

## NEW-JERSEY GAZETTE.

MONDAY, APRIL 25, 1785.

TRENTON: Printed by ISAAC COLLINS, Printer to the State.

*A Miller wanted.*

Employment for an honest, sober, industrious man, who understands manufacturing wheat in the best manner, and is capable in every respect of managing a mill, consisting of two pair of stones, one of which are French burrs, situate near Potowmack river, in Virginia, a fine healthy country—also, to superintend the business of a cooper's shop, wherein three hands are employed, near the mill.

If his knowledge extends to the mill-wright business, so as to keep the running gears in repair, it would add to the convenience; and his having a small family would be preferable to none. He will be furnished with a comfortable dwelling-house contiguous to the mill, a good garden properly paled in, and perhaps some other conveniences, as may be stipulated and agreed on. He must produce unquestionable recommendations of his honesty, sobriety, and industry, to his Excellency General Washington, Mount Vernon, in Virginia, or to the subscribers in Philadelphia, who will contract with such person on generous terms.

January 7. According to the latest advices from Stockholm, the declaration given by the Swedish Ministers to the Empress of Russia, during the absence of the King, their master, has been confirmed in a letter written by his Majesty himself to that sovereign; in which his Majesty assures her, that his engagements and new treaty with France went only to promote commerce among his subjects, and did not in any degree affect the interest of the neighbouring powers; and that he would be happy to give the Empress every testimony of his sincere friendship. Since the receipt of this letter, every thing appears quiet; but the fortresses and magazines in Fionia have been visited by order of the Court of Petersburg.

VIENNA, January 1.

Letters from Inspruck advise, that on the 15th of last month, a corps of Imperial troops arrived there in their way to the Low Countries. Her Royal Highness the Archduchess Elizabeth, accompanied by many of the first distinction, went to meet those troops, and to see them file off towards Telfs; after which, the principal officers had the honour to be admitted to the table of her Royal Highness, who ordered a day's pay to be distributed to each subaltern officer and soldier of that corps, and the next day they continued their marches to the places appointed.

LONDON, January 11.

On Friday, January 7, the wind being N. N. W. very moderate and the sky clear, Mr. Blanchard, accompanied by Dr. Jefferies, took his departure for the continent in his balloon, from the castle at Dover.— Three guns were fired from the castle at nine in the morning, and the flag was hoisted upon the firing of the first gun, as a signal that the aeronauts were preparing to fill the balloon. About ten minutes before its ascension, a fourth gun was fired, as a signal that the aerial vessel and voyagers were about to depart.— The balloon was completely filled by one o'clock; the vessel which ascended with it in the five former voyages was affixed; the courageous and intrepid voyagers took their seats; the oars and fly used in the last voyage were placed in the boat; nine bags of ballast; the French edition of Mr. Blanchard's voyage, with Mr. Sheldon's; a large inflated bladder, containing a number of letters from people of the first distinction in this country to several of the French nobility; a compass, and some philosophical instruments; a small bottle of brandy; two beautiful silk ensigns, English and French; a few biscuits, and two cork jackets, made the whole of their cargo. Mr. Blanchard had adapted an apparatus to sustain himself and friend, without the boat, which weighed 64 pounds, if they should have occasion for a diminution of weight upon the voyage. The balloon was filled in about two hours and an half, and the process conducted by Mr. Blanchard and Mr. Decker, of Berwick-street, Soho. They ascended at 13 minutes past one, close to the large gun (well known by the name of Queen Ann's pocket pistol.) Mr. Blanchard kept the balloon in exact equilibrium for a considerable time. The greatest silence reigned among the numerous concourse of spectators, until Mr. Blanchard had got so far from the cliff as to be over the sea: He stood erect in the car, and saluted the spectators most gracefully, by bowing, taking off his hat, and waving his ensign.— He was then cheered by the loudest acclamations.

The balloon continued its route in the horizontal direction; then appeared to rise; and at one time the

material injury to the Algerines, whose daring intelligence of late has become very alarming."

April 19. Early on Friday morning last, the body of a man was found behind the wall of an old decayed house on the Germantown road, with his throat cut, and a razor lying near. He was decently dressed in fustian clothes.

Last Sunday evening, the body of a young woman was taken out of the river, near the Drawbridge. There were, we are informed, several marks of violence visible thereon. She is reported to have thrown herself in the preceding evening.

### TRENTON, April 25.

DIED, on Wednesday evening last, in the 77th year of his age, ROBERT-LETTIS HOOPER, Esquire, the Elder—and on Friday following his remains were interred in the Episcopal burying ground at this place, attended by a number of the principal citizens.

We hear that on Friday the 22d inst. about three o'clock in the afternoon, the dwelling-house occupied by Mr. Elias Woodruff, of Princeton, took fire.—The fire, which caught from a spark falling on the roof, having got to some head before it was discovered, the wind being very high, and Mr. Woodruff and his servants employed at some distance, sufficient assistance could not be collected to extinguish the flames, until a considerable part of the mansion-house, and the whole of the kitchen, was consumed.

Extract of a letter from a gentleman in Salem county, state of New-Jersey, April 18, 1785.

"I had the pleasure of being present, on Friday last, at an examination of Bridge-Town Grammar-School, under the Rev. Mr. Hunter. In the forenoon the students gave such proofs of their grammatical knowledge, and their acquaintance with the classics upon which they were examined, as not only gained the approbation, but even excited the admiration, of a number of learned gentlemen. In the evening, their exhibitions in publick speaking received many plaudits, from a genteel and crowded audience. Their several exercises consisted of orations, dialogues, scenes of plays, &c. which were performed on a stage erected for the purpose, variegated with an elegant scenery, descriptive of the pieces which were spoken; the whole of which reflected the highest honour upon their teacher, as it is impossible that students of their tender years could make such a figure, without his strictest care and attention."

### The noted full blooded Horse TRAVELLER,

(From Maryland)

WILL cover at the stable of the subscriber in Buckingham township, Bucks county, Pennsylvania. Traveller is a dark bay, full fifteen hands and three inches high, with a star and one white hind foot, moves remarkably gay and easy, and is allowed, by the best judges, to be as active a horse as any in America; he was got by Colonel Lloyd's imported horse Traveller, and out of that most famous imported mare Nancy Bywell, which beat that noted horse Lath, at Warrick, in Maryland, with great ease. He is as sure a foal getter as any horse, and his colts are remarkably large.—Gentlemen who live at a distance, and choose to send their mares, may depend on having good pasture provided, and the best care taken of them, by their humble servant,

WILLIAM BENNET.

### The noted full blooded Horse GREY FIGURE,

(From Queen Ann's County, Maryland)

WILL cover at the stable of the subscriber, in Amwell township, Hunterdon county, New-Jersey, known by the name of Ringo's Tavern. Figure is a dapple grey, full fifteen hands one inch and an half high; he was got by the old noted horse Figure, and out of a dove and Othello mare; he is as high a bred horse as any on the continent, and for elegance there are none to excel him, and his colts in general give full satisfaction to the breeder. Gentlemen who live at a distance, and choose to send their mares, may depend on having good pasture provided, and the best care taken of them, by their humble servant,

JOSEPH ROBINSON.

On the premises, the 5th of May next, at 12 o'clock of the same day,

### Taunton Iron-Works,

SITUATED in the township of Evesham, county of Burlington, West-Jersey, distant seventeen miles from Philadelphia, consisting of the following tenements and buildings,

1. A furnace now in blast, lately built, lying on a never failing stream, erected on a plan so as to cast 80 tons of pig-iron per month: There is a large quantity of ore so near the works, that a team may haul three loads per day. The metal is known to equal, if not excel, any on the continent for making hollow ware, pig-iron, and especially cannon, of which sufficient proof may be had. There is a large quantity of woodland so contiguous to the above-mentioned works, that a team may haul six loads of coal a day. The conveying the said iron to Philadelphia costs but 12 shillings per ton, it being so near a navigable creek.

2. A forge with three fires, adjoining the furnace, lately repaired, and now in complete working order.

3. Contiguous to said works is a good mansion-house, together with several houses for workmen.

4. One-eighth part of Prickett's saw-mill.

Likewise the times of a number of indented Irish servants to be disposed of.

### THE Honourable John Stevens, Esq.

President of the Board of Proprietors of the Eastern Division of the state of New-Jersey, having given notice, by publick advertisement, that a considerable number of the General Proprietors of the said Eastern Division had applied to him, requesting, that at their next stated meeting, a further dividend should be made of rights to locate vacant land, which application would be taken under consideration at Amboy, in the present month of April. The Proprietors of the Western Division of the state of New-Jersey, do hereby give notice to all persons whatsoever, that they lay claim, and think themselves justly entitled to, all the lands to the Westward of a strait line drawn from the Station-Point at the mouth of Mackhacamac, to the most Southerly point of the East side of a certain inlet on the sea coast, commonly called and known by the name of Little Egg-Harbour, as part of the Western Division of New-Jersey, excepting only such lands as may have been surveyed or located under Eastern Rights of Propriety, on or before the first day of December 1773 last past, and really sold to, and in the possession of, bona fide purchasers, other than the General Proprietors of the Eastern Division; of which claim all persons are desired to take notice.

The General Proprietors of the Western Division of New-Jersey, do further give this publick notice, that they intend to apply to the Legislature, at their session in October next, for a law to appoint commissioners to settle and ascertain the line between the Eastern and Western Division of New-Jersey.

By order of the Board of Western Proprietors,

### Money Advanced.

FORTY Thousand Pounds ready for immediate advance, in different sums (not less than 200l. will be lent to one person) on the security of insurance of lives, the borrower to have his life insured at one of the offices of assurance of lives in London, and the policy to be lodged in the hands of the lender for the time the cash is wanted, which may be had for any length of time. Insurances of lives is similar to that from fire; the one paid at the office at the death to the holder of the policy—the other, if burnt out; it will cost 5l. for every 100l. the borrower may insure for, which must be paid at the office before that security can be obtained—good bills, cash'd, that are drawn on a good house in London—Any lady or gentleman that may wish to have any business settled, whether in law or otherwise, will meet with an indefatigable agent, whose integrity may be most confidently relied on; any letters that may be received, that are post paid, will be duly answered, pointing out the mode to put the business in execution, and what time nearly the advertiser's agent will arrive in your quarter to conclude it. Any lady or gentleman that may answer this, it will be needless for them to send to their agent, or any other person, but the principal, as he will not do any business but what he may conduct himself for his own safety; and has no objection to centre double the sum in America, if he can get a proper security for it, as it is his intention to settle his two nephews on the continent—the advertiser having great connection in the first county of Great-Britain, in the manufactory of shoes, would wish to make a good and safe correspondence in that line.—Direct, post paid, to "RICHARD CHILD, Esq. Park-Arrect, Coffee-house, south side of St. James's Park, London, England."

JOHN WHITLOCK, Gaoler,

New-Brunswick, April 11, 1785. 4w†

To be Sold by the Subscriber,

THE house in which he now lives, with the spacious lot whereon it stands, the water lot and new wharf of 78 feet front; it is known to be as good a stand for business as any in the city of New-Brunswick. Likewise the house and lot on Water-street, adjoining next below Colonel Taylors, in possession of William Nevius; the lot is in front on the street 75 feet, and extending the same breadth about 175 feet, with a water lot in front of the whole, as advantageously situated, and as capable of improvement, as any lot on the river:—A number of lots and water lots lying on Water-street and the river Raritan, between Doctor Cochran's house and the mine pits; with a number of lots on Albany-street, New-street, and other streets to be laid out. Also, the freehold right to several lots and houses in Albany-street, upon ground rent.

The city of New-Brunswick is perhaps more advantageously situated for an inland trade, than any town in New-Jersey, it being a thoroughfare between Philadelphia and New-York, and at the head of the navigation of the river Raritan; distant from the former about 60 miles, one half of which is water carriage; and from the latter, about 35 miles by land, and 40 by water. The stage-waggons from both these cities pass through every day in the year, except Sunday; and vessels of very considerable burthen afford daily opportunities of transportation to New-York. It is remarkable for being a healthy spot, and situated in the heart of a well settled fertile country, which affords daily supplies of provisions of all sorts, at lower rates than any town in New-Jersey: No place can be better situated for storekeepers, mechanicks or manufacturers, as tradesmen of all kinds may find constant employ, and send or carry their manufactures either to New-York or Philadelphia, at very little expence.—So fine a situation is really an object for a company of honest Germans, whose industry the proprietor wishes so much to encourage, that if their families will become citizens by purchase, he will give them a proper lot to build a church on, and a convenient lot of four or five acres for a parsonage. This place is likewise distant, by land or water, about 12 miles from the city of PERTH-AMBOY, situated at the mouth of the river Raritan, lately made a free port, and endowed by charter with privileges, and by nature with advantages, that cannot but be the means of promoting commerce very rapidly in this state. A number of lots and water lots are likewise to be sold there. Those that incline to purchase, may know the terms and conditions of sale, by applying to
