Amended by R.2003 d.410, effective October 20, 2003.

7:11-1.2 Construction

This subchapter shall be liberally construed to permit the New Jersey Water Supply Authority to discharge its statutory functions.

“Daily allotment charge” means a daily allocation charge equal to 100 percent of the value of the quantity of water specified in the water use agreement which the System water user is authorized to continuously withdraw without interruption each 24-hour period (see N.J.A.C. 7:11-2.7).

“Overdraft service” means the average daily supply of water from the Raritan Basin System during any calendar month, to the extent and from time to time available, in excess of aggregate uninterruptible service, for certain, seasonal, non-emergent, interim, interruptible, non-guaranteed users.

“Overdraft service rate” means the rate for overdraft service.

“Peaking factor” means the percentage equivalent of that volume of overdraft service available from the Raritan Basin System during any calendar month in excess of uninterruptible service, which a System water user may divert without charge.

“Point of diversion” means the location where the user’s withdrawal facilities diverts the contractual water supply from the Raritan Basin System.

“Production factor” means the inverse ratio between any allocation for a depletive water diversion above the confluence of the Millstone and Raritan Rivers and its equivalent in sustained supply at the confluence at the Millstone and Raritan Rivers as follows: production factor = safe yield at the confluence/yield at the point of diversion (see N.J.A.C. 7:11-2.9).

“Retroactive debt service payment” means a payment in addition to the daily allotment charge which shall apply to all new or additional uninterruptible water supply contracts in order to proportionately reimburse pre-existing System water users for certain debt service payments previously made by them (see N.J.A.C. 7:11-2.13(c) and (d)).

“Short-term service” means the supply of Raritan Basin System water for certain interim or short-term uses, such as growing agricultural or horticultural products, meeting extraordinary requirements in consumer demand for potable or industrial water as a result of transfers arising from a declaration of drought by the Department, meeting non-seasonal extraordinary requirements in consumer demand for potable or industrial water or emergent maintenance or temporary failure of a critical component of a System water user’s infrastructure provided on a non-guaranteed or interruptible basis.

“Standby service” means the supply of Raritan Basin System water for certain occasional uses, such as fire protection or other emergencies, natural or otherwise.

“System water user” (also referred to as “contractual water customer,” “purchaser” and/or “user”) means a party under legal contract with the Authority for a supply of raw water from the Raritan Basin System.

“Uninterruptible service” means the supply of water from the Raritan Basin System which a System water user is authorized continuously to withdraw, without interruption, for potable or industrial water supply purposes pursuant to contract.

7:11-4.4 Debt service cost component

(a) The debt service costs component is based upon the amount to be included for debt service costs with respect to each annual payment period or portion thereof, and will be that amount accruing in the bond year (starting on August 1 of each calendar year and ending on the next following July 31) or corresponding portion thereof, commencing during the fiscal year (starting on July 1 of each calendar year and ending on the next following June 30) within which such annual payment period or portion thereof falls. The debt service costs include the aggregate amounts payable during the specified period for:

1. Interest accruing during such period on the bonds, but not including any interest accruing on the State loan bonds which is to be deferred and added to principal, until payment in respect of such deferred interest is to commence;

2. That portion of each required principal payment or mandatory redemption or sinking fund payment on the Authority bonds (together, "principal installment") which would accrue during such period;

3. Such additional amounts as are required to provide a debt service coverage in accordance with the following schedule:

Twelve Month Period Beginning on	Coverage Percent of Gross Debt Service
2/1/91-1/31/92	105 percent
2/1/92-1/31/93	110 percent
2/1/93-1/31/94	115 percent
2/1/94-1/31/95 and thereafter	120 percent

4. Any amounts payable into any debt service reserve fund established for any Authority bonds.

(b) The following Debt Service rates based on a sales base of 16.125 million gallons per day, apply to all initial water purchase contract customers, and all delayed water purchase contract customers, who fully satisfied their contractual delayed water purchase surcharge obligations at the commencement of their contract terms:

Period	Rate/Million Gallons (Coverage 120 percent)
7/1/2010 to 6/30/2011	\$568.69

(c) A delayed water purchase surcharge will be assessed to all water purchasers who entered into a water purchase contract for an uninterrupted service commencing subsequent to the system operation date (delayed water purchase contract). This includes a purchaser under an initial water purchase contract, which provides for an increase in the amount of uninterrupted service effective subsequent to the system operation date.

1. The following debt service rate based on a sales base of 4.435 million gallons per day, applies to the delayed water purchase contracts commencing July 1, 2001, October 1, 2002, and January 1, 2005 in lieu of the debt service rate set forth in (b) above.

Period	Rate/Million Gallons (Coverage 120 percent)
7/1/2010 to 6/30/2011	\$756.19

(d) In place of the imposition upon any delayed water purchaser of delayed water purchaser surcharges with respect to any one or more items, a delayed water purchaser may, at the time of entry into a delayed water purchase contract, make a single lump sum payment in respect of such items in a manner to be agreed upon between the Authority and the delayed water purchaser.

7:11-4.6 Payments

(a) The annual payment consists of the aggregate amount projected by the Authority to be payable to the Authority by

the purchaser during each annual payment period for uninterruptible service. This is derived by multiplying the applicable rates and charges in the rate schedule in effect for the relevant annual payment period by the number of gallons available to purchaser on an annual uninterruptible service basis (subject to the provisions of the water purchase contract) and subject to adjustment to reflect:

1. Any delayed water purchaser surcharges applicable to the purchaser;

2. Any credits to allocate benefits of any delayed water purchaser surcharges to the purchaser; and

3. Other charges, credits or adjustments provided for in the water purchase contracts.

(b) The annual payment period shall commence on July 1 and end on the next ensuing June 30.

(c) The purchaser shall make quarterly water payments for uninterruptible service not later than the 10th day of January, April, July and October in each year for uninterruptible service with respect to the calendar quarter ending on the last day of the immediately preceding month. The amount of the quarterly water payments shall be derived by dividing the amount of the purchaser's annual payment or adjusted annual payment for any fiscal year by four or in such other or different required quarterly payments of which the Authority gives notice to the purchaser pursuant to the water purchase contract.

(d) The Authority will notify the purchaser not later than 30 days prior to the beginning of each annual payment period of the amount of the purchaser's annual payment for uninterruptible service and, if the Authority determines that the quarterly water payments under the water purchase contracts should be made on a basis other than in equal installments, in order to permit the Authority to meet its obligations as they become due, it will, concurrently with such notice, provide the purchaser with a schedule of the amounts of each of the quarterly water payments to be made by the purchaser.

7:11-4.7 Uninterruptible service

(a) The rates, charges and debt service assessments per mg of water set forth in the rate schedule for uninterruptible service under initial water purchase contracts for the fiscal year are based upon:

1. The projected annual requirements for the fiscal year, after deducting therefrom projected net revenues in connection with the ownership or operation of the Manasquan Reservoir System from sources other than payment for uninterruptible service except to the extent that such other revenues are to be applied to obligations not included

in such projected annual requirements. Such other obligations include payments, credits or rebates to purchasers for:

- i. Delayed water purchase surcharges collected;
- ii. Compensation for any amounts charged to system water purchasers in prior fiscal years by reason of default in payment of any obligation under any water purchase contract which obligation is subsequently collected by the Authority; and
- iii. Distribution of the proceeds of surplus water sold.

(b) The rate is obtained by dividing the adjusted projected annual requirements set forth in (a)1 above by the number of mg per day of Manasquan Reservoir System water which are required by the terms of all water supply contracts for uninterrupted service during the fiscal year, multiplied by 365.

(c) The Authority may exclude for any period, for purposes of the computation in (a) and (b) above, the uninterrupted service provided in any water purchase contract if an event of default has occurred. This will not affect the Authority's right to enforce the provisions of the water purchase contract against the defaulting party; however, any payment received from a defaulting water purveyor for such uninterrupted service with respect to such period shall be rebated or credited to the non-defaulting purchasers.

(d) The purchaser will not be required to make payment to the extent that the Authority does not make water available under the terms of the contract for uninterrupted service.
