| ♍ Virgo, a Virgin, Bowels. | ♓ Pisces, the Fish, Feet. |

ASTRONOMICAL CHARACTERS EXPLAINED.

- | | |
|--------------------------|--------------------|
| ● New Moon. | ♃ Jupiter. |
| ○ Full Moon. | ♂ Mars. |
| ☾ First } Quarter, or | ♀ Venus. |
| ☽ Last } Quarter, or | ☿ Mercury. |
| Moon in general. | ♃ Georgium Planet. |
| ♋ Moon's ascending node. | ♌ Conjunction. |
| ☉ or ☌ Sun. | ♍ Opposition. |
| ♄ Saturn. | ☐ Quartile. |

To know where the sign is—First find the day of the month, and against it you have the sign or place of the moon in the 6th column—then finding the sign here, it shews the part of the body it governs.

ECLIPSES IN THE YEAR 1806.

1. Of the Moon, on the 4th of January, visible as follows: Beginning at 5h. 45m. in the evening—middle at 7h. 8m.—Ends at 8h. 35m.—Digits eclipsed 8 1/2 from the South side of the earth's shadow.

2. Of the Sun, on the 16th day of June, visible, and nearly total at Philadelphia. Beginning at 9h. 45m. in the morning—nearest approach of the centres of the Sun and Moon at 11h. 10m. in the morning—at which time the Sun will be 11 7/8 digits eclipsed—and only the one 96th part of his diameter uneclipsed of his South Limb—and ends at 01h. 35m. afternoon.

The dark conical shadow of the Moon which will be 120 miles broad on the surface of this globe, will come from the Western parts of America, and pass nearly over Pittsburg, Bethlehem, New-York, New-Haven, and Newport, and enter the Atlantic Ocean, and finally leave the United States of this Continent—And all places where the centre passes over the Sun will be totally eclipsed about 2 minutes.

3. Of the Moon, on the 30th day of June in the afternoon, invisible.

4. Of the Sun, on the 9th day of December, in the afternoon, invisible.

A certain Cure for the Measles in Swine.

IT frequently happens that Swine are killed when disordered by the measles, which is easily discovered by the meat or flesh containing small red or white pustles, of different sizes, varying according to the different degree of the disease: which originates from their being fed with fustly, damaged corn, or some unwholesome food, or from its being boiled in lead or copper vessels, in which it hath lain too long; or from their being kept in a wet dirty pen; and which causes tend to obstruct the free circulation of the fluids; hence arise those globular pustules which are the juices rendered vitcid and co-agulated—About once a week, mix two spoonfuls of madder in the food, which prevents obstructions, acting as a diuretic, and is at the same time an astringent. And on some other day in the week, give a spoonful or two of an equal quantity of flour of sulphur and saltpetre well pounded and mixed, which purifies and cools the blood. All these different articles added to each pail of food in the morning, on separate days, will prevent the measles, keep the swine extremely healthy, and fatten them more expeditiously.

—————

TO the honor of virtue it must be acknowledged, that the greatest misfortunes befall men from their vices.

N. B. The last column of the calendar pages, containing the time of high-water at Philadelphia, exhibits also the time of high water at Wilmington in Delaware state; and by adding thereto and subtracting therefrom the annexed quantities of time, we have the time of high-water at the places above enumerated. A shews the quantities of time to be added—S subtracted.

I Month, JANUARY, hath 31 Days.

K EEN is the cutting wind—fierce Winter hoar
 Grasps Nature in his killing, cold embrace;
 Submits and tame is every beast of chace,
 And each sweet bird forgets its dulcet lore;

Second Winter Month, JANUARY.

SELECTED FOR *SHERMAN & MERSHON'S* TRENTON
ALMANAC.

BY OLD CONTI.

The substance of an Historical Anecdote.

A CERTAIN Eastern Prince of sovereign sway, whose power and grandeur unrivaled stood, received one day the unwelcome tidings that one of his distant Provinces had revolted.

The Prince enraged at this treachery, swore by the Great Prophet Alla that he would extirpate the whole Rebel Race from off the face of the earth:—His Minister (whose stony heart resembled those of modern times) pleased with the idea of glutting his vengeance on the unhappy culprits, kept up the spirit of revenge in his angry sovereign.

Grand preparations were accordingly made, the Prince being determined to punish the offenders in his Royal Presence.

An innumerable host arrayed in shining armour proclaimed the power and magnificence of its Master. The Golden Throne inlaid with ivory and precious gems, whose lustre dazzled the eye, was poized on the back of the Majestic Elephant, and being accompanied with his fiery Chariot of War, and all the usual pomp of the East:—His majesty & his retinue set forward to punish the atrocious offenders, but on his arrival at the revolted Province, the unhappy people, instead of making any the least resistance struck with the power and majesty of their insulted Sovereign, prostrated themselves at his feet, acknowledged their errors, and threw themselves upon his Royal Clemency.

The Prince (whose bosom was the seat of every manly and exalted virtue) felt his heart warmed with the milk of humanity after beholding their humiliation—But his Minister, who stood near him during the conflict in his bosom, perceiving his Master inclined to mercy, eagerly reminded him of the oath he had taken upon his first receiving intelligence of the revolt, and that he certainly would be guilty of perjury if he did not fulfil it: True, replied the Prince, it shall be accomplished—Shew me but a rebel, and I will instantly sacrifice him—All here, continued he, looking round him (his benignant eyes overflowing with tears) are my dutiful and loving subjects whom I embrace, as the Father of the Prodigal did his repenting Son.—Conscious of their errors they are no longer criminal, but justly reinstated in their former place in my bosom.—The Minister, whose brazen front would scorn a blush (true emblem of his hardened heart) finding it in vain to quell the torrent of benevolence flowing from his Master, wisely turned and went with that stream he was unable to resist.

BUFFON, the celebrated Naturalist, was in the habit of rising with the Sun, but it was with great difficulty he conquered his natural indolence. He thus relates the manner in which he accom-

II Month, FEBRUARY, hath 28 Days.

Humble and homely, round the cottage door,
They fluttering croud, though late so wild and shy,
And Pity's tribute wishfully implore,
From those in happier days they went to fly—

VENUS ♀ will be evening Star, until the 14th of the 3^d month (March) then morning Star, until the end of the year.

Third Winter Month, FEBRUARY.

plished it: "In my youth I was extremely fond of sleep, and that fondness robbed me of much time. My poor Joseph (a domestic who served him sixty-five years) was of the highest utility to me in overcoming it. I promised him a crown for every time he should make me get up at six o'clock. He failed not next day to rouse and torment me—I abused him. He came the day following, and I threatened him.—"Friend Joseph," said I to him at noon, "you have gained nothing, and I have lost my time. You don't know how to manage the matter. Think only on my promise, and never heed my threatenings. The day following he accomplished his point. I begged, entreated, then abused, and would have turned him off. He raised me by absolute force; and had his reward every day, for my ill humour in the moment of waking—my thanks and a crown an hour after. I owe to poor Joseph at least ten or twelve volumes of my work.

Maternal affection in a Savage Animal.

WHILE the *Carcass** was locked in the ice, early in the morning the man at the mast head gave notice that three bears were making their way very fast over the frozen ocean, and were directing their course towards the ship:—They had, no doubt, been invited by the scent of some blubber of a sea horse the crew had killed a few days before, which had been set on fire, and was burning on the ice at the time of their approach!—they proved to be a she bear and her two cubs; but the cubs were nearly as large as the dam:—they ran eagerly to the fire and drew out from the flames part of the sea horse that remained, and eat it voraciously:—the crew of the ship threw great lumps of the flesh of the sea horse, which they had still left, upon the ice, which the old bear fetched away singly, laid every lump before her cubs as she brought it: and, divided it, gave each a share, reserving but a small portion to herself. As she was fetching away the last piece, they levelled their muskets at the cubs, and shot them both dead, and in her retreat they wounded the dam, but not mortally. It would have drawn tears of pity from any but unfeeling minds to have marked the affectionate concern expressed by this poor beast in the dying moments of her expiring young:—though she was sorely wounded, and could but just crawl to the place where they lay, she carried the lump of flesh she had fetched away, as she had done others before; tore it in pieces, and laid it down before them; and, when she saw that they refused to eat, she laid her paws first upon one and then upon the other, and endeavored to raise them up: all this while, it was pitiful to hear her moan. When she found she could not stir them, she went off, and when she got at some distance, looked back and moaned; and that not availing

* This ship was dispatched to the north seas some years since by the British Government, in search of a North East passage to India, where she was frozen up in the ice several days.

III Month, MARCH, hath 31 Days.

So can misfortune bow the proudest crest;
 Shew arrogance and folly what they are;
 Strike deep instruction to Presumption's breast,
 And vice and pleasure's baited hook lay bare:

First Spring Month, MARCH.

her to entice them away, she returned, and smelling round them, began to lick their wounds. She went off a second time as before; and having crawled a few paces, looked again behind her, and for some time stood moaning. But still the cubs not rising to follow her, she returned to them again, and with signs of inexpressible fondness, went round one, and round the other, pawing them and moaning. Finding at last that they were cold and lifeless, she raised her head towards the ship, and growled a curse upon the murderers, which they returned with a volley of musket balls. She fell between her cubs, and died licking their wounds,

IN a late Kingston print we find the annexed account of "human flesh" imported into the port of Kingston, Jamaica, for the months of April, May, June, and July, last. It appears to have been published with as little feeling and with the same views that we would publish a list of so many imported bales of Merchandize, to shew the state of trade. Let the friend of slavery read with attention this truly BLACK list, and after endeavouring to form to himself an adequate idea of the sum of human wretchedness caused by thousands of his fellow creatures being torn from their homes, their families and all that is dear to them, let him, we say, ask his own heart on what just principles this traffic can be advocated. Happily for America a trade so inhuman and which must, eventually, prove injurious to any country that encourages it, is no longer tolerated among us, except in South-Carolina; and, we trust, the time is fast approaching, when the GRADUAL abolition of slavery will pervade the world, and dealings in "human carcases" cease to be known.

—

From a French Paper.

MR. VANDILLE

Was the most remarkable man in Paris, both on account of his immense riches, and his extreme avarice. He lodged as far up as the roof would admit him, to avoid noise or visits; maintained one poor old woman to attend him in his garret; allowed her only seven sous per week, or a penny per diem. His usual diet was bread and milk; and for indulgence, some poor sour wine on Sunday; on which day he constantly gave one farthing to the poor, being one shilling and a penny per annum; which he cast up, and after his death, his extensive charity amounted to forty-three shillings and four pence.

This prudent economist had been a magistrate or officer at Boulogne, from which on security he was promoted to Paris, for the reputation of his wealth, which he lent upon undeniable security to the public funds, not caring to trust individuals with his life and soul. While a magistrate at Boulogne, he maintained himself by taking upon him to be milk taster-general at the market; and from one to another filled his belly, and washed down his bread, at no expense of his own; not, doubtless, from any other principle than that of serving the public, and regulating the goodness of the milk! When he was called to Paris, knowing that stage vehicles were expensive, he determined to go thither on foot; and to avoid being robbed, he took care to export with himself neither more nor less than the considerable sum of three pence sterling to carry him one hundred and thirty miles; and with the greater facility to execute his plan of operation, he went in the quality of a poor priest, or mendicant, and no doubt, gathered some few pence on the road, from such pious and well disposed persons of the country as were strangers to him.

The great value a miser annexes to a farthing, will make us less surpris'd at the infinite attachment he must have to a guinea, of which it is the seed, growing by gentle gradations into pence, shillings, pounds, thousands and ten thousands; which made this worthy connoisseur say, "Take care of the farthings, and the pence and shillings will take care of themselves; these semina of wealth may be compared to seconds of time, which generate years, centuries, and even eternity itself."

V Month, MAY, hath 31 Days.

Yet softly lead the rosy train along,
 And spread enchantment thro' each flowery grove;
 Yet bid the warblers chaunt the vernal song,
 And tune their lays to harmony and love.

Third Spring Month, MAY.

When he became immensely rich, being in the year 1735, worth seven or eight hundred thousands pounds which he begot or multiplied on the body of a single shilling, from the age of sixteen to the age of seventy-two, one day he heard a woodman going by in summer, at which season they stock themselves with fuel for the winter: he agreed with him at the lowest rate possible, but stole from the poor man several logs, with which he loaded himself to his secret hiding hole: and thus contracted in that hot season a fever: he then sent for a surgeon, to bleed him, who asking half a livre for the operation, was dismissed: he then sent for a poor barber, who undertook to open the vein for three pence a time:—"But (says this worthy economist) how often will it be requisite to bleed?"—"Three times," said he.—"And what quantity of blood do you intend to take?"—"About eight ounces each time," said the barber. "That will be nine pence; too much, too much," says the old miser. "I am determined to go a cheaper way to work; take the whole quantity you design to take at three times, at one time, and that will save me six pence; which being insisted on, he lost twenty-four ounces of blood, and died in a few days, leaving all his vast treasures to the King, whom he made his sole heir.—Thus he contracted his disorder by pilfering, and his death by an unprecedented piece of parsimony.

PROVIDENTIAL DELIVERANCE.

The Leyden Gazette, of the 12th of December, 1785, gives the following account of the interposition of Divine Providence in favour of a widow and her family, near Dordrecht, in the province of Holland. This industrious woman was left by her husband, who was an eminent carpenter, a comfortable house, with some land, and two boats for carrying merchandize and passengers on the canals. She was also supposed to be worth about ten thousand guilders, in ready money, which she employed in a hempen and sail-cloth manufactory, as the means not only of increasing her fortune, but of instructing her children (a son and two daughters) in those useful branches of business. One night, about nine o'clock, when the workmen were going home, a person dressed in uniform, with a musket and a broad sword, came to her house, and requested lodging. "I let no lodging, friend," said the widow; "and besides, I have no spare bed, unless you sleep with my son, which I think very improper, being a perfect stranger to us all." The soldier then shewed a discharge from Diesbeck's regiment, (signed by the major, who gave him an excellent character) and a passport from Comte de Maillebois, governor of Breda. The widow believing the stranger to be an honest man, as he really was, called her son, and asked him if he would accommodate a veteran, who had served the republic thirty years with reputation, with a part of his bed. The young man consented, and the soldier was hospitably entertained, and withdrew to rest. Some hours after, a loud thumping was heard at the street door,

VI Month, JUNE, hath 30 Days.

Sweet soother of my mind, tho' not e'en Spring
 Can e'er erase the sorrows of my breast,
 Yet cherish'd with thy scenes, Hope waves her wing
 And points to vallies of eternal rest.

First Summer Month, JUNE.

which roused the soldier, who stole softly down stairs, and listened at the hall. The blows were repeated, and the door almost broken through by a sledgehammer, or some heavy instrument; by this time the affrighted widow, and her daughters, were running about, and screaming, murder! murder! but the son having joined the soldier, with a case of loaded pistols, and the latter screwing on his bayonet, and fresh priming his piece, which was well filled with slugs, desired the women to retire, as bloody work might be expected in a few minutes. Soon after, the door was burst in, and two fellows entered, and were instantly shot by the son, who discharged both his pistols at once. Two more returned the favour from without, but without effect; and the intrepid veteran, taking immediate advantage of the discharge of their arms, rushed on them like a lion, ran one thro' the body with his bayonet, and whilst the other was running away, lodged the contents of his piece between his shoulders, and he dropped dead on the spot. They then closed the door as well as they could; re-loaded their arms; made a good fire; and watched till day-light, when a number of weavers and spinners came to resume their employment. We may guess their horror and surprize on seeing four men dead on a dung hill; where the soldier had dragged them before the door was shut. The burgomaster and his syndic attended, and took the depositions of the family relative to this affair. The bodies were buried in a cross-road, and a stone erected over the grave with this inscription: "Here lie the wretched carcasses of four unknown ruffians, who deservedly lost their lives in an attempt to rob or murder a worthy woman and her family. A stranger, who slept in the house, to which Divine Providence undoubtedly directed him, was the principal instrument in preventing the perpetration of such horrid designs, which justly entitles him to a lasting memorial, and the thanks of the public. John De Vries, a discharged soldier, from the regiment of Diesbach—a native of Middleburgh, in Zealand—and upwards of seventy years old—was the David who slew two of these Goliaths; the rest being killed by the son of the family."—The widow presented the soldier with one hundred guilders; and the city settled a handsome pension on him for the rest of his life.

WONDERFUL.

Extract of a letter from a young Gentleman residing near the Black River, in the state of New York, to his correspondent in Charleston, dated

WATERTOWN, JUNE 30, 1805.

"FOUR men of respectability, who belong to this place, were returning from Kingston, last week, in a boat across Lake Ontario, who, when about half way home, espied a distant object lying off in the Lake; which they supposed to be a boat with her bottom up. They immediately steered towards it, with a design to make a prize of

VII Month, JULY, hath 31 Days.

See Joy with becks and smiles appear,
While roses strew the devious way;
The feast of life she bids us share,
Where'er our Pilgrim footsteps stray.

Second Summer Month, JULY.

her; when, with the swiftness of an arrow, it darted towards them and they discovered it to be a monster in the form of a snake. They were dreadfully frightened, and pulled with all their might for the shore, which they soon gained, it being at no great distance. The Monster closely pursued them, till gaining shoal water, it played backward and forward before them two hours. This afforded them leisure to recover from their surprise, to approach and survey it. It contracted itself in a spiral form, which they judged to be nearly eighteen feet in diameter. From the centre of the curl, the head projected across the folds, lying even with the surface of the water, and, apparently, its circumference round almost as large as a hog-head; the eye nearly the bigness of a pint basin; the mouth frightfully large, and aspect terrible. The length, as it appeared above the water, they judged to be 150 feet. The body appeared to be about the size of a barrel. After playing around, as stated above, he steered his course for a vessel, which had left Kingston at the same time with themselves, bound to Niagara, and was out of sight in a moment.

"I understand that the Indians have frequently seen the same. He once attempted to pick a man out of a schooner, who saved himself by jumping into the cabin. A number of boats have been lost in the Lake, which many have conjectured were destroyed by this monster. It is supposed to be of the same kind with that which infested the seas of Norway, as it is not difficult for it, when young, to come up the river St. Lawrence."

"However incredible the above account may appear, the frightened imaginations of these spectators have not represented this monster of a Serpent to be of such an enormous size as the Sea Snake which was shot by the master of a ship in the Norwegian seas, in 1756. The length of that, it will be recollected, was more than a hundred yards. The boat and ship masters in those seas seem to dread being overset by this Sea Monster; and, on that account, provided themselves with quantities of Castor, as they are known to have a remarkable aversion to the smell of that drug. It is probable that many who cross the Ontario would be happy to obtain a substance, equally efficacious for their own security.

THE HOP,

Is one of the greatest antiputrescents that can be produced on the continent of America, or even on the heaths of the old kingdom; so much so, that even its liquor will prevent a piece of meat from putrifying in very hot weather; and, of course, a beer made of hops will preserve the juices of the body more than any other liquor whatever, because that fermentation will not take in the liquor of hops, unless something is added in order to excite it.

I believe, that if hop liquor was made use of in those cities and sea ports which are so often visited with epidemic disorders and the yellow fever, that we should hear of very few that would fall victims to its virus.

VIII Month, AUGUST, hath 31 Days.

And still the grove is cool and green,
 And clear the babbling fountain flows;
 Still shines the night's resplendent Queen,
 As erst in Paradise she rose:

Third Summer Month, AUGUST.

The virtue of hops is such, that it will very much correct the bile, and even dissolve gall stones in the liver, and cleanse the kidneys from sand and gravel, and dissolve and carry off the stone in the bladder, by its lithontrific and diuretic quality.

Those who drink freely of hop beer will not be troubled with the jaundice or dysentery, and have no occasion of taking emetics or cathartics to keep themselves regular. The flower of hops is a great soporific and easer of pain; so much so, that when opium has failed to give ease, you will find by hanging them in your bed chamber, and strewing a few of the flowers between the sheets, that the patient will rest easy and quiet. I should advise to quit those fermentable liquors, such as malt beer, and virous and ardent spirits, and make use of hop beer, as a substitute, and I think we should not hear of any putrid disorder prevailing among us, although the season is uncommonly hot.

The quantity to make a barrel of beer is small, 10 or 12 ounces is sufficient. I shall say nothing more at present concerning hops; but will ere long refer the public to my botanical folio, where a general description will be given of roots and herbs, for the use of the public.

HERBARIUS.

Remedy for a Burn or Scald.

MANY persons upon experiencing a burn or scald, are at a loss what remedy to apply. But most families have or may have the first remedy at hand.

When a burn or scald has taken place, so much allum should be dissolved in water, as to render the water considerably strong of the allum. This being done, a linen cloth should be dipped in the allum water, that has the cold taken off, if it be in the winter season, and barely taken off if it be in the summer.

When the cloth is thus dipped and well moistened, it should be spread over all the part that is burnt or scalded, where it should remain till a steam from the cloth begins to arise and the pain begins to encrease, then the cloth must be taken off, again wet in the solution, and applied as before.

In pursuing this method of wetting the cloth as often as the steam begins to arise and repeating it, it will be but a few hours before the burned or scalded part will be free from the fire, as it is called, and prepared for healing. But if it is found, that taking off the cloth from the part affected increases the pain, it may remain on, while another cloth, wet in the above mentioned solution, may be applied over it.

It is not the design of him who gives this short information, to prescribe the after process to be pursued in case of burns and scalds; for, in many instances, it is essentially necessary that a surgeon should be called, but only to inform of the first method, which ought to be pursued in the first process, before there is time generally to call in the aid of a surgeon.

Literary Tablet.

IX Month, SEPTEMBER, hath 30 Days.

The grapes their purple nectar pour,
 To 'suage the heart that grieves oppres!
 And still the lonely ev'ning bower
 Invites and screens the stolen kifs.

First Fall Month, SEPTEMBER.

THE EXILE RETURN'D.

How blest to him condemn'd to toil
An exile from his native shore ;
To hail again his genial soil,
And greet his friends, and home once more !
Again, to hold in fond caresses,
The partner of his cares, and joy ;
Again, with eager arms to press
The fruit of love—his darling boy !
And hear him as he wings his way,
Around the cot in playful roam ;
In lisping accents bless the day
That brought his gentle father home.
To friends, to wife, to darling boy,
And native land, restor'd again ;
Swift glide his hours on wings of joy,
Nor thinks he more of former pain.

HORATIO.

THE WIDOW TO HER INFANT, IN THE CRADLE.

[*By Mrs. B. Hole, of Sheffield, England.*]

Blossom of Hope ! whose cherub smile,
Can all thy Mother's woes beguile ;
Sweet bud of comfort ! in whole face
Her sorrowing eye delights to trace,
Through every feature, opening fair,
An image of thy Father there !
Ah ! gentle germ of joy unborn ;
Pale beam of an o'ershadow'd morn ;
How shall thy Mother's soul express
Her hope, her fear, her soft distress,
As bending o'er thy cradled form,
She deprecates life's fatal storm !
And prays, with all a parent's fears,
For blessings on thine early years :
Ah ! babe belov'd ! condemn'd to bloom,
A flowret on thy Father's tomb ;
Unmindful thou, that sorrow's power,
Hath mark'd thee from life's earliest hour ;
Wreckless of many a bitter tear
That flow'd upon thy Father's bier ;
And many a briny torrent shed
Upon thine own unconscious head ;
Yet while thy little cheek hath prest
Thy hapless Mother's throbbing breast,

X Month, OCTOBER, hath 31 Days.

'Twas Spring, 'twas Summer, all was gay,
 Now Autumn bends a cloudy brow;
 The flowers of Spring are swept away,
 And Summer's fruits desert the bough.

Second Fall Month, OCTOBER.

No tongue could urge a plea like thine
To soothe a breaking heart like mine,
Pour through the breast so sweet a charm,
And e'en despair's fell pang disarm.

Messrs. Printers,

IF you think the following relation of an occurrence, which took place some years ago in a swarm of Bees belonging to my flock, worthy the attention of the curious, it is at your service for publication. H.

Some years since, having risen very early in the morning, I was concerned for the fate of a swarm of my Bees, whose hive had been placed in a situation rather too much exposed to the weather—especially so, as, during the preceding night, there had been a very heavy fall of rain. On approaching the hive to see how the poor tenants had been affected by the storm, I observed a considerable number, which, on counting, proved to be about sixty, ranged in regular order, in the form of a half moon, lying dead on the board before the mouth of the hive. In the centre of the half circle was a single Bee, also dead, which was distinguished from the rest by its appearance, and which I concluded was the Queen of the hive. She was lying about two inches from the aperture of the hive, and the half circle of Bees before mentioned, which I took to be her life-guard, about the same distance in advance of her. While I was contemplating this singular scene, a Bee came out of the hive, probably the first for that day, apparently to make a morning's excursion; but on perceiving the Queen, he ran towards her, and viewing her a moment, he hastened back with great precipitation into the hive. Immediately the whole of the survivors of the swarm rushed out to the place where lay their deceased mistress, and by their actions and noise manifested much distress. After moaning and exhibiting evident signs of grief for some minutes, over the dead Queen, I took her up, and they soon retired to their hive. A few minutes after, I laid her down in her former place, when another Bee discovering her, he hastened back as the first had done, apparently to give information, and the whole swarm again rushed out and repeated the like tokens of grief. After removing the dead Queen again, I called my wife and communicated to her the singular conduct of the poor animals, when I again laid the Queen down in her former position, and soon after was gratified with a third exhibition as before described. I now took up the dead Queen, and after carrying her into my house, put her carefully into a glass vessel, where she was preserved about the space of three days, when a female relation paying us a visit, we communicated to her the particulars of the occurrence, and for her amusement, I once more conveyed the Queen to the hive in order to ascertain whether she would yet be recognized and lamented. After waiting some time, we had the satisfaction to see a Bee approach and examine her attentively; he then hastily returned to the hive. In a

XI Month, NOVEMBER, hath 30 Days.

The verdant leaves that play'd on high,
 And wanton'd on the western breeze,
 Now trod in dust neglected lie,
 As Boreas strips the bending trees.

Third Fall Month, NOVEMBER.

few moments eight Bees came out of the hive and surrounding the dead animal took her up and flew off a short distance from the hive, when they settled on the ground and immediately buried her up with themselves in the loose earth. We soon, however, perceived the burying party, one after another, emerge from the little pile of earth they had made, and fly away. On their leaving the spot where they apparently deposited the body of their Queen, I loosened the earth with the expectation of finding it there, but after searching a considerable time, was unable to discover any thing whatever of her remains.

Thus ended this singular affair. I have stated the particulars for the gratification of the curious. In them the Philosopher, perhaps, may discover additional evidence of the hypothesis, that animals possess the powers of reasoning, in some cases, little inferior to those of the human species. There is striking evidence in the transaction here related, that Bees are endued with the power of sympathy—that they are capable of perceiving the difference between life and death in their own species, and are highly sensible of the consequences that must follow the extinction of the vital principle in animal bodies.

RECIPT

For the Cure of Frozen, Burnt or Scalded Flesh.

IN a season like the present, Burns and Scalds among children are frequent.

A Salve, which has been successfully applied in some parts of the States of New-York and Connecticut, is made as follows:

Take soft cow-dung, and fry it in hog's lard, for ten or fifteen minutes, over a moderate fire: then strain the liquid part through a linen cloth into an earthen pot or jar, and place it on the coals. When it simmers, cut into it bees-wax, until it becomes as thick as mush. When it is cold it becomes a salve of a greenish colour, which, being spread on a linen cloth, as large as the part burned or scalded, will be an easy, and most commonly a very efficacious plaster. The cow-dung used, is best when made from grass; but that which proceeds from corn stalks or good winter forage, will answer the purpose. House-keepers would do well to keep this salve, so easily made, by them, to use in case of accident.

N. B. The cow-dung itself, soon applied, has been found useful.

Cure for the Dysentery.

Take the roots of the running blackberry, or dewberry, make a strong decoction thereof, and drink three tea-cups full, about blood-warm. It operates as a gentle purge; and during the operation the patient must drink plentifully of water. This remedy has been

XII Month, DECEMBER, hath 31 Days.

The fields that wav'd with golden grain,
As russet heaths are wild and bare,
Not moist with dew, but drench'd in rain;
Nor health, nor pleasure wanders there.

First Winter Month, DECEMBER.

found efficacious in numerous instances, even after the patient had been given up by the faculty.

The leaf of the blackberry briar, is likewise an excellent remedy. But it would be well to precede the administration of either with a dose of castor oil, or rheubarb and magnesia.

The virtue of the remedies consist in their astringency. For the summer diseases, in infants, they are an infallible cure.

THE WOLF's REMONSTRANCE.

[FROM W. WALDEEK.]

A WOLF pass'd by a Shepherd's cot,
Just as a sheep's-head, smoaking hot,
Tongue, brains, and all, was put on table,
"Ye two legg'd animals," says he,
It's fit ye should find fault with me.
Who are yourselves so culpable?

When at your feasts, ye dine or sup,
Ye eat whole geese and chickens up:
Oft have I caught you in the fact,
Nay—and I tell you to your face,
Goody; I heard you once say grace—
For shame!—What,—glory in the act?

If I, a hungry wolf, alack!
Now and then take a little smack,
Of kid, or calf, or lamb, or mutton;
Some cur the neighbourhood alarms,
And ye against me take up arms,
Because, forsooth, I am a glutton.

As inconsistent men tow'rd's men:
Yet just we think ourselves as wise,
Keen enough others faults to ken,
Against our own we shut our eyes.

ANECDOTE.

A *doating swain*, in Norfolk, wanting a license for his union to a consenting fair one, lately went, by direction, to the Clerk of the Peace. On meeting the Clergyman, with his future bride, and the rest of the company, usual on these blissful occasions, the lover produced, not a license to marry, but a license to kill game. After a considerable anxiety, perturbation, and trouble, during which the damsel complained bitterly, and vowed she would not be made game of, the mistake was rectified, the ceremony performed, and the assistance of the Clerk of the Peace postponed for some future object.

[London Paper.]

FEDERAL COURTS.

The Supreme Court is held,

At the seat of government on the 1st Monday of June and December.

The Circuit Courts for the Third Circuit, are held,

At Trenton, for the District of Jersey, the 1st of April and 1st of October, except these days happen on Sunday, when the court will be opened the day following.

The District Courts are held,

For the District of East-Jersey, at New-Brunswick, the 4th Tuesday in May and November. For the District of West-Jersey, at Burlington, the 4th Tuesday in February, and 4th in August.

NEW - JERSEY.

Courts of Errors of the Governor and Council, are held,

At Trenton, on the first Tuesday in November and the third Tuesday in May, annually.

Supreme Courts are held,

At Trenton, on the second Tuesdays in May and November, the first Tuesday in September, and the last Tuesday in February.

CIRCUIT COURTS,

Are held, in the several counties on the following Tuesdays :

Bergen	4 March	4 October
Essex,	2 April	3 September
Middlesex,	2 June	2 December
Monmouth,	4 April	3 October
Somerset,	3 April	1 October
Burlington	4 May	1 November
Gloucester,	3 March	1 October
Salem,	2 June	1 December
Hunterdon,	1 May	4 October
Morris,	3 March	4 September
Cumberland,	1 June	last November
Suffex,	4 May	4 November
Cape-May,	last May	

The clerks of the several counties are clerks of the circuit courts.

Inferior Courts of Common Pleas, Orphans Courts, and General Quarter Sessions of the Peace are held, in the several counties, on the following Tuesdays :

Bergen,	4 January	4 March	4 October	2 June
Essex,	2 January	2 April	4 June	3 Sept.
Middlesex,	2 December	2 March	2 September	2 June
Monmouth,	4 January	4 April	4 July	3 Oct.
Somerset,	1 January	1 October	3 April	3 June
Burlington,	2 February	2 August	4 May	1 Novem.
Gloucester,	3 March	3 June	1 October	2 Decem.
Salem,	1 March	1 December	2 June	3 Septem.
Cape-May,	1 February	1 August	last May	4 October
Hunterdon,	1 February	1 May	1 August	4 October

<i>Morris,</i>	3 March	3 December	1 July	4 Sept.
<i>Cumberland</i>	<i>last</i> February	4 September	1 June	<i>last</i> Nov.
<i>Suffex,</i>	3 February	3 Aug.	4 May	4 Nov.

PENNSYLVANIA.

Courts of Error, & Appeals are held,

At Philadelphia, on the second Monday in July, annually, with power to adjourn from time to time.

Supreme Courts are held,

At Philadelphia, the first Monday in September, the second Monday in December, and the third Monday in March; the terms continue only two weeks, except Dec. term, which continues 3 weeks.

Courts of Oyer and Terminer, and Nisi Prius, are generally held once a year, in every county, at such time as the Judges shall appoint.

Common Pleas and Sessions of the Peace are held, in each county, on the following Mondays:—

<i>Philadelphia,</i>	1 March	1 June	1 Sept.	1 December
<i>Delaware,</i>	<i>last</i> January	<i>last</i> April	<i>last</i> July	<i>last</i> October
<i>Bucks,</i>	1 February	1 May	1 August	1 November
<i>Montgomery,</i>	2 February	2 May	2 August	2 November
<i>Chester,</i>	3 February	3 May	3 August	3 November
<i>Lancaster,</i>	<i>last</i> February	<i>last</i> May	<i>last</i> August	<i>last</i> November
<i>York,</i>	1 March	1 June	1 Sept.	1 December
<i>Dauphin,</i>	2 March	2 June	2 Sept.	2 December
<i>Berks,</i>	1 January	1 April	1 August	1 November
<i>Northampton,</i>	2 January	2 April	2 August	2 November
<i>Luzerne,</i>	3 January	3 April	3 August	3 November
<i>Northumberland,</i>	4 January	4 April	4 August	4 November
<i>Lycoming,</i>	Mondays next succeeding the courts in Northumberland			
<i>Cumberland</i>	1 January	1 April	1 August	1 November
<i>Mifflin,</i>	2 January	2 April	2 August	2 November
<i>Huntingdon,</i>	3 January	3 April	3 August	3 November
<i>Bedford,</i>	4 January	4 April	4 August	4 November
<i>Franklin,</i>	<i>last</i> Decem.	<i>last</i> March	<i>last</i> July	4 October
<i>Allegheny,</i>	2 March	2 June	2 Sept.	2 December
<i>Westmoreland,</i>	3 March	3 June	3 Sept.	3 December

Somerset, on the Mondays next following the courts of Westmoreland

Fayette, on the Mondays next following the courts of Somerset.

Washington, on the Mondays next following the courts of Fayette.

Greene, on the Mondays next following the county courts of Fayette.

Mayor's Courts are held,

The third Monday in March, June, September and December.

REMEDIES.

For a Pain in the Back.

STEEP root of water-fern in water, 'till the water becomes hick; then rub the part morning and evening.

For Baldness.

Rub the part morning and evening, with onions, 'till it is red; and rub it afterwards with honey.

Governor and Commander in Chief of the State of New-Jersey,
JOSEPH BLOOMFIELD, Esquire.

MEMBERS OF COUNCIL AND ASSEMBLY.

BERGEN. *Council*, John Outwater. *Assembly*, Peter Ward, Adrian Post, Adonijah Schuyler.

SILVER WARE.

SAMUEL COLEMAN,
Gold & Silver-Smith,
TRENTON—

TAKES this method to inform the Public in general, that he continues the SILVER SMITH'S BUSINESS in Warren-Street, Trenton, nearly opposite the STORE of *Abraham Hunt*, where he keeps for sale, and manufactures agreeably to orders, a variety of

Gold & Silver Work.

Those who please to favour him with their custom may depend upon being supplied on moderate terms, and having their orders faithfully executed.

N. B. The highest price given for OLD GOLD and SILVER.

CURE FOR A FELON.

The following cure for the Felon I have never known to fail but once these thirteen years, though I have applied it to many.—I think it my duty to publish it to the world. It is both cheap and safe:

TAKE any sort of Glass, pounded fine, and Goose Dung, and Rue, with a little Indian Meal—mix all together with cold Water thin; apply a pretty large poultice when the finger seems dry and hot, wet the poultice and apply it again—in twelve hours make a new one; two or three seldom fail to cure. A.

N. B. When the Felon is coming on the person will imagine there is a small briar or thorn in the end of the finger, or opposite the joint under the nail.

A CURIOUS COURTSHIP.

A young gentleman and lady happened one Sunday to sit in the same pew.—During the course of the sermon, the youth read something in the eyes of the fair, which made a much deeper impression on his soul than the pious lecture of the parson: as love is seldom at a loss for an expedient, he presented her with the following verse in the second epistle of John: "And now I beseech thee, Lady, not as though I wrote a new commandment unto thee, but that which we had from the beginning, that we love one another." After perusal, she in answer, opened at the first chapter of Ruth and sixteenth verse—"And Ruth said, entreat me not to leave thee, nor to return from following after thee, for whither thou goest, I will go; and where thou lodgest, I will lodge; thy people shall be my people, and thy God my God." Thus was the treaty proposed, which in a little time was fully ratified by the parson.
