General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

PUBLIC NOTICE AND STATEMENT OF BASIS

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation Program, proposes to restrict and control the discharge of pollutants from Ecolab Inc., 255 Blair Road, Avenel, Woodbridge Township, Middlesex County.

The Ecolab facility is located at the intersection of Blair Road and Homestead Avenue in Woodbridge Township, Middlesex County. Ecolab manufactures cleaning and sanitizing products, with active ingredients consisting of caustics and oxidizers. Historically, the facility used solvents as ingredients in a few of the cleaning products; however, the facility no longer manufactures or distributes solvent-based products. The facility serves as a distribution facility and warehoused finished bulk products.

A ground-water remediation system shall be installed that will treat chlorobenzene and dichlorobenzene isomers migrating from the up-gradient Ecolab facility onto the Procter & Gamble Company property that is located directly down-gradient (to the west) of the Ecolab facility.

Monthly, 250 gallons of contaminant degrading microbial population grown from site ground water shall be injected along with 125 gallons of basic nutrients consisting of diammonium phosphate, dipotassium phosphate, monopotassium phosphate, urea and ammonium sulfate, for use in the accelerated biodegradation of dichlorobenzene isomers and chlorobenzene in ground water. The injections shall occur on the Procter & Gamble Company property within the area where the chlorobenzene and dichlorobenzene isomers are migrating from the Ecolab facility.

Oxygen shall be created in-situ via the hydration of calcium peroxide (PermeOx) in a one-time injection in a slurry form into the subsurface. The one-time injection shall be completed to bedrock (approximately 16-20' below ground surface), and consist of 15 injection points per row and a total of 5 rows, with a density of PermeOx of 5.5 pounds per foot. The total amount injected shall be a maximum 4,000 pounds of PermeOx. Additionally, six (6) 1-inch Schedule 40 PVC injection points shall be installed using direct push technology to facilitate injection of the nutrients and microbes into the subsurface.

The nutrient mixture shall consist of approximately two pounds of each of the following: diammonium phosphate, dipotassium phosphate, monopotassium phosphate, urea and ammonium sulfate, with trace elements approximately 1/10th of 1 pound. Concentrations of all nutrients shall be less than one part per million, with trace elements including metals at less than 1 part per trillion, once injected into the aquifer. Each site microbe injection shall consist of 250 gallons of microbes cultured from existing site ground water and grown on the same nutrients and oxygen as listed above. Injections shall utilize the six (6) installed 1-inch Schedule 40 piezometers described above, and shall occur monthly.

This notice is being given to inform the public that the Department has prepared a draft of the NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM / DISCHARGE TO GROUND WATER (NJPDES/DGW) permit (NJPDES NO. NJ8000191), in accordance with the provisions of the

New Jersey "Water Pollution Control Act" (N.J.S.A. 58:10A-1 et seq.), its implementing regulations (N.J.A.C. 7:14A-1 et seq.), and the Ground Water Quality Standards (N.J.A.C. 7:9-6 et seq.).

The implementation of the New Jersey Pollutant Discharge Elimination System requirements are the enforcement mechanism by which pollutant discharges are brought into conformance and compliance with laws, regulations and standards.

The pollution control requirements are those conditions necessary to restrict the discharge of pollutants and protect the public health and the environment.

Copies of the draft permit have been sent to the Mayor, Municipal Clerk, Planning Board, Sewerage Authority, Health Officer, and Environmental Commission of Woodbridge Township, Middlesex County.

The draft document prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, between 8:30 A.M. and 4:00 P.M., Monday through Friday. Information regarding appointments for inspection may be scheduled by calling Central File at (609) 292-0400.

Interested persons may submit written comments on the draft permit to the Assistant Director, Discharge Response Element, P.O. Box 028, 401 East State Street, Trenton, New Jersey, 08625-0028. All comments shall be submitted within 30 days of the date of this public notice. All persons, including the owner or operator, who believe that any condition set forth in this document is inappropriate, must raise all reasonably ascertainable issues and submit in writing to the Department all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period. All comments submitted by interested persons in response to this notice, within the public comment period, will be considered by the Department with respect to the requirements being applied to this facility. After the close of the public comment period, the Department will make a final decision. The Department will respond to all significant and timely comments when a final decision is made. The owner or operator and each person who has submitted written comments will receive notice of Department's final decision.

Any interested person may request in writing that the Department holds a nonadversarial public hearing on the draft document. This request shall state the nature of the issues to be raised in the proposed hearing and shall be submitted within 30 days of the date of this public notice to the Assistant Director, Discharge Response Element, at the address cited above. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period in this notice shall automatically be extended to the close of the public hearing.

Additional information concerning the draft NJPDES Permit may be obtained between the hours of 8:00 A.M. and 4:30 P.M., Monday through Friday from Linda Jordan, of the Southern Bureau of Field Operations, at 609-584-4150.
