SUBCHAPTER 1. GENERAL PROVISIONS

7:26-1.1 Scope of rules

(a) Unless otherwise provided by rule or statute, this chapter shall constitute the rules of the Department of Environmental Protection that govern the registration, operation, maintenance, and closure of sanitary landfills and other solid waste facilities in the State of New Jersey as may be approved by the Department; registration, operation, and maintenance of solid waste transporting operations and facilities in the State of New Jersey; a fee schedule for services provided by the Department to solid waste facilities, generators and transporters; and the assessment of civil administrative penalties. These rules shall not apply to the following:

1. The purchase, sale, collection, storage, transport or controlled processing of source separated or commingled source separated recyclable, recycled or secondary non-hazardous materials, which would otherwise be handled as solid waste pursuant to this chapter for introduction or reintroduction into the economic mainstream as raw materials for further processing or as products for use, provided that such materials are free from putrescible matter and are not mixed with solid or liquid waste as defined herein. Specifically not exempted are solid waste materials (including fuel and reusable energy), or thermal destruction facilities. These rules shall not apply only if the conditions in (a)1i or ii below are met.

- i. The use or reuse of material, which would otherwise become solid waste under this chapter, directly as a product or incorporated into any form of raw material to be used in the manufacturing of a product shall meet the generally accepted product specifications and standards for similar manufactured products or raw materials. The used or reused material shall not present a greater risk to human health or the environment than the use of the product or raw material it is replacing.

- ii. The use or reuse of materials that would otherwise become solid waste pursuant to this chapter as fill material, aggregate substitute, fuel substitute or landfill cover shall be approved as beneficial use pursuant N.J.A.C. 7:26-1.7.

- iii. Specifically not exempt are those used or reuses of materials which, if released to the environment through transport, storage or other handling will cause pollution of the surface or ground water of this State or which may pose a substantial or material threat to the public health, safety or welfare in the environment.

2. Container-pickup facilities as herein defined;
3. Source separated food waste fed to livestock in the State of New Jersey as approved by the New Jersey Department of Agriculture;
4. Recycling depots as defined at N.J.A.C. 7:26A-1.3 where individuals or organizations deposit separate materials such as newsprint, bottles, cans, and so forth, prior to transport to the secondary materials industry;
5. Convenience centers as defined at N.J.A.C. 7:26-1.4;
6. The intra-plant transport, temporary storage or other handling of plant generated waste materials. Specifically not exempt are those materials to be, or which are, deposited on or in the lands of this State for periods exceeding six months, or which through transport, storage or other handling will cause pollution of the surface or ground waters of this State, or which may pose a substantial or material threat to the public health, safety or welfare;
7. Any discharge of a mixture of domestic sewage and other waste that are discharged into a sewer system to a domestic treatment works, as defined in N.J.A.C. 7:14A, which is authorized in accordance with N.J.A.C. 7:14A and local ordinances.

- i. This exemption does not include transport or discharge by waste transporters;

8. Recycling operations and recycling centers approved and operated pursuant to N.J.A.C. 7:26A; and

9. A small vehicle transfer area meeting the following requirements:

- i. Solid waste is transferred from a collection vehicle not exceeding 16,000 pounds gross vehicle weight directly to a registered solid waste collection vehicle;

- ii. Such solid waste is collected in the collection vehicle not exceeding 16,000 pounds gross vehicle weight because the point of generation is not accessible to a registered solid waste collection vehicle (that is, down a narrow lane or private driveway, or on public property such as a park or beach);

iii. All waste collected at the small vehicle transfer area shall be removed by the end of each operating day (or next operating day if collected on a weekend or holiday);

iv. Waste received in the area shall not be processed, segregated, sorted, or handled in any fashion other than direct transfer from the collection vehicle not exceeding 16,000 pounds gross vehicle weight into the registered collection vehicle or other collection container;

v. Area operations shall not result in the generation of odors, litter, dust, leachate, or any other negative environmental impacts;

vi. Small vehicle transfer areas shall receive approval from the municipality in which they are located prior to commencing transfer operations. In addition, operators of small vehicle transfer areas shall notify the Department in writing and the respective county health department following municipal approval and prior to commencing operations; and

vii. The operator of a small vehicle transfer area is subject to compliance with all other applicable solid waste regulations.

(b) In addition to the rules in this chapter, all solid waste landfill facilities are required to obtain a permit pursuant to the New Jersey "Water Pollution Control Act", N.J.S.A. 58:10A-1 et seq., and the regulations promulgated thereunder, "Regulations Concerning the New Jersey Pollutant Discharge Elimination System", N.J.A.C. 7:14A.

Case Notes

An injunction prohibiting enforcement of New Jersey's solid waste flow control statutes, which favored the designation of in-state waste facilities for disposal of locally generated solid waste in violation of the Commerce Clause, prohibited the state department of environmental protection from enforcing any solid waste management plan which required waste to be directed to in-state facility designated without participation of out-of-state competitors. *Union County Utilities Authority v. 7:26-6.2 Purpose

Pursuant to the Solid Waste Management Act, the Department is charged with developing procedures to assure the orderly preparation of a solid waste management plan for every solid waste management district and the approval, modification, or rejection of such a solid waste management plan, and the certification of the determinations to the board of chosen freeholders or the Hackensack Meadowlands Development Commission, as the case may be, which submitted such plan. 7:26-6.3 Types of wastes covered

(a) This subchapter applies to all solid waste, as defined in N.J.A.C. 7:26-2.13, with the exception of the following:

1. Bulk liquids and semi-liquids, ID type 72;
2. Septic tank clean-out wastes, ID type 73;
3. Liquid sewage sludge, ID type 74;
4. Dry sewage sludge, ID type 12;

5. Dry industrial waste, ID type 27, but only if such waste is residue from the operations of a scrap metal shredding facility, provided that the operator of the scrap metal shredding facility satisfies the requirements of (a)5i through iv below:

i. The owner/operator of the scrap metal shredding facility shall obtain the Department's approval of a quality control plan for the facility, which ensures that before shredding the motor vehicles, appliances, or source separated, non-putrescible ferrous and non-ferrous metals received by the facility, the facility removes components that could affect the nonhazardous characteristics of the residue from the operations of the facility. As provided in the quality control plan, the facility may reject any motor vehicles, appliances or source separated non-putrescible ferrous and non-ferrous metal if inspection reveals that components that could affect the non-hazardous characteristics of the residue are present. The facility is considered the generator of the components it accepts for processing, and shall dispose of these components in accordance with all applicable laws, orders and regulations (including N.J.A.C. 7:26G, if applicable). The components to be removed include, without limitation, the following:

- (1) Batteries and cable ends;
- (2) Gas tanks;
- (3) Catalytic converters;
- (4) Unspent airbag canisters;
- (5) Transformers;
- (6) PCB capacitors; and
- (7) Fluorescent lighting fixtures;

ii. The owner/operator of the scrap metal processing facility shall obtain the Department's approval of a sampling and analytical plan which insures monitoring of the characteristics of the residue from the operations of the facility, as set forth in N.J.A.C. 7:26G-5 and the most recent edition of the USEPA publication SW-846 "Test Methods for Evaluating Solid Waste-Physical/Chemical Methods," incorporated herein by reference. The operator shall perform sampling and analysis quarterly, including without limitation the Toxicity Characteristic Leaching Procedure (TCLP) parameter as set forth in N.J.A.C. 7:26G-5. The operator shall submit the analysis performed in accordance with the approved sampling to the Division of Solid and Hazardous Waste for classification on January 15, April 15, July 15 and October 15, provided however that if the Department approves less frequent sampling and analysis, the owner/operator shall submit the analysis on the dates specified in the Department's approval of that sampling. Upon a request by the facility and as approved by the Department, the sampling frequency of the approved sampling and analytical plan may be reduced. The owner/operator of the facility shall submit a revised sampling and analytical plan which documents how the accuracy and precision criteria as required in SW-846 will be maintained with a reduced schedule;

iii. On February 15 and August 1 of every year the owner/operator of the scrap metal shredding facility shall submit to the department and to the solid waste district in which the facility is located, a report on forms provided by the Department consistent with the Department's Annual Recycling Tonnage Reporting Manual including the following information:

(1) The total amount of each type of materials which the facility received in the six-month period ending January 1st and July 1st of every year;

(2) The total amount of residue disposed of by the facility;

(3) The total amount of ferrous and non-ferrous metal remaining after shredding; and

(4) The report shall be submitted to the following:

New Jersey Department of Environmental Protection

Division of Solid and Hazardous Waste

PO Box 414

Trenton, NJ 08625-0414

Office of Recycling and Planning; and

iv. The scrap metal shredding facility shall either maintain a scale certified under N.J.A.C. 13:47B-1 and provide specific truck load weigh data to the district in which the facility is located, or transport the residue through the district's weighing facilities to be weighed before the residue is transported for disposal;

6. Source separated Class A recyclable material, Class B recyclable material, Class C recyclable material and Class D recyclable material as such terms are defined at N.J.A.C. 7:26A-1.3;

7. Hazardous waste, as defined at N.J.A.C. 7:26G-5; and
