UNIFORM CRIME REPORTS

State of New Jersey

1974

Honorable William F. Hyland
Attorney General
State of New Jersey

Colonel Eugene A. Olaff
Superintendent
New Jersey State Police

Major LeRoy F. Umholtz
Supervisor
Records and Identification Section
New Jersey State Police

Chief Joseph J. Michnisky
East Windsor Township Police Department
President
New Jersey Association of Chiefs of Police

Issued By: State of New Jersey, Division of State Police
Uniform Crime Reporting Unit
Box 7068, West Trenton, New Jersey 08625

STATE OF NEW JERSEY
WILLIAM F. HYLAND
ATTORNEY GENERAL

To the Honorable Brendan T. Byrne, Governor of the State of New Jersey; the Honorable Frank J. Dodd, President of the Senate, and Honorable Members thereof; and the Honorable S. Howard Woodson, Speaker of the General Assembly, and Honorable Members thereof:

Pursuant to N.J.S.A. 52:17B-5.5, there is hereby respectfully submitted the eighth annual report on information gathered and collated under the New Jersey Uniform Crime Reporting System, inaugurated on January 1, 1967, which provides a comprehensive compilation and analysis of crime statistics for New Jersey.

As noted in past years, New Jersey's effort in this area predated the Report of the President's Commission on Law Enforcement and the Administration of Criminal Justice, which urged the creation of such state systems. FBI officials, in discussing this system with members of our State Police, have described it as a model of its kind.

It would, of course, be impossible to complete this Report without the cooperation of New Jersey's municipal, county, state and other law enforcement agencies, 598 of whom contributed to this effort in 1974. It is with appreciation to these dedicated public servants, and in the interests of more effective law enforcement for all the citizens of New Jersey, that this eighth annual Uniform Crime Report is

Respectfully Submitted,

A handwritten signature in cursive script that reads "William F. Hyland".

William F. Hyland
Attorney General of New Jersey

STATEWIDE CRIME SUMMARY

1974

OFFENSES

- There were 350,134 serious crimes (Index offenses) reported in the state during 1974, a 17 percent increase over 1973.
- The crime rate was established at 4,722.8 victims for every 100,000 permanent inhabitants of the state, a 16 percent increase over 1973.
- The number and rate of violent crimes increased 3 percent since 1973.
- Law enforcement agencies solved 17 percent of all the Index offenses reported in 1974, and juveniles (persons under 18) were involved in 35 percent of all the solved cases.
- The value of all reported stolen property in the state, amounted to \$136 million.
- Larceny of bicycles increased 31 percent over 1973, and amounted to a \$3.3 million loss to victims. Bicycle thefts accounted for 22 percent of all larcenies reported in 1974.
- Firearms were used in 46 percent of the murders and 16 percent of all atrocious assaults, the lowest firearm involvement recorded in the last 6 years.
- Robbery was the motive for 24 percent of all murders committed during 1974. A total of 341 persons were murdered for the purpose of robbery during the period 1970 through 1974.
- Daytime breaking and enterings of residences accounted for 53 percent of all resident breaking and enterings reported.
- Urban crime increased 12 percent and accounts for 60 percent of the total Index crimes reported in the state. Suburban crime increased 24 percent, with 34 percent of the state total. Rural crime accounted for 6 percent of the total crime reported in New Jersey, and increased 28 percent over 1973.

ARRESTS

- During 1974, there were 329,250 persons arrested for all criminal acts, an increase of 10 percent over 1973.
- Persons over 18 accounted for 76 percent of all violent crime arrests.
- Persons under 18 accounted for 56 percent of all property crime arrests and 37 percent of all arrests made during 1974.
- Persons under 18 accounted for 6 of every 10 arrests for breaking and entering and almost 7 of every 10 arrests for motor vehicle theft.
- Persons under 30 accounted for 94 percent of all narcotic arrests made.

POLICE KILLED AND ASSAULTED

- During 1974, there was one New Jersey police officer killed and 3,375 assaulted in the line of duty, a 10 percent increase over 1973.
- Almost 19 of every 100 municipal police officers were assaulted during 1974.

THE NEW JERSEY UNIFORM CRIME REPORTING SYSTEM

DEFINED

The New Jersey Uniform Crime Reporting System involves the uniform compilation, classification, and analysis of crime statistics reported by all police agencies of the state pursuant to guides and regulations prescribed by law.

The statute which established the Uniform Crime Reporting System (N.J.S.A. 52:17 B-5.1 et seq) empowers the Attorney General to collect, gather, assemble, and collate information which would be of assistance in the proper administration of criminal justice. The Attorney General and the New Jersey State Police (the agency designated by the Attorney General to establish the Uniform Crime Reporting System), in an attempt to achieve uniformity with the FBI reporting system and to establish a broad base for the collection of data involving anti-social behavior, and other relevant information with respect thereto, have defined the word "crime" to include acts which technically within our State are not considered crimes. In this reporting system the word "crime" includes some "disorderly persons offenses." It also includes in a category entitled "all other offenses" violations of municipal ordinances. References to the relevant tables which set forth the Class I and Class II offenses contained in this report clearly indicate what is covered.

PURPOSE

Effective law enforcement requires the coordination of law enforcement activities within and among political subdivisions. Special attention must often be devoted to a selective and concentrated effort both areawide, as well as in terms of a specific pattern and type of criminal behavior. Selective and coordinated enforcement becomes possible only when the type and volume of crime can be analyzed on the basis of accurate information comprehensively developed and systematically collated.

Information revealing the location, frequency, and nature of crime is essential to this purpose. It is for these reasons that New Jersey's Uniform Crime Reporting System was developed.

DEVELOPMENT

The New Jersey Uniform Crime Reporting Law was enacted on May 16, 1966 and became effective January 1, 1967. Responsibility for the establishment, direction, control and supervision of the Uniform Crime Reporting System was assigned to the Attorney General of the State. After passage of the law, the Attorney General, as provided by the statute, designated the New Jersey State Police as the agency to collect, gather, assemble and collate information from the law enforcement jurisdictions within the state.

Prior to the enactment of the law, and at the request of Attorney General Arthur J. Sills, the New Jersey State

Police conducted research and study of crime reporting systems then operational throughout the country. Study results established that adoption of a reporting program paralleling that of the federal system of Uniform Crime Reporting would be the soundest approach toward development of a state system. The obvious advantage found in the adoption of the federal system included the desirability of having compatible state and federal systems thereby allowing absorption of state crime data into the national level.

The Committee on Uniform Crime Reporting of the New Jersey State Chiefs of Police Association has served the program in an advisory capacity since 1966. The contributions made by this committee have proven invaluable and, indeed, insured the success of the program. This body continues to work closely with the Uniform Crime Reporting Unit of the New Jersey State Police to improve further the quality of reporting and to recommend additional program standards, policies and procedures.

During the development phase of the program a study of the federal and various state systems of crime reporting revealed the importance of a sound internal police records system, if accurate crime statistics were to be forthcoming. Upon recognition of this factor, the State Police revised completely their method of internal reporting in order to meet the requirements of the Federal System of Uniform Crime Reporting. This step not only hastened program development but also proved invaluable throughout the operational phase.

Education of contributors to the program in the areas of mechanics, methods and concepts must be a constant operational requirement, if continued system adherence and valid statistics are to be expected. This vital need is satisfied by the personal contact between the five state troopers assigned as field representatives to the program, and the contributors to the system.

The difficult and important task of maintaining close liaison is obvious when it is realized that services now are extended by the New Jersey State Police Uniform Crime Reporting Unit, through its Field Representatives, to the 594 law enforcement agencies of the state. Although each contributor to the program is supplied with the "Uniform Crime Reporting Guide" describing system procedures and mechanics, personnel changes within reporting departments and program refinements make the educational phase a continuing one.

As an adjunct to the program, the New Jersey State Police has offered its revised method of internal reporting to those police departments who wish to adopt it. In all cases of report adoption and record up-dating, assistance is rendered by the Field Representative who provides the necessary guidance and instruction. The personal contact between the Field Representative and the contributor not only serves as a rapid means to resolve areas of report error, but also provides the opportunity to discuss other areas of mutual interest, thus providing an additional communication link between municipal, county and state law enforcement agencies.

PROGRAM EVALUATION

The scope of mandatory crime reporting in New Jersey extends far beyond the stated purpose of the initial program. The compilation and publication of an annual report, which identifies and offers analysis of the extent and nature of crime on a state, regional, county and municipal level, may be considered an end in itself. However, practical application of such data must be made before the program can be judged substantive.

Police executives throughout the state are making increased use of this data in administrative, planning and operational determinations for their respective jurisdictions. During 1973 the State Police Uniform Crime Reporting Unit rendered operational assistance to municipal police agencies by providing individual analysis of statistics as they related to specific crime problems and for use in identifying necessary police manpower and equipment needs. Program requirements have also increased police efficiency in the areas of reporting and record keeping. Examples of program application, as discussed here, aid police in their day to day operations and contribute toward the constant effort of upgrading the quality of police services in the community.

The State Law Enforcement Planning Agency, which was established in August of 1968 to conform with the provisions of the Omnibus Crime Control and Safe Streets Act of 1968, has the responsibility of improving law enforcement throughout the state. Since its inception, in all of its determinations as to application of allocated funds, this agency has used analyzed crime data obtained through the Uniform Crime Reporting program. The establishment of crime rates on regional, county and municipal levels with identification of specific crime problems allows the agency to construct priorities, formulate plans and implement these plans to the benefit of the state and all units of local government. This administrative application of such crime data illustrates the far reaching effect the program has on all efforts to combat crime in the state.

Since 1967, many states have studied the New Jersey system for adoption within their respective states. Several of these, presently have ongoing programs based on the New Jersey system and many more of the remaining states are in the process of implementing similar programs.

The element of compatibility of crime statistics between state and federal programs is vital, and evaluation must include consideration of the degree of that compatibility. The Uniform Crime Reporting Unit of the State Police has worked closely with the members of the Federal Bureau of Investigation who administer the National Uniform Crime Reporting Program. Invaluable aid and assistance has been given by the FBI which resulted in the New Jersey program being compatible with that of the national program. This compatibility allows adsorption of state crime data into the national system without lengthy and costly conversion processes.

On January 1, 1969, the FBI, who have collected National Uniform Crime Reports in the states and counties since 1930, eliminated the direct collection of National Uniform Crime Reports from the police of New Jersey. This procedure change followed a two-year evaluation of the New Jersey program by the FBI and resulted in an

agreement wherein uniform crime reports for each municipality of the state are now being submitted to the national program by the State Police. This working relationship, which was coordinated through the Chiefs of Police Association, State Police and the FBI, is a direct result of the interest and cooperation of the law enforcement agencies of the state in the Uniform Crime Reporting program.

FACTORS RELATED TO CRIME

It has long been noted there are numerous factors, environmental and others, which have an important bearing on the scope and intensity of crime. As an adjunct to the statistical compilation and analysis of crime reported herein, special attention is devoted to certain of these factors.

To understand further the nature and scope of crime in various sections of the state, a section entitled "Profiles of Incorporated Municipalities in New Jersey" appears in this publication as it did in the first annual report of 1967. The profile information set forth in the areas of population, density rates, population growth, all relate to the year 1974, as do the urban, suburban, rural characterizations, given land areas and industrial populations.

Factors considered within profiles are those which are out of police control, but which may affect a community's crime rate and which may vary from community to community. The presence of these factors are noted in order that the resulting crime statistics may be reviewed in a more fair and equitable manner. The effect of these factors on a community's crime rate is not easily determined, but they are set forth for the purpose of alerting the reader to their existence in varying degrees in all New Jersey communities.

REFINEMENT OF THE SYSTEM

The collection of meaningful data to supplement that which is normally collected in a vital element of the system. This supplemental information regarding crime and the criminal enters the system by way of special surveys and samplings. Periodic collection of such information enables better identification of specific crime problems and those factors which contribute to them. Analysis of refined information and dissemination to contributors provides additional intelligence upon which more effective police action can be based.

Special statewide surveys taken in previous years have dealt with the important mobility factor of crime and the specific offense of robbery. The results of the mobility study served as an indicator of the effect the criminal mobility can have on the crime experience of the community and the contribution it makes toward police problems in the control of crime. Robbery analysis, based on that special survey, better identified the nature of the crime, its impact on society and the robbery perpetrator.

The collection of refined information relative to crime was continued in 1969 through a one month "Special Auto Theft Survey" conducted in August of that year. The auto theft problem, although not unique to New Jersey, has grown to major proportions and its continuing growth suggests serious consequences for the individual and the community.

A statewide arrest survey on the vital issue of "Drug Abuse and Crime in New Jersey" was conducted during the month of August, 1970. For the first time a meaningful correlation was established between these two major problems. Complete results and analyses are contained in the publication "Drug Abuse and Crime in New Jersey" released June, 1971.

In 1971 crime statistics by urban, suburban and rural classifications were collated and analyzed for the first time since the beginning of the program in 1967. These statistics were presented in the 1971 publication and will be continued in all future publications.

The Uniform Crime Reporting Program of New Jersey, in its eighth year of operation, is now recognized as an effective vehicle to increase the efficiency of police operations in every municipality of the state. The System was originally designed to fulfill the need for accurate crime statistics for use in police administration, planning and operations. In its current status it does answer these needs to a great degree, but has not yet reached full potential as an operational tool.

In August, 1974, the New Jersey State Police, Uniform Crime Reporting Unit, through the New Jersey Law Enforcement Planning Agency, was awarded a Discretionary Grant from the Law Enforcement Assistance Administration, U.S. Department of Justice. The funds are for the purpose of assisting in the expansion of the Uniform Crime Reporting Program.

Based on the current Uniform Crime Reports submitted by the police departments throughout the state, a monthly "feedback" report will be disseminated to each contributor to the program. This "feedback" report will present an accurate account of the status of crime in each municipality of the state. The report will contain information as to the type and time of criminal operations and crime targets, as well as the volume and trend of crime within each municipality. In addition to comparing the current month with the same month of last year, further analysis will be done for a current cumulative monthly total compared to the same period of last year. A trend for two prior years within the same crime categories will also be established.

In addition to Monthly Crime Trend Reports, the Uniform Crime Reporting Unit will update and implement records-keeping systems for Criminal Justice agencies, upon request. The Unit will also improve its capabilities to provide individual crime analyses for requesting Criminal Justice agencies.

COLLECTION OF CRIME DATA

As required by statute, all law enforcement agencies in the state submit crime reports to the program. During the year 1974, offense and related supplementary information, as well as arrest and disposition data, were received from 469 full-time municipal police departments, 61 special part-time municipal police departments and the New Jersey State Police who provided the necessary information for the 38 municipalities without local police services.

In addition to the above agencies, arrest and disposition data were received for the state's 21 county prosecutors'

and 21 sheriffs' offices, two county police departments and eight county park police departments. In order to incorporate all New Jersey law enforcement under the system, the eight other state agencies with law enforcement responsibilities were included. Also included are seven college campus police departments reporting under a pilot program. This amounts to 598 law enforcement agencies reporting.

In the interest of satisfying a national, as well as a state need for uniformity, completeness, and accuracy in crime statistics, every report submitted under the system is prepared in triplicate by the contributor. One copy is retained by the contributor and the remaining copies are submitted to the State Police Uniform Crime Reporting Unit which in turn forwards a copy to the Federal Bureau of Investigation for inclusion in the National Uniform Crime Reporting Program.

METHOD

Reported offenses are related to the municipality in which they occur, rather than to the agency which may investigate, arrest or otherwise in some manner, dispose of the case. The clearance, in every case, is attributed to the municipality in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense. Each contributing agency is responsible for compiling its own reports. The Uniform Crime Reporting Guide, which is supplied to all contributors, outlines reporting procedures in detail and is complete with examples and illustrations. Field Representatives provide additional instruction and clarification when required.

Municipal law enforcement agencies report the number of known offenses according to the following categories:

- (1) Homicide (Murder and Manslaughter)
- (2) Forcible Rape
- (3) Robbery
- (4) Assault
- (5) Breaking and Entering
- (6) Larceny-Theft
- (7) Motor Vehicle Theft

This count is determined from a record of all criminal complaints received by the police from victims or other sources or discovered by the police during their operations. Complaints determined by police investigation to be unfounded are eliminated from this count. The number of "offenses known" in each crime category is reported without regard to whether anyone is arrested, stolen property is recovered, local prosecutive policy, or any other consideration. Municipal law enforcement agencies also report the total number of these crimes cleared by arrest. A separate category is made for crimes cleared by the arrest of persons under 18 years of age. Certain other analytical data pertaining to specific crime categories are also reported, including, for example, total adult and juvenile arrests made during the month. Police killed or assaulted information is also collected by month.

Other monthly report forms contain data such as the number of persons arrested for all criminal offenses with respect to age, sex and race of the offender. An accounting of persons formally charged and their dispositions is submitted on an annual basis, as well as police employee data.

In summary, the presentation of this report, "Crime in New Jersey," reflects the compilation of the seven serious "offenses known to police," arrests of persons under 18 years of age and 18 years of age and over, and the ultimate disposition of those persons charged. This data is then related to the State of New Jersey, by population groups, character, designated crime reporting regions, individual counties and municipalities.

VERIFICATION PROCESSES

An obvious concern in the collection of crime statistics from 598 law enforcement agencies throughout the state is the uniformity of data received. Program aids such as guides and instructions do not necessarily guarantee the accuracy and correctness of the reports submitted by the contributors. Additional controls are therefore necessary.

Each report received by the Uniform Crime Reporting Unit is recorded and examined for mathematical accuracy and, possibly more important, for reasonableness as to interpretation of offense classifications. Fluctuations from levels established by previous reports submitted by the contributor become subject of inquiry as to reason for variations. Improper classification, changes in reporting procedures or actual change are identified in this manner. Errors of a minor nature are corrected by direct telephone contact with the contributors, while all other errors are resolved by a personal visit by a Field Representative to the reporting agency. These personal contacts are invaluable to the accuracy of the system. Field Representatives are engaged in a constant educational effort and, as such, provide a vital link between the program and the reporter.

CLASSIFICATION OF OFFENSES

Uniformity in reporting under the New Jersey system is based upon the proper classification of offenses by police. The adoption of the federal system of reporting included the utilization of the offense classifications of that system. Law enforcement in this state has made accurate application of those classifications in the reports submitted to the program.

In view of the need for compatibility with the federal system, "offenses" under the program are not distinguished by designation of "high misdemeanors," violations of the Disorderly Persons Act or municipal ordinances. The explanation of offense classifications may vary slightly with those employed at the federal level because the language used is familiar to law enforcement in this state. However, the major categories of offense classification remain the same as those employed nationally.

OFFENSE CLASSIFICATIONS

(1) Homicide

- 1a. Murder—The unlawful killing of a human being with malice aforethought.
General rule—Any death due to a fight, argument, quarrel, assault or commission of a crime.

- 1b. Manslaughter—The unlawful killing of a human being, by another, without malice aforethought.
General rule—The killing may result from the commission of an unlawful act or from a lawful act performed with gross negligence. Traffic deaths may be classified as such when due to gross negligence of someone other than the victim.

(2) Forcible Rape

- 2a. Rape by force—The carnal knowledge of a female forcibly against her will.
General rule—Forcible rape of a female, but excluding carnal abuse (Statutory Rape) or other sex offenses.
- 2b. Assault to rape—Attempts—All assaults and attempts to rape.

(3) Robbery—The felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. Includes all attempts.

- General rule—Robbery differs from larceny in that it is aggravated by the element of force or the threat of force.
- 3a. Firearm—All robberies and attempted robberies involving the use of any type of firearm. This includes revolvers, shotguns, rifles, zip guns, etc.
 - 3b. Knife or Cutting Instrument—All robberies and attempted robberies involving the use of cutting or stabbing objects, such as a knife, razor, axe, glass, ice pick, etc.
 - 3c. Other dangerous weapon—All robberies and attempted robberies when any other object or thing is used as a weapon. (clubs, bricks, acid, explosives, etc.)
 - 3d. Strong arm—All robberies and attempted robberies where no weapon is used but strong-arm tactics are employed. This is limited to personal weapons such as hands, fists, feet, etc.

(4) Assaults—An assault is an attempt or offer, with unlawful force or violence, to do physical injury to another.

- General rule—All assaults will be classified in the following categories, excluding assaults with intent to rob or rape.
- 4a. Gun—All assaults and attempted assaults involving the use of any type of firearms. (Revolvers, automatic pistols, shotguns, zip guns, rifles, pellet guns, etc.)
 - 4b. Knife or cutting instrument—All assaults and attempted assaults involving the use of cutting or stabbing objects. (Knife, razor, hatchet, axe, cleaver, scissors, glass, broken bottle, dagger, ice pick, etc.)
 - 4c. Other dangerous weapon—All assaults or attempted assaults when any other object or thing is used as a weapon. (Clubs, bricks, pick handles, bottles, explosives, acid, lye, poison, scalding water, burnings, etc.)

- 4d. Hands, fists, feet, etc.—Atrocious—Assaults which are of an atrocious nature when hands, fists, feet, etc. are used. To be classified as atrocious assault, the attack must result in serious personal injury.
- (5) Breaking and Entering—Unlawful entry or attempted forcible entry of any structure to commit a felony or larceny.
 General rule—Any unlawful entry or attempted forcible entry of any dwelling, house, attached structure, public building, shop, office, factory, storehouse, apartment, house trailer, warehouse, mill, barn, other building, ship or railroad car.
 Note: For Uniform Crime Reporting purposes, breaking, entering and larceny are classified only as breaking and entering, the larceny is excluded. Breaking and entering of a motor vehicle is classified as larceny.
- 5a. Forcible entry—All offenses where force of any kind is used to enter unlawfully a structure, with intent to steal or commit a felony. This includes entry by use of a master key, celluloid or other device that leaves no outward mark but is used to open a lock. Concealment inside a building, followed by the breaking out of the structure is also included.
- 5b. Unlawful entry—No force—Any unlawful entry without any evidence of forcible entry.
- 5c. Attempted forcible entry—When determined that forcible entry has been attempted.
- (6) Larceny—Theft (Except motor vehicle theft)—The unlawful taking of the property of another with intent to deprive him of ownership.
 General rule—All larcenies and thefts resulting from pocket-picking, purse snatching, shop lifting, larceny from motor vehicle, larcenies of motor vehicle parts and accessories, theft of bicycles, larcenies from buildings, and from coin operated machines. Any theft that is not a robbery or the result of breaking and entering is included. Embezzlement, larceny by bailee, frauds or bad check cases are excluded.
- (7) Motor Vehicle Theft—The larceny or attempted larceny of a motor vehicle.
 General rule—Thefts and attempted thefts of a motor vehicle. This includes all vehicles which can be registered as a motor vehicle in this state. Excludes where there is a lawful access to the vehicle, such as a family situation or unauthorized use by others with lawful access to the vehicle. (Chauffeur, employees, etc.)
- 7a. Autos—Includes the thefts of all sedans, station wagons, coupes, convertibles, and other similar motor vehicles which serve the sole purpose of transporting people from one place to another.
- 7b. Trucks and Buses—Includes those vehicles specifically designed to transport people on a commercial basis, and to transport cargo.
- 7c. Other vehicles—This category includes other motor vehicles such as snowmobiles, motorcycles, trailbikes, etc. Farm and construction equipment are not considered motor vehicle thefts.
- (8) Other Assaults—Not atrocious—Assaults and attempted assaults which are not of an atrocious nature and are simple and minor in nature.
- (9) Arson—Willful or malicious burning with or without intent to defraud. Include attempts.
- (10) Forgery and Counterfeiting—Making, altering, uttering, or possessing or attempts to make, alter, utter or possess with intent to defraud. Anything false which is made to appear true.
- (11) Fraud—Fraudulent conversion of another's money or property by false pretenses. Includes bad checks, except forgery and counterfeiting.
- (12) Embezzlement—Misappropriation or misapplication of money or property in trust to one's care, custody or control.
- (13) Stolen Property—Buying, receiving, possessing—Buying, receiving and possessing stolen property and attempts.
- (14) Malicious Mischief—Willful or malicious destruction, injury, disfigurement or defacement of property without consent of the owner or persons having custody or control.
- (15) Weapon: Carrying, possessing and etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing and manufacturing of deadly weapons or silencers and attempts.
- (16) Prostitution and Commercialized Vice—Sex offenses of a commercialized nature and attempts. Such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes.
- (17) Sex Offenses—Except forcible rape, prostitution and commercialized vice—Statutory rape, offenses against chastity, common decency, morals, and the like. Also include attempts.
- (18) Narcotic Drug Law—Offenses relating to narcotic drugs, such as unlawful possession, sale or use. Does not include: Failing to register as user or federal offenses.
- (19) Gambling—Promoting, permitting, or engaging in gambling.
- (20) Offenses against Family and Children—Non support, neglect, desertion, or abuse of family and children.
- (21) Driving under the Influence—Driving or operating any motor vehicle while drunk or under the influence of liquor or narcotics.
- (22) Liquor Laws—State or local liquor law violations, except "drunkenness" and "driving under the influence." Excludes federal violations.
- (23) Drunkenness or Intoxication.
- (24) Disorderly Conduct—Breach of the peace. (Disorderly persons).

- (25) Failure to give Good Account—Vagabondage, begging, loitering, etc.
- (26) All other Offenses—All violations of state and local laws except classes 1-25.
- (27) Suspicion—Arrest for no specific offense and released without formal charges being placed.—Not reported in New Jersey.
- (28) Curfew and Loitering Laws (Juveniles)—Offenses relating to juveniles of local curfew or loitering ordinances, where such laws exist.
- (29) Runaways (Juveniles)—Limited to juveniles taken into protective custody under provisions of local statutes as runaways.

CRIME FACTORS

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of New Jersey and project a statewide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report *The Challenge of Crime In a Free Society*—(1967—Page 92)—“But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the

criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time.” Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex and race.

Economic status and mores of the population.

Relative stability of population, including commuters, seasonal, and other transient types.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Effective strength of the police force.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

STATE, COUNTY AND MUNICIPAL PROFILES

The presentation of state, county and municipal profiles in this section is offered for the purpose of projecting, for the consideration of the reader, a group of recognizable factors which may affect the amount and type of crime that occurs from community to community. Selection of the areas of information to be related to individual municipalities was based on the immediacy and completeness of data available.

Population statistics presented here and throughout this publication, were obtained from the Division of Economic Development, Office of Business Economics. Character of municipalities by urban, suburban and rural classifications and square miles, were compiled by the Division of State and Regional Planning, Bureau of Statewide Planning.

The Covered Employment which was supplied by the

Division of Planning and Research, Office of Statistics Reports and Analysis, represents that employment in the community covered by the New Jersey Unemployment Compensation Law. Excluded generally are those persons who are self employed, agricultural labor and state, county and municipal employees.

Certain other socio-economic factors, present in varying degrees in all communities, may have an influence on resulting crime rates. Obvious difficulties in the identification, documentation and measurement of these factors, however, precluded their application in this report.

Those factors presented were listed to affirm their existence within the county and community and to provide a base for consideration in the evaluation of that community's crime experience.

PROFILE OF NEW JERSEY

New Jersey is situated between the major industrial markets of New York and Philadelphia and can be classified as the "Crossroads of the East." The geographic location of the state has been a major factor in its growth and development. The many miles of super-expressway facilities within the state connect New Jersey directly with the neighboring states of New York, Pennsylvania and Delaware. Additionally, New Jersey as a corridor state, accommodates large volumes of traffic from both the eastern and western part of the United States.

The state is politically comprised of 21 counties which contain 567 incorporated municipalities. Nationally, New Jersey, although 46th in size, ranks ninth in population and first as the most densely populated state in the country. In addition to this density of 987.2 persons per square mile, New Jersey still has many miles of rural area or sparsely settled communities. The areas of density show a heavy

concentration around the major urban centers and those areas most accessible for commuting.

Dramatic increases have occurred in specific counties and municipalities. The trend of this rapid growth in populations of the suburb and rural areas has resulted in the loss of some city populations. Much of the loss has occurred from urban re-development or renewal programs but to a great degree have been absorbed by the outlying suburbs or rural areas. An interesting note is the fact that the shift of the urban population to suburban or rural areas has caused a large number of these municipalities to be reclassified to an urban status.

The unique image New Jersey presents for consideration is not only the result of the many and varied factors within its own boundaries, but also the complex elements of the megalopolis of which it is a part.

NJSP Table 1

NEW JERSEY CRIME INDEX - 1974

In this section, tabulations presented in tables and charts indicate the extent, fluctuation and distribution of crime for the state as a whole, reporting regions, counties, character groups, population groups and individual municipalities. The Crime Index, consisting of seven serious offenses, is used as a measure. Offenses are counted as they become known to law enforcement agencies. Crime classifications used in the index are: murder, forcible rape, robbery, atrocious assault, breaking and entering, larceny and motor vehicle theft. In the past, larceny \$50 and over has been used as one of the Crime Index offenses. Effective January 1973, total larceny-theft is being used instead of the larceny \$50 and over category. Larceny-theft is primarily a crime of opportunity and in most instances the value of the property taken is incidental to the actual criminal act.

Although the total number of criminal acts that occur are unknown, those that are reported to police provide the first means of a count. All crimes do not readily come to the attention of police nor are all crimes of sufficient importance to be significant in an index and further, not all important crimes occur with enough regularity to be meaningful in an index. With these considerations in mind, the above crimes were selected as a group to furnish some measure of the crime problem in New Jersey.

The volume of crime in a state, region, county or municipality is subject to those crime influencing factors

set forth elsewhere in this publication. Crime rates are constructed from estimates of current permanent population. The important transient population factor, although present in every community in varying degrees, cannot be measured in all instances and therefore is not included in the establishment of a crime rate. The existence of this factor, however, should be considered when reviewing the tabulations presented in this section.

The establishment of the base year New Jersey Crime Index for 1967 provided a foundation which allows year to year comparison of like data to be made. Specific areas of comparison presented in this publication are in respect to variances of offense volumes, rates, clearances and related information. Fluctuations in arrest volumes, rates and supplementary arrest information are also included in the tabulations shown.

CRIME AND POPULATION

Crime rates relate the incidence of crime to population. More specifically, a crime rate should be considered as a count of victims. The risk of victimization arises from crime-population computations and provides a numerical result for consideration. Crime influencing factors, which are complex in nature and exist in varying degrees in all areas, are not incorporated in the determination of a crime rate.

STATE OFFENSE DATA

VOLUME

A total of 350,134 Crime Index offenses were reported to law enforcement agencies of New Jersey during the Calendar Year 1974, a 17 percent increase in crime volume over 1973. When comparing the five year period, 1970 through 1974, a 37 percent increase evolves.

The Crime Index offenses referred to here represent the most common problem to law enforcement and the municipality. They are serious crimes by their nature, volume or frequency of occurrence. Basically, they can be categorized as violent crimes, such as murder, forcible rape, robbery and atrocious assault, or as crimes of a nonviolent nature, such as breaking and entering, larceny and motor vehicle theft.

The violent crimes as a group, accounted for 8 percent of the total Crime Index reported for 1974, and since 1973, rose 3 percent. The five year period, 1970 through 1974 disclosed a 44 percent increase. Murder decreased 12 percent, 1974 over 1973, forcible rape rose 4 percent, robbery increased 5 percent and atrocious assault increased less than 1 percent.

The nonviolent or property type group recorded an 18 percent increase since 1973. This group represents 92 percent of the Crime Index total. Breaking and entering increased 14 percent since 1973, larceny increased 27 percent and motor vehicle theft decreased 4 percent. The five year period, 1970 through 1974, revealed that property crime increased 36 percent.

A review of the distribution of offenses within the Index discloses that larceny accounted for 50 percent of the total 1974 Index, and breaking and entering accounted for 30 percent. The largest involvement of a violent crime was in the offense of robbery, at 5 percent of the total Index.

RATE

Crime rates relate the incidence of crime to the resident population. Many other factors which may contribute to the volume and type of crime in a given jurisdiction are not incorporated here, but are shown in the profile section of this publication.

In 1974, the crime rate was established at 4,722.8 victims for every 100,000 permanent inhabitants. This represents a 16 percent increase over 1973 and a 32 percent increase since 1970.

The 1974 rate for the violent crime group was established at 398.7 victims for every 100,000 inhabitants, a 3 percent increase over 1973. Within this violent crime group, robbery again recorded the greatest involvement of victims, 214 for every 100,000 residents. The nonviolent crime rate increased 18 percent over 1973 and resulted in a property crime rate of 4,324.1 per 100,000 inhabitants. Larceny contributed the most victims to the overall crime rate, 2,368 per 100,000 residents.

CLEARANCES

For Uniform Crime Reporting purposes, a crime is cleared when police have identified the offender, have evidence to charge him and actually take him into custody. Solutions of crimes are also recorded in exceptional instances when some element beyond police control precludes formal charges against the offender, such as the victims refusal to prosecute or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of solving one crime.

The police of New Jersey cleared or solved 17 percent of all Index offenses reported to them in 1974, a 6 percent increase over 1973. The violent crime group recorded a 44 percent solution rate, while the nonviolent or property group revealed a 14 percent rate. Both groups recorded increases for the period 1970 through 1974, with violent crime up 14 percent and nonviolent crime up 9 percent.

Considering individually the 1974 violent crime solution rate, it was determined that police were successful in solving 76 percent of the murders; 57 percent of the rapes; 24 percent of the robberies and 69 percent of the atrocious assaults. The nonviolent crime solution rates were as follows: Breaking and entering 14 percent; larceny 16 percent and motor vehicle theft 10 percent.

The relatively high clearance rate for violent crimes as compared to nonviolent crimes is in part attributable to the volume difference between the two. Nonviolent crime volume is much greater than that of violent crime and police investigation of violent crime is usually more intense. The element of confrontation between victim and perpetrator, as well as witness identification of the perpetrator, also contributes to this higher rate of solution.

JUVENILE CLEARANCES

A means of measuring the degree of criminal involvement for those of the young age group is to identify the number of crimes in which they are the offenders. In 1974, 35 percent of all Crime Index offenses solved in New Jersey involved persons under 18 years of age, an increase over the 33 percent juvenile involvement in 1973. This 1974 increase in juvenile involvement is in contrast to the decreases experienced during the period 1970 through 1972.

Violent crime solutions involved juveniles in 16 percent of the cases. Nonviolent crime solutions involved juveniles in 41 percent of the instances. Both were increases over the juvenile involvement recorded in 1973.

The juvenile involvement in individual Index offenses during the Calendar Year 1974, reflected the following solution rates: Murder 10 percent; rape 13 percent; robbery 22 percent; atrocious assault 13 percent; breaking and entering 43 percent; larceny 40 percent and motor vehicle theft 37 percent.

STOLEN AND RECOVERED PROPERTY VALUE

The total value of property stolen in 1974, was reported at \$136 million, an increase over the \$116 million reported in 1973. This dollar value represents the proceeds of all robberies, breaking and enterings, larcenies and motor vehicle thefts reported by New Jersey police during 1974. Motor vehicle thefts reported during the year accounted for

40 percent of the total value of property stolen in 1974.

Police recovered 34 percent of the total value of property stolen in 1974, but the remaining unrecovered portion represents a loss of \$90 million to the victims. A little over 69 percent of the value of motor vehicles stolen was recovered.

1974

MURDER

Murder is defined as the unlawful killing of a human being with malice aforethought. Any death due to a fight, argument, quarrel, assault or commission of a crime is included. This Index offense is scored by police on the basis of their investigation without regard to findings of a court or jury or the decision of a prosecutor. Traffic deaths, caused by the negligence of someone other than the victim, are not included here, but are counted under manslaughter. Attempts to kill and assaults to kill are scored as atrocious assaults and not as murder. Suicides, accidental deaths, and justifiable homicides are also excluded.

VOLUME AND RATE

There were 481 murders reported by the police of New Jersey in 1974, a 12 percent decrease over 1973, and a 19 percent increase since 1970. Murder accounted for one-tenth of one percent of all Index offenses reported in 1974. In 1974, there were 6.5 victims per 100,000 inhabitants, a 12 percent decrease when compared to 1973. This is the first year a decrease in murders has been reported.

MURDER ANALYSIS

In all cases of murder reported under the System, a supplementary report is submitted by the reporting law enforcement agency. Pertinent information including age, sex and race of the victim, weapon used to commit the offense, and circumstances or motive which led to the crime, is among the data collected. Place of occurrence, relationship of victim to perpetrator, and day of week are also included.

The supplementary data used in the analysis of reported murders is limited to the "known" facts of the case. It is understandable that unsolved murders, in most cases, prevent complete data availability for murder analysis.

The frequency of murder during 1974 was highest in the month of October, when 53 murders occurred. Murder by day of week again disclosed Saturday to be the highest day, when 90 murders occurred.

In 1974, the male murder victims accounted for 73 percent of the total murder victims. Victim analysis by race disclosed that 52 percent were Negro and 48 percent were White. Analysis by age revealed that the 20-29 age group contained 25 percent of the total murder victims.

In the area of "known" perpetrators, the adult male-female ratio of involvement disclosed that adult males were identified as the perpetrators in 83 percent of all the murders solved, and the adult female in 9 percent of the murders. The remaining solved murder cases were perpetrated by juvenile males and females, 7 percent and less than 1 percent respectively.

During 1974, firearms were used in 46 percent of the murders reported in which the weapon was identified, the lowest firearm involvement in six years. Within the firearm category, handguns were the most predominant weapon used, an 81 percent involvement, up from the 78 percent recorded in 1973. Cutting or stabbing weapons represented a 33 percent involvement in murders. Personal weapons, such as hands, fists and feet were used in 10 percent of the

cases, and the remaining 11 percent being attributed to the use of other weapons, such as clubs, hammers, poison, arson, etc.

Analysis of murder by location discloses that 46 percent of the murders occurred in private residences. A decrease when compared to 1973. In many cases police are powerless to prevent this type of murder, which is made apparent by the type of circumstance or motive involved. Most murders, 80 percent, were committed by relatives or other persons acquainted with the victim. Further analysis revealed that 20 percent of the murders were perpetrated by a member of the immediate family group, and more specifically, 11 percent of the murders involved spouse killing spouse. Although most murders occur in residences, 33 percent of all the murders reported did occur on the highways or streets of our state, and 6 percent took place in bars.

The circumstances or motives for committing murder were derived from cases where this category of information is "known" and made available for analysis. "Felony" murders are defined under the program as those killings which are perpetrated during the commission of another crime. They are classified as robberies, sex crimes, gangland slayings, arson and other felonious activities. This type of circumstance or motive accounted for 35 percent of the murders where the motive was known. Robbery accounted for 24 percent of all known murder circumstances, an increase from 1973, and the highest ever recorded.

Altercations or quarrels between the victim and perpetrator, including lovers quarrels, money quarrels, drinking quarrels, etc., accounted for 57 percent of all known murder circumstances reported in 1974.

CLEARANCES

The police of New Jersey were successful in clearing or solving 76 percent of the murders reported in 1974, a 5 percent increase from 1973. The high solution rate, as compared to other Index offenses, becomes evident when the circumstances of this heinous type crime are considered, and this high clearance rate is shared by police universally.

Those murders solved by arrest of persons under 18 years of age amounted to 10 percent of all the cases solved, a 37 percent increase over 1973, and the highest ever recorded.

FORCIBLE RAPE

Forcible rape is defined as the carnal knowledge of a female forcibly and against her will. All assaults and attempts to rape are counted, but carnal abuse, rape without force (statutory rape) and other sex offenses are not included.

MURDER VICTIMS BY AGE, SEX AND RACE, 1974

MURDER VICTIMS
TYPE OF WEAPONS USED
1974

VOLUME AND RATE

The police of New Jersey received reports of 1,438 rapes during 1974, numerically the volume increased by 54 over 1973. This volume increase reflects a 4 percent increase, 1973 to 1974. In the past five years rape has increased by 55 percent. Rape accounted for four-tenths of one percent of the total Crime Index and 5 percent of all violent crimes in 1974.

A crime rate equates the number of crimes per unit of population, and in its proper perspective, is a victim risk rate. In 1974, 19 out of every 100,000 persons in this state were reported forcible rape victims. The availability of the 1970 census population data allows for the calculation of a forcible rape rate based on the female population alone. For every 100,000 females in New Jersey, 39 were reported victims of this violent crime. The risk of becoming a victim of this crime has increased 49 percent since 1970.

ANALYSIS OF RAPE

The highest incidence of rape during the year was recorded for the month of July, with August the second highest monthly volume, 166 and 156 respectively.

Forcible rapes accounted for 73 percent of the total rape offenses reported, while the remaining 27 percent were attempts or assaults to rape. The victims of this violent crime, in many cases, are hesitant in reporting the offense to police due to the fear and/or embarrassment of the victims when the possibility of a court appearance confronts them, or the effect it may have on their reputation when the facts become known. Additionally, there is difficulty in establishing the act of force when there is the presence of a prior relationship between the victim and perpetrator. Due to the usual clandestine nature of this offense, it occurs most often out of reach of police patrols. The offense of forcible rape, because of the above factors, is probably the most underreported crime within the Crime Index. However, crime counts in this publication must be limited to the actual offenses established by police investigation.

CLEARANCES

During 1974, 57 percent of all forcible rapes reported were solved. Persons under 18 years of age accounted for 13 percent of all rape cases solved.

ROBBERY

Robbery is defined as the felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. The element of personal confrontation is always present in this crime. Under the program, all assaults or attempts to rob are included. Effective January 1, 1974, the robbery subheadings were changed from armed and strong arm, to robbery by firearm, knife or cutting instrument, other dangerous weapon and strong arm (hands, fists, feet, etc.). For comparative purposes, all prior year analyses will deal with the armed and strong arm categories.

VOLUME AND RATE

During the calendar year 1974, there were 15,879 robberies reported by the police of the state. When compared to the 15,113 robbery offenses reported in 1973, an increase of 5 percent evolves. These reported robberies for 1974, make up 5 percent of the total Crime Index for New Jersey.

The rate of robbery in 1974 increased 5 percent from 1973, with 214 victims for every 100,000 persons in the state. A 26 percent increase in reported robbery offenses is disclosed for the period 1970 thru 1974.

ANALYSIS OF ROBBERY

Supplementary information, which reveals the nature of robbery, is collected under the program in order to gain further insight regarding this violent crime. Identification of the most frequent "targets" for robbery is accomplished by classification of the type of location where the crime was perpetrated and whether or not the offender was armed.

The armed robber was responsible for 57 percent of all robberies committed during 1974, with the remaining percentage of offenses attributed to the unarmed confrontation of the victim by the perpetrator where tactics such as mugging were employed.

The month of December recorded the highest month for robbery offenses, when 1,940 were reported by police in the state. A total of 1,578 robberies occurred in November and 1,413 in October.

Street robberies accounted for 59 percent of all robbery offenses reported during 1974, no change over 1973. Robberies of business establishments other than gas stations, chain stores and banks, accounted for 13 percent of the total robberies reported. Robberies of persons in their home recorded a 12 percent involvement, up from the 11 percent recorded in 1973. Chain store robberies continue to increase, and disclosed a 5 percent involvement in total robberies reported. Robberies of gas stations continue to decrease, and recorded the lowest involvement since 1967, at less than 3 percent. Bank robberies recorded less than one percent involvement in total robberies reported.

The total value of property loss resulting from robberies reported during 1974 amounted to almost \$7 million, averaging out to a loss of \$431 per victim. Street or highway robberies reflected the highest category for total property value, a loss of \$2 million. Bank robberies, the lowest rate of incidence, reflected the highest average loss, \$13,435.

The impact of this violent crime on the victim cannot be measured in terms of money or property value alone, as it has been stated previously in the murder section of this publication, robbery was the motive for 24 percent of all murders committed in 1974. Numerically, there were 86 persons murdered as a result of robbery in 1974, and in the past five years a total of 341 persons were murdered for the purpose of robbery. The 86 robbery victims murdered is the highest ever recorded.

ROBBERY
PERCENT DISTRIBUTION BY LOCATION
1974

CLEARANCES

The police of New Jersey were successful in solving 24 percent of all robbery offenses reported to them in 1974. Persons under 18 years of age accounted for 22 percent of all the solved robbery cases, an increase from the 21 percent rate of 1973.

ATROCIOUS ASSAULT

Atrocious Assault, as defined under the New Jersey Uniform Crime Reporting System, is an attempt or offer, with unlawful force or violence, to do serious physical injury to another. Attempts are included since it is not necessary that any injury result when a gun, knife or other weapon is used, which would result in serious personal injury if the crime were successfully completed.

VOLUME AND RATE

A total of 11,763 atrocious assaults were reported to the police of the state in 1974, a 1 percent increase when compared to 1973. This crime against the person made up 3 percent of the Crime Index.

In 1974, 159 persons out of every 100,000 in New Jersey were victims of atrocious assaults. This figure represents an increase of less than 1 percent over 1973, and a 60 percent increase over the past five years. August recorded the highest month, at 1,158.

WEAPON ANALYSIS IN ATROCIOUS ASSAULT

The use or attempted use of a dangerous weapon in an assault, or the serious injury inflicted by hands, fists or feet separates this Index offense from those assaults categorized as "simple" and not atrocious in nature. The victim of an actual assault of this type may suffer serious injury or permanent disability. All assaults to kill and attempts to kill are also included in this area.

Knives or other cutting instruments were determined to be the most frequently used weapons in atrocious assaults during 1974. These weapons accounted for 33 percent of the total atrocious assaults reported. Personal weapons, such as hands, fists, and feet accounted for 26 percent of all atrocious assaults, and blunt objects or other dangerous types of weapons, a 26 percent involvement. Firearms were used as a weapon in 16 percent of all atrocious assaults reported in 1974, the lowest firearm involvement recorded in the past six years.

CLEARANCES

Solutions for atrocious assaults were made in 69 percent of all cases reported in 1974, an increase from the 68 percent reported in 1973. This relatively high clearance rate follows that of other crimes against the person. Offenses solved by the arrest of persons under 18 years of age accounted for 13 percent of the total cases solved, with the remaining 87 percent involving adults 18 years of age and over.

BREAKING AND ENTERING

Under this program, breaking and entering is defined as an unlawful entry or attempted forcible entry of any structure to commit a felony or larceny. Data collection for this offense is further categorized as to forcible entries, unlawful entries (where no force is used) and attempted forcible entries.

VOLUME AND RATE

A total of 104,908 breaking and enterings were reported by New Jersey law enforcement agencies during 1974, an increase of 14 percent over 1973. This offense contributes 30 percent to the overall offense counts for the year.

The 1974 crime rate for breaking and entering was 1,415 victims for each 100,000 inhabitants of the state. This victim rate increased 14 percent over 1973, and 36 percent since 1970.

ANALYSIS OF BREAKING AND ENTERING

The month of December reflected the highest month of offense frequency, with November recording the second highest volume for an individual month.

Forcible entry was evident in 79 percent of all reported breaking and enterings in 1974, while 11 percent were cases of unlawful entry where no force was used, and the remaining 10 percent were attempts to forcibly enter. There has been no significant change over the past six years.

In 59 out of every 100 offenses, a residence was the target of the perpetrator. The remaining 41 percent were targets of a nonresidential nature. Daytime breaking and enterings accounted for 53 percent of the "resident" crimes reported, when the time of occurrence could be determined. It was also determined that 86 percent of the nonresidential offenses occurred at night, when business volume is at a low.

During the year 1974, victims of breaking and enterings suffered an economic loss of almost \$45 million. The average dollar loss was reported at \$432 per offense. Breaking and enterings of residences accounted for \$28 million, with the remaining \$17 million loss attributed to nonresidences or commercial targets.

CLEARANCES

The volume of this offense presents the police with a serious enforcement problem which is made more difficult in some jurisdictions by the lack of sufficient personnel to act as a deterrent, or even to properly investigate and thus provide successful solutions to these crimes.

The police of New Jersey were successful in solving 14 percent of all breaking and entering offenses reported during 1974, an increase when compared to 1973. Juveniles were involved in 43 percent of all such case solutions.

LARCENY - THEFT

The definition of larceny-theft, as provided under this program, is the taking of the property of another with intent to deprive him of ownership. All larcenies and thefts resulting from pocket-picking, purse-snatching, shoplifting, larcenies from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., are included here. Embezzlement, unlawful conversions, larceny by bailee, frauds or bad check cases are not included.

VOLUME AND RATE

There were 175,569 larcenies reported during the year 1974. This amount represents an increase of 7 percent over 1973, and a 45 percent increase since 1970. This offense made up 50 percent of the total Crime Index, an increase over the 46 percent recorded in 1973.

The larceny crime rate for 1974 increased to 2,368 offenses per 100,000 population, a percentage increase of 27 percent over 1973, and an increase of 40 percent since 1970.

ANALYSIS OF LARCENY-THEFT

As in the last seven years, offense frequencies were highest in the summer months of June, July and August, with August the individual high month.

The following analyses considers all larcenies, regardless as to the value. All types of larcenies identified in this section will differ in volume, depending upon the opportunity for theft offered in a given area.

The identification of larceny by type has disclosed that larcenies from motor vehicles and larcenies of motor vehicle parts and accessories, as a group, represented 32 percent of the total larcenies reported in 1974. When motor vehicle theft is added to this "motor vehicle" group, it is noted that 28 percent of all offenses within the Crime Index involve motor vehicles.

When considering individual "types" of larceny, the greatest percentage was found to be in stolen bicycles, a 22 percent involvement, and the highest ever recorded. Larceny from buildings accounted for 17 percent of all larcenies reported. This type of larceny occurs out of the reach of police patrols, and is not affected by proper deployment of patrols as a deterring factor. Thefts from motor vehicles, which is usually from inside the vehicle, accounted for 19 percent of the total larcenies reported.

Victims of larcenies suffered a total dollar loss of \$30.3 million. The average value of goods and property stolen from these victims was \$173.

Larceny from buildings recorded the highest dollar loss to its victims, a total of \$9.1 million, representing a \$309 average loss to each victim.

CLEARANCES

Larceny offenses solved by police are affected by the nature of the crime. The lack of witnesses and the volume of these crimes which are sometimes described as "sneak thievery" or "unobserved thefts," add to the difficulties encountered by law enforcement.

In 1974, 16 percent of the larcenies reported to police were solved. Those larceny offenses cleared by the arrest of persons under 18 years of age accounted for 40 percent of the total cases cleared.

MOTOR VEHICLE THEFT

In Uniform Crime Reporting, Motor Vehicle theft includes all thefts and attempted thefts of a motor vehicle. This includes all vehicles which can be registered as a motor vehicle in this state. This definition excludes taking a motor vehicle for temporary use, such as a family situation, or unauthorized use by others having lawful access to the vehicle. Effective January 1, 1974, the motor vehicle theft category was expanded to include the subheadings of autos, trucks and buses and other vehicles. Only total motor vehicle theft statistics are available for prior year analyses.

VOLUME AND RATE

In 1974, a total of 40,096 motor vehicles were reported stolen to the police of New Jersey, a decrease of 4 percent since 1973. Motor vehicle theft makes up 12 percent of the total Index offenses. Autos made up 92 percent of all motor vehicles stolen, trucks and buses 4 percent and other type vehicles made up 4 percent of all motor vehicles stolen in 1974.

The rate for auto theft decreased from 565 in 1973 to 541 victims per 100,000 population in 1974. This represents a rate decrease of 4 percent, and the second consecutive year a decrease has occurred.

ANALYSIS OF MOTOR VEHICLE THEFT

The crime of motor vehicle theft has been documented primarily as a crime of opportunity. In most cases, it's the youthful offender who finds the automobile easily accessible for his immediate transportation needs and usually the vehicle is ready to drive away or the ignition is easily compromised. A prior study conducted under the Uniform Crime Reporting Program, disclosed that in 2,352 motor vehicle theft cases studied during the month of August 1969, 46 percent of the vehicles were left unlocked, and 17 percent of all the victims left the keys in the vehicle.

The highest incidence of auto theft during the year was recorded for the month of July, with December recording the second highest monthly volume, 3,641 and 3,596 respectively.

In 1974, stolen motor vehicle values reached \$54 million, and represented 40 percent of the value of all property stolen during the year. The average value of a stolen vehicle was \$1,344 at the time of the theft, and although police recovered 69 percent of the value of all stolen vehicles, the remaining unrecovered portion represents a loss of \$17 million to the victims. This loss figure does not take into account the monetary loss resulting from damage to the vehicle, property and persons which are a direct result of motor vehicle theft crimes.

The recovery of a vehicle does not clear or solve the offense, but the owner does benefit by the return of his vehicle. In 1974, 74 percent of the vehicles stolen were

**LARCENY (EXCEPT MOTOR VEHICLE THEFT)
1974**

CLASSIFICATION	NUMBER OF OFFENSES	PERCENT DISTRIBUTION	TOTAL VALUE	AVERAGE VALUE

TOTAL FOR NEW JERSEY	175,569	100.0	\$30,293,504	\$173

NJSP Table 10

recovered by police. This relatively high rate of recovery can be attributed to the fact that most vehicles are stolen for the purpose of transportation. However, in following the trend over the past seven years, it was noted that the percentage of vehicles being recovered has diminished considerably from the 83 percent recovery rate reported in 1967.

As previously mentioned, the analysis of motor vehicle theft alone does not completely measure the special problem caused by the availability of the motor vehicle as a target for larceny of motor vehicle parts and accessories and larcenies from motor vehicles (from inside the vehicle). New Jersey, although 46th in physical size, is ranked about 8th nationally in total motor vehicles registration, add to this the hundreds of thousands of motor vehicles which annually enter New Jersey from other states, then a true picture of motor vehicle volumes in the state emerges. During 1974 a total of 96,571 offenses involving motor vehicles were reported to police, this represented a loss of \$62.6 million to the victims.

CLEARANCES

Law enforcement agencies of New Jersey were successful in solving only 10 percent of all motor vehicle thefts reported to them during the year. This solution rate, the lowest of all Index offenses, reveals an increase over the 9 percent reported in 1973.

Many factors contribute to this low 10 percent solution or clearance rate. One is the high degree of mobility present in this offense, which is pointed out by the fact that 39 percent of the recovered vehicles were located in other jurisdictions. Another is the carelessness of the vehicle operator, when the perpetrator merely opens the door of a vehicle, with the keys already in the ignition, and drives it away. To a potential witness, this appears to be a normal act, thereby adding to the difficulties encountered in police detection and apprehension.

In 1974, 37 percent of the motor vehicle theft cases cleared involved a person under the age of 18. However, this degree of juvenile involvement is the lowest since 1967.

STATE ARREST DATA 1974

STATE ARREST DATA

Under the Uniform Crime Reporting Program, an arrest is counted each time a person is taken into custody, notified or cited. The number of charges placed against a person at the time of the arrest is not considered in the count. The same person may be arrested several times during the year for similar offenses, as in cases of drunkenness or other disorderly conduct charges, and is counted each time he is arrested.

Arrest practices and emphasis do vary from place to place and within a municipality from time to time. For example, the volume of police arrests for certain unlawful conduct such as drunkenness or loitering violations is particularly influenced by this irregularity in arrest practices. On the other hand, murder, robbery and other arrests for serious crimes are more likely the result of standard procedures. In either case, arrests are used as a measure of law enforcement activity, and within certain limitations it can gauge criminality.

When a person under 18 years of age commits an offense and the circumstances are such that if the offender were an adult an arrest would be made, then the arrest is counted. It must be remembered that arrest counts do not reflect the specific number of persons arrested since one person may be arrested several times during the year.

PERSONS ARRESTED

During 1974, law enforcement officers of the state reported a total of 329,250 arrests for all criminal acts, a 10 percent increase over 1973. When related to 1974 population estimates for New Jersey, there were 45 arrests for every 1,000 persons, up from the 40 per 1,000 rate reported in 1973.

Those persons arrested for serious Crime Index offenses during the year, made up 21 percent of the total arrest figure, the arrest of persons under 18 years of age accounted for 50 percent of the arrests of this type.

The juvenile arrest involvement was, as in prior years, greater in the nonviolent crime categories of breaking and entering, larceny and motor vehicle theft, where such juvenile arrests represented 56 percent of that group's arrest total. As in the past, 8 of every 10 persons arrested for violent crimes (murder, rape, robbery and atrocious assault) were adults.

ARREST TRENDS

Increases in arrest activity by police, were noted in many of the crime categories during the year. As stated previously, a total rise of 10 percent in arrests for all criminal acts was recorded for the period 1973 through 1974. Arrests for Index offenses increased 22 percent during the same period. Within the Index, arrests for violent crime rose 5 percent, and nonviolent crime arrests were up 27 percent.

Arrest increases within individual Index offenses were recorded for larceny, up 30 percent, breaking and entering up 25 percent, rape increasing 10 percent, robbery increasing 9 percent, motor vehicle theft up 6 percent and atrocious assault arrests up 2 percent over 1973. Murder

experienced the only decrease in Index offense arrests, down 7 percent.

A review of some other relatively high percent increases in individual arrest categories, which are specific in title, disclosed a 26 percent increase in arrests for malicious mischief and a 23 percent increase in embezzlement arrests. Significant increases in arrests for arson and forgery and counterfeiting were also experienced, each increased 17 percent over 1973.

ARREST ANALYSIS BY AGE

During 1974, adult arrests rose 8 percent, while juvenile arrests increased 14 percent. For the five year period 1970-1974, arrests for all criminal acts increased 31 percent. During this same period, adult arrests increased 28 percent, and juvenile arrests increased 37 percent.

Adult arrests for the violent crimes of murder, rape, robbery and atrocious assault, increased only 2 percent since 1973. Juvenile arrests for the same violent crimes increased by 13 percent. When comparing the last five year period it was noted that juvenile arrests for violent crimes were up 51 percent, while adult arrests were up 46 percent.

Adult arrests for the nonviolent crimes of breaking and entering, larceny and motor vehicle theft increased 26 percent, while juvenile arrests for the same group of nonviolent crimes increased 28 percent. The five year period 1970-1974 disclosed that adult arrests increased 52 percent, and juvenile arrests increased 47 percent for the nonviolent crime offense grouping.

The arrest involvement of young age groups for 1974 disclosed that 14 percent of all persons arrested were under the age of 15. Persons under the age of 18 accounted for 37 percent of all persons arrested, with persons under 21 years of age accounting for 54 percent of all arrests. As a further indication regarding the degree of serious crime involvement of juveniles, it was noted that 3 of every 10 persons arrested for robbery were under 18. Almost 6 of every 10 persons arrested for breaking and entering were in this young age group. This high juvenile involvement was also disclosed in motor vehicle theft arrests, almost 7 of every 10, and larceny arrests, 5 of every 10 persons arrested were under the age of 18.

Persons under 21 years of age accounted for 60 percent of the total arrests for Narcotic Drug Law violations, a decrease from the 61 percent involvement recorded in 1973. A further breakdown disclosed that 33 percent were in the age bracket 18 through 20 years of age, while 15 percent were 16 years of age or under. Additional analysis of the young persons 17 through 21 years of age, disclosed that these young persons in their last year of high school or of college age, contributed 52 percent to the total arrests for Narcotic Drug Law violations in 1974. An increase over the 45 percent involvement recorded in 1973. As a part of the young persons involvement in drug offenses, it was interesting to note that 94 percent were under the age of 30.

A matter for serious concern is the criminal arrest involvement of the young age groups, however, the adults still record the highest involvement in the total arrest

picture. Arrest of those persons 18 years of age and over represented 63 percent of all arrests reported in 1974. Adult arrests for violent crimes comprised 76 percent of that group's total arrest figure, which includes arrests for murder, rape, robbery and atrocious assault.

ARREST ANALYSIS BY SEX

During 1974, analysis of arrests by sex revealed that 85 percent of all persons arrested were male, no change since 1971.

Although female arrests represent only 15 percent of the total arrest picture, since 1970 they have increased 38 percent, while male arrests have increased 30 percent for the same period. A review of the period 1973-1974, disclosed an 11 percent increase in male arrests, and only a 9 percent increase in female arrests.

The arrests for violent crimes disclosed that females accounted for 9 percent of the total arrests. This includes a 12 percent involvement in murder and a 13 percent involvement in atrocious assault arrests during 1974. In the nonviolent or property crime category, arrest of females accounted for 17 percent of the total arrests recorded. Within this nonviolent group, female arrests for larceny recorded the largest involvement at 26 percent.

Female arrests for Narcotic Drug Law violations accounted for only 14 percent of the 1974 arrest total for that offense. Male arrests for the same offense increased 10 percent, and female arrests increased 5 percent when compared to 1973.

During 1974, other specific arrest categories were analyzed and it was learned that male arrests for Driving Under the Influence increased 5 percent, with female arrests up 20 percent, 1974 over 1973. Female arrests for weapons violations increased 17 percent, while male arrests increased 14 percent for the same period. Breaking and entering arrests disclosed that female arrests increased 36 percent, and male arrests for the same violation rose 25 percent during the year 1974.

ARREST ANALYSIS BY RACE

In 1974, an analysis by race of those persons arrested for all criminal acts during the year, disclosed that 69 percent were White, 30 percent were Negro and the remaining 1 percent were of other races. The arrest involvement by race for the Crime Index offenses revealed that 57 percent of all those arrested were White, 42 percent were Negro, the remaining 1 percent being of other races.

Arrests for violent crimes within the Index (murder, rape, robbery and atrocious assault) reflect that 60 percent were Negro, 38 percent White and the remaining 2 percent distributed among other races. Since 1971, the involvement of Whites in violent crimes has increased from 31 percent to the 38 percent recorded in 1974.

During 1974, arrests for nonviolent crimes of breaking and entering, larceny and motor vehicle theft, disclosed that by race, 62 percent were White, 37 percent Negro and the remaining 1 percent being distributed among other races.

NJSP Table 36

OFFENSES BY POPULATION GROUPS

The presentation of crime statistics by population groups was made for the purpose of projecting, for consideration, the relative crime experience of communities of varying populations. Although the individual municipalities within the various groups may be geographically separated, their inclusion into a specific group was predicted by the similarity in population with the other municipalities within the group. Municipalities within the

same group may differ widely when all factors are considered, but they do share the common bond of population size. The grouping of communities in this manner allows recognition of variances in the crime volumes, rates and clearances between the established groups.

Set forth below are the established municipal groupings as used in this section:

GROUP I

7 Municipalities over 100,000
Total population—1,221,080

GROUP II

17 Municipalities 50,000 to 100,000
Total population—1,046,490

GROUP III

40 Municipalities 25,000 to 50,000
Total population—1,454,910

GROUP IV

64 Municipalities 15,000 to 25,000
Total population—1,212,145

GROUP V

202 Municipalities 5,000 to 15,000
Total population—1,889,820

GROUP VI

140 Municipalities 2,000 to 5,000
Total population—475,695

GROUP VII

97 Municipalities under 2,000
Total population—113,540

MUNICIPAL OFFENSE DATA

The 1974 offense data provided in this section is shown as it relates to the incorporated New Jersey municipality in which the offense occurred and is based on the individual contribution of crime statistics by the respective police jurisdictions of the state.

The isolation of offenses by place of occurrence, as shown in the table, makes possible the projection of a more accurate statistical picture of the individual community's crime experience. Additionally, this approach has provided a sound base for offense computation and analysis by county, region, character, population group and state. This application has been made, in varying forms, in all of the preceding offense information shown.

The statistical tables which follow offer numerical

counts of all Index offenses reported during 1974, also a "Crime Index Total" column, which is used to compute the crime rate of a municipality, has been included. A Crime Index consists of murder, rape, robbery, atrocious assault, breaking and entering, larceny and motor vehicle theft. A crime rate column has also been included. Crime rates relate the incidence of crime to the resident population. For comparative purposes, all crime rates are based on population units of 100,000, and are calculated by dividing the current population into the Crime Index. In addition, columns for violent and nonviolent crime rates have been added for the purpose of identifying more specifically the crime experience of a given municipality.

OFFENSES BY MUNICIPALITY

NJSP Table 38

POLICE EMPLOYEE DATA

The Uniform Crime Reporting Program of New Jersey incorporates the collection of pertinent data relating to the police of the state. Information regarding police employee strength, distributions, assaults against law enforcement officers and circumstances surrounding the killings of police officers are discussed in this section.

Individual listings of full-time state, county and municipal police departments of the state are shown in tables succeeding the narrative portion of this section.

The determination of police strength for any given area or municipality should be a subject for serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. Some of these factors, discussed elsewhere in this publication, relate to size, density of population, geographic location, character, and proximity to metropolitan areas. The tables and charts shown in this section relate to reported police employee strength and should not be interpreted as recommended strength for any given municipality. Such determinations should be made after objectively evaluating the individual need for police services based on the above factors.

TOTAL POLICE EMPLOYEES

During 1974, there were 28,483 persons employed full-time by all police agencies in New Jersey. This number represents a 7 percent increase over 1973. Male employees accounted for 88 percent of the total police employee strength in 1974.

In 1974, there were 6,096 civilian police employees in the state, representing an 8 percent increase when compared to 1973. Female employees accounted for 52 percent of the total civilian police employee strength in the state.

A total of 22,387 police officers were employed in the state during 1974, a 6 percent increase over 1973. Only 299 of the 22,387 police officers were females. In addition, the full-time police agencies in the state reported employing 2,887 part-time police officers during the year 1974.

MUNICIPAL POLICE EMPLOYEES

In 1974, the number of municipal police employees in New Jersey (including civilian personnel) increased to 19,046 from the 18,041 reported in 1973, and increase of 6 percent. Individual county volumes for municipal police employees in 1974, disclosed an extensive range of increases when compared to 1973. Salem County experienced the largest percentage increase, up 20 percent, while Hudson County increased only 2 percent over 1973. Camden County reported the largest volume increase, an additional 120 police employees for 1974.

MUNICIPAL POLICE EMPLOYEE RATES

The number of municipal police employees (including civilian personnel) for every 1,000 inhabitants of New

Jersey, was reported at 2.6 per 1,000 during the year 1974. An 8 percent increase over 1973, and a 13 percent increase since 1970; a relatively small increase when considering the rise in the criminal and noncriminal demands placed upon the police of New Jersey today.

During 1974, the populous Northeast Region recorded the highest rate, at 2.7 police employees per 1,000 inhabitants. Within this region, Essex and Hudson Counties were high with identical police employee rates, 3.6 per 1,000 population. The Southeast Region was second with 2.6 police employees per 1,000 inhabitants. The Southwest Region reported 2.2 police employees per 1,000 population during the year 1974. The rural Northwest Region recorded 1.1 employees per 1,000 population, the lowest of the four regions.

MUNICIPAL CIVILIAN EMPLOYEES

The personnel of each department differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. This current upward trend in employing civilians in police departments to perform clerical duties, is in line with the thinking of many police administrators who recommend the use of civilians in this capacity, thus freeing the sworn personnel for actual police related services.

In 1974, 11 percent of all police employees were civilians. Within regions, the percentage of civilian municipal police employees varied from 18 percent in the Southwest Region to 9 percent in the Northeast Region.

MUNICIPAL POLICE OFFICERS

The number of full-time municipal police officers in New Jersey was recorded at 16,940, a 5 percent increase over the 16,068 reported in 1973.

In 1974, the number of full-time municipal police officers for each 1,000 persons of the state was recorded at 2.3, a 5 percent increase over 1973. Since 1970, the police officer rate per 1,000 inhabitants has increased only 15 percent.

Regionally, the number of full-time municipal police officers ranged from 1.0 in the Northwest Region to the 2.5 per 1,000 in the Northeast Region. Individual county rates ranged from the 0.9 in Warren and Hunterdon Counties to the 3.8 per 1,000 permanent inhabitants for Cape May County.

The police employee rates per 1,000 population presented here should not be construed as being recommended ratios. The determination of police strength for any municipality or jurisdiction should be based on the numerous factors which create the need for police services. These factors, as crime, vary in type and degree from place to place. Some examples are seasonal populations, geographic location, density and composition of the population.

COUNTY POLICE, SHERIFFS AND PROSECUTORS

The functions of county law enforcement officers vary widely throughout the state. The operation of one sheriff's department may be limited exclusively to civil areas and the administration of the county jail, or they may be actively involved in criminal matters throughout the county. County police departments are varied in their activities as well, in that some are responsible for enforcement throughout the county while others may have as their primary mission the policing of county parklands. The responsibilities of county prosecutor's officers include criminal investigations, trial preparation, court presentation and special probes. Because of the difference in the types of police service rendered, rates for county law enforcement agencies are not presented here.

The various county law enforcement agencies of the state employed a total of 4,265 full-time police employees during the year 1974. This figure represents a 14 percent increase over 1973.

The full-time civilian employees accounted for 25 percent of the total police employees reported by county law enforcement agencies during 1974. The remaining 75 percent were sworn personnel.

STATE POLICE

The New Jersey State Police is empowered to provide all phases of law enforcement throughout the state. It also renders police services, upon request, to all the law enforcement agencies in the state. No rates are used due to the variations in the nature and extent of the police services performed by the State Police.

The Division of State Police employed a total of 2,448 persons during the year 1974. Of these, 31 percent or 757 were civilians, with the remaining 1,691 being sworn personnel. The total number of State Police employees increased 8 percent. Included in this increase was a rise of 18 percent in civilian personnel, and a 4 percent increase in sworn personnel.

OTHER POLICE (State Agencies)

In 1974, there were eight state agencies (excluding State Police) with law enforcement responsibilities, who reported police employee data to the System. Together these agencies reported a total of 2,724 full-time police employees. Included in this total are 2,160 civilians and 564 sworn personnel.

No rates are computed here, due to the variations in the types of police services rendered and their statewide jurisdiction.

POLICE KILLED AND ASSAULTED

The killing or assault of a police officer has an effect on society which reaches far beyond the overt act. Such occurrences constitute an immediate threat to the wellbeing of the community and a serious breach of the internal security of the country. Today a young man who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society he is sworn to protect. This deplorable situation should be a subject of serious public

concern for, in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers acting in the line of duty is clearly demonstrated by the following information.

POLICE KILLED

In 1974, one New Jersey police officer lost his life as a result of a criminal action directed against him.

The analysis of the officer killed in the line of duty revealed that he was slain while questioning an individual during a narcotic investigation. The perpetrator was also killed. A handgun was identified as the murder weapon.

During the last five years, there have been 13 police officers killed in the line of duty in New Jersey. Specifically, there were 3 killed in 1970; 4 in 1971; 1 in 1972; 4 in 1973 and 1 in 1974.

ASSAULTS ON POLICE OFFICERS

During 1974, there were 3,375 police officers assaulted in New Jersey. This figure represents police assaults reported by all police agencies of the state. When compared to 1973, a 10 percent increase is disclosed. The five year period 1970-1974 disclosed a 52 percent increase.

No police assault rates are computed for total police officers assaulted, because of the broad field of services performed by many state and county police agencies.

ASSAULTS ON MUNICIPAL POLICE OFFICERS

Municipal police officers of the state were the victims of 3,178 cases of assault during the year 1974, an 11 percent increase over such cases reported for the year 1973. Since 1970, assaults on municipal police officers have increased 50 percent.

While every police officer who is assaulted does not suffer personal injury, 33 percent of those assaulted during 1974 did sustain physical injury to one degree or another. The assaults resulting in physical injury to the officer are frequently followed by loss of duty time by the officer.

The 1974 rate of municipal police assaulted in the state was computed at 18.8 assaults for every 100 municipal police officers, a 6 percent increase over 1973. Since 1970, the police assault rate has increased 27 percent. Assault and injury rates are shown by population groups in table form for the purpose of projecting the comparative assault experience of police in communities of varying populations.

OTHER POLICE OFFICERS ASSAULTED

The following state and county law enforcement agencies are dealt with separately, and are not included when computing municipal assault rates. The services performed, in most cases by these agencies, vary greatly from the functions of municipal police agencies, thus requiring their separation.

County police officers, which includes county police, county park police, sheriff's and prosecutor's offices, reported a total of 142 sworn personnel assaulted during the year 1974. A total of 61 officers received some type of injury as a result of the attack on their person.

**STATE OF NEW JERSEY
FULL TIME POLICE EMPLOYEES – 1974**

DEPARTMENT	OFFICERS	CIVILIANS	TOTAL POLICE EMPLOYEES
MUNICIPAL POLICE	16,940	2,106	19,046
COUNTY POLICE	3,192	1,073	4,265
STATE POLICE	1,691	757	2,448
OTHER POLICE (State Agencies)	564	2,160	2,724
TOTAL FOR THE STATE	22,387	6,096	28,483

The New Jersey State Police reported a total of 48 troopers assaulted during the year 1974, of these, 15 received physical injury.

Other state agencies with police powers, reported a total of 7 sworn personnel being assaulted during the year; of these, 1 received physical injury.

ADDITIONAL ANALYSIS

The following analyses deals with weapons used against police officers, type of service being performed when assaulted, times of assaults and police assault cases solved.

WEAPONS USED

In 1974, personal weapons, such as hands, fists and feet were used in 88 percent of all assaults on police officers in the state. Other dangerous weapons, such as clubs, bricks, jack handles, etc., were used in 7 percent of all cases of police assault. Knives reflected a 2 percent involvement, and firearms a 2 percent involvement. The five year period 1970-1974 has disclosed very little change in the weapon usage.

TYPE OF ACTIVITY

The police services performed by law enforcement agencies vary widely in both criminal and noncriminal activities. The services performed are governed by the nature of the demands for this service. Analysis by the type of service being rendered when the police officer was assaulted, provides an indication as to the degree of jeopardy a police officer is placed when responding to a given situation.

During 1974, those police officers responding to disturbance calls, which includes family disputes and tavern disorders, again accounted for most of the police officer assault situations. Almost 29 percent of all police assault cases fell into this category. Police officers attempting to effect an arrest accounted for 22 percent of the assaults in 1974. The police officers assaulted who were engaged in the

investigation of suspicious persons accounted for 10 percent of the total assaults. Officers assaulted while stopping a vehicle for a traffic violation contributed 11 percent to the total police assault problem. The police officers assaulted who were transporting prisoners disclosed a 11 percent involvement in the total police assault picture.

TIME OF POLICE ASSAULTS

The analysis of police officers assaulted by time of day disclosed very little change over 1973. The four hour period 8:00 p.m. to midnight accounted for 34 percent of the assaults on police officers in 1974. The assaults during this four hour period were divided almost evenly between the two hour periods of 8:00 p.m. to 10:00 p.m. and 10:00 p.m. to midnight. The six hour period 8:00 p.m. to 2:00 a.m. accounted for 49 percent of the police assault cases, with the eight hour period 8:00 p.m. to 4:00 a.m. accounting for 61 percent of the assaults on police in 1974. Additional time periods of assaults are shown in a chart following this section.

CLEARANCES AND ARRESTS

The police of New Jersey were successful in clearing by arrest, 98 percent of the assaults directed against them. Assaults against officers attempting to perform their duty would tend to indicate the disrespectful attitude of the perpetrators involved, even though almost immediate apprehension exists.

Although an assault upon a police officer is a high misdemeanor in New Jersey, police charged only 41 percent of the persons arrested with this serious crime. The remainder were charged under the less severe misdemeanor or nonindictable section of the law. A little over 9 percent were determined to be juveniles. Numerically, those arrested for the indictable offense numbered 1,350, those persons charged with the nonindictable offense reached 1,627 and the juveniles arrested for assaulting police officers totaled 297.

PERSONS CHARGED

The disposition made of those persons arrested and formally charged in a court of jurisdiction is of great interest to the police administrator. Knowledge as to the quality of the police investigation, case preparation and presentation, may be gained from the subsequent dispositions of those cases which reach the court level.

It must be recognized that not all persons who are arrested are turned over to the courts for prosecution. There are various reasons for this: Failure of the victim to cooperate or appear at time of trial as victims of rape, is one reason for failure to prosecute effectively those persons arrested. Lack of sufficient evidence to support a charge and evidence obtained which discloses the arrested person did not commit the offense, are additional reasons for an arrested person not being brought to trial. For example: Almost 52 percent of all juveniles arrested were handled by the individual law enforcement agencies, without a formal charge against them or referring them to juvenile authorities. Police methods in handling juveniles differ throughout the state, but in this section all tables concerning juveniles refer to those who were arrested and turned over to juvenile authorities in connection with specific criminal offenses.

During 1974, 85 percent of all persons arrested for Crime Index offenses were turned over to the courts. The adults charged with Crime Index offenses were found guilty by the courts in 74 percent of all cases presented.

An analysis of individual Index offenses determined that 32 percent of the murder defendants were either acquitted or their cases dismissed at some prosecutive stage. Forcible rape recorded the highest rate of acquittal or dismissal with a 49 percent rate. Atrocious Assault second, with 44 percent of the defendants being acquitted or their cases dismissed.

A review of all crime categories disclosed that convictions were high in the following offense categories:

Offenses involving alcoholic beverages recorded the highest conviction rates, with driving under the influence at 89 percent and drunkenness next at 87 percent. Persons charged for offenses against family and children, which includes desertion and nonsupport, were found guilty in 86 percent of the cases presented. Gambling convictions were reported at 87 percent.

Persons charged with Crime Index offenses and whose cases reached the court level, recorded 7 percent found guilty of a lesser crime and 25 percent being acquitted or dismissed. The highest percentage of persons found guilty on the original charge in 1974, as compared to those found guilty of a lesser offense, was in the larceny-theft category where 96 percent of all guilty defendants were convicted as charged. This was followed by robbery, where 91 percent of the defendants were found guilty of the original charge.

Disposition data for 1974 disclosed that acquittals or dismissals were greater in the violent crimes of murder, rape, robbery and atrocious assault, than in the nonviolent crimes of breaking and entering, larceny and motor vehicle theft. Dismissal or acquittal for the violent crimes was reported at 41 percent for 1974. The dismissal or acquittal rate for those crimes of a nonviolent nature was 20 percent for the same period.

The above data discloses the results of cases after police have arrested and formally charged the adult offender. The remaining cases pending court action, or undecided at the year's end, are classified as pending and are carried from year to year until a disposition is furnished by a court of jurisdiction. For the year ending 1974, 70,417 cases remain pending according to information supplied police by the various courts of New Jersey.

A final review of all crime categories discloses that 25 percent of all adults tried by the courts were either acquitted or their cases were dismissed at some prosecutive level. Persons of young age groups who were referred to Juvenile Court represented 22 percent of the total persons formally charged in all crime categories.

**CRIME STATISTICS BY
GEOGRAPHIC REGION AND
COUNTY
1974**

CRIME STATISTICS BY GEOGRAPHIC REGION AND COUNTY

The presentation of criminal statistics by geographic regions of New Jersey, and by counties within the respective regions, is made for the purpose of further analysis of crime within the state. The type and volume of crime will vary from place to place as do the influencing factors which contribute to a crime rate. Recognition of these variances, through identification, helps provide a more equitable base for consideration.

Geographic groupings by county, as shown in this section, were made using the following criteria: One, location in the state in relation to outside influence, (e.g. large urban centers); two, their general character, (e.g. urban or openness); three, the presence of major urban cores within individual counties. Employing these criteria, the state was divided into four regions.

The Northwest Region contains Sussex, Warren and Hunterdon Counties. The region is primarily a rural area because of its distance from the two major metropolitan centers of New York and Philadelphia, as well as the absence of any major core cities.

The Northeast Region contains the eight counties of Bergen, Morris, Passaic, Essex, Hudson, Union, Somerset and Middlesex. The character of this region is a suburban-urban mix. The most densely populated urban areas of the state and the nation with their complex problems are located within this region. The major urban cores are Newark, Jersey City and Paterson with surrounding suburban areas; but, of course, on the larger scale the region is oriented towards the New York metropolitan center. The industrial complex of the state is centered in this region as is 63 percent of the state's population.

The Southwest Region contains the four counties of Mercer, Burlington, Camden, and Gloucester. The character of this area, is also a suburban-urban mix. The urban cores within the region are Trenton and Camden with surrounding suburban development, but the entire region is oriented towards the Philadelphia metropolitan center.

The Southeast Region contains the six counties of Monmouth, Ocean, Atlantic, Cape May, Cumberland and Salem. The general character of this region is rural except for the large resort area stretching along the Atlantic coast. The major center for this region is Atlantic City. The resident population of the resort counties within this region is dramatically supplemented during the summer season resulting in urban-like problems not normally associated with a "rural" classification.

NORTHWEST REGION

A total of 6,577 Crime Index offenses were reported to the police of the Northwest Region during 1974. When compared to 1973, this represents a 17 percent increase.

Only 4 percent of all the offenses were of the violent crime group, which includes murder, rape, robbery and

atrocious assault. The remaining 96 percent were of a nonviolent nature, which includes breaking and entering, larceny and motor vehicle theft.

The largest increase 1974 over 1973, was in larceny, up 19 percent. Murder, atrocious assault and robbery recorded decreases during 1974.

During the month of August there were 618 Crime Index offenses reported, the highest volume month for the year. March recorded 596, the second highest volume for the year 1974.

In 1974 there were 2,784 victims of Index offenses for every 100,000 inhabitants of the region, representing a 17 percent increase over 1973. The 1974 crime rate is still the lowest reported for any of the four regions.

CLEARANCES

The police of the Northwest Region solved 22 percent of all Crime Index offenses reported to them in 1974. As with other regions of the state, the percentage of solutions for those crimes of a violent nature far exceeded that for those crimes of the nonviolent or property group.

NORTHEAST REGION

The police of the Northeast Region reported a total of 218,254 Crime Index offenses received by them from the inhabitants of this populous region during 1974. This figure represents an increase of 14 percent over 1973.

Within the Index offenses, volumes for those crimes of a violent nature, which includes murder, rape, robbery and atrocious assault, rose 1 percent during the year. The nonviolent crime group of breaking and entering, larceny and motor vehicle theft reflected an increase of 16 percent for the same period.

There were substantial decreases in certain crime categories during 1974, murder decreased 13 percent, rape decreased 5 percent and motor vehicle theft was down 5 percent. Significant increases occurred in larceny, up 27 percent and breaking and entering up 11 percent over 1973.

The months of August and July recorded the highest volumes during 1974 - 21,036 and 20,998 respectively.

The 1974 crime rate for the Northeast Region was reported at 4,647 victims for every 100,000 inhabitants. This rate represented a 14 percent increase over 1973.

CLEARANCES

In 1974, the solution rate for all Crime Index offenses reached 17 percent. This represents an increase over the 16 percent rate reported in 1973.

SOUTHWEST REGION

The police of the Southwest Region reported 64,198 Crime Index offenses during the year 1974. When compared to 1973, this figure represents an 18 percent increase.

The violent crime group of murder, rape, robbery and atrocious assault represented 8 percent of all the Index

offenses reported and reflected an increase of 5 percent over 1973. The remaining 92 percent of the Index offenses reported were of the nonviolent crime group, representing a 19 percent increase over 1973.

Significant percentage increases were noted in the offenses of rape, up 16 percent, atrocious assault, up 5 percent and larceny increasing 29 percent during the year 1974. Murder decreased 25 percent during the same period.

The month of July recorded 6,357 Index offenses, and August, a close second, recorded 6,187 for the year 1974.

Region crime volumes, when related to population, result in a rate of victimization at 4,911 persons for every 100,000 inhabitants of the region. The crime rate for this region increased 17 percent over 1973.

CLEARANCES

Police in the Southwest Region solved 17 percent of all Index offenses reported to them in 1974. A substantial increase over the 15 percent solution rate reported in 1973.

SOUTHEAST REGION

During the year 1974, a total of 61,105 Crime Index offenses were reported to the police of the Southeast

Region. This total represents a 25 percent increase over 1973.

Violent crime accounted for 5 percent of all Index offenses reported, with 95 percent being classified as nonviolent or property type offenses. When comparing 1974 to 1973, violent crimes increased 13 percent, and nonviolent crime increased 25 percent.

Increases were recorded for all the Index offense categories reported for 1974 over 1973. The most significant increases were in rape and robbery up 20 percent, breaking and entering increased 22 percent and larceny up 29 percent over 1973.

As would be expected in this resort oriented area, the crime volumes were highest during the summer months of August with 7,144 offenses and July with 6,704 offenses.

A crime rate of 5,207 victims for every 100,000 persons in the Southeast Region was reported for 1974, an increase of 23 percent over 1973.

CLEARANCES

Law enforcement agencies of the Southeast Region solved 17 percent of all Crime Index offenses reported to them during the year, a small increase over 1973.

URBAN-SUBURBAN-RURAL CRIME

Crime statistics by urban, suburban and rural classifications are presented for the purpose of measuring crime trends for these specific groups, particularly since New Jersey is the most urbanized state in the country.

The character of municipalities by urban, suburban and rural classifications as established here and in the section entitled "State, County and Municipal Profiles", was compiled by the Division of State and Regional Planning, Bureau of Statewide Planning.

URBAN

An increase of 12 percent in the Crime Index and crime rate of urban communities was disclosed for the comparative period 1974 over 1973. The urban group accounted for 60 percent of the total crime reported in the state, a decrease from the 62 percent in 1973. Individually, 89 percent of the robberies, 78 percent of the murders and 75 percent of the atrocious assaults reported in New Jersey during 1974, occurred in urban areas. However, all three offenses did disclose decreasing trends during 1974.

SUBURBAN

An increase of 24 percent in the Crime Index and a 23 percent increase in the crime rate was reported for the period 1973 through 1974. The Suburban group accounted for 34 percent of the total crime reported in New Jersey. An increase from the 32 percent recorded in 1973. Dramatic increases were noted in the offenses of larceny, up 28 percent, breaking and entering up 24 percent and rape increasing 23 percent over 1973.

RURAL

Rural communities, as a group, disclosed the largest percentage increase of the three groups. The Crime Index rose 28 percent over 1973. However, the rural communities accounted for only 6 percent of the total Crime Index of the state, a slight increase over the 5 percent recorded in 1973. The largest percentage increases were found in the offenses of larceny, a 35 percent increase, breaking and entering up 26 percent and motor vehicle theft up 17 percent over 1973.

URBAN CRIME NUMBER-RATE-DISTRIBUTION 1973 - 1974

154 Municipalities

Population - 3,945,760

OFFENSES	NUMBER			CRIME RATE/100,000			PERCENT OF STATE TOTAL
