## OVER-THE-COUNTER PERMITS

### I. STREAM ENCROACHMENT (609) - 292 - 4869

DEP now has a one-day processing service for certain minor stream encroachment permits. This "over-the-counter" service is limited to minor projects which do not adversely change the water carrying capacity of the floodway, do not increase erosion or sedimentation in the stream, and do not require substantial channel modification or relocation. For further information contact the Bureau of Flood Plain Management, CN 029, Trenton, N.J. 08625.

### II. WATERFRONT DEVELOPMENT (609) - 292 - 0060

DEP has a one-day processing service for minor waterfront development projects. This over-the-counter service applies to waterfront construction activity in man-made lagoons and minor maintenance and/or repair or replacement of lawful existing structures. For further information contact: Waterfront Development, CN 401, Trenton, N.J. 08625.

### III. SEWER EXTENSIONS (609) - 292 - 3846

DEP has a one-day processing service for "minor" sewer extension projects. Eligible projects must meet certain criteria, such as, length of 1000 linear feet or less, cost of \$25,000 or less, sewage flow per day of 12,000 gallons or less. No projects with pump stations, force mains, siphons, gallorage transfers or holding tanks will be processed over-the-counter. Projects can not be located in areas under sewer ban, administrative orders, or litigation.

Projects must be in-house by 9:30 a.m., and all administrative documents must be in proper order. Pre-application conferences are strongly recommended. For further information contact Division of Water Resources, CN 029, Trenton, N.J. 08625.

## MASTER PERMIT INFORMATION APPLICATION

DEP has developed a Master Permit Information Application which, upon completion, will indicate all the DEP permits required for the project. Forms may be obtained by contacting the Office of Business Advocacy (See inside cover for details).

## NOTICE OF MODIFICATION OF EFFLUENT LIMITATIONS

Issued Pursuant to the State of New Jersey

Surface Water Quality Standards (N.J.A.C. 7:9-4 et seq.)

NOTICE is hereby given that the New Jersey Department of Environmental Protection (DEP) has received a request for modification of draft effluent limitations issued to T & M Homes, Inc. Such effluent limitations would be applied to a proposed discharge of wastewater from a Senior Citizens Housing Project Facility to be located in Mansfield Township, Burlington County, New Jersey, into the Assiscunk Creek, at a point of discharge located approximately 1,000 feet upstream of Burlington County Route 628 in Mansfield Township.

The Assiscunk Creek at the proposed discharge point is classified as FW-2 Nontrout. These waters are defined as follows: i. Fresh surface waters approved as sources of public water supply. These waters shall be suitable for public potable water supply after such treatment as shall be required by law or regulation. ii. These waters shall also be suitable for the maintenance, migration and propagation of the natural and established biota; primary contact recreation; industrial and agricultural water supply and any other reasonable uses.

The subject draft effluent limitations, issued pursuant to the New Jersey Water Pollution Control Act, N.J.S.A. 58:10A-1 et seq., and in conformance with the Clean Water Act, 33 U.S.C. 1251 et seq., contain a limitation on the amount of total phosphorus which may be discharged. T & M Homes, Inc. has requested a modification of this limitation.

The subject draft effluent limitations were established at a level calculated to attain the State stream water quality standards (N.J.A.C. 7:9-4 et seq.) of 0.1 mg/l of total phosphorus, during summer months, seven day, low flow conditions with ten year recurrence interval.

The goal of the Department is to attain or maintain water quality standards unless it can be demonstrated that the existing designated use is not attainable due to natural background, or because of irretrievable man induced conditions, and there is no reasonable relationship between the economic and social costs of achieving the draft effluent limitations and the benefits to be obtained in attaining water quality standards.

The Water Quality Management Plan for Tri-County (208 Plan) identified total phosphorus as a limited parameter for the Assiscunk Creek briefly due to non-point sources of that pollution.

Based on field inspection of the proposed discharge location and the receiving stream, it would appear that the eutrophication potential of the Assiscunk Creek due to the proposed discharge would be insignificant.

In accordance with N.J.A.C. 7:9-5.12 the DEP has determined that some degradation of the Assiscunk Creek (category II nontrout) can be justified because of economic and social development factors.

The purpose of this NOTICE is to solicit comments from interested parties and determine, on the basis of said comments, if a public hearing on the proposed change should be held.

The change in the effluent quality from 1.0 mg/l to 5.0 mg/l of total phosphorus is expected to have minimal impact on the stream and will not interfere with or be injurious to instream water uses.

Please direct your comments to:

S.T. Giallella, P.E.  
D.E.P. - Division of Water Resources  
CN-029  
Trenton, N.J. 08625

Deadline for submission of comments is August 10, 1981.

All DEP Public Hearings, Administrative Hearings, and DEP Events of Public Interest are open to the public.

DEP Events of Public Interest include: public hearings, council meetings, workshops, public information meetings, and exams.

Public Hearings (Quasi - Legislative) - are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide, or of broad general interest.

Administrative Hearings (Quasi - Judicial) - are held between the state and a particular party involving an application, enforcement - violation or an appeal. Interest in these hearings is generally limited to those directly involved.

NOTICE: STATE CERTIFICATION OF DRAFT NPDES PERMITS

Notice is hereby given that the applicants, as listed on the following table, have applied to the United States Environmental Protection Agency (EPA) under the provisions of the Clean Water Act, 33 U.S.C. §1251 et seq. (the Act), for a National Pollutant Discharge Elimination System (NPDES) permit to discharge pollutants from facilities, located as shown on the table, into navigable waters of the United States.

The New Jersey Department of Environmental Protection (NJDEP) has certified the draft permit in accordance with the provisions of Section 401 of the Act. A description of each proposed discharge and the receiving body of water is given.

The United States Environmental Protection Agency has tentatively decided to issue a NPDES permit to the applicants. The State of New Jersey Department of Environmental Protection (NJDEP) has issued certifications of the draft NPDES permit subject to certain effluent limitations, standards, prohibitions, and other conditions, necessary to carry out the provisions of the Act and the "New Jersey Water Pollution Control Act," N.J.S.A. 58:10A-1 et seq. The certification formulated by DEP is based upon the administrative record.

Each administrative record is on file at the offices of the NJDEP Division of Water Resources, located on 1474 Prospect Street in the Township of Ewing, Mercer County, N.J., and may be inspected and for a fee copied between 8:30 a.m. and 4:00 p.m., Monday through Friday. A copy of each state certification, and other available information may be obtained by writing to the address which appears at the top of this notice.

-2-

Interested persons may submit written comments on the state certification and administrative record to the Assistant Director, Water Quality Management at the above address cited. A copy of the comments should be sent to the Chief, Permits Administration Branch, Region II, U.S.E.P.A., 26 Federal Plaza, New York, New York 10007. All comments shall be submitted within 30 days of the date, of this public notice.

In lieu of, or in addition to, the submission of comments as above provided, any interested person may request that the Commissioner of NJDEP hold a hearing regarding the certification of the proposed discharge. Such request shall indicate the proposed issues to be considered at the hearing.

Any request for a public hearing regarding NJDEP's certification of the proposed discharge should be in writing and submitted to the Assistant Director, Water Quality Management, at the above address with a copy of the request to the Chief, Permits Administration Branch, EPA, Region II. Such request shall be submitted within 30 days of the date of this public notice.

If NJDEP orders that a public hearing be held regarding its certification, and the Enforcement Division Director of EPA, Region II, has also decided to hold a public hearing, the hearings will be held jointly by NJDEP and EPA. If the Enforcement Division Director of EPA, Region II, has decided not to hold a public hearing, NJDEP may itself hold a public hearing regarding its certification.

If NJDEP does not hold a public hearing or reopen the comment period, NJDEP will consider the issuance of the certification to be final within 30 days of the date of this public notice. All comments timely submitted by interested persons in response to this notice, and statements and other evidence properly submitted at any public hearing held by NJDEP will be considered with respect to this certification for a permit.

NJDEP's decision on the issue of whether to hold any hearing, the administration of any hearing and the rights and obligations of participants are governed by NPDES regulations (40 CFR 124) and the "Administrative Procedures Act" N.J.S.A. 52:14B-1 et seq.
