N. J. STATE DEPARTMENT OF EDUCATION. DIVISION OF
STATE LIBRARY, ARCHIVES AND HISTORY, 1961

INTRODUCTION

This *Bibliography of Official Reports, 1945-1960* is the work of the cataloging staff of the Bureau of General Reference and was compiled under the general supervision of Miss Rebecca Schlam, Legislative Research Librarian. It supplements the previous compilation, *Bibliography of Official Reports, 1905-1945*, edited by Miss Dorothy Lucas.

It is interesting to note that this 15-year supplement contains approximately the same number of entries as the previous bibliography covering 40 years. The tremendous increase in the volume of State publications is evidence of the growth of the State, the growth of the business conducted by its administrative agencies and the increasing use of research reports by the State Legislature.

It is hoped that the supplement will prove useful to libraries as well as to officers and students of State government.

ROGER H. McDONOUGH,
Director.

PREFACE

This 15-year bibliography lists reports and hearings of committees and commissions set up by the New Jersey Legislature, by the executive agencies, and by the state judiciary. Also listed are publications of a non-serial nature by the three branches of government and their annual reports. Publications for the period prior to 1945 are included in the supplement at page 145 if they were accessioned by the State Library after 1945. For lack of time and space periodicals, series of bulletins, circulars and conferences have been omitted.

As compared to the original bibliography, publication has increased on all levels. More committee and commission hearings have been recorded and made available to the State Library. However, some hearings listed were never printed, and are available only in manuscript form. As the State of New Jersey does not keep a complete stenographic record of legislative proceedings, scholars searching for background material on New Jersey legislation have found these hearings useful.

The compilation of the current supplement is based almost entirely on the groundwork laid by Miss Lucas. Her arrangement and index have been found to complement each other well in daily reference use. A search can be approached either through the subject index, or by date in the main listing in the bibliography. The arrangement of special studies is by year of publication in the order in which they were received by the State Library. The annual reports are arranged in the order in which they are classified in the State Library. In most cases all of the annual reports of an agency which has changed its name will be found together, with the entry under the new name following immediately after the entry under the old name. However, it is well to check the subject index for the annual reports of those few agencies whose administrative change was so great as to necessitate a new place in the classification. Most administrative changes came about as a result of the adoption of the Constitution of 1947.

The structure of the earlier index has been retained. Where different terminology is used, a reference is made from the old word to the new one. It is therefore possible to search by subject directly from the original volume to the supplement under the same index entry.

The State Library maintains a complete collection of all the items listed. The first copy of each item is marked "depository" and can be used in the Library only. Second and third copies, if available, can be borrowed by other state agencies and on inter-library loan.

REBECCA SCHLAM,
Legislative Research Librarian.
