PREFACE

This economic databook provides information for small business owners and managers who frequently find it difficult to obtain economic data for only the eight counties in Southern New Jersey. The area's data is often tucked in with that of Philadelphia or the entire State.

Funded by a grant from the New Jersey Small Business Development Center at Rutgers, Newark and aided by the South Jersey Chamber of Commerce, The Management Institute conducted a feasibility study in 1982 which established the need for an economic database. A follow-up grant and matching funds from the South Jersey Chamber allowed Dr. Thomas Hamer, a economics professor at Glassboro State College, to compile a computerized database in 1983. With continuing assistance from the South Jersey Chamber of Commerce, The Management Institute publishes semi-annual updated versions of ECONOMIC DATA FOR SOUTHERN NEW JERSEY. Dr. Hamer updates the database and serves as the Director of the Center for Economic Data Analysis which was established by The Management Institute in 1984.

The Center also produces databooks for smaller areas within the eight-county area, and it produces other analyses upon request. It is located in the Department of Economics at Rowan College of New Jersey (formerly Glassboro State College).

% Unemployed

Calculated by the database computer. Number unemployed divided by the civilian labor force equals the civilian unemployment rate. Note: the number unemployed according to the Census generally exceeds the number estimated by the monthly U.S. Dept. of Labor Household Survey because the respondents to the census include those without work but are not actively seeking employment.

% of Civilian Labor Force

Calculated by the database computer. This is the labor force participation rate for females.

County & State Work Location of Resident Workers Age 16 & Over

DESCRIPTION OF MUNICIPALITY DATA IN REPORT 5

"Municipality Data for Private Sector Establishment
Employment covered by Unemployment Insurance and
Federal Government Procurement Awards"

Total Covered Employment in September, 1980 and 1990:

Covered Employment is a monthly count of full and part-time employees at private sector establishments located in the municipality who earned wages during the pay period including the 12th of September, as reported quarterly by employers covered by the New Jersey Unemployment Compensation Law. Basically, any employer paying at least \$1,000 in wages in either the current or preceding calendar year is covered under the law. Jobs not covered by the law fall mainly into the categories of self-employed workers, unpaid family workers, certain agricultural workers, and certain in-home domestic workers. Note: Beginning with January 1978, coverage was extended for certain agricultural and in-home domestic workers.

DESCRIPTION OF MUNICIPALITY DATA IN REPORT 11

"Municipality Data for Local Property Tax Rates, Eligible and Certified to Apply for Certification for Tax Abatement Under the 'Five-Year Tax Abatement Law,' and Total Housing Units According to the Censuses"

1991 Property Tax Rates, General and Effective, and % of Tax Devoted to Local Purposes, County Uses, and Schools:

These are the local property tax rates.

Source: State of New Jersey, Department of the Treasury, Division of Taxation

"Comparison of 1990 to 1991 General Tax Rates & Effective Tax Rates," April 1992

The percentages are calculated by the database computer and are the effective tax rates devoted to each category divided by the total effective tax rate.

Tax Abatement: Municipality is Certified and Eligible to Apply for Certification for local tax abatement:

This information relates to Public Law 1977 c. 12 as amended - 4/6/83 (the so-called "Five-Year Tax Abatement Law"). The data indicate which municipalities are certified by the state to adopt an ordinance to reduce local property tax rates in either all or part of the municipality and which are eligible to apply for certification.

DESCRIPTION OF MUNICIPALITY DATA IN REPORT 14

"Value of Owner Occupied Housing Units
According to the 1990 Census"

Numbers of Housing Units in Value Ranges in Thousands of Dollars
Median Value
Interquartile Range: Lower & Upper

These data are for specified owner occupied housing units for which a value was determined in the 1990 Census of Population and Housing. The median value indicates a value for which 50% of the specified owner occupied units had a greater value and half a lower value. The lower range value is a value for which 25% of the units had a lower value. The upper range value is a value for which 25% of the units had a greater value. Between the two values lie the middle 50%.

PART B: DESCRIPTION AND SOURCES OF DATA FOR COUNTIES, THE
TRI-COUNTY AREA, AND THE ENTIRE AREA

1. Forecasts for Nonagricultural Establishment Employment
In the Burlington-Camden-Gloucester County Area
These forecasts are generated by Dr. Thomas Hamer using an econometric model estimated for the historical relationship between the quarterly average of monthly nonfarm payroll employment in the area and changes in price-adjusted Gross Domestic Product.
2. Business Outlook Survey
The Federal Reserve Bank of Philadelphia surveys manufacturing firms in its entire district each month. Most of these firms are in the Philadelphia area. The responding firms indicate the direction of change in various types of activity for the most recent month and expectations over the next six months.

13. Unemployment Insurance Claimants (Initial Claims)

The monthly number for initial claims are administrative data from "South District" UI Offices, which include the southern NJ area except for the Toms River area of Ocean County. The 12 month change is the current number less that for the same month one year earlier. A positive 12 month change indicates a worsening economy, while a negative means improvement.
