supplied on account of our limited resources, and consequently low salaries, which cause an annual exodus of many of those whom we would be glad to retain.

Teachers complain of a lack of text-books, and those in use are not uniform. We hope the people will avail themselves of the privileges granted them by the new law on the subject of free text-books.

During the past two years very many of the districts have increased their supply of apparatus by the purchase of globes, maps, charts and

reference-books. A few houses have been repaired and refurnished with improved seating. A new house has been built in River District, No. 1, which does credit to its projectors. Andover and Stanhope, after many delays, are building new school-houses.

We united with Warren and Morris counties in holding the second of the series of Tri-County Institutes, at Hackettstown, in January last. Superintendent Chapman, with a corps of excellent institute workers, was present. The people of Hackettstown received us with generous hospitality, and, together with the faculty and students of the Centenary Collegiate Institute, materially assisted in the exercises of the meeting by way of instruction and entertainment. The institute was a success.

The meetings of our County Teachers' Association have been regularly held and well attended.

Arbor Day was generally observed. Teachers' examinations and free scholarship examinations, required by law, have been regularly held. I have done the usual amount of school visiting, and have carried out the requirements of the law to the best of my ability.

UNION COUNTY.

B. HOLMES, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

In obedience to law, I have the honor to submit the following brief report, supplementary to the tabulated statistics of the several cities and townships of the county herewith transmitted :

It is proper, at the outset, that full credit should be given my predecessor for the general excellent condition of the public schools of this county. During his long term of service as County Superintendent there has been a marked improvement in all that contributes to make the schools efficient and successful. While school officers and

teachers were ever ready to assist in the good work, and deserve great praise, all will unite in according Superintendent N. W. Pease a large share of the credit in this noble work. To his great experience, good judgment and untiring energy, the present high character of the schools is due.

There is scarcely a district in the county which has not made some improvements in the school building or premises during the year. Among the noticeable changes may be mentioned the painting of the buildings in Districts Nos. 1, 10, 11 and 22, which has added much to their appearance; the interior improvements, in new ceilings, new stairways, repainting, new black-boards, &c., in Districts Nos. 17, 18, 22 and 27; grading the lot in No. 27, digging a well in No. 18, and a new fence in No. 29.

The buildings and entire premises in Nos. 4, 9, 10, 16, 17, 19 and 28 have been, and now are, in most excellent condition.

The accommodations in No. 25 have been increased by an addition to the building, which was much needed, owing to the large number of pupils in the primary grades.

District No. 10, Westfield, has outgrown its present school accommodations, and has for some time rented a hall to afford room for the increased attendance. The district has already commenced the erection of a large brick school-house, which, when completed, will be one of the finest buildings in the county.

District No. 14, Scotch Plains, has completed and occupied a fine, commodious brick building this year. The dedicatory exercises, held May 24th, were interesting and instructive, and the attendance large, including not only the people of the immediate neighborhood, but many from the towns and cities in the vicinity.

The building is of the colonial style of architecture, and is pleasantly situated on the main street of the village, surrounded by ample grounds, a part of which will be beautified with trees, shrubs and flowers, and the rest set apart as a play-ground for the pupils. It contains six class-rooms, an assembly hall, principal's and teachers' room and library, and is excellently arranged for school purposes. It is an ornament to the town, and a public building of which every citizen may justly be proud.

Great credit is due to the board of trustees of the district for the ability and zeal which they have manifested in carrying out the wishes of the people.

In this connection it may be proper to say, that one of the most useful and pleasing results of Arbor Day observance is the beautifying of school grounds by planting trees and shrubs, and that it keeps pace with the other improvements in school property.

With a single exception, every district has a school library. In 9 districts additions have been made the past year. The total

number of volumes is 3,666. Number taken out during the year was 8,791.

There have been few changes of teachers. Most are in the same schools as last year. Only six have occurred. This speaks well for school officers and instructors—the one in the care with which the selection is made, and the other in the general satisfactory result of the teachers' work.

Regularly, for many years, the teachers of the county have met quarterly for the purpose of self-improvement, and the discussion of questions pertaining to their duties. This voluntary association has been productive of much good in many ways, not alone in the general welfare of the schools, but in the promotion of social intercourse among the teachers. An interchange of views on the current work of the class-room often affords great assistance to the inexperienced teacher. A live association will make its influence felt in every district, increasing the interest and improving the method of instruction.

In June the tenth annual written examination of all the schools in all grades was made, with creditable results. The labor and expense in preparing the lists of questions, printing and distributing the same, marking the examination papers and tabulating the results, is no small matter, but the generous assistance rendered by principals and teachers has made the work comparatively easy. The interest manifested by teachers and pupils in this exercise is gratifying, and its beneficial effects on the schools of the county is marked.

The number of pupils examined in the primary grade was 209; in the grammar grade, 131; in the high school grade, 150. The number of certificates issued for the first two was 340. Thirty diplomas were given to pupils who had completed the entire course.

A system of marking deportment and daily recitations, taking into account attendance and punctuality, was adopted by the County Association of Teachers, and has been put in practice in many of the larger schools, with good results.

The usual quarterly examinations for teachers' certificates have been held in Westfield. Through the courtesy of the board of trustees of District No. 10, the school building has been used for that purpose. Thirty-eight certificates have been granted during the year—27 for the third grade, 5 for the second and 6 for the first.

The changes in the time for which the certificates are valid, and the rule in regard to "further examination in academic branches," has been productive of good results. The requirements for a more thorough acquaintance with pedagogical literature will have a great influence in the line of preparation in the future. The tendency of the time is for a more thorough knowledge of the broad principles that underlie the teachers' work.

Your circular giving instructions concerning the observance of Arbor Day was duly received. In compliance therewith, circulars

were issued to each school in the county, giving general directions, and at a meeting of principals the subject was discussed and outlines of programmes adopted.

There was a general observance of the day in the schools of the county, many of them having quite elaborate programmes of reading, speaking, music, &c., in some instances the exercises taking place in the evening.

In those districts where the grounds are of sufficient size, trees and shrubs have been already planted, adding much to comfort and beauty. In such cases it has become a custom to plant a tree on the grounds of some school officer, citizen or pupil, the selection of tree and place being by vote of the class.

It is a pleasant feature of the observance to know of the interest manifested by citizens of the district, in some cases donating trees, accompanying the same with a description which interests and instructs the pupils.

The continued observance of the law will have a marked effect on the comfort, beauty and value of the school property of the State, as well as inculcating a love for the study of trees and plants in the hearts of our pupils.

My associates on the board of examiners have been Mr. Irving P. Town, of Roselle, and Mr. Ernest A. Chapman, of Summit, both gentlemen of experience and ability.

Whatever degree of success may have attended the year's work in the schools of the county, must be largely attributed to the wisdom of the respective boards of trustees in the selection of teachers, and to the capability and faithfulness which those teachers have brought to the discharge of their duties.

WARREN COUNTY.

ROBERT S. PRICE, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

My tabulated reports give as complete a statement of the condition of the public schools of Warren county, for the year ending August 31st, 1890, as figures can well make it, but it is my pleasure to sub-

mit the following supplementary statement, showing more clearly some features of the work.

The usual activity which has been displayed in our county for the past few years, in erecting, repairing and furnishing school buildings, has been kept up during the past year. In Belvidere, where they have for years been laboring under the disadvantage of having two poor and uncomfortable buildings, they have decided to erect a new and handsome one, and have voted \$15,000 for the purpose. It is to be heated and ventilated by the Smead system, and provided with all the facilities necessary for a first-class school. In Phillipsburg, where more school-room capacity has been greatly needed for years, they have commenced to erect a large and commodious building, fully adequate to the needs of the city. This building is also to be heated and ventilated by the Smead system, and will, when completed, be one of the most substantial and best-equipped school buildings in the State. Districts Nos. 5, 26, 28, 35, 62, 67 and 92 have all either repaired or refurnished their buildings during the year. With the exception of Districts Nos. 9, 10, 33 and Phillipsburg, we have, for the past three years, had quite comfortable seating capacity for all our pupils. Districts Nos. 9 and 33 made provision last year for all who attend school. Phillipsburg has now commenced the new building, and in No. 10, where they are overcrowded, the people are discussing the question whether to erect a new building or put an addition to the old one. We hope soon to be able to report ample seating capacity in every district in the county.

The people of Warren, I am happy to say, when convinced that better school buildings are needed, make the necessary appropriation cheerfully, and we have been for several years almost entirely free from litigation and the trouble often arising when money is raised for school purposes.

We are again compelled to report a decrease in the number of children of school age, the number this year being 10,105—151 less than we reported last year. Warren being almost exclusively an agricultural county, and that branch of industry being now very much depressed by the low prices paid for agricultural products, has led many to leave their farms and seek for a more lucrative business in the cities. Ten years ago we had only 9 districts with less than 45 children of school age; now we have 18, and the number of these small districts will, I am afraid, continue to increase as long as agriculture remains the chief occupation of our people.

We hoped to be able this year to report an average of 10 months' school in the county, but owing to sickness and other unavoidable causes in a few districts, causing a loss of time to their schools, we report an average of 9.62 months. This is, with but one exception, the best time the county ever made.

Teachers' examinations have been regularly held, as the law directs, and no applicant received a certificate who did not pass the required grade, and no questions were used except those forwarded from your office. The total number examined was 281, of which 158 received certificates and 123 were rejected. Certificates were issued as follows: 7 first grade to males and 5 to females; 8 second grade to males and 30 to females; 27 third grade to males and 81 to females. Total number of teachers employed during the year, 155—males, 58; females, 97. Average salary paid male teachers, \$50.13; female teachers, \$33.75—a small increase over last year and more than ever before paid in the county.

Our teachers take an interest in their work, and have during the year, more than in any previous year, been reading pedagogical works and making a study of the theory and practice of teaching. Some of them are taking the course adopted by the State Reading Circle, others are reading books of their own selection.

The placing of Hailman's "History of Pedagogy" on the list of branches required at our examinations, proved an incentive to our teachers, and those who expected to be examined not only read, but studiously perused the book. It is a step in the right direction, and some new, well-selected pedagogical work should be placed upon the list of branches for the examinations every year—not for the first grade only, but for all three of the grades. If teachers are required to have some knowledge of the science and methods of teaching before they enter upon their duties in the school-room, there will not be so many failures, and our schools will not so often suffer because of the want of ability on the part of many of our young teachers to discipline a school successfully, and impart what they know to their pupils. If a set of questions on pedagogy is added to the third grade examination, it will be necessary for the third grade applicant to have more time, and I would suggest that they be permitted to commence at one examination and finish at the next. If sufficient time is given to do the work, you can raise the standard of the examinations and make them more thorough, to the great advantage of the schools and to the protection of the professional teacher.

The most important change made during the year in our county list of instructors was in the superintendency of the schools of Phillipsburg. Superintendent E. C. Beers, who had presided over the schools of that city for several years with marked ability, resigned to accept a more lucrative position in Philadelphia. The schools of Phillipsburg parted with him with much regret, and the county lost a valuable friend of education. The city board of education wisely promoted their proficient principal of the High School, Mr. H. Budd Howell, to the superintendency. Superintendent Howell is a graduate of Lafayette College, and is a thorough instructor.

We held a Tri-County Institute, comprising the counties of Morris, Sussex and Warren, at Hackettstown, January 15th, 16th and 17th. The instructors were Miss Patridge, Dr. Brooks, Professor Frye and Miss Johnson. Professor J. M. Green, of the State Normal School, addressed us on "Professional Training," and Professor B. C. Gregory explained the object of the State Reading Circle. The instructors did justice to the subjects they were engaged to present, and were well received by the teachers. Your presence during the institute was encouraging, and your addresses highly appreciated. We were also encouraged by the presence of Hon. James Holmes, of the State Board of Education. It would afford us pleasure to have more of the members of the State Board to attend our institutes and visit our schools. There were about 500 teachers present; they had a pleasant and profitable time, and returned to their homes strengthened for their work. Money spent in holding institutes, when able instructors can be secured, is not lost to the State.

Arbor Day has become a fixture with us, and our teachers and scholars look for our annual circulars, when the time comes, calling their attention to it. Our last Arbor Day was observed in an appropriate manner by nearly every school in the county. The day has become one of general interest among the people, and many trees are now growing on private property and along public roads that never would have been planted had it not been for the observance of the day by our schools.

The following items of interest are taken from my statistical reports:

Amount paid for teachers' salaries, \$58,992.09; amount paid for building and repairing, \$12,574.25; amount paid for fuel and incidentals, \$6,982.30; amount appropriated by the State for the year commencing September 1st, 1890, \$61,720.78; total amount of district tax voted, \$19,253.94; total amount received from all sources, \$80,974.72; number of districts receiving \$375 each, 44; number receiving more than \$375 each, 27; number receiving only \$275 each, 18; rate per child in districts receiving more than \$375 is \$5.31.

The schools in the county were all visited twice and some of them oftener, as circumstances demanded. The total number of visits made was 237.

REPORTS OF CITY SUPERINTENDENTS.

BRIDGETON.

WM. EDWARD COX, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

SIR—I have the honor to present herewith the report of the public schools of Bridgeton.

After a lapse of one term, during which time the duties of the City Superintendent were efficiently administered by Daniel Sharp, Esq., I was again elected to the office.

At its first meeting after the election, our city council succeeded in getting into so good a dead-lock that it continued unbroken for a month, at the end of which period a compromise was affected and I took the necessary oath and qualified.

ARBOR DAY.

The programme and arrangements for the observance of Arbor Day were made by Mr. Sharp, to whom the principal credit must be given. Each of our four schools observed the day singly, with appropriate essays, selections and addresses. At the Third Ward, Rev. Geo. R. Neil delivered the address; at the Second Ward, Rev. W. R. McNeil; at the Bank Street, Rev. Jno. Handley, and at the North Pearl Street, Rev. S. W. Beach. Remarks were also made by the Superintendent and the President of the Board of Education, I. T. Nichols, Esq.

NEW MEMBERS.

Mr. John Ogden, of the Third ward, was elected, *vice* Wm. Edward Cox, the elected City Superintendent. At the regular meeting of council to appoint members of the board, all the old members were named excepting W. L. Silvers, of the First ward. Mr. Silvers has faithfully performed his duties for six years. He is succeeded by Mr. Charles P. McGear.

At the reorganization of the board, Col. Jos. S. Miner was elected president and Mr. Geo. W. McCowan secretary.

SCHOOL FACILITIES.

We need more room, and the board early met the question, and requested our city council (in which body, by our charter, is vested the power to build our school-houses) to erect additional facilities in the Third ward, but beyond appointing a committee, and listening to its report that it found the different buildings in certain physical conditions, this conservative body made no answer to the board of education until requested by resolution, unanimously passed, and then the word came that council deemed it inexpedient to build a school-house in the Third ward at the present time.

SCHOOL CENSUS.

Ex-Superintendent Daniel Sharp was named by the board to take the census. I am safe in saying that the work was never done more thoroughly. He reports finding 399 attending no school.

CHANGES IN TEACHERS.

Mr. A. E. Prince, of the Bank Street School, did not apply for re-election, and Principal Chas. H. Platts, of the Second Ward, was transferred to this position. To elect a principal of the Second Ward, the board held two meetings and took 99 ballots, finally naming Hon. John N. Glaspell, who represented this assembly district at the last session of the Legislature.

One of our most efficient and faithful lady teachers, Miss Lydia R. Hubbs, did not desire a re-election. By her honest, conscientious work, she has endeared herself alike to pupil, principal and board. Possessed of a talented and cultivated voice, ever ready to respond to all calls upon it to the extent of her ability, she will be missed not

only by the school, and the church and choir of which she was so conspicuous a member, but by the community as well. The good wishes of the board follow her. Near the close of the vacation, Miss Stanger, of the grammar department of Bank Street School, presented her resignation, which necessitated a considerable changing about of our teaching force. The board decided to use the only remaining room in the North Pearl street building, and to fit up an additional room for the grammar department of Bank Street School.

ELIZABETH.

J. AUG. DIX, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

When I presented my report last year I had just sent in my resignation as City Superintendent, but it was not accepted by the board, and I was induced to remain for a time, as the commissioners did not think they would be justified, considering the state of our finances, in incurring the expense necessary to secure a Superintendent who could give his whole time and attention to the work, and I am, therefore, most unexpectedly, presenting this my eleventh annual report.

The new school building in the Fifth ward, No. 6, mentioned in my last report, was dedicated with appropriate exercises May 23d, 1890, and was opened as a primary school in September, so that we now have seven buildings owned by the city and one rented. The rented building is a dwelling-house in the Eighth ward, and should be speedily replaced by a substantial building similar to Nos. 5 and 6. Notwithstanding the fact that we have added two new primary schools, No. 5 last year and No. 6 this, our school accommodations are entirely inadequate, and, besides a proper building for the Eighth Ward School, we are in urgent need of at least two new primary schools.

No. 5 has been overcrowded almost from the day it was opened, and Nos. 1, 2 and 3 are still struggling with more children than they were designed to care for. In No. 1 the interior rooms on the first floor should not be used as class-rooms, as they are objectionable on account of inadequate light and ventilation, and for other reasons, but the space cannot be spared.

Seven teachers were graduated from the Normal Training Class in June and are now employed in the schools, but the opening of two new schools only one year apart and a number of vacancies caused by marriage, removal from the city, &c., have caused the demand for teachers to exceed the supply, a most unusual state of affairs for us, and we have had some difficulty in finding a sufficient number of properly qualified teachers.

Since 1885 we have had no evening schools until this year, when one was opened in school No. 3, with Mr. W. F. Robinson as principal. It closed February 28th with appropriate exercises, after a very successful season of 40 nights. The whole number of pupils enrolled was 202, and the average attendance each evening was 103, or about 51 per cent. The age of the oldest pupil was 40 years and of the youngest 13. The number 21 or more years of age was 24, of whom 22 were in the German class. There were 5 teachers employed.

A portion of our exhibit at the Paris Exposition, which, as I stated last year, was awarded a gold medal, was returned to this country early this year, and, at the urgent request of Mr. Dewey, Secretary of the Board of Regents of the State of New York, was placed in the Pedagogic Museum at Albany.

The number of graduates from the Battin High School, in June, was 16, and 74 from the Grammar Departments of Nos. 1, 2, 3 and 4. The commencement exercises of the High School were held at the Temple Opera House, June 25th, and for the first time an entrance fee, 25 cents, was charged. The audience was large and appreciative, and the uncomfortable crowding of previous years was avoided.

Each of our schools now has its flag, and, by direction of the board of education, they will be displayed on all clear days when the schools are in session, and on public holidays. The new school in the Fifth ward was recently given a very handsome flag by Winfield Scott Council, No. 53, Jr. Order United American Mechanics, of this city, and suitable public exercises took place at the presentation, consisting of addresses and music.

Considerable opposition to the course in manual training, which had been established in the schools, was developed in the board of education, and in February it culminated in dropping it from the course of study. Later in the year an appropriation was secured, and \$750 was put in the tax levy for manual training, but it has not yet been restored to the course of study. Industrial drawing was not disturbed, however, and we are still favored in retaining the valuable

services of Miss M. E. Habberton, although we have lost Miss Trip-pet, her efficient assistant in the manual training department.

The following extracts are from reports made to me by the principals:

BATTIN HIGH SCHOOL—MISS L. H. SAYRE, PRINCIPAL.

* * * "The general plan pursued in the different departments has been the same as that given in full in last year's report.

"A slight addition to our philosophical apparatus, and a few charts and maps, have made the teaching of physics, botany and history much more satisfactory. We greatly need apparatus in connection with the astronomy. There are many things which it is impossible to properly illustrate by means of the black-board. * * * Algebra has been completed for the first time in the second year. This gives an opportunity for a short course in another branch for the senior class. The geology might be taken up and completed the first half of the year instead of the last, thus giving time to determine what can be added to the course to the greatest advantage.

"The graduating class of this year is the first to have gone through the entire course of the High School since its consolidation, and although there was no increase in numbers, the work done throughout was very satisfactory, and tends to more firmly establish the grade of the school. We believe that *quality*, rather than *quantity*, should be the aim; in time we trust to have both.

"A slight change in our basis for promotion has been adopted this year. Those who had the required per cent. in class-room work were exempt from examination, but *all* others were examined. Those having 75 per cent. in an average of class-room work and examination, and whose average of class-room work and examination on any lesson does not fall below 60 per cent., are entitled to promotion. This seems to give as fair an advantage as possible to the pupils for advancement."

SCHOOL NO. 1—MR. B. HOLMES, PRINCIPAL.

* * * "The new course of instruction has been very generally and very nearly followed, the pupils in most classes being able to complete it. When this has not been done, the cause is to be found mainly in the necessity of rapid promotions.

"The comparatively small number of pupils who remain in school to complete a grammar course will ever be a source of regret to those who place a high value on a good education. With this fact constantly before us, there seems to be but one course to pursue, to make the instruction as practical as possible and carry the essentials to the

lowest grade practicable. With this view, American history as a supplementary reader, with recitations on the leading facts and letter-writing, have received more attention than heretofore in the higher classes of the primary grade, and with fairly satisfactory results.

"Courses of instruction seem to be planned on the idea that pupils will remain in school long enough to fully finish what is embodied therein. This may be theoretically correct, but in practice there must be such modification as circumstances may demand. A careful estimate will show that only about one in ten of the pupils who enter a high school graduate, and of those who enter the primary school, not more than one in sixty complete the grammar course. With these facts in view, the problem for the practical instructor is to reach the great majority and give them such instruction as will be most serviceable to them in their calling in after life.

"Reading, spelling, writing and arithmetic, thoroughly taught, must ever be the basis of a good practical education. A knowledge of geography and history should be added to these when the time will possibly admit of it. A further step, how to use or make available what is taught, should not be overlooked in the school-room. How to place these essentials in the possession of the greatest number of the pupils during their brief stay in school is a problem that presents itself more forcibly every year of my school experience, and a satisfactory solution seems almost as far away as ever.

"The work of the past two or three years, with this subject directly in view, has, however, made some marked improvement in this respect. Oral instruction, practical application of truths taught, supplementary work in every branch, have had for their aim the best education possible for the pupil who must leave school at a very early age. It must not be understood that this is done at any sacrifice of the needs of those who may be more fortunate and can remain to complete the work laid down in the course.

"The plan set forth above, more fully pursued this year than heretofore, with a continuation of the available features of the kindergarten and an aim to fully do the work of the regular course of instruction, may be said to constitute the year's work in this school."

SCHOOL NO. 4—MR. W. F. ROBINSON, PRINCIPAL.

* * * "No definite changes have been made in this school during the year, either in policy or methods.

"I spent three or four months preparing an elaborate plan for introducing, as far as possible, into every subject taught in the primary department, a course of manual training, but the course taken by the board of education, just at the time I was prepared to go ahead, caused me to desist. This plan would have taken the form of methods in teaching, and therefore would have formed no part of the

course of study, but would have been directed toward the development of the executive side of the child through writing, drawing and making.

"The teacher's test of the child's work comes wholly through expression, and I would have this developed in the following order: Oral, written, drawing and making. A thought is never so complete as when it has stood the test of each of these modes of expression, and I think they can be applied to a large number of the primary subjects.

"In the grammar department, I have introduced a feature for the purpose of encouraging written composition work, and I feel much gratified with its progress thus far. I refer to the printing of our little paper, 'The Amateur.' It has increased patriotism for our school, created a desire to read papers, magazines and books, not only for general information, but for the cultivation of forms of expression. The type-setting and presswork have also been important factors in reaching other branches of the intellect through the hand. Spelling, use of capitals and punctuation marks have been greatly aided. Between 40 and 50 pupils have learned to set and distribute type. The work has been entirely voluntary upon their part, all being eager to learn. I have arranged so that they lose none of their other lessons. I believe I have learned more of the individuality of my pupils through this work than by any other, and have had many opportunities of dropping a word that I trust some day may have its desired effect."

INDUSTRIAL DRAWING—MISS M. E. HABBERTON, TEACHER.

"The changes effected in those branches of the course of study coming under the head of manual training, are all duly chronicled in your revision of the course of study of one year ago.

"Prang's drawing-books were introduced instead of the blank-books previously used, in order to enable regular class teachers to give class instruction alternately with the special teachers.

"Clay modeling was taught in the fourth grammar grade, Swedish wood-carving in the second grammar grade, and carpentry and sewing in the first grammar grade.

"Carpentry and sewing were also introduced in the third high school grade, and wood-carving and cooking in the junior and senior classes.

"When and how manual training was suspended is sufficiently well known to require no mention in this report.

"Coloring was introduced for the first time in the senior class, and with such success as to warrant its continuance as a regular feature of the work of that grade, and possibly its introduction in lower grades of the high school course."

NEW BRUNSWICK.

CHARLES JACOBUS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

I regard the last year, on the whole, as one of the best the schools of New Brunswick have ever seen.

Although there has been, in some places, friction arising from difficulties in discipline and lack of ability thoroughly to instruct and manage, yet, on the whole, there never has been a greater general interest manifested by teachers in securing and carrying out the best methods. Greater zeal has been evinced, and a desire to make advancement in the profession. The County Institute exercises proved a blessing to many, who have received therefrom increased inspiration and a feeling that makes them slow to be satisfied with their own work, thus setting up for themselves a higher standard of excellence.

In the High School, history has been introduced into the D class, to follow it up more closely and with greater profit from the last year of the grammar department. In manual training, the small amount done in the Carman Street School last year was encouraging so far as its excellence was concerned, but it was not pushed so as to be adopted in all the schools, partly because of discouragements experienced and partly because the introduction of the music into the schools, which seemed to be novelty enough to receive attention within one year.

The progress of the schools in music has been a prominent item of the year's work. Systematic instruction for the first time has been given to every scholar, and, while it is true that some, from inattention and want of previous cultivation of natural gifts, have shown little interest, and made, therefore, very little or no progress, yet the general record of the progress and enthusiasm of scholars and teachers has been really remarkable. The full harvest, however, must be looked for in the future, after years of successive and successful instruction, and not from temporary results, however beneficial these may be. It was, I believe, a great step forward, fully justified by its importance and the very trifling cost, comparatively, of its introduction.

The special report concerning music instruction before the National Educational Association, in 1889, shows that distinguished educators throughout the United States are doing much to promote and establish it firmly as a regular branch of study in the public schools, believing that it "should be regularly and systematically taught, not more for its own value than for the sake of the scholars themselves, and the intellectual, moral and physical improvements of every pupil in the schools."

The needed increase of teachers in the High School has been followed by beneficial results.

The failure of scholars to be promoted in any grade rests largely upon the lack of interest of parent and pupil in legitimate school work.

In the matter of punctuality no other city in the State can present a better record. There is continual watchfulness all along the line, and the poor records, when they do occur, are caused by don't-care pupils, whose pride in a matter of common interest it has been impossible to arouse. Some have been even purposely slow. There has been, however, the past year on an average only one case of tardiness in the attendance of 2,200 pupils—the best record the school has ever made. The generally prevailing sickness of the winter, viz., "La Grippe," made heavy inroads upon our attendance, both of pupils and teachers, yet our record in attendance has been for the past year 95.4 per cent. That of last year was 96 per cent.

In the matter of discipline there has been little call for extreme action.

In the Livingston Avenue School the system inaugurated five years ago has been steadily maintained and productive of much good. The education of the street, which allows each to be a law unto himself, antagonizes the good influence of home and school, and the only wonder is that more difficulty is not experienced in this important feature of the schools. The behavior at school is invariably the reflection, not exactly of the home, but of the *training* at home. The superintendent and principals of the city schools find that the general laxity with reference to the observance of laws and property rights begins to show itself in the deportment of scholars on the way to and from schools, and its baleful shadow will certainly increase in intensity unless the public authorities and public sentiment revolutionize the present deplorable state of things. The violation of the healthful ordinance with reference to tobacco especially demands the attention of all parents and teachers who would advert the terrible harvest consequent thereupon, and I think it is proper, in this report, which will meet the eyes of many parents, to emphasize the needs of the city in this direction, that an ounce of proper prevention may save a pound of attempted cure.

There has been no change in the established order of things concerning the regular school sessions, which continue to be two in number for all grades, with no general recess except for some primary classes. Individual recesses, however, are freely granted, and in most rooms, at the middle of the morning and afternoon session, there are marching or movement exercises as a sort of equivalent for recess. At such times the windows are opened, and the air circulating free is entirely changed. These exercises tend to obviate the harm likely to result from poor ventilation and remaining too long in the same position.

The principal matter, however, in the furnishing of schools is the supply of teachers. In this matter there has been great improvement, which furnishes much hope for the future. Boards of education throughout the country are becoming more awake to the fact that the earliest years of public life require the greatest of care and professional skill.

To place in charge of two score or more of precious souls, on the very threshold of substantial development, in the most critical period of their history, an untrained teacher, is like entrusting to an untrained pilot a vessel with valuable cargo. The very early age at which the great majority of city pupils leave school very clearly prove the necessity of most excellent instruction while they are here. This would increase the period of scholastic studies, besides making it vastly more efficient while the pupil was in school. The material and the time are too costly elements to be used in the way of experimentation.

This, then, is the vital question with reference to the maintaining of an excellent system of public instruction, viz., "Who shall be its teachers?" The present board has taken a step forward in its action and its policy.

The limits of this report forbid an extended consideration of any question, otherwise such topics as "compulsory education," "manual training," "kindergarten schools," would naturally come in for treatment.

PATERSON.

ORESTES M. BRANDS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

I have the honor to present the following statistics and report of the schools of this city for the year 1890 :

NUMBER OF SCHOOLS.

Normal School.....	1
High School.....	1
Grammar schools with primary departments.....	9
Primary schools.....	6
Annex to school No. 11.....	1
Evening schools.....	11
Manual training shop.....	1
Almshouse school.....	1
	<hr/>
Total number of schools and departments.....	31
Number of school buildings.....	15

NUMBER OF TEACHERS.

Number of principals.....	15
Assistant principals.....	1
Number in Normal and High Schools.....	9
Number in the grammar departments.....	37
Number in the primary departments.....	155
Teacher of drawing.....	1
Instructor of wood-work.....	1
	<hr/>
Total number of teachers (15 males, 204 females).....	219

POPULATION AND ENROLLMENT.

Population of the city of Paterson by census of 1885.....	62,722
Estimated population of Paterson at date.....	85,000
Whole number of children between the ages of 5 and 18 years in the city, May, 1889	20,725
Whole number enrolled in day schools during the year.....	12,503
Whole number enrolled in evening schools during the year....	2,992
Total number enrolled in all schools during the year.....	15,495
Number of seats and desks.....	9,178
Number enrolled at date (day school).....	8,838
Average attendance during the year.....	8,715
Average enrollment during the year.....	10,639

Number of pupils about equally divided between the sexes, or say 6,000 male and 6,503 female—12,503 whole number of different pupils for the year 1890. About 12,403 white and 100 colored.

FINANCIAL.

In my last annual report to the board of education of this city, attention was earnestly called to the fact that we were again approaching the time when appropriations for the maintenance of our schools during a fiscal year must be considered. The per capita allowance on the average enrollment is still only the meagre and antiquated \$13, notwithstanding the fact that the board of aldermen last year granted a special appropriation which practically amounted to \$15 per capita of the former year's average enrollment. It will be observed that, technically, we are in the same plight at present, and for the ensuing year, as that of the past fiscal year. The maximum \$15 per capita allowed by the city charter should be *technically assured*, and even then we should not have a dollar which could not find economical placing in the expenditure really necessary to the respectable direction of the schools.

In order to keep within touch of the educational progress of the times elsewhere—in teachers' salaries, in buildings and equipment, in heating and ventilating, &c.—it is absolutely necessary that the "where-with-all" be judiciously provided, and there is no item of municipal expenditures so willingly borne and approved by the taxpayer as that for effective public education.

Since the foregoing was first written steps have been taken to secure, if possible, what is so desirable and necessary.

INCREASED SALARIES.

At various times during the year preceding my last annual report, and notably in that document (report for 1888-89) under the caption "Inadequate Funds," I ventured to call the attention of your honorable body to the small salaries paid to male teachers in this city, characterizing them truly as being "ridiculously small as compared with those paid in other cities" for similar service, and deploring the fact that the funds at the disposal of the board were insufficient to permit an increase that would be respectable, if not liberal, &c.

A special committee of the board was appointed for the purpose of presenting the necessities of the schools to the board of aldermen, and of obtaining, if possible, the maximum per capita allowance on the average enrollment (\$15) instead of the meagre minimum (\$13). As a result of the excellent service performed by your committee, the aldermen agreed to make an extra appropriation of \$20,000 in aid of the schools for the year ending March 20th, 1890, thus, while not technically committing that board to an adoption of the maximum figures of the charter (\$15 per capita on average enrollment), yet substantially granting the equivalent of that rate for the year mentioned.

This grant was extremely opportune, for had it not been made, it was certain that the schools must have been closed, from the lack of funds, before the expiration of the fiscal year.

Even with this increased appropriation, it was not clear that any considerable increase of salaries could be made, in view of the fact that the growth of the city constantly demanded the employment of more teachers, there having been an increase of about 20 in the teaching force during the preceding year, and the indications were that nearly as many more would be required before the expiration of the present fiscal year.

However, in February, 1889, a resolution was adopted which added \$50 to the salaries of all assistants in the primary departments who had served five years, thus making their yearly salaries \$450, or equal to the lowest salary paid assistants in the grammar department.

At the September (1889) meeting of the board of education, the salaries of all principals receiving \$1,000 per year were increased to \$1,200; the salaries of the principals of Schools No. 1 and No. 4 were increased from \$1,200 to \$1,500; that of the principal of School No. 7 from \$750 to \$850.

In January, 1890, the salaries of 7 of the assistants in the High School were increased \$100 each per year, thus making the salaries of all assistants in that school uniform, *i. e.*, \$750 each per year; the salary of the head assistants in grammar departments were increased from \$550 to \$650 per year, and the salaries of all other assistants in grammar departments were increased \$50 per year upon the old

schedule of salaries; the salary of the assistant principal of School No. 6 was increased from \$700 to \$800 per year, and that of the teacher of the normal class from \$750 to \$800 a year. The salary of the principal of School No. 9 was made \$700.

It is to be expected that these indications of the appreciation of the value of teachers' services on the part of the board, which reflects the trend of popular judgment, will be interpreted wisely by the teachers; and it should be fully understood that fair salaries suggest the rendering of fair service—an increased zeal, effort to acquire greater skill, more extended information, which conduces an intelligent work—in short, greater efficiency. It would be unbusinesslike and unreasonable to suppose that, as salaries increase, communities will fail to demand the grade of ability which fair salaries command, and that Paterson is to be an exception to the rule.

COMPULSORY EDUCATION.

My attention is frequently attracted to the fact that large numbers of children in this city attend no school. They may be seen upon the streets, about the railroad depots, &c., at all hours of the day and until late at night. I have frequently paused in my round of visits to the schools to question these street waifs, and have been surprised at the skill with which most of them parry searching questions relative to their non-attendance at schools. All kinds of plausible explanation are given—many asserting that they do not attend public schools, but that they do attend other schools and are only temporarily absent from them. As these same urchins, unkempt and apparently otherwise uncared for, are to be seen daily about the streets or other accustomed haunts, it is evident that they are receiving only the education of the streets, such as they readily obtain from contact with older and still more depraved specimens of the genus *gamin*. It is to be deplored that so large a class of young boys and girls are left beyond the wholesome influence of school and education.

We make provision to enforce the attendance of children whose parents desire them to attend school and who become enrolled as pupils. In case of the truancy of such children to an extent demanding a strengthening of the parental authority, and that of the teacher, the truant officer searches out the delinquent pupil and restores him to his school. In the majority of such cases this is sufficient to break up the unwarranted absence. But this remedy is not readily administered in the case of the probable hundreds of children whose names are not enrolled at all in the schools. These not having been with us, and of us, are mainly left to the tender mercies of their environments of ignorance and squalor. The compulsory education law receives no adequate enforcements, because agents for its enforcement are not pro-

vided; and in the meantime the school of depravity and idleness holds its daily sessions upon the streets and in the byways, and many, very many, of its pupils graduate with dishonor for themselves and to the community.

This is a burning question, a matter which demands the serious consideration of the community through its constituted authorities. Adequate provisions should be made for the accommodation of all children claiming or entitled to education in our schools; and when such provision is made, public policy and public safety imperatively demand that every child should not only make a pretence of attending school, but should be required to attend actually during the period prescribed by legislative enactment.

ADMISSION TO THE HIGH SCHOOL.

In my annual report for 1888-89, special mention was made of the fact that many pupils, after entering the High School, were found to be poorly prepared to enter upon the work of that school, and that such pupils might have been greatly benefited by remaining in the grammar schools, &c.

In the examination of June last, an endeavor was made to select those only who were properly qualified for promotion, in so far as a carefully conducted examination could determine fitness.

While it was not desirable that the severity or difficulty of the examination should not be increased in the least, it was desired that all pupils should be required to undergo the examination in the same way, both as to manner, method and the marking of examination papers.

One hundred and eighty-five took the examination, 100 passed it successfully, and were admitted to the High School in September last. Although the failure to pass was a grievous disappointment to some of the pupils and to their parents, yet it would have been a moral wrong to advance these unprepared pupils, and I do not doubt that all concerned will have reason to rejoice that, although failure was the moment unpleasant, the ultimate outcome was the desired proficiency and success, rather than further discouragement and failure after entering High School.

I am gratified to know that the pupils admitted to the High School at the June examination have, as a body, shown greater capacity and preparedness for the work of that school during the past term.

HIGH SCHOOL.

For a time, male and female pupils were instructed separately in the various class-rooms, in order to better accommodate the necessary

absence, it was said, of the boys at the manual training shop, but as this difficulty could be otherwise disposed of, it was directed that co-education of the sexes should be resumed, and I am informed that this has been attended with a very general and marked stimulation of interest in subjects in which one or other of the sexes had become apathetic, each seeming to be benefited by the presence and special interest and brightness of the other in certain studies.

The course of instruction for the high school should, in my judgment, be carefully revised, and better adapted to the educational wants of the pupils. In many particulars it is susceptible of amendment, and it is hoped that time will permit of its revision to some extent before the publication of the present report. Advanced arithmetic should be taught in the high school, the commercial course should be continued and fostered, and provision should be made for more practical work in language—English composition. One well written page of good English is of more practical value than many recited pages of scientific grammar.

Again, no matter what the subdivisions of the course, an undue preponderance of literary, historical or scientific subjects should be avoided. As but very few of the pupils of this school expect to enter college and pursue therein a special course, the course of instruction should be so arranged as to provide instruction that will result in the greatest good for the greatest number.

In the matter of graduation outfits, it has seemed to me proper and desirable that a few words of counsel should be spoken. It is oft-times burdensome to parents of graduates to equip them with expensive graduation costumes, and this fact must be a source of considerable anxiety and annoyance. Pride dictates that an effort be made to shine with the most brilliant. A little reflection, it appears to me, will be sufficient to convince all that it is quite unnecessary that elaborate and costly costumes be indulged on these occasions. Good taste does not demand that our girls shall be attired in the expensive and elaborate full dress of the mature woman. A simple, tasteful, inexpensive gown much better befits the youthful graduate and the occasion. I am convinced that a reform in this matter of expense and costume would commend the approval of the most cultivated taste and render it possible for all to appear in appropriate attire and without hardship to any individual.

I trust that I may be pardoned for referring to the question of suitable graduation costumes, as I speak from the kindest motives. The subject has been discussed before "our girls," and I am encouraged to believe that they will consider it and mutually agree to inaugurate the desired "reform" at the next graduation of the senior class. Is not good taste a legitimate educational theme, and is not a generous consideration for others worthy of cultivation?

NORMAL TRAINING CLASS.

The class of the present year numbers 40 students and is larger than that of any former year. The course of instruction includes psychology, history and philosophy of education, methods of instruction and school government. It has been customary to require, also, such a review of the studies of the grammar department as time would permit.

The class consists almost entirely of graduates of our High School, there being only 2 or 3 students who are graduates of other institutions, and who were admitted under the rule governing the membership of the class. As graduates of the normal class are granted certificates to teach by the board of examiners, it becomes necessary to exercise due care in granting admission to membership. The final examination for graduation from our High School, if successfully passed, is accepted by the board of examiners as evidence of scholarship sufficient to entitle the graduate, on passing the final examination in the subjects of the normal class, to a "Primary Certificate." Appointments to positions in the primary department of the schools are made in the order of the standing determined by the final examination in the normal class.

The rule governing the admission to the normal class of applicants who are not graduates of our High School is as follows:

"Other applicants may be admitted upon passing an examination equivalent to that taken by graduates of the High School. The recognition of diplomas from other institutions shall be discretionary with the City Superintendent."

The work of the present year in the normal class has progressed quite as favorably as in the past. Although one year is a short time in which to cover the amount of work prescribed, the results shown at the examinations of the classes are generally quite satisfactory. Regular instruction in form study and drawing, and the methods incident, has been given to the class now in training by the directress of drawing, Mrs. Thomas. It is hoped to infuse new life and interest into the work of the class during the present year.

I recommended the employment of a regularly trained kindergarten for the purpose of giving a lesson weekly in this training class. We now have several partial kindergarten classes in the schools, and more are desirable. I need not pause here to discuss and present the philosophy of kindergarten work, nor to present its claims. Suffice it to say, that the value of such preliminary instruction is so well established as to need no further exploiting here.

The examination methods of the normal class of 1889 was conducted by the superintendent and the board of examiners at the High School in June. A thorough oral examination of each student indi-

vidually supplemented the written test. As in all similar tests, it was found that there were extreme differences in the apparent aptness, comprehension of subjects, powers of expression, &c., exhibited by the students; and in so far as could be judged by means of an examination, a large proportion of the class will, with practical experience in the class-room, become teachers, while others will agreeably surprise us if, upon trial, they are found to possess aptitude which an examination failed to disclose. I would repeat what I have before stated, that not every one who aspires to the position of teacher is naturally endowed with qualities of mind which justify her choice of this employment, or her continuance in it by those whose duty it becomes to secure better service.

THE WORK OF THE SCHOOLS.

Language or Grammar.—As one of the chief forms of expression, language claims a prominent consideration as to the methods employed and the object had in view by the teacher. If the object is to teach children to speak and write language with precision, correctly, and with some regard to beauty of expression, the teacher should adapt his methods to this end. If parsing and analysis alone do not act as correctives to faulty language, these should not be entirely relied upon to do so. Practical work in language, both in oral and written expression, should constitute the major portion of the instruction and practice in the primary and grammar schools. Technical grammar should be studied here only to the extent that may be necessary to form a thread upon which the more important rules or laws depend. Then the work of cultivating language expression *should be pursued in all subjects and in every recitation.* No opportunity to correct faulty expression and to have it replaced in better form should be missed; and thus the special “language lesson” should be constantly and regularly supplemented in every lesson and exercise in which language becomes a medium of expression. Pupils should be encouraged to talk or to write freely in discussion of the various subjects; to give free course to thought by means of tongue and pen. Too frequently the power of language expression appears to be repressed in the class-room. Pupils express their thoughts freely upon subjects everywhere except in the class-room and during the exercise and recitations. In no way can language be so well taught as by its use. Pains should be taken to increase the pupil’s vocabulary of words, thus broadening his range of expression; new words should be added constantly, and the pupils should be required to use them in a variety of different sentences. Reproduction of interesting stories from memory, short descriptions of well-known persons, places, incidents, &c., should be required frequently, and great care should be exercised in making corrections, so that pupils shall not be discouraged and their efforts at

expression repressed by inopportune or unwise methods of criticism and correction.

In the higher grades of the grammar department, and in the High School, it is desirable and expected that the pupils obtain a greater store of technical knowledge of the science of the language; but still its practical use should be thoroughly taught through constant oral and written exercises devised for the special purpose of "learning by doing." It is nowise creditable to schools whose pupils "study grammar for years" when it is found that comparatively few of the latter have acquired the ability to write a fairly-constructed paragraph in their mother tongue, and yet will diagram, analyze and parse to the entire satisfaction of a purist in language.

History.—This subject has been discussed and its importance presented elsewhere in this report. It may be further added, however, that no subject presents better opportunity for the cultivation of language expression. Its interesting events, the biographies of great persons, &c., provide a wide field, and the study, *as history*, should in every instance be accompanied by *that of language*, without which the former lacks effective representation.

Arithmetic.—In this subject, while much is to be done for the purpose of mental discipline—cultivation of the reasoning powers—and processes are frequently pursued for this rather than for the practical use of the processes, yet it should be given such direction as will enable the pupil to work with facility and correctness the various problems that are likely to present themselves in life beyond the classroom. By all means correctness and celerity in the fundamental rules should be secured. Tabulations by means of signs indicating the processes will serve a good purpose for a time in developing ideas of numbers, but this should not be continued too long. Figures should be placed for addition, subtraction, &c., in the form in which the child is to see them generally in performing the work, and he should be accustomed, as soon as possible, to seeing them as they are to appear in actual, practical manipulation of them. Facility can be secured as well by concrete numbers in little practical problems as through the use of abstract numbers; and hence, every operation should have an application which will enlist the thought and interest of the pupil. In higher grades, after the philosophy of an operation is understood (and it should be), the shorter the process the better it is, and pupils should be taught to economize time by using the "short cut" which will soonest secure the correct result.

Here, again, language teaching becomes of great importance. In all explanations, analyses, &c., the language should be exact. Ambiguity and indefiniteness—expressions susceptible of more than one interpretation—may readily be made the means of convincing the pupil of the necessity for care and perspicuity, and thus impress a practical lesson in language by the way.

Geography.—This study has, through the gradual development of a more intelligent and philosophic comprehension of its utility and worth, become more than a memory exercise. The pupil is no longer expected to become a gazetteer of the names of obscure things, of figures of height, breadth, length, population, quantity, &c., but is led to the study of natural feature, phenomena, effects of location upon man and his pursuits, vegetation, &c., while the impossible task first mentioned is regulated to books of reference, encyclopædias and kindred tomes of that class. The drawing of maps, the moulding of relief maps and the use of books of travel and interesting geographical description are happily supplementing the work, and the coming pupil in our schools will have a broader and much more intelligent knowledge of the globe than was formerly acquired in schools.

Again, the attendant work in language demands prominent consideration in connection with this subject. As in history, there is an open field here for much practice in the use of language.

HISTORICAL STUDY.

It should be borne in mind that the study of history should result in something more beneficial than a mere memorization and recollection of facts and dates. Every fact embodies *a cause and an effect* which should be sought out and recognized by the pupils with only such suggestive aid from the teachers as shall be necessary to lead the way and direct thought—the pupils making all the discoveries possible for them to make for themselves.

History presents grand opportunities for *a study of the motives* which have impelled mankind to action, and this *why* of human action, together with the resultant effects of that action upon individuals, sects, nations and the world, may often be distinctly and interestingly traced, and *a moral deduced*, by children and youth. No opportunity to “point a moral and adorn a tale” should be lost by the teacher.

Reading.—It is not my purpose to rehearse here the various primary methods of teaching reading. Briefly, all words must be so taught that the pupil easily recognizes them at sight, having no difficulty to meet in this respect while reading. The thought of the test should be developed by means of a preparatory exercise preceding the reading lesson proper, after which the proper expression of the thought should constitute the work of the reading lesson, no matter what the grade of the class. Sufficient variety of reading matter should be produced in order to sustain the pupil’s interest. Two classes of the same grade, using different reading books, may exchange books at the end of a term, or other desirable time, and thus each will have new reading matter.

Spelling.—The study of preparation of the spelling lesson requires the teacher’s careful direction. It is desirable to fix the attention of

the pupil upon the form of a word and make a study of that form. In order that this may be accomplished, but one word (form) at a time should be written upon the board by the teacher, its peculiarities should be noticed, the number of letters composing it mentioned, its use in several different sentences required, and finally the word should be copied carefully by the pupil and the copies compared with the word on the board. But one form at a time should be in view. An ingenious teacher can make a study-lesson in spelling so interesting as to fix the attention of pupils for such a time upon the form of each word as shall leave a clearly defined mental picture of it, and this is the objective point in teaching spelling.

Writing.—A good penman is one who writes legibly and rapidly. As soon as the pupil has obtained a correct mental picture of the form of a letter and of its constituent parts, celerity in the making at once becomes desirable, and movement exercises should be employed to train the hand to execute freely the picture held by the mind.

Correct pen-holding and position of the person at the desk must be taught and perseveringly insisted on from the start. It is frequently nearly or quite impossible to reform bad habits in these respects after pupils have been allowed to practice them for an indefinite time in various grades. It is intended, therefore, that the teachers of the classes in which writing is first begun, either with pencil or with pen, shall be held specially responsible for the teaching of correct pen-holding and bodily position at the desk in writing.

In conclusion, I would direct attention to the importance of physiology and hygiene as a subject of study. Books have now been quite liberally supplied, and teachers have opportunity for doing a good work. The two easy books more recently supplied should be frequently used as supplementary readers, taking the place, for the time, of the reading book proper.

SANITARY CONDITIONS.

One year ago I summarized the condition of the various school buildings in respect to means of ventilation, &c. During the past year one of the most unhealthy buildings (No. 1) has been provided with a system of ventilation, and in this respect I believe that the old building has been rendered much more habitable. Steps have recently been taken and an appropriation made for an improvement in the ventilation of School No. 4.

There still remain, in as poor condition as ever, Schools 3 and 11; the latter, in addition to the absence of all effective and safe means of ventilation, is still unprovided with wardrobes for childrens' clothing, which is yet to be found hanging upon the hooks at the sides of the class-room, and aiding in the vitiation of the air. It is earnestly

recommended that this matter receive the attention of the Committee on E. R. and F. at the earliest possible moment.

Steam heating is rapidly supplanting furnace heat in our schools, and by many the former is believed to be much more healthful than the latter. The absence of coal gas is pointed out as the chief evidence of this, and it is popularly supposed that steam heat is a "moist heat," and therefore healthful. In the case of coal gas from furnaces, either defective furnaces or bad management of them is the cause of the escape of gas. A well made, modern wrought iron or steel domed furnace does not permit the escape of gas from the fire into the air chamber and heat pipes, and when connected with the outer aid by a cold air duct, supplies rooms with pure, warm air, moistened if the water-tank attached is kept supplied with water.

In the case of steam heating by direct radiation, there is usually no provision for the admission of pure air to be warmed and sent into apartments. The air as it is in a room at any given time—foul or approximately pure—is warmed by the radiators.

Moisture is not supplied except by the escape of steam. It is evident, therefore, that with steam heat it is even more necessary than with good furnace heat to provide means for the ventilation of rooms—for the ingress of fresh air—and there should be no misconception of the facts, or belief in the entire healthfulness of steam heating when that method is unaccompanied by means of ventilation. It is undoubtedly the more practicable method of heating large buildings, but too much should not be expected of it.

SUPERINTENDENCE.

Although local school regulations in all cities prescribe, in a few set phrases, the duties of superintendents of public instruction, there yet remains many instances in which, from the impossibility of formally dictating a code which will be all-embracing, a superintendent must be a law unto himself and take the consequences. By it is believed that a superintendent should be and is clothed with almost autocratic powers, and is entirely responsible for the management of a school system; that if in any way the system is not what it should be, the responsibility lies at the door of his office; that he could, if he would, create and establish everything which a just criticism points out as desirable.

While it is true that to a considerable extent the progress and efficiency of a school system depends upon the ability of a superintendent to influence its policy and principles, it, nevertheless, is also true that his best efforts may and do prove unavailing unless there is back of him a strong, honest and intelligent supporting power. If, indeed, the superintendent is an expert in his profession, if his counsel

is of value, there must be back of him intelligence sufficient to comprehend his plans, and to permit and sustain such an honest enforcement of them as will inure to the benefit of the system. Personal or political consideration inconsistent with the best interests of the schools should not influence his action or bias his judgment. His office should be recognized as non-political. He *should be permitted to be*, and *should have sufficient firmness and fearlessness to be*, the superintendent in the truest and best sense of the word. His patience should be unbounded, and he should learn to await the opportune moment, though frequently disappointed, to secure what he knows would be best.

It is greatly to the credit of our city and of its board of education that the office of superintendent of public instruction has never been regarded as a political one, and that its incumbent has been left free from party and political complications and influences. While it is true that the recommendations and advice of the superintendent have not always received the consideration that would have resulted in the increased efficiency of the schools, political considerations have not been the cause.

PLAINFIELD.

JESSE L. HURLBUT, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

DEAR SIR—I have the honor to present my report of the Plainfield Public Schools for the year ending August 31st, 1890.

As has been stated in former reports, the actual work of the superintendent is done by the principal, who is now in charge of 5 schools, assisted in the management by a vice-principal in each school building. During all the past year our efficient principal, Miss Julia E.

Bulkley, was absent, on leave, engaged in a tour through Europe and the East, both for recreation, health and the study of school methods in various countries, of which she has now brought home carefully-prepared reports. The high standard of our schools was maintained during her absence by the acting principal, Mr. Lincoln B. Goodrich.

In the spring of 1889 we opened a new building, the Irving School, in a rapidly-growing suburb of the city known as Evona. The building contains rooms for 12 classes, of which 6 are already occupied—a larger number than had been expected before the opening. This new building has only partially relieved the overcrowding in the other schools, as it is too remote from the centre of the city to admit of the transfer of many scholars.

During the winter an unusually large number of teachers and pupils were absent from school through the prevailing epidemic of *la grippe*, which, for a time, seriously interfered with our school work. Fortunately, none of the cases proved fatal, and all the teachers were able, after a time, to resume their duties.

The night school, which was so successful in 1888, was reopened last winter. But the pressure of orders in the three large factories of the city required many of the students to work during the evenings, and this fact, together with the prevalence of the epidemic, reduced the night students to such a minimum of attendance that the board did not feel warranted in keeping the school open after February.

In the winter a concert was given under the auspices of the High School. The money raised, together with the proceeds of a similar concert the previous year, resulted in a profit of over \$160, which was expended in the purchase of new singing books. The musical training in our schools is thorough, every class receiving regular lessons from a special teacher each week, and being drilled between the lessons by the teacher of the class.

Drawing receives attention in our schools. The system is one of the best, and it is conducted by a professional teacher in charge of the department.

It is believed that one of our schools, the Washington, was the first in New Jersey to receive the present of an American flag a few years ago. Since that precedent was established, gifts of flags have been made to the other schools, until all have been provided. We think that the flag of the nation waving upon every school-house will be an educating influence in character and in love of country.

Our High School has always been marked by a peculiar interest on the part of its alumni. At every public occasion the graduates of former years are present in large numbers; the classes have maintained an organization and meet from time to time, and many of the alumni have presented gifts to the school. Several valuable pictures, cabinets of minerals, of flora and fauna, and of stuffed birds and ani-

mals have in this way been received, and now ornament the halls of our High School building. Recently the class of 1879 showed its affection for its Alma Mater by presenting the High School with a beautiful clock.

At the commencement exercises, on June 26th, a graduating class of 19 received diplomas. Three of this number enter Princeton College without conditions; 1 Rutgers, on certificate without examination; 1 Wellesley, on certificate, and 1 the Baltimore Woman's College, on certificate. Vassar College and the State Normal School also receive our graduates upon certificate. We send our graduates to the best colleges in the land without further preparation than is required to graduate in our own High School.

Three graduates of our training class who received diplomas the previous commencement, after two years of faithful study and practice in actual teaching work, were among the regular teachers of the school last year, and did work that merited approval. The requisite for membership in this training class is, that the candidate shall be a graduate of our own High School, and shall be approved by the board of education. It will not be many years before our own training class graduates will supply nearly all the demand in our schools for new teachers.

Let me repeat what I have often stated before, that the high standards of our schools could not be attained by any workers less earnest, aspiring and devoted than the noble band of teachers in our schools, than whom no more faithful can be found.

RAHWAY.

ELIHU B. SILVERS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent:

In addition to the required statistical report, I take great pleasure in stating that our schools are in an unusually flourishing condition. The intellectual and moral *status* of our entire corps of teachers,

coupled with their thorough discipline, has so elevated the reputation of our schools that, with no perceptible increase of population, our primary departments have become so overcrowded that more room had to be furnished and teachers supplied. The consequences are, that private and sectarian schools are not, as formerly, so well supported.

Too much attention cannot be paid to the keeping up to a high standard the moral tone of our instructors, they reaching the children of the masses, who, too often, are neglected in this direction.

The introduction last year of a High School class has met with entire success, giving great satisfaction and keeping the graduates of our lower classes from going abroad for further instruction.

Our efficient board of education are fully alive to their trust, and endeavor in every way to effect rapid progress where it is consistent with thoroughness. The time for education is so limited to the many that the utmost care is exercised in the selection of such text-books as will give speedily the necessary practicable information.

SALEM.

ROBERT GWYNNE, JR., SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

DEAR SIR—The statistical report of the county superintendent shows that of the 1,451 children of school age in the city of Salem, 1,065 were enrolled as pupils in the public schools last year. The work of educating them cost \$13,204.93, of which amount \$9,985 was for teachers' salaries. The educational work was, in the main, well done. In one or two departments the teachers persisted in sticking too literally to the marked-out lines of their course, and thus failed to develop to the full the powers of their pupils, and failed,

also, to send forth their pupils as thorough as they should have been. We have obviated this. On the 3d of March, the board of education decided to have a supervising principal, and chose Prof. E. S. Richards, of the High School, to fill the position. We now have all work done under his supervision, and we are entirely satisfied with the results obtained so far.

The past year, for the first time in our schools' history, we organized a normal class in our High School. Five young ladies composed the class, and they were given practice teaching in the lower grades. Three members of the class are this year teaching in schools in the county.

Our school buildings, with one exception (and the exceptional one has since the close of school been removed), are in excellent order, furnished with modern desks, and well supplied with apparatus and books of reference. In July the board of education took a most advanced step. For nearly a century a public school has been held in a brick building on Walnut street. This building was erected by members of the Society of Friends for public school purposes, and held by them until the year 1850, when it was leased to the board of education. At first a one-story building, it was afterwards raised to three stories, and its original one room made into six rooms by frame additions, &c. It was rapidly becoming unsafe, and, by reason of its damp walls, foul cellar, double floors, &c., was really harmful to the health of the pupils. In July last the board of education purchased the property of the Friends for \$1,500. A tenant of half the lot was bought off for \$850, and the board had in its possession a magnificent lot of an acre of ground. Plans for a new building of ten rooms, to be built of brick, with wide halls and stairways, and to be heated and ventilated by the Smead & Wills system, were adopted. The cornerstone of the building was laid with appropriate ceremonies on the 10th of September, when Dr. E. S. Sharpe and Morris H. Stratton, Esq., delivered addresses. The building, completed and furnished, will cost nearly \$25,000, and is to be named the "Richard M. Acton Public School," in honor of a former member of the State Board of Education, and one who was for twenty years a member of our local board. Steam heat has also been introduced in the Griffith Street building, leaving but one building in the town depending on stoves for heat.

Arbor Day was celebrated on the day appointed, the children gathering on the High School grounds and listening to an address by Dr. E. S. Sharpe. Our teachers joined with those of the county in attending the institute held at Atlantic City, and have been the foremost, most earnest and active members of our county association. They have also sustained a city association, holding monthly meetings.

Of the coming year's work we are most hopeful. Our teachers now are earnest in the work, and are laboring together harmoniously.

Weak spots in our curriculum have been strengthened, and we are aiming to secure what we have never had before—thorough, systematic reviews. We want to get more of our pupils into our grammar and high school grades. Now most of them leave before they have passed through the secondary or seventh grade. Our High School graduated last year ten pupils, which was a large class. We feel that the yearly average should be twice ten, and the number of pupils in the grades between the secondary and high school doubled. To that end we are working.

MANUAL TRAINING.

MORRISTOWN.

To Hon. E. O. Chapman, State Superintendent:

SIR—I have the honor to make the following report of the work in manual training at Morristown, for the year ending June 1st, 1890:

The work has been carried on in much the same way as during last year, under the general direction of the board of education. A special committee, made up from members of the board and citizens representing special contributors, has had immediate charge of the work.

The lessons in sewing, cooking and wood-working have been given on Saturdays of each week, for nearly the whole school year. The attendance has been fair, and the results in particular cases very good indeed; and, in general, the committee and the board have been well enough satisfied to continue for another year.

The sewing-school is now taught by two paid teachers, ladies especially well qualified for the work, Misses Cooper and Hazeltine, and the results are very satisfactory. The classes in cooking have been maintained, and are taught by a paid teacher—Miss Erdman. The classes in wood-working are taught by the same teacher as last year, Mr. Hale, from the University Place School, in New York city.

Mechanical drawing, modeling in clay, &c., are a part of the regular school work, for which a special teacher, Miss Van Horn, is employed. She has been with us for several years, and we have no fault to find with her methods. The expense connected with this work is not charged to the appropriation for manual training, as it was a part of the regular curriculum long before the manual training system was introduced by the State.

EXPENSE ACCOUNT.

Balance on hand June 1st, 1889.....		\$404 59
Contributions.....	\$75 00	
Special tax levy.....	225 00	
		<u>300 00</u>
		\$704 59
Expended—Teachers' salaries and expenses.....	\$483 00	
Material and fuel.....	93 50	
Incidental expenses.....	38 75	
		<u>615 25</u>
Balance on hand June 1st, 1890.....		\$89 34

Through some mistake, the \$300 due from the State, being the equivalent of the amount raised by subscription and special tax, was not recorded until some time after the close of our fiscal year, and will be credited in next year's report.

ORANGE.

To Hon. E. O. Chapman, State Superintendent:

SIR—The experience of the second year with manual training in the public schools of Orange has tended to increase the interest already felt in the subject, and to establish the system on a firmer basis. There have been throughout the year three special teachers in this department, including the instructor in woodwork, who gives two days of the week to the Orange schools. One of the two ladies employed takes general charge of the work, instructs in sewing and cooking, and gives a part of the lessons in drawing, clay modeling, and paper cutting. The other teaches the most of the drawing classes, with clay and paper work in connection. The work under these heads has advanced along the lines indicated in my report of last year. The drawing, paper and clay lessons are begun in the

youngest primary grades. Drawing is continued as far as the third year in the High School. The paper and clay work extends to the second grade in the grammar department, and the clay modelling is taken up again for more advanced work in the High School. The sewing begins with the girls in the upper primary classes, and is continued into the High School. The lessons in carpentry begin in the grammar department, in the third grade below the High School, and extend through the course, as at present arranged. It is probable that elementary instruction in wood turning and metal work will be added to the course at no distant day. The boys who take the lessons in carpentry make working drawings of their designs, in connection with the graded lessons given on blue print cards. The course in carpentry is as follows:

1. Sawing.
2. Planing.
3. Chisel work.
4. Mitre joint.
5. Butt and mitre joint.
6. Cross lap joint.
7. End lap joint.
8. Mitre lap joint.
9. Slip mortise and tenon.
10. Through mortise and tenon.
11. Relished end mortise.
12. Blind mortise joint.
13. Keyed dovetail mortise.
14. Brace joint.
15. Tusk and tenon.
16. Leg and rails.
17. Single panel door.
18. Timber scarf.
19. Dowel joint.
20. Half blind dowel joint.
21. Half lap dovetail.
22. Through end dovetail, No. 1.
23. " " " No. 2.
24. Half blind dovetail.
25. Box dovetail.

Several lessons may be required under each of the above heads. Some of the boys have done creditable work in wood carving and cabinet making, from special lessons given by the instructor, after completing the regular course given above.

The lessons in cooking and domestic economy, at first confined to the girls of the graduating class, during the second year have been given to the girls of the three upper classes of the High School. Each class receives one lesson a week. The nutritive and economic values

of the material used, the chemical constituents and the changes undergone in the process of cooking are considered in the lessons, and afterward the instructions are carried out practically in the preparation of the food. The cooking of simple, nutritious dishes in general, and of such food as is especially appropriate for the sick room and for invalids, is taught; and in this way the instruction is supplementary to the study of hygiene in the schools.

The second annual exhibit of the work in manual training in the schools, so far as visible results are concerned, was given at the rooms No. 9 Cone street, in June last. Specimens of the work of all the grades and classes were shown, and nearly every pupil in the schools was represented. The exhibit showed the advance that had been made in the year since the previous occasion of the same kind.

TOWN OF UNION.

To the Hon. E. O. Chapman, State Superintendent :

SIR—Accompanying please find the course in manual training for the public school in Town of Union, Hudson county (District No. 6).

The various branches under this heading are parts of the regular school work.

The instruction is given by the regular class teachers, except in the departments of domestic economy and wood-working, for which special teachers are employed.

Every one of the 1,862 pupils enrolled in the school during the year received instruction in the branches assigned to their respective grades, and the pupils, their parents and friends, as well as the teachers and numerous visitors, manifest deep interest in this work.

Our experience has been that manual training stimulates the activity of the pupil, cultivates his power of close and intelligent observation, teaches him to become self-reliant and independent, and furnishes him with the means of giving clear and accurate expression to thought.

Then give one oblong and do the same. Then one triangle. Next, give each pupil two squares. Have these placed in all possible relations to each other. Do the same with two oblongs. The same with two triangles. Next give one square and one oblong. Form as many designs as possible. Next one square and one triangle, then one oblong and one triangle. Give each pupil three squares. Place them in all different relations to each other and form designs. The same with three oblongs and with three triangles. Combinations of three squares and one oblong, squares and one triangle, squares and two oblongs, &c. This work to be continued until figures and designs, containing not more than four tablets of one kind, are formed.

Particular attention will be given to developing symmetry in form and harmony in color.

Sticks of a given uniform length are given to each pupil, beginning with one stick, then two, then three, and so on up to twenty.

Form designs in outlines, in the same general manner as with tablets.

Draw tablet and stick-laying designs on slates or paper.

Have pupils reproduce original tablet designs in gummed paper, corresponding in form and color to the tablets used, for preservation.

IV. *Paper Folding*.—From colored squares of paper teach to fold simple objects, in the following order: Book, window, shawls, open envelope, closed envelope, handkerchief-box, salt cellar, open flower, closed flower, soldier cap, &c. Each object is formed from the preceding object by additional foldings. Another series to be folded from the tablecloth as a ground form.

V. *Writing*.—Train the hand and other parts of the body to secure correct pencil holding and proper position of the body. Never use short or dull pencils, and begin having transcripts made twice a week in books, especially from reading lessons, with pencil. Teachers must present only perfect forms in all written work. A uniform style of writing to be used and taught by all teachers in primary and intermediate grades.

VI. *Calisthenics*.—Light calisthenics and marching to music, as well as motion songs, to develop graceful movements of hands and arms, as well as other parts of the body, and to train the ear and eye to strict and prompt attention.

Second Grade.

I. *Form*.—Modeling in clay, more modifications of sphere, cube and cylinder, also square prism, triangular prism, square pyramid, triangular pyramid and cone and simple modifications of each.

II. *Drawing*.—Review work of preceding grade and in addition teach equilateral, isosceles and scalene triangles of any given size. Also have figures composed of one or more of the above kinds of tri-

angles drawn by pupils. Specimens of work to be transferred to paper by the pupils themselves and preserved by the teacher.

III. *Tablet and Stick Laying*.—In addition to the tablets used in the first year, use the circle, semi-circle, ring, half and quarter ring. Conduct the exercise on the same general plan as before, with much practice in inventing original combinations.

Stick Laying.—Use sticks of various lengths, differing by inches, to form designs as in first year. Preserve original work as before.

IV. *Paperfolding and Mounting*.—Review work in paperfolding of the first year. Make original forms from the envelopes and tablecloth as ground forms. Mount forms made in groups of two, three, four, or any desired number, combining complementary colors, or colors that will harmonize. Besides teaching accuracy, the chief value of this work consists in bringing out the ingenuity of the individual pupil and exercising his power of invention, the teacher to act as an adviser more than as a director.

V. *Writing*.—Continued as in grade first, teacher to see that all written work is neatly and carefully done.

VI. *Calisthenics*.—Systematic instruction in light calisthenics to be continued.

VII. *Sewing*.—For girls' classes. Weaving with splints and paper strips, to teach the woof and warp of material. Trace with red cotton upon square of unbleached muslin, squares, triangles, or any simple design formed with straight lines with running stitch.

Third Grade.

I. *Form*.—Modeling in clay. Add oblate and prolate spheroid, ovoid, and modifications of these, as well as of any of the geometrical solids. Have plenty of original work.

II. *Drawing*.—After reviewing work of preceding grades, teach square, rhomb and oblong of any given size on any diameter; the oblong in any required proportion. Preserve accurate work as before.

III. *Paper Cutting*.—Draw on quadrille ruled paper, squares, oblongs and triangles, in groups to represent on a plane, the surfaces of cubes, square prisms, triangular prisms, square, triangular, pentagonal, hexagonal and octagonal pyramids, frustums of pyramids, and simple combinations of these.

Cut out, fold and paste these figures so as to represent these solids.

IV. *Sewing*.—For girls' classes. Running on squares of unbleached muslin, outlines of leaves, fruit, &c. Stitching initials. Overhanding striped calico.

V. *Writing*.—Have plenty of practice in writing on paper. Allow no slovenly work.

VI. *Calisthenics*.—Light calisthenics continued as in preceding grades.

Fourth Grade.

I. *Form.*—Clay modeling and cutting. Construct on a flat surface of clay and then cut out squares, triangles, quadrilaterals, polygons up to circle and its parts. Have surfaces decorated with simple original designs.

II. *Drawing.*—Review preceding grade. Teach how to draw pentagon, hexagon and octagon by the aid of helping lines, and of any required size. Also teach to combine these with any of the preceding figures taught, to form new designs. Preserve good specimens as before.

III. *Sewing* —For girls' classes. Overhanding raw edge and selv-edge together on bleached and unbleached muslin. Also overhanding two selvedges together on bleached and unbleached muslin.

Folding hems with plain and mitered corners on paper. Hemming bleached and unbleached muslin.

IV. *Writing.*—With pen and ink in copy books. Everything written on slates, in blank books, with pencil, or pen and ink, to be a writing lesson.

V. *Calisthenics.*—Light calisthenics as before.

Fifth Grade.

I. *Form.*—Clay modeling and cutting. Building up on successive layers of clay combinations of geometrical solids and their modifications. Decorating their surfaces by original designs. Modeling from objects and drawings.

II. *Drawing.*—Review grades one to four and teach how to draw a circle on vertical, horizontal or oblique diameters. Also semicircle, quadrants and ellipses, according to measurements. Also to draw objects that can be represented by straight lines without perspective effect. Preserve original designs.

III. *Sewing.*—For girls' classes. Stitching and overcasting seams. Cutting bias and half bias seams on paper. Cutting half bias seams on muslin for felling. Backstitching and felling.

IV. *Writing.*—Continue work of preceding grade and advance grades of copy books.

V. *Calisthenics.*—Continue as in preceding grades.

Sixth Grade.

I. *Mechanical Drawing.*—Teach use of drawing board, T squares, triangles of 45° and 60° , compasses and dividers. Applications of simple practical problems of geometry, such as bisecting a line or an angle, erecting perpendiculars at a given point on a line or from without, constructing triangles, quadrilaterals and polygons on a given base line.

Construct on a plane surface the development of all the geometrical solids and simple modifications.

II. *Cardboard Modeling*.—Cut out the figure so drawn on drawing-paper or cardboard, and form the solids by creasing and pasting the edges.

III. *Drawing*.—Simple and compound curves. Four simple, lobed leaves conventionalized. Symmetrical arrangement to form rosettes.

IV. *Sewing*.—For girls' classes. Gathering and putting on bands in different ways. Cutting and working buttonholes and sewing on buttons. Setting in a gusset.

V. *Writing*.—Advance grade of copy-books.

Seventh Grade.

I. *Mechanical Drawing*, as in sixth grade, with additional modifications of solids and invention in original combinations thereof. Practical applications of simple geometrical problems continued. Take up the circle, inscribe and circumscribe rectilinear figures, triangles, regular polygons, &c.

II. *Cutting and constructing*, as before.

III. *Drawing*.—Original combinations of simple and compound curves, spiral lines and leaf forms in a circle. Conventionalize four additional leaves.

IV. *Sewing*.—For girls' classes. Review weaving preparatory to darning. Darning canvas, stockings and woolen goods. Darning cashmere, cloth, &c. Herring-bone stitch on canvas.

V. *Writing*.—Advance grade of copy-books.

Eighth Grade.

I. *Mechanical Drawing*.—Review exercises in drawing lines parallel or perpendicular to each other, with the set squares. Teach to draw square, equilateral triangle, rhombus, hexagon and octagon, with set squares. Solutions of simple geometrical theorems. Working drawings; elevations, plans and details required for shopwork. Isometric drawings of joints as a whole.

II. *Drawing*.—Review grades six and seven. Simple designs for carpets, oilcloths and tiles. Four flowers conventionalized. Symmetrical arrangement of the same to form rosettes and borders.

III. *Shopwork*.—Use of tools. End lap-joint, miter-joint made by aid of the bevel without miter-box. Miter lap-joint, cross lap-joint, mortise and tenon.

IV. *Writing*.—Advance grades of copy-books.

V. *Sewing*.—Setting-in calico and cloth patches. Fine sewing. Making and sewing on ruffles, hemstitching, tucking, &c. In this and the succeeding grades, pupils who are sufficiently advanced in

sewing may, if the mother desires it, devote a portion of the time allotted to this branch of work in making suitable garments requiring the application of stitches already learned.

VI. *Cooking*.—Care of kitchen. Material of culinary and table utensils, their cleanliness and preservation.

Laying of and waiting on table.

Hints on table manners.

Material of human body—tissues, waste of—action of food and practical suggestions concerning diet.

Related facts, physical and chemical. Heat, properties of fuel. Composition of fuel, office of carbon, hydrogen, &c.

Physical effects of heat on albumen, gluten, starch.

Purchasing food with regard to nutritive value and economy.

Porridge. Oat meal. Indian meal mush, farina.

Properties and preparation of tea, coffee, chocolate.

Potatoes. Boiled, mashed, baked.

Vegetables.	{	roots. stems. leaves. seeds.	} Treat in turn.
-------------	---	---------------------------------------	------------------

Meats. Broiled over live coals. Pan broiled, fried, boiled. Soups. tomato, potato, pea, bean, beef, vegetable. Warmed over meats. Hash. Stew. Breads. Yeast.

Ninth Grade.

I. *Mechanical Drawing*.—Reviewing work of preceding grades. Teach use of compasses in drawing circles containing flower forms with different numbers of petals. Teach to draw circle with four, six, eight or twelve circles tangent to itself and to its center.

More graphic solutions of simple geometrical problems.

Working drawings for shopwork.

Isometric drawings of joints as before.

II. *Drawing*.—Original designing, leaves and flowers from nature and conventionalized.

III. *Shopwork*.—Use of tools. Making half-dovetail, dovetail and dowel joints. Making bench dog, miter-box and kneading board.

IV. *Writing*.—Aim at securing a plain, business hand, neat and legible. No set form of letters to be insisted on. Teach the importance of neatness in making out bills, receipts, orders, &c.

V. *Sewing*.—Letters for marking clothing. Feather stitching, chain stitching and embroidery.

VI. *Cooking*.—Digestibility. Its great object. Changes of food in the mouth. Importance of mastication. Properties of the gastric juices. Action of acid and ferment. Cooking solids to prepare them

for digestion. As solids. As fluid. Palatability. Nutritiveness. Food elements. Minerals, starches, sugar. Fat. Albuminoids. Extend and review facts.

Meats: Roasted, dressed, baked.

Fish: Boiled, broiled, fried in oil.

Soup: Stock.

Biscuit: Corn bread, rolls.

Simple Desserts: Rice pudding, baked apples.

Tenth Grade.

I. *Mechanical Drawing*.—Review work of preceding grade. Teach to draw an ellipse by the aid of a string, an equable and variable spiral, also an ellipse with the straight edge. Solutions of simple geometrical problems. Working drawings for shopwork. Plans, elevations, details of buildings and simple machinery. Isometric drawings of joints and objects made in shop.

II. *Drawing*.—Elements of perspective and application of the same in drawing a cube, cone and cylinder in three different positions.

III. *Shopwork*.—Use of tools. Making a dovetailed box. Making a bird house with three gables from drawings of plans and elevations.

IV. *Writing*.—See Ninth Grade.

V. *Sewing*.—Measuring, cutting and fitting.

VI. *Cooking*.—Chemistry of food. The germ theory applied to food. Choice of food for invalids as best adapted to different cases. Cooking of food for invalids. Care of invalids. Cooling and strengthening drinks.

Beef tea. Chicken soup. Mutton broth. Toast water. Lemonade. Milk punch. Jelly. Wine. Lemon cornstarch. Temperature of room. Ventilation. Cleanliness.

VINELAND.

To Hon. E. O. Chapman, State Superintendent :

SIR—On September 1st the trustees requested Professor Deremer to prepare and present to them an outline of manual training work for the year and for the district. In due time he did so, and it was adopted without alteration. It provided for about three hours' work per week for each pupil and teacher. This, in length of time, is about one hour per week longer than the work of the previous year. On November 18th the principal asked for some tools for the mechanical department. After making the necessary inquiries about prices and quality, the order for their purchase was passed on December 9th. They cost \$124.51. On February 3d, Mr. Jacob I. Peterson was appointed assistant instructor in the mechanical department. He is now teaching four hours per week, devoting an hour to each of four classes.
