OVER-THE-COUNTER PERMITS

I. STREAM ENCROACHMENT (609) - 292 - 4869

DEP now has a one-day processing service for certain minor stream encroachment permits. This "over-the-counter" service is limited to minor projects which do not adversely change the water carrying capacity of the floodway, do not increase erosion or sedimentation in the stream, and do not require substantial channel modification or relocation. For further information contact the Bureau of Flood Plain Management, CN 029, Trenton, N.J. 08625.

II. WATERFRONT DEVELOPMENT (609) - 292 - 0060

DEP has a one-day processing service for minor waterfront development projects. This over-the-counter service applies to waterfront construction activity in man-made lagoons and minor maintenance and/or repair or replacement of lawful existing structures. For further information contact: Waterfront Development, CN 401, Trenton, N.J. 08625.

III. SEWER EXTENSIONS (609) - 292 - 4429

DEP has a one-day processing service for "minor" sewer extension projects. Eligible projects must meet certain criteria, such as, length of 1000 linear feet or less, cost of \$25,000 or less, sewage flow per day of 12,000 gallons or less. No projects with pump stations, force mains, siphons, gallonage transfers or holding tanks will be processed over-the-counter. Projects can not be located in areas under sewer ban, administrative orders, or litigation.

Projects must be in-house by 9:30 a.m., and all administrative documents must be in proper order. Pre-application conferences are strongly recommended. For further information contact Division of Water Resources, CN 029, Trenton, N.J. 08625.

MASTER PERMIT INFORMATION APPLICATION

DEP has developed a Master Permit Information Application which, upon completion, will indicate all the DEP permits required for the project. Forms may be obtained by contacting the Office of Business Advocacy (See inside cover for details).

AMENDED NOTICE OF MODIFICATION OF EFFLUENT LIMITATIONS

(This notice amends the October 2, 1981 Notice)

Issued Pursuant to the State of New Jersey

Surface Water Quality Standards (N.J.A.C. 7:9-4 et seq.)

NOTICE is hereby given that New Jersey Department of Environmental Protection (N.J.D.E.P.) has received a request for modification of effluent limitations issued to Loch Hill - Stage I. Such effluent limitations would be applied to a proposed discharge of wastewater from a 60 unit condominium development located in West Milford Township, Passaic County, New Jersey, into Belcher Creek, a tributary of Greenwood Lake, with a discharge point at the mouth of the lake.

Belcher Creek at the proposed discharge point is classified as FW-2 Nontrout. These waters are defined as fresh surface waters approved as sources of public water supply. These waters shall be suitable for potable public water supply after such treatment as shall be required by law or regulation. These waters shall also be suitable for the maintenance, migration and propagation of the natural and established biota, for primary contact recreation, for industrial and agricultural water supply and for any other reasonable uses.

The subject draft effluent limitations, issued pursuant to the New Jersey Water Pollution Control Act, N.J.S.A., 58:10A-1 et seq., and in conformance with the Clean Water Act, 33 U.S.C. 1251 et seq., contain a limitation on the amount of total phosphorus which may be discharged. De Grace and Associates, consultants, for Loch Hill, have requested a modification of this limitation.

The subject draft effluent limitations were established at a level calculated to attain the state stream water quality standards (N.J.A.C. 7:9-4 et seq.) of 0.05 mg/l of total phosphorus, year round. The goal of the Department is to attain or maintain water quality standards unless it can be demonstrated that the existing designated use is not attainable due to natural background, or because of irretrievable man induced conditions, or in Category II waters that there is no reasonable relationship between the economic and social costs of achieving the draft effluent limitations and the benefits to be obtained in attaining water quality standards.

In accordance with N.J.A.C. 7:9-5.12 the applicant contends that some degradation of the Belcher Creek (Category II non-trout) can be justified because of economic and social development factors.

The purpose of this NOTICE is to solicit comments from interested parties and determine, on the basis of said comments, if a public hearing on the proposed change should be held. All comments must be submitted within 30 days of the date of this notice.

The applicant contends that a change in the effluent quality from 0.05 mg/l to 0.1 mg/l of total phosphorus is expected to have minimal impact on the Greenwood Lake or interfere with or be injurious to the instream water uses. Please direct your comments to:
