## ENERGY STAR Award Winners

For over 30 years, ENERGY STAR has been America's resource for saving energy and protecting the environment. Since its inception, ENERGY STAR and its partners have helped prevent over 4 billion tons of greenhouse gas emissions, while saving consumers and businesses over \$500 billion.

Leading the way in delivering these results are award-winning partners that EPA honors each year that have made outstanding contributions to protecting the environment through superior energy efficiency achievements in partnership with ENERGY STAR. Whether a first time winner or a winner for many years, these ENERGY STAR award-winning partners from across the country demonstrate that delivering real climate solutions makes good business sense and strengthens our economy. Among this year's 221 winners are more than 170 organizations that ENERGY STAR is recognizing for their year-over-year commitment to energy efficiency through the program's highest honor: ENERGY STAR Partner of the Year – Sustained Excellence winner. Their sustained commitments are essential to meeting the challenge of climate change and enabling a transition to a clean energy economy. EPA congratulates these Sustained Excellence winners, as well as 2023 Award Winners List Partner of the Year, Contractor of the Year, and Excellence award winners for their contributions towards cleaner and healthier products, homes, buildings, schools, and factories.

Award Description (/about/about\_energy\_star\_awards)

Learn how the 2023 ENERGY STAR Award winners are helping millions of individuals, families, and businesses save money, save energy, and protect the environment.
