

# JOIN THE INDUSTRY IN CELEBRATING NJ MANUFACTURING

[REGISTER](#)

**New Jersey Manufacturing Extension Program (NJMEP)** has been the State's premier training and consulting provider for over 20 years, offering the latest innovations in technology, standards, and practices.

Backed by the National Institute of Standards and Technology (NIST), Our mission is to help New Jersey's small to medium-sized manufacturing businesses access the resources and develop the skills they need to grow, innovate, and expand. Our network, tailored solutions, and engineering know-how give manufacturers the resources they need to stay competitive in a rapidly evolving market. NJMEP enables organizations to enhance their productivity and efficiencies, reduce costs, and improve employee performance. For more than 25 years,

NJMEP has used its extensive network of connections and proven track record of success to help manufacturers adapt to the latest innovative technologies and best practices to realize nearly \$8 billion in value.

**Our services are categorized into the following three areas:**

Operational Excellence

Innovation and Growth

In today's competitive environment successful companies have become flexible, efficient, and responsive to change.
