THE NEW JERSEY CONSTRUCTION REPORTER contains statistics on construction activity in New Jersey. Information in the report comes from construction officials who administer the State Uniform Construction Code (UCC) (N.J.A.C. 5:23-1 et seq.) in New Jersey's 566 municipalities.

Each month, construction officials send to the New Jersey Department of Community Affairs (DCA) reports on the permits and certificates they issue. Permits authorize the start of construction and cover four types of activity: (1) New construction permits authorize the start of a new structure. (2) Permits for additions refer to work that will add space (volume and square feet) to an existing building. (3) Alterations also involve existing structures, but the work authorized will not add space. Typically, construction officials issue permits for alterations when the work is subject to one or more of the UCC's major subcodes (building, electrical, plumbing, fire protection). (4) Demolition permits authorize the removal of a building or some other structure. The *CONSTRUCTION REPORTER* identifies only those demolitions that will result in the loss of housing.

In addition to permits, the *CONSTRUCTION REPORTER* has information on the certificates issued by construction officials. While permits authorize the start of construction, certificates are issued for work completed and ready for occupancy. Each month, the *CONSTRUCTION REPORTER* will report on the number of housing units and the amount of office and retail space authorized for construction, along with the number of housing units and the amount of office and retail space completed.

Data Comparability

The *CONSTRUCTION REPORTER* contains information on authorized housing units that is tabulated two different ways. The DCA tabulates Tables 1 through 3 and Tables 8 through 13 based on the use of buildings, defined in "groups" by New Jersey's UCC. Exhibit B on page 3 summarizes these groups.

Tables 4, 5, and 6 show authorized housing units as defined and tabulated by the United States Census Bureau. The New Jersey Department of Labor and Workforce Development prepares these tables for publication in the *CONSTRUCTION REPORTER*. Exhibit C on page 4 describes the housing definitions used by the Census Bureau.

The DCA series and the Census Bureau series on authorized housing units differ two important ways. First, the DCA series includes housing units created as a result of permits issued to alter or make additions to existing structures. The Census Bureau counts only those housing units authorized from permits issued for new construction.

Second, the Census Bureau imputes data for localities that fail to submit monthly reports on time. An asterisk in the Census column of data appearing in the Municipal Summary Data table at the back of the *CONSTRUCTION REPORTER* indicates those towns with imputed data. The Census Bureau bases these imputations on historic trends. The DCA series shows information for only those towns that submitted monthly reports. If a municipality failed to submit a monthly report on time, "No report" appears in the appropriate columns in the Municipal Summary Data table.

Additional Terms

A number of other terms appear in the tables throughout the *CONSTRUCTION REPORTER*. Exhibit A on page 2 defines additional construction permit and certificate terms.

Exhibit A

Summary of Building Permit and Certificate Terms	
Addition	Permit type issued for construction work that adds space (volume and square feet) to an existing structure.
Alteration	Permit type involving one or more subcodes (building, electrical, fire protection, and plumbing). The work is authorized for an existing structure and does not add new space.
Certificate	A document issued by a construction official indicating completion of work for which a permit was issued.
Dollar Amount of Construction	Estimated cost of work, as reported by the permit applicant to the construction official.
Demolition	Permit type authorizing the demolition of an existing structure.
Housing Units Certified	A rental or for-sale unit completed and certified by the construction official for conforming to the standards in the New Jersey UCC.

See Exhibits B and C for explanations of the different definitions of housing structures. The Table 1 series and Tables 2 and 3 show housing units as classified by the residential use groups defined in Exhibit B. Tables 4, 5, and 6 identify authorized housing as defined by the U.S. Census Bureau. (See Exhibit C.)
Housing Unit Demolitions	Rental or for-sale housing to be demolished, as reported to the construction official by permit applicants.

Examples of residential groups include: one- and two-family houses (R-3 and R-5); apartments, townhouses, and other multifamily houses (R-2); and mixed-use housing, where the house is a relatively smaller part of a building that has another use (e.g., an apartment over a store). Therapeutic residences (R-4) for 6 to 16 occupants are also included in this category. The Table 1 series and Tables 2 and 3 show authorized housing units by group definition.

The following groups refer to industrial, commercial, and other nonresidential structures.	

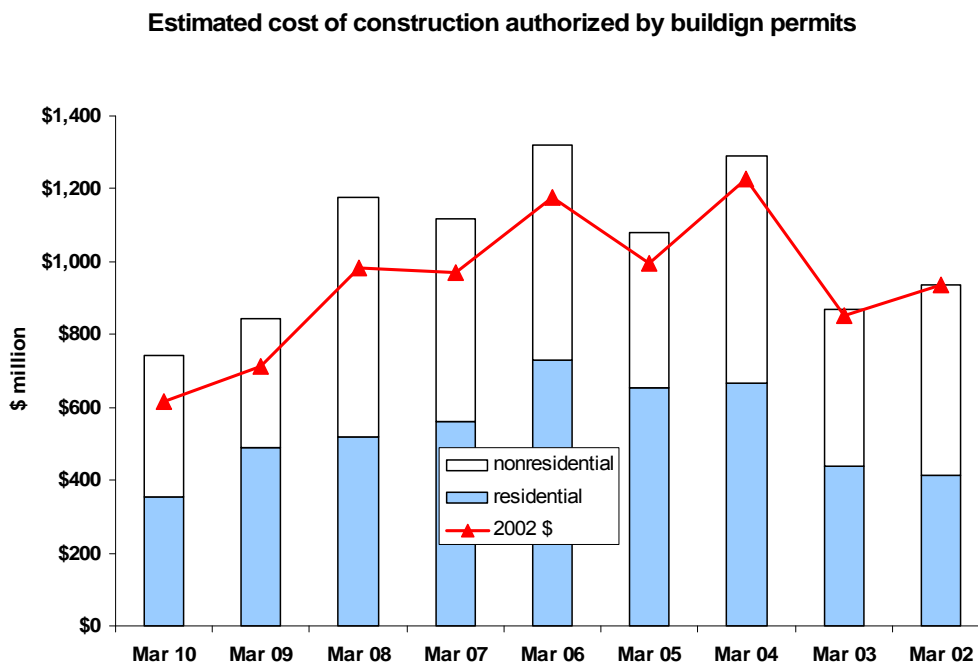

Assembly	Structures where people gather for civic, social, or religious purposes. Examples include: theaters (group A-1); night clubs, dance halls, casino gaming areas, etc. (A-2); libraries, restaurants, lecture halls, art galleries (A-3); houses of worship (A-4); and grandstands, coliseums, stadiums, and amusement park structures (A-5).
Business	Office buildings (group B) for business transactions of all kinds including banks, corporate offices, professional offices, government buildings, beauty shops, motor vehicle showrooms, and out-patient clinics.
Educational	Buildings for educational purposes through the 12th grade (group E).
Hazardous Use	Buildings used to manufacture, process, or store materials that constitute a high fire, explosion, or health hazard (group H).
Hotels, Motels, Guest Houses	Buildings for shelter and sleeping where the primary occupants use the facility on a temporary basis, staying less than 30 days (group R-1).
Industrial	Factory buildings where the occupants make, process, or assemble products that are not highly combustible, flammable, or explosive. Includes automotive, appliance, and furniture manufacturers; electric power plants; food processing plants; foundries; and water pumping, solid waste disposal, and incineration plants (group F).
Institutional	Buildings for people who suffer from physical limitations because of age or health; buildings for people detained for penal or correction purposes. Includes: supervised residential homes for six or more people (group I-1); medical and nursing-care facilities (I-2); jails, reformatories, and asylums (I-3); and day care for six or more occupants (I-4).
Mercantile	Buildings for display and sale purposes. Includes retail stores, automotive service stations, shops, salesrooms, and markets (group M).
Storage	Buildings used to store goods that are not highly combustible or explosive. Includes warehouses, open parking structures, lumberyards, livestock shelters, and mausoleums (group S).
Signs, Fences, Miscellaneous	Accessory buildings and miscellaneous structures including fences over six feet in height, signs, private garages, sheds, agricultural buildings, carports, retaining walls, tanks, and swimming pools (group U).

Exhibit C

Residential Structures (U.S. Census Bureau Definitions)	
<p>Tables 4, 5, and 6 show authorized housing units based on the structure types defined below by the U.S. Census Bureau. The number of units shown in these tables refers to those authorized by building permits issued for new construction only.</p>	
<p>Single-Family Houses</p>	<p>Include all detached one-family houses and all attached one-family houses separated by a wall that extends from ground to roof with no common heating system or inter-structural public utilities. Include prefabricated, sectionalized, panelized, and modular homes that are manufactured partially off site, but are transported and assembled at the construction site.</p>
<p>Two-Family Buildings</p>	<p>Include all buildings with two housing units that may be above one another or side by side. If built side by side, the structures (1) do not have a wall that extends from ground to roof; or (2) share a heating system; or (3) have inter-structural public utilities, such as water supply and sewage disposal.</p>
<p>Three- and Four-Family Buildings</p>	<p>Include all buildings with three or four housing units. If built side by side, the structures (1) do not have a wall that extends from ground to roof; or (2) share a heating system; or (3) have inter-structural public utilities, such as water supply and sewage disposal.</p>
<p>Five-or-More-Family Buildings</p>	<p>Include all buildings with five or more housing units. If built side by side, the structures (1) do not have a wall that extends from ground to roof; or (2) share a heating system; or (3) have inter-structural public utilities, such as water supply and sewage disposal.</p>

<p>Public Housing Units</p>	<p>Housing owned by a governmental body during the period of construction.</p>

March 2010 Highlights

- March can be a breakout month for builders. The spring thaw typically means more work.
- The estimated cost of construction authorized by permits was \$743.9 million; 559 of New Jersey's 566 municipalities reported.
- While showing some signs of recovery compared to the previous winter months, March 2010 still looks sluggish compared to March activity in prior years. This time last year, March 2009, activity totaled \$844.1 million. Two years ago, March 2008, it was \$1.178 billion. March activity in the four years before that exceeded one billion dollars each month.

- Residential work amounted to \$354.2 million, or 47.6 percent of all authorized construction.
- Office, retail, and other nonresidential activity totaled \$389.6 million (52.4 percent of all work authorized by building permits).
- The number new houses authorized for construction in March 2010 was 987. This was 293 units more than last month, an increase of 42.2 percent. West Long Branch in Monmouth County had the most new houses, 67 units authorized in March. Lakewood in Ocean County was second with 60 authorized units.

- Newark had the most work. The City's construction office reported \$30.5 million of activity in March. About \$20 million was for a new high school sports facility.
- Hamilton Township, Atlantic County had \$25.5 million of construction. Nearly \$22.5 million was for alterations to the Atlantic County Institute of Technology technical school in Mays Landing.
- Jersey City in Hudson County had \$24.3 million of activity in March, most of which was for work on existing buildings. Only about \$1.5 million was for new houses, which is remarkable since over the last ten years, no other municipality has built more new houses.
- State buildings refer to a category of permits issued to State government agencies or their instrumentalities. It includes state universities and special-purpose agencies, like New Jersey Transit. In March 2010, State buildings accounted for \$65.6 million of construction. One of the bigger permits was for a new office facility at Rutgers University that will focus on proteomics, the study of proteins. The estimated cost of work authorized so far was \$22.5 million. Another \$21 million was authorized by permits issued to the New Jersey Sports and Exposition Authority for alterations to the new Meadowlands Stadium in East Rutherford.

Year to Date

- New Jersey construction declined sharply in 2009, and early indications show the industry is off to a slow start in 2010.
- The dollar amount of work authorized through March was \$1.9 billion. This was \$253.7 million less than first quarter last year, a decline of 11.7 percent. The rate of decline, however, has slowed compared to two years ago.
- Between January and March 2010, building permits were issued for 2,508 new houses. This time last year, there were 2,810. Between January and February 2008, the authorized dwellings totaled 4,751. New home construction continued to decline in 2010, but at a slower rate compared with 2008 and 2009.
- New Brunswick is top among all municipalities with 192 new dwellings through March. All of the units are from a single development, a mixed-use, 23-story building with condominiums, apartments, and office space.
- Lacey Township, Ocean County reported 111 authorized units through March, the second highest total among localities. An affordable apartment complex accounted for 100 units.

- Paterson in Passaic County has 109 new dwellings in the first three months of 2010, ranking third among localities. An 85-unit apartment building accounted for most of the new housing.

NOTE:

Users of the monthly *CONSTRUCTION REPORTER* may notice that year-to-date figures in a particular issue may not be obtained by merely summing the monthly totals that appear in previous issues. This is because the construction data compiled by the New Jersey Department of Community Affairs are continuously updated. Monthly construction reports submitted too late to make the January issue of the *CONSTRUCTION REPORTER*, for example, are included in the year-to-date totals that appear in the February issue.
