Regional Drinking Water Supply Indicators & Declared Water Supply Status

Drought Status and Conditions (updated weekly) – [View PDF Version](#)

NEW JERSEY
Regional Drinking-Water-Supply Indicators
& Declared Water-Supply Status

April 30, 2023

Region	Drinking-Water-Supply Indicator						Water-Supply Status		
	Status	90-day precipitation	90-day stream-flow	N.J. reservoirs	Del. R. reservoirs	Unconf ground water			
North-west 	Near or above normal			Not a significant region-wide water resource.			Normal	18	
	Moderately dry						Watch		
	Severely dry						Warning		
	Extremely dry						Emergency		
Central 	Near or above normal			Not a significant region-wide water resource.			Normal	18	
	Moderately dry						Watch		
	Severely dry						Warning		
	Extremely dry						Emergency		
North-east 	Near or above normal			Not a significant region-wide water resource.	Not a significant region-wide water resource.		Normal	18	
	Moderately dry								Watch
	Severely dry								Warning
	Extremely dry								Emergency
South-west 	Near or above normal			Not a significant region-wide water resource.			Normal	18	
	Moderately dry						Watch		
	Severely dry						Warning		
	Extremely dry						Emergency		
Coastal North 	Near or above normal			Not a significant region-wide water resource.	Not a significant region-wide water resource.		Normal	18	
	Moderately dry								Watch
	Severely dry								Warning
	Extremely dry								Emergency
Coastal South 	Near or above normal			Not a significant region-wide water resource.	Not a significant region-wide water resource.		Normal	18	
	Moderately dry								Watch
	Severely dry								Warning
	Extremely dry								Emergency

The number in each colored dot is the number of weeks the specific indicator in that region has been in that status. For indicators which changed status this evaluation cycle the arrow indicates the direction of change; it points from the previous status to the current. A water drop (♦) means the indicator has been green for more than a year.

Subject to revision and update. This summary shows regional drinking-water-supply indicators for New Jersey with the most up-to-date available data, which is not always the date indicated on top of page. Note that data availability can lag one or more days depending on the data source and information here may vary temporarily and differ slightly from other summary reports. Local water-supply conditions may vary. Water-supply status is based on professional judgment of water-supply characteristics and indicators in each region. Indicators are shown only for those water resources significant for each region. The indicators are described at <https://www.nj.gov/dep/njgs/pricelst/ofreport/ofr04-2.pdf>.
