

APPENDIX

1. selling 503 acres getting 92 acres in monroe twp - what is that property good for. the description does not tell teh nj citizenry how they are better off with this trade and that should be part of any recommendation before this council. it should be a mandatory part of an application.

3. 3170 sq ft space at trenton office complex for a "community health project" a non profit

5 year lease- there should be no renewal allowed after 5 years. i dont think the state is helped by having non profits influence right by state offices. it hink the distance between what non profits want and what teh citizens want is very different and having non profits right across the hall in state buildings is not good for independent govt. not good at all. also the rent should be raised to \$67,000 a year and then to \$70,000 if it goes through. i see no reason to give cheap rent to a non profit, which has its own agenda, which may be in complete dichotomy with what nj citizens want. this closeness nhurts the citizenry.

keep the two separate. make them get space on private propert.
