**Minutes**

SADC Regular Meeting of September 28, 2023 (Open and Closed Session)

It was moved by Mr. Norz and seconded by Mr. Bullock to approve the Open and Closed session minutes of the SADC regular meeting of September 28, 2023. The motion was approved.

SADC Regular Meeting of October 26, 2023 (Open and Closed Session)

It was moved by Mr. Norz and seconded by Mr. Bullock to approve the Open and Closed session minutes of the SADC regular meeting of October 26, 2023. Mr. Ellis and Mr. Kumpel abstained. The motion was approved.

**Report of the Chairman**

Mr. Minch informed the committee that the Division of Agricultural and Natural Resources, which he directs works with SADC on natural resource issues. Division staff serve on several committees that are focused on climate change and how it impacts agriculture.

Mr. Minch also informed the committee that the search for the new Secretary continues and that interviews are being conducted.

**Report of the Executive Director**

Ms. Payne stated that she and Mr. Roohr attended the League of Municipalities conference in November and made presentations covering Special Occasion Events (SOE) implementation and Soil Protection Standards (SPS).

Ms. Payne stated that she, Mr. Bruder, and Ms. Mazella participated in a discussion at Duke Farms centered around using Rowan University's conservation blueprint platform to reexamine how land conservation works in the state, how it can be improved, and what the new challenges are. SADC staff has been performing a great deal of research to develop data for formula-based value discussions. The SADC is ready to reconvene the Future Program subcommittee in the upcoming months.

Approximately 240 comments on the SPS proposed rules have been received. Staff has been providing comments to the committee in batches. A spreadsheet with the comments organized by subject will be provided to the committee in the near future.

Mr. Norz requested that a special meeting be scheduled for the entire committee to discuss the comments received and to conduct a thorough review of the rule. Ms. Payne stated the current plan is to brief the newly appointed members on the proposed rule, convene the SPS subcommittee to review the comments, and then discuss any potential revisions. The State Board of Agriculture has requested a meeting between the board and the SADC subcommittee in January. Mr. Norz stated that he prefers that the entire committee to be involved in these discussions.

Ms. Payne commented that the committee would need to vote to approve any deviation from the subcommittee model used for the last twelve years. Mr. Rosen agreed the board should have an opportunity to provide feedback during the rule making process, but the subcommittee was given the authority to narrow the focus of the conversation and meet with critical interest groups. Those meetings help move the process forward and he believes that it is premature to request a special meeting. Once the subcommittee and staff have met with the State Board, and after a new Secretary has been appointed, a special meeting can be held. Mr. Minch agreed with Mr. Rosen. Mr. Rosen further stated he supports a special meeting because it is important for all the committee members to have an opportunity to be heard on this matter.

Mr. Norz expressed dissatisfaction with the discussion and he believes that members' opinions are not being considered. Ms. Payne disagreed. Mr. Kumpel stated that he understands Mr. Norz's opinion and before the proposed rule is finalized, it should come before the committee for final review and comment. Mr. Rosen asked if there is an opportunity for a special meeting where the subcommittee and staff can discuss SPS with the entire board. Ms. Payne stated that a special meeting can be scheduled.

### **Communications**

Ms. Payne asked the committee to read the communications, as there has been favorable press regarding the fee simple acquisition agreement that the SADC reached with Jaindl Land Company.

### **Public Comment**

Patricia Springwell, a Hunterdon County resident, commended the SADC for its efforts to preserve the Exxon property in Hunterdon County. She also commented that she remains concerned about permanent coverage of fertile soils on preserved farmland. She stated that at a prior meeting it was suggested that a committee be formed to address new and replacement housing being built on preserved farms. She hopes that this effort is proceeding in order to control the excessive development of "McMansions." Ms. Springwell then asked the committee to address permanent paved driveways to access these properties, causing erosion on preserved farms. She stated that she would like woodlands to be addressed on preserved farms and destruction of woodlands should only be allowed for real agricultural purposes. She concluded that the soil and trees need to be protected and that she appreciates the SADC.

### **A. Stewardship**

#### 1. FY 2023 Annual Monitoring Report

Mr. Kimmel and Mr. Berkowitz presented the FY2023 Annual Monitoring Report. Easement holders are responsible to monitor the farms on which they hold the easement once a year between July 1<sup>st</sup> and June 30<sup>th</sup>. Farms preserved with federal funding have a different fiscal year and recently staff has asked partners to make sure those farms are monitored during the overlapping of those two fiscal years to ensure the NRCS and Federal monitoring requirements are met. Mr. Kimmel explained that after monitoring visits are completed, reports must be submitted before July 15<sup>th</sup>. The SADC must be informed of any issues or violations within 30 days. Easement holders are required to maintain a list of their farms, verify ownership, provide copies of the easement to new landowners, and take action to enforce the easement.

Mr. Berkowitz indicated that staff has reviewed the monitoring completion rates to gauge the performance of easement holders. The required monitoring completion rate is 100%. County held easements represent 78% of all preserved farms. There are preserved farms located in 18 counties; 13 counties achieved 100%. Four counties obtained a 97-99% completion rate. One county did not monitor the only farm on which it holds an easement in FY 2023. Collectively, the counties achieved a 99% completion rate.

Easements held by non-profits represent approximately 2% of the preserved farms. There are eight nonprofit easement holders, seven reached 100% monitoring and one failed to monitor its only farm. Collectively, nonprofits reached 98% compliance.

SADC-held easements account for 20% of the total preserved farms. The SADC's rate was 99.8%, with 585 of 586 farms monitored.

The overall completion rate for all preserved farms is 99% for fiscal year 2023, which matched fiscal year 2022.

Atlantic County conducted their monitoring after the FY2023 deadline. It now has reached a 100% monitoring completion rate in FY 2024. There are other counties that missed their monitoring dates because of extenuating circumstances. They were addressed, and each county assured the SADC that they would make up for those shortcomings.

The Montgomery Friends of Open Space monitored their one farm in FY 2023 but did not submit a valid inspection report, and the issue will be addressed by staff.

Mr. Kimmel informed the Committee that most counties and nonprofits have their own staff that conducts monitoring. Four counties have contracted consultants: Cape May uses Cape-Atlantic Conservation District, Hunterdon uses the Hunterdon Soil Conservation District, Mercer has retained Pinto Consulting, LLC, and Warren uses Upper Delaware Conservation District.

Mr. Kimmel next reviewed the issues of concern or types of violations reported in FY2023. Conservation issues, including erosion, water management and drainage were reported at 21%; dumping and trash were 20%; overgrown fields were 10%; unapproved solar and nonagricultural uses were reported at approximately 9%.

In FY 2023, the SADC continued to contract with three soil conservation districts to assist with the monitoring of SADC-held easements. The Upper Delaware Conservation District assisted with monitoring in Warren, Sussex, and Morris Counties, and northern Hunterdon County; the Freehold Soil Conservation District assisted with monitoring in Mercer, Middlesex, Monmouth, and Ocean Counties; and the Cape-Atlantic Conservation District assisted with monitoring in Atlantic, Cape May, and Cumberland Counties. SADC Stewardship and Agricultural Development staff were responsible for monitoring the SADC-held easements in Salem, Gloucester, Camden, Burlington, Somerset, and southern Hunterdon.

Mr. Norz noted that encroachment was identified as an issue. He asked if that was referring to neighbors encroaching on farmers' property and how that would be handled. Mr. Kimmel noted farmer-neighbor issues are first referred to the agricultural mediation program. Mr. Norz asked if the SADC would help to bring the farmer back into compliance and avoid litigation. Ms. Payne stated that this type of lawsuit has never been asserted, as SADC tries to help as much as possible.

Mr. Kimmel advised that the SADC continues to contract with the soil districts. This year farms where issues were identified in the past will be monitored by staff to ensure that inspections are thoroughly done. Staff will also continue to provide training and guidance to contractors to maintain high monitoring completion rates and improve the monitoring process. The SADC will continue working on development of a new farmland preservation database portal and will

consider ways to improve the user-friendliness and functionality of the next generation of the electronic monitoring form.

Mr. Kimmel noted that the monitoring report also satisfies the SADC's tax compliance requirements from the New Jersey Department of Treasury and Internal Revenue Service related to farmland preservation bond funding. This FY 2023 Annual Monitoring Report details the number and nature of routine requests that came before the SADC versus SADC "Reviews of Activities" that might involve a change in use of the preserved farm.

Mr. Berkowitz reviewed the monitoring and enforcement policies. He stated that very few monitoring inspections result in Committee findings of violation. This outcome reflects not only sound stewardship by New Jersey's farmers, but also the dedication of the SADC, CADBs, and non-profits to resolving concerns amicably. Generally, the SADC stewardship process includes conducting an annual monitoring visit with the landowner present (if the landowner desires to be present); follow-up with the landowner if concerns are found; coordination with a county or nonprofit easement grantee if concerns are noted; provide ample time for the landowner and/or grantee to address the concerns; provide or suggest technical assistance that could assist the landowner and grantee in achieving compliance; and taking any necessary action, with the easement grantee taking the lead.

In most cases, concerns found during routine monitoring visits are resolved relatively easily. Sometimes the landowner or farmer will address the issue, and other times issues are resolved after the easement holder performs additional research. Very few concerns evolve into formal violations, which require resorting to legal remedies.

It was moved by Mr. Norz and seconded by Mr. Kumpel to approve the FY2023 monitoring report as presented. The motion was approved.

## **B. Resolution: Installation of Ground-Mounted Solar Facility**

Mr. Willmott stated that the committee received an application to construct a solar energy facility on what is known as the "Equine Farm" in Burlington County. The 140-acre farm was preserved as a county easement purchase in 1997. The farm, which specializes in harness racing, has approximately 115 acres of pasture. The proposed solar facility is in the northern pasture. A 5,500 square foot array will be connected to meters located in the farmstead complex to serve the agricultural structures. There are 100 horses on the farm and the landowner positioned the solar panels away from an active farm complex on

ground with lower quality soils. The electrical line will be installed by directional drilling to minimize site disturbance, and the footings used will also have very minimal site disturbance. The system will power almost 100% of the farm's energy- needs. Mr. Willmott stated that staff reviewed the application, and its ground mounting complies with regulations. Staff recommends approval of this application.

It was moved by Mr. Kumpel and seconded by Mr. Rosen to approve Resolution FY2024R12(1) granting approval for the installation of a ground-mounted solar facility for the Legend Farm.

The motion was unanimously approved. A copy of Resolution FY2024R12(1) through is attached to and a part of these minutes.

### **C. Resolutions: Final Approval - County PIG Program**

Ms. Miller, Mr. Zaback, and Ms. Mazella referred the committee to four requests for final approval under the County PIG program. They reviewed the specifics of the requests with the committee and stated that the staff recommendation is to grant approval.

#### **E. Resolutions: Final Approval – State Acquisition Program**

Ms. Miller referred the committee to three requests for approval under the State Acquisition program. She reviewed the specifics of the requests with the committee and stated that the staff recommendation is to grant approval.

Mr. Kumpel commented that there has been a lot of positive feedback surrounding the acquisition of the Jaindl Land Company property as it sends a positive message to warehouses that prime soils need to be protected.

It was moved by Mr. Norz and seconded by Mr. Kumpel to approve Resolution FY2024R12(9) granting final approval under the State Acquisition Program, as presented, subject to any condition of said resolution.

Mr. Ellis questioned the ability to build on the proposed exception area location for the Katz farm due to the drainage issues in that area. Ms. Payne stated that staff will look into that before final approval can take place. Mr. Norz asked if staff ever considered having an owner include the proposed driveway in their exception area. Ms. Payne stated that does not typically happen for non-severable exceptions. Some attorneys recommend landowners except the driveways out and some landowners want to keep them so they can get paid for

the acreage. Ms. Miller stated that they will re-address the location of the exception area with the owner.

### **G. Resolution: Final Approval—Municipal PIG Planning Program**

**Note: Mr. Bullock recused himself from this discussion.**

Mr. Allen stated that there are pending updates to four of the SADC municipal partner preservation plans. These plans serve as strategic documents to better promote agriculture as a viable industry within these communities. The planning process generally allows partners to review past trends and present conditions to better formulate proposals to help them with their goals for future farmland preservation. It's a highly collaborative process between SADC staff, the ag advisory committees of these towns as well as the citizens. To be eligible for the SADC's annual planning incentive grant, these plans must be updated and adopted at least once every 10 years. Currently there are 45 municipalities throughout the state and 18 counties with SADC approved preservation plans.

Franklin Township, Warren County has the most farm assessed land of any town within Warren County. Two-thirds of the land in the township is farmland assessed. Since the township's last farm plan update, 22 farms have been preserved with a total of 1,500 acres. The township has targeted approximately 5,000 acres and within the next ten years it plans on preserving 1,000 acres.

Green Township, Sussex County has three additional farms preserved since its 2012 plan update, totaling 162 acres. The current plan targeted 1,400-acres and over the next 10 years the township hopes to preserve 500 of those acres.

Marlboro Township in Monmouth County has farm assessed property that represents 13% of the land in the township. Over the next few years, it has 432 acres targeted, and within the next ten years the township plans to preserve 150 acres.

Upper Pittsgrove Township, Salem County, which has the most land (77%) in active agriculture of any municipality within the state. Since the completion of its last farm plan, an additional 4,600 of farmland have been preserved, and going forward the township will have a little over 7,000 acres targeted. In the next 10 years the township plans to preserve an additional 3,000 of those acres. Mr. Allen stated that since he appeared before the SADC in May, there has been a modest increase in acreage of 1,500 acres (0.7%) in the last six months.

It was moved by Mr. Ellis and seconded by Mr. Kumpel to approve Resolution FY2024R12(16) granting final approval under the Municipal PIG Planning Program, as presented, subject to any condition of said resolution. The motion was unanimously approved. A copy of Resolution FY2024R12(16) is attached to and a part of these minutes.

## **H. FY2024 Budget**

Mr. Distaulo presented the FY2024 budget for both the Farmland Preservation Program (FPP) and Right-to-Farm (RTF) Program. Mr. Distaulo asked the committee to approve a budget limit of \$6,270,350 for administrative costs.

Mr. Distaulo explained that the Right to Farm budget is used for salary and legal costs associated with administering the program. When staff work on RTF matters, they track their hours, and that information is used to reimburse the general budget for those costs and separate legal fees for RTF issues. Ms. Payne noted that RTF is not a Farmland Preservation acquisition cost. Therefore, staff

cannot expend CBT funds and must allocate separate funds appropriated in the state budget specifically for RTF.

It was moved by Mr. Kumpel and seconded by Mr. Norz to approve the FY2024 Budget. A roll call vote was taken. The motion was unanimously approved.

### **Public Comment**

Ms. Springwell from Hunterdon County commended SADC on the acquisition of the Jaindl Land Company property as a major accomplishment. She stated that she is concerned with the amount of wetlands on the Wayne Schmied property and the proposed SPS disturbance allotment as the high percentage would be a threat to development on the fertile soils on the property. Lastly, she reiterated her concern for large houses being developed on farms and stated that it will become a financial hardship for future generation farmers.

### **CLOSED SESSION**

At 10:55 a.m. Ms. Payne read the following resolution to go into Closed Session:

In accordance with the provisions of the Open Public Meetings Act, N.J.S.A. 10:4-13, it is hereby resolved that the SADC shall now go into executive session to discuss the certification of value of a development easement on property in Freehold Township, Monmouth County under the county planning incentive grant program; litigation entitled, BBR Investments, LLC v. Gurba, et al.; any matters falling within the attorney-client privilege; and any matters under N.J.S.A. 10:4-12(b) that have arisen during the public portion of the meeting. The minutes of such meeting shall remain confidential until the Committee determines that the need for confidentiality no longer exists.

It was moved by Mr. Ellis and seconded by Mr. Bullock to go into Closed Session. A vote was taken. The motion was unanimously approved.

### **Action As a Result of Closed Session**

#### **Homestead Reid Partnership**

It was moved by Mr. Norz and seconded by Mr. Kumpel to approve the certification of value as discussed in closed session for the Homestead Reid Property. A roll call vote was taken. Mr. Bullock recused. The motion was approved.

**BBR Investments, LLC. V. Gurba**

It was moved by Mr. Norz and seconded by Mr. Rosen to concur with staff recommendation on how to proceed in the Gurba litigation. A roll call vote was taken. The motion was unanimously approved.

**Re:** FY 2023 Annual Monitoring Report

---

Each year, the SADC and its farmland preservation partners – County Agriculture Development Boards (CADBs) and non-profits organizations – are required to monitor the farms on which they hold the farmland preservation deed of easement. Partners submit their monitoring reports to the SADC, inform the SADC of any concerns or violations observed during monitoring visits, and work with landowners and farmers to address the concerns.

Please see attached for the FY 2023 Annual Monitoring Report. The report is based on the monitoring reports submitted by the SADC and partners as well as subsequent outreach and communication with partners. It includes an overview of the requirements for monitoring, examines how monitoring went in FY 2023, and describes plans for continued improvements to the monitoring process.

**State Agriculture Development Committee**  
**December 7, 2023**

**Contents:**

- Monitoring Requirements
- Review of Monitoring in FY 2023
- SADC Monitoring in FY 2023, and 2024 Plans
- Tax Compliance of SADC Related to Farmland Preservation Bond Funding
- Monitoring and Enforcement Methodology

## **Monitoring Requirements**

Pursuant to N.J.A.C. 2:76-6.13, 2:76-6.18A, 2:76:16.5, and 2:76-17.16, the SADC, and County Agriculture Development Boards (CADBs) and non-profits that receive SADC cost share grant funds for the acquisition of development easements, are required to monitor all lands to ensure compliance with the provisions of the Deed of Easement. Monitoring activities shall consist of the following:

1. An onsite inspection shall be performed at least once a year.
2. All inspections and monitoring shall be completed within the period commencing July 1 and ending June 30.
3. A written summary shall be provided to the Committee by July 15, verifying that the inspections were conducted during the scheduled period with a certification concerning whether the farm was in compliance with the provisions of the Deed of Easement.
4. The Board shall inform the SADC if any of the terms and conditions of the Deed of Easement were violated within 30 days of identifying such violation.
5. Appropriate action shall be taken within the Board's and/or County's authority to ensure that the terms and conditions of the Deed of Easement are enforced.
6. A database shall be maintained of all lands from which a development easement was acquired.
7. The SADC shall be annually informed of any record ownership changes which occur on lands from which development easements have been acquired.
8. The SADC shall be informed of any actions which require the SADC's review and/or approval.

## **Monitoring Completion Rates in FY 2023**

The SADC compiles monitoring completion rates to gauge the general performance of holders of the farmland preservation deeds of easement, i.e., counties, non-profits, and the SADC. The **FY 2023 monitoring completion rates** are detailed on the attached spreadsheet, **Attachment 1**, and summarized below.

County-Held Easements – The majority of easements (78%) are held by counties. The regulatory requirement for monitoring completion is 100%, and in FY 2023, this mark was

met by thirteen (13) counties. Four (4) additional counties were very close to 100% at 97-99% (1-5 farms not monitored). One (1) county, Atlantic, had a completion rate of 0% (0 of 11 farms monitored). Collectively, the counties had a monitoring completion rate of 99%.

**Attachment 2** shows the **geography of monitoring completion rates for counties**.

Non-Profit-Held Easements – Easements held by non-profits account for about 2% of the total number of easements. In FY 2023, non-profits submitted monitoring reports for 98% of the farms on which they hold the farmland preservation deed of easement (51 of 52 farms). Seven (7) non-profits had a 100% monitoring completion rate. One (1) non-profit, Montgomery Friends of Open Space had a 0% monitoring rate (0 of 1 farm monitored).

As noted in past reports, not included in the non-profit completion rate calculation are any farms that a non-profit preserved and whose easements were then assigned by the non-profits to the counties after preservation. When the easement is assigned to another holder, something done through a recorded document (Assignment of Deed of Easement), the subsequent holder becomes responsible for the monitoring.

SADC-Held Easements – The SADC holds the second-highest total number of easements (about 20%) and had a 99.8% (585 of 586 farms) monitoring completion rate in FY 2023.

Cumulative Completion Rates – Overall, the FY 2023 monitoring completion rate was 99%.

### **Review of Monitoring in FY 2023**

In terms of overall monitoring completion rates, the cumulative completion rate in FY 2023 matched last year's monitoring rate, which also was 99%.

The SADC attributes the continued high completion rates to ongoing communication and outreach with partners. During Winter 2023, the SADC emailed partners with updates regarding their farm lists. The SADC also had phone conversations with many partners and provided email reminders about the deadlines for completing monitoring visits (June 30) and submitting reports (July 15).

While Atlantic County did not complete its monitoring requirements in FY 2023, the SADC anticipates a return to a 100% monitoring completion rate in FY 2024. The Atlantic CADB often conducts its annual farm visits in June, however their most recent inspections took place in July 2023, which is in the first month of (and counts for) FY 2024. The SADC also recognizes how some counties' monitoring completion rates were very close to, and would have been, 100% if not for extenuating circumstances, e.g., landowner scheduling issues.

The Montgomery Friends of Open Space said they monitored their one farm in FY 2023, but they did not submit an inspection report.

In terms of who conducted the monitoring inspections, most counties and all non-profits used their own staff. A few counties contracted with and used a consultant:

- Cape May – Cape-Atlantic Conservation District
- Hunterdon – Hunterdon Soil Conservation District
- Mercer – Pinto Consulting, LLC
- Warren – Upper Delaware Conservation District

For a **breakdown of easement-related concerns noted during monitoring inspections in FY 2023**, see **Attachment 3 – Issues Reported from Monitoring**. As in past years, conservation issues (erosion and water management) were at the top of the list, with such issues comprising 21.2% of all concerns observed. Next were dumping (20.7% of all concerns observed), overgrown fields and unapproved solar (10.6% and 9.7% of all concerns observed, respectfully), followed by non-agricultural uses, fallow fields, soil disturbance, and encroachment (each about 6-9% of all concerns observed).

### **SADC Monitoring in FY 2023, and 2024 Plans**

In FY 2023, the SADC continued to contract with three soil conservation districts to assist with the monitoring of SADC-held easements. The Upper Delaware Conservation District assisted with monitoring in Warren, Sussex, and Morris Counties and the northern portion of Hunterdon County; the Freehold Soil Conservation District assisted with monitoring in Mercer, Middlesex, Monmouth, and Ocean Counties; and the Cape-Atlantic Conservation District assisted with monitoring in Atlantic, Cape May, and Cumberland Counties. SADC Stewardship and Agricultural Development staff were responsible for monitoring the SADC-held easements in the remaining counties, i.e., Salem, Gloucester, Camden, Burlington, Somerset, and southern Hunterdon.

The SADC renewed its partnerships with the districts to have them cover the same general areas in FY 2024. Each district's list of farms to monitor remains the same for FY 2024 with the following exceptions: newly-preserved farms were added (i.e., farms that were preserved in FY 2023 and that need to be monitored for the first time in FY 2024), and small number of farms were removed (for either spot-check purposes or because they had ongoing concerns that the SADC was already working with the landowners on and would be visiting the farms itself). In recognition of the importance of continued training regarding how to conduct a typical annual monitoring inspection, the SADC also included in the contracts a required refresher training, to be conducted virtually this Fall. For a

**geographical breakdown of SADC general monitoring assignments** in FY 2023 and FY 2024, see **Attachment 6**.

In FY 2024, the SADC plans to continue working with all partners to maintain high monitoring completion rates and improve the monitoring process. The SADC plans to continue its outreach efforts and provide additional monitoring education, e.g., develop monitoring handbook guidance, conduct related monitoring training, and check in with partners to discuss monitoring concerns. In July 2023, the SADC provided each partner with an updated list of the preserved farms on which it holds the easement. In addition to providing handbook guidance and group training, the SADC could offer to join partner staff, as it has joined District staff in the past, on a portion of monitoring visits one day to provide feedback, answer questions, and promote consistency around the state. As the SADC works to develop its new farmland preservation database portal (eFARMS), it also will consider ways to improve the user-friendliness and functionality of the next generation of the monitoring e-Form. These efforts should help improve the system of farmland preservation monitoring.

Another monitoring requirement is to provide the USDA Natural Resources Conservation Service (NRCS), on a Federal fiscal year basis, with the annual monitoring reports for farms that were preserved with federal funding assistance. The SADC provided NRCS with this information in August-September 2023, after which NRCS confirmed that the SADC had completed 100% of its Federal FY 2023 monitoring responsibilities. Because the Federal fiscal year (October 1 – September 30) and state fiscal year (July 1 – June 30) do not completely line up, the SADC plans to monitor federally-funded farms between October 1 and June 30 each year (the intersection of the Federal and state fiscal years). The SADC has asked partners to do the same for any federally-funded farms for which they are the easement holder.

### **Tax Compliance of SADC Related to Farmland Preservation Bond Funding**

Pursuant to a directive by the New Jersey Department of the Treasury relative to post-issuance compliance with tax-exempt bond issuances pursuant to Section 141 of the Internal Revenue Code, this FY 2023 Annual Monitoring Report details the number and nature of routine requests that came before the SADC versus SADC ‘Reviews of Activities’ that might involve a change in use, i.e., easement violations. See the following attachments for this FY 2023 information:

**Attachment 3** - Reported Issues from Monitoring

**Attachment 4** - Routine Stewardship Matters/Concerns Acted Upon by the SADC in FY 2023

**Attachment 5** - Stewardship Concerns/Violations Pending (Current as of June 30, 2023)

## **Monitoring and Enforcement Methodology**

Very few monitoring inspections result in Committee findings of violation. This outcome reflects not only sound stewardship by New Jersey's farmers, but also the dedication of the SADC, CADBs, and non-profits to resolving issues and concerns amicably. Generally, the SADC stewardship process includes the following steps:

- Conduct an annual monitoring visit with the landowner present (if the landowner desires to be present);
- Follow-up with the landowner if concerns are noted;
- Coordinate with the grantee if concerns are noted (if a CADB or non-profit partner holds the easement);
- Provide ample time for the landowner and/or grantee to address the concerns;
- Provide or suggest technical assistance that could assist the landowner and grantee in achieving compliance; and
- Take action if necessary (with the grantee taking the lead if it holds the easement).

In most cases, concerns noted during routine monitoring visits are resolved relatively easily. Sometimes the landowner or farmer will address the issues, and sometimes a concern ceases to be an issue once the easement holder performs additional research, e.g., locating past approvals from CADBs or the SADC for a use, structure, or something else. Only a handful of concerns evolve into a violation, a result that often requires legal remedies.

**December 7, 2023**

WHEREAS, Legend Farm, LLC., hereinafter "Owner", is the record owner of Block 2303, Lot 13, in the Township of Springfield, County of Burlington, by Deed dated January 30, 2014, and recorded on February 11, 2014, in the Burlington County Clerk's Office in Deed Book 13113, Page 8424, totaling approximately 140.264 acres, hereinafter referred to as the "Premises" (as shown on Schedule "A"); and

WHEREAS, a development easement on the Premises was conveyed to the Burlington County Board of Chosen Freeholders (Commissioners), on December 29, 1997, and recorded on December 30, 1997 pursuant to the Agriculture Retention and Development Act, N.J.S.A. 4:1C-11 et seq., as a Deed of Easement in Deed Book 5514, Page 32; and

WHEREAS, the Premises was created as a result of a division of Premises considered by the Committee on October 23, 1997; and

WHEREAS, the SADC provided a cost share grant to the County, as evidenced by a cost sharing grant agreement recorded in the Burlington County Clerk's office on July 1, 1998, in Deed Book 5612, Page 318, thereby enrolling the Deed of Easement in the ARDA program administered by the SADC; and

WHEREAS, P.L. 2009, c.213, effective January 16, 2010, requires landowners to apply to the State Agriculture Development Committee (SADC) for approval before constructing, installing, and operating renewable energy generating facilities, structures and equipment on preserved farms, including within areas excepted from the Premises; and

WHEREAS, on June 3, 2013, regulations at N.J.A.C. 2:76-24.1, et seq. became effective that implement the legislation allowing owners of preserved farms to install solar energy systems on preserved farms; and

WHEREAS, the regulations, in pertinent part, state that the owner of a preserved farm may construct, install, and operate renewable energy generation facilities on preserved farms for the purpose of generating power or heat, provided the following criteria are met:

1. The facilities will not interfere significantly with the use of the land for agricultural or horticultural production.
2. The facilities are owned by the landowner, or will be owned by the landowner, upon the conclusion of the term of an agreement with the installer or operator of the solar energy generation facilities, structures, or equipment by which the landowner uses the income or credits realized from the solar energy generation to purchase the facilities, structures, or equipment.
3. The facilities will be used to provide power or heat to the farm, either directly or indirectly, or to reduce, through net metering or similar programs and systems, energy costs on the farm.
4. Solar energy facilities on the farm are limited in total annual energy generation to:
  - i. The farm's previous calendar year's energy demand plus 10 percent, in addition to energy generated from facilities, structures, or equipment existing on roofs of buildings or other structures on the farm on January 16, 2010; or
  - ii. Alternatively at the option of the landowner, to an occupied area consisting of no more than one percent of the area of the farm;
5. The owner(s) of the farm and the solar energy facilities will sell energy only through net metering, or as otherwise permitted under an agreement pursuant to number 2 above, and/or directly to the electric distribution system provided that the solar energy facilities occupy no greater than one percent of the farm;
6. The land occupied by the solar energy facilities is eligible for valuation, assessment, and taxation pursuant to P.L. 1964, c. 48 (N.J.S.A. 54:4-23.1 et seq.) and will continue to be eligible for such valuation after construction of the solar energy facilities.
7. The solar energy facilities do not exceed one acre of impervious cover on the premises.

WHEREAS, the Owner submitted an "Application for Energy Generation Facilities on Preserved Farmland" pursuant to N.J.A.C 2:76-24.5; and

WHEREAS, the Premises is an equine operation with numerous fenced paddocks and pastureland for horses that are boarded and trained on site for harness racing; and

WHEREAS, the Owner is seeking SADC approval for the construction of a ground-

mounted photovoltaic solar energy generation facility in the northern pasture, adjacent to an existing equine track on the Premises, as shown on Schedule "B"; and

WHEREAS, the ground underneath the array will not be altered and will remain grass-covered; and

WHEREAS, ground-mounting is necessary because the Owner and installer have concerns with installing the facility on the rooftops due to the age of the structures and their structural integrity to support the additional load; and

WHEREAS, the Owner chose the proposed location to minimize interference with the equine activities and nearby pasturing of the horses in and around the farmstead complex; and

WHEREAS, the energy demand for the ground-mounted solar energy generation facility will be for a barn and stables within the farmstead complex on the Premises; and

WHEREAS, the Owner submitted 12 months of utility bills reflecting that the energy demand for the previous calendar year for the farm was approximately 155,626 kWh; and

WHEREAS, the estimated annual rated capacity of the proposed new solar energy generation facility is 150,829 kWh per year; and

WHEREAS, accordingly, the proposed solar energy generation facilities will supply approximately 96.9% of the previous calendar year's energy demand; and

WHEREAS, the solar energy generation facilities will have an occupied area of no more than one percent of the farm pursuant to N.J.A.C 2:76-24.4(a)4ii.; and

WHEREAS, N.J.A.C. 2:76-24.3 defines "occupied area", in relevant part, as the total contiguous or noncontiguous area(s) supporting the solar facilities and related infrastructure, including all areas of land that are devoted to or support the solar energy facilities; any areas of land no longer available for agricultural or horticultural production due to the presence of the solar energy facilities; nonfarm roadways including access roads; any areas of the farm used for underground piping or wiring to transmit solar energy or heat where the piping or wiring is less than three feet from the surface; the square footage of solar energy facilities mounted on buildings; areas consisting of other related facilities, structures, and equipment, including any other buildings or site amenities, deemed necessary for the production of solar energy on the farm; and

WHEREAS, the occupied area of the ground-mounted solar energy facility consists of 5,502 sq./ft. of area for the panels and an associated 20 ft. buffer around the panels, totaling approximately 19,500 sq./ft., and 17.71 sq./ft. for the holes necessary for the directional drilling to install the underground conduit connecting the panels to the meters, for a total occupied area of

19,517.71 sq./ft., or 0.31% of the farm; and

WHEREAS, the occupied area does not exceed one percent of the area of the farm pursuant to N.J.A.C 2:76-24.4(a)4ii.; and

WHEREAS, the Owners provided evidence confirming that they will own the solar energy generation facilities; and

WHEREAS, the Owners provided evidence confirming that the solar energy generation facilities will provide power to the Premises directly through net metering to reduce energy costs on the Premises; and

WHEREAS, N.J.A.C. 2:76-24.4(a)8 prohibits solar energy facilities from exceeding one-acre of impervious cover on the Premises; and

WHEREAS, N.J.A.C. 2:76-24.3 defines impervious cover as any structure or surface that prevents the infiltration of precipitation into the land including, but not limited to, the inverter, pilings, poles, concrete, asphalt, machine-compacted soil, compacted stone areas, plastic or other impermeable ground cover, and foundations; and

WHEREAS, the proposed ground mounted solar energy facility comprises approximately 28.84 sq./ft. of impervious cover from the helical pilings that support the solar panels (48 total, 6.01 sq./ft. per helical piling); and

WHEREAS, N.J.A.C 2:76-24.6(a)1 requires that the solar energy facilities, structures, and equipment not interfere significantly with the use of the land for agricultural and horticultural production; and

WHEREAS, the proposed ground mounted solar energy facility will be located in the northern pasture area used for grazing adjacent to an existing equine track, as identified on Schedule "B"; and

WHEREAS, N.J.A.C. 2:76-24.6(a)1iii.(1) requires site disturbance associated with the solar energy facility, including, but not limited to, grading, topsoil, and subsoil removal, excavation, and soil compaction, shall not exceed one acre on the Premises; and

WHEREAS, the site disturbance associated with the holes necessary for the directional drilling in order to install the underground conduit is a maximum of 17.71 sq./ft. and the disturbance associated with the helical pilings to support the array is 28.84 sq./ft. (48 total, 6.01 sq./ft. per helical piling), for a total area of disturbance of approximately 46.55 sq./ft. of the preserved Premises; and

WHEREAS, the Burlington CADB reviewed the application and submitted correspondence in support of the project; and

NOW THEREFORE BE IT RESOLVED:

1. The WHEREAS paragraphs above are incorporated herein by reference.
2. The SADC finds that the Owner has complied with all the relevant provisions of N.J.A.C. 2:76- 24.1 et seq. concerning the installation of a photovoltaic solar energy generation facility, structures and equipment on the Premises.
3. The SADC approves of the construction, installation, operation and maintenance of the energy generation facilities, structures, and equipment as proposed by the Owner, consisting of approximately 19,517.71 sq./ft. of occupied area and 46.55 sq./ft. of site disturbance related to the posts that will support the panels and the holes necessary for the directional drilling connecting the panels to the meters, and having a rated capacity of 150,829 kWh's of energy as identified in Schedule "B", and as described further herein.
4. The energy generation facility will not service the non-severable exception areas on the Premises.
5. The total electrical energy demand for the barn and stables on the Premises associated with this system is 155,626 kWh's annually.
6. This approval is non-transferable.
7. This approval is considered a final agency decision appealable to the Appellate Division of the Superior Court of New Jersey.
8. This action is not effective until the Governor's review period expires pursuant to N.J.S.A 4:1C-4f.

8. The final acreage of the exception area shall be subject to onsite confirmation, and the Executive Director may approve final size and location of the exception area such that the size does not increase more than one (1) acre and the location remains within the substantially same footprint as the herein-approved exception, so long as there is no impact on the SADC certified value.
9. All survey, title and all additional documents required for closing shall be subject to review and approval by the SADC.
10. This approval is considered a final agency decision appealable to the Appellate Division of the Superior Court of New Jersey.

NOW THEREFORE BE IT RESOLVED:

1. The WHEREAS paragraphs set forth above are incorporated herein by reference.

2. The SADC grants preliminary approval to the Property for a fee simple purchase pursuant to N.J.A.C. 2:76-8.5 and N.J.A.C. 2:76-6.16 because the Property:
  - a. is above average size and quality for Burlington County and meets the criteria to be considered a "Priority" farm pursuant to N.J.A.C. 2:76-8.5(c); and
  - b. contains approximately 77.89% Prime soils and 11.13% Statewide Important soils; and
  - c. contains over 63 acres (74%) of tillable land; and
  - d. is located within the North project area as identified in Burlington County's Farmland Preservation Plan and is a targeted farm in the county's planning incentive grant programs; and
  - e. the SADC believes that the conversion of the farm to non-agricultural use would likely cause a substantial negative impact on the public investment made in farmland preservation within the project area.
  
3. The SADC authorizes staff to proceed with the following:
  - a. Enter into a 120-day option agreement with the Landowner.
  - b. Secure two independent appraisals to estimate the fair market value of the Property.
  - c. Review the two independent appraisals and recommend a certified fair market easement value of the property to the SADC.
  
4. This approval is considered a final agency decision appealable to the Appellate Division of the Superior Court of New Jersey.
  
5. This action is not effective until the Governor's review period expires pursuant to N.J.S.A. 4:1C-4f.

**December 7, 2023**

WHEREAS, the State Agriculture Development Committee ("SADC") is authorized under the Farmland Preservation Planning Incentive Grant Act, P.L. 1999, c.180 (N.J.S.A. 4:1C-43.1), to provide a grant to eligible counties and municipalities for farmland preservation purposes based on whether the identified project area provides an opportunity to preserve a significant area of reasonably contiguous farmland that will promote the long term viability of agriculture as an industry in the municipality or county; and

WHEREAS, to be eligible for a grant, a municipality shall:

1. Identify project areas of multiple farms that are reasonably contiguous and located in an agricultural development area ("ADA") authorized pursuant to the Agriculture Retention and Development Act, P.L. 1983, c.32 (C.4:1C-11 et seq.);
2. Establish an agricultural advisory committee composed of at least three, but not more than five, residents with a majority of the members actively engaged in farming and owning a portion of the land they farm;
3. Establish and maintain a dedicated source of funding for farmland preservation pursuant to P.L. 1997, c.24 (C.40:12-15.1 et seq.), or an alternative means of funding for farmland preservation, such as, but not limited to, repeated annual appropriations or repeated issuance of bonded indebtedness, which the SADC deems to be, in effect, a dedicated source of funding; and
4. Prepare a farmland preservation plan element pursuant to paragraph (13) of section 19 of P.L. 1975, c.291 (C.40:55D-28) in consultation with the agricultural advisory committee; and
5. Prepare and adopt a right-to-farm ordinance that is consistent with, or provides greater protections to commercial farm operators and owners than, the Right to Farm Act, N.J.S.A. 4:1C-1 et seq., as determined by the Committee; and

WHEREAS, the SADC adopted rules under Subchapter 17A (N.J.A.C. 2:76-17A) to implement the Farmland Preservation Planning Incentive Grant Act, P.L. 1999, c.180 (N.J.S.A. 4:1C-43.1) by establishing a municipal farmland preservation planning incentive grant program; and

WHEREAS, pursuant to N.J.A.C. 2:76-17A.6, a municipality applying for a grant to the SADC shall submit:

1. A copy of the municipal comprehensive farmland preservation plan, as amended, if appropriate;
2. An inventory for each project area showing the number of farms or properties, and their

individual and aggregate acreage, for targeted farms, farmland preservation applications with final approvals, preserved farms, lands enrolled in a term farmland preservation program and preserved open space compatible with agriculture;

3. A report summarizing the status of development easement purchases, the expenditure of Committee funds, updates to policies, funding availability, estimates of targeted farm easement costs and contact information;
4. Copies of agricultural advisory committee meeting minutes; and
5. A resolution of support from the governing body and documentation of the agricultural advisory committee's review of the proposed application; and

WHEREAS, pursuant to N.J.A.C. 2:76-17A.4, the SADC specified that a municipal comprehensive farmland preservation plan shall, at a minimum, include the following components:

1. The adopted farmland preservation plan element of the municipal master plan;
2. A map and description of the municipality's agricultural resource base including, at a minimum, the proposed farmland preservation project areas and the location and extent of important farmland soils;
3. A description of the land use planning context for the municipality's farmland preservation initiatives including identification and detailed map of the county's adopted Agricultural Development Area (ADA) within the municipality, consistency of the municipality's farmland preservation program with county and other farmland preservation program initiatives and consistency with municipal, regional and State land use planning and conservation efforts;
4. A description of the municipality's past and future farmland preservation program activities, including program goals and objectives, and a summary of available municipal funding and approved funding policies in relation to the municipality's one-, five- and ten-year preservation projections;
5. A discussion of the actions the municipality has taken, or plans to take, to promote agricultural economic development in order to sustain the agricultural industry;
6. Other farmland preservation techniques being utilized or considered by the municipality;
7. A description of the policies, guidelines or standards used by the municipality in conducting its farmland preservation efforts, including any minimum eligibility criteria or standards used by the municipality for solicitation and approval of farmland preservation program applications in relation to SADC minimum eligibility criteria as described at N.J.A.C. 2:76-6.20, adopted ranking criteria in relation to SADC ranking factors at N.J.A.C. 2:76-6.16, and any other policies, guidelines or standards that affect application evaluation or selection;
8. A description of municipal staff and/or consultants used to facilitate the preservation of farms; and
9. Any other information as deemed appropriate by the municipality; and

WHEREAS, on July 25, 2019 the SADC updated its 2007 adopted *Guidelines for Developing Municipal Comprehensive Farmland Preservation Plans* which supplement N.J.A.C. 2:76-17A and provide uniform, detailed plan standards, update previous planning standards, and incorporate recommendations from the 2006 edition of the Agricultural Smart Growth Plan for New Jersey and the Planning Incentive Grant Statute (N.J.S.A. 4:1C-43.1); and

WHEREAS, the *Guidelines* emphasize that these municipal comprehensive farmland preservation plans should be developed in consultation with the agricultural community including the municipal agricultural advisory committee, municipal planning board, CADB, county planning board and the county board of agriculture, and where appropriate, in conjunction with surrounding municipalities and the county comprehensive farmland preservation plan, with at least two public meetings including a required public hearing prior to planning board adoption as an element of the municipal master plan; and

WHEREAS, to date, the SADC has received and granted final approval to 45 municipal planning incentive grant applications pursuant to N.J.A.C. 2:76-17A.6(a) and N.J.A.C. 2:76-17A.76(b); and

WHEREAS, in total, the 45 municipal planning incentive grant participants identified 96 project areas in 9 counties and targeted 2,250 farms and 107,362 acres at an estimated total cost of, \$1,159,504,879 with a ten-year preservation goal of 60,302 acres as summarized in the attached Schedule A; and

WHEREAS, of the 45 municipalities, 32 applied for funding under the 2024 Municipal Planning Incentive Grant Program; and

WHEREAS, Subchapter 17A (N.J.A.C. 2:76-17A) includes a requirement, at N.J.A.C. 2:76-17A.4(b), that comprehensive farmland preservation plans be reviewed and readopted by the municipal planning board, in consultation with the agricultural advisory committee, at least every 10 years; and

WHEREAS, the SADC established cost share grant funding for the preparation or update of comprehensive farmland preservation plans as detailed in SADC Policy #55, effective July 25, 2019; and

WHEREAS, Franklin Township, Warren County; Green Township, Sussex County; Marlboro Township, Monmouth County; and Upper Pittsgrove Township, Salem County have executed grant agreements with the SADC for funding the update of their comprehensive farmland preservation plans; and

WHEREAS, pursuant to N.J.A.C. 2:76-17A.6(b)1 and N.J.A.C. 2:76-17A.6(b)2, in order to improve municipal and county farmland preservation coordination, the municipalities forwarded their 2024 Municipal Planning Incentive Grant applications to the county for review and provided evidence of county review and comment and, if appropriate, the level of funding the county is willing to provide to assist in the purchase of development easements on targeted farms; and

WHEREAS, pursuant to N.J.A.C. 2:76-17A.7, SADC staff reviewed and evaluated the municipal applications to determine whether all the components of the comprehensive farmland preservation plans were fully addressed and complete and whether the project area inventories are complete and technically accurate, and that the applications are designed to preserve a significant area of reasonably contiguous farmland that will promote the long-term economic viability of agriculture as an industry; and

WHEREAS, on May 25, 2023, the SADC approved the 2024 Municipal Planning Incentive Grant application for Green Township, Sussex County due to its prior comprehensive farmland preservation plan being under 10 years old; and

WHEREAS, on May 25, 2023, the SADC approved the 2024 Municipal Planning Incentive Grant application for Franklin Township, Warren County; Marlboro Township, Monmouth County; and Upper Pittsgrove, Salem County conditioned upon reoption of their comprehensive farmland preservation plans; and
