Report of the State Board of Education.

DECEMBER 3, 1907.

To the Senate and General Assembly of the State of New Jersey:

Herewith I have the honor to submit the annual report of the State Board of Education with accompanying documents.

Chapter 270 of the laws of 1902 which authorized the erection of a new normal school, provides that the State Board of Education shall annually report to the Legislature a full and detailed statement of the expenditures during the year.

The Legislature in 1906 appropriated $275,000 for the erection of the building. In the report of last year it was stated that a contract had been made for the building at a cost of $198,800.

The building is nearly under roof and work on the interior will soon begin.

During the year plans for the Boiler House and Heating Plant at the school were prepared under the direction of the Commissioner of Charities and Corrections and approved by the Governor. A contract for the work was awarded to Frederick Kilgus at a cost of $42,203. A contract for grading, sodding, and building roads and walks was also awarded to Mr. Kilgus at a cost not to exceed the sum of $9,484.50.

A contract has also been entered into with Bobbink & Atkins of Rutherford for planting the necessary trees and shrubs at a cost of $2,500.

The contract for furnishing the Gymnasium was awarded to A. G.Spalding & Brothers of New York at a cost of $1,525.

A contract for the furniture of the school was awarded to The Derby Desk Company of Boston at a cost of $10,989.01.

A contract for the rugs for the Principal's and teachers' rooms was awarded to Hahne & Company of Newark at a cost of $436.28.

In addition to contracts mentioned above the sum of $2,215.50 has been expended for connecting with the water main and electric light mains and for blasting and preliminary grading and, for the

You Are Viewing an Archived Copy from the New Jersey State Library

State Inspector appointed by the Commissioner of Charities and Corrections the sum of $1,350, making a total of $269,503.29, leaving a balance available for purposes not named above of $5,496.71.

Unless something very unforseen occurs to prevent it, there appears to be no reason why the school should not open in either October or November next.

At the last session of the Legislature an appropriation of $30,000 was made for the erection of a dormitory and laundry at the Manual Training and Industrial School for Colored Youth at Bordentown. The contract for the dormitory was awarded to James W. Lanning of Trenton for $18,500 and the contract for the laundry to Edson B. Tantum of Bordentown for $4,197. The furnishing and equipping of these buildings will cost about $5,000, leaving a balance of the appropriation of nearly $3,000. These buildings will be completed early in January next.

With the increased accommodations and the increase in the appropriation for the current expenses of the school it will be possible to revise the course of study and enable the Board to offer to the colored children of the State an opportunity of securing a satisfactory training in agriculture, industrial arts and domestic science.

During the year a building used as a dormitory was totally destroyed by fire. The amount of insurance paid on the loss was $2,887.45, which has been paid to the State. The Board recommends that this amount together with a small additional sum be appropriated for the erection of an Infirmary at the School.

There are now two laws in force relating to industrial education, one authorizing the establishment of industrial schools with boards of trustees appointed by the Governor and the other providing for manual training courses in our public schools. Both of these laws provide that the State will duplicate the amount appropriated by the district for the purpose, the limit in the former act of the State aid to any School being $7,000 per annum and in the latter act to $5,000 per annum. Last year there was expended for these purposes the sum of $166,136.46, half of which sum was paid by the State.

In order that this most important branch of our educational system may receive proper attention and also that the State may have value received for the large sum expended for this purpose the Board recommends that the Legislature take such action as will

You Are Viewing an Archived Copy from the New Jersey State Library

secure proper inspection and supervision of industrial and manual training schools and departments.

Since the date of the last report the following appointments of County Superintendent of Schools have been made:

Cumberland County, John N. Glaspell, re-appointed.
Essex County, Albert B. Meredith, re-appointed.
Gloucester County, Daniel T. Steelman, vice William H. Eldridge, deceased.
Hudson County, M. H. Kinsley, re-appointed.
Hunterdon County, Jason S. Hoffman, re-appointed.
Monmouth County, John Enright, re-appointed.
Morris County, Watson B. Matthews, re-appointed.
Salem County, J. A. Wentzell, re-appointed.
Union County, J. J. Savitz, vice William J. Shearer.

As required by law the Reserve Fund being ten per cent. of the State School Tax was apportioned at a meeting held on the fifth day of February as follows:

Atantic County	$9,234 39
Bergen County	17,953 85
Burlington County	9,303 05
Camden County	17,885 20
Cape May County	3,432 86
Cumberland County	8,822 45
Essex County	69,069 14
Goucester County	6,076 16
Hudson County	54,925 76
Hunterdon County	5,767 20
Mercer County	13,697 11
Middesex County	11,980 68
Monmouth County	15,138 91
Morris County	10,332 90
Ocean County	4,771 67
Passaic County	26,501 67
Salem County	5,286 50
Somerset County	6,213 47
Sussex County	5,183 61
Union County	15,619 51
Warren County	6,659 74
Total	$323,855 83

The reports of the Principals of the Trenton State Normal School, of the School for the Deaf and of the Manual Training and

You Are Viewing an Archived Copy from the New Jersey State Library

Industrial School for Colored Youth, show a steady improvement in the work of these institutions. The accommodations now provided in the School for the Deaf are not sufficient to meet the demands and more adequate accommodations must be provided in the near future if the State is to fulfill its duty to its deaf children who cannot, on account of their unfortunate condition, receive instruction in the ordinary public schools. This school cannot be considered as a charitable or semi-charitable institution, but purely as a public school and as the means adopted by the State of complying with that provision of our Constitution which directs that a "thorough and efficient system of free public schools" shall be established for the education of all children between the ages of five and eighteen years.

A study of the statistics contained in the report of the State Superintendent shows that our public schools have made marked progress during the year. The enrollment increased 12,866 and the average daily attendance increased 9,178. The total number of teachers employed was 10,011, an increase of 577. The average annual salary paid the teachers is $617.47, an increase of $23.76.

During the year the following public High Schools were placed on the Approved List for four years of academic work:

Belvidere, Warren County; Butler, Morris County; Dover Township (Toms River), Ocean County; Irvington, Essex County; Keyport, Monmouth County; Ocean City, Cape May County; Point Pleasant, Ocean County; Ridgefield Park, Bergen County; Roselle, Union County; Roxbury Township (Succasunna), Morris County; Washington, Warren County; West Hoboken, Hudson County.

The following public High Schools were registered for three years of academic work:

Alloway Township, Salem County; Bernards Township (Bernardsville), Somerset County; Bordentown City, Burlington County; Bridgeton, Cumberland County; Commercial Township (Port Norris), Cumberland County; Downe Township (Newport), Cumberland County; Egg Harbor City, Atlantic County; Elmer, Salem County; Gloucester City, Camden County; Hardyston Township (Hamburg), Sussex County; Hopewell Township (Shiloh), Cumberland County; Lambertville, Hunterdon County; Livingston, Essex County; Matawan, Monmouth County; Medford, Burlington County; Palmyra, Burlington County; Pennsgrove, Salem County;

You Are Viewing an Archived Copy from the New Jersey State Library

Pleasantville, Atlantic County; Roselle Park, Union County; South Amboy, Middlesex County; Wharton, Morris County; Wildwood, Cape May County.

The following institutions have been registered for full collegiate courses:

Rutgers College, New Brunswick.

Rutgers Scientific School, New Brunswick.

St. Peter's College, Jersey City.

The following private schools have been registered for four years of academic work:

Ivy Hall, Bridgeton; Lawrenceville School, Lawrenceville; New ark Academy, Newark; Princeton Preparatory School, Princeton; Rutgers Preparatory School, New Brunswick; St. Benedict's College, Newark; St. Peter's Preparatory School, Jersey City; and Wenonah Military Institute, Wenonah.

Gal. THREE—Board of Education.

The following private schools have been registered for three years of academic work:

St. Joseph's Academy, Bordentown; St. Mary's School, South Amboy; St. Mary's School, Trenton; and South Jersey Institute, Bridgeton.

At the last session of the Legislature an act was passed authorizing the establishing of evening schools for foreign born residents of this State. The act provides that the courses of study in schools established under this act shall be approved by the State Board of Education.

The course of study for such schools submitted by the City of Hoboken has been approved by this Board.

For fuller information concerning the public schools and the several schools under the direct control of this Board your attention is called to the reports of the State Superintendent and of the principals of the several schools which are submitted herewith.

JAMES L. HAYS,
President.

STATE OF NEW JERSEY,
DEPARTMENT OF PUBLIC INSTRUCTION,
TRENTON, December 30th, 1907.

To the State Board of Education:

GENTLEMEN—In compliance with the requirements of the School Law I have the honor to submit herewith my Twelfth Annual Report as State Superintendent of Public Instruction, the same being for the school year ending June 30th, 1907.

CHARLES J. BAXTER,

State Superintendent.

You Are Viewing an Archived Copy from the New Jersey State Library

suggest a long reach to the much coveted equality of opportunity toward which we have so long been striving.

The enrollment in our high schools during the same year was 18,660, and the number of graduates from the complete course was 1,832. Bearing in mind that the complete public school course covers a period of twelve years, irrespective of the kindergarten, and that to make an approximate estimate of the percentage of pupils who complete it it is necessary to compare the average school enrollment for twelve years with the total number of high school graduates for the same period, we find that of each 100 pupils who enter our schools, six continue to the end of the course and receive an up-to-date common school education. The failure of the other 94 per cent. to receive the full benefit of the school facilities provided is due to various causes.

In many homes the income is so meagre that it is deemed necessary, and sometimes is necessary, for little hands to contribute to the family support. Cases of this character are everywhere in evidence. They should, however, in this land of unlimited resources and abundant employment be much fewer in number. In many other homes the scope of a common school education and its value as a life factor are greatly underestimated: A substantial deposit in the savings bank is regarded as more desirable than the training which would prepare the children for efficient service and right living, the penny in hand looks larger than the prospective dollar which larger development and greater earning capacity would assure.

The most fruitful cause of the swarming out from our schools before courses are completed and powers developed is that many of them do not give the children what they most need and what is best adapted to make them happy, useful, contented and self-reliant citizens. Notwithstanding the thought and effort which we have for years been spending upon the revision and modification of our courses of study, we have thus far failed to secure the right articulation between school life and practical life, between school work and the world's work. The colleges and schools do not contribute to the various lines of human interest and effort the self-directing energy, the executive capacity, the initiative and the ability and courage to grapple with life's problems which they should furnish.

That they give us most gratifying results as regards the matter

You Are Viewing an Archived Copy from the New Jersey State Library

of scholarship is readily admitted. The busy world, however, cares very little what a person knows or what he professes to know, but is intensely interested in what he can do and rates him accordingly. Only the education which develops individual power, which evolves qualities and prepares the pupil both in mind and body for the highest service in keeping with his native gifts is worth what it costs and is really worth while. There is no culture to be compared with that which includes the ability and the ambition to do. The education that is purely academic is largely ornamental and will inevitably give us many graduates who will prove a burden both to society and to themselves.

The following selections from the general summary of statistics show the rapid growth of the New Jersey public school system during the school year of 1906-1907.

RECEIPTS.

(1)	Amount appropriated from State Fund for various school purposes	$1,489,843 31
	Increase over preceding year	208,977 67
	Percentage of increase	16.3
(2)	Amount of State school tax	2,062,208 29
	Increase over preceding year	175,718 29
	Percentage of increase	9.3
(3)	State appropriation to reduce State school tax	$1,110,419 85
	Increase over preceding year	94,616 54
	Percentage of increase	9.3
(4)	Total amount of 2 3-4 mill tax	$3,172,628 14
	Increase over preceding year	1,270,335 83
	Percentage of increase	9.3
(5)	Amount of district tax	$7,485,751 87
	Increase over preceding year	1,015,435 59
	Percentage of increase	15.7
(6)	Amount received from sale of district bonds	$1,029,455 00
	Increase over preceding year	135,169 00
	Percentage of increase	15.1
(7)	Amount available for school purposes	$14,175,945 93
	Increase over preceding year	1,520,805 57
	Percentage of increase	12

DISBURSEMENTS.

(1)	Amount expended for teachers' salaries	$6,181,475 13
	Increase over preceding year	580,425 99
	Percentage of increase	10.4

(2)	For building and repairing school houses	$2,967,800 89
	Increase over preceding year	909,338 26
	Percentage of increase	44.2
(3)	For debt and interest	$743,075 17
	Increase over preceding year	133,540 97
	Percentage of increase	21.9
(4)	For manual training	$166,136.46
	Increase over preceding year	39,998 83
	Percentage of increase	31.7
(5)	For text-books and apparatus	$592,227 16
	Increase over preceding year	116,707 46
	Percentage of increase	24.5
(6)	For transportation of pupils	$21,449 68
	Increase over preceding year	9,561 64
	Percentage of increase	80.5
(7)	For tuition of pupils in other districts	$72,344 20
	Increase over preceding year	26,399 42
	Percentage of increase	57.5
(8)	For current expenses of N. J. school system	$9,131,249 19
	Increase over preceding year	1,011,310 82
	Percentage of increase	12.4
(9)	Total amount expended for school purposes, including building and repairs and debt and interest	$12,842,125 25
	Increase over preceding year	2,054,190 05
	Percentage of increase	19

APPROPRIATIONS FOR THE SCHOOL YEAR, 1907-1908.

(1)	State school tax	$3,238,558 28
	Increase over preceding year	1,176,349 99
	Percentage of increase	57
(2)	State appropriation to reduce State school tax	$1,079,519 42
	Decrease from preceding year	30,900 43
	Percentage of decrease	2.7
(3)	Total amount of 2 3-4 mill tax	$4,318,077 70
	Increase over preceding year	1,145,449 56
	Percentage of increase	36.1
(4)	District school tax	$7,142,174 33
	Decrease from preceding year	192,891 26
	Percentage of decrease	2.6

SCHOOL BUILDINGS.

(1)	Number of school buildings owned	1,948
	Number of school buildings rented	70
	Number of school buildings used	2,018
	Increase in number of school buildings used	27
(2)	Total value of school property	$27,294,539 00

	Increase in valuation over preceding year	5,572,259 00
	Percentage of increase	25.2
(3)	Average value of school buildings	$14,012 00
	Increase over preceding year	2,734 00
	Percentage of increase	24

TEACHERS.

(1)	Number of male teachers employed in the State	1,148
	Increase over preceding year	41
(2)	Number of female teachers employed in the State	8,863
	Increase over preceding year	536
	Ratio of female teachers to male teachers is 7.6 to 1.	
(3)	Total number of teachers employed	10,011
	Increase over preceding year	577
	Percentage of increase	6.1
(4)	Average salary per year paid to all teachers	$617 47
	Increase over preceding year	23 76
	Percentage of increase	4.1

ATTENDANCE.

(1)	Total enrollment in the public schools	394,060
	Increase over preceding year	12,866
	Percentage of increase	3.4
(2)	Total days attendance during the year	52,047,367
	Increase over preceding year	1,095,704
	Percentage of increase	2.15
(3)	Average number of pupils in schools	300,399
	Increase over preceding year	10,627
	Percentage of increase	3.7
(4)	Average daily attendance	276,095
	Increase over preceding year	9,178
	Percentage of increase	3.4

TEACHERS' CERTIFICATES.

(1)	Number of State certificates granted during the year	871
	Increase over preceding year	195
(2)	Number of county certificates granted during the year	1,024
	Decrease from preceding year	63
(3)	Number of State certificates held	3,213
	Percentage of State certificates held	31.64
(4)	Number of county certificates held	2,888
	Percentage of county certificates held	28.44
(5)	Number of city certificates held	4,053
	Percentage of city certificates held	39.92
(6)	Total number of teachers certificates held in the State	10,154

A COMPARISON OF STATE AND DISTRICT SCHOOL TAX.

1ST. STATE SCHOOL TAX.

During the past three years a State School Tax of 2¾ mills based upon the ratables of one fiscal year and assessed upon the ratables of the year next succeeding has resulted in revenues as follows:

1905-1906	$2,902,292 31
1906-1907	3,172,628 14
1907-1908	4,318,077 70
Total for the past three years	$10,392,998 15

The amounts appropriated from the State Treasury during the same period to reduce the 2¾ mill tax were as follows:

1905-1906	$1,015,802 31
1906-1907	1,110,419 85
1907-1908	1,079,519 42
Total appropriation for the past three years	$3,205,741 58
State school tax actually levied during the past three years	$7,187,256 57

This amount is nearly 31 per cent. less than the said tax would have been, had there been no state appropriation to reduce it.

2ND. DISTRICT SCHOOL TAX.

The several amounts of district school tax levied during the same period were as follows:

1905-1906	$6,470,316 28
1906-1907	7,334,065 59
1907-1908	7,142,174 33
Total district tax levied during the past three years	$20,946,556 20

A comparison of the total State school tax with the total district tax for the years in question shows that the former is but 34 1-3 per cent. of the latter. The people voluntarily voted upon themselves for the current expenses of the schools and additional school accommodations nearly three times as great a tax as that which was imposed by statute. In view of this fact it seems unaccountable that

You Are Viewing an Archived Copy from the New Jersey State Library

any one should favor a further lessening of the lighter burden and appear to be oblivious to the greater.

When the amount which we expect to receive from the railroads shall become available, this proposed relief to the school districts should not be partially nullified by lowering the rate of State school tax and thus diminishing in like ratio the amount to be received from such source.

For the formidable amount raised by district tax we are indebted to the liberal and progressive citizens, who, despite opposition and censure, have persistently and courageously striven to provide adequate and suitable school facilities. Though they have accomplished much, conditions are still far from being ideal, and they seem to have enlisted in a struggle that will never end. Notwithstanding the liberal expenditures for building and repairs and the rapid increase in the value of school property, we still have many school houses which are unsanitary and unfit for use.

In addition to this, the rapid increase in school population makes it well nigh impossible for many districts to keep pace with the demands for additional school accommodations, and, as a result, we are constantly embarrassed by the distressing problems of half-day classes and overcrowded class rooms. Even with these enforced and regrettable expedients there are still many children without any school facilities whatever. Many boards of education refrain from enforcing the provisions of the compulsory attendance law, because doubtful of the wisdom of forcing an element needing very special and humane attention into overcrowded schools and making accommodations already insufficient still more inadequate, and conditions already unsanitary still more vicious.

In their effort to improve school conditions, some districts find themselves on the horns of a most embarrassing dilemma. They are confronted by the terrors of Scylla on one hand and warned against those of Charybdis on the other. They are threatened with the loss of all State school moneys if they do not provide adequate and suitable school facilities, while, if they should provide them, they would exceed the maximum tax rate. As the State school tax is not included in the items which go to make up the said maximum tax rate, this fact furnishes a cogent and unanswerable reason why any reduction that it shall be found practicable to make in the taxes levied for the support of our public schools, should be made in the *district school tax,* for, as shown by the preceding figures, it is cer-

You Are Viewing an Archived Copy from the New Jersey State Library

tainly in the school districts that the burdens are the heavier and the embarrassments the greater.

In view of the pressing demands upon the school districts because of advancing standards and a rapidly increasing school population, any further reduction in the 2¾ mill tax would be not only unwise, but most discouraging and unfortunate.

THE RAILROAD TAX FUND.

So much misinformation has been disseminated in regard to the long-anticipated Railroad Tax Fund, and so many impossible things are expected of it, that we fear many do not fully appreciate the magnitude of our system of free public schools and the cost of maintaining it.

During the school year for which this report is made the total outlay for school purposes, including building and repairs, debt and interest, appropriations for special and administrative purposes, and for the support of State schools, reached the imposing aggregate of $12,927,037. Of this sum $3,779,463.90 or 29.24 per cent. was provided by the State, $9,140,223.10, or 70.71 per cent. by the school districts, and $7,350 by the counties.

The current or running expenses of the schools for the same year was $8,926,428.10. To this sum the State contributed $3,501,140.44, or 39.22 per cent., and the school districts $5,425,287.56, or 60.78 per cent.

If the $2,530,867.35 expected from the increase in the state tax upon railroad property had then been available, the total amount received from the State would have been $6,032,007.79. This formidable total is $149,467.34 less than was expended for the single item of teachers' salaries, $1,453,744.08 less than the district tax that was then levied, and $2,094,420.31 less than was used by local boards of education for the necessary current expenses of the schools under their supervision. Therefore, if in the school year of 1906-1907, the revenue from the railroad tax had been an actual possession instead of an encouraging anticipation, it would not, as many profess to believe have provided such an embarrassment of school funds as to compel a substantial and much-needed advance in teachers' salaries, neither would it, in any district providing up-to-date school facilities, have been sufficient to "wipe out"

You Are Viewing an Archived Copy from the New Jersey State Library

the portion of district tax levied for the current expenses of its schools, nor by any means have even remotely suggested the advisability of appealing to the legislature for permission to use a portion of the said tax for buildings and repairs or for the payment of debt and interest.

All these preposterous suggestions are frequently heard, and their influence upon the faithful and well-meaning taxpayer is greatly to be deplored. Though the building of air castles is a pleasant and allowable diversion, it should be associated with something less real and of less vital importance to us than our public schools.

When the railroad tax shall become a part of the funds available for the support of public education, the most that can be expected of it is a general reduction in the portion of the district tax levied for current expenses. When this shall come to pass it will be found that the percentage of reduction in the said tax in the several school districts will be inversely proportional to their progressiveness. Those districts in which minimum expenditure instead of judicious expenditure, in which economy rather than efficiency, is regarded as the great desideratum in school administration, may, for a brief period, be obliged to levy a district tax only for those purposes for which the use of money received from the State is by law prohibited; but the inevitable increase of expenses incident to the rapid growth and development of our school system will soon exceed the sudden acquisition of funds so generally anticipated, and, as regards the matter of taxation for school purposes, will gradually re-establish present conditions.

Section 228 of the School law restricts the use of all money received from the State for the support of the public schools to the payment of teachers' salaries, the purchase of fuel and the transportation of pupils to, and their tuition in, other districts. In view of the present and prospective increase in State School money it is believed that much embarrassment would be avoided, and that greater benefit would accrue to the schools, if to the boards of education were given larger discretion in its expenditure. It is therefore respectfully recommended that the section in question (section 228) be so amended as to make all money received from the State available for all the purposes included in the term "current expenses." This term as defined in section 95 includes the following items:

"Principals', teachers', janitors', and medical inspectors' salaries,

You Are Viewing an Archived Copy from the New Jersey State Library

fuel, text-books, school supplies, flags, transportation of pupils, tuition of pupils attending schools in other districts with the consent of the board of education, school libraries, compensation of the district clerk, of the custodian of the school moneys and of truant officers; truant schools, insurance, and the incidental expenses of the schools."

CONCERNING THE ADVISABILITY OF A TEACHERS' MINIMUM SALARY LAW.

During recent years there have been decided advances in the cost of living, in the standard of qualification and character of the service required of teachers, and but a slight increase in their salaries. These inharmonious conditions have given rise to somewhat strained relations between the all-important matters of income and outgo, and with the exception of the teachers employed in certain districts, to a somewhat general feeling of dissatisfaction and unrest.

Having become weary of the embarrassments incident to inadequate incomes, they are now endeavoring to devise some means of relief. One of the expedients suggested is the enactment of a law which will prohibit the employment of any teacher in the public schools of the State at a salary less than $500 per annum. Those who favor this measure believe that the arbitrary establishment of a fairly adequate beginning salary for teachers will result in a sudden appreciation of their worth and work, the quick awakening or a more liberal and enlightened public sentiment, the more cheerful and effective service of teachers and, as a logical result more efficient schools. If conditions in the State were such as to warrant anticipations so pleasing, and advances in teachers' salaries in keeping with their experience and development would also be quite certain to result from the enactment of the law in question, the prospect of results so desirable would appear to warrant the experiment. But a careful survey of conditions throughout the State leads us to fear that the probable advantages and disadvantages of the proposed law have not been fully considered, that it is not broadly conceived, and, if enacted, would inure to the disadvantage of both teachers and schools.

In the conception and development of any beneficent scheme there is always a paramount interest which, if ever kept in view and rightly conserved, will most surely advance all other related interests. According to popular opinion, a system of free public schools has

You Are Viewing an Archived Copy from the New Jersey State Library

been established and is maintained for the purpose of promoting the prosperity and security of the State. The primary and real purpose of the said system is, however, the promotion of the present highest good and the future well-being of the youth of the State. The latter consummation includes and insures the former. Therefore the supreme purpose of our scheme of public education is the training of the children of the State; the welfare of the State, though comprehensive in importance, is an incidental fruition, and the teaching force of the State is simply the chief agency through which results are accomplished. The more satisfactory these results the higher the esteem in which the teaching profession will be held, and, in the direct ratio of his or her efficiency, the larger should be the compensation of the individual teacher. With this just and ideal adjustment of the matter of compensation, the arbitrary fixing of a uniform, minimum salary for teachers would be in direct conflict.

In the industries in which close supervision is employed and the work of each operative is passed upon by an expert, we frequently find employees rendering practically equivalent service and receiving equal compensation, but in the great work of teaching, in which not only the academic education but the character, the culture, the life and the spirit of the teacher each constitutes an important part of his equipment, a wide diversity in the value of the service rendered is inevitable. It has been asserted that, "All the gold of all the mines is not sufficient to measure the worth of the work of the able, efficient and conscientious teacher, and that the least value ever stamped upon a coin is more than sufficient to reward the teacher whose service is perfunctory."

To a person having a correct conception of the far-reaching influence of the teacher's work and example, the preceding statement will not seem extravagant, and when it is remembered that the influence of the teacher's precepts and example concerns the pupils' welfare in two worlds, even the suggestion of a scale of values ranging from a varying negative quantity to infinity is not extreme, and grave injustice will be wrought by any measure which fails to take into account the fact of a wide diversity of qualification, even among teachers who have had equal experience and similar educational advantages.

The fixing of a minimum teacher's salary by the State would by some school boards be regarded as an authorized rating of the value of teaching, and the good, poor and indifferent in their employ

You Are Viewing an Archived Copy from the New Jersey State Library

would receive the same compensation and any fixed minimum salary thus become a maximum salary. In the many school districts which are far richer in school population than in ratables, a mimmum salary of $500 per annum would of necessity also be the maximum salary, because sufficient to exhaust if not to exceed all their available funds, and thus prohibit any financial discrimination in favor of the teachers whose work is the most valuable.

Boards of education are already too much embarrassed by a feature of trade-unionism which has no place in the schools. Teachers of equal experience and employed in the same grades, though frequently doing work which differs widely in character and value, usually receive the same salary. Those who are exceptionally efficient and whose services are well nigh indispensable to the district in which they are employed, though loth to do so, are often obliged to accept or to seek employment in other districts, master a new field of effort and adjust themselves to a new environment, in order to secure a well-deserved and sometimes necessary increase in income. Those who are so firmly anchored in the home district as to make a change of environment impracticable, frequently continue to teach for smaller salaries than await them elsewhere, and, it is to be hoped, succeed in guarding against any abatement of effort or enthusiasm.

A desire to be just impels me to add that many employing boards wish to reward, and as a matter of justice and good business policy, would properly reward exceptional faithfulness and efficiency, if not deterred from so doing by an erroneous public sentiment. Some communities deny the right of a board of education to exercise a wise discrimination in its allotment of teachers' salaries. This is greatly to be regretted as the prospect of better compensation with its incident professional advancement is a most effective spur to effort,

The most serious objection to the proposed minimum salary for teachers is that in a great majority of the smaller school districts it would put a premium upon inexperience and limited attainment. Any readjustment of salaries which would be at the expense of those whose services are the most valuable and who have done the most to redeem the teaching profession from mediocrity would be greatly to be deplored.

Our reports for the past three years show an average of 937 whose total experience in teaching was one year or less. This means that during these years an annual average of 937 or a total of 2,811

You Are Viewing an Archived Copy from the New Jersey State Library

persons entered the teaching profession in this State. The same reports also show an average of 876 who taught during the same period under third grade county or third grade city certificates. As there is no other form of employment in which the duties are so exacting and nerve-wearing, and in which attainment and experience count for so much, the especial solicitude for the liberal rewarding of the absence of these qualifications is incomprehensible. Until it shall become practicable to require some measure of academic attainment for admission to the teachers' examinations and to adopt a proper standard of admission to the teaching profession, the beginners in this as well as in other lines of employment should in a financial as well as in a professional sense be regarded as apprentices until they have proved their worth.

No school legislation should be seriously considered which has not been conceived in the interest of the youth of the State, and which, if enacted, would tend to inure to the disadvantage of our teaching force or to the detriment of our schools.

TABLE XXIV.

State Certificates Issued During the Year, 1906-07.

First Grade.

Batten, Reeves D.
Garrison, Levi Turner
Griffith, A. Spencer
Godfrey, Robert C.
Hannas, Warren F.
Hillas, Marie L.
Howell, Allanson
Larue, Martha A.
Lawler, Mary M.
Marlatt, Alfred A.
Marsteller, Hower T.
Myers, John M.
Ramsey, Mary A.
Radcliffe, Paul Rodney
Reinhand, Carrie
Tilton, Francis Edward
Wagner, Elmer D.
Withrow, Helen Parker

Second Grade.

Alces, Ida A.
Bucher, Maria E.
Cass, E. Stella
Coleman, J. G.
DeLap, D. F.
Deveney, Curdie A.
Doell, Nettie
Enright, Emma M.
Glick, Martha Ella
Griffith, A. Spencer
Hilliard, R. C.
Hollenbach, Walter F.
Holly, B. F.
Kiely, Teresa
Magner, Edward J.
Morey, Robert W.
Myers, J. M.
Northrop, Kate C.
Robbins, Elijah
Roe, Warren A.
Ryerson, Mary E.
Smedley, Elizabeth M.
Sweeney, Daniel P.
Thompson, Fred
Tilton, Francis E.
Weld, Mildred A.
Williams, Emily A.

Third Grade.

Ackerman, Emma L.
Adaire, Anna
Alces, Elizabeth M.
Alces, Ida A.
Barker, Sadie Rose
Baker, Carrie E.
Baldwin, Keturah
Barnes, Thomas L.
Bard, Anna L.
Bauer, George
Bernhard, Agnes L.
Brunett, Bernise
Bender, Andrew
Bohe, Ella Cole
Budd, Francis H.
Chambellan, Bertha M.
Chamberlin, Robert R.
Chamberlain, Robert R.
Chapman, Lena M.
Clark, George Jr.
Costello, Margaret Clara
Curtis, Rachel E.
Davidson, Blanche I.
Davis, W. B.

De Turck, James
Dietz, Charles E.
Dixon, H. D.
Eby, Walter M.
Eddy, George W.
Elting, Martha
Ellis, Lillian Raushere
Elliot, Isabel
Farrell, May F.
Fields, Mabel C.
Fitch, Clifford P.
Foster, William F.
Frost, Emma V.
Fritts, Ada C.
Gienger, Watson
Gill, Emma F.
Groves, Harry G.
Griffes, Florence B.
Grove, Erwin Hillard
Guynn, Edgar Hart
Gunn, Blanche Edith
Hambright, John B.
Hamilton, Grace Helen
Hanghwont, Mary R.
Hepburn, Emilie
Hitzelberg, John A.
Hoag, Raymond C.
Howell, Mary Harrison
Huse, Blanche M.
James, A. Estella
Jacobs, Olin Merrit
Jones, Augusta Therese
Kirkbride, Edward N.
Larned, Margaret
Lawton, Maxwell Francis
LeVene, Clara Mae
Lester, Claud F.
Lerch, Raymond
Lukens, Marion
Manning, Harriet Cleveland
Mac Cart, Carrie
Martin, Ida M.
Martin, Amy Wilson
McCashie, Carrie
McKeag, Edwin C.
Mead, Abbey G.
Morrison, Josephine C.
Myers, Lanning
Myers, Blanche Eloise
Nugent, James Alexander
Odwell, Jean I.
O'Brien, Joseph A.
Pendleton, Fanny Thompson
Perkins, Carrie E.
Preston, Julia Wells
Prince, Alice
Quirk, Augusta
Reed, Ethel Foster
Riggs, James G.
Richardson, Jessie C.
Roe, Agnes
Say, Edith Weeks
Schenck, Florence Marion
Schuyler, M. Eloise
Scudder, Agnes
Secor, Mabel R.
Sears, Martha Louise
Spring, Frank E.
Staley, Orville H.
Steelman, Daniel T.
Stewart, Bessie
Stephens, Mary
Swimnerton, Charlotte S.
Thompson, Samuel D.
Thompson, Cornelia B.
Tisdale, W. D.
Timm, Vera A.
Townsend, S. Dana
Tyler, Mary Lucy
Uhler, S. P.
Van Dyke, John M.
Van Duzer, Anna
Van Atta, J. A.
Wahlert, Herman H.
Waller, Amelia C.
Wilcox, Carrie E.
Wiese, R. Anita
Yates, Mame E.

SPECIAL KINDERGARTEN.

Byram, Minnie A.
Doremus, Emma S.
Harris, Nellie May
Sauder, M. Alice
Stevens, Millicent
Van Sciver, Jeanette F.

TABLE XXVI.

Payments to School Libraries.

ATLANTIC COUNTY.

Absecon City—School No. 1.
Atlantic City—Monterey Ave., Madison Ave., Illinois Ave., Indiana Ave., Chelsea, Texas Ave., High, West Side, New Jersey Ave., Pennsylvania Ave.
Buena Vista township—School No. 7.
Egg Harbor City—School No. 1.
Galloway township—Schools Nos. 4 and 8.
Hamilton township—School No. 5.
Hammonton—Schools Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9 and 10.
Pleasantville borough—Schools Nos. 1, 2 and 3.
Port Republic—School No. 1.
Somer's Point—School No. 1.
Weymouth—School No. 5.

BERGEN COUNTY.

Allendale borough—School No. 1.
Alpine borough—School No. 1.
Bergenfield borough—School No. 1.
Bogota borough—School No. 1.
Carlstadt borough—Schools Nos. 1 and 2.
Cliffside Park—Schools Nos. 1 and 2.
Creskill borough—School No. 1.
Demarest borough—School No. 1.
Dumont borough—School No. 1.
Englewood City—Schools Nos. 1, 2, 3, 4, 5 and 6.
East Rutherford borough—Schools Nos. 1 and 2.
Edgewater—Schools Nos. 1 and 2.
Etna borough—School No. 1.
Fairview borough—Schools Nos. 1 and 2.
Fort Lee—School No. 1 and 4.
Franklin township—Schools Nos. 2, 5 and 7.
Garfield borough—School No. 2.
Harrington township—School No. 6.
Harrington Park—School No. 1.
Haworth—School No. 1.
Hillsdale township—School No. 1.
Hohokus township—Schools Nos. 1, 2, 3 and 4.
Leonia borough—School No. 1.
Little Ferry borough—School No. 1.

You Are Viewing an Archived Copy from the New Jersey State Library

Lodi borough—Schools Nos. 1 and 2.
Maywood—School No. 1.
Midland Park borough—School No. 1.
Midland township—Schools Nos. 1, 2 and 3.
Montvale borough—School No. 2.
North Arlington borough—School No. 1.
Oakland borough—School No. 1.
Orvil borough—School No. 1.
Orvil township—School No. 2.
Overpeck township—Schools Nos. 1 and 2.
Old Tappan borough—School No. 1.
Palisades township—School No. 1.
Palisades Park borough—School No. 1.
Park Ridge borough—School No. 1.
Ridgefield borough—School No. 1.
Ridgewood township—Schools Nos. 1, 3, 4 and 5.
Rutherford borough—Schools Nos. 1, 2 and High.
Saddle River township—Schools Nos. 1, 2, 3 and 4.
Teaneck township—School No. 2.
Union township—Schools Nos. 1 and 2.
Upper Penn's Neck—School No. 3.
Upper Saddle River borough—School No. 1.
Wallington borough—School No. 1.
Washington township—School No. 3.
Westwood borough—School No. 1.
Woodcliffe borough—School No. 1.
Wood Ridge borough—School No. 1.

BURLINGTON COUNTY.

Beverly City—Schools Nos. 1 and 2.
Chester township—Schools Nos. 1, 2, 3, 4, 5, 6, 7, 8 and 9.
Cinnaminson township—Schools Nos. 1, 2 and 4.
Delran township—School No. 2.
Lumberton—Schools Nos. 1, 2, 3, 4 and 5.
New Hanover township—School No. 2.
Northampton—Schools Nos. 1, 2, 3 and 4.
Pemberton Borough—School No. 1.
Riverside township—School No. 1.
Shamong—School No. 3.
Springfield—School No. 5.
Tabernacle township—Schools Nos. 1 and 4.

CAMDEN COUNTY.

Collingswood borough—Schools Nos. 1 and 2.
Delaware township—School No. 3.
Gloucester City—Schools Nos. 1, 2, 3, 4 and 5.

You Are Viewing an Archived Copy from the New Jersey State Library

Gloucester township—School No. 11.
Haddon township—School No. 1.
Pensauken—Schools Nos. 3, 5 and 6.
Waterford township—School No. 5.
Winslow township—Schools Nos. 1, 5, 6 and 8.

CAPE MAY COUNTY.

Cape May City—School No. 1.
Dennis township—Schools Nos. 4, 7 and 8.
Lower township—School No. 4.
Middle township—Schools Nos. 1, 4 and 6.
Ocean City borough—School No. 1.
Upper township—School No. 3.
West Cape May—School No. 2.
Woodbine—Schools Nos. 1, 2, 3 and 4.

CUMBERLAND COUNTY.

Bridgeton City—South Avenue.
Commercial township—Schools Nos. 4 and 5.
Deerfield township—Schools Nos. 1, 2, 4 and 10.
Downe township—School No. 1.
Greenwich township—Schools Nos. 1 and 2.
Hopewell township—Schools Nos. 4, 5 and 8.
Landis township—Schools Nos. 3, 4, 5, 6, 7, 8, 9, 10, 11 and 12.
Maurice River township—School No. 3.
Millville—Schools Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 and High.
Stowe Creek township—School No. 1.

ESSEX COUNTY.

Bloomfield township—Schools Nos. 1, 2, 3, 4, 5, 6, 7 and 8.
East Orange—Schools Nos. 1, 2, 3, 4, 5, 6, 7 and 8.
Glen Ridge—School No. 1.
Livington township—Schools Nos. 2 and 3.
Millburn—Schools Nos. 1, 2, 3, 4 and 5.
Montclair—Schools Nos. 1, 2, 3, 4, 5, 6, 7, 8 and 9.
Newark—Seventh Avenue, Central Avenue and Vailsburgh.
Nutley—Schools Nos. 1, 2, 3, 4 and 5.
Orange—Schools Nos. 1, 3, 5 and 6.
South Orange township—Schools Nos. 1, 2 and 3.
Verona township—Schools Nos. 1 and 2.
West Orange—Schools Nos. 1, 2, 3, 4, 5, 6 and 7.

GLOUCESTER COUNTY.

Deptford township—School No. 1.
East Greenwich township—School No. 3.
Greenwich township—School No. 2.

You Are Viewing an Archived Copy from the New Jersey State Library

Harrison township—Schools Nos. 1, 6 and 7.
Monroe township—School No. 4.
Pitman borough—School No. 1.
Washington township—School No. 1.

HUDSON COUNTY.

Bayonne—Schools Nos. 3, 7 and High.
East Newark—School No. 1.
Hoboken—School No. 1.
Jersey City—Schools Nos. 1, 2, 4, 5, 7, 9, 10, 11, 12, 17, 19, 20, 22, 23, 25 26, 28, 29 and High.
Kearny—Schools Nos. 4 and 6.
North Bergen—Schools Nos. 2, 3, 5 and 7.
Weehawken township—Schools Nos. 1, 2 and 3.
West Hoboken—Schools Nos. 1, 2, 3, 4, 5 and 6.
West New York—Schools Nos. 1, 2, 3 and 4.

HUNTERDON COUNTY.

Bethlehem township—School No. 1.
Clinton township—Schools Nos. 2, 3 and 6.
Delaware township—School No. 6.
East Amwell—School No. 2.
Franklin township—School No. 3.
High Bridge—School No. 1.
Lambertville City—School No. 1.
Raritan township—Schools Nos. 1 and 1½.
Readington township—Schools Nos. 2 and 9.
Tewksbury township—School No. 1.
Union township—School No. 1.

MERCER COUNTY.

Ewing township—Schools Nos. 3 and 4.
Hamilton township—Schools Nos. 2, 5, 7, 9, 10 and 11.
Hopewell township—Schools Nos. 1, 8 and 10.
Lawrence township—Schools Nos. 1, 2, 3 and 5.
Princeton borough—Schools Nos. 1 and 2.
Princeton township—School No. 1.
Trenton—Schools Nos. 3, 4, 5½, 7, 8, 11, 12, 13, 14, 15, 16, 17, 18, 19, 21, 23, 24, 27, 28, 29 and High.

MIDDLESEX COUNTY.

Dunellen borough—Schools Nos. 1 and 2.
East Brunswick—School No. 4.
Helmetta borough—School No. 1.
Jamesburg borough—School No. 1.

You Are Viewing an Archived Copy from the New Jersey State Library

Milltown borough—Schools Nos. 1 and 2.
Monroe township—School No. 3.
New Brunswick—Schools Nos. 1, 2, 3, 4, 5 and 6.
Perth Amboy—Schools Nos. 1, 4 and High.
Piscataway township—Schools Nos. 1, 3, 4, 5, 7 and 8.
Raritan township—School No. 11.
Roosevelt borough—School No. 2.
South Brunswick—Schools Nos. 1 and 12.
Woodbridge township—School No. 1.

MONMOUTH COUNTY.

Asbury Park—Schools Nos. 1, 2, 3, 4 and 5.
Farmingdale—School No. 1.
Freehold—School No. 1.
Highlands—School No. 1.
Howell township—School No. 3.
Long Branch—Schools Nos. 1, 2, 3, 4, 6, 7, 8, Grammar and High.
Manasquan borough—School No. 1.
Marlboro township—School No. 2.
Middletown—Schools Nos. 5, 9 and 11.
Ocean township—School No. 1.
Raritan township—School No. 2.
Red Bank—Schools Nos. 1, 2, 3 and 4.
Shrewsbury township—Schools Nos. 2 and 3.
Spring Lake borough—School No. 1.
Upper Freehold—Schools Nos. 3 and 5.
Wall township—Schools Nos. 2 and 8.

MORRIS COUNTY.

Butler—School No. 1.
Chatham borough—School No. 1.
Chester township—Schools Nos. 1 and 4.
Dover—Schools Nos. 1, 2, 3 and 4.
Jefferson township—School No. 9.
Mendham township—Schools Nos. 1 and 2.
Mt. Olive township—Schools Nos. 3 and 7.
Passaic township—School No. 4.
Pequannock township—Schools Nos. 2 and 6.
Rockaway borough—School No. 1.
Rockaway township—Schools Nos. 4, 5, 6 and 12.
Washington township—School No. 1.

OCEAN COUNTY.

Beach Haven borough—School No. 1.
Dover township—Schools Nos. 1, 2, 3, 4, 5, 6, 7 and 8.
Island Heights borough—School No. 1.

You Are Viewing an Archived Copy from the New Jersey State Library

Lakewood—Schools Nos. 1, 2, 3, 4, 5, 6 and 7.
Manchester township—School No. 1.
Point Pleasant—School No. 1.
Tuckerton borough—School No. 1.
Union township—School No. 1.

PASSAIC COUNTY.

Acquackanonk township—Schools Nos. 1, 2, 4, 5, 6, 7 and 9.
Hawthorne—Schools Nos. 1, 2, and 3.
North Haledon borough—School No. 1.
Passaic City—Schools Nos. 3 and 9.
Paterson City—Schools Nos. 5, 6, 10, 12, 13, 17, 19, 20 and 21.
Pompton Lakes borough—School No. 1.
Pompton township—School No. 2.
Wayne township—Schools Nos. 2 and 6.
West Milford township—School No. 5.

SALEM COUNTY.

Elmer—Schools Nos. 1 and 2.
Lower Penn's Neck—School No. 2.
Salem City—Acton Schools High and No. 5.
Upper Pittsgrove—School No. 7.

County Superintendents.

ATLANTIC COUNTY.

Calvin Wright, from May 21, 1867, to May 21, 1873.
George B. Wright, from May 21, 1873, to June 28, 1877.
Silas R. Morse, from June 28, 1877, to September 1, 1892.
John R. Wilson, from September 1, 1892, to December 3, 1895.
Samuel D. Hoffman, from December 3, 1895, to.....

BERGEN COUNTY.

Alexander Cass, from July 30, 1867, to July 30, 1873.
E. B. Vreeland, from July 30, 1873, to September 21, 1875.
John A. Demarest, from September 21, 1875, to February 4, 1886.
John Terhune, from February 4, 1886, to May 8, 1905.
George J. Vogel, from May 9, 1905, to June 5, 1905.
B. C. Wooster, from June 5, 1905, to.....

BURLINGTON COUNTY.

James E. Giffen, from May 1, 1867, to May 1, 1869.
William Hutchinson, from May 1, 1869, to January 21, 1871.
Henry S. Haines, from February 7, 1871, to May 1, 1873.
Walter A. Barrows, from May 1, 1873, to September 1, 1875.
Edgar Haas, from September 1, 1875, to September 29, 1896.
Herman A. Stees, from September 29, 1896, to.....

CAMDEN COUNTY.

Alexander Gilmore, from July 30, 1867, to July 30, 1870.
Frederick R. Brace, from July 30, 1870, to September 1, 1890.
Charles S. Albertson, from September 1, 1890, to.....

Reports of County Superintendents.

ATLANTIC COUNTY.

S. D. HOFFMAN, SUPERINTENDENT.

To Hon. C. J. Baxter, Trenton, N. J.:

DEAR SIR—I have the pleasure of submitting the following report of the schools of Atlantic County for the year ending June 30, 1907:

Arbor Day was fittingly observed in accordance with the proclamation of Governor Stokes. In some of the schools a portion of the day was devoted to cleaning the grounds and the planting of shrubbery and flowers. Attention was also given to the study of birds, particularly our native birds, including their names, habits, plumage, etc.

Several new school libraries have been established and those already established in many of the schools have been extended by the addition of new volumes; to this end money has been raised by entertainment and subscriptions and a stronger zeal has been manifested on the part of the officers and teachers to acquire good working libraries.

The building at Main Road, Hammonton District, has been enlarged by the addition of another room and the school graded. At Oak Road in Buena Vista Township, like improvements have been made, a new teacher employed and the school likewise graded.

May's Landing has adopted a three years' partial high school course and held its own commencement, as is done in Hammonton, Pleasantville and Egg Harbor City, where they have their own course of study. There were ten graduates this year, showing that the parents and pupils have appreciated the advantages which the extended facilities afford.

The Boards of Education have exercised care in the hiring of efficient teachers early in the school year and have shown a disposition to employ, as far as possible, those having professional training, so that in many of the rural districts, the teachers, in point

You Are Viewing an Archived Copy from the New Jersey State Library

of ability, are equal to those found in the city schools. I do not mean to imply that local aspirants have been ignored, for many such have found employment in the county, but it has been exacted of them that they exceed the requirements heretofore found sufficient.

The Teachers' Associations have been regularly held as an adjunct to the Teachers' Institute and have proved good working factors and aids to the zealous teachers.

In several of the schools musical instruments have been provided and the rudiments of vocal and instrumental music have been regularly taught, even in some of the rural schools pupils only six years of age sing well the syllables, letters and numerals of the scale, while the work of the older pupils shows noticeable progress in this subject.

The Annual Commencement of the graduates of the County Course was held in Pleasantville on November 2, 1906. The program consisted of essays, orations and orchestral music. The efforts of the graduates were above the usual and reflected good training.

Prof. Green, of the West Chester Normal School, addressed the class on the subject of "Telling Fortunes" and showed how from the earliest time there have been those who boasting of supernatural power have essayed a vision that can peer beyond the horizon that limits the finite and foretell our destiny; that it was not expected that members of the class should rise to that degree, yet each was the architect of his own fortune and it lay in his power to tell his fortune by making it.

Prof. Silas R. Morse in well chosen words awarded the diplomas and it was generally conceded that the whole program was one of the most successful we have ever had.

The Teachers' Institute was held November 7, 8 and 9, in Atlantic City. Gloucester and Salem Counties joined with us as usual and the Institute was one of the most successful we have had. The program provided for general and department sessions; the former being held in the Auditorium of the High School Building, and the latter in the Lecture Room of the St. Paul's M. E. Church. The officers of this church very kindly placed the lecture room of the church at our disposal and as the two buildings are situated very close together, being on opposite sides of the same street, the accommodations thus afforded made it very convenient for the teachers in attendance to pass from one session to the other without loss of

You Are Viewing an Archived Copy from the New Jersey State Library

time. The list of subjects was varied and the instructors proved highly interesting and helpful.

Hon. Silas R. Morse, of the State Board of Education, delivered the address of welcome.

Prof. Austin C. Apgar, of the New Jersey State Normal, very ably discussed the subject of "Nature Study" and a novel and pleasing feature was the preludes to his lectures, in which he gave many suggestions to the teachers and showed and impressed the importance of including the study of nature in the instruction of our schools.

On Tuesday evening, Prof. Louis Bevier, Jr., of New Brunswick, New Jersey, delivered a lecture on "Literature and Life." In a most pleasing manner he showed how the best literature was an expression of the highest and purest impulses of the author and how the association of our lives with it brought out the best in us.

Miss Louise Connolly, principal of Summit, New Jersey, who had not been with us for the past three years, proved very acceptable to the teachers and her several "talks" were listened to very attentively and were much appreciated.

"The Teacher in a Republic" was the subject of a lecture by Prof. Martin G. Brumbaugh, Superintendent of the Schools of Philadelphia, on Thursday evening. With a force of argument that vitalizes a subject and makes it a living thing and the charm of expression that transforms it into a thing of beauty, with illustration and incident, reason and imagery, with humor and profounder thought Prof. Brumbaugh commanded the closest attention of his audience from the beginning to the close of his address and it is unthinkable how any teacher having heard him could fail in a higher and broader conception of the important part the instructor plays in the making or unmaking of a republic.

In conclusion I desire to return thanks to the Boards of Education for their cordial support given me in the advancement of education in the county and also to acknowledge the many words of kindness and encouragement from you and your worthy Deputy, Mr. Betts.

BERGEN COUNTY.

B. C. WOOSTER, SUPERINTENDENT.

Hon. C. J. Baxter, Sate Superintendent:

SIR—I herewith submit my annual report for year ending June 30th, 1907:

Enrollment.—During the year the schools of the county have enrolled 23,323 children; 1,967 in kindergarten, 13,936 in primary, 6,474 in grammar, and 946 in high school. The total increase over last year is 1,750, but there is a decrease of 180 in kindergarten. We hope there is no lessening of interest, or growth in real kindergarten work. We believe some schools have been induced to abandon the practice of listing as kindergarten the busy work or objectless play that is supplementary to some primary work.

There were 528 teachers (81 men and 447 women) employed in the county exclusive of Englewood. This is an increase, during year, of 56 teachers and is indication of the rapid growth of the rural and village schools of the county; 423 of these teachers, 80 per cent., are normal or college graduates. This is a slight increase over the percentage of last year.

Probably more has been done during the past year to furnish adequate school accommodation for the children of the county than ever before.

Bergenfield has erected an 8-room building worth $30,000. Dumont a 10-room building worth $35,000. Hohokus Township, a 4-room building worth $12,000. Fort Lee, 8 rooms, worth $35,000. Hasbrouck Heights, 14 rooms, worth $70,000. Rutherford, 8 rooms, $45,000. Franklin Township, two buildings of four rooms each, worth $14,000. Tenafly, 8 rooms, $60,000. Orvil Boro, 4 rooms, worth $16,000.

Edgewater has built additions at a cost of $20,000, Rutherford has added 4 rooms to No. 3 school, Hillsdale 4 rooms to No. 1, Fort Lee has practically remodeled No. 3, Allendale, Norwood, Midland Park have each added a room.

In several communities the school accommodation continues to be

You Are Viewing an Archived Copy from the New Jersey State Library

inadequate. Annex buildings have been rented and used in Cliffside, Fairview, Garfield, Lodi, Oakland, Palisades Park, Park Ridge and Union Township. Cliffside, Lodi, Park Ridge and Union are erecting fine buildings that will soon accommodate their children properly. Palisades Park and Oakland voted to bond, but have failed to begin work. Fairview and Garfield have as yet made no beginning to meet their needs.

Evening School, etc.—A very successful and much needed evening school was opened in Hackensack.

Medical inspection and compulsory school attendance have received increased attention throughout the county.

High School.—Over 600 pupils graduated from the grammar schools and received county diplomas. The problem is going to be how to supply suitable secondary instruction for all who wish it. Most districts willingly and liberally provide high school facilities either at home or in adjoining districts. Several districts, however, have refused to vote the necessary funds, and in some cases boards of education seem to strive to prevent their children from getting a modern education instead of trying to secure for them the constitutional right to a free and adequate schooling.

Again, the high school sittings available in the county are not sufficient for the near future demand. We have four year approved high schools in Hackensack, Englewood, Ridgewood, Rutherford and Ridgefield Park, and two year courses in Closter, Dumont, Ramsey and East Rutherford. Westwood and Delford have abandoned their high school courses for the present and transport to Hackensack.

Consolidation.—A beginning has been made toward consolidation and centralization of schools. Norwood abandoned its No. 2 school and transported to No. 1. Edgewater, Englewood Cliffs and East Rutherford transport children living remote from school. Other districts pay transportation charges to high school. Various districts paid tuition to other districts for 229 high school and 191 elementary school pupils.

Associations, Institute.—During the year our Principals' Association has held three meetings, and five local teachers' associations have been organized.

The first county institute in this county for several years was held

You Are Viewing an Archived Copy from the New Jersey State Library

in the Hackensack Armory January 11th, 1907. It was fully what we wanted it to be,—an *inspiration* institute. A. B. Van Ormer spoke on *Fundamentals in Moral Nurture,* and gave *A Pedagogical Sermon on a Shakespearian Text.* Miss Lillie Williams gave excellent suggestions on *Helping Pupils to Remember,* and told *Why the Children Disobey Us.* The Rutherford School Orchestra, composed of pupils of the Rutherford schools, furnished the much appreciated music.

BURLINGTON COUNTY.

HERMAN A. STEES, SUPERINTENDENT.

To Hon. Charles J. Baxter, State Superintendent:

DEAR SIR—I herewith submit my annual report of the condition of the public schools of Burlington County for the year ending June 30th, 1907:

Scattered over an area of 860 square miles, in Burlington County, are 129 school houses: 88 of these buildings have but one room each; 15 have two rooms each; and the remaining 26 have from three to sixteen rooms each. On what is known as the "River-end" of the county, and for some distance inland, the schools are easily accessible to pupils and capable of close supervision; but from the center of the county to the "Shore-end," distances lengthen very perceptibly, and pupils and teachers must travel miles to reach the school. In some instances the pupils walk six miles or more each day. For these outlying regions the people see hope of educational advancement in the improvement of the one-room school, as consolidation is impracticable in many instances.

The number of pupils transported has increased from 36 to 285, and the total number of days transported has grown from 3,478 to 31,516. This growth, remarkable in an agricultural county, should be accepted as evidence of progress, but unfortunately the improvement is confined almost entirely to the river-end of the county; while the shore-end, where conditions are and have been so backward for many years, will receive my personal attention during the coming school year.

As you know, special effort has been made for several years to

You Are Viewing an Archived Copy from the New Jersey State Library

convince our boards of education of the benefits to be derived from closing the smaller schools and transporting the children to central graded schools. The idea was new and met with more or less resistance. Reports from superintendents, teachers and school trustees, in states where the system had been in operation for several years and had proven its efficiency and economy, were read and explained at the meetings of the County Board of Education and at the meetings of the local boards. Attention was called to the waste of money in maintaining very small schools in certain districts, and the better opportunities the children would have in graded schools. As in every other advance movement the beginning was slow; but as soon as one district demonstrated by actual test that all that was claimed for transportation was true, several other districts tried the plan; and now the only question asked by boards of education is "Can you give us a practicable plan for consolidation and transportation for our district?" Briefly, this is what has been accomplished, but much more will follow soon: Bordentown Township has closed its one school house (in fact, has sold it) and transports sixty pupils to Bordentown city. Chester Township transports all pupils, above the fourth grade, from its rural schools to Moorestown. It has closed one school, No. 6, Poplar Grove, and transports all the children to Moorestown. The attendance at this school has been very small for the last five years. Now that the school is closed the number demanding and receiving transportation is more than twice the former attendance. A fact not to be lost sight of. Cinnaminson Township has closed two small schools and transports ninety-one pupils to the central school at Westfield. Here again the number is nearly doubled. Mansfield Township has closed one small school and transports twenty-four pupils to Columbus. There had never been more than seven or eight pupils to attend the school. What causes the increase? This board of education is so well pleased with the success of the plan that it is about persuaded to close two more of its schools and transport the children to Columbus. Medford Township transports seventeen pupils from the little settlement at Chairville to Medford.

In my judgment the amendment of section one hundred and twenty-six of the school law, requiring each school district to provide suitable school facilities and accommodations for all children residing in the district, is the most far-reaching and most beneficial legislative enactment of recent years. Those of us who live in the quieter sec-

You Are Viewing an Archived Copy from the New Jersey State Library

tions of the State can see the vivifying effects of such legislation in a degree denied to those who have had a fair measure of the best in educational matters for years. Little opposition has been made to this requirement. Our boards of education have met the demand in a spirit deserving commendation. Liberal allowances are made for teachers in the advanced schools, tuition fees are returned and transportation charges are paid by the State.

The following high schools have been established and are meeting the standard set by the State Board of Education:

Four years:
Burlington City, five teachers, one hundred and eleven pupils.
Mount Holly, four teachers, one hundred and five pupils.
Moorestown, four teachers, one hundred and ten pupils.
Bordentown city, three teachers, ninety-six pupils.
Palmyra, three teachers, fifty pupils.

Three years:
Medford, two teachers, thirty-nine pupils.
Pemberton, two teachers, thirty-six pupils.
Marlton, two teachers, twenty-four pupils.

Every child residing in the county, except some in Woodland Township, has now the opportunity of attending a high school. The table given below shows the names of the districts, the high schools available, and the choice of high schools in some districts:

Districts.	High Schools.	Choice.
Bass River	Atlantic City.	
Beverly City	Burlington.	
Beverly Township	Burlington.	
Bordentown City	Bordentown.	
Bordentown Township	Bordentown.	
Burlington City	Burlington.	
Burlington Township	Burlington.	
Chester	Moorestown.	
Chesterfield	Bordentown.	
Cinnaminson	Palmyra	Moorestown.
Delran	Burlington	Moorestown, Palmyra
Eastampton	Mount Holly.	

You Are Viewing an Archived Copy from the New Jersey State Library

Districts.	High Schools.	Choice.
Evesham	Marlton	Medford.
Fieldsboro Bor	Burlington	Bordentown.
Lumberton	Mount Holly.	
Mansfield	Bordentown	Burlington.
Medford	Medford	Mount Holly.
Mount Laurel	Moorestown.	
New Hanover	Mount Holly	Pemberton.
Northampton	Mount Holly.	
North Hanover	Mount Holly	Pemberton.
Palmyra	Palmyra.	
Pemberton Bor	Pemberton	Mount Holly.
Pemberton Township	Pemberton	Mount Holly.
Riverside	Burlington	Palmyra.
Riverton Bor	Palmyra	Burlington, Moorest'n
Shamong	Medford.	
Southampton	Mount Holly.	
Springfield	Pemberton	Burlington, Mt. Holly
Tabernacle	Medford.	
Washington	Egg Harbor City.	
Westampton	Mount Holly	Burlington.
Willingboro	Mount Holly	Burlington.
Woodlawn	Pemberton is not too remote for children living in the northern part of this township.	

Medical inspection of pupils and buildings has its beginning in Burlington city, Mount Holly and Moorestown, and excellent results are apparent. It is to be hoped that all the other districts of the county will speedily recognize the importance of this movement and act accordingly. Teachers may be able to detect some of the more obvious complaints to which children are subject, but there is great need of expert, official, regular examination of pupils and their surroundings. The teacher may call the attention of parents to symptoms of disease, but, in many cases, the parents resent the intended kindness, and, in the usual abrupt manner of the overlord to the hireling, suggest a more useful and profitable channel for the exercise of her activities. The physician would not be subjected to this particularly aggravating kind of criticism. The medical inspector would also be able to show the teacher the best methods of ven-

You Are Viewing an Archived Copy from the New Jersey State Library

tilating, heating and lighting the school room; to see that the water used by the pupils is not polluted, that the drinking utensils are frequently sterilized; to correct many of the evils resulting from neglected, unsanitary outbuildings; and to have a watchful care over some other matters not properly understood by persons outside of the medical profession.

No new school buildings have been completed during the year. Delran Township will have a new four-room school house ready for use early in December. Total cost nearly $7,000. The little school house at Chesterville will be closed and sold, and all the children will be transported to this new building. All the pupils in the Fairview school, above the fourth grade, and all the children from Cambridge will be transported here also. Florence Township is building an eight-room school house, at a cost of about $20,000, which will be completed in January of next year. North Hanover Township is building a large one-room school house, so planned that with little expense it can be changed to a two-room building, if the need arises. Medford Township has added four class rooms, a principal's room and cloak rooms to the building at Medford, and established a three-year high school course. This expansion means also that the three small schools of the township will be closed and the pupils transported to this central school. Mansfield Township has greatly improved the building at Columbus, making four rooms instead of two. Four teachers are now employed to do the work formerly demanded of two teachers. Two more small schools in this district will now be closed and the pupils transported to Columbus. Pemberton Borough has made changes in its school building so as to give room for a three-year high school department. Evesham Township has rearranged its building at Marlton and established a three-year high school course. Northampton Township has purchased a lot, suitably located, and will erect a two- room school house for the accommodation of the colored children of the district. In some other districts extensive repairs have been made and new furniture procured.

CAMDEN COUNTY.

C. S. ALBERTSON, SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent:

DEAR SIR—Herewith is submitted my statistical report for the year ending June 30, 1907:

The report is encouraging, in as much as it indicates advancement and improvement in the county along all the lines of educational work. In addition to the facts embodied in the report, I am pleased to inform you that there is an excellent feeling toward the schools. Very little adverse criticism is heard. On every hand I hear expressions of satisfaction and commendation. This feeling of confidence adds much to the strength and power of our schools. As soon as a school is publicly discredited—justly or unjustly—much, if not all of its usefulness is gone.

I have always advised those who would criticise our schools, to do so, not publicly, but to make their suggestions or complaints to the proper authorities, and I have assured them that due consideration will be given to all. I believe that this policy has done much to bring about a better understanding between the schools and the general public.

I feel that I can report that there is, on the part of the teachers, a keen interest in their work and a conscientious desire to give their best to their profession.

It has been my custom, as far as possible, to place myself on confidential terms with the pupils, and I have observed, with much interest, their attitude toward their schools; I believe there never was a better feeling than there is at present. I frequently hear expressions of interest and affectionate pride in the schools. Such expressions, a few years ago, were rare. We may have perfectly equipped and appointed buildings, and teachers with the highest academic and professional attainments, but unless we secure the confidence and affection of the child the work of the school will fail to measure up to its full requirements.

Five new buildings have been erected during the year—two four-room, two two-room and one one-room building. All of these are up

You Are Viewing an Archived Copy from the New Jersey State Library

to date in plan, construction and equipment. Two of these replace old buildings. The others are at new locations. Appropriations have been voted for new buildings at Merchantville, Haddon Heights, Roseville and Winslow. Several buildings have been repainted and otherwise improved.

As has been our custom for several years, we held our County Pupils' Examinations at "Centres." About fifty grammar school certificates were granted. Nearly all the pupils receiving them will attend high schools, either in their own districts, or in others, as provided for by the several boards of education.

It gave me much pleasure to attend a number of commencements and "closing exercises." These events have become quite important occasions in several districts and attract large crowds of interested citizens.

Six districts now have Supervising Principals, and two more have elected them, making eight with which we begin the new school year. District supervision certainly is a success when done with skill, intelligence and tact. All our districts employing supervisors have materially increased their salaries and otherwise shown appreciation of good supervisory work.

We have a Camden County Association of Superintendents and Supervising Principals. This organization holds regular monthly meetings, at which perplexing questions relating to school supervision are discussed. The formal opening of the question is assigned to a member, and this is followed by an informal discussion. We feel that the members, and consequently the schools, get much that is valuable from this association. A very pleasing feature of the meetings is our dining together after the meetings. We meet around at places in the different districts. After several of our meetings, we have, on invitation, dined at the home of the resident member. Through these social meetings we have become better acquainted with each other and a much better understanding exists than did before.

All the partial high school grades have been discontinued, and tuition in approved or registered high schools is being paid by the districts for all pupils qualified and desiring to attend them.

A very interesting meeting of the County School Board Association was held at the high school building, Camden. Able addresses were made by Mr. E. E. Read, President of the Camden City Board of Education, and by Mr. T. E. Sensor, of your office. A very inter-

You Are Viewing an Archived Copy from the New Jersey State Library

esting discussion followed and all present were pleased with the meeting. I much regret that so few of the members of boards can be induced to attend these important meetings.

Our County Teachers' Association meetings have been regularly held. This association is one of the oldest county teachers' associations in the State. Every teacher in the county is a member and very few fail to attend the meetings. At each of our meetings we have had a "lecture" and discussions.

The teachers of the county have contributed fifty dollars and the State has duplicated this amount for our Teachers' Library. This will enable us to substantially increase the number of books in our library. Many of our teachers have during the year taken courses of study at the University of Pennsylvania and at other institutions in Philadelphia.

The past year, taken altogether, has been a good one for the schools, and the provisions made for next year insure another. The appropriations are very liberal and the teachers engaged are of the best.

CAPE MAY COUNTY.

OSCAR O. BARR, SUPERINTENDENT.

Hon. Charles J. Baxter, State Superintendent:

DEAR SIR—I herewith respectfully submit my annual report of the condition of the public schools of Cape May County for the year ending June 30th, 1907:

A comparison of the statistical summaries of past years shows that Cape May County's interest in educational affairs has been steadily growing.

Ocean City completed during the year its new building costing $43,000. The structure is of brick and contains a large assembly room, twelve class rooms and a well equipped laboratory. Considerable activity is being displayed along building lines. There is under course of construction at North Wildwood a four room brick building. Holly Beach is building a four room addition to its main building and West Cape May has recently completed a two-room addition to number one school building. Last spring the voters of Upper

You Are Viewing an Archived Copy from the New Jersey State Library

Township decided to issue bonds for the erection of a brick building at Tuckahoe for high school purposes, but the proceedings of the issue have as yet not been approved.

As in former years a County School Day and the commencement exercises were held on the South Seaville Camp Grounds on June 14th. One hundred and seven pupils received grammar grade certificates—the largest class in the history of the county schools. Prof. F. H. Green, of West Chester, delivered the principal address.

For the first time in several years a meeting of the members of the county boards of education was held at Cape May Court House. A permanent organization was effected. Benjamin T. Abbott, M. D., of Ocean City, was elected president and E. H. Phillips, M. D., of Cape May, was elected secretary and treasurer. Dr. Bevier's address on the High School question brought forth much discussion from the members of the various boards.

Ocean City and Wildwood High Schools have been placed on the "Approved" list, the former having a four years' course of study and the latter a three years' course. Arrangements have been completed for three years high schools at Holly Beach, Cape May Court House and Tuckahoe. Woodbine will begin this September with a two year high school. Every district in the county with the exception of one, West Cape May, has given to its pupils of advanced standing the opportunity of an education in an "Approved" high school, whether such school is within or without the limits of the district in which the pupils reside.

Three meetings of the County Teachers' Association were held—the first at Cape May Court House in December; the second at South Seaville the first Saturday in February and the third at Wildwood the last Saturday in April.

It is gratifying to state that hereafter no High School branches will be taught in the ungraded and the two-room schools. The adequate provisions which the several districts have made for high school work in separate departments and in transporting pupils to high schools in other districts, now give to the rural schools more time to devote to the work for which they were originally intended—the teaching of the elementary subjects. At the suggestion of your department it is our aim to educate the boys and girls of the farm for the farm. "Back to nature and the farm" should be the motto of every rural school.

You Are Viewing an Archived Copy from the New Jersey State Library

CUMBERLAND COUNTY.

JOHN N. GLASPELL, SUPERINTENDENT.

To Hon. Charles J. Baxter, State Superintendent.

DEAR SIR—In compliance with the requirements of the law I submit my report of the schools of Cumberland County for the year ending June 30th, 1907.

The printed circular, prepared by you and addressed to school officers and taxpayers concerning the legal status of public education in our State, was distributed. The important features of the circular were carefully considered by the boards of education and those who were otherwise interested in school work, especially those who have children who wished to take advantage of High School privileges; the result of these discussions was most gratifying.

RURAL SCHOOLS.

The rural school pays an uninviting salary. It is compelled, therefore, to accept many inexperienced teachers, yet, careful thought on the subject points clearly to the fact that it is in the rural schools that our best teachers should be placed. In the country, the teacher is the one who is recognized as the leader to pioneer advancement and progress in the community, educational or otherwise. The children of the rural schools get their inspiration from their teacher; yet, in many cases, the untrained are engaged with consequent loss to the pupils and the community. When boards of education do their whole duty, the responsibility for the progress of the pupils rests, almost entirely, upon the teachers; and, in justice to the trained teachers it must be said that as a class they are unfaltering in their devotion to duty, and are willing to put forth their best efforts to raise the standard of scholarship and culture in the localities where they are employed.

THE SOUTH JERSEY SCHOOLMASTER'S ASSOCIATION.

Held its two meetings in our county and I am pleased to note the interest manifested in these meetings on the part of our Principals and

You Are Viewing an Archived Copy from the New Jersey State Library

Vice Principals. In my own county I notice the salutary effect, on the direction of school affairs, upon those who attend these gatherings.

SCHOOL BUILDINGS.

At the annual school meeting held in March money was voted for the remodeling of several school buildings in the county, for the purpose of making ample accommodations for pupils and of better grading, leading to the High Schools.

HIGH SCHOOLS.

During the year four partial High Schools were established, each to cover a three year course; three of these schools were placed on the Approved List by State Inspector Dr. Louis Bevier, who visited them in the Spring; the fourth fell short only through lack of teaching force. I am pleased to state that these schools are doing very efficient work, considering the short time they have been established and the adverse conditions which the teachers and boards of education were compelled to meet.

COUNTY TEACHERS' ASSOCIATION.

Our County Teachers' Association held its usual sessions, one at Millville on December 8th and the other at Bridgeton on April 13th. Both were well attended, there being at each of the meetings about two hundred teachers present out of a possible two hundred and fifty. At these meetings valuable and instructive addresses were made by Miss Margaret McCaskey, of Newark; Prof. C. C. Ellis, Pennsylvania Normal Schools; Prof. Levi Seeley, of Trenton Normal Schools, and Prof. Chas. B. Boyer, of Atlantic City.

Our teachers' examinations were regularly held and certificates obtained by the deserving. Our school libraries have been increased in number and to those already established large additions have been made, while our Pedagogical Library is regularly and systematically circulated among the teachers of the county. Transportation is being provided wherever needed, and, in general, the work of the year has been one of encouragement and progress.

In closing I desire to express my sincere thanks to you and your assistants for the courtesies shown me and for the valuable and efficient advice so cheerfully given.

You Are Viewing an Archived Copy from the New Jersey State Library

ESSEX COUNTY.

A. B. MEREDITH, SUPERINTENDENT.

To the Hon. Chas. J. Baxter, State Superintendent, Trenton, N. J.:

DEAR SIR—I have the honor to submit herewith my annual report for the year ending June 30th, 1907:

From a study of my statistical tables it will be gleaned that a notable advance as measured by totals has been made.

Increase in Kindergarten enrollment	710
Increase in Primary enrollment	2,986
Increase in Grammar enrollment	797
Increase in High School enrollment	155
Total	4,784

To meet the necessary cost of education due to this increase in enrollment there has been spent over last year, exclusive of buildings and interest, $169,476.20.

Increase in District Tax	$138,705 72
Increase in Manual Training	10,553 13
Increase in Average salary to women	29 41
Increase in Total number of teachers	173
Increase in Total number of men	18

For six years past school accommodations in Caldwell Township have been deplorable. The legal voters have been fully aroused to the necessity of better school accommodations, but through factional strife the needed improvements were continually delayed. In January, 1906, two dilapidated school buildings were condemned and the State money was withheld; but it was not until a year later that the money for the new Central school house was voted. Immediately the work of erection began and by the opening of school in September a modern school building will be added to the assets of the community. This school, located in a rich, agricultural and dairying

You Are Viewing an Archived Copy from the New Jersey State Library

section, provides an opportunity for an ideal rural school, and efforts will be made to make it an example of this important class.

At Glen Ridge much has been done toward further school room decorations through the generosity of interested citizens. The school was presented with full size casts of the Venus de Melos and Appollo Belvidere, which now stand in the school corridors. Along the walls a cast of the Western Frieze of the Parthenon, 50 feet in length, has been placed. The walls of the building have all been retinted in harmonizing colors, and the beauty of this already imposing building is greatly enhanced.

Other schools, notably those of Nutley, Verona and West Orange, have added largely to their collection of casts and pictures. In the Short Hill school, at Millburn, an art room has been fitted up on the third floor and fully supplied with the necessary equipment. This room, together with a newly-equipped manual training room in the Millburn school, gives to the schools of this district excellent opportunities for effective work in drawing and manual training.

In January, 1907, the $53,000 addition to the Park School at Nutley was open to the public with appropriate exercises. Addresses were made by the State Superintendent, the Hon. C. J. Baxter, and by Dr. Louis Bevier, Jr., the State High School Inspector. The occasion brought out a large number of citizens and also members of the neighboring boards of education. The erection of this addition has increased the capacity of the building by 25 rooms, exclusive of its assembly, and has made possible the closing of a two-room school on Church street.

In a number of districts noticeable attention has been given to the condition of the school yards, with the result that walks have been constructed, flower beds laid out, and lawns cared for.

COUNTY EXAMINATIONS.

At the June examination over 215 certificates were issued to eighth grade pupils from different schools; this number being considerably in excess of last year. Most districts are now requiring this certificate for admission to the high school department, thus establishing a practically uniform standard throughout the county. As an experiment in the districts where there have been scattered schools, or where the pupils of two or three schools could easily be brought together, I have established examination centers. Pupils now come from North Caldwell and Caldwell Township to the High School

You Are Viewing an Archived Copy from the New Jersey State Library

at Caldwell Borough, and pupils of the three out-lying buildings in the township of Livingston come to the Livingston High School for examinations. This arrangement insures more uniform conditions for taking the examinations, and there seems to be a general approval of the plan.

LECTURES FOR TEACHERS.

For three years past there have been no County Institutes in this county. Among the great majority of teachers the loss of the Institute is not greatly felt, as the opportunities for professional study and for hearing lectures on educational topics are many, because of our proximity to New York and Newark. In a number of districts there are local teachers' associations which provide a course of lectures relating to school work. A departure of importance in this connection has been made in South Orange and Nutley whereby lectures are furnished for the teachers by the boards of education. These lectures are given at the time of the monthly teachers' meeting and teachers of neighboring towns are invited. Among the speakers of last year were Henry Turner Bailey, of Boston, who spoke on "Art and Crafts in Public Schools;" Prof. Austin C. Apgar, of Trenton, on the "Study of Twigs in Winter." Dr. F. B. Palmer, of Fredonia, New York, on "The Teachers' Problem." Mr. John Cotton Dana, of Newark, on "Some Uses of Pictures." The instruction and help coming from these lectures is very great indeed and they have served to take the teacher out of the round of petty details and annoyances which are incident to class room work. An effort will be made next year to get other boards of education to take up this important work.

OFFICE.

Through the generosity of the County Board of Freeholders I have been given a double office in the Newark County Court House, which was opened in September, 1906. Every convenience in the way of filing cabinet, desks, book cases, etc., have been installed, so that the permanent keeping of school records is provided for, and also a central place is afforded for meetings with school officials and teachers. During the past year the County Teachers' Examinations have been held at the Court House.

In May, 1907, the board of education at Irvington appointed Mr. Frank H. Morrell, City Superintendent, thus taking the schools of

You Are Viewing an Archived Copy from the New Jersey State Library

this town from the immediate supervision of this office. For a number of years past Irvington has been a city school district and the action taken was one which could well have come earlier. The board has yet to appoint a City Board of Examiners. With the addition of Irvington there are now six city school districts in this county.

In June the township of Verona was divided, creating the Borough of Verona and leaving what was known as Cedar Grove as the township. While the two school districts have been created school accommodations have not been materially affected. The board of the township transports its high school pupils to the high school department of the borough.

At the annual district meeting in the town of Nutley the citizens voted $1,000 for manual training. This money, together with that received from the State, will insure ample equipment for this important phase of school work. Although work in manual training has been done for four years it was not until this year that money could be obtained for the equipment of a wood working room. More than fifty per cent. of the schools of this county have established courses in manual training.

ESSEX COUNTY SCHOOL MASTERS' ASSOCIATION.

The association has had two very successful meetings during the year. The subject discussed at the first meeting was "Nature Study and Elementary Agriculture in the Schools." Among the speakers were the State Superintendent, Mr. Randall Spaulding, of Montclair; Mr. Coe, of East Orange; Mr. Dutcher, of East Orange, and the County Superintendent. At the annual meeting and banquet the "Economic Aspect of Teachers' Salaries" was the subject considered. During the coming year the association plans to continue its work in connection with the establishment of Parental Schools in New Jersey, in order that day schools may be relieved of a class of pupils who need treatment entirely unlike that which we are now forced to give them.

In general, I am led to think that educational matters in this county are progressing steadily, if not spectacularly, and that boards of education and school officers are meeting the daily problems with intelligence and progressive spirit, realizing that the work of public education has become more extensive, expensive and complex with each coming year.

I desire to express my personal appreciation to the assistance

You Are Viewing an Archived Copy from the New Jersey State Library

which has been given me by the department as questions have arisen from time to time.

GLOUCESTER COUNTY.

D. T. Steelman, Superintendent.

To Hon. Charles J. Baxter, State Superintendent:

Dear Sir—I herewith respectfully submit my first annual report of the condition of the public schools of Gloucester County for the year ending June 30th, 1907:

I received my appointment to the office of County Superintendent on August 14th, 1907, after the close of the school year, therefore my report will necessarily be brief and not as comprehensive as I would be pleased to have made it had I been in office during the school year, for which I report.

SCHOOL BUILDINGS.

Monroe Township has erected at Williamstown a fine brick building with all the modern conveniences at a cost of $12,000. This building will be ready for occupancy about the 15th of September.

At a special meeting held June 17th, 1907, the Borough of Swedesboro voted the sum of $38,000 for the erection of a new school building. The new building will occupy the old site which has been enlarged by the purchase of an adjoining lot.

The sum of $11,351 has been expended in the county during the year for the building and repairing of school houses. There are some districts in which the buildings are old and very unsatisfactory for school purposes.

In two of these districts I find the sentiment in favor of new buildings is growing and I feel that definite action will soon be taken by the boards of education toward the erection of modern buildings.

HIGH SCHOOLS.

We have in this county but one approved high school (Woodbury) which is located in the northern part of the county and not convenient of access for pupils residing in the southern part. At a special meet-

You Are Viewing an Archived Copy from the New Jersey State Library

ing held in May $5,100 was appropriated by the township of Glassboro, a part of this sum was for the establishment of a high school with a four year course of study. The board of education has newly furnished three rooms to be used for high school purposes and employed three teachers to do high school work exclusively.

The new course of study approved by Dr. Bevier, and embracing a college preparatory, general and commercial course, goes into effect at the reopening of the schools, Sepember 3d. Forty-eight pupils have already made application for entrance, twenty of which come from Pitman Grove, Monroe, Elk, Washington and Harrison Townships.

Glassboro being well located on the line of two railroads is an ideal place in which to build up a strong high school centre. I hope that in the very near future this school will meet the requirements of the State Inspector of High Schools and be placed on the approved list. Paulsboro maintains a three years' course, while Swedesboro and Williamstown maintain two years.

TEACHERS' ASSOCIATIONS.

Three largely attended meetings of the County Teachers' Association were held during the year. These meetings were very interesting, instructive and helpful to the teachers of the county.

The association was addressed on these occasions by Dr. Phillips, of the West Chester Normal School; H. C. Krebs, Superintendent of Somerset County; W. H. Mearns, of the Philadelphia Schools, and H. A. Stees, Superintendent of the Burlington County Schools.

The County School Board Association united with the teachers at the spring meeting and a most profitable meeting was held.

MEDICAL INSPECTION.

Two districts of the county employ Medical Inspectors, who visit the schools once a week and oftener, if their services are required. Definite tests have been made of the eye and ear and recorded in tabular form in a book which forms a valuable record of the schools.

Regular printed forms were filled in by the principal from the record made by the inspector and sent to the parents of defective children setting forth the nature of their defects and urging the parent to have the child treated by the physician of their choice. The work of the Medical Inspector has been very gratifying to school officials, teachers and parents.

You Are Viewing an Archived Copy from the New Jersey State Library

HUDSON COUNTY.

M. H. KINSLEY, SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent, Trenton, N. J.:

DEAR SIR—In compliance with the requirements of the law I submit the annual report of the condition of schools in Hudson County:

TEACHERS.

In several of my reports the statement has been made that the teachers employed in this county were better than in previous years. The following table gives definite information concerning the progress noted:

Year.	Eight Districts.	Normal Graduates.	College.
1896-7	105 teachers	25	5
1901-2	175 teachers	63	10
1906-7	286 teachers	158	19

A study of the table shows that while the number of teachers increased 66 per cent. in the first five years of the decade, the number of Normal School graduates increased 152 per cent.; and that during the second half of the decade the number of teachers increased 63 per cent. over the first half, the number of Normal graduates increased 151 per cent. The increase during the decade shows that while the number of teachers went from 105 to 286, the number of teachers having Normal School training went from 25 to 158, or while the number of teachers gained 172 per cent., the number of trained teachers gained 632 per cent. The percentage of trained teachers in three of the districts is, perhaps, worthy of note: North Bergen, 84 per cent.; Weehawken, 74 per cent.; Kearny, 73 per cent.

SALARIES.

In the matter of teachers' salaries I have to report that Harrison and Secaucus have adopted salary schedules as shown herewith:

You Are Viewing an Archived Copy from the New Jersey State Library

Minute of the Board of Education, Harrison, June 25, 1907:

"Resolved, That the following rules and regulations govern the appointment of teachers and the adjustment of their salaries:

Rule I. Teachers holding first grade county or State certificates shall be designated as class "A" teachers. Teachers holding second grade county certificates, class "B" teachers. Teachers holding third grade county certificates, class "C" teachers.

Rule II. The maximum salary of vice-principals to be eleven hundred dollars per annum.

The maximum salary of class "A" teachers to be $800.00.

The maximum salary of class "B" teachers to be $650.00.

The maximum salary of class "C" teachers to be $600.00.

Rule III. The minimum salary of all teachers to be five hundred dollars per annum, teachers to receive an increase of fifty dollars annually until they reach the maximum in their respective classes.

Rule IV. The minimum salary of High School teachers to be seven hundred and fifty dollars, the maximum one thousand dollars per annum. That section of Rude II in reference to class "A," "B," "C" teachers shall go into effect July 1, 1908.

On motion of Mr. O'Neill, seconded by Mr. Reilly, the resolution was adopted as read.

BOARD OF EDUCATION OF THE BORO OF SECAUCUS, N. J.

Resolved, That after July 1, 1907, teachers employed in this Boro shall receive compensation in accordance with the following schedule; provided that credit shall be given for not more than five years' experience in places other than Secaucus:

Third Grade County.

1 year's experience or less	$400
2 years' experience	420
3 years' experience	440
4 years' experience	460

Second Grade County.

1 year's experience	$420
2 years' experience	445
3 years' experience	470
4 years' experience	495
5 years' experience	520
6 years' experience	545

You Are Viewing an Archived Copy from the New Jersey State Library

First Grade County.

2 years' experience	$450
3 years' experience	475
4 years' experience	500
5 years' experience	525
6 years' experience	550
7 years' experience	575
8 years' experience	600

Normal or State Certificate.

1 year's experience or less	$500
2 years' experience	530
3 years' experience	560
4 years' experience	590
5 years' experience	620
6 years' experience	650
7 years' experience	680

John Possehl, Jr., President.

August Begerow, Secretary.

Adopted June, 1907.

As compared with salaries paid five years ago there has been some advance, though not in keeping with the advanced cost of living and the increase in the efficiency in service:

	1901-2	1906-7	Per cent. gain
Average salary to women	$516 80	$593 10	12.8 per cent.
Average salary to men	1,172 00	1,308 00	11.6 per cent.

SUPERVISING PRINCIPALS.

At the June meeting of the Board of Education in the Borough of Secaucus Mr. R. Lee Saunders was appointed Supervising Principal. Weehawken is now the only district in this county not under close local supervision. I am of the opinion that a strong sentiment prevails for the appointment of a Supervising Principal in this township.

BUILDINGS.

North Bergen occupied its eight room annex to school No. 7 last September, thus enabling the Board to reduce number of pupils in

You Are Viewing an Archived Copy from the New Jersey State Library

the classes in the Adelina Place section of the township and give all of its pupils proper accommodations.

West New York occupied school No. 3 in September, with sixteen classes, the assembly room being temporarily used for four classes. Upon the opening of school No. 4 in September of this year the crowded condition of these schools will be entirely relieved. This town is preparing for the erection of school No. 5 in the south-eastern part of the district at a cost of $105,000.

Kearny has nearly completed school No. 8 in the southern part of the town and will occupy a majority of the twelve rooms at the opening of school in September.

Guttenberg will probably have a much needed addition to its school next year, as the people have voted $53,900 therefor and the bonds have been sold.

GRADUATES FROM THE GRAMMAR SCHOOLS.

The number of pupils graduated from the Grammar Schools of the districts under my supervision follows:

	Males.	Females.	Total.
East Newark	4	6	10
Guttenberg	6	6	12
Harrison	8	14	22
Kearny	38	42	80
North Bergen	28	19	47
Secaucus	3	0	3
Weehawken	34	25	59
West New York	21	17	38
Totals	142	129	271

Several pupils who failed in one or two of the subjects at the June examination will be given an opportunity to work off conditions at the opening of school in September, so that those successfully completing the examinations may receive certificates and enter the High School.

West Hoboken and the town of Union used the questions sent from this office as a standard of graduation from the Grammar Schools.

You Are Viewing an Archived Copy from the New Jersey State Library

VISITATION.

Visits were made to all Boards of Education according to law. Some of the Boards were visited four or five times. The number of class-room visits, including night schools, was 623.

In conclusion I wish to thank the State Department for the never failing advice and encouragement given to me in the past six years.

HUNTERDON COUNTY.

J. S. HOFFMAN, SUPERINTENDENT.

To Hon. Charles J. Baxter, State Superintendent:

DEAR SIR—In taking a general survey of the school work of this county during the past year and preparing for you this brief report, I am confronted with the fact that safe and certain progress from year to year, in our school system, is made along the same general lines for a series of years, and that this particular year, while not showing any distinct markings that separate it from its immediate predecessors, has kept pace with the general upward tendency, and equipped the boys and girls with a fair preparation for life's work. A very encouraging interest is manifested, particularly in the rural sections, in the improved opportunities for High School training, and the coming year will show a very large increase in High School enrollment, due almost entirely to the open door of opportunity. This will demand not only a *higher,* but a *better* education, and will assist in the solution of that troublesome problem,—a better articulation of subject matter to bridge the gap between the Grammar grades and the High School.

No new buildings erected this year, but additions, repairs and general improvements have been made in numerous instances. Lebanon Township, after considerable agitation, has materially improved its buildings, abandoned one and furnished transportation for the pupils.

Raritan Township has its twelve buildings in excellent condition.

Holland Township has placed a steam heating plant in the Milford building.

Clinton Borough has remodeled, added to, and placed a steam heating plant in its building.

Readington and Union Townships have each employed a Super-

You Are Viewing an Archived Copy from the New Jersey State Library

vising Principal. Lambertville has placed an additional teacher in the High School and has arranged for a full four years' High School course. The Board has also rented two rooms in a convenient part of the city to relieve the congestion in the grades.

Additional teachers have been provided for at High Bridge and Flemington. School boards generally are meeting the problems of school administration with a progressive spirit.

Somerset County joined with us in Institute held at Flemington. The Institute was a positive value to our county.

The regular May meeting of teachers was not so largely attended as formerly, but the exercises were interesting and profitable. Two school board meetings were held during the year. Both were well attended.

Teachers' and pupils' examinations have been conducted as in former years and the general detail work of the office has been given careful attention. The statistics of school attendance, libraries and finances, accompanying this report, verify the statement that school officers and teachers have rendered a year's faithful service. With acknowledgment of the courtesies of your department, and a cheerful co-operation "on call," I beg to submit this brief report.

MERCER COUNTY.

J. M. ARNOLD, SUPERINTENDENT.

To Hon. Chas. J. Baxter, State Superintendent:

DEAR SIR—I herewith submit my annual report of the schools of Mercer County for the year ending June 30, 1907:

The work of the year has wrought out many results which are encouraging and full of promise for the future.

The new building at Farmingdale, in Hamilton Township, was formally opened September 7th. This is a well equipped brick building of four rooms, of which three were in use during the year. The fourth room will be needed the coming year and from present indications it will be necessary, in the near future, to increase the capacity of this building.

A substantial four-room brick building was erected at Dentzville, in the same township, at a cost of about $10,000. The dedicatory

You Are Viewing an Archived Copy from the New Jersey State Library

exercises held October 29th were well attended by patrons and citizens. This school is located in a rapidly growing part of Hamilton Township and the attendance in the two rooms occupied during the year evidenced the wisdom of the Board in making provision for the future.

At Hightstown, owing to the crowded condition of the rooms, a building adjoining the school grounds was secured and two rooms fitted up and nicely furnished for use by the two lower primary grades.

A two-room addition was added to the building at Pennington and one room equipped and occupied.

A one-room brick building was erected at Hart's Corner, in Hopewell Township and a new school opened January 2d. The erection of a school building at this place has so greatly depleted the attendance at the Bear school that this building will be abandoned and the few remaining pupils transported. By the division of rooms, two additional class rooms were added in Princeton; one in the Model school and one in the Witherspoon street building. Both these buildings have now reached their capacity and the crowded condition of the rooms in the Witherspoon street school has made, for the past two or three years, an addition to this building imperative.

New desks were placed in some of the rooms in Hopewell Borough and during the summer the building will be enlarged by an addition of two rooms.

Many buildings throughout the county received needed repairs. Several were supplied with additional blackboard surface, which, indeed, is an absolute need in so many of our schools. Our buildings, generally, are in very good or fair condition. In some, the interior needs attention and should be made more inviting and attractive. In a few, more comfortable and sanitary seating should be provided.

Physical apparatus was placed in the High School at Princeton and a set of maps in each of the schools of Hopewell Township.

Classes were graduated from the High Schools at Princeton, Hightstown and Pennington.

There were in attendance at the Trenton High School pupils from Hamilton, Ewing, Hopewell, Lawrence and West Windsor; at the Princeton High School, from Lawrence, West Windsor and Princeton Township.

The course of study for the High School of Hopewell Borough

You Are Viewing an Archived Copy from the New Jersey State Library

was revised, lengthened to three years and an additional teacher employed for the higher grades. This school will hereafter become the Township High School.

These three schools provide High School facilities for all our districts but East Windsor and Washington. With the course of study for the Hightstown school lengthened and with a High School established at some convenient point in Washington Township, our county would be fairly well supplied with suitable school facilities for pupils of higher grade.

The county examinations for grammar school pupils were held the last week in May and the results showed that those schools in which pupils were prepared for these examinations were doing excellent work. Grammar school certificates were granted to forty pupils, nearly all of whom will attend a High School during the coming year. The number of pupils completing the grammar school course each year should be greater, and the reason we do not have a better showing in this respect is due largely to the irregular attendance on the part of so many of our older boys and girls. Were it possible to have these pupils enter school at the beginning of the year and continue in attendance until the end of the term, this number would be largely increased. Graduation from all schools is the natural outgrowth of properly graded school work and a system of graduation should prove a healthful stimulus to regular and continued attendance, as well as an incentive to higher attainments.

The revision of our course of study, after its approval by the State Department, was published and placed in the hands of our teachers about the middle of the term. During the remainder of the year, the work of the schools was gradually brought into harmony with its general requirements, and with the proper adjustment accomplished, we hope that our work during the coming year will be greatly simplified and made more effective and satisfactory.

The Board of Education of Hopewell Township appointed a Supervising Principal the latter part of last year and their wisdom in appointing a good Supervisor is apparent in the increased regularity of attendance, greater punctuality and in the general efficiency of the work of the schools. Through a system of emulation among the schools, introduced by Supervising Principal Wagner, the number of cases of tardiness was reduced nearly one-half, and Hopewell leads all the other districts of the county in the number of pupils

You Are Viewing an Archived Copy from the New Jersey State Library

neither absent nor tardy during the year and in the percentage of attendance.

Meetings of the Teachers' Club were held the last Saturday of each month during the school year and were well attended. At these meetings instructive and helpful addresses were made by Prof. R. W. Swetland, Principal of Peddie Institute; Dr. Green and Prof. A. C. Apgar, of the Normal School; Dr. George E. Archer and Dr. W. A. Frye, of Trenton; Rev. Z. T. Dugan, of Groveville, and Rev. William I. Campbell, of Princeton. At the invitation of Prof. F. N. Willson, President of the Board of Education of Princeton Township, the final meeting of the year was held in his lecture room in the John C. Green School of Science, Princeton University. Prof. Willson delivered an address, illustrated by models, on "Mathematics and Motion."

Two meetings of the School Board Association were held; one in December, the other in March. The December meeting was attended by nearly half of the members of our Boards of Education and the addresses and discussions were interesting and profitable. At the morning session Prof. T. D. Sensor addressed the meeting on "The High School Question." Mr. G. W. Scarborough spoke on "How to Increase the Efficiency of our Schools," and Mr. E. T. Chew, of Philadelphia, discussed "The School Board." At the afternoon session addresses were made by H. C. Scudder, Esq., on "How to Secure Regularity of Attendance;" Mr. J. M. Arnold, Jr., on "The District Clerk" and Dr. T. A. Pierson on "School Sanitation."

The meeting in March was a joint meeting of the School Board Association and the Teachers' Club, and was well attended by teachers, but the attendance on the part of members of boards was disappointing. Two excellent addresses were made—addresses that should have been heard by every member of our boards. Prof. T. D. Sensor spoke on "The Practical Purposes of School Work," and Dr. J. M. Green, principal of the Normal School, on "Teachers' Salaries."

From the accompanying statistical report it will be noted that 4,579 were enrolled in our schools during the past year; an increase of 218. Of this increase, 175 has been in Hamilton, in which district increased facilities are required every year, and especially in that part of the township adjacent to Trenton. The districts of Ewing, Hopewell and Lawrence also show an increase in the enrollment; the other districts remain about the same or with a slight decrease. The average number on roll has been 2,990, with an average daily

You Are Viewing an Archived Copy from the New Jersey State Library

attendance of 2,686; an increase of 102. The number of cases of tardiness has been largely reduced and our percentage of attendance increased.

Our teaching force numbered 113; an increase of 7. Of this number, 54 were either college graduates or had a Normal training, and 14 had no previous experience in teaching.

In conclusion, I wish to express my thanks to the teachers and to the members of the different Boards of Education for the assistance which they have rendered me in the discharge of my duties. My thanks are also due to the State Department for advice and for many courtesies received.

MIDDLESEX COUNTY.

H. BREWSTER WILLIS, SUPERINTENDENT.

Hon. Charles J. Baxter, State Superintendent:

DEAR SIR—For the school year 1906-1907, in the County of Middlesex, I submit the following report:

During the year just closed our pupils, teachers, school boards, and school organizations have been active and effective.

We have directed our efforts specially to:

Non-Attendance and Truancy.

New and Enlarged School Accommodations.

High School Attendance.

The continued indifference of many parents, as to whether their children attended school or not in the early part of the year, became so apparent that the matter was taken up with considerable vigor. As a reuslt of interviews with Judge Theodore B. Booream, of the Court of Common Pleas of this county, an Affidavit of Truancy and a Rule to Show Cause were prepared, as follows:

NON-ATTENDANCE AFFIDAVIT.

STATE OF NEW JERSEY, COUNTY OF MIDDLESEX, (*ss*).

.....of full age, being duly sworn according to law, on his oath says that he is a Truant Officer of the School District of.....in the County of Middlesex, and State of New Jersey.

You Are Viewing an Archived Copy from the New Jersey State Library

That.....is a child between the ages of seven and fourteen years, to wit, of the age of.....years, residing in said School District with.....who is the.....of said child and has the legal control thereof.

That the said.....has been absent from day school in said School District as follows, namely:
.....days in the month of.....
.....days in the month of.....
.....days in the month of.....
.....days in the month of.....
a total of.....days of non-attendance during the present school year, beginning July 1st, 19...., all of which said days which the said.....was truant, being days while said public school was in session in said School District wherein the said.....lived; that said child during said days was not being taught at home in the branches usually taught in the public schools to children of.....or.....age, nor was either the bodily or mental condition of the said child such as to prevent.....or.....attendance at school, contrary to the provisions of Article 15, of Chapter 1, of an Act passed by the Second Special Session of the Legislature of the State of New Jersey, convened October 15, 1903, entitled "An Act to establish a thorough and efficient system of free public schools and to provide for the maintenance, support and management thereof."

And deponent further complains that the said..... is habitually truant, and, therefore, prays that process in the nature of a warrant may issue out of the Court of Common Pleas in and for the County of Middlesex to the Sheriff of the said County, commanding him to bring the said..... so complained of as truant, before the said Court, and that an order may also be made by said Court, directing the said..... .....the.....of said child, the person who has.....in charge, and with whom.....has last resided, etc., requiring him to appear at a time and place stated in said order to show cause why said child should not be committed to the State Home for Reformation and Instruction for..... pursuant to the provisions of an Act of the Legislature of New Jersey entitled "An Act to Establish and Organize the State Reform School for Boys, Provision of 1900," and why the parent, legal

You Are Viewing an Archived Copy from the New Jersey State Library

guardian or person having custody of the truant or delinquent, should not be dealt with according to law.

Sworn and subscribed before me this.....day of .....190....

.....*Truant Officer.*

COURT OF COMMON PLEAS IN AND FOR THE COUNTY OF MIDDLESEX.

In the Matter of the Application of the Board of Education of the School District.....vs. .....
Rule to Show Cause.

Upon reading the affidavit of.....of the Board of Education of the School District of the..... of....., filed in the above stated cause, setting forth that.....between the ages of seven and fourteen years, to wit: of the age of.....years, residing in said School District with.....has been absent from day school in said district.....days, during the present school year, beginning July the first, one thousand nine hundred and.....all of which said days the said.....was truant, and absent from the public school day sessions in said District, where..... .....lived.

It is on this.....day of.....A. D. one thousand nine hundred and....., ordered that said ....., said alleged truant, and..... .....who has the legal control of said..... ....., appear and show cause before the Court of Common Pleas, in and for said County of Middlesex, on..... the.....day of.....one thousand nine hundred and....., at the Court House, in the City of New Brunswick, at.....o'clock, in the forenoon of said day, why the said.....should not be committed to the State Home for.....for Reformation and Instruction, pursuant to an Act of the Legislature of New Jersey, entitled "An Act to Establish and Regulate the State Home for....." and why the parent, legal guardian or person having custody of the truant or delinquent, should not be dealt with according to law.

And it is Further Ordered, That in the event of said..... .....failing to appear at the time and place aforesaid, that then a warrant issue, without further order of this Court, to

You Are Viewing an Archived Copy from the New Jersey State Library

the Sheriff of the County of Middlesex, commanding him to bring said.....forthwith before this Court, for such disposition as the Court may make in the case.

.....

Judge, Court of Common Pleas, Middlesex County.

On motion of

.....

Attorney for Applicant.

Ten truants or delinquents, with their parents, legal guardians or person having custody of the truant or delinquent, appeared before the Court of Common Pleas at one session, in response to the facts set forth in the affidavit and the rule to show cause why the pupil had been absent from school and why the parent, guardian or person having custody of the truant or deliquent should not be dealt with according to law.

Just what took place can best be told by inserting in this report the following articles, which appeared in one of the New Brunswick city papers:

In the Court of Common Pleas this morning Counsellor-at-Law H. Brewster Willis made somewhat of a stir by making the following appeal to the Court in behalf of the Board of Education, supervising principals, principals and teachers. He said:

"I desire to call the attention of the Court to the violation of the law in this county which is both flagrant and serious.

"I refer to the large number of children between the ages of seven and fourteen, who are repeatedly absent from public school day sessions in violation of the Compulsory Law, which requires all boys and girls between the ages of seven and fourteen to attend public day school every day when the public schools are open, unless bodily or mental conditions of the child prevent, or they receive instruction equivalent to that received in the public schools.

"It is conceded that the public school system of our State in effectiveness, progressiveness and liberality is second to none.

"The Legislature has made generous provisions to maintain our public schools. The Board of Education of our cities, boroughs and townships have made liberal and ample provisions to instruct all children in their respective districts.

LOSS OF SCHOOL MONEY.

"The value of education to the child, to the State and to the nation

You Are Viewing an Archived Copy from the New Jersey State Library

is too apparent to be argued. The loss of school money to the respective districts by reason of their non-attendance is quite apparent.

"I have given considerable attention to this phase of school work and have discovered that at times only two-thirds of the children in the boroughs and townships are in the public schools regularly during the months of September, October and a part of November. That I have reason to believe from reports that there are at least two or three hundred cases where boys and girls are repeatedly absent from school, violating the school law, and that their parents are also violating the law either through intention or indifference.

TEN TEST CASES.

"Of the large number of truants I have only taken the first ten cases that came into my office. I do not know the parents nor the children, but I do know that of these ten cases there are three girls and seven boys, all within eleven and twelve years of age. Their aggregate number of lost school days is 782 whole days and 1,564 single school day sessions, an average of 78.2 days per child out of 123 days, or 63 per cent. of lost school time.

"I desire to ask Your Honor to grant a rule to show cause in these cases to be served upon the parents or person having the legal control of the child, to produce the child before this court on Saturday, March 23, at 10 o'clock, to show cause why these pupils should not be sent to the Home for Boys or the Home for Girls for Reformation and Instruction as provided by law.

SHOULD HELP CHILDREN.

"Something should be done to help these children, who will not help themselves, and to reprimand these parents, who care, apparently, nothing for childhood school privileges. The school registers show that outside of these two or three hundred truants, the attendance of the children is most praiseworthy."

PARENTS IN COURT.

Judge Booraem expressed a favorable opinion in behalf of the motion. He viewed the situation from the standpoint of law, and good citizenship, and clearly stated that the court would give its aid to the movement to correct these violations of the law. He granted ten rules to show cause why the children should not be sent to

You Are Viewing an Archived Copy from the New Jersey State Library

State homes, to be served on the parents, returnable on March 23, at 10 o'clock, at the Court House, and after carefully examining the affidavits granted an application for subpœnas to be issued.

The following are the names of pupils, ages, number of days they have been absent since the 4th day of September, and the district in which they live:

Lizzie Glum, aged 12, of Monroe; about 98 days.
Annie Litz, aged 12, of Sayreville; about 116 days.
Benjamin Brittman, aged 11, of Monroe; about 40 days.
Israel Kasser, aged 12, Monroe; about 49½ days.
George Mershon, aged 12, of South Amboy; 56½ days.
Bertha Emmens, aged 11, of Monroe; about 70½ days.
Daniel Sanders, aged 12, of Sayreville; about 103½ days.
Walter Lansbury, aged 12, of South Amboy; about 61 days.
Willie Walters, aged 12, of South Amboy; 93 days.
Howard Conover, aged 9, of Monroe; about 96 days.

The total absence of these was 782 days, or 1,564 sessions. The percentage of lost school days and privileges was 63 per cent.

MRS. WILLIAMSON WILL HELP.

Mrs. Williamson, the Probation Officer, was very much interested in the application, and stated that she would be very glad to take part in the matter of caring for truant children.

RETURN OF RULES, MARCH 23RD.

With a warning that parents who permitted their children to stay away from school might be sent to jail or compelled to pay a fine, Judge Booraem suspended sentence upon ten youngsters arraigned before him this morning by County Superintendent H. Brewster Willis for truancy. All were placed under the supervision of Probation Officer Mrs. Williamson.

Mr. Willis stated that the effects of his crusade were already apparent, and that when the notices were served on the children brought up to-day, all but one were found in school. Supervising Principal Jesse Selover, of Sayreville, said that since the Superintendent's action, the Sayreville schools have been filled almost to overflowing.

The proceedings to-day were brought under the delinquent parent act of 1903, which is practically a duplicate of an act drawn by

You Are Viewing an Archived Copy from the New Jersey State Library

Judge Ben Lindsay, of Denver, Colorado, famous for his juvenile court methods, The act provides that in all cases where any child shall be a delinquent child, or juvenile delinquent person as defined by the statutes of the State, the parent or parents, legal guardian or persons having custody of such child, or any other person wilfully responsible for by any continuous negligence or wilful act encouraging, causing or contributing to the delinquency of such child, shall be guilty of a misdemeanor, and upon trial and conviction thereof shall be fined in a sum not to exceed $1,000 or imprisonment in the county jail for a period not to exceed six months, or by both. The court may impose conditions upon any such person found guilty under this act and so long as such person shall comply therewith, to the satisfaction of the court, the sentence may be suspended.

UNUSUAL PROCEEDING.

It is believed that this was the first time that the delinquent parent act has been enforced in the Common Pleas Court in New Jersey. Judge Booraem told the guardians that came before him that if the children were not kept in school the act would be enforced by bringing the parents' negligence before the Grand Jury, and that the children, in addition, would be placed in one of the State homes.

A STEPFATHER CASE.

In one case Judge Booraem thought that an immediate Grand Jury investigation should be made, if alleged facts were sustained. The child, Lizzie Glum, of Gravel Hill, Monroe township, came to court with her stepfather, Samuel Mergaugey, for having been away from school ninety-eight days out of 123. Supervising Principal William H. Conners stated to the Court that the girl, who is twelve years old, is kept home to do work that her mother could do, while the stepfather's own children are regular in their attendance.

Judge Booraem asked Mrs. Williamson to investigate these charges, and declared that if they were borne out the matter should be presented to the Grand Jury.

GOES TO PAROCHIAL SCHOOL.

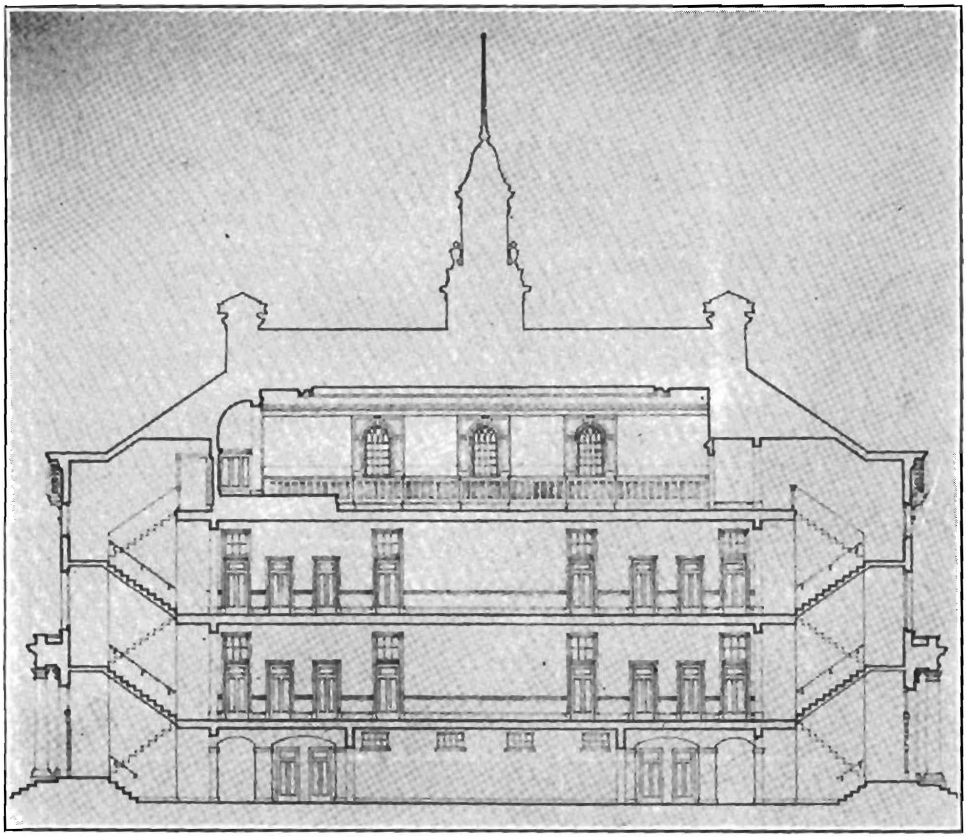

Annie Litz, of Sayreville, alleged to have been absent 116 days, was accompanied by her mother, Mrs. Fred Litz, who showed a cer-

tificate that the girl was enrolled in the parochial school at Sayreville. Principal Selover asserted that the girl had gone to the parochial school only during the last week. Judge Booraem thought that this was hardly a case for him to interfere in, except to have Mrs. Williamson see that the girl did attend the parochial session.

MUST WORK FOR A LIVING.

Mrs. Warren Hansell, of Sayreville, appeared with Daniel Sanders, aged twelve. She said the boy did not go to school because he had no parents and had to work for his living. She admitted that the boy was under her charge, and was warned by Judge Booraem that the boy was entitled to go to school and that he would be taken from her if she did not have him attended.

OTHER CASES.

Joseph A. Emmons, of Monroe, said that he couldn't send his daughter, Bertha Emmons, to school because she didn't have proper shoes. The other cases were as follows:

Benjamin Brittman, aged eleven, of Monroe; Israel Kasser, aged twelve, Monroe; George Mershon, aged twelve, South Amboy; Walter Lansbury, aged twelve, South Amboy; Willie Walters, aged twelve, South Amboy; Howard Conover, aged nine. Monroe.

TEACHERS PRESENT.

A large delegation of teachers had been subpœnaed in case their testimony was needed. Most of these were young women, who formed a rather striking picture especially as they all occupied jurors' chairs. The teachers were:

James McDonnell, Misses Meda Everitt, Ruth Campbell, Manna Scully and Kate Nichols, of South Amboy; Jesse Selover, Misses Mercy Hillman and Henrietta Straub, of Sayreville; William H. Connors, Isaac Pullen, Misses Alice Archibald and Rebecca Allen, of Monroe.

TRUANTS AND DELINQUENTS PAROLED.

When the Court ascertained that parent, legal guardian or person having custody of the truant or delinquent were largely responsible for the non-attendance of the pupil, the child was placed in the

You Are Viewing an Archived Copy from the New Jersey State Library

custody of the Probation Officer, Mrs. Emily Williamson, who made a record of the name of the child, the parents, school district, days of non-attendance, and all the facts connected with the case, and then permitted the parent or guardian to take the child subject to weekly inspection by the Probation Officer and the Supervising Principal. The Court also gave a warning to the parent or person having custody of the child as to the law.

It is very gratifying to report that careful inspection revealed the fact that all of these truants or delinquents made excellent records for the remainder of the year.

A resolution was passed at the last meeting of the Supervising Principals that principals and teachers should make by-weekly reports to the Supervising Principals and the Supervising Principals should report monthly to the County Superintendent on blanks prepared, of pupils living in the district of school age not attending school, giving the number of days of absence.

These reports will be the foundation for truancy and delinquent affidavits.

Most satisfactory results have attended our efforts to wake up the child and the parent to the duty of school attendance. We hope for even greater results next year.

COUNTY TESTS OF PUPILS PROMOTED TO HIGH SCHOOL, YEARS OF WORK FOR 1907-1908.

All the pupils of the eighth, ninth, tenth and eleventh years of work of each district were convened at a central school building on May 27, 28 and 29, to take the county test.

The test questions were prepared by a special committee in all the subjects required in the eighth, ninth, tenth and eleventh years of work.

These testings were under the immediate care of the Supervising Principal.

The answer papers were forwarded to the office of the County Superintendent, containing the credits allowed by the Supervising Principal. These credits were reviewed and revised by a special committee, who made a final report of testing credits.

PUPILS ATTENDING OUTSIDE HIGH SCHOOLS.
TUITION PAID BY BOARDS OF EDUCATION.
1906-1907.

Experience has fully demonstrated that the interests of the tax-payer and pupil are best served, when the boroughs and townships are relieved from maintaining high school years of work, as required by law, except in those districts maintaining an approved four year high school course and have an enrollment of not less than five hundred pupils in the district. In furtherance of this idea, the following table has been prepared:

SUPERVISING PRINCIPALS' ASSOCIATION.

Three regular meetings have been held during the year, in the Aldermanic Chambers in the City of New Brunswick.

Among the many subjects discussed are the following:

The recitation, new teachers, county tests, work of the Teachers Professional Circles, short courses in agriculture, school wagons for transportation, contract with driver, and rules for pupils, substitute teachers, simplified spelling, reports of pupils attending outside high schools, duty of truant officers, value of professional training, the supervising principal, the approved and partial high school, the best judge of the teacher's qualifications and success, truancy and other subjects.

The association is composed of three superintendents, eighteen supervising principals and ten principals, a membership of 31.

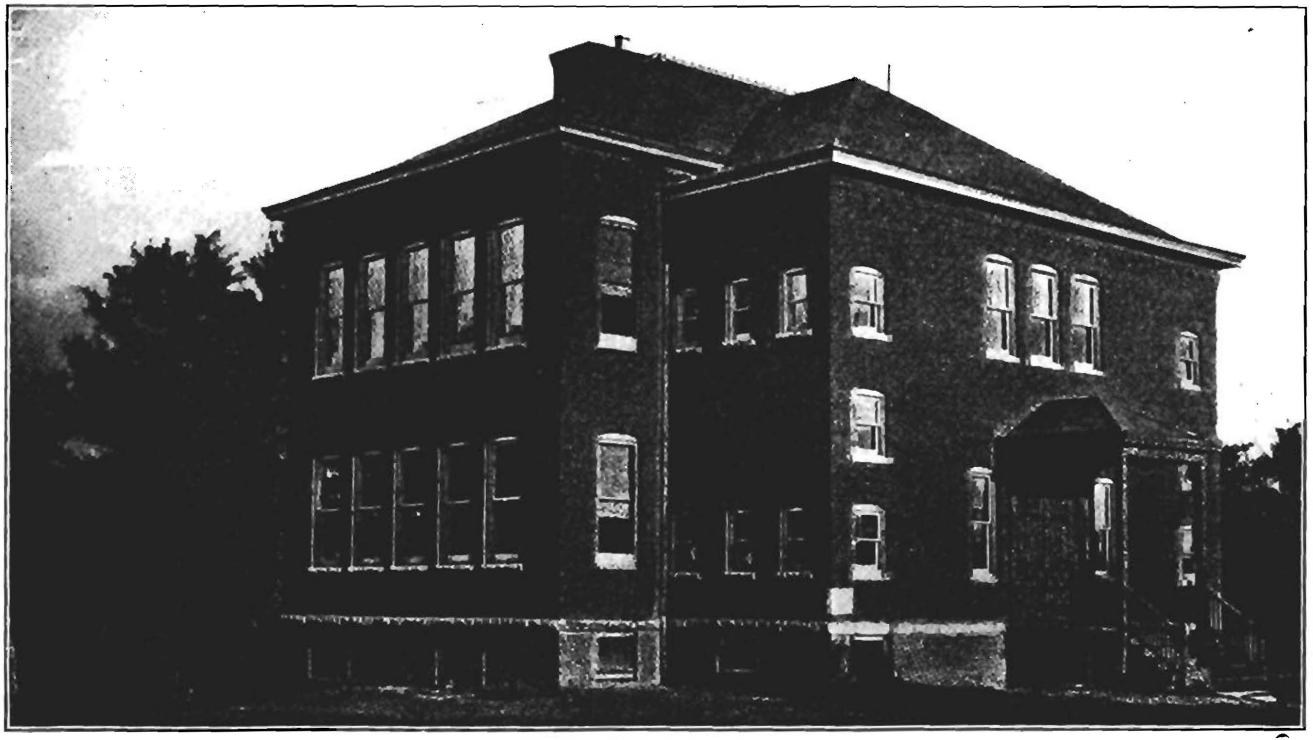

MIDDLESEX COUNTY SCHOOL BOARD ASSOCIATION.

The members of the Middlesex County School Board Association, convened at the Mansion House, City of New Brunswick, Saturday December 22, 1906, to celebrate the tenth anniversary of the Association. County Superintendent Willis, the president, presided, calling attention to the organization of the work accomplished by the Association.

The President presented a statement of progress of ten years of which the following are some of the facts, showing percent of increase:

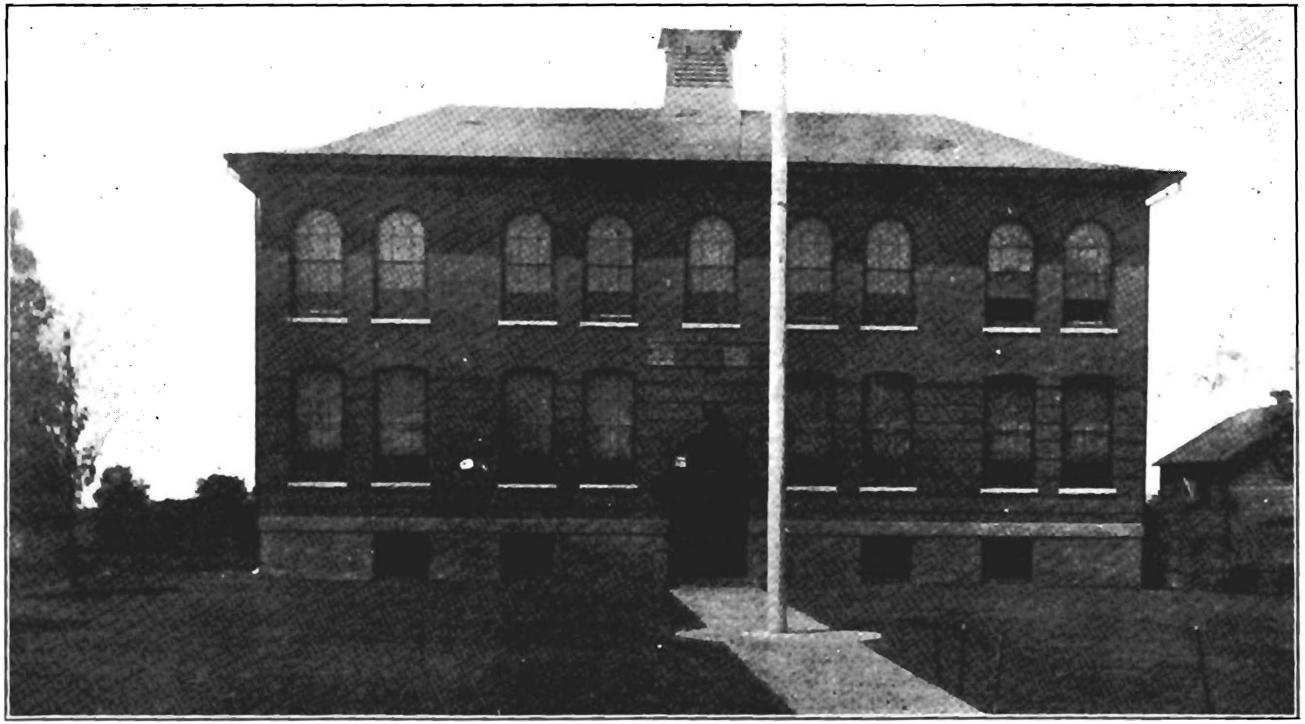

Teachers' salaries, 85; janitor's salaries, 130; school accommodations, 124; text books and supplies, 102; other school expenses, 392; teachers, 58; from none to eighteen supervising principals, with salaries from $600 to $1,800; from 12 to 19 school districts; from 200 to 1,500 pedagogical library works, and a library department from the third floor of an office building, with volunteer librarians, to the new City Library, with a paid and regular librarian. He recommended, that attention be given to a short elementary course in agriculture; that all schools should be kept open at least 190 days; truant officers be appointed; a supervising school physician for the district; the minimum salary for an inexperienced teacher holding a third grade county certificate should be $400; the minimum salary for a successful teacher holding a second grade county certificate, $450; the minimum salary for a successful teacher holding

a first grade county or State certificate, $500, and as much above the minimum salaries as results will justify. He gave in detail the results of the past year of work.

During the session the following subjects were presented and discussed: The school law of the past ten years, showing great advance in sanitation, accommodation, qualifications with a broader scope of work as required by our State Constitution; the necessity of increasing the teacher's salary for the good of the children; the value of a brief course of agriculture; how to manage truancy cases; 190 days of school should be required of every district; a truant officer and a supervising physician appointed in every district.

The following resolutions were passed:

Resolved, That the Boards of Education do all within their power to encourage a short elementary course of agriculture being taught in our public schools, by talks on the subject by the Supervising Principals and Principals, once a month, and by the teachers impressing the subject matter of said monthly talks upon the minds of the children, at least once a week.

Resolved, That it is the sense of this Association, that in view of the liberal school appropriations made by the State for school purposes, that every public school in the county should be kept open 190 days, during the school year, unless compelled to close by reason of an epidemic.

Resolved, That we extend a vote of thanks to the speakers who have favored us with such excellent addresses.

Resolved, That the minimum salary for Supervising Principal devoting his entire time to supervision and drawing the State appropriation of $600, in districts having more than ten class rooms under his supervision or more than five schools in the district should be $1,000.

Resolved, That each Board of Education should designate a marshal, policeman, constable or some other suitable person, as a truant officer, to accompany the Supervising Principal in looking after truants, when necessary.

Resolved, That each Board of Education should designate a practicing physician on whom the Supervising Principal, or Principal, may call when pupil reveals suspicious symptoms of disease.

Resolved, That the minimum salary paid to any teacher in this county should be $400. That the minimum salary for successful teachers holding the second grade county certificate should be $450,

and that the minimum salary for successful teachers holding a first grade county certificate, State Normal certificate of this State, or a State Normal certificate shall be $500.

ADDITIONS—INCREASE IN BOROUGHS AND TOWNSHIPS.

The records of the boroughs and townships show the following additions and increases:

Two new Supervising Principals, twelve additional teachers, six new school buildings, costing $98,200; ten additions, costing $88,000. Total for new buildings and additions of $186,200. One hundred pupils in high schools, tuition $2,253, transportation $1,309, teachers' salaries $20,000, and encouraging results along all lines generally.

SCHOOL GIFTS.

A gentleman of large business interests, who desired his name to be withheld from the public, donated a spacious, well located lot for a new school house and presented the Board of Education with $6,000 in cash toward a large graded school. Two other gentlemen have generously donated a school lot each, one for a new school house and the other for an addition to the present school building. It is needless to say that these gifts were very highly appreciated by the school authorities.

OUR NEEDS.

An accurate school census.
Better teachers for our one room schools.
Number of teachers determined by years of work.
Individual desks in all one room schools.
More farmers to advocate the teaching of agriculture.

You Are Viewing an Archived Copy from the New Jersey State Library

Better attendance in rural schools during September, October, and November.

Better records of the work and moral standing of each school child.

More attention to school house yards.

More money in current expenses for stationery and blank printing.

More inspection and examination by parents and taxpayers, of the work accomplished.

MONMOUTH COUNTY.

JOHN ENRIGHT, SUPERINTENDENT.

To Hon. Charles J. Baxter, State Superintendent.

DEAR SIR—There has been a very substantial growth in the school work in this county. A period of one year is a short time in which to make comparisons in the growth of a system of schools maintained in a large county such as Monmouth. Nevertheless it can be seen that there is a substantial advancement in every direction to which we would look for progress. The number of pupils in attendance is in the proper ratio to the increased number of teachers. Likewise, the increase in the cost of running the schools is what ought to be expected by the increase in the number of teachers employed.

The interest of the patrons in the schools has been well sustained. The excellent business management of the School Boards of Education compares favorably with the past. The willingness of the people to meet any reasonable expenditure for new school buildings or for the general maintenance of the schools is probably more cheerful than ever before.

Towards the end of the school year there was a large amount of moneys voted for the erection or the addition to school buildings in many parts of the county. At no time in the past history of this county's schools was there so much money voted for new school buildings as in the last months of the school year.

The amount voted and to be expended will be reported next year. I think it worthy of mention, however, at this time, that the school districts of Middletown Township, Eatontown Township, Atlantic Highlands, Matawan and Holmdel are putting forth unusual efforts

You Are Viewing an Archived Copy from the New Jersey State Library

in this direction. By the close of another school year these places will have splendid school buildings and equipment.

The new law in reference to the apportionment of twenty-five dollars to all districts paying high school tuition in neighboring districts worked out in practice to the satisfaction of all concerned. In not a single instance in all Monmouth County did any individual have to pay tuition in a neighboring high school. The high schools are thus entirely free to all whether residents of the district maintaining a high school or not. In addition to this, during the coming year it is expected that the transportation of pupils by Boards of Education will be also free of cost. The number of pupils paid for by 22 districts is 306. This large number shows that there is a demand for high school education in the rural districts quite equal to that in the more thickly settled centers of population.

There has been a substantial increase in teachers' salaries during the past year, and also a very substantial advancement has been made in salaries to teachers for the coming year. The new contracts will average an advancement of at least 20 percentum throughout the county. The thing that is confronting Boards of Education is that there shall be a corresponding increase in the efficiency of teachers. There is no doubt in my own mind that better salaries will bring about better teachers.

The usual Teachers' Institute was held at Asbury Park in November. This time a two days' institute was held and was attended by the teachers of Ocean County and Monmouth. Besides the Teachers' Institute there was held a large meeting of the Monmouth Teachers' Association at Long Branch. The attendance was large and enthusiastic.

Two County School Board meetings were held during the year, one at Keyport in October, and the other at Red Bank in March. These meetings were attended more largely during the past year than ever before. Practical questions were discussed. The important question discussed at the last meeting was the increase in teachers' salaries. This question was fairly presented from the standpoint of the teacher as well as from the standpoint of the Board of Education. The result of the discussion was made manifest in the substantial increase in teachers' salaries following the spring meeting of the board. We now have rural schools which pay from fifty to sixty-five dollars a month, which during the present year were paying only thirty-five and forty-five a month.

You Are Viewing an Archived Copy from the New Jersey State Library

The Grammar School examinations were held in May, as usual. The number that tried this examination in the country schools outside of the large graded schools was 229, a large increase over last year. Of this number 162 succeeded in getting certificates, and 67 failed or partially failed. A new plan of examination was adopted this year. All papers were read and marked by the Supervising Principal before they were sent to my office. The papers were reviewed by me and certificates issued to the successful candidates. The fact that a grammar school certificate now carries with it the right to enter a high school nearest to the residence of the pupil is in my judgment the cause of the large increase in the number who tried this examination.

It is gratifying for me to record here that the Bradley Beach Borough school trouble mentioned in my last report, has been satisfactorily settled by legislation of last winter. We now have three new school districts, namely, Bradley Beach, Rumson and Avon, making a total of thirty-five in the county.

It is justly due to the educational department at Trenton to say that the wise direction given to enactments pertaining to schools by the legislature, and the general good judgment and safe policy that have emanated from the department have worked to the upbuilding and advancement of all educational interests in Monmouth County.

OCEAN COUNTY.

CHARLES A. MORRIS, SUPERINTENDENT.

To Hon. C. J. Baxter, State Superintendent:

DEAR SIR—I herewith respectfully submit my first annual report of the work in the public schools of Ocean County for the year ending June 30th, 1907. The total expenditures of the county are $17,513.95 greater than the year previous, an increase of 19 per cent. The increase in the amount paid for teachers' salaries is $4,710.59, while the increase for text-books and supplies is $1,882.52 over that of the preceding year. The district tax voted for the coming year amounts to $65,319.00, an increase of 13 per cent. over the amount voted for this year, while the increase in the amount voted for surrent expenses is 19 per cent. over the amount for this year.

You Are Viewing an Archived Copy from the New Jersey State Library

The number of boys enrolled in the schools was 2,327 and the number of girls was 2,225; of these 109 were enrolled in kindergartens, 2,559 in primary grades, 1,645 in grammar grades, and 239 in high school grades. The percentage of attendance was increased to 89.8, the number of pupils neither absent nor tardy was increased 49 per cent., but tardiness on the whole was increased.

The schools of Point Pleasant and Toms River in Dover Township were maintained ten months, the only ones in the county that were kept open longer than the legal term of nine months. Plans are being made to maintain the schools of Lakewood Township thirty-eight weeks this coming year in order that they may receive full credit for the work done in their high school. It is a very difficult matter to bring the efficiency of the schools which are open but nine months up to the standard of those which are open ten months. More of the districts should maintain a ten months' term, and thus give the schools a better chance to compare favorably with those in adjoining counties.

During the year a modern two room building has been built at Cedar Run in Stafford Township, taking the place of an old, poorly lighted one room building. Lakewood Township has built a commodious one room building on Fulton street for the exclusive use of its colored population. Berkeley Township erected a one room building at Greenwood to take the place of one that was being rented.

The one room building at Cassville in Jackson Township was destroyed by fire on January 24, 1907. Money was voted by the district for the erection of a modern one room building, which will be ready for occupancy by the middle of September. Lakewood Township voted to bond the district for $15,000.00 and erect a much needed addition to the East Lakewood school. This will be ready for use when the schools open.

The Board of Education of Point Pleasant took advantage of the provisions in the school law relative to outbuildings, raised $800.00 to replace the old ones, which were separated from the school building, and built modern sanitary closets attached to the building. The Board of Education of Union Township rearranged the outbuildings of the Barnegat school so as to comply fully with the law, and have further improved the school grounds.

The number of teachers, excluding Supervising Principals, employed this year has been 145, six more than last year. The average salary paid the male teachers was $461.23, a decrease of $4.49 from

You Are Viewing an Archived Copy from the New Jersey State Library

last year. This is due to the employment of two of the men as Supervising Principals, making a total of six who are now employed in the county. The average salary paid the women teachers was $402.39, an increase of $1.92 over last year. These figures could be much improved if Boards of Education would ask for larger appropriations for current expenses. At the annual meetings in March the appropriations all through the county were voted as they were asked for. So long as the present schedule of teachers' salaries remains in force the county will be greatly handicapped in securing competent material.

In addition to the approved high school in Lakewood, the high schools in Toms River and Point Pleasant have this year increased their teaching forces, procured scientific apparatus, and inaugurated courses of study which have secured for them the approval of the State Board of Education for four years of secondary work. Plans are well under way for the establishment of a three year course at Barnegat, a two year course at New Egypt, and a one year course at Lakehurst. The eleventh and twelfth year pupils will be sent from New Egypt to Mt. Holly, and for the last three years of high school work the pupils will be sent from Lakehurst to Lakewood. The districts of Bay Head, Brick, Lacey, Barnegat City, Berkeley and Jackson have this year sent pupils to other districts for high school work. There is still a need for more high schools in the county, especially in the southern end, and for a more general adoption of the plan of transporting the pupils from those districts where a high school is not practicable.

The regular eighth year county examinations were conducted as formerly, except that many of the districts held the examination for the entire district at some central point. The questions were prepared and sent out by the County Superintendent and all the answer papers were forwarded to his office for revision. Ninety-five Grammar School Certificates were issued. These certificates are made the basis of entrance to the high schools.

In ten of the districts commencement exercises were held either for the grammar or high school graduates. In most of these the entire district was represented. It was my pleasure to attend seven of these exercises.

But one meeting of the County School Board Association was held, the other one authorized by the local constitution being due

You Are Viewing an Archived Copy from the New Jersey State Library

in September before my appointment. A call was sent out for all districts to send representatives and nearly all responded.

The County Superintendent brought before the meeting the apportionment of the State and county moneys for the coming year and also presented a letter from the County Superintendent of Somerset County in relation to the Frelinghuysen bill now before the legislature. On motion the following resolution was unanimously adopted:

"Resolved, That the County School Board Association of Ocean County does endorse the bill introduced by Senator Frelinghuysen in relation to the State paying 75 per cent. of the expense of transportation of pupils, and does authorize our County Superintendent to convey to the proper source our endorsement of the some, duly attested by the Secretary as the action of this meeting."

The County Superintendent called attention to the other laws which had been introduced effecting the schools. After a debate with regard to the advisability of a set of rules and regulations for the Boards of Education of the county, it was on motion ordered that a committee of three be appointed by the chair to draw up a text of rules to govern Boards of Education in the county, the same to be amended or altered to suit in the different localities. The committee to report at the next meeting of this association.

The fall meeting of the association was fixed for the third Wednesday in October instead of the third Wednesday in September.

It is believed by all who attended this meeting that the association can be maintained and much done through its agency for the good of the schools.

This county joined with Monmouth County again in having the Teachers' Institute at Ocean Grove. The instructors were Miss Sarah J. McNary and Prof. Austin C. Apgar of the State Normal School, and Prof. Louis Bevier, Jr., State Inspector of High Schools. With the large number of teachers we have in the two counties, the work of an institute could be made much more helpful if it were divided into three or four divisions or grades.

The regular teachers' examinations have been held under my supervision by the County Board of Examiners, and the other duties of the County Superintendent have been performed to the best of my ability.

In many respects this first year has been a perplexing time, and I wish to thank all the teachers and school officers who have co-oper-

You Are Viewing an Archived Copy from the New Jersey State Library

ated so generously with me, the press of the county for the assistance it has rendered so generally, Dr. Louis Bevier, Jr., the State Inspector of High Schools, for the impetus he has given to the several movements for high schools in the county, my predecessor for courtesies shown, and yourself and your assistants for the loyal help you have given whenever requested.

PASSAIC COUNTY.

EDWARD W. GARRISON, SUPERINTENDENT.

Hon. Chas. J. Baxter, State Superintendent of Public Instruction, Trenton, N. J.:

MY DEAR MR. BAXTER—I herewith respectfully submit my annual report of the condition of the schools of Passaic County for the year ending June 30, 1907.

The school year just closed has been, in most respects, successful in our county. Acquackanonk Township has erected two brick buildings during the year, one at Clifton containing eight class rooms at a cost of $32,000, one at Lakeview containing two class rooms at a cost of $10,400. A new one room frame building was also erected at Allwood at a cost of $4,200. New additions have been added to schools number two, six and seven. The addition to school number seven contains four rooms and is built of brick at a cost of $12,500.

The brick school at North Haledon was opened during the month of October. This building is a modern structure consisting of six class rooms and was erected at a cost of $16.000.

The borough of Hawthorne is placing a four room addition to school number two at a cost of $8,000.

The matter of High School facilities for the pupils of this county received favorable consideration by the Boards of Education and proper steps were taken by the different Boards to provide for all making application. This has had a good effect on the Grammar School Department as it has opened the way for higher education to them who have heretofore been deprived, thereby adding a new incentive for good work.

The matter of supervision is being looked upon more favorably by our Boards. Three more Supervisors being elected during the

You Are Viewing an Archived Copy from the New Jersey State Library

year, one for the borough of Totowa, one for the borough of Prospect Park, and one for the township of Wayne. North Haledon, Pompton and West Milford now being the only districts not taking advantage of this provision of the law.

The three meetings of the Passaic County Teachers' Association were held as usual. We have tried to make these meetings beneficial to the teachers and the increased interest shown over the County was exceedingly gratifying to them having the meetings in charge.

The regular meetings of the County Boards of Education were poorly attended. I have put forth an extra effort in trying to arouse interest in these meetings. The speakers have been selected after careful consideration, and the subjects discussed have been such as to have been beneficial to all school officials—those members present expressing themselves as being greatly helped and feeling better able to conduct the school matters of their own locality. We are hoping for better things along this line of the work.

A spirit of good feeling has existed throughout the year, and the results obtained were, in most cases, of a high standard. We realize that there are greater and better things to be had and toward these we bend our efforts for the coming year.

In conclusion I wish to thank the State Department for continued courtesy and help given me.

SALEM COUNTY.

J. A. WENTZELL, SUPERINTENDENT.

To Hon. C. J. Baxter, State Superintendent, Trenton, N. J.

DEAR SIR—I herewith submit my fourth annual report of the condition of the schools of Salem county for the year ending June 30th, 1907. There has been no material difference in this year's enrollment and attendance of pupils or teaching force from last year, except that there have been 587 fewer cases of tardiness and a trifle higher percentage of attendance; three additional high school teachers have been employed to meet the requirements of the State Board of Education with reference to the teaching force of Approved high schools, thus making our total number of teachers, not including supervising principals and evening teachers, 156.

You Are Viewing an Archived Copy from the New Jersey State Library

The only changes that have been made in school work below high school grade are such as were necessary to secure a more complete standardization of grammar grade work in order that pupils may pass from grammar grade in any school of the County fully prepared to enter upon the work of the first year of an Approved high school. The standard for graduation from the eighth grade was advanced in three subjects, Arithmetic, English Grammar and U. S. History; and the grammar grade work of the schools has never been more creditably done than it has been done the past year. Teachers' salaries have advanced from an average of $368.19 in 1905-'06, to an average of $389.26 in 1906-'07.

CENTRAL EXAMINATIONS.

The examination of high school and grammar grade pupils was held for the first time at different centres instead of in the local schools as heretofore, and with very gratifying results. Ten convenient places were selected and responsible examiners were appointed to conduct the examination in each place; this method of examining pupils of the same grade from the various schools of the County in a common meeting place with a selected board of examiners was designed with the idea of securing fair and honest tests of the pupils' knowledge, and to prevent anything like favoritism; both teachers and pupils feel that added dignity is afforded the pupil who obtains an examination standing from such a County examination. Teachers, pupils and parents all fell in with this change and gave it their earnest support; not more than five pupils who ought to have been present were absent from either the February or the May examination. This places the County examinations on a basis such that I can feel absolutely sure that every boy or girl who receives a certificate or a credit in any subject fully merits it, and the grammar grade certificate is made to mean fully what it is intended to mean.

As a result of the examinations twenty-one pupils are entitled to certificates of graduation from the Approved three years high school course (not including Salem and Woodstown,) and eleven pupils received the county grammar grade certificate. The number of grammar grade certificates granted was necessarily small because of the higher standard for graduation from the eighth grade.

The primary examinations were held in the local schools as usual, and 143 primary grade certificates were granted.

You Are Viewing an Archived Copy from the New Jersey State Library

APPROVED HIGH SCHOOLS.

Through the efforts of the Boards of Education and the Principals and high school teachers of the following schools, Penns Grove, Elmer and Alloway have been approved for three years of high school work; the Board of Education of each school purchased the Crowell physical laboratory and engaged an extra high school teacher, in each case a college graduate; class rooms were fitted up in the high school department of Elmer and of Alloway, and departmental teaching is carried on in each place; the additional high school teacher at Penns Grove occupies one of the new rooms of the annex built last year.

Commencement exercises were held at Elmer and Alloway, the former having six graduates and the latter seven graduates of the three years course; Penns Grove held no graduating exercises this year because the school has added the fourth year of high school work and expects to be on the four year list the coming year. There will be a class of eight to take fourth year high school work. New high school courses of study were prepared for each of these schools and were approved by Dr. Louis Bevier, Jr., State Inspector of High Schools, and by Hon. C. J. Baxter, State Superintendent of Public Instruction. Forty minute periods of recitation are conducted in each high school.

Pedricktown, Auburn and Quinton, which schools have been doing from one to three years of high school work, will hereafter send their high school pupils to the Approved schools; Pennsville will continue to give one year of high school work; no other high school teaching will be done in the county outside of the Approved high schools.

The following townships sent their high school pupils to Approved high schools the past year, and paid tuition and transportation charges: Pittsgrove to Vineland; Upper Pittsgrove to Elmer; Quinton, Mannington, Lower Alloway's Creek and Lower Penn's Neck to Salem; Upper Penn's Neck and Oldmans to Penns Grove. High school pupils from Alloway township and those from Pilesgrove township attended their respective township high schools.

Salem and Woodstown are on the four year list and both do excellent work: Woodstown had no graduating class this year; Salem City graduated a class of eighteen.

You Are Viewing an Archived Copy from the New Jersey State Library

TEACHERS' MEETINGS.

A Joint Institute was held with Atlantic and Gloucester Counties at Atlantic City November 7th, 8th and 9th. The attendance from this county was good; only a few being absent on account of illness. The program as arranged was carried out and the institute was one of much profit to the teachers. Many of our teachers feel that if the Teachers' Institutes were discontinued it would mean a serious loss to them both socially and professionally.

The County Teachers' Association held two meetings during the year. The first meeting which was held at Woodstown, December 15th, was not well attended for some unknown reason, but it was a most interesting meeting; Professor A. C. Rothermel, Principal of Keystone State Normal School, Kutztown, Pa., was the speaker for both morning and afternoon. His morning address was on "Simplified Spelling," and his afternoon address on "The Will;" both were very instructive and were greatly appreciated. At this meeting Miss Sue H. Coles, Supervising Principal of Pilesgrove Township, conducted an interesting study in syntax in which all the teachers took part.

The second meeting, which was held at Salem, April 27th, was attended by nearly every teacher and by many of the school board members; music for the occasion was furnished by the Salem High School pupils (a pleasing feature of every meeting that we hold in Salem). Reverend Dr. Madison C. Peters of New York City was the speaker; his morning subject being "What the Jew Has Done for the World," and his afternoon subject "How to Make Things Go". These addresses were inspiring to teachers and to communities represented. These meetings have a value that the institutes do not give in meeting the needs of the individual teachers.

INTEREST IN SCHOOLS,

I find that general interest in the schools of the county is increasing and members of the Boards of Education and parents favor a more liberal expenditure of money than ever before. A four room annex to Penn's Grove school has been completed and three of the rooms furnished since last year, Norma four room building is well under way and a substantial building that will in every particular meet the State requirements will soon be finished and opened for use. Mr. Maurice Fels, the worthy Philadelphia gentleman men-

You Are Viewing an Archived Copy from the New Jersey State Library

tioned in my report of 1905-1906 as having donated to the district of Pittsgrove toward this building $1,000.00, has generously agreed to donate to the district all that the building will cost above $3,000.00; the board of education purchased the present lot for the building for $500.00. New Freedom school house in Upper Pittsgrove township was completed about the first of January, 1907, and was dedicated with appropriate exercises on Friday afternoon, January 11th. The house was filled with the friends and patrons of the school, and the meeting was more of the nature of a "parent's meeting" than any thing else we have had in the county during the year. Professor A. H. Van Lier, music teacher of the district, furnished music for the occasion and addresses were made by Mr. J. D. Lafferty, President of the Board of Education, Mr. R. J. Summerill, District Clerk, Rev. H. M. Blake, Pastor M. E. Church of Elmer, Rev. E. H. Mateer, Pastor Presbyterian Church of Daretown, and County Superintendent J. A. Wentzell. The patrons and friends are justly proud of the new building and its equipment.

Good Hope school house in Pittsgrove township has for a long time been situated to close to the Gloucester county line to properly accommodate the children who should attend that school; the Board of Education has called a special meeting of the voters for August 15th to authorize the purchase of a plot of land more nearly in the centre of that community on which to move the school house.

One meeting of the Boards of Education of the county was held at the high school building in Salem; this was not so well attended as the year previous but it was fully as valuable a meeting. Professor T. D. Sensor of the State Department and Professor Harry F. Stauffer, Supervising Principal of Millville schools, were the speakers; Mr. Sensor's address was on "The High School Problem and its relation to the Rural Schools," and Mr. Stauffer's on "Improving the Schools." Those who attended these County School Board Meetings testify to their aid in the proper administration of the schools. It is to be regretted that many who need this help the most never attend.

The liberal provision which the State has made for transportation of pupils who attend school in districts other than those in which they reside is a source of satisfaction; all the districts that have such high school pupils have arranged for their transportation the coming year without a murmur.

You Are Viewing an Archived Copy from the New Jersey State Library

CONCLUSION.

Thus there seems to be increased zeal in all parts of the county for better school accommodations and improved school facilities. There is need for better sanitation in many of the districts; the attention of the Boards of Education has been called to this important matter and it shall be one of my chief cares the coming year to secure for the schools the needed improvements in this line. The following schools were closed during the year by order of the Board of Education on account of contagious disease: Daretown two room school three days, Friesburg one room school four days, Elmer six room school seven days, Yorktown one room school twenty days, and Friendship (Upper Pittsgrove) one room school five days, all on account of diphtheria.

Special mention should be made of the devotion of many of our teachers to their work; Salem City, Woodstown, Penn's Grove, Elmer, Alloway and Pedricktown yearly send to the County Teachers' Examination pupils who successfully pass the examinations and secure certificates. The good work done by the teachers in all parts of the county justifies a decided increase in their salaries, and it shall be my greatest concern the coming year to see that salaries are paid them more nearly adequate to the service rendered.

Accept my sincere thanks for the courtesies shown and the assistance given me during the year.

The supervising principals have sent in brief annual reports of the work of their respective districts; I enclose two such reports which if you have space kindly print.

SOMERSET COUNTY.

H. C. KREBS, SUPERINTENDENT.

Hon. Chas J. Baxter, State Superintendent, Trenton, N. J.

DEAR SIR—Several facts taken from the annual report of Somerset county for the year ending June 30, 1907, are appended:

Increase over last year in number of pupils, 223.

Increase over last year in teachers' service in same district, 24 years.

Increase over last year in teachers' total experience, 24 years.

You Are Viewing an Archived Copy from the New Jersey State Library

Increase over last year in amount paid for teachers' salaries, 4%.

Increase over last year in amount paid for textbooks, 20%.

Increase over last year in amount paid for transportation of pupils, 134%.

Increase over last year in amount paid for tuition of pupils, 470%.

Increase over last year in amount paid salary of female teachers, 8%.

A large proportion of normal and college graduates have been employed. The amount voted for current expenses is increased 20% for the coming year. Notable advances have been made in this respect by Montgomery township 82%, Bernards township 58½%, and Franklin township 20%.

NEW BUILDINGS.

Bound Brook issued bonds to the amount of $62,000 for the purpose of erecting and equipping a high school building. An excellent site has been secured, and the plans call for all the improvements that characterize a high school of to-day. When completed it will be a credit to the borough and to the county.

Bedminister township voted to erect a $27,000 school at Peapack. This will contain six class rooms and an assembly room.

Rocky Hill raised $7,000 for a two-room building. This and the Peapack building will be ready for use before January 1, 1908, and the Bound Brook building by April 1, 1908.

It may be of interest to the department to note the increase in the amount of district tax raised for current expenses during the last ten years, by each district in Somerset county.

	1897-8	1907-8	Increase
Bernards Township	$1,200	$19,000	1483%
Hillsborough Township	400	2,700	575%
Franklin Township	500	2,900	480%
South Bound Brook	350	2,000	471%
Bound Brook	1,725	9,000	422%
Bridgewater Township	1,200	5,300	341%
North Plainfield Township	375	1,200	220%
Branchburg Township	350	1,100	214%
Bedminster Township	705	2,125	201%
Montgomery Township	375	1,000	166%
North Plainfield Borough	9,750	21,500	120%

You Are Viewing an Archived Copy from the New Jersey State Library

Somerville	4,820	10,550	118%
East Millstone	350	650	86%
Warren Township	500	900	80%
Totals	$22,600	$79,925	254%

When it is considered that, during these ten years, large sums were also voted for bonds and interest, the foregoing figures indicate most gratifying progress in educational sentiment.

GRAMMAR SCHOOL GRADUATES.

This year 129 pupils completed the county course of study for the grammar grades and received diplomas. As this represents an increase of 13 per cent. over last year, and one hundred per cent. over the year before it marks a notable advance in the educational history of the county. It is evident that the constant appeals that have been made to parents at the annual district commencements and to the pupils at the schools have been effective. The purpose is rapidly spreading among parents to furnish at least a high school education to their children.

In view of the fact that fifty-six per cent. of our grammar school graduates are products of the ungraded schools, it speaks well for the work done by the teachers as well as for the ambition of parents and pupils in the rural sections.

COUNTY TEACHERS' ASSOCIATION.

The twenty-second year of this organization found it flourishing. Three meetings were held and important addresses were delivered. One of the most interesting and valuable exercises was a class drill in primary reading, exhibiting the Gordon Comprehensive Method, by Miss Cora P. Lyndon, of the North Plainfield Borough schools.

COUNTY TEACHERS' INSTITUTE.

Somerset united with Hunterdon at Flemington this year. The joint meeting was not only successful professionally, but socially. County Superintendent Jason Hoffman and his associates proved to be excellent hosts, and the Somerset teachers were most cordially received by their neighbors and co-workers.

You Are Viewing an Archived Copy from the New Jersey State Library

MEDICAL INSPECTION.

Somerville established medical inspection by competent physicians. Thus two districts are now engaged in this most important work—North Plainfield Borough and Somerville.

PARENTS' MEETINGS.

The Public Education Society of Somerville continued its monthly meetings with much success. Informal parent's meetings were also held in the North Plainfield borough schools. Practically all the districts in the county held commencement or closing exercises in June which were largely attended.

COUNTY SCHOOL BOARD ASSOCIATION.

Two meetings were held as usual. The addresses of Supt. J. H. Hulsart, of Dover, and T. D. Sensor, of the State Department, were among the best we have ever had.

MISCELLANEOUS.

Permit me to commend the action of the State Board of Education in advancing the standard of teaching by requiring a four-year high school course as a prerequisite to entrance to the State Normal School, and to endorsement of diplomas from other states. I wish to renew my recommendation of last year: the State compels suitable buildings, a nine-month term, and regular attendance; let it now compel good teachers by declining to permit any person to teach who has not been trained for the profession.

Somerset county originated the idea, now embodied in the legislation, of apportioning to each district from State moneys seventy-five per cent. of the transportation expenses of pupils going from one district to another. This provision, coupled with the State tuition allowance, is of vital importance to rural pupils, who would otherwise not secure the benefits of a high school education. The splendid boys and girls who live remote from high schools are now given equal opportunities with those who live in towns and cities.

You Are Viewing an Archived Copy from the New Jersey State Library

SUSSEX COUNTY.

RALPH DECKER, SUPERINTENDENT.

To Honorable Chas J. Baxter, State Superintendent, Trenton, N. J.

DEAR SIR—I have the honor to present to you my fifth annual report as superintendent of schools of the county of Sussex.

Educational progress during the past year has been steady and firm, and in many particulars more marked than in previous years as will be seen by the accompanying finanicial report.

FINANCES.

During the past year the total increase of expenditures was $7,914.09 over that of last year. Of this amount the sum of $3,091.92 was for teachers' salaries. The amount of debt and interest was reduced $2,006.80. All the districts but two report a balance in their treasury, and while the total balance is not quite as large as last year, yet taking the above statistics as a whole it shows that our finances are in good condition.

The outlook for the coming school year is very promising. The amount appropriated by the State is $66,036.71 an increase of $25,835.91 over last year due to increased ratables and the railroad tax. The amount of district tax voted to be raised is $64,866.55 an increase of $8,986.55 above last year. The total amount available for the year is $133,947.86, an increase over the past year of $31,811.48, or a little more than 25 per cent.

ATTENDANCE.

During the year Vernon increased its school term to ten months leaving only five districts in the county having nine months. This is very gratifying when we take into consideration the fact that the five districts contains only 13 per cent. of the children of the county.

The total enrollment has decreased somewhat due very largely to the scarcity of help in this county forcing many of the farmers to keep their older children at home to assist in the farm work.

The percentages of attendance of the boroughs, towns and more

You Are Viewing an Archived Copy from the New Jersey State Library

thickly settled communities is very good indeed, while the more sparsely settled parts owing to the severity of the winter months were less punctual.

Tardiness is on the decrease. Many, in fact the majority, of the schools have reduced it to a minimum but a few negligent teachers are very largely responsible for the fact that it is still larger than it ought to be.

TEACHERS.

During the year one hundred and fifty-four teachers were employed in the county. Of this number sixty-five, nearly fifty per cent., are not occupying the same school as last year, and thirty-one are beginners. The difference in salary paid in the different districts is responsible for the first, and a scarcity of teachers for the second. The increased amount available will allow us to even up the salaries in the districts and also to pay more, thus enabling us to retain some of our best teachers who are each year leaving us for fields paying more lucrative salaries.

Forty-six of the teachers employed are graduates of colleges, Normals or traing schools. The grade of certificates held is as follows:

First Grade State	5
Second Grade State	25
Third Grade State	11
First Grade County	20
Second Grade County	63
Third Grade County	26
Special County	4

SALARIES.

As has already been stated $3,091.92 more was paid for teachers' salaries than last year. The thirty-six male teachers employed received $19,820.00 or an average annual salary of $550.55 an increase of $79.80 over last year. The one hundred and eighteen female teachers received $50,351.00 or an average of $426.70. This si an increase of $38.72.

TEACHERS MEETINGS.

Interest in our teachers' meetings does not wane and our teachers

You Are Viewing an Archived Copy from the New Jersey State Library

are more willing to do their share of the work which is a mark of the true spirit of their profession and very encouraging to those who have the work in charge.

In all five branch and two general meetings were held during the year. At the general meeting held in the auditorium of the Newton high school on the third Saturday of May the attendance of teachers was large and the program was a good one. The members of the County Board of Education joined with the teachers in this meeting.

The program was a follows:

A. M.

Singing, "America" ..... Teachers.
Devotional Exercises..... Rev. Andrew Turner.
(Pastor of Newton M. E. Church).
Address, "Reading and Expressions"..... Mrs. Charlotte Presby.
(Vice Prin. School of Expression, New York City).
Piano Solo..... Miss Cornelia Demarest.
Address, "Teachers' Salaries"..... Hon. Chas J. Baxter, State Supt.
Business Meeting..... Teachers' Club.

P. M.

Drill..... Primary Pupils. Newton School.
Address. "Who are Responsible for the Education of the Child"
Dr. Levi H. Seeley. State Normal School.
Vocal Solo..... Miss Luella Roy.
Shakespearean Reading..... Mrs. Charlotte Presby
Business Meeting..... Board of Education.

The annual institute was held in connection with Warren county, at Newton. All Sussex county teachers were in attendance and as usual the program was a good one and greatly enjoyed by the teachers and was full of practical suggestions helpful to them in their school work if applied.

BOARDS OF EDUCATION.

Two meetings of the County Boards of Education were held. The first in the Court House, Newton, which was addressed by Hon. Henry C. Hunt on "Compulsory Education," Mr. A. E. Rutherfurd

You Are Viewing an Archived Copy from the New Jersey State Library

on "Our Teachers," and Mr. H. A. Timbrell "The Responsibilities of Boards of Education." At this meeting a constitution and by-laws were adopted and officers elected.

The second was held as stated above with the Teachers' Club.

Regular meetings of the Board will be held on the second Wednesday of December and May of each year.

SCHOOL BUILDINGS.

The year has been one of activity along this line. New buildings have been built at Hainesville in Sandyston township. Parkers in Vernon township, Clinton, Andover township, and the building at Brookside in Sandyston has been entirely remodeled.

Money has been voted for a new building at Rudeville and an addition to the Stockholm school in Hardyston township. The school at Willistine will be discontinued and the pupiils sent to Stockholm were a two roomed school will be started.

Money has also been voted for new buildings at Tuttles Corner in Sandyston township and at the Borough of Hopatcong. Several of the districts have voted considerable money for repairs.

There has been an increase of $4,500.00 in the valuation of school buildings and grounds.

LIBRARIES.

Fourteen schools have availed themselves of State aid for libraries during the year. Three new libraries have been instituted, and additions to several more.

One hundred books have been added to the Teachers' Pedagogical Library and about $50.00 raised for another addition. The whole library has been re-catalogued, marked and the books covered. There has been a large number of the books read by the teachers during the year.

EXAMINATIONS.

The required teachers' examinations have been held, and have been attended by a large number of applicants. The usual number of certificates have been issued.

The examination for grammar school diplomas was held the same as last year. Thirty-six diplomas were granted.

Effort will be made during the coming year to so arrange the

You Are Viewing an Archived Copy from the New Jersey State Library

course of study so that all the schools will take the examination. This will greatly unify the work, and help very much in the preparation for high school work.

HIGH SCHOOLS.

The Hamburg high school has been placed on the approved list as a three year high school.

Apparatus has been purchased by Stanhope and Sussex boroughs and their courses of study have been arranged so that they in the future may also be placed on the list.

A commercial course will be started in the Franklin Furnace high school at the beginning of the term. This seems to me to be a wise course taken by the school authorities as it will have a tendency to keep in school many who left for business courses elsewhere. In time this may be supplemented by a manual training course.

COMMENCEMENTS AND ALUMNI MEETINGS.

The usual number of commencements were held in the different schools a number of which we attended. Addresses were made at Sussex Borough, Hamburg, Franklin Furnance, and Beemerville.

Sparta and Newton have thriving Alumni Associations, and their meetings were very largely attended.

VISITATIONS.

All the schools in the county were visited twice during the year except Borough of Hopatcong and Newton. In all two hundred and eighty-seven visits were made to schools, and thirty-two to Boards of Education.

All Boards of Education were visited, except Borough of Hopatcong just before the annual school election, the conditions of the schools and their needs discussed and appropriations were asked of the people accordingly.

In conclusion kindly except many thanks for the many favors shown during the year by you and your able assistants.

You Are Viewing an Archived Copy from the New Jersey State Library

UNION COUNTY.

WM. J. SHEARER, SUPERINTENDENT.

Hon. Chas. J. Baxter, State Superintendent, Trenton, N. J.

DEAR SIR—During the past year the schools have made substantial progress upon several lines.

It has been my effort to build up several high school centers, that all pupils in the county might have the benefit of a course in a well-graded high school. (1). Fanwood and Scotch Plains closed their high school departments and sent to Plainfield. (2). Garwood and Mountainside sent to Westfield. (3). Linden and part of Union township sent to Elizabeth. (4). Unionville and the rest of Union township sent to Springfield. (5). New Providence Borough sent to Summit. (6). Clark township sent to Rahway. I believe that the pupils of few, if any counties have a better chance to get an excellent high school education.

Almost all districts have given their teachers a good increase in salaries and better qualifications and work is being demanded.

The larger districts are making an honest effort to enforce the compulsory school law and in another year there will be an interesting report concerning this matter.

During the year seven districts have adopted the Gill School City. The interest of the pupils and teachers and the results already apparent convince all that before long the schools of our State will have the benefit of this or a similar plan for teaching practical civics and practical morals.

At an expense of $60,000.00, Roselle completed a new building and within a month it is expected that Roselle Park will have appropriated money for a similar building. A number of additions have also been made.

You Are Viewing an Archived Copy from the New Jersey State Library

WARREN COUNTY.

F. T. ATWOOD, SUPERINTENDENT.

To Hon. Charles J. Baxter, State Superintendent:

DEAR SIR—The people of this county are taking advantage of the splendid educational opportunities given them by the school laws which have been recently enacted. The patrons of the schools in the rural communities see that successful efforts are being made to give them school privileges equal with those of the larger towns and boroughs.

Our percentage of attendance, as shown by the statistical report, is 92.2 per cent. Blanks were sent to each teacher in the rural schools for the purpose of reporting to the Board of Education the names of pupils in the school district of school age who were not enrolled, and also those whose attendance was not satisfactory. These reports were given to the truant officers to aid them in the discharge of their duties. The consolidation and the transportation of pupils also has a tendency to increase the percentage of attendance. In Harmony Township the Board of Education has decided to transport about twenty children from Harker's Hollow to Lower Harmony, a distance of between two and three miles. Before this it has been impossible for many of these children to attend school during the winter months. The Dunnfield school has been closed and the children are being transported to Columbia, where a graded school has been established. There are other places where the school authorities are studying ways and means to furnish better school facilities for children who live too far from school.

The school at Delaware Park has been enlarged by the building of a new room, and an additional teacher was installed in March. The taxpayers of Harmony have voted the necessary funds for the erection of a new two-room building at Brainards. The Board of Education of Allamuchy has found it necessary to employ an additional teacher in order to give the pupils adequate advantages. The Phillipsburg Board of School Estimate has appropriated thirty-five thousand dollars ($35,000.00) for a new eight-room brick school house in the sixth ward.

You Are Viewing an Archived Copy from the New Jersey State Library

The Belvidere and Hackettstown High Schools have been placed upon the list of approved high schools. There are now four approved high schools with four year courses in the county—Belvidere, Hackettstown, Phillipsburg and Washington Borough. These schools give four educational centers, which cover the entire county with the exception of the northern part. We need one more center to give all the pupils the advantage of a high school education. The pupils in the section of the county within reach of the high schools are taking advantage of the free tuition and free transportation, and the high schools are taxed to the limit to accommodate all who apply. In Northern Warren, however, it is impossible for pupils to reach any one of the approved high schools and return home the same day. With a high school at Blairstown all the pupils would have high school privileges. The Blairstown Board of Education is planning to establish a high school.

The Warren County Teachers' Association held helpful meetings at Belvidere and Washington. The grade of certificates held by the teachers is steadily being raised, and the added number of Normal and college graduates teaching in the schools is encouraging.

One hundred and twenty-nine pupils were granted grammar grade certificates at the examination held May 16 and 17. A larger percentage of these pupils have entered high schools than ever before.

The County School Board Association has held two meetings as required by law, and school matters have been discussed in a manner beneficial to those responsible for our school.

Arbor Day and Bird Day and Flag Day were observed in the spirit of the law.

Every district in the county voted a district tax for the support of the schools. The total amount voted is seventy-seven thousand six hundred and seventy-six dollars and forty cents ($77,676.40), an increase of nearly ten thousand dollars ($10,000.00).

Reports of City Superintendents and Supervising Principals

You Are Viewing an Archived Copy from the New Jersey State Library

Reports of City Superintendents and Supervising Principals

ASBURY PARK.

FRED. S. SHEPHERD, SUPERINTENDENT.

Honorable Chas. J. Baxter, State Superintendent of Public Instruction, Trenton, N. J.:

DEAR SIR—The past year marks a great change and development in the school system of Asbury Park through the annexation of a portion of the school district of Neptune Township.

There have been enrolled 1,154 pupils more during the past year than during the year before. There have been added also to the teaching force twenty-two more teachers. The total enrollment during the past year has been 1,985, as compared with 831 the year before. The number of teachers in the corps has been 52, as compared with 30 the year before. Our expenditures have increased from $34,532.57 for the year ending June 30, 1906, to $57,663.05 for the year just closed.

The increase in enrollment has been largely in the elementary schools, although the enrollment in the High School has increased 26 per cent., or from 135 to 170.

It is no easy task to graft upon a school system a branch larger than the original trunk. However, we believe the task has been accomplished with a fair degree of success. It has been done through the hearty co-operation and strenuous efforts of all teachers in the corps.

We found in the territory annexed no kindergartens. One, however, was instituted in the Prospect Avenue School, taking the place there of the sub-primary. Next year the remaining two sub-primary classes will be transformed in kindergartens, one of which is for white and the other for colored children. With this change, the sub-primaries in the schools of Asbury Park will be kindergarten in

You Are Viewing an Archived Copy from the New Jersey State Library

nature. We have this past year, therefore, increased the number of kindergarten teachers by two, having had four such teachers.

Previous to said annexation, several hundred pupils from the annexed territory attended the Neptune Township High School building. In addition to this number a considerable number of the children in the annexed territory were on part time before coming under the jurisdiction of Asbury Park. Altogether, we found on our hands the first of September, about 650 children unprovided with seats. Notwithstanding this condition was forseen, at the time annexation took place some months before, it was impossible to provide rooms or buildings for them. We were forced, therefore, to accommodate them in the buildings available and to put about 60 per cent. of the pupils enrolled in the elementary schools on part time. This has been an unfortunate state of affairs, although we have been surprised at the smoothness with which the system worked. Both teachers and pupils have, of course, been hampered and, in some directions, we have been unable to accomplish as much as could have been done had said 60 per cent. been attending school five hours a day instead of four.

The Board of Education have labored strenuously since a year ago this past June to secure additional school buildings for the annexed territory, with the hope of having them ready for the opening of schools next September. As is usual under such conditions, however, delays have been many and apparently unavoidable. However, plans for new buildings have been ready for some time and the work of construction is waiting merely for the sale of school bonds. The City Council has authorized the issue of $100,000 worth of school bonds with the proceeds of which there will be erected, at the corner of Third avenue and Pine street, a beautiful, well-equipped, ten-room building, which, with very few changes, can be transformed, if necessary, into a fifteen-room building. There will also be added to the Prospect Avenue School (No. 5) four rooms. It is hoped that these buildings will be ready for occupation by the middle of the coming school year. Until then we shall be compelled to organize our system with 60 per cent. to 70 per cent. of the classes below the High School on part time.

For several years past the teachers in our High School have been overloaded with recitations. Added numbers this year have only increased their burdens. The Board of Education, therefore, have thought wise to add to the High School corps two more teachers.

You Are Viewing an Archived Copy from the New Jersey State Library

To reduce the size of the classes in the elementary grades, we have engaged for next year seven additional teachers.

One additional teacher has been employed also in the Manual Training department for next year.

With the increase in our teaching force from 52 to 60 for the coming year, we have the means for doing excellent work, as soon as the new buildings are completed and all classes can be given full time.

It was to be expected, possibly, that under the conditions, both regularity and promptness of attendance would suffer. We have found this to be the case, the average daily attendance falling from 94.63 per cent. for the year 1905-1906 to 92.587 per cent. for the year just closed, while the tardiness has risen from .0227 per cent. cases per day for each teacher to .0974 per cent. This increase both in tardiness and irregularity of attendance has been in the face of the fact that more than usual efforts have been made to secure better results. In our efforts to enforce the compulsory education law, seven arrests of parents were made. The effect of this has been salutary and we feel sure will help materially this coming year to better the attendance in our schools. A local census, taken under the direction of the City Council last May, will also contribute to the rigid enforcement next fall, upon the opening of the school, of the compulsory education law. Without a census it is, of course, impossible to tell whether all children are in school who ought to be in school. We can only in such cases enforce the law against those who have once been enrolled in the school and then will not attend.

It would be a great convenience to the schools could there be another publication of the school laws of New Jersey up to date. The last separate publication of the school laws was the edition of 1903. Numerous additions and amendments have been made since then. It is desirable, therefore, that a new edition of the school laws should be issued.

It is very gratifying to the faculty of our High School that so large a percentage of our graduates seek a college, or normal training. The following table shows the per cent. of each graduating class beginning with that of 1900 entering college or some other institution of higher grade than the High School:

Class of 1900.....40 per cent.
Class of 1901.....75 per cent.

You Are Viewing an Archived Copy from the New Jersey State Library

Class of 1902.....46 2-3 per cent.
Class of 1903.....50 per cent.
Class of 1904.....55 5-11 per cent.
Class of 1905.....63 7-11 per cent.
Class of 1906.....80 per cent.
Class of 1907.....70 per cent.

Of the class of ten just graduated, one will enter Harvard; one, Amherst; one, Trinity; one, Columbia; one, Princeton; one Bryn Mawr; and one the Trenton Normal School. The remaining 30 per cent. are planning kindergarten, art or college courses, but are not yet settled in their plans.

When these last graduates mentioned are settled next year in the respective colleges, the Asbury Park High School will be represented by one or more students in the following colleges: Harvard, Smith, Wellesley, Amherst, Syracuse, Columbia, Barnard, Princeton, University of Pennsylvania, Swarthmore, and Bryn Mawr. Two of the class of 1903 have just graduated from Adelphi College. Of the class of 1906 all will be in college next fall. Within the last few years several of our graduates have graduated from the New York Law School.

ATLANTIC CITY.

CHAS. B. BOYER, SUPERINTENDENT.

Hon. C. J. Baxter, Trenton, N. J.:

MY DEAR SIR—I would herewith submit my annual report for the school year ending June 30, 1907. The following table shows the enrollment and attendance of pupils, and the number of teachers employed during the year 1906-1907:

Total number of pupils enrolled..... 6,173
Average number of pupils enrolled..... 4,636
Average daily attendance..... 4,305
Number of pupils in Primary Department..... 4,292
Number of pupils in Grammar Department.... 1,485
Number of pupils in High School..... 396
Number of teachers employed..... 146

You Are Viewing an Archived Copy from the New Jersey State Library

The problem of supplying adequate school accommodations for all pupils who apply for admission to our schools continues to be an important one. We are now using ten large, commodious school buildings, but yet there is too much of a crowding in the lower grades.

The new school on North Indiana avenue was completed during the year, and opened for use on January 2d, 1907. This is a modern building and contains fifteen large class rooms besides an auditorium and principal's office.

The question of additional school facilities was carefully considered at a meeting of the Board of Education in May, 1907, and steps have been taken to purchase a suitable lot and erect on it a central grammar school. The ground has been purchased and plans are being prepared for the building, which will be erected on the lot adjoining the present High School building.

This building will be one of the most modern and best equipped buildings in this city, and will contain all pupils of the seventh and eighth grades. The class work will be departmental.

By drawing the pupils of the upper grammar grades from the other schools to this central grammar school, we shall be able to accommodate the pupils of the lower primary grades.

Two Medical Inspectors have been employed for the coming year, at a salary of $400.00 each. These inspectors are to visit their respective schools daily, and exclude from school all children afflicted with a contagious disease or those coming from homes where such diseases are found.

Heretofore our work in this department has been very indefinite, but with a paid force and definite plans to go by, we are sure that much good will come from a thorough medical inspection.

The salary schedule has been materially increased for the coming school year. We have not adopted a maximum and minimum salary schedule, but the salaries have been placed on a sliding scale. The lowest salary paid in the primary and grammar department being $525.00 per school year, and the highest $750.00. The school term has been increased to thirty-nine weeks and the salary paid in ten equal monthly payments. The increase to the general teachers' schedule amounted to about 16½ per cent., or about one-sixth of the former salary.

Two truant officers have been in the employ of the board during the past year, and much good has been accomplished by the same.

You Are Viewing an Archived Copy from the New Jersey State Library

The regular truants are not so numerous, but the number of indifferent and careless is quite large. The attendance during the past year could have been better had it not been for the indifferent and careless ones.

The year has been characterized by steady, quiet and earnest work. The teachers have worked hard, and have been faithful in the discharge of their duties.

The action of the Board of Education in all matters pertaining to the betterment of the schools, has been met with the approval of people, press, and City Council.

Conditions warrant us in hoping for still better results during the coming year.

BAYONNE.

J. H. CHRISTIE, SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent of Public Instruction:

DEAR SIR—I herewith submit my annual report for the year ending June 30th, 1907:

Total number pupils enrolled	8,227
Average number on roll	6,538
Average daily attendance	5,844
Attendance, per cent	89.3
Number pupils in Kindergarten	683
Number pupils enrolled in Primary	4,897
Number pupils enrolled in Grammar	2,411
Number pupils enrolled in High School	236
The Evening School enrollment	534
The Evening School, average enrollment	303
The Evening School, average attendance	245

There were graduated from—

Grammar Schools	188
High School	35

The estimated population of the city at the present time is 50,000. The rapid growth of the city and therefore of the school enrollment

You Are Viewing an Archived Copy from the New Jersey State Library

necessitates activity on the part of school authorities to provide proper accommodations for pupils.

The enrollment during the year exceeded that of last year by 451. Such a growth requires several additional teachers and several additional class rooms. The capacity of the buildings has been taxed to much discomfort during the year, which retards progress. The problem of accommodating all pupils when school opens in September will not be easy of solution. However, the plan of making class rooms in our assembly halls will be pursued until new buildings are erected.

Bids have been received for the erection of a twenty-four room building with a large auditorium which when completed will greatly relieve the crowded condition. This building will be equipped with a library, domestic science room, work shop, and basement playground. The space for outdoor playground is larger than that of any other in the city, the plot being 304 by 400 feet. During the year an addition of four class rooms was made to the high school building. Four annexes are now in use.

The city is very much in need of special schools or special classes for children to a considerable number who cannot be properly taught in the classes as at present constituted. Backward children while they should have special tuition, do not cause the anxiety that the truants or the pupils whose conduct make it necessary to separate them from other pupils, do. We have no schools for this class of children, consequently they are not receiving educational care at the hands of the public which they should and which would be for the best interest of the public.

The training class for teachers was discontinued at the opening of the year, the Board feeling that the expense was not warranted for the small number of teachers who were graduated annually. Teachers have been employed to fill vacancies who have had experience in other places and who have been trained in various State Normal schools and colleges. This has been possible from the facts that positions for the grade teachers are by custom permanent during success, also, the maximum salary for the grade teacher is higher than in many small places. While the intrinsic worth of the salary may not be higher than in many smaller places a distance from the metropolitan sections, yet it appears higher and causes teachers to seek the positions. The maximum salary for grammar grade teachers is $880 and may be reached in ten years successful teaching.

You Are Viewing an Archived Copy from the New Jersey State Library

The installation of more manual work during the year has given a stimulus to all the school work, inculcated an interest which has had a beneficial effect, and inasmuch as many will after leaving school follow industrial pursuits, it tends to keep the pupils longer in school. The manual and industrial work will be extended in the high school during the coming year so that pupils may receive one year's technical training. By so doing, part of that number who drop from high school will stay another year and thereby derive the benefit of literary training with industrial training.

BLOOMFIELD.

GEORGE MORRIS, SUPERINTENDENT.

Hon C. J. Baxter, State Superintendent:

DEAR SIR—A brief report of the principal events of the school year ending June 30th, is herewith submitted.

The completion during the year of four room additions to two of our Grammar Schools has given us much needed relief from overcrowding in the localities in which these schools were situated, but when school opend in the fall we were confronted with similar conditions in still another locality. The matter was brought to the attention of the Board of Education and a resolution promptly adopted calling upon the Board of School Estimate for funds to build and equip still another four room addition. At a meeting of that body held March 19, 1907, the amount asked for ($20,000) was unanimously voted and building operations were immediately begun. It is expected the work will be completed by January 1st, and the present indications are that there will be a class ready to occupy each of the four rooms as soon as they are finished. These conditions indicate that the healthy growth in the population of our town reported last year has in no wise abated, this statement being substantiated by the statistics of the year which show an increase of 137 in our school enrollment.

In the enforcement of the attendance law we have received the cooperation of the police department to the extent of having the assistance of an officer one day each week. This arrangement, though helpful was far from satisfactory as it frequently happened

You Are Viewing an Archived Copy from the New Jersey State Library

that we needed the officer the most on the days when he was not on duty at the schools.

Plans have been made for another year whereby an officer will be available during the entire time the schools are in session and we expect there will be a decided improvement in the matter of attendance.

For the first time in the history of Bloomfield a summer school will be organized. This school will be located in a section of the city populated largely by foreigners and will be opened on July eighth. We are planning to continue and extend the work done during the winter, emphasizing quite strongly the work in English, and at the same time to supply such environment for the children as will enable them to enjoy themselves during the summer months.

The value of the work done in our special or ungraded class has been greately increased by the addition of a course in manual training to the curriculum. This study at once became popular and was made to act as an incentive to do better work along other lines. The program for each day was arranged so that satisfactory work and conduct up to two o'clock was awarded by an hour's work in the favorite study. This plan has worked admirably and the results have been very gratifying, there having been a marked improvement in the ability of the boys to control themselves and a better quality of regular school work produced.

The pedagogical library of each school has had several new books added to it and several educational periodicals have been placed on file for the use of the teachers. Reports from principals supplemented by the observations of the superintendent indicate that these provisions are duly appreciated by the teachers and that good use is being made of them.

During the first week of June exhibits of school work were held in each building and the interest of the parents shown by the large number who embraced the opportunity to inspect the work and become better acquainted with the teachers. The exhibits were made up largely of the regular class exercises of the children and work from every pupil in the system was shown.

The increase in the amount of money received from the State for school purposes has enabled us to make some well deserved increases in salaries, this in turn resulting in fewer teachers leaving us for better paying positions.

The work of the teachers has been marked by a spirit of earnest-

You Are Viewing an Archived Copy from the New Jersey State Library

ness and fairness and conducted in such a way as to meet with a good response from the pupils.

CAMDEN.

JAS. E. BRYAN, SUPERINTENDENT.

Hon Charles J. Baxter, State Superintendent:

DEAR SIR—The annual report of the condition of the public schools of this city for the year ending June 30, 1907, is submitted herewith.

The matter of school accommodations has received consideration during the year. Early in the calendar year Council authorized an issue of bonds for school buildings. The issue of $200,000 at 4 per cent. interest, was sold at 101.137.

Plans were immediately prepared and work begun on four new buildings, as follows:

A 15 room building at Third and State Streets.
A 15 room building at Wildwood and Princess Aves.
A 15 room building at Cambridge Street and River Avenue to replace the Washington School.
An 8 room building at Eighth and Florence Streets.

In addition to these new buildings, a four room addition to the Mickle Grammar School at Fillmore and Vanhook Streets is being built.

It is expected that all of these buildings will be ready for use between October 15 and December 1.

The new school at Third and State Streets will become the normal and model school, to which all of the normal training work will be transferred and thus afford much needed relief to the High School.

The new buildings will provide 44 or 45 class rooms and 8 or 9 other rooms for manual training and kindergarten purposes, in addition to the rooms for the normal training school. The immediate needs will require about one-half of this number of rooms, leaving

You Are Viewing an Archived Copy from the New Jersey State Library

20 or more rooms for the needs of the next year or two in those localities.

The revised course of study for the Manual Training and High School is herewith enclosed.

The regular work of the schools has been carried forward with satisfactory progress during the year.

In some of the schools much interest has been developed in certain sociological phases of the work. In the North East School, Miss Mary A. Burrough, principal, a "School City" has been organized and the pupils have conducted many of the school activities. To quote from the school's report—"The conduct of the pupils in the school yard and the cleanliness and general appearance of the yard desire to beautify the grounds. A plot from which an old building were placed under the control of the School City. This led to a had been removed had been an unsightly spot for more than a year. The pupils of one of the city wards removed the broken bricks, leveled the ground, procured good earth from a distance of several squares, and arranged a bed of geraniums of nearly a hundred plants, of which thirty were donated and the rest purchased by the pupils. The pupils of another ward arranged a circular flower bed of nasturtiums, scarlet sage, petunias, sweet alyssum, and geraniums."

The report further states that "the effect of the experiment has been beneficial to the school. The officers have nearly all taken their duties seriously, and the school city has probably had fewer departures from a high standard than many places under actual city government."

In the Mulford School a very interesting experiment in the teaching of "Home Economics" has been made. The school enrolls a very considerable proportion of foreign children and the principal is much impressed with the far-reaching effects of these lessons.

The Lincoln School has a prosperous school garden association. Having practically no ground around the school building, the pupils cultivate garden plots at home.

In spite of the unfavorable weather, their garden products formed a part of the annual school exhibition and excited much interest. It is planned to hold another exhibition of school garden products in the fall to show the work of the summer.

Some other schools have been interested in similar work of an equally commendable nature.

You Are Viewing an Archived Copy from the New Jersey State Library

Much attention has been paid to the development of the physical training. The recess periods have been made more beneficial in some of the schools, notably the Kaighn.

The Grammar Schools have been conducting their athletics through the "Grammar School Athletic League" for two years or more. The league is under the supervision of the director of physical training, and thus far, the results have been altogether good.

In the High School, a most successful student organization conducts nearly all school activities outside of the class room.

ENGLEWOOD.

ELMER C. SHERMAN, SUPERINTENDENT.

Hon C. J. Baxter, State Superintendent:

DEAR SIR—In accordance with custom I submit the following brief report of items of special interest in connection with the work of the Englewood schools for 1906-7:

The completion of the Franklin School building on January 1 gave more ample and convenient accommodations for two schools which had been inadequately housed before. The new building was constructed in part for the High School, giving room for 250 pupils. It includes a large study room which will seat that number of pupils, and eight recitation rooms of good size. The building also affords accommodations for an elementary school of about 360 pupils; together with manual training rooms, lunch rooms and offices of principal, superintendent and Board of Education. The building has much architectural beauty and is well arranged and convenient. An effort has been made to have each room artistic and thus to make the school home of the children an important factor in their aesthetic training. The entire cost of building and site has been about $125,000.

In this building the experiment was tried of having a single session daily in all grades from the Kindergarten to the High School. The session begins at 8.30 and ends in some grades at 12.30. in others at 1 and in others at 1.15. A recess of 20 minutes at eleven o'clock affords the opportunity of eating a light luncheon and there is a well-conducted restaurant in the building. The plan has worked

You Are Viewing an Archived Copy from the New Jersey State Library

well in practice though it has some disadvantages from the school standpoint. It is, however, strongly approved by the great majority of parents of the children attending this particular school and will be continued.

Manual training was introduced into our schools at the beginning of the year and good progress has been made. Contrary to the usual custom the beginning of the work was made at the bottom and extended upward. The primary teachers have shown commendable zeal in taking up the work under the direction and instruction of the supervisor. This new feature of the course has apparently the unanimous approval of the community. A detailed report of the work accompanies this.

Much thought has been given during the year to the completing and perfecting of our course of study which has been in process of evolution for some years. It has now been printed, forming a pamphlet of 112 pages. It is in one respect perhaps somewhat in advance of most courses in use in the State in that it gives a broader outlook upon world history than is usually attempted in the elementary school.

A vacation school was maintained for six weeks during July and August. Three teachers were in charge and about 100 children attended. The daily sessions were from 9 to 12. The work was largely industrial—basketry and pottery being thte principal occupations taught. The children greatly enjoyed the vacation school and were very regular in their attendance.

The evening school was continued and a new department was added—the commercial. Stenography and typewriting, book-keeping and business arithmetic were taught.

The greatest care is exercised in this city in the selection of teachers. Not only scholarship and professional knowlege and skill but to a very large degree personal qualities are taken into account. Sympathy with child nature, interest in the work of teaching for its own sake, and innate refinement are qualities that seem to us of prime importance and that we seek for. The problem of obtaining and keeping teachers of this type is becoming yearly more difficult. Other occupations furnish more attractive opportunities—financial and social. Salaries of teachers have not kept pace with increased cost of living and with the increased incomes of other workers. Those communities which would have their children taught by such

You Are Viewing an Archived Copy from the New Jersey State Library

teachers as have been described must face the need of paying more attractive salaries.

The most interesting thing in connection with our schools at present is the revolution in sentiment toward the public schools on the part of the wealthier class in the community. This has been known as a private school town. A larger proportion of children have attended private schools than in most towns of the state. The end of this school year sees the closing of all private schools except one church school and one boarding school and the entrance of a large proportion of all the private school children into the public schools. With this comes a recognition of the value of public school training by many who have in the past not believed in the public schools for their children because they knew little of them. This unity of interest not only is of great advantage to the schools but is a distinct gain to the civic life of the community.

GLOUCESTER CITY.

W. C. SULLIVAN, SUPERINTENDENT.

Hon. Chas. J. Baxter, State Superintendent, Trenton, N. J.:

DEAR SIR—Herewith is submitted a brief report of the public schools of this city.

During the year our schools were under the direction of 20 class room teachers. These were distributed as follows: High school grades, 3; grammar grades, 5; and primary grades, 12.

There is a growing sentiment in favor of employing more teachers that there may be in the primary grades a less number of pupils assigned to each, and it is likely that at least two additional teachers will be employed for the coming year, but there is also a strong sentiment in favor of employing home teachers whether or not they have had the much needed professional training and experience.

During the school year our High School was placed on the three years' approved list and we have extended the course to four years.

The advantages of a high school are beginning to be felt. Many of the graduates of last year have entered higher institutions and some are teaching.

You Are Viewing an Archived Copy from the New Jersey State Library

We have employed a very strong corps of high school instructors for next year.

During the school year there was completed a splendid brick building containing four class rooms and we are now having built a high school building of 8 class rooms, 3 recitation rooms, a Board of Education room, a principal's room, teachers' rooms, and other improvements.

We hope that this building will be ready for occupancy by Nov. 1, 1907.

HOBOKEN.

A. J. DEMAREST, SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent:

MY DEAR SIR—In compliance with law, I beg to submit the following report of the public schools of the City of Hoboken for the school year ending, June 30th, 1907.

The following table shows the enrollment and attendance of pupils and the number of teachers employed during the year 1906-1907:

Total number of pupils enrolled	10,721
Average number of pupils enrolled	8,337
Average daily attendance	7,835
Number of pupils in the Kindergarten	894
Number of pupils in the primary department	6,356
Number of pupils in the grammar department	3,176
Number of pupils in high school	295
Number of pupils in night school	543
Number of teachers employed	232

There were graduated from

Grammar Schools	254
High School	65
Training School	3

You Are Viewing an Archived Copy from the New Jersey State Library

SCHOOL ACCOMMODATIONS.

The unusual growth of Hoboken has made it very difficult to provide adequate accommodations for all those who applied during the year for admittance. A new school building is in the course of erection in the southwestern part of the city. By a redistricting of the city, it will be the means of relieving the other schools. School No. 9 will be modern in every respect and will add materially to our present school equipment. The congestion in the upper part of the city has been relieved by the addition of a wing to School No. 2.

NIGHT SCHOOL.

The night school was open for four nights each week during the months of November, December, January and February. It had an enrollment of 1299. Among these were 756 men and women of various nationalities who are learning to speak and write the English language and who are gaining important information concerning the history, government and geography of their adopted country. The expense of instructing these people in their civic duties has to be borne exclusively by our local Board of Education. It seems to me that in the spirit of justice, the state school law should be amended so as to admit persons above twenty years of age and that the state should bear its part of the burden by making an appropriation based on their attendance.

The remaining 543 were boys and girls between the ages of 14 and 20 who came for instruction in the fundamental branches. To sustain the interest of this latter class of pupils and to hold them in regular attendance is the most difficult problem connected with night schools.

The aim of our night school is to increase the usefulness and wage earning power of our girls and boys; and to give our immigrant population an opportunity to become acquainted with the workings of our government so as to make them good and useful citizens—an achievement of the greatest value to the city and State from the standpoint both of morality and economy.

FREE LECTURE COURSE.

The free lecture course given, as in previous years, under the direction of the Board of Education, has been eminently successful. The plan in vogue for the past fifteen years has been to give each

You Are Viewing an Archived Copy from the New Jersey State Library

year a course of fifteen lectures, bearing upon vital topics, at two or more central places. The lectures during last winter were well attended and highly appreciated. All persons under fifteen years of age are excluded. In some instances this works a hardship, as pupils from the grammar schools who are interested in some literary or historical topic are anxious to get the benefit of these instructive lectures. The following lectures, including travel, history, literature, science, hygiene and civics were given:

Isaac F. Smith, Literary and Historic Shrines of Boston.
Dr. John Douglas, What to do in Accidents and Emergencies.
Edward R. Perry, The Yellowstone National Park.
Emerson E. Proper, Origin and Development of the Petroleum Industry.
Frank L. Blanchard, The Making of a Newspaper.
Henry R. Rose, Humanity's Struggle for Liberty.
Henry Zick, Berlin and Military Life in Germany.
Homer C. Bristol, California and the Yosemite Valley.
B. M. Jaquish, Anthracite Coal.
J. P. Gordy, Henry Clay, the Great Compromiser.
Dr. E. B. Coburn, The Care of the Eyes.
Henry E. Northrup, Homes of the French People.
Charles T. Hill, Fighting Fire at Home and Abroad.
Mary V. Worstell, The Canyons of the Colorado.
Edwin A. Havers, The Mediterranean.
Edward H. Hall, A World's Race for a Continent.
William T. Smith, Canada.
Dr. Claude F. Walker, Wheat Country of the Northwest.

COMPULSORY EDUCATION.

The attendance of pupils during the past year has shown a marked improvement. This is largely due to the indefatigable efforts of our truant officers. School absence is a serious matter. It not only retards the progress of the classes but it promotes and fosters wrong principles in the minds of the pupils. If strenuous efforts are not made to check it, it becomes infectious. It is a strange commentary on human nature that stringent laws have to be enacted which require the services of truant officers to compel parents to educate their children. But such is the case and truant officers become a necessity.

You Are Viewing an Archived Copy from the New Jersey State Library

Number of children whose parents were visited by the truant officers	5,036
Number of truants brought to school	257
Number of truants arrested	19
Number of truants reprimanded by the Recorder	16
Number of truants on probation	2
Number of truants sent to the Reform School	1

HIGH SCHOOL.

The commercial department of the high school which has formerly been a two years' course, has been made a full four years' course. To meet the commercial demands of the times, Spanish has been added to the curriculum of the commercial department. Mr. Francis J. Trisch has been appointed as teacher of the romance languages. Two of the faculty resigned during the year. The vacancies were filled in each case by competitive examination and resulted in the selection of Mr. Arthur Wakefield, a graduate of Brown University and Mr. Augustus I. Dillon, a graduate of Amherst College. The high school notwithstanding its physical drawbacks is steadily forging ahead, is winning a coveted position of efficiency among institutions of its class; and furthermore it is meriting the esteem of the community. It is gratifying to state that our graduates in the various higher institutions of learning have and are reflecting credit upon the school.

MILLVILLE.

HARRY F. STAUFFER, SUPERINTENDENT.

Hon. Charles J. Baxter, State Superintendent:

DEAR SIR—The statistical report shows evidence of a slow increase in our school population. The question of compulsory attendance is a constant problem. The plan of employing the police officers of the city as regular truant officers has had a salutary effect. But the plan works at a disadvantage in this way—that when there is need of following up truants during school hours, the officers are not on duty. Our method for the coming year is as follows: The teachers report daily on the proper blank the names of

You Are Viewing an Archived Copy from the New Jersey State Library

all pupils who are out of school without sufficient excuse. These names are referred to the attendance committee of the Board which meets once a week. The committee through the police officers investigates all doubtful cases, and the law, with its penalties is enforced. Special effort is made to enroll children of seven years of age so that when they attain the age limit of fourteen years, if they are ordinarily capable, they will average at least the sixth or seventh grade. There is hardly any excuse for a child twelve or thirteen years old being enrolled in the first or second grade. In such cases either the parent or the school officers were negligent, or the child is physically or mentally incapable. "Idleness, aimlessness, hopelessness, helplessness, one or all combined, sums up the biography of many of these unfortunate children in after life."

The subject of Manual Training is still a standard topic for discussion, and judging from the interest of both parents and school officials, it will soon be a part of our curriculum. Great credit is due to an active Alumni Association. Two years ago Manual Training was discussed by a prominent speaker at the annual Alumni meeting. In May of this year an exhibit was held in the High School building for two days. On the evening of the first day, Dr. Leslie Miller, of the School of Industrial Art, Phila., Pa., gave an address on The Significance of the Manual Training Movement. Cape May, Vineland, Camden, Atlantic City, Hackensack, Phila. Central Manual Training School, and the School of Industrial Art generously sent specimens of their work. This was truly missionary work on their part. Arrangements are now made by the Association to hold a Fair in November for the purpose of raising funds. It is the intention to procure a sufficient amount of money, and present it to the Board of Education for use in introducing this work as they see fit.

Some changes have been made in the High School as follows: Recitation periods arranged to average forty minutes each, with seven recitations a day instead of eight; a choice of three courses with privilege of some electives, instead of two courses; Latin extended through four years in one course; Algebra studied for two years and Geometry for one year; Drawing continued in the first two years of the course and optional in the remaining two years; German begun in the second year instead of the first year; a four year Commercial Course with English throughout each year; and stenography and typewriting in the last two years. Of the five boys

You Are Viewing an Archived Copy from the New Jersey State Library

who were graduated in the Class of 1907, two were admitted into Purdue University, one into Bucknell University, one into the University of Pennsylvania, and one into the Medico-Chi-College of Philadelphia.

Drawing in charge of a capable supervisor has found a permanent place in our course of study. It is no longer an experiment nor is it a subject for criticism on the part of the taxpayer.

For the first time the pupils who were promoted from the grammar schools into the High School had public exercises. A fine program was rendered including an excellent address by the Rev. W. L. Steiner of the Presbyterian Church, and at the close each of the seventy-two pupils received a certificate. Because of the interest manifested, these exercises will no doubt become an annual affair.

The annual commencement exercises of the High School were held June 21st when five boys and twelve girls were graduated. A pleasing and instructive part of the program was an address by Dr. Louis Bevier, Jr., State High School Inspector.

The work of the grades has been carried forward without much change from that of former years.

MONTCLAIR.

Randall Spaulding, Superintendent.

Hon. C. J. Baxter, State Superintendent:

Sir—Perhaps the most conspicuous fact in our school history for the last year is the congested condition of our school accommodations due to the recent rapid growth of the town, and unusual delays in the erection of buildings. It was discovered nearly two years ago that we had reached the bonding limit for the item of school buildings, and that the bonds had been so placed that they could not be paid immediately, and in sufficient quantity, to permit the borrowing of needed money. When the law that raised assessments to their full value had come into effect legal complications arose which, at the date of this writing, have not yet been cleared away but which doubtless will be in the very near future. Overcrowding in our town does not of course mean what it does in many cities. We have always maintained that thirty-five pupils are

You Are Viewing an Archived Copy from the New Jersey State Library

quite enough for a single class. With more than this number the teachers cannot do the individual work that the community demands.

As one result of our congested condition we have come to recognize the value of the portable buildings, two of which have been in successful use during the past year. Four more have already been ordered to relieve the congestion in the high school building. It may be safely asserted that almost any school system would find two or three such buildings to be very useful. If not otherwise needed they may be used for manual training purposes, or as a gymnasium. There seems to be no difficulty with the heating and ventilation.

We have continued our policy of concentration in the 8th grade, classes in this grade being assembled in only two places in the town. This renders departmental work possible and thus provides an excellent stepping stone to the high school. This concentration goes far to obviate the necessity for the high school to dip down and take in to its own course a year from the elementary grades as is done in some localities. The advantages of this plan are obvious: specialization in the subjects taught, economy in supervision and in the use of books and apparatus, and especially in securing that esprit du corps that cannot be easily cultivated among children of extremely diverse ages who are educated altogether in the same building. The moral influence upon the pupils of this attachment and loyalty to the school is of the highest importance.

In obedience to our customary policy of engaging only professionally trained and experienced people, we have been obliged as heretofore to draw to a considerable extent from states outside of our own. As is well known there is still a shortage of supply in our own State. When our second normal school, now in process of erection, shall have come into active operation it is hoped that our demands will be more easily met. It must be remembered however, that State provision for the training of teachers has hitherto not kept pace with the growth of population; and that population, at least in the northern part of the State, is increasing now more rapidly than ever. Doubtless therefore the near future will call for even more than the two normal schools that will soon be in active service.

Our evening schools during the past year have offered increased advantages and have attracted more advanced pupils. Classes have

You Are Viewing an Archived Copy from the New Jersey State Library

been successfully conducted not only in the common school branches but also in commercial subjects, such as stenography, typewriting, civil government, and bookkeeping. These evening classes are now moving on with such momentum as to promise much larger things in the coming year.

Our high school work has been enriched in two particulars. First, the commercial course has been extended from a two to a four year course, and has been given equal dignity and weight with other courses; Second, the portion of the time devoted to music has been occupied by a course of lectures upon the great composers and their masterpieces. The lectures have been illustrated frequently with vocal, piano and violin selections rendered by the instructor and professional friends who have given their time and talent to the school. In the opinion of some our secondary schools should offer as an elective a course in music that should include harmony and counterpoint and receive due weight in winning the school's diploma and in preparation for college. Our schools have had so many things to attend to in recent years that they have been rather slow in taking up purely cultural subjects. These will doubtless come with advancing age.

NEWARK.

A. B. POLAND, CITY SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent of Public Instruction:

DEAR SIR—I take pleasure in filing the following report of the public schools of the city of Newark, for the year 1905-1906.

The receipts and expenditures for the year were as follows:

RECEIPTS.

STATE.

Appropriation	$28,446.09	
Appropriation	177,527.47	
School Tax	302,523.07	
Manual Training	5,000.00	
School Library Fund	100.00	
		$513,596.63

You Are Viewing an Archived Copy from the New Jersey State Library

MUNICIPAL.

Balance from 1905	$27,083.85	
Common Council Tax Ordinance	900,271.37	
Common Council Contingent Fund	50,000.00	
Common Council Manual Training	5,000.00	
Cash deposited with Custodian	4,034.84	
Interest	686.24	
Truancy Fines	85.00	
Interest on Bequest	240.00	
		$987,401.30
Total		$1,500,997.93

EXPENDITURES.

STATE.

Teachers' Salaries	$508,496.63	
Manual Training	5,000.00	
School Library Fund	100.00	

MUNICIPAL.

Salaries, Text Books, Repairs Furniture, Heating, Fuel, etc	966,455.98	
		$1.480,052.61
Balance		$20,945.32

MANUAL TRAINING.

RECEIPTS.

From State	$5,000.00	
From Common Council	5,000.00	
Appropriations, 1906	22,425.31	
		$32,425.31

EXPENDITURES.

Teachers' Salaries	$23,046.65	
Equipment, Supplies, etc	9,378.66	
		$32,425.31

SCHOOL BUILDINGS.

There are at present sixty-two school buildings. Of this number fifty-five are owned and seven rented by the city. In addition to the above six portable buildings are in use. The total present seating capacity in all these buildings is forty-nine thousand, three hundred ninety-nine.

You Are Viewing an Archived Copy from the New Jersey State Library

TEACHERS.

The whole number of teachers employed was as follows:

Day School	1,184
Evening Schools	253
Summer Schools	280
Playgrounds	61
Total	1,778

ENROLLMENT

The total enrollment in our schools during the year of this report was as follows:

	Males	Females	Total
Day Schools	25,903	25,783	51,686
Evening Schools	7,551	3,112	10,663
Summer Schools	4,990	5.309	10,299
Totals	38,444	34,204	72,648

FREE LECTURES FOR THE PEOPLE.

The free lecture courses, which have been maintained by the Board of Education for a number of years, were reorganized this season upon a different basis.

Heretofore special courses have been given in each of the evening schools during the fall and winter, and one general course at the central point of the city, usually in the First Presbyterian Church on Broad street. The courses given at the schools were intended chiefly for the pupils of the evening schools, and were patronized by few others. For that reason these lectures dealt with a rather narrow field of subjects, and were somewhat juvenile in character. The completion this year of several new school buildings each equipped with a large and suitable auditorium, afforded for the first time an opportunity to open several lecture courses for the general public as well as for the pupils of the evening schools.

The appreciation of these lecture courses has been in the main satisfactory. Good sized audiences, consisting of adults as well as of children, have greeted most of the lecturers.

SUPPLY AND DEMAND OF TEACHERS.

A departure was taken this year from the policy of the Board in previous years, by engaging in the month of June twelve or more teachers to begin work at the opening of the fall term in September. Owing to the fact that most Boards of Education begin early in the year to select their teachers for the following school year, it became necessary for us to do the same, or to supply our deficiencies in the fall by taking the "left-overs" who had failed to secure positions elsewhere. Believing that we should need to employ several teachers from the outside when school opened in the fall, I recommended the pre-engagement in June of not less than twelve competent and experienced teachers, the best that could be got.

The Board adopted this recommendation and authorized the city superintendent to engage twelve teachers in June to begin work in September. As a result, we were able to secure that number of experienced candidates, among them several from East Orange, Montclair, and neighboring school districts. This policy was so successful that it should be continued this year and in future years, so long as our local supply is likely to prove inadequate.

The dearth of qualified school teachers is felt at this time in all parts of the country. It is due, no doubt, to the greater exactions by the rules of Boards of Education in respect to licenses, and to the large field of opportunity now enjoyed by young women who

You Are Viewing an Archived Copy from the New Jersey State Library

have to support themselves. So long as school teaching offered to women the highest inducement for self support, and so long as most other vocations were closed to women, we had an over supply of candidates to fill teaching positions. But during the past few years, the supply of candidates for teaching has constantly diminished until in many places it is difficult, in fact almost impossible, to secure sufficient number of properly qualified teachers to conduct the schools. Cities that have raised their salary schedules above the schedules of their neighbors have, of course, suffered least. Our salary schedule is such that we can secure teachers from most neighboring communities. But with the raising of salaries in other communities, which is happening daily, our means of supply is constantly growing smaller. I have alluded to the possible increase of supply likely to arise from the establishment of a State Normal School at Montclair Heights in this county.

I do not believe, however, that we shall get much help from this source. The graduates of this institution will be absorbed by the schools in the districts where they reside, owing to the greater cheapness of living at home.

School teaching must be made more attractive or more remunerative, or both, in order to enable us to secure from year to year a supply of properly qualified persons to fill the vacancies that arise in our teaching corps, and to take the new positions created by the growth of our school system.

NEW BRUNSWICK.

William Clinton Armstrong, Superintendent.

To the Honorable Chas. J. Baxter, State Superintendent:

Dear Sir—I hereby respectfully submit my ninth annual report on the condition and progress of the public schools of this city for the year ending June 30, 1907.

ENROLLMENT AND ATTENDANCE.

Various items of information concerning the schools of this city, during the year 1906-1907, are presented in tabular form:

You Are Viewing an Archived Copy from the New Jersey State Library

Pupils enrolled in day school	2,834
Average number enrolled in day school	2,327
Average daily attendance	2,206
Pupils in kindergarten	85
Pupils in primary department	1,479
Pupils in grammar department	919
Pupils in high school	351
Pupils in night school	176
Teachers employed	70

The High School department enrolled 351 pupils; of these, 267 live within the city limits; and 83 of them were non-resident pupils whose tuition was paid for by township or borough.

Helmetta sent two pupils, Sayreville two, North Brunswick six, South Brunswick seven, East Brunswick seven, Franklin ten, Raritan fourteen, Milltown fourteen, and Highland Park twenty-one. Fifteen of these tuition pupils dropped out of school during the year.

The increasing number of non-resident pupils who seek the advantages of our city High School is due to several causes, among which may be mentioned the convenience of access by trolley, and the fact that the law requires all school districts to furnish High School instruction to those of their pupils who are prepared for it, and the further fact that the cost of tuition and of transportation is to be paid in large part by the district.

TRUANCY.

Our Board of Education began to enforce the law against truants and non-attendants in October, 1904, by securing from the police department the services of a regular officer, so that we have now finished the third year in our endeavor to carry out the requirements and provisions of the State law on that subject. The number of cases reported to the truant officer and investigated by him during the past year was one hundred thirty-two; in a few cases the same pupil was reported several times, the total number of pupils reported was one hundred seventeen.

We have achieved a fair degree of success. It may be well to mention two or three of the difficulties which we have encountered. One drawback is the difficulty we have in obtaining prompt and accurate information concerning the older children of those fam-

You Are Viewing an Archived Copy from the New Jersey State Library

ilies which move into the city from distant points during the school year. The parents of those children who entered school in September sometimes withdraw their children during the winter and spring for the most trivial reasons, and then, when visited by the truant officer, try to excuse themselves by offering false pleas of sickness and ill-health. Again, some households are divided, and the husband and wife each seeks to throw the responsibility upon the other. In some cases it is impossible to prove the exact age of a truant. In other cases, if the father be committed to prison, the direct result is to throw the mother and all the children upon the town for support.

Notwithstanding all these obstacles, the law produces good results and is being enforced with greater and greater thoroughness.

SALARIES.

The efficiency of the schools has been much impaired during the past year by the resignation of able and experienced teachers, some of whom withdrew entirely from the profession, but others were attracted to neighboring cities by a substantial increase in their salary.

Every one rejoices to see meritorious teachers secure additional compensation; nevertheless, their departure is a serious detriment to the schools of our city, the Board of Education being compelled to engage inexperienced teachers to fill the vacancies thus unexpectedly caused during the school term.

This matter has been the subject of earnest discussion both within the Board of Education and among the corps of teachers.

One immediate result of the discussion was that the Board of Education repealed that section of the by-laws which permitted a teacher to terminate her contract by giving four weeks' notice.

The Board of School Estimate met on the evening of Friday, May 31, 1907. The following budget was adopted for the maintenance of the Public Schools during the ensuing year:

DISBURSEMENTS.

Teachers' salaries	$49,576 09
Janitors' salaries	4,977 00
Books and Stationery	4,500 00
Buildings and Repairs	2,000 00

You Are Viewing an Archived Copy from the New Jersey State Library

Fuel, Light and Water	3,000 00
Bonds Falling Due	2,000 00
Interest	2,465 00
Night School	1,150 00
Secretary	400 00
Pension	367 50
Incidentals	300 00
Commencement	225 00
Library	100 00
Redemption of Bonds	480 00
Total	$71,540 59

RECEIPTS.

Amount to be paid by city	$42,116 85
Amount from State	26,923 74
From tuition fees, estimated	2,500 00
Total	$71,540 59

The Board of Education had met on May 22, 1907, and had prepared an itemized list of the various amounts which it considered necessary for the schools. When we compare the amounts thus asked for by the Board of Education with the amounts granted by the Board of School Estimate, we find that the Board of Estimate granted for teachers' salaries $1,576.09 more than had been asked for; $48,000.00 was asked; $49,576.09 was granted. This liberality was a manifestation, on the part of the Board of School Estimate, of an earnest desire that the salaries of the public school teachers in this city should be increased in order that the efficiency of the schools might not be diminished.

And as a direct result of this liberality, it gives me great pleasure to record here the fact that the salaries of the teachers of this city have been twice increased during the past school year, by the Board of Education.

In July, 1906, a general increase of about $25.00 a year for each teacher was voted; and in June, 1907, another similar increase was made. That in July, 1906, was rendered possible by the fact that the Board of Education had on hand several unexpended balances which could be transferred to the teachers' salary account. This

You Are Viewing an Archived Copy from the New Jersey State Library

reserve was exhaused during the current year; and the Board of Education in making up its estimate for the ensuing year asked for $48,000.00, a sum sufficient to change the temporary increase into a permanent and regular salary. But the Board of School Estimate did better than that; it was the unexpected grant of $1,576.09 that enabled the Board of Education to make the second general increase.

In a general way, the schedule of salaries which takes effect in September, 1907, may be given as follows:

$2,500—Superintendent.
$1,500—High School Principal.
$950 to $800—Women Principals.
$975—High School men instructors.
$875—High School women instructors.
$850—High School, first year's service.
$650—Eight-year classes.
$625—Seventh-year classes.
$575—Sixth-year classes.
$575—Fifth-year classes.
$525—Fourth, third and second-year classes.
$550—First-year classes.
$625—Kindergarten.
$450—First year's service.

The salary of women principals varies largely, but not entirely according to the number of classrooms under their supervision.

PHYSICAL LABORATORY.

The facilities for instruction in science in the High School have been greatly improved.

The front room on the second floor, which for a number of years had been used both by the classes in Physics and by the classes in Chemistry, has been devoted exclusively to Physics. The chairs, the teacher's table and the chemical stands have been entirely removed, and the room has been equipped with six standard laboratory tables for the use of the pupils in Physics. Each table is six feet by four and accommodates four pupils at work.

A lecture table, suitably furnished, arranged and connected, was also purchased for demonstrations by the instructor and placed in

You Are Viewing an Archived Copy from the New Jersey State Library

Room 8, which has been devoted to recitations and chemical experiments.

Among the intruments which have been added to our equipment in Physics may be mentioned the Cenco Triple-beam Balance, a Resistance box accurate to one-fifth of one per cent., the Wimshurst Static Machine, and a Galvanometer volt and ammeter.

Thus the first step has been taken in the plan of readjustment which has within its scope the setting aside of one classroom exclusively for chemical experiments and another classroom for purposes of demonstration and recitation; which plan, when completed, will devote three rooms to the exclusive use of the two sciences named.

ORANGE.

JAMES G. RIGGS, SUPERINTENDENT.

Supt. Charles J. Baxter, Trenton, N. J.:

DEAR SIR—I have the honor to transmit, herewith, the report of the condition of the schools of Orange for the year 1906-1907.

The statistical table of enrollment and attendance is as follows:

Total number of days the schools were kept open	188
Total number enrolled	4,177
Average daily attendance	2,948
Percentage of attendance	.9428
Number of cases of tardiness	1,527
Number enrolled in Kindergarten	597
Number enrolled in Primary Grades	2,509
Number enrolled in Grammar Grades	888
Number enrolled in High School	183
Number of teachers employed	113

The most notable event of the year was the dedication of the new High School Building. This building is colonial in style, simple in arrangement and modern in all its fittings. The seating capacity is 290, which is 130 more than in the old building. There are

You Are Viewing an Archived Copy from the New Jersey State Library

rooms for drawing, carpentry, cooking, commercial branches and gymnastics. The auditorium will seat 350.

Through the generosity of citizens and the efforts of pupils in raising money, the building is provided with a good number of pictures and plaster casts. The Alumni have been active in fostering interest in the High School and are looking forward to offering a free scholarship in any college to a worthy student.

It is hoped that more pupils will wish to complete a High School course under the favorable conditions which the new building provides. Two aims are paramount: to fit for any college, and to give a broad training to those who do not contemplate a college course.

The Day Street building, which is about to be vacated by the High School, will be remodelled and refitted for use as a grammar school. This will, in a measure, relieve the congestion in the schools where it has been necessary to maintain twenty-four single session classes. The foreign population has increased beyond the capacity of the schools to accommodate them, but early measures will be taken to solve the problem.

An excellent exhibit of Manual Training work was sent to the Jamestown exhibition. This is a branch in which the children take great pleasure and the results amply justify the expense of the Department.

In three of the six ward schools, the "School City Plan" has been introduced, under the direction of the Principals, with gratifying results. It has taken some little time, but it has accomplished much to inculcate a right spirit in the school, a proper attitude toward school affairs and an intelligent conception of public matters. If the promise of efficiency which the year has shown shall be continued, the School City may well have the serious consideration of the State authorities, looking toward a more general adoption.

Throughout the year interest in local history has grown. There is an abundance of material in facts and locations, which has added to the One Hundredth Anniversary plans, culminating in nearly a week of celebration. On Flag Day a statue of the Dispatch Rider in bronze, by F. E. Elwell, was unveiled, with appropriate ceremonies. The public schools took suitable part in the various programmes, closing for the final one on June 14th.

The employment of a School Nurse is an innovation which was begun late last year. As the work may be of interest, the final report of the nurse to the Superintendent is inserted in full:

You Are Viewing an Archived Copy from the New Jersey State Library

"Looking back over the past year the results of the Nurse's work in the schools are quite apparent. On entering the class rooms, particularly of the lower grades, in the schools of the congested districts, one is impressed by the air of neatness and cleanliness of the majority of the children, a condition which was the reverse a year ago.

"Perhaps a brief outline of a morning's work will be of interest. Beginning with the Kindergarten, a chair in the circle is taken and after greetings and many bits of information, spontaneously imparted, such as, 'I had a bath,' 'my mother put kerosene on my hair,' 'I have a clean dress,' and others more or less entertaining, each child comes to her in turn, showing hands and wrists. A careful and quick inspection is made. Face, eyes, hair, hands and arms are scrutinized; dirty hands or neck or untidy clothing are commented upon, but a child who has some skin disease, pediculi, or a suspicion of illness, is taken from the room and treated or sent home as the occasion requires.

"After the inspection, a few minutes are devoted to a talk on cleanliness, much of which is repeated at home. Sometimes she remains awhile and is quite flattered when chosen by a child to take part in a game. The time is well spent, as in this way the confidence of the children is gained, for no child will ever be afraid of a nurse who has skipped in the circle of the Kindergarten, that magic leveller of race and station.

"In the class rooms, the children either pass before her for inspection, or she walks through the aisles, glancing meanwhile at the work, and a word of commendation from her is generally highly desired, whether given for clean hands or a neat paper; while the children are subjected to practically the same scrutiny as in the Kindergarten, it is rather less public, and care is taken to prevent the class from learning unpleasant details. Short talks on the care of the hair, nails, teeth and skin, and in the higher classes, on the value of fresh air and cleanliness in the prevention of disease are given. Handkerchiefs are counted, and it is quite a revelation to see how few there were the first day, and the increase in number on subsequent days.

"The children in the grades, from the Fourth up, do not require as frequent inspection as the little ones, but there is a general feeling of freedom in consulting the Nurse, when she is in the building.

You Are Viewing an Archived Copy from the New Jersey State Library

While much of the work done cannot be put in figures, the few that follow may be of interest.

"At the beginning of the school year 1,787 children were examined as to sight and hearing. The sight of 1,316 was found to be normal. One hundred and fifty notices were sent to parents, 67 of which received attention, resulting in 31 children obtaining eyeglasses, one operation on the eye, and several operations for the removal of enlarged tonsils and adenoids. Nine hundred and fifty dressings have been recorded. The various troubles requiring treatment, being impetigo, ringworm, pediculosis, infected wounds and simple cuts and abrasions. Many children have consulted physicians by the advice of the Nurse and a number of homes visited.

"The work is new and the system is being constantly improved, but as experience is the best of teachers, doubtless next year the work will be made more profitable. A great convenience would be a small room in each school to be used for this work, where warm water could be obtained, as that would make much easier the work of teaching the children how to care for themselves properly at home."

In general, there has been quiet and steady work throughout the year.

PASSAIC.

O. I. Woodley, Superintendent.

Hon. Chas. J. Baxter, Trenton, N. J.:

My Dear Mr. Baxter—Our schools closed on June 21st, after a very pleasant and earnest year. In many ways, the results lead me to believe that it has been the best year since I have been connected with the Passaic schools. The teachers, as a body, have worked earnestly for "the whole boy in a whole school." I have never known of a body of teachers doing more outside of mere academic construction than has been done here during the current year.

Owing to the rapid increase in population, we have had difficulty in providing sittings for all of our pupils. One thousand two hundred of primary pupils have been obliged to get along on a school day of four hours. The citizens have appreciated the condi-

You Are Viewing an Archived Copy from the New Jersey State Library

tions, and have provided means for the erection of sufficient buildings to accommodate all pupils in the city.

On Monday of this week the final transfer was made of land to the Board of Education for a High School site. Steps will be taken at once, looking to the erection of a suitable building for this important part of school work. The place that the High School occupies in this State and the liberal appropriation made for the High School by the State Board of Education augment very much a natural local interest in higher education.

One year ago the Board of Education changed the schedule of salaries for teachers, giving a substantial increase to Principals, and raising the maximum of grade teachers to $800, with an annual increase of $50. This expression on the part of the Board of Education was appreciated very much by the teachers, with the result that only four have tendered their resignation at the end of this year. A much smaller number than for many years. Only teachers of experience, with the exception of home girls, are employed, and all must have the credentials showing them to be entitled to a first grade city certificate.

No marked feature has characterized the course of study this year. The aim has been to maintain a good level of work rather than exceptional strength in book subjects. The outlook for the coming year is very promising, and with much basis for believing that next year will be the best in the history of the schools. An earnest helpful public spirit prevails, which, in a way, is a large element in our hope.

PERTH AMBOY.

S. E. SHULL, SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent:

DEAR SIR—That our prophetic spirit is not to be taken too seriously is evidenced by the failure of some of our effusions to materialize during the year. Among other things of a quite satisfactory appearance at the beginning of the year was that of the permanency of our teaching corps. We thought a newly adopted salary schedule would both hold the teachers we then had and serve to win back some we

You Are Viewing an Archived Copy from the New Jersey State Library

had lost. How vain our thoughts! Before the close of the year we put in force two additional schedules of salary, each an improvement on its predecessor. However, with all of our scheduling we had twenty-three teachers, about one-fourth of our entire force, on our roll at the close of the year who were not in our employ at the opening of the schools in September. It is needless to remark upon the effect on the schools of this out-flowing tide of teachers.

Among other things that the year's experience has effectually impressed upon our minds are the following:

1. Self-respecting teachers are not satisfied—they ought not to be—with a bare hand-to-mouth existence.
2. If this or any other community is in the market for good teachers, it can procure what it is after if wise enough to pay the price.
3. It pays to pay the price.

Our salary schedule for the year 1907-1908 has been increased twenty percentum over the last one of the past year. As a result of this increase, a number of our former teachers are going to return, and those of the present force who purpose continuing in the profession have engaged to remain.

At the beginning of the year a medical inspector was employed by the Board of Education. During this time he has kept in close touch with the sanitary conditions of the buildings, and has closely looked after the health of the school children. Many pupils were found with abnormal eye, ear and nose conditions, a report in each case being sent to parents or guardians. It was surprising, almost astonishing, to learn of the great number of children thus afflicted.

In nearly all of the cases discovered by the inspector it was found that parents had no suspicion of their children's afflictions. Many pupils effected have been entirely cured of their weakness, while many others showed improvement under treatment. Incidentally, betterment in the physical condition of these pupils was followed by improvement in their school work and conduct. Viewed from any standpoint at all, we feel that the benefits derived from medical inspection are beyond human calculation and justify the cost many times over.

Our attendance last year was very seriously effected by the prevalence of scarlet fever and diphtheria during the last three months of the school term. Both diseases made their appearance again this

You Are Viewing an Archived Copy from the New Jersey State Library

year, but through the vigilance of the medical inspector they secured a very slight hold on the school population.

As usual, the number of pupils assigned to our teachers is far too large for both the physical and mental welfare of the former. Though our seating capacity was increased to the extent of four hundred desks, we are still obliged to assign an average of fifty-two pupils to each teacher.

Our accommodations being still inadequate to the demands of our growth, steps have been taken tending to the erection of a twenty-four room building, and to the purchase of land as sites for two other buildings. The accomplishment of the above is contingent, of course, on our ability to find a market for the necessary bond issue, a contingency, from the present bond outlook, that has a somewhat remote appearance.

Though a strong effort was made by the Board of Education to procure an appropriation for both night schools and manual training, the authorities having to do with making appropriations thought there were other local needs of a more pressing nature. We feel that our large foreign population, and the strong tendency of our youth to enter manual pursuits at an early age, make an unusually strong demand on us to provide for the needs of these two classes of people. Should the legislation relative to the taxation of railroads prove to be constitutional, we are assured that future provisions will be made whereby these two requisites to modern educational conditions can be met.

Much has been said and written by pedagogical authorities relative to the need of close relationship between the home and the school. Much still will have to be said before the true value of this relationship fully dawns upon teachers. Parents ought to be, and must be to the teacher more than the fathers and mothers of their pupils. Teachers need have no fear that when they are on calling terms at the homes represented in their classes they are face-to-face with the millennial dawn. On the contrary, such a condition of affairs is but simple evidence that the teacher is sensible of a plain, every day duty, one whose performance is fraught with incalculable good both to herself and her pupils.

A knowledge of the home conditions of each child is an essential to the proper treatment and instruction of that child. In other words, we must know the child. How can we know him, if ignorant of his home environment! We know of no way by which this indis-

You Are Viewing an Archived Copy from the New Jersey State Library

pensable knowledge can be acquired, save by personal visitations of the teacher of the homes represented in her room. Consistent with our belief, teachers have visited the homes of their pupils at least once during the year, and many of them a number of times. Seemingly this requirement would be imposing the expenditure of no inconsiderable amount of time and labor on the busy teacher. In reality, these visitations have proved a means of saving time, of doing better work, of doing that work easier, and, incidentally, a means of greatly reducing the amount of worry and nervous strain that so strongly characterize the teaching profession.

Compulsory attendance has been limited to children who were on the school roll. During the past two years a police officer has been detailed to act as the truant official whenever the services of such an officer were needed. While the police department has, to the best of its ability, seconded our efforts to secure regular attendance, I am of the opinion that better results would follow the employment of a regular truant officer.

PHILLIPSBURG.

LEWIS O. BEERS, A. M., SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent of Public Instruction:

The following report of the Phillipsburg public schools for the year ending June 21, 1907, is respectfully submitted:

Having held the position of Superintendent but one year the work of the schools has followed the plans outlined by my predecessor.

Much persistent effort has been directed toward better results in spelling, writing and general neatness in all written work, and marked improvements along these lines is noted.

A statement setting forth our inadequate school accommodations was prepared and presented to the Board of Education. Prompt action was taken and the Board of Estimate voted $35,000 for a new ward building, which when completed will give us an up-to-date ten room building in place of the one story frame structure now in use.

The buildings throughout the town have been papered and painted and all school property is in good condition.

You Are Viewing an Archived Copy from the New Jersey State Library

One important event of the year was the adoption of a new salary schedule providing for the regular increase according to experience. The minimum salary now below the High School is $375.00 and the maximum $750.00.

Evening schools were maintained during the winter, the grades ranging from fourth to eighth inclusive.

PLAINFIELD.

HENRY M. MAXSON, SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent of Schools:

DEAR SIR—The year's history of our schools is chiefly a record of healthful growth and steady work faithfully done. Our enrollment for the year was 3,136. This indicates an increase of 111.

The occupation of our new High School building and the readjustment of classes in the grammar schools that followed still left us with crowded conditions in two buildings. To relieve this condition, the Board of Education has purchased two large lots in different parts of the town for the erection of new buildings. The City Council has voted to issue $90,000 bonds, and plans have been prepared for the erection of one building. The Board has also purchased a building that it has been renting for some years. While not built for a school, it has been remodeled and affords very excellent accommodations for school work.

The course of study in the elementary grades has been under revision during the year and will be printed at an early date. The course in the High School has also received some additions and its arrangement has been recast. A biological laboratory has been equipped and work in that subject and physical geography put on a strong basis. The fitting up of manual training rooms has made it possible to offer the High School pupils courses in cooking and in joinery.

The commercial department was established on a four year basis when it was first introduced some years ago, with the aim of furnishing a broad course that would require as much work as the other courses. The work has now been rearranged so as to afford a choice between three somewhat different lines of work.

You Are Viewing an Archived Copy from the New Jersey State Library

We have also arranged two courses of study to cover the usual High School work in five years, for the benefit of those pupils whose conditions make it inadvisable to attempt the completion of the work in four years.

Work in the gymnasium twice a week under the direction of a special instructor has been made a part of all the courses.

As usual, a large percentage of the graduating class will go to the colleges and other higher institutions for further study.

One of the most important acts of the Board of Education during the year was the adoption of a new salary schedule as follows:

GRADE TEACHERS AND KINDERGARTNERS.

Minimum salary $550, maximum $800. Maximum for assistants in kindergarten $700. Increase $50 annually the first three years, then $25 annually, until the maximum is reached.

Upon recommendation of Superintendent and Principal, a teacher of a seventh grade class may receive $50 additional and a teacher of an eighth grade $100 additional during the time of assignment to such a grade.

ASSISTANTS IN HIGH SCHOOL.

Male assistants, minimum $1,000, maximum $1,800.

Female assistants, minimum $700, maximum $1,200.

Increase, $100 annually for two years, then $50 annually until maximum is reached.

Upon recommendation of Superintendent and Principal, a teacher in charge of a class room may receive $100 additional during assignment to that position.

The increase for a teacher in any year may be withheld by the Board in case the teacher's work is not approved by the Superintendent and Principal.

PRINCIPALS

Of graded schools, maximum $1,400. When a principal is not receiving the maximum, the increase will be $100 annually until the maximum is reached.

VICE-PRINCIPALS

May receive $100 in addition to their salaries as teacher of a class.

You Are Viewing an Archived Copy from the New Jersey State Library

This schedule taken with the increase made three years ago represents an increase of from fifty to eighty per cent. in the salary of the various positions. For the coming year each teacher and principal receives an increase of from $100 to $200 each, according to position or length of service.

Another of our teachers, who had served the city most acceptably for thirty-eight years, at her own request was placed on the pension list.

TRENTON.

EBENEZER MACKEY, SUPERVISING PRINCIPAL.

The principal features in the progress of the public schools of this city during the year ending September 1, 1907, are the introduction of a system of manual training and the appointment of Mr. A. E. Dodd as our first Supervisor of Manual Training; a revision of our course in physical training, and the appointment of Miss Helen R. Levy as Director of Physical Training; systematic efforts to enforce compulsory attendance regulations and the appointment of an Attendance Officer; the opening of a school for backward pupils; the revision of the course of study in hygiene and physiology and arithmetic; the erection of a new school building containing 20 classrooms, auditorium, gymnasium, manual training shop, domestic science room, offices for the Board of Education, Superintendent and Supervisors, library, supply rooms and repair shops.

PENN'S GROVE DISTRICT.

ISAAC RISSMILLER, SUPERVISING PRINCIPAL.

To James A. Wentzell, County Superintendent:

DEAR SIR—I hereby submit my annual report for the year 1906-1907:

Four new rooms were added to the west wing of the centre building; three of the rooms were occupied, two first primary with a seating capacity of 90, and one for the additional grade of the High

You Are Viewing an Archived Copy from the New Jersey State Library

School. The new rooms were furnished with slate blackboards and single desks.

The Crowell ($400) Physical Laboratory was purchased for the High School.

One new teacher was added during the year and another one to begin September.

The efficiency of our teachers is indicated by following table:

The number of teachers who are gradutes and are holding State certicates 3
Number holding Normal diplomas and State certificates..... 4
Number holding first grade county certificates..... 1
Number holding second grade county certificates..... 4

Considering the sickness that we had during the year our attendance has been remarkably good, 92.5 per cent.

We enrolled seven more than last year. The total number of days present in 1904-1905 were 47,716, in 1905-1906, 51,710, and this year, 1906-1907, 54,915.5.

Teachers meet every Monday evening in the Principal's room. The subject of discussion generally determines the length of time spent in these meetings.

We also had our regular mid-year meeting with the Board of Education. This meeting is both of an informal and social nature.

Three of our High School girls passed the May teachers' examination; and six of the Junior Class in the High School passed from six to ten subjects with high averages.

No commencement exercises were held this year because the fourth year was added to the course. We are expecting to have our school on the "Approved" four year list by next year. In general the results of the school have been very satisfactory.

The Board has made a more liberal appropriation and the salary of all the teachers has been raised.

You Are Viewing an Archived Copy from the New Jersey State Library

PILESGROVE DISTRICT.

SUE H. COLES, SUPERVISING PRINCIPAL.

To Jas. A. Wentzell, County Superintendent:

DEAR SIR—I hereby submit a report of the township for the school year 1906-7:

This being the first full year of school since the consolidation of Woodstown Borough with Pilesgrove Township, the plan of the work has been quite different from former years. Much more definite and uniform work has been accomplished because of supervision. The aim of the grade schools is to prepare, as a unit, for the High School.

In the Borough Grammar and High School grades we use the plan of department teaching and find it very satisfactory, so much so that the plan is to be continued.

The High School, which is "approved," had this year three teachers—another to be added next year. Two courses of study have been adopted—a classical and a commercial—each of four full years' work. A class of twenty pupils from the grammar grade will enter High School next year.

There are twenty-one teachers in the district, with an enrollment of six hundred and seventeen pupils, and a daily attendance of 93 per cent. for the year. The total number of days present was 74,992.

Of the teachers one holds a first grade State certificate; six second grade; two special; five first grade county; four second grade; three third grade. Our teachers are doing conscientious, and generally thorough, work. Nine of these teachers are in ungraded schools.

The result of the year's work has, in general, been satisfactory to the Board of Education, parents and teachers.

DOWNE TOWNSHIP.

GEORGE S. MINTS, SUPERVISING PRINCIPAL.

John N. Glaspell, County Superintendent, Bridgeton, N. J.:

DEAR SIR—I hereby respectfully submit to you my report of the schools of Downe Township for the year 1906-07.

The schools of Downe are, in the main, doing good work and are blessed with a class of pupils who are willing and receptive.

The teachers are both willing and anxious to do the very best for the advancement of the pupils. In addition to the reading of Baldwin's School Management supplied from the County Pedagogical Library, the teachers purchased each a copy of Seeley's History of Education and discussed the assigned portion of same at the bi-monthly meetings, where also matters of local professional interest were considered and helpful suggestions were given and received. Professional magazines and papers are read by all the teachers. If the same teachers could be retained year after year a very gratifying future for our schools would be assured. In order to retain year after year such teachers better salaries must be paid and Boards of Education must be awakened to the fact that good workmen must be shown an appreciation of their work and must be given assurance that their services are permanently desired, or, so long as their work is good. Teachers who are kept under a nervous strain because of the probability of loss of position cannot continuously do the best that in them is.

At the time of the establishment of the High School at Newport we discontinued school No. 3 at Dragston, procuring a hack to transport the pupils to the school at Dividing Creek. This arrangement, though objected to at first by some parents, is now conceded to be for the best interest of both the pupils and the taxpayers—a most happy coincidence. Pupils securing the Superintendent's secondary grade certificate in school No. 4 are allowed to attend Graded School No. 2, thus relieving the press of classes and making it possible to do good work in No. 4.

We made an earnest attempt to enforce the Compulsory School

You Are Viewing an Archived Copy from the New Jersey State Library

Law and, in the main, succeeded. Many of the parents think that they must have the help of their children during the autumn, also in the spring; most of these live on farms where lots of work is to be done and where there is an almost impossibility of securing help; in these cases we have to "go slow." Our attendance decreased much during the diphtheria epidemic in the lower part of the township, but, with these exceptions, our attendance was kept quite good. In case a pupil was reported, or was found to be not attending regularly, letters were sent to the delinquent parents requesting them to send their children to school or give a lawful excuse for absence. If the child did not return to school and no satisfactory excuse was rendered, the truant officer was asked to take the case in hand. In most instances the services of the truant officer was not needed. What can be done to impress the parent with the fact that the best interests of his child demands regular attendance at school? Very few pupils will fail of regular promotion if they are sent to school every day.

All needed supplies have been furnished by the Board, and, with one exception, we have been supplied with required textbooks.

The matter of grading and draining the grounds at school No. 3 has been under consideration for some time, but nothing definite has as yet been done. Drainage is sadly needed there.

I wish to thank you for the aid and encouragement you have given me during the year.

Report of State High School Inspector.

You Are Viewing an Archived Copy from the New Jersey State Library

Report of State High School Inspector.

The Honorable Charles J. Baxter, State Superintendent of Public Instruction:

DEAR SIR—As State Inspector of High Schools I submit to you my third annual report of the work done during the present year, from November first, 1906, to November first, 1907.

Experience in the work of inspection has made no radical change in the methods adopted. The curriculum of study, the arrangement of courses, the general condition of the school, its educational efficiency, its material equipment as to building, or rooms assigned for High School work, library, laboratories and apparatus, these statistical facts, required by the State Department, and marking the relation of the school to the needs of the community it serves, have been noted on each visit, and briefly indicated on cards prepared for filing, so that for the first time the State Department has in its possession a fairly complete record of the actual present condition of all Approved High Schools, and of those applying for approval.

The standards set by the State Board of Education have not been changed in any essential particular, but have been more carefully formulated and made somewhat more specific. The rules embodying these standards have been printed in convenient form for distribution, and have enabled the Inspector, in conference with local boards, to secure, in many cases, definite action in accordance therewith, so that a far larger number of schools have met the State requirements fully, and have received the official approval of the State Board than during the previous year.

The general attitude of local boards has been one of hearty cooperation, and suggestions by the Inspector have been received with a uniform courtesy, and in many cases have led to the reorganization of the High School work on approved lines. I believe it is not too much to say that the educational progress of the State in secondary school instruction has been more marked during the last year than ever before in an equal period of time.

Wildwood, March 26th, 1907.
Woodbury, January 17th, 1907.
Woodstown, February 26th, 1907.

As will be seen from the above some schools have been visited two or three times in the course of the year, wherever in the judgement of the Inspector special problems were presented which required repeated conferences with the principals, or with the local boards. On the basis of these visits of inspection the following schools have been recommended to the State Board of Education, and have received their approval as four year High Schools:

Belvidere, Butler, Irvington, Keyport, Ocean City, Point Pleasant, Ridgefield, Roselle, Succasunna, Toms River, Washington, West Hoboken.

These additions bring the total number of High Schools now on the "Approved List" up to 79.

You Are Viewing an Archived Copy from the New Jersey State Library

The following, after inspection, were recommended for registration as partial High Schools maintaining a standard course of three years work:

Alloway, Bernardsville, Bordentown, Bridgeton, Egg Harbor City, Elmer, Gloucester City, Hamburg, Lambertville, Livingston, Matawan, Medford, Newport, Palmyra, Pennsgrove, Pleasantville, Port Norris, Roselle Park, Shiloh, South Amboy, Wharton, Wildwood.

Most of the above are schools newly organized, or reorganized, on standard lines, and representing a marked increase in educational opportunities offered to the pupils in our public school system. Almost without exception they plan either during the coming year, or in the near future, to add a fourth year to their courses, thus becoming entitled to approval as fully equipped High Schools.

In a number of cases inspection revealed that the standards of the State Board in one particular or another were not fully met. In such cases action has been deferred and the local school authorities encouraged to remedy the defects pointed out, and renew their application later.

The work of inspection shows a constant growth. Not only has the number of schools to be visited annually greatly increased in the past three years, but the inquiries for information are increasingly frequent, and the appeal of local boards for the advice and presence of the State Inspector at special or regular meetings is a growing one. The legislation of the winter of 1906 has begun to bear fruit. The increased allowance for teachers in High Schools has not only operated to make the local boards more ready to engage the necessary number of teachers, but also more generous in their salary schedules, and in particular the provision for a tuition allowance of twenty-five dollars from the State to the sending board, and the remission of seventy-five per cent. of the traveling expenses of the pupils thus sent, is working little short of a revolution in rural conditions. A few figures taken from the statistical tables accompaning this report will illustrate these points more clearly than any amplification by way of discussion:

	1st Year.	2nd Year.	3rd Year.
No. of visits of inspection.....	79	103	127
No. of schools visited.....	68	84	111

You Are Viewing an Archived Copy from the New Jersey State Library

No. of schools recommended for approval	4	6	12
Amount expended	$638,108	$655,467	$864,745
Total enrollment	14,667	14,690	17,311
Pay pupils reported	....	....	1,711
No. of teachers employed exclusively in High Schools	....	514	669

An examination of the tables in detail will show clearly the rapid growth of the High School movement, and will indicate the fact that the public is now being thoroughly aroused to the value of the High Schools and better appreciates than ever before their importance in the public school system.

The fostering care of the State in its relation to the development of High Schools must never lose sight of two-fold function of the High School, which must provide courses of study and skilled instruction for the few, relatively speaking, who will go to college or university, and to technical schools of college grade, but must furnish also courses of instruction, no less carefully planned, and teaching no less skillful and thorough, for the many who will devote themselves to commerce and transportation, to the mechanical industries and manufactures, and to agriculture.

The discussion of High School problems is often vitiated by regarding the High School too exclusively in its preparatory function and in some cases wrong ideals have been worked out into practice by reason of this narrow view.

It is rightly insisted that the High School teacher should be academically trained far beyond the point to which the pupil in the High School is to be carried in any subject, and the recognition of this fact has lead to the general demand that High School teachers should have had college or university training. This is in itself a good thing, but it necessitates a warning lest the aims and methods of the college and university be imported into the High School class room where they are manifestly out of place. A university trained teacher of English is too apt to attempt with secondary school pupils the kind of work done in the college or university lecture room, a kind of work unfitted to the age and lack of maturity of the pupil. A High School boy or girl should not be expected to enter on a specialized philological study of the English language, nor should he be encouraged to undertake much in the way of literary criticism. These phases of the study of English are beyond his grasp. He

You Are Viewing an Archived Copy from the New Jersey State Library

should be encouraged to read appreciatively the best literature, trained to write and speak with precision, and force, and to master the principals of modern English speech. The same danger might be illustrated in relation to the teaching of any other High School subject, for example the teaching of history or physics. Hence, while the academic fitness of the teacher should be insisted upon, the aims and methods of secondary school teaching should be clearly defined in the minds of those who are employed as teachers in the secondary school.

Another danger is that of loosing touch, or rather of not establishing a proper touch with the general activities of the world's work. The High School as a finishing school has a far wider mission than as a preparatory school and will never attain its proper recognition as an integral part of the public school system until its industrial and business courses shall have been placed on as high a plane and as carefully administered as are its preparatory courses. Nothing in the progress of the past two years is more encouraging than the wider recognition of this fact. For particular discussion at the present time I single out the action of the State Board in regard to the business or commercial course, and the present movement in our State, and in other states, toward the better development of technical and agriculture courses in secondary schools.

In its interpretation of the school law the State Board of Education has adopted the following rule: "High Schools maintaining courses of study which differ in scope and in the term or time required for their completion shall be classified for apportionment in accordance with their shortest course." This provision was intended to cure an abuse that was three years ago very wide spread in our State, and was one of the gravest menaces to the maintenance of a high standard of secondary education, viz., the custom, even in the four year High School, of offering short business courses, sometimes of but one year, oftener of two, and rarely of more than two, on graduation from which pupils were ranked as High School graduates and received a diploma of the High School where they had studied. This practice was a grave menace to the integrity of the High School course. It invited the pupil to take this short cut, and awarded a diploma as if he were a High School graduate.

The question, however, is a much more more fundamental one than the relation of a particular course to the other courses in a school. The real question to be asked is whether such a short busi-

You Are Viewing an Archived Copy from the New Jersey State Library

ness course is or is not in itself a desirable thing, and in the second place, if desirable, whether it is in accord with the real functions of the High School?

That it often was in fact a sort of snug harbor for educational derelicts or a convenient waste basket for miscellaneous pupils who could not be classified in the regular courses is not the real heart of the matter. The real question is what kind of preparation pupils should have who desire to enter the business world, what subjects they should study, and how long a period of time should be given to the work.

If a pupil loses no time and is of ordinary mental calibre he can complete the twelve years of the graded work in the public school system by the time he is eighteen and one half years of age. This applies to the commercial course of business training as well as to the work of the classical course, or any other High School course, and the first consideration I would urge for a full four year commercial course is that the pupil may well finish such a course by the time he should be called upon to enter the business world. Under ordinary circumstances this age is early enough for a boy or girl to exchange the regular mental discipline of an educational course for the preoccupations of a business life. This is true from the standpoint of an unimpaired physical development, from the standpoint of efficient citizenship, and from the standpoint of business efficiency.

The worrying routine of business is particularly damaging to the health of a boy or girl of ordinary physique that is below the age of eighteen years. A modern school furnishes opportunity and time outside of school hours for abundant exercise and generally a chance for gymnastic training or its equivalent. No such opportunity can be had during the early years of a business life when the boy or girl is usually obliged to begin the day with an hour on an early train, to spend morning and afternoon in an office with a hasty half hour for a noonday lunch, returning again to their homes in the evening. Other things being equal it is a manifest gain if the time for the beginning of such exhausting routine is delayed until after the adolescent age.

It is further in the interest of trained citizenship that our boys and girls who are to enter the business world should make, after a sufficient maturity of mind is attained, a systematic study of the duties of citizenship. To introduce this study in the early grades is

You Are Viewing an Archived Copy from the New Jersey State Library

unsatisfactory. It is a grave question whether the study of civics in the eighth grade, or even in the earlier years of the High School course, is not too often a mere waste of time, the pupils lacking maturity for the proper appreciation of the facts, and their correlation with the real duties of life. In the last years, however, of the High School course such a study is of vast importance, and wisely taught, of great practical value. What is true of civics is still more indisputable of economics and the wider study of political institutions.

In the third place the question of business fitness is central to the whole discussion. And first of all, business fitness is not furnished without a proper course in English both on the technical and practical side, and it is eminently desirable that all the ordinary High School English course can give in the way of literary culture and insight should be given to the commercial pupils. It is more important for them, than for those who pursue the other courses with larger general opportunities for cultural study, to attain such measure of maturity in literary judgment as is possible in the High School age, and this for the sufficient reason that it will condition their life attitude toward literature and culture in larger measure than that of the others. But the need on the technical and practical side, though not more important, is more unquestionable by those, who may be later their employers. To write good English correctly, to master English as an art is possible only by diligent and long continued practice.

Nothing short of a thorough four year training by the best secondary school methods is in any wise adequate to meet this practical demand. The need is a growing one. The difference between a young man beginning work in a business office, who has had this training, and one who has not, is a world wide one, and largely determines whether such a person shall advance to larger responsibility and higher position or not. Employers are insistent in their criticisms, where this power is lacking, and equally loud in their appreciation where it is present. This point alone would justify a full four year business training in the public High School, particularly where the High School is to be the final stage for formal educational work. When we add the fact that time must also be found for History, for Commercial Geography and Law, for the History of Commerce and Economics, and for some at least of the secondary school Mathematics, Modern Language teaching, and Science, we have a body of

You Are Viewing an Archived Copy from the New Jersey State Library

knowledge which absolutely requires four years for its adequate mastery.

The State Board of Education has therefore done wisely in setting its standard, and the local Boards of Education have done wisely in meeting frankly the needs of the situation and in cutting off the poor makeshifts which have been hitherto a source of weakness rather than of strength to the public school system of the State.

One objection is often urged, and demands at least a word of explanation. It is stated that pupils cannot afford the four years for such a commercial course and that to insist upon it excludes many pupils from the advantages of the High School, and shuts out the children of the poor from the benefits of the High School course. To this there are obvious replies. First the question of continuance in school is largely a relative one. The desire to leave quite as often comes from the restive pupil as from the prompting of the parent, and poverty is often a mere excuse, where the will to continue is lacking. We must remember also that the High School is a free school, and the expense is merely the negative expense of deferring productive work until the age of graduation. The vast majority of those who say they cannot afford more than one or two years of High School training urge this because they are themselves eager to close the period of preparatory training; a natural impulse, but one against which the whole weight of influence and authority should be cast in the interest of higher citizenship and more efficient practical work.

In the second place, we have no right to offer a course in itself inadequate and unsatisfactory purporting to do what it cannot do, particularly to those who are least able to judge for themselves. To offer a two years' business course is to say in effect, with all the emphasis and authority of professional students of education, that such a course will fit properly for business life. This it cannot do, and to seem to endorse such a course is tantamount to a fraud upon the public and a denial of opportunity that ought to be offered most of all to the pupils whose time is short for preparatory training.

And, once again, the full four year commercial course, carefully drawn, and carefuly administered, including those subjects which a thorough business training should include, stands before the community as an ideal that in itself is of immense value, nor does it prevent permission to any individual, rich or poor, who cannot afford the time for a full four year course, to take, with the per-

You Are Viewing an Archived Copy from the New Jersey State Library

mission of the Principal, in conference with his parents, such studies as he may need. To provide for such irregular students is a duty which a principal must not shirk, and is an important though an incidental function of the High School.

A most important matter which is now occupying a large place in public discussion is the question of correlating the High School more perfectly with the other industries of life besides those of commerce and business. Many pupils, particularly boys, leave school at an early age because they perceive no practical bearing of their school work on their plans for future careers. Any early specialization which determines a pupil's career, before he can wisely choose it, is certainly an evil, but the insistence upon long years of academic work, which does not enlist the interest of the pupil, is perhaps as great an evil, and provision must be made, through the organization of Manual Training and Industrial High Schools, for pupils who are not now kept in school to meet their needs and to foster the industrial welfare of the community.

This is a movement on which we have but just entered and which is destined to grow to large proportions in the years immediately before us. The splendid development of technical and industrial schools of college grade, the rapid increase in their enrollment, the eager demand for their graduates in places of responsibility and power, while it is a most significant fact in itself, is no less significant in the light it sheds on secondary school problems. Intelligent training for the mechanical arts is possible during the secondary school age, and those pupils of mechanical bent who cannot go to college should be provided for by a less specialized but still practical and effective training in the years of High School study.

But I desire particularly to emphasize another side of this same problem. The complaint has been loud that High Schools educate their pupils away from the conditions of life in which they are to make themselves useful as citizens. This on the one hand is only partly true, and on the other hand is partly unavoidable. It is the privilege of the High School to point to the highest things, and many a pupil has caught his first insight into a wider field of usefulness, of which his fathers never dreamed, and made himself a large name in the world immeasurably wider than that of his own early environment. Still it is a sound principle that the High School should educate for life, and life is all about the pupil, from his early childhood. Life in the country is no less real than in the city; life

You Are Viewing an Archived Copy from the New Jersey State Library

in the village is as important as in the metropolis; and in general, schools should make the boy or girl more efficient where he is, and where his parents are, rather than draw him away to new surroundings. Hence, the claim is well founded that High Schools in rural districts and agricultural communities should not be deemed a superfluity for boys and girls who are to remain as citizens in those communities.

The time is long past when the farmer could dispense with higher education. On the contrary no pursuit calls for better trained powers of observation and scientific analysis than the tilling of the soil. It is well known that a movement is on foot to bring the federal treasury of the United States to the aid of agricultural education in the secondary schools. New Jersey should be in a position to profit by this aid if the provisions proposed are enacted into law. It seems to me therefore a wise thing to plan such a course as would without lowering the standard of secondary school education, meet in some measure the present conditions. I believe a course in science should be outlined in which at least one half the time should be given to the industrial applications to agricultural problems of the branches studied. I believe it would prove a course of the highest drawing power, and would hold the boys as nothing else, not only from the inherent interest of science, but particularly because every intelligent boy would feel its practical utility.

Roughly speaking, one quarter of the entire time for the four years might be allowed to this course in science. The first year might be given to botany, one half to the scientific study of plants, and plant life, and one-half to the study of agricultural botany, plant culture, plant diseases, and their cure, the scientific treatment of those plants which are grown upon the farm. Similarly the second year course in zoology would be for half a year devoted to a general study of animal life, and for a half year to the particular study of animal industry, the problems of feeding, of stock raising, animal diseases and their cure. The year devoted to physics might be given in part to general physics, say to mechanics and electricity, passing by all but the merest outline of magnetism, light, sound and heat, and for a half year attention would be directed chiefly to the physics of the soil. In the last year of the course chemistry might be specialized in the second half year to agricultural chemistry and its relation to plant and animal foods. Such a course would not produce specialists, it would not render a college training unnecessary for

You Are Viewing an Archived Copy from the New Jersey State Library

those who could afford the time, but it would put the successful student in possession of a vast body of theoretical and practical knowledge from which at present he is shut out in the ordinary High School course.

Further, the farmer should be no less a business man than a man of scientific attainments. Hence, such a course should include also elementary bookkeeping, history of commerce, commercial arithmetic and commercial law. I append a suggestive outline to embody these ideas, and to show how they might be correlated, without complexity, with the ordinary courses which are now so successfully maintained. These innovations would not detract in any wise from the efficient work the High Schools are now doing, but would I believe enlarge their usefulness and make them more than ever indispensable in an educated democracy.

SEWING.

Name of teacher—Marion Treat.
Is teacher engaged exclusively in this work?—Sewing and cooking.
Number of pupils—Female, 64.
Number of lessons per week given each class—1.
Length of lesson—60 minutes.
Grade or grades in which subject is taught—Sixth and alternate grades

METAL-WORKING.

Name of teacher—Glennie Comegys (Venetian iron).
Is teacher engaged exclusively in this work?—Drawing and manual training.
Number of pupils—Male, 14; female, 21.
Number of lessons per week given each class—2.
Length of lesson—30 minutes.
Grade or grades in which subject is taught—Sixth grade.

WOOD-WORKING.

Name of teacher—Glennie Comegys.
Is teacher engaged exclusively in this work?—Drawing and manual training.
Number of pupils—Male, 81; female, 75.
Number of lessons per week given each class—2.
Length of lesson—30 minutes.
Grade or grades in which subject is taught—Fourth to eighth inclusive, to boys, fourth and fifth to girls.

WOOD-WORKING—(A) JOINERY.

Name of teacher—Glennie Comegys.
Is teacher engaged exclusively in this work?—Drawing and manual training.
Amount expended for manual training during the year—Plant, $10.74; material, $80.65; salaries, $775.00; incidentals, $44.44; total, $910.83.

COOKING.

Name of teacher—Marion Treat.
Is teacher engaged exclusively in this work?—Sewing and cooking.
Number of pupils—Female, 43.
Number of lessons per week given each class—1.
Length of lesson—60 minutes.
Amount expended for manual training during the year—Plant, $16.20; material, $148.35; salaries, $385.50; total, $550.05.
Grade or grades in which subject is taught—Seventh and alternate grades through High School.

HOBOKEN.

A. J. DEMAREST, SUPERINTENDENT.

Hon. C. J. Baxter, State Superintendent:

DEAR SIR—I respectfully submit the twentieth annual report of the department for Industrial Education of the City of Hoboken for the year ending June 30th, 1907.

The following table shows the attendance of pupils, the number of teachers employed and the cost of maintaining the schools:

DAY SCHOOL (PUBLIC AND PRIVATE.)

Number of pupils who received instruction in cooking	536
Number of pupils who received instruction in joinery	487
Number of pupils who received instruction in woodcarving	619
Number of pupils who received instruction in modeling	767
Number of pupils who received instruction in sewing	1,711
Number of pupils who received instruction in Day School	4,120
Number of teachers employed in Day School	8
Cost of maintaining Day School	$9,634.92

NIGHT SCHOOL.

Number of pupils who received instruction	104
Number of teachers employed	7
Cost of maintaining night school	$1,365.61
Total number of pupils who received instruction in manual training	4,224

There has been very little change in the character and extent of the work done in the Manual Training Department during the past year. The interest in manual training in the schools continues unabated. Owing to the large increase in the number of students in modeling and woodcarving, it will become necessary to enlarge our equipment for those departments. Another teacher, who could teach both modeling and woodcarving, ought to be engaged to assist in the overcrowded classes of these two particular branches. It is very discouraging for pupils who are interested in the work to be sent back to their classrooms through the lack of proper accommodations. The scope of the work for the manual training department

You Are Viewing an Archived Copy from the New Jersey State Library

should be extended to cover all grades from the kindergarten to the graduating class in the high school. In accomplishing this, I fully realize that there are many difficulties to be overcome. The ordinary teacher in the elementary school has received little or no training in construction work. This objection however could be overcome by instructing the grade teachers or by the appointment of a sufficient number of competent teachers to carry on this work. In the second place, we lack the necessary funds to meet the expense involved in the appointment of the required number of teachers and in the purchase of material and tools. But the greatest obstacle that confronts us is the fact that the educators of the present day are undecided as to the character of the work that should be undertaken for these intermediate grades. In the first place, no one has worked out an adequate scheme for work in the lowest grades. So far as the kindergarten is concerned we are agreed on the work, but the ideas advanced by the school world on the work that should be done between the kindergarten and the fifth grade are rather confusing.

In the fifth, sixth, seventh and eighth grades all pupils of both sexes are instructed by specially trained teachers. Sewing is taught in the fifth, sixth and seventh grades. The girls remain in their respective class rooms for instruction in sewing while the boys go to the manual training building for modeling. There have been 1,711 girls in the sewing classes during the year and a large majority of them have done excellent work. The work is made simple and practical with the view of making our pupils form habits of industry and economy.

In the modeling room the boys deal almost exclusively with plastic material, sketching in clay and modeling objects representing natural and manufactured forms. Great care is exercised in modeling the geometric solids in the round, beginning with the sphere; then the cube, cylinder, square prism, triangular prism, ellipsoids, ovoid, pyramid, cone, etc. In connection with modeling, the boys are required to make constructive drawings; pattern making and working drawings of the cone, square pyramid, square plinth, etc.

When the eighth year is reached, the work is differentiated on the basis of sex. While the boys are instructed in the simpler and more advanced forms of joinery, including all kinds of joints and supplemented by a course in wood turning, the girls take up the course of domestic science in a room that is especially and carefully equipped for that purpose. The kitchen is a model for neatness and order.

You Are Viewing an Archived Copy from the New Jersey State Library

The kitchen work is done exclusively by the pupils. Certain members of the class are assigned as housekeepers whose duty it becomes to keep a well-ordered house.

The pupils are impressed with the underlying principles of domestic economy. Moreover, they are taught these valuable lessons that cleanliness is next to godliness and that order is heaven's first law. The kitchen is equipped for individual work and as far as practicable this idea is successfully carried out.

The evening school was held during the months of November, December, January and February. The evening school is divided into four departments: mechanical drawing, covering a course of two years, mathematics, sewing and domestic science. Students completing any of these courses are awarded diplomas of graduation. The Board of Trustees have in contemplation an extension of these courses so as to cover a broader field of work, but are prevented from carrying out their plans through a lack of funds. The evening school is doing a grand and noble work by offering to the young men and young women of this city a chance to retrieve a neglected opportunity, thereby making them more efficient in their various lines of work and by putting them in a position to command better wages. A school that is accomplishing such grand results and has for its aim the betterment of our young men and young women should not be handicapped through a lack of funds necessary to carry on the work.

NEWARK.

A. B. POLAND, SUPERINTENDENT.

Manual training has continued to be a popular as well as useful part of our elementary school curriculum. It has been extended into all departments and grades from kindergarten to high school. The State appropriation, to wit, $5,000, has long since ceased to be a half of the total appropriation as in most school districts of the State. Our local appropriation has considerably exceeded $25,000 per annum, and bids fair to become still larger. It would seem fair that the law should be amended so as to give school districts that exceed $5,000 in their local appropriation a sum equal to such excess.

The condition of manual training in our local schools is well set forth in the annual report of Director Eli Pickwick, Jr., from which I quote:

"I first desire to call your attention to the extension of manual training in the primary grades.

All the schools that heretofore have had no regularly planned construction work in their primary classes have, during the year, been fully equipped with tools, materials, and specifications for the prosecution of this phase of school activity. For the first time, then, we can now say that every school in our city has some definitely planned handwork for each of its grades from the kindergarten to the High School.

Because all the schools are adequately equipped to successfully carry on the manual training work, it is now profitable to offer a general scheme by which all teachers may correlate it with other lines of school work, and thus make of it a strong unifying factor. This is, in fact, just what has been done. Assistant Superintendent Corson has suggested certain lines of interrelated work for the several grades, and the teachers, by reason of the fact that they knew how to grapple with the structural side of the work, from their experiences in the regular manual training lessons, have organized this related work so as to give the pupils a clearer insight into the subjects studied and at the same time a better individual development. No

You Are Viewing an Archived Copy from the New Jersey State Library

one, stepping into our schools during November, could have doubted for a moment the value of correlated work, as he marked the intense interest taken in the construction of windmill, ship, canoe, log hut, wigwam, cradle, baskets, bags, barns, and the like, to illustrate the Thanksgiving story.

Besides being of value in interpreting and illustrating other studies, the construction work has, as in other years, contributed toward the solution of the occupation problem of the lower grades. The self-directed work has been of two kinds, first: stimulative—work in which the child was expected to add some thought of his own to effect the desired results, for example, the concrete illustration of number combinations, or the placement of units to make a purposeful design, second: quieting—work dependent on the continuous repetition of a simple process to gain a desired end; under this head come knitting, weaving, braiding, and sewing. The teachers are grateful for any real contribution to the occupation work. This is particularly true of the first grade, for, the fact is, that it takes clearer thinking and more far sighted planning to get really fine educative occupational work than it does to obtain excellent results from the supervised lessons.

I desire, then, to report the teachers' readiness, the pupils' continued interest, and the widening range of its usefulness to the school.

At the close of the year we find our facilities for carrying on the grammar grade work much better than at its beginning. The number of special rooms in which the fifth and sixth grades work may be done has been increased and two new seventh and eighth grade centres have been established. The opening of these new shops has greatly reduced the inconvenience of sending classes long distances each week for their manual training lesson.

The plan looking toward the betterment of our grammar grade work has had a two-fold aspect: First, the standardization of methods for each grade; second, the enrichment of the content of the subject in all grades.

To contribute toward the first end, a code of lettering and conventions suited to each grade has been printed and placed in the hands of each special teacher. We want to get simple, rapid, readable, free-hand lettering for all titles and notes on working drawings. The general practice of our best shops and engineering papers has been the guide in formulating the code, thus bringing it into line with the

You Are Viewing an Archived Copy from the New Jersey State Library

accepted thought of the engineering profession. Again, all manipulatory processes, in so far as principle is concerned, have been made uniform throughout the city, and in all cases our tool practice is made to conform to the best modern usages. Teachers in the shops have been furnished with a statement showing tools, processes, and principles of construction a pupil should be familiar with before he is ready to enter upon the work of the department in the High School.

In the second case, to build up a body of thought pertinent to the manual training work and to make it as real and valuable as the body of thought related to any subject in the curriculum, teachers have been instructed to give attention in their shop talks to subjects associated with the manual training lesson, such as wood: growth, structure, general usefulness, identification of tree and commercial product, locality producing same, methods of lumbering, fundamental processes of manufacture, etc. In like manner the fundamental facts about any material used are to be sought out, the teacher in all cases endeavoring to stimulate individual enquiry, and to relate the topics in a definite way to the structural problem immediately at hand, and to the larger world of constructed things without the school.

The experiments with metal work which we have been making in the seventh and eighth grades of the Alexander street school have been in every way successful. Our efforts in combining legitimate work in mechanical drawing with sheet brass constructions have been very favorably commented on by teachers of similar branches in New York and other neighboring cities.

We have, during the year, successfully maintained in other phases of school life an interest which has shown itself in continued desire to be helpful. The department has made, besides its contribution of doll-houses and single bits of apparatus for school room use, 3,000 wands for the work in physical culture and 2,000 looms for use in the primary grades. We expect, in the coming year, to offer very material assistance in the outworking of the new course of study in elementary science.

At the High School we are doing much to stimulate what Judge Grosscup in a recent utterance calls "the dominant instinct of the Anglo-Saxon race—measurable individual independence and the opportunity to measurably exercise individual dominion." All work in our mechanical drawing department is absolutely individual, and this

You Are Viewing an Archived Copy from the New Jersey State Library

is so for two reasons; in the first place, we are aiming to get the greatest possible amount of personal thinking and doing for the pupil's own best development, and in the second place, the pupils do not come to their mechanical drawing as classes, but as individuals from any and all classes simultaneously; resulting in all doing different things at any one period, and bringing about the necessity for individual treatment of the subject. The subject has undergone a revision to make it at some points more nearly fit recognized needs. A system of indexing and filing drawings has been introduced, which together with several other innovations, is serving to keep the students familiar with the very best practices in up to date shops and draughting rooms.

In our shops at the High School, the craftman's spirit is dominant. There is here noticeable an enviable pride in turning out work that will bear comparison with that done along similar lines in the world of craftwork outside. The teachers are doing all in their power to encourage this feeling of self-reliant artisanship. Special attention is given to the outworking of individual thought in construction in structural and decorative design. The relation of the individual to the community is accented by testing the ability of each member of a class to contribute his part toward the construction of a piece of furniture for the common good, that is, for general school purposes. In such a case, the failure to realize a given standard of accuracy is most sadly apparent as soon as all the parts are brought together to make the desired whole.

At the Normal School, as heretofore, the general aim has been to familiarize the students with the tools, materials, and processes that are used in the manual training of primary grades, and to so direct their study along these lines that when they come to have classes in charge, the students may be able to organize the handwork of the grade and definitely relate it to the life of the school.

Sharing in the common lot of all the departments represented at this school, we have no adequate place for the proper prosecution of our work. There ought to be room to build communal projects illustrating the function of construction in developing work about various centers of interest.

These interrelated features which constitute the real essence of the manual training work for the lower grades, may now only be hinted at in passing. Nevertheless, we are doing the very best we can under present conditions, and the students as they come to be

You Are Viewing an Archived Copy from the New Jersey State Library

teachers are taking up the related and occupational work in their several classes in a very intelligent manner.

In the ungraded schools, we are grouping some of our work about such centers of interest as commerce, typical industries, transportation and home life. The results so far are very satisfactory. In this line of work it has been possible for the special teacher to so plan that the thought developed during a directed lesson could be practiced as self-directed work between one lesson and the next. The interest has been sustained and intense. There can be no doubt as to the value of such engrossing work on the character of these pupils.

I am sure the scholars in these schools would be greatly benefited if they could give a portion of each day to some form of hand work that had a pronounced vocational trend. By far the larger proportion of these boys must live by the work of their hands so that their economic efficiency will increase in just the proportion that their hands become skilled in honest work."

Grade or grades in which subject is taught—7 A and 8 A.

NEWARK TECHNICAL SCHOOL.

CHARLES A. COLTON, DIRECTOR.

Hon. Charles J. Baxter, State Superintendent of Public Instruction, Trenton, N. J.:

SIR—The Newark Technical School has made good progress during the past year, and its value to the community has been recognized by "The Manufacturing Jewelers' Association" of Newark, the members having established two scholarships in the course for Jewelers and Silversmiths, with the following conditions:

You Are Viewing an Archived Copy from the New Jersey State Library

(1). "To the student of the first year class showing the greatest improvement during the year, tuition for the second year class."

(2). "To the student of the second year class showing the greatest improvement during the year, tuition for the third year class."

The value of these scholarships is thirty dollars each.

They are available only to those students who are taking the full course of study requiring five years to complete, and are to be awarded at the close of each school year by a jury composed of three members of "The Manufacturing Jewelers' Association," with the Director of the school as an ex-officio member, the instructors in the course constituting an advisory committee to the jury.

With the beginning of the year 1907-1908, a course of study in "Building Construction" will be organized, intended for all those who have to do with the estimating of plans for buildings, whether carpenters, masons or architect's assistants.

This course will require five years for completion, the first two years being the same as for the general course.

During the remaining three years instruction will be given in the following subjects, viz.: figuring quantities of materials, architectural drawing consisting of quarter scale plans, three-quarter inch scale details, elevations and framings, full size sections of construction in wood, stone or brick-work.

In addition to the above, instruction will be given in geometry, theoretical mechanics, theory of construction loads, reactions, design of beams, wooden and cast iron columns, simple wooden roof truss, materials and processes of construction, simple specifications, re-enforced concrete construction, general building laws with some reference to the local statutes, kinematics, heat, electricity, light and sound.

The school now offers the following courses of study:

1. General Technical.
2. Jewelry and Silverware Design.
3. Building Construction.
4. Theoretical and Applied Electricity.
5. Electroplating.
6. Electric Wiring.
7. Plumbing.

In addition to the above, special courses are offered in free-hand, mechanical and architectural drawing, modeling and painting.

You Are Viewing an Archived Copy from the New Jersey State Library

There is a growing demand for the establishment of day classes of a higher standard than those meeting in the evening, giving practical as well as theoretical instruction along mechanical and electrical lines.

To meet this demand an additional building is required for mechanical and electrical laboratories equipped with proper tools and machines. Such a building will cost approximately $125,000.00, and it is proposed by the Trustees to make an effort during the coming year to raise that amount.

Having this project in contemplation for some time, the Trustees decided some ten years ago that all tuition fees received should be set aside for a building fund, and kept for that purpose until a sufficient amount of money could be obtained by appropriation or donation to pay for the proposed building.

This fund with interest now amounts to $12,870.43.

The ground for the building has been acquired and it is hoped the plan can be consummated within the next two years.

Appended is the financial statement for the year ending April 30th, 1907:

Number of lessons per week given each class—One.
Length of lesson—2 hours.
Amount expended for manual training during the year—Plant, $4.50; material, $3.72; salaries, $1,121.36; total, $1,129.58.
Total amount expended to date—$13,856.15.
Grade or grades in which subject is taught—1st and 2nd year High School.

WOOD-WORKING—(B) CARVING.

Name of teacher—Gustave A. Beyer.
Is teacher engaged exclusively in this work?—No.
Number of pupils—Male, 108.
Number of lessons per week given each class—One.
Length of lesson—2 hours.

COOKING.

Name of teacher—M. Alice Fuller.
Is teacher engaged exclusively in this work?—No.
Number of pupils—Female, 158.
Number of lessons per week given each class—One.
Length of lesson—2 hours.
Amount expended for manual training during the year—Plant, $202.14; material, $152.98; salaries, $747.91; total, $1,103.03.
Total amount expended to date—$9,973.30.
Grade or grades in which subject is taught—1st and 2nd year High School.

SCHOOL OF INDUSTRIAL ARTS, TRENTON.

FRANK FORREST FREDERICK, DIRECTOR.

Hon. Charles J. Baxter, State Superintendent:

DEAR SIR—A year ago this school reorganized with a new director and with several changes in the faculty. A four-year course of study leading to a diploma was established. This course of study is identical with those offered by the leading art schools and the diploma will have full value in the educational world. The courses in mathematics, mechanical drawing and mechanics have been organized to form a three-year mechanics' course leading to a diploma. The organization of these courses in no sense stands in the way of anyone electing any line of work offered by the school, but the necessary preliminary studies must be passed in order to profit by the instruction given. These changes have been made in order to put the school upon a higher plane than it formerly occupied.

A school of this character should meet the special industrial needs of the community by which it is supported. Accordingly, courses in ceramic design and decoration have been established. Next year a three-year course in Industrial Chemistry, leading to a diploma, will be established and the application of modeling to the ceramic industry will be made more direct.

The building trades play a very important part in the industrial life of any city. This school cannot undertake to teach trades, but the ability to read drawings is now part of the necessary knowledge of every carpenter, mason, cornice-maker, plumber, electrician, etc., and the school is now so organized and equipped that it can give the training. Additional teachers will be employed, if necessary, to accommodate all who may enroll in mechanical drawing classes.

Two hundred and fifty students were in attendance during the year for periods varying from three nights to the entire year. Ninety of these received certificates, having attended 90 per cent. of the sessions of the classes in which they were enrolled and performed the work to the satisfaction of the instructors and the Director.

In addition, four students were graduated in the Fine Art Course and two in the Mechanics' Course.

You Are Viewing an Archived Copy from the New Jersey State Library

Twenty-nine courses are now offered, in day and evening classes, by twelve instructors.

SCHOOL OF INDUSTRIAL ARTS.

TRENTON.

A. E. Dodd, Manual Training Instructor and Director.

MANUAL TRAINING REPORT.

Causes of which the manual training movement is the result.

Comparatively few years ago the population in cities was but one person to 25 in the country. To-day the ratio is one in the city to 3 in the country. As a result of this change, we find child-life to-day very different from that of former times.

Not only on farms, but in villages and smaller towns, boys and girls had their regular duties in the work of the household; certain work was assigned, and from these responsibilities children learned through daily experience the use of the hands and common sense in making and fixing things of use. Those homes were educational centres of superior efficiency, for both boys and girls received a wholesome discipline in hand-work and a vigorous training in the virtues of doing. Under those conditions there was no real need for the school to supply more than purely literary or so called cultural training.

In the modern town or city life, how very different. There are practically no activities of the value we formerly found and the all-around education once given to every girl and boy in the home is now impossible. As a result, we find the natural impulses for activity on the part of the child often allowed to run on without direction. Many homes offer almost nothing to supply this need in a child's nature and it is but natural that these activities are often misdirected into channels which cause trouble. The school has done little more than coop the child up and make him sit quiet, studying abstract things in an uninteresting way. Only when a boy goes wrong because of these misdirected energies have we allowed him opportunity for work with the hands—and then in the Reform School. In some localities it is impossible for a child to have what is naturally his right, except as he does something to earn the reputation of being bad.

Nowhere has the influence of the old industrial training been set

You Are Viewing an Archived Copy from the New Jersey State Library

forth more clearly or more concisely than in the recent report of the Commission on Industrial and Technical Education for Massachusetts. That report shows that formerly the apprentice system did its full share in training for efficient citizenship, and that the decay of that system is largely responsible for the present state of affairs. "Every day lost by the apprentice system," says the report, "was gained by the school until imperceptibly under steady pressure the school came to stand as the only means of training and the child came to be almost wholly separated from the activities of life."

Turning now to the present Industrial Education movement, it is easy to trace its origin to the failure of the public schools to keep up with the times. Industry has developed faster than the schools have developed on the side of industry.

The problem of manual training, then, is not trade teaching, but something much broader and far reaching; namely, the creation of what may be called "Industrial Intelligence." It is the inability of the ordinary young man to interpret industrial life that is responsible for the cry from manufacturers that they cannot secure help with the necessary intelligence. This feeling which has been growing the country over is responsible for the growth of manual training, for upon the public school has fallen the burden of supplying this "old fashioned" "motor" training if it is to efficiently serve those who support it.

THE EDUCATIONAL SIDE.

In a general way this work is made educational in the highest and best sense. Although it educates the motor senses and motor energies, it is not merely training of the hand, but training by the hand. The main purpose is to make boys and not things, though the things must be well made if the boys are well taught. The aim in manual training is mental development, the acquirement of an intelligent and practical knowledge of the principles underlying good hand-work through what may be called the laboratory method. Pupils are given tools and wood, or other materials, and by the right methods of instruction in the class are led to do the work each for himself. Few words, written or oral, come between the boy and his job. Hence this instruction is valuable for all. It excites interest, quickens intelligence, develops habits of attention, perseverance and industry, trains the eye to accurate observation, and trains the hand to dexterity in execution. By means of a cost card system adapted to school

You Are Viewing an Archived Copy from the New Jersey State Library

needs, the boy is brought to a realization of the economic side of the work. This is of prime importance in its practical relation to the outer industrial world. In this work the boys, of course, learn the use of tools, but the best lessons learned are lessons of patience, persistency, carefulness, thoroughness, industry and efficiency. In this work the neglect and shiftlessness of to-day cannot be made up on the morrow. Faults big and small stare the makers in the face day after day.

Although little has been said of this work in specific relation to girls, the principles apply equally as well, the only difference being in the kind of work best suited to the purpose.

WORK DONE THIS YEAR.

I. In the temporary shop installed in the High School, and 7th and 8th grade classes of the Centennial School, 257 in number have received regular shop work in periods of one hour and a quarter once a week.

II. A year's course in elementary hand-work has been given the training class students, 32 in number. Special emphasis has been laid on this work in its relation to other school work.

III. A small equipment for hand-work has been installed in the Annex of the Washington School and your Supervisor has given special attention in preparing the teacher in charge and in the working directly with the boys of the truant class.

IV. So large has been the interest in elementary hand-work that in response to the numerous requests for help among the city teachers, two classes each of 24 teachers have met from 4 to 5.30 once a week. These courses have consisted of ten lessons and two lectures in elementary hand-work for the grades.

The following recommendations are made as a reasonable and conservative extension of hand-work in the schools of Trenton.

I. That a shop equipment be placed, one each at the Skelton and Jos. Wood Schools for the accommodation of the boys of the 6th, 7th and 8th grades of these schools.

II. That a shop equipment be placed in the basement of the McClellan School for the accommodation of the boys of the 6th, 7th and 8th grades of that school.

III. That seven equipments for knife work and elementary manual training be placed in the following schools: Washington, Harrison, Centennial, Hewitt, Hamilton, McKinley and Cadwalader.

You Are Viewing an Archived Copy from the New Jersey State Library

IV. That two competent men be secured as instructors in manual training, one to be placed in charge of the shops at the Skelton and Joseph Wood Schools, and the other to take charge of the shop in the McClellan School, and also teach the Centennial School classes attending the shop located in the High School.

V. That a competent teacher be employed to teach elementary hand-work in the schools in which the knife-work equipments will be placed.

VI. That a competent teacher be obtained as instructor of sewing for the girls of those grades in which the boys have manual training.

A MODEL MANUAL TRAINING OUTLINE.

General Purpose.—To give the pupil a broad experience in using a number of materials and tools as a means for interpreting industrial life, and thereby affording a variety of mental activity and discipline with large opportunity for self-expression and progressive individual growth.

The underlying idea in the course is to present a certain amount of prescribed work involving such fundamental and related operations as seem necessary for the best development. Accompanying the prescribed work, opportunity and encouragement are given to each individual to show his originality and exercise his inventive powers either in making a variation of the models or in the form of free work. This work cannot be shown here.

Free work growing out of pupils' own needs, or needs of the school, is limited by the pupil's capacity and skill acquired from the regular exercises.

The bringing of a close relationship between principles and their application throughout the course, tends to vitalize it and aids the student to make a more rational progress through an understanding of and interest in the work.

GRADE COURSES.

FIRST GRADE.

Paper Cutting.—1. Free cutting, illustrating stories, songs, trades, and games; 2. Geometrical cutting, cutting to lines; 3. Folding: (a) Geometrical folding and cutting of 8 inch x 8 inch squares, resulting in a construction whose sides have definite dimensions which pupils are able to measure; (b) Simple folding.

You Are Viewing an Archived Copy from the New Jersey State Library

Card-Board.—Paper and card-board work based on geometrical forms has a special value in its application to the concrete number work of the primary grades. The sequence of models is arranged with a view toward assisting the development of this constructive number work as well as embodying such forms of training as are obtained from this phase of constructive work.

Material used: Two-ply and three-ply paper, punch, ruler.

Models: ruler, shipping tag, book-mark, pin-wheel, etc.

Aim: The development of form, Correlation, with stories, as Hiawatha, etc.

Clay Work.—Three proportions as moss work, making the bowl, saucer, jar adobe, house, etc.

Textiles.—Making of a pasteboard loom with warp threads one-half inch apart. Making of simple mat or rug. Aim: To lead to an interpretation of primitive life. Correlation: With art by introducing various colors in the woof. Form and proportion in the clay work.

SECOND GRADE.

Paper cutting.—1. Free cutting continued from first grade and more advanced subjects taken from poses, stories, etc.; 2. Symmetrical cutting is carried on with attention directed towards its application to the art work and becoming more and more a phase of it.

Cardboard.—Geometrical forms used in concrete number work. Models, boxes, mats, blotting pads, etc.

Aim: Development of ideas of volume in addition to form.

Correlation: Number in relation to area and to type forms.

Clay: Three proportion work emphasizing essential detail. The form work through the outlining and building up methods. Greek and Indian pottery.

Textiles: Weaving of rugs of slightly complexed design. Use of finer warp in making a toy hammock of coarse wicking or cotton cord.

Aim: Interpretation of primitive life.

Correlation: With social life; with art in the use of colors and design.

THIRD GRADE.

Cardboard: A continuation of the work in second grade.

Models: Picture of frame, easel, pen wiper, etc.

You Are Viewing an Archived Copy from the New Jersey State Library

Aim: A finer adjustment of muscle.

Correlation: With art in design and color, with number in a growing perception of volume.

Raphia: Braid in three strands resulting in a work-box, doll hat or card tray.

Clay: Higher relief and panel work, using geometrical and conventional flower designs. Simple statuary.

Textiles: Weaving rug, dish cloth on loom made by pupil.

Aim: Freedom of symmetry and proportion without exact measurement.

Correlation: Same as in Second Grade.

FOURTH GRADE.

Cardboard: Making of useful models, embracing some of the more difficult geometrical forms as waste basket, (based on quadrangular prism) pencil box, trays, etc.

Aim: Knowledge of form and relation of size to form.

Correlation: With art in design and proportion.

Clay: Continuation of Third Grade work. (a) Representative groups, as bird's nest, plate of fruit, feudal castle, etc.; (b) simple moulding and casting in plaster paris mould.

Textiles: Weaving on more complex loom, introducing use of needle and shuttle. Study of wool, flax, cotton, etc.

Material: Small wooden loom and jute of various colors.

Basketry: Baskets of reed, reed weaving, reed and raphia weaving in mats, trays, etc.

Aim: To furnish freedom of proportion without exact measurement.

Correlation: With art in suitable combinations in designs and colors. History, study of development of loom, textiles and pottery; with Geography in spinning, carding, etc.; as a product of cotton. Location of clays for various uses.

Aim: The interpretation of trade processes. Loom weaving and pottery as an interpretation of art. Personal experience in planning and re-inventing. To make familiar with life's necessities and environment.

NOTE.—The amount of work in basketry is not great because of its limited educational value. *Variety* of training instead of technical skill in a narrow field is the work of the public school.

You Are Viewing an Archived Copy from the New Jersey State Library

FIFTH GRADE.

Cardboard: The continuation of useful models of construction with geometry as the basis. Wagon and other models of transportation, brush-broom holder, fan, etc.

Aim: Combinations and relations of figures as a basis of measurement in accurate results. In this grade the work is an intermediate step with stronger work in obtaining power and facility in the use of tools for the expression of ideas.

Correlation: With art in the perception of kind and amount of decoration suitable to a given object. With number in fractional relations in measurement and form.

Clay: Study of modern pottery: (a) Potter's wheel; (b) Preserving and hardening clay in kiln; (c) Decoration by means of pigments.

Woodwork: Materials—One-half inch, three-sixteenths inch and one-quarter inch strips of pine or bass wood.

Models: Name plate, warp stretcher, weaving needle, shipping tag, match strike, etc.

Aim: The woodwork is centered in its development about the simplest of tools, the knife. All other tools are a modification of the knife, or wedge idea; and so in this elementary work these tools come in as convenience by which the mastered knife work may be more speedily accomplished as it re-appears in the course.

Sewing: The use of implements, basting, running, over-handing, drafting. Make a pincushion to be used during the sewing periods. A review of stitches learned, hemming, cutting measures and basting wide hems. Make a doll's apron. Drafting, back-stitching, sewing on tape and finishing ends of tape. Making of a bib, original design.

Supplementary work. A full-sized apron, hemmed top and bottom. Cross stitch decoration. Stocking darning. Canvas work: Making of a hand-bag.

SIXTH GRADE.

Woodwork: A continuation of fifth grade work in combination with simple mechanical drawing for a working use.

Bent iron work: Several fundamental elements of construction leading to a practical article, as pen rack, plant-holder, coffeepot stand, bridge-truss, roof truss, etc.

Aim: A cultivation of the sense of touch and an increase in the

You Are Viewing an Archived Copy from the New Jersey State Library

discrimination of form. The development of proportion and freedom of measurement.

Correlation: With art in the cultivation of the fitness of proportion. With number as applied to stress and strain in a miniature bridge or truss.

Sewing: Sewing on buttons, button-holes in cotton cloth, mending, sewing on patches in muslin and gingham, back-stitching, gathering and stroking the gathers, sewing gathers on a band, using half-back stitching; the band to be finished with hemming. Estimating quantity of material; hemstitching; dress darning, drafting, cutting with patterns, study of color harmony in connection with textiles, applied design; outline stitch; eye-let work—catch stitch, feather stitch.

Supplementary Work: Flannel sack, plain undergarment, handkerchiefs, table linen, drafting a skirt with or without a yoke. Fancy apron, neckwear.

Aim: To present such fundamental principles and their application as shall give to the pupils habits of attention and exactness. To give a high idea of the ability, to use one's powers definitely and intelligently.

Correlation: With the home and life environment.

SEVENTH GRADE.

Woodwork: Elementary construction involved in useful articles, used in home and school, as garden stake, hat rack, bracket shelf, broom holder, nail box, etc.

Aim: To stimulate ingenuity and test ideas of accuracy, to give a realizing sense of what hand labor really is.

Correlation: With denominate numbers in the use of instruments for measurement.

Sewing: Sewing bias seams; the reversible seam; sewing in a gusset; felling; making of ruffles for trimming; hemmed patching; over-hand patching: dress darning in woolen materials; button holes in cloth goods; drafting to scale and use of patterns in making full-sized garments. Drawn work: hem stitching, French knots, matching and joining embroidery; canvas work with silk and beads.

Supplementary Work: Full sized undergarments; corset cover; flannel or white skirt; dress skirt and trimming; hemming and

You Are Viewing an Archived Copy from the New Jersey State Library

marking household linen; shirt waist or child's dress; fancy collars and cuffs.

Aim and correlation as in preceding grade.

EIGHTH GRADE.

Woodwork: A thorough study of the principles gained in preceding work. Constructive work requiring the use of such tools as gauges, scrapers, etc., which call for a finer control of the hand are given.

Before beginning actual work on a model, a working drawing is made and the different parts are laid out with a view to economy and labor. Original work in applied design as flower-pot stand, book rack, foot-stool, knife box, towel-roller, etc.

Aim: An increase of facility in use of tools and materials, bringing an increased respect for labor and an appreciation of one's fellow workmen.

Correlation: With denominate numbers and with the arts and trades of the locality. Social attitudes and aptitudes. Lines of decoration.

Sewing: Drafting and making garments; dress trimming; folds and slip-stitching; dress fastenings; plackets hemmed; button-holes and eye-lets.

Supplementary Work: Unlined cotton dress; yokes; under-waists with under-arm and shoulder seams; children's dresses with yokes; shirt waist; sack.

HIGH SCHOOL.

FIRST YEAR.

Woodwork. Specialization. Here the potentiality gained through previous discipline is given freedom in form of original work. This causes a higher appreciation of the value of advanced technics and in awakening interest in processes, a mastery of which is essential to further advancement in the field of construction.

Original designs and individual effort in the making of book shelves, medicine cabinet, taboret, Morris chair, library table, etc.

Aim: The discovery of relation between quality and quantity. Test of dexterity and perseverance.

You Are Viewing an Archived Copy from the New Jersey State Library

Correlation: Art in the design of articles of good form and taste. The relationship of decoration and utility.

First Year Drawing: A few necessary and practical geometrical constructions are taken up.

Lettering; working drawings; freehand and with drafting instruments; projections and developments; isometic projections; blue printing and tracing.

SECOND YEAR.

Elective to be proceeded by the first year manual training: Wood turning is given during the first half of the second year to familiarize the pupil with wood turning tools and lathe operations.

The exercises are not taken up simply as exercises, but are combined so as to make articles of actual value. In turning, the following exercises are taken, combined in various articles of real use: Cylinder, step or shoulder bevel or cone rounding, convex, concave, and double curves, finishings, face plate and chuck work.

The second half of the year is pattern making, including both bench work and turning, as a more specialized line of work leading directly into the industries.

In pattern making the simplest construction with the use of pattern makers rule, of a few patterns illustrating, cores, boxes, prints, etc., is given.

Second Year Drawing: Lettering, intersections, cycloid curves, mechanical drawings of forgings and of some simple mechanical device which will consist of detailing and the general or assembly drawing, mechanical freehand sketches, tracing and blue printing.

The courses given are in no wise regarded as complete and such modifications will be made as further experience shows to be desirable.

Annual Report

OF THE

Bordentown Industrial and Manual Training School for Colored Youth

To the State Board of Education, 1906-7

You Are Viewing an Archived Copy from the New Jersey State Library

Report of Bordentown Industrial and Manual Training School for Colored Youth.

To the Hon. Charles J. Baxter, State Superintendent:

DEAR SIR—I respectfully submit herewith the report of the Manual Training and Industrial School for Colored Youth at Bordentown for the school year ending May 31st, 1907. The work up to this time has been mainly along academic lines supplemented to some extent by industrial work with the girls in the Department of Home Economics divided under the two heads of sewing and cooking.

On May 3rd the State Board of Education held a meeting at the school and had as its guest Dr. Booker T. Washington, of Tuskegee, Alabama.

The legislature during the session of 1907 appropriated $30,000 for the erection of a dormitory and laundry and $12,000 for maintenance. A portion of this to be used to equip the Department of Agriculture.

General Oliver O. Howard was the principal speaker at the Commencement. Mr. T. Thomas Fortune of Red Bank and Hon. W. D. Forbes delivered addresses. Mr. Forbes presented the diplomas to the graduates of the school and outlined some of the changes that were to be made in the work of the school for the coming year. Among other things he called attention to the fact that instructors had been secured to take charge of the Department of Agriculture, Home Economics and Manual Training with the understanding that the opportunities for industrial training should be greatly increased.

The graduating class of 1907 from the academic department numbered ten. The same students also received certificates for proficiency in dressmaking, cooking and carpentry.

The W. D. Shipps scholarship prize, a silver medal, was awarded to Jospeh Franklin.

The Mrs. Charles J. Baxter prize for improvement in English was awarded to Frances Palmer.

You Are Viewing an Archived Copy from the New Jersey State Library

The Mrs. J. Bingham Woodward prize for dressmaking was awarded to Lula Davis.

The Principal Gregory prize for plain sewing was awarded to Edith Clarkson.

Prize in carpentry to Albert Goines.

Prize in Mathematics, Albert Goines.

There were 72 girls and 44 boys enrolled in the school during the year.

PRINCIPAL'S REPORT.

The academic year closing with June 30th was marked with progress in our schools in all essential points. The general health of the pupils was good, and there were practically no contagious diseases.

The enrollment was very much in advance of that of the previous year. That of the Normal was 503, an increase of 44; the Model, 641, an increase of 44; that of the Farnum, 124, a decrease of 1; the total was 1,268, an increase of 87.

During the year 242 new students entered the Normal School, 218 in September and 24 in February. Of these new students 160 were high school graduates, 54 were within one year of high school graduation, entering the three years' course on certificate, 16 were admitted on examination, 6 on teachers' certificates, 3 re-entered, having been absent for a period, and 3 entered on college diplomas.

The number of graduates of four years high schools was 38 more than that of last year. This gain is a point of encouragement. It denotes a growth in the high school work, as well as an increase in the high school output coming to us, and an improvement in the general educational qualifications of our students.

My report of last year showed an increase in the average monthly beginning salaries of the graduates. This year shows a substantial increase over last, the beginning average monthly salary being $48.11. Very few of the appointments have been in the rural districts; most have been in the towns; some have been in the large cities. A number of the large cities have requested us to name some of the stronger students of the class, and these have been placed at the same time with the stronger applicants from local training schools. The removal of this discrimination against our graduates in the cities referred to gave to our school a decided encouragement.

The reports received from the graduates of previous years show that many of them are going into the more prominent appointments. A number of them have gone into New York City, drawn there by the larger salaries.

As in the past, the demand for our graduates has been much greater than the supply.

THE GENERAL SCHOLARSHIP OF THE SCHOOLS.

A complete exhibit of the work of the Normal, together with the Model, was sent to the Jamestown exhibit and was awarded a silver medal, the highest award given for any departmental exhibit.

You Are Viewing an Archived Copy from the New Jersey State Library

The department of instrumental music and voice training has had a marked growth. It has been the object to develop such a conservatory of music as would command the highest respect of the clientelle of the school and make it unnecessary for persons to go to the distinguished teachers of New York and Philadelphia, excepting possibly for the very most advanced phases of their work. If the present growth of the Department continues, this object will soon be achieved. A number have already taken the certificates of graduation from these music courses, which certificates are licenses to teach, so far as the music itself is concerned.

The legislature of 1907 granted an appropriation of $5,000 for extra compensation to the various school districts in the State for training the Normal School pupils in the art of teaching. For some years past it has been our custom to assign the members of the graduating class to different schools in the State for a month of student teaching, in order that they might gain experience under supervision in the public schools as they are in fact, previous to their taking appointments. These assignments were made in consultation with the various local school authorities. The results of this experience were good, but not sufficiently determinate to prove entirely satisfactory to the people of the State. The purpose of the appropriation was to enable the State Board to make definite arrangements with local school authorities for the designation of given qualified teachers under whom these student teachers might be assigned, and who should be paid for their services and increased responsibility.

The plan, as thus far developed, has taken the form of establishing what are known as student-teaching centers. For the purpose of introducing the system, letters were sent to the superintendents of a number of the leading schools that were so located geographically as to accommodate all of the members of our graduating class within easy distance of their homes. These letters set forth the proposed plan and invited conference and co-operation. The result was the establishment of student-teaching centers at the following places: Somerville, Plainfield, Westfield, Summit, Freehold, Ocean Grove, Long Branch, Dover, New Brunswick, Nutley, Princeton, Passaic, Rutherford, Lakewood, Haddonfield, Atlantic City, Bordentown, Lambertville, Kearny and North Bergen.

These centers are well located geographically, but are chosen tentatively and may be added to or subtracted from. The plan, briefly stated, is as follows: A center is chosen under a competent superin-

You Are Viewing an Archived Copy from the New Jersey State Library

tendent who, by authority of his local board designates a number of the teachers of his district whose education and experience have been such that they are qualified and willing to take student teachers for a given amount of apprenticeship and experience. The authorities of the Normal School assign the student teachers accordingly. Mutual relations exist with these student teaching centers. The superintendents and teachers inquire into the training and education the student teachers have had before coming to them, and the normal training teacher and principal are invited to visit these centers. One very marked advantage that grows out of the system is that those who are to employ the graduates of the Normal School share in their training. The system, more than any that has been in practice, will tend to cause the State to feel that it is really taking care of its own. Heretofore, many localities have thought of the State Normal School as in some way an institution separated from the State system, and in which they had no particular share of responsibility or interest. This new plan will do much to correct that thought.

The phenomenal growth and development of the high schools in the State has reflected its influence on the Normal School, both in the increase in the number of students that has come to us, and in the general improvement in their qualifications. There is a constantly increasing spirit of co-operation with us on the part of the high schools. We are asked by them to report on the status of their pupils with us and to make such suggestions as seem wise. We have reciprocated in the same spirit. This mutual recognition of the parts taken both by the Normal School and high schools in the preparation of the teacher is important.

The need of a course for the preparation of high school teachers referred to in previous annual reports is still strongly felt. We have been anticipated in providing for this need by our neighboring states. Massachusetts, for instance, has had such courses in her normal school for years, notwithstanding the fact that she has seven colleges where women can go, five of which have pedagogical courses. The Bridgewater Normal School has forty registered in these high school teachers' courses in its last report. New York State has, in addition to eleven places where women can take a college education—eight of which have pedagogical courses, her Normal College at Albany, under the public system. Pennsylvania has twenty places where women can get the advanced education, seven of them giving pedagogical courses. Surely New Jersey should make provision for her own if

You Are Viewing an Archived Copy from the New Jersey State Library

she is to keep pace with her neighbors in the advancement of higher education.

The growth of the Model School, the success of its graduates in entering the various colleges and technical schools, and the rank of its work on exhibition, must give an increased appreciation of the part it is taking in the State educational system.

Our buildings were put in thorough repair during the summer.

ATTENDANCE.

NORMAL.

	Men.	Women.	Total.
First quarter	13	464	477
Second quarter	13	447	460
Third quarter	12	432	444
Fourth quarter	12	427	439

Total number of students enrolled during the year, 503. Men, 13; women, 490.

MODEL.

	Boys.	Girls.	Total.
First quarter	231	367	598
Second quarter	227	364	591
Third quarter	221	366	587
Fourth quarter	215	348	563

Total number of students enrolled during the year, 641. Boys, 247; girls, 394. The average attendance per quarter was 585. Boys, 224; girls, 361.

FARNUM.

	Boys.	Girls.	Total.
First quarter	48	65	113
Second quarter	53	63	116
Third quarter	52	64	116
Fourth quarter	51	64	115

Total number of students enrolled during the year, 124. Boys, 55; girls, 69.

The Normal enrollment is greater than that of last year by 44. The Model enrollment is greater than that of last year by 44, and the average attendance is 33 more than last year. The enrollment in the Farnum is one less than last year, making the total enrollment 1,268, or 87 more than that of last year.

You Are Viewing an Archived Copy from the New Jersey State Library

GRADUATES.

The number of students graduated from the Normal School during the year was 152, of whom 8 were men.

The average monthly salary received by the class is $48.11. being $2.33 more than that received by the class of last year, and is the largest average salary received by any beginning class in the history of the school.

The class of 1906 have raised their average salary from $45.78 to $51.07.

The following table will be of interest, showing our representation in the different counties, according to the State Superintendent's report:

COUNTIES.	Number in Normal.	Number of graduates of N. J. Normal employed.	Number of State Normal graduates of other States employed.	Number of graduates of 1907 employed.
Atlantic	11	64	101	2
Bergen	28	224	181	29
Burlington	57	89	27	6
Camden	15	55	160	7
Cape May	4	15	14	0
Cumberland	20	35	9	2
Essex	29	275	623	16
Gloucester	10	18	11	3
Hudson	34	167	306	13
Hunterdon	34	25	16	1
Mercer	70	139	18	13
Middlesex	35	78	20	1
Monmouth	43	132	116	9
Morris	30	92	67	1
Ocean	6	11	23	2
Passaic	5	94	194	4
Salem	16	27	9	1
Somerset	10	48	38	4
Sussex	12	14	16	4
Union	22	79	116	5
Warren	7	19	11	0

There were 5 students from other States.

You Are Viewing an Archived Copy from the New Jersey State Library

The number of graduates of the Model School was 23; 7 boys and 16 girls. Of these, 5 entered the Normal School; 13 entered college; 1 is pursuing a post graduate course, and 4 are at home.

The number graduated from the Farnum was 11, 4 of whom entered the Normal School.

Further particulars concerning the Farnum School will be found in the last part of this report.

TEACHERS.

At the close of the fall term, Mrs. Nella Elberson, temporary instructor in the sixth grade of the Model, withdrew, and Miss Alice F. Wyckoff was appointed to fill the vacancy. Miss Wyckoff was a graduate of Vassar, and of the State Normal School, and had had one year's successful experience in teaching.

Miss Helen P. Hutchinson was appointed associate in the department of English. This appointment was in recognition of Miss Hutchinson's distinguished work in that department.

At the close of the spring term, Miss Eleanor B. Parmenter, instructor in history and reading in the high and grammar departments of the Model School, was granted leave of absence for one year, that she might take certain college work. This vacancy was filled by transferring Miss Alice F. Wyckoff from sixth grade work, and Miss Katharine S. Merrell was appointed to teach in the sixth grade. Miss Merrell was graduated from Vassar College and had had four years' experience in teaching.

Miss Vera M. Esler, was appointed to assist in the department of music and do such further work in the grades as her time might permit. Miss Esler was graduated with distinction with the class of 1906 of the Normal School, and had had one year of successful experience in teaching in the schools of Newark.

Miss Edith A. Loos, associate instructor in chemistry, withdrew to accept a regular appointment to teach at East Rutherford. Miss Sara N. Marcy, of the Class of 1907, of the Normal School, was appointed to fill this vacancy.

Miss Edna Sheppard, associate instructor in physics, withdrew to accept an appointment in the Farnum School. Miss Lucretia G. Charlesworth, of the Normal Class of 1907, was appointed to fill this vacancy. These two latter appointments were—according to the custom for these associate positions—recognitions of the special success of the appointees in their respective lines.

You Are Viewing an Archived Copy from the New Jersey State Library

The members of the faculty during the year visited a number of the leading schools and colleges for the purpose of keeping informed of the practices in these institutions. They were also represented in many teachers institutes and associations and educational gatherings of various kinds.

The usual number of faculty meetings was held. The following were among the subjects discussed: Is the literary contest, as at present conducted, conducive to the best interests of the school? The literary societies. Individuality and the attention to the individual in our school. School standards. Summary of answers to questions preliminary to the course in Psychology. The relation of nature work to present-day problems with insects and plants.

One of the most interesting features of the year was a banquet given by the faculty to Prof. Austin C. Apgar and Miss Sarah Y. Ely, in honor of their having taught forty years in the State Schools. The occasion brought forth many beautiful tributes of a literary character, both from the members of the faculty and from former graduates, tributes that we all hope will make the remaining years of their service happier by the knowledge of the degree in which they are appreciated.

APPROVED AND REGISTERED HIGH SCHOOLS.

The plan of approving or registering high schools and receiving the graduates of such schools into the Normal School on their certificates is continued. A school to be on the Approved List must have a full four-years course. A school to be registered must have a full three-years high school course.

MODE OF APPROVAL.

I. Upon the application of the principal, local superintendent and president of the board of education of any high school in this State, the Committee on Education shall make an examination of the school on behalf of which such application is made, and if, in its judgment, the course of study and discipline of the high school in question shall warrant it, said high school shall be placed upon the Approved List, or registered, depending upon the length of the course, and a notice to that effect sent to the secretary of the board of education of said school. The fact shall also be reported to the State Board of Education at their next meeting.

You Are Viewing an Archived Copy from the New Jersey State Library

II. Properly certified graduates of any approved high school or registered school shall be admitted by the Principal of the Normal School to the corresponding course of the Normal School without examination.

III. On the report of the Principal of the Normal School that the graduates of any approved or registered high school who may have entered the Normal School without examination are, after due trial, found to be not properly qualified to carry the work of the Normal School, the Committee on Education may strike the name of such school from the approved or registered list. Notice of such action shall be sent to the secretary of the board of education of the school in question, and it shall also be reported to the State Board of Education.

HIGH SCHOOL SUBJECTS.

The following are suggested as standard high school subjects, and are supposed to have been preceded by a thorough grammar school course of four years, including orthography, reading, English grammar, geography, United States history, elementary civics, drawing, practical arithmetic, science lessons, singing, etc.:

Mathematics:

Algebra, through quadratics and progressions.
Geometry, plane and solid, with original work.

Physics—a year's course:

With experiments by the teacher.
With laboratory work by the pupils.

Chemistry—a year's course:

With experiments by the teacher.
With laboratory work by the pupils.

Physiology and Hygiene:

With direct reference to physical training.

Bookkeeping:

Single and double entry.

Commercial Law.

Botany:

At least a five-months' course, including practical work with plants.

You Are Viewing an Archived Copy from the New Jersey State Library

Zoölogy:

At least a five-months' course, including a practical work with insects and animals.

General History:

Grecian history, Roman history, English history, advanced American history.

Civics.

Physical Geography:

The earth as a globe. The atmosphere, the ocean and the land; with observational exercises in the field and laboratory.

Drawing:

The ability to sketch objects, singly and in groups, and explain the principles governing representation; simple working drawings of geometric solids and joints, the proper placing of views, working to scale and the various conventions used; making of elementary designs from plant-forms, showing an appreciation of balance and harmony.

English:

Ability to describe clearly and artistically, to narrate with an appreciation of the value of climax, together with a detailed knowledge of the principles underlying description and narration. Ability to write clear compositions upon simple themes, to debate orally and in written form, together with a general knowledge of the principles underlying exposition and argumentation.

Literature:

The college entrance requirements, 1906-1908, or the equivalent:

For study:

Burke's speech on Conciliation.
Macaulay's Life and Writings of Addison. Life of Johnson.
Milton's Minor Poems.
Shakespeare's Julius Cæsar.

For reading:

Addison's Sir Roger de Coverley Papers.
Coleridge's Ancient Mariner.
Eliot's Silas Marner.
Irving's Life of Goldsmith.
Lowell's Vision of Sir Launfal.
Scott's Ivanhoe; Lady of the Lake.
Shakespeare's Macbeth; Merchant of Venice.
Tennyson's Gareth and Lynette, Lancelot and Elaine, and Passing of Arthur.

You Are Viewing an Archived Copy from the New Jersey State Library

Latin:

Beginning Latin, with grammar; Cæsar, first five books of Gallic War; Cicero, six orations; Virgil, the first six books of the Æneid; Latin prose composition.

Greek:

Beginning Greek, with grammar; Xenophon's Anabasis, first four books; Homer's Iliad, first three books; Greek prose composition.

German and French:

College requirements.

NOTE.—If a single modern language is elected, it should be pursued at least three years. A full course in one foreign language is much more valuable than partial courses in two or more.

The above subjects, or their equivalents, may be arranged in courses, such as Classical, Scientific, English, but each course should provide for four years of standard work.

NOTE.—Persons desiring to have a High School approved or registered should send to the State Superintendent of Public Instruction for blank form.

Superintendent, under the county system, refers to County Superintendent.

The following schools are on the "Approved List":

LIBRARY.

During the year, a number of new volumes were added to the library, and many of the volumes that had become worn were rebound. Our own library is serving us exceedingly well for reference works, but we are constantly favored, in addition to our own facilities, by the Trenton Free Public Library, and by the State Library, both of which place at our disposal the class of books which are valuable in very special studies, and are yet not in sufficiently common demand to be on our own list.

LECTURES AND RECITALS.

During the year, the school was favored by a number of very interesting and instructive lectures and recitals. Among them were

You Are Viewing an Archived Copy from the New Jersey State Library

the following: Gold and the Golden Age, Joaquin Miller; Lessons for the Normal Teacher Learned from the Study of the Feeble-Minded, Dr. E. R. Johnson, of Vineland; The Social Conditions of Modern England, with Special Reference to Some Present Aspects of the Poverty Problem, Louis Umfreville Wilkinson, B. A., Cambridge University, England; Shakespeare and the Elizabethan Drama, Herman F. Krafft, Newport, R. I. The Merchant of Venice Frederick Manley; Service, President George Edward Reed, Dickinson College; An Educational Composite, President Ethelbert Dudley Warfield, of Lafayette College; Stories for Children of the Grades, Miss Susan Holton; Yellowstone National Park, E. C. Culver, by courtesy of the Northern Pacific Railway; The True Sportsman, Milton Fairchild, Albany, N. Y.; The West Indies and Islands of the Old Buccaneers, Col. George Nox McCain, under the auspices of the State Board of Agriculture; The Encroachment of Formalism in the Kindergarten, Miss Patty Hill, Teachers College, N. Y.; Song recital, Mr. Harry Luckstone, Baritone, of New York; Violin recital, Master Sammy Kotlowsky, New York; Complimentary concert by alumni, Miss Isabel R. Buchanan, of Camden; Miss Cora E. Remington, of Ridgewood, and Prof. Albert T. Stretch, of Trenton. This concert being by the alumni, created especial enthusiasm and pleasure among the student body.

SOCIETIES.

There are nine societies in the school, viz., the Thencanic, composed of young men of the Model School; the Pedagogical Club; the Normal Dramatic Club, and the Shakespeare Society, composed each of young men and women of the Normal School; the Gamma Sigma Society, the Arguromuthos Society, and the Philomathean Club, composed each of young ladies from the Normal and Model departments; the Y. M. C. A. Chapter of the Boys' Hall, and the Y. W. C. A. Chapter of the Girls' Hall.

The general order of exercises in the literary societies is debate, oration, recitation and reading. Each society has associated with it a member of the faculty, who acts as an adviser. The reports both from these advisers and from the executive boards of the societies are that the societies have been in every way prosperous during the year.

A number of the societies gave Friday evening programs of a more or less formal character for the entertainment of the boarders during the recreation hour.

You Are Viewing an Archived Copy from the New Jersey State Library

In addition to these, more formal public programs were given in the auditorium as follows: The Open Secret, by the Philomathean Club: The Worsted Man, Normal Dramatic Club; Miss Fearless & Co., Gamma Sigma Society, Third Annual Minstrel Show of Peach Blossom Troupe, Gamma Sigma Society.

Interscholastic debate between the Thencanic Society of the Model School and the Mu Alpha, of Peddie Institute, on the subject, Resolved: That Cities in the United States Should Seek the Solution of the Street Railway Problem in Private Ownership and Operation. Affirmative, Thencanic; negative, Mu Alpha. The decision was given to the affirmative. The debate was held in the Peddie Chapel. The Alpha and Beta Chapters into which the various literary societies of the school—excepting the Thencanic—classify themselves once a year for a contest, gave a program consisting of piano and vocal solo music, orations and recitations, and a debate on the subject, Resolved: That, in the Casting of the Ballot, the American voter should be influenced by the personal character, rather than the political principles of the candidates for office. This program was a strong one throughout, and in its reflexive action stimulated good work in the literary societies of the school. These societies receive the strongest interest and support from the faculty, as they are believed to contriute greatly to the success of the students in their education.

MISCELLANEOUS ENTERTAINMENTS.

Suitable entertainments were given in recognition of the various holidays, Thanksgiving, Christmas, Lincoln's Birthday, Washington's Birthday, Veterans' Day, Arbor Day. The Christmas program for the high and grammar departments consisted of six scenes from "A Christmas Carol," together with appropriate songs, and a Christmas tree in the Kindergarten. The Washington's Birthday program was a type of a finely thought-out and arranged entertainment, consisting of music and essays on the following topics: An English Critic's Opinion of Washington, The American Historian's Opinion, Things Once New but Never Quite True, A Tribute to Washington, A Modern Application of the Principles of Washington.

Col. E. C. Stahl and Gen. James F. Rusling were the speakers on Veterans' Day. The Arbor Day contribution amounted to about $470. The chief gifts were trees, a beautiful sun-dial by the Normal June class, large colored pictures of Western mountain scenery. The February class presented a desk set, designed by Tiffany.

You Are Viewing an Archived Copy from the New Jersey State Library

A complimentary concert was given by the pupils of the music departments under the auspices of the directors: W. O. Polemann, Paul Ambrose and Albert T. Stretch.

ATHLETICS.

There are two athletic associations in the school, one known as the Athletic Association, the other as the Girls' Athletic Association. The purpose of these associations is to promote interest in games and healthful sports, and general physical development. There were teams in base-ball, foot-ball, basket-ball, tennis, hockey and bowling. Some of these teams were selected from the school as a whole, others from the different classes. Their object was to produce an all-around healthful interest in sports and exercise rather than to produce great expertness on the part of the few at the cost of the many.

The physical training department gave several exhibitions of class work.

SIGNAL.

Our school paper was fairly good in its composition and in its circulation, but did not, as a whole, reach the degree of success that it has reached in previous years.

COMMENCEMENT WEEK.

The Grammar A Class of the Model School gave a program in honor of their promotion on Thursday afternoon, June 13th, consisting of essays, music, a very interesting debate, a scene from "The Merchant of Venice," and drills demonstrating their progress in physical training.

The commencement exercises of the February and June classes were all of a very interesting order. Notable features were the exercises of Senior Day on the lawn, consisting of historic garden dances, and the scheme of the Normal Class Day, entitled "A Masque," a farewell reception, given by the Filipino students who were graduating, and a Thencanic banquet in honor of their twenty-fifth anniversary. The Filipino students fully arranged their program, which consisted in the most part of original addresses. Their guests consisted of their class-mates, their teachers, and those who had been associated with them in their outside experiences in this country, as, for instance, their clergymen and physician. Bishop

You Are Viewing an Archived Copy from the New Jersey State Library

James A. McFaul gave an address in response to their recognition of his kindness, as did also the principal of the school.

The Thencanic reunion brought together a large number of graduates, among whom were representatives prominent in business and the professions, from a number of states. The occasion enrolled the Thencanic as an important factor in the history of the institution.

ALUMNI.

The Alumni Association held its nineteenth annual meeting Saturday, June 15th. The program was as follows:

Song—Greeting .....*Mendelssohn*
Special Music Students: Misses Altorfer, Brokaw, Gibbs, Harned, Mather, McDanolds, McInerney, Sheppard.
Address—By the President.....Number 1907 Typical of the State Schools
Distinctive Features of the State Schools.....Dr. J. M. Green
The State Schools as One School.....Miss Louanna Conover
Songs—*a.* Press Thy Hand Upon My Heart.....
b. Two Rose Songs.....
Miss Helen Pearce.
The State Schools in Their Prime.....Prof. F. H. Scobey
The Schools Now and Then.....Prof. Wm R. Wright
Song—A German Love Song.....By Members of the '07 Normal Class. (Misses Altorfer, Taylor, Mather, Lafetra, Ewen, Finger, Woodruff.)
Lasting Ideals of the State Schools.....
Miss Florence Stryker, Miss Annie Letcher.
A Tribute to Prof. Agassiz.....Prof. Austin C. Apgar
Songs—*a.* A Promise of Life.....
b. A Maid of Picardi.....
Miss Gertrude Schmidt.
The Model School as a Preparatory School.....
Mr. Edward Lawrence Katzenbach.
The Normal School as a Preparatory School.....Dr. Naomi Norsworthy
Personal Experiences and Anecdotes.....

The following officers were elected for the ensuing year:

President—Edward S. Katzenbach, Model, '96, Trenton.

Normal Vice President—Florence E. Stryker, Normal '87, University Court. 419 West 118th St., New York City.

Model Vice President—Mrs. Florence Sinclair Parker, Model '78, Trenton.

Recording Secretary—Mrs. Leila Gwinner Trego, Model '92, Newtown, Pa.

Corresponding Secretary—Emma C. Faussett, Normal '91, Trenton.

Treasurer—Jessie V. Clayton, Model '93, 301 S. Clinton Ave., Trenton.

You Are Viewing an Archived Copy from the New Jersey State Library

All graduates of the Normal and Model, and all who came within one year of graduation are eligible, and earnestly desired as members of the Association.

The North Jersey Alumni Association held its eleventh annual meeting at the Hotel Majestic, in New York, Saturday, March 16th, 1907.

The following program was carried out:

President's Address.....O. Watson Flavelle
A Model Greeting.....Mr. Francis B. Lee

Music.

Heaving the Log.....Prof. Frank H. Scobey

Music.

Just a Few Words.....Susan A. Reilly
Centers of Pedagogical Interest.....Dr. James M. Green

Report

OF THE

New Jersey School for the Deaf,

To the State Board of Education 1906-1907.

JOHN P. WALKER, Superintendent.

You Are Viewing an Archived Copy from the New Jersey State Library

Report of the New Jersey School for the Deaf.

JOHN P. WALKER, SUPERINTENDENT.

To the New Jersey State Board of Education:

GENTLEMEN—During the year just closed we have made provision for 156 pupils, 97 boys and 59 girls. The number was five less than preceding year, a decrease necessitated by absolute lack of room. During the term of 1905-1906, 160 children were cared for, but our present buildings were found to be wholly inadequate to the proper care of that number and a reduction became imperative.

It was feared, in view of the large number of applications that were coming in early in the current session, that it would be necessary to carry over a large waiting list until next year. Fortunately this is not the case. After receiving our outside limit, 156, it was found necessary to deny admission to but 29 children, and room for these will doubtless be made in the early future.

The education of the children entrusted to our care has been upon lines similar to those followed during the previous year, the underlying thought ever being a full preparation for a useful and honorable life. Until comparatively recent years, the idea appears to have been a purely economical one, the saving of the expense of giving the child a few years schooling, and in its middle life and advancing years leaving it to the charity of some relative or friend, or making it a charge upon the nearest county-house. A very high intellectual plane is only in rare instances attained by the deaf, a good practical education is possible with every one, and, when this includes some handicraft, some way of creating value, of being useful and of making an honorable living, certainly the secret of a successful and happy life is largely solved.

INTELLECTUAL WORK.

The division of the intellectual work into three distinct departments has continued, the primary period of one year being devoted

You Are Viewing an Archived Copy from the New Jersey State Library

wholly to kindergarten methods and the teaching of speech. Habits of attention and concentration are then inculcated; the child, too often over-indulged and pampered at home, is taught to respect the rights of those around him; his little mind is opened to the cardinal principles of religion belonging to every creed; he is made to think intelligently, to reason with precision and to act decorously, and he is given the first elements of that doing and making that shall enable him thereafter to master the handicraft that shall bring him useful self-supporting citizenship; and, in this year, he also gets, if he be alert and of good intelligence, all the elements of speech and speech reading. Upon this foundation is reared the superstructure of the secondary and advanced departments. First of all, of course in importance is language, something that the speaking child has a well-nigh complete use and comprehension of at the time of its entering school, something that the deaf child is usually wholly deficient in. This the child is made to use at all times, in speech if possible, if this is not sufficiently developed, then in writing or by the use of the manual alphabet. As soon as there is enough language, the various branches of a good common school education are taken up, and, one by one, mastered. The child is gradually brought into communication with the speaking world, and when this communication is fully established its mind develops "by leaps and bounds" and it soon takes its place by the side of the speaking child as an intelligent, refined, law-abiding member of society.

The teaching of speech by speech has been our effort and hope. In the cases where we have fallen short of this, we have used every means within our reach, to develop their minds, to give them a mode of gaining their livelihood, to enable them to understand their relations to their fellowmen and the incumbent duties, and to fill them with the love and reverence that is due their God.

INDUSTRIAL TRAINING.

The results obtained in the various departments of a school for deaf children are nowhere more encouraging than those reached in the trade work. The trade appeals to the deaf child as an interesting game, and indeed, where he has the opportunity, he will be found at his bench making or doing, in preference to the tennis-court or base ball field. The exercise is as good to him, the exhilaration as great, and the sense of something attained gives a zest

You Are Viewing an Archived Copy from the New Jersey State Library

that he does not find anywhere else, and so, in many cases, his industrial work is far in advance of that done in the intellectual department. With the requisition of a handicraft, it has been the aim of the teacher to give as much speech as possible and a thorough use of the vernacular applying to the trade. There has been correlation, at all times, between the two departments of the school, the one ever working hand in hand with the other and doing everything to furthur its enterests.

There has been complete rehabilitation of the shoe-making department, the partitions between the two main rooms having been removed, and the large room resulting having been furnished with a series of new benches which add greatly to the convenience of the shop. There have also been added a set of closets, so that the kit of tools belonging to each boy may be kept separate and apart from all the others, something heretofore difficult of attainment. New work-benches are in process of making and when these are finished, the appointments of the room will be complete.

In the printing department, the linotype has been found to be a most valuable adjunct, and the work there is being done more expeditiously and better than ever before. The course in printing begins with the care of type, cases, and machinery, and extends to the most delicate work on the type setter, and the whole field of printing is now covered.

The half-tone engraving, while a newer art to us has commended itself strongly to our boys and a number of them have already attained considerable proficiency in it. We are gradually acquiring all modern appliances necessary for successful instruction in the branch, and the trade promises to be one of the very best possible for our boys. The circumstance that the first graduate of the department is at present getting eighty dollars per month for his services is a great encouragement to those who are now making a study of it.

To the instruction in joinery, turning, and scroll-sawing there has been added in the wood-working department a course in carving, in which there are however as yet but two pupils. The mastery these have achieved in the branch, as attested by models they have prepared, indicate it to be a specialty that may be followed by here and there a boy with success. The whole arrangement of the work here seems to be the best possible, the instruction is thorough and practical carpenters are being turned out each year, who

You Are Viewing an Archived Copy from the New Jersey State Library

are quite capable of taking places beside the best of speaking workmen.

The courses in plain sewing, repairing, darning, embroidery and millinery for the girls have been continued with the same attention to detail as heretofore, and the results in these branches are a credit alike to teacher and pupil.

To these courses it has been decided to add a thorough training in domestic science. When this is done our little girls will go out from us with complete preparation for every ordinary contingency of life.

The whole industrial work of our school appears to be on a basis that brings it very near to the highest standards.

PHYSICAL CARE.

In an institution such as our own, the physical care of the child leads all others in importance, for upon a sound body depends success in every other direction, and without it, intellectual attainment and industrial progress are alike impossible; and so, from the time the child comes to us until the period at which it leaves, every effort is made looking towards good physical condition. First of all great care is taken that the air it breathes in school and out is ever fresh and pure. In our present crowded condition this is no easy matter; but it is possible of attainment, and with present precautions the condition is at all hours well maintained.

Outside of school-sessions and study-hours children are encouraged to be out of doors in all reasonable weather, and balls, bats, croquet and tennis sets, tops, and necessary paraphernalia for a great variety of games are furnished them to give them zest for those activities that bring the strength and brawn that shall fit them for study and work and prepare them for the duties of life.

The gymnasium has been kept in thorough repair by Mr. Johnson, the efficient head of our wood-working department, and four periods are devoted each week, to systematic physical culture under the experienced eye of our physical director. Here faults in walking, breathing, standing and general action are corrected, and grace, suppleness and strength are given.

In the nurture of the children, the table plays a most important part, and so this is watched with the most zealous care. The milk, cereal, every piece of meat, every vegetable, every pound of coffee and tea and every bit of fruit is carefully scrutinized by the steward

You Are Viewing an Archived Copy from the New Jersey State Library

before it goes to the culinary department, the greatest cleanliness and care is taken in the preparation of food for the table, and watchful eyes see that it is thoroughly masticated and, while always in abundance, that it be partaken of in quantities not large enough to injure the child. There is no part of the general care of the health more important than this.

Reasonable diversions and recreations have been allowed, and relieving as they have the tedium of school-life, these have been found most beneficial.

The plumbing and drainage have received constant attention, all water used for drinking purposes have been boiled before going into our coolers and Hyeian ice alone has been used.

The usual health conditions have prevailed during the year. The result of pleasant healthful surroundings and the precautions here taken must in the absence of hereditary or contagious disease remain the same. The Infirmary, has, most of the time, been wholly without occupant, and not only has there been no fatal illness, but there has been scarce a case of what might be called serious sickness. The fact that our physician and nurse have given immediate skilled attention to every trivial case has tended strongly to bring about and maintain this condition.

GROUNDS AND BUILDINGS.

Our buildings and the grounds surrounding them have been undergoing constant improvement and are at the present time in the best possible condition. The block upon which the school is situated is on the most healthful and beautiful of the city's suburbs and, consisting as it does of nine acres, appears to be ample for every purpose. There are beautifully shaded lawns, croquet grounds, tennis courts, a base-ball field and a fine grove of oaks; so that the setting of our buildings is ideal.

It has been urged that well-stocked farm should be added to every school for the deaf. The position has been taken and stoutly maintained by a number interested in the work, of late years, but the preponderance of opinion as developed in recent conventions has been against it. Of course, the saving upon farm products is but a secondary consideration, and scarce to be considered. The primary and actual thought should be the thorough teaching of a useful occupation. The first obstacle to be overcome in teaching farming would be the antipathy of the child to a study that would

You Are Viewing an Archived Copy from the New Jersey State Library

take up the whole summer and rob it of its vacation. This done, and the subject mastered, the question arises as to whether the boy has a congenial and profitable work. To many it might be congenial, to the vast majority, taking as it does the man from all society and isolating him in a little world of his own, it would be well-nigh unendurable. Farming too, is a quasi-merchantile pursuit, and few of the deaf succeed in trade. The work may be fairly remunerative in some cases, but there are so many trades that are infinitely better for the deaf that, especially in the east, it is scarce one that well might be added to our list. For every other necessary purpose our present acreage would appear to be all-sufficient.

Careful trimming of the lawns and pruning of the trees and shrubs, together with a thorough re-painting of the fence have greatly enhanced the beauty of our surroundings, and as at present cared for, our grounds are a pleasure and pride to our children and an ornament to the neighborhood.

The lesson that each child is a custodian of the property of the State has been carefully instilled and the wear and tare upon the various buildings has been less than for years, the least possible considering that nearly two hundred persons occupy and use them.

The summer's renovation has been more complete than usual. The fences and fire-escapes, as well as the interiors have been re-painted, rooms requiring it have been re-papered, a new floor has been laid in the gymnasium, and all needed repairs have been made.

PERSONNEL.

It is a satisfaction again to be able to report an almost unchanged administrative body in charge of the interests of our children.

The first of the year, the young class with which Mrs. Laura Johnson had been efficiently substituting, was given in charge of Mr. George Lloyd. Mr. Lloyd comes to us with a thorough knowledge of the deaf founded upon a long association with them, a full sympathy with them, excellent natural gifts as a teacher, and an earnestness and zeal that promises a high efficiency in the work. With this single exception our teaching force remains the same.

There is perhaps nothing more subversive of the welfare of a school than rapidly recurring changes among those entrusted with their care and instruction. It takes time to get a grasp of the child nature and its needs, and if, just when acquired, the charge

You Are Viewing an Archived Copy from the New Jersey State Library

is entrusted to other hands, it means the learning of the lesson anew and a consequent loss of time, that necessarily operates to the detriment of the work. The more cohesion there is in a corps, and the longer it can be kept intact, the better.

Aside from our inability to receive all children applying, the year has been a satisfactory one in every way, one in which there has been healthy growth and distinct advance on every line.

With sincere acknowledgements to the State Board of Education for its unremitting attention to our interests, to the legislative bodies that have provided the necessary means for the maintenance of our school, to the city and State officials who have done so much to facilitate our work, and to my associates who have so heartily co-operated with me in all my efforts.

Report

OF THE

Bureau of Information for Teachers and School Officers

To the State Board of Education, 1906-1907.

You Are Viewing an Archived Copy from the New Jersey State Library

Report of Bureau of Information for Teachers and School Officers.

S. R. MORSE, CHAIRMAN OF COMMITTEE.

To the Honorable Members of the State Board of Education:

SIRS—During the school year of 1906-1907 two hundred and thirty-four teachers registered with the Bureau, and two hundred and sixteen were placed in good salaried positions throughout the State.

Owing to the great scarcity of duly licensed and competent teachers it was not possible to present capable candidates for 197 vacancies reported to the Bureau while in eighteen cases the recommendations were not accepted by the boards of education applying for teachers.

The past school year has shown a marked improvement in the desire of the people to increase the salaries of their school teachers and this condition has been brought about by the general agitation for higher salaries and by the fact that a large number of the district boards of education have failed to secure duly qualified teachers to fill their vacant positions.

The following comparative yearly statement of the work of the Bureau in its Teachers' Agency Department, shows that the work of the Bureau has been entirely successful, and that its services are always in demand by teachers desiring to secure lucrative positions:

	Number of teachers Registered.	Number of teachers placed.	Number of applications for Teachers.
1898	260	133	150
1898-1899	600	500	380
1899-1900	566	523	402
1900-1901	607	312	422
1901-1902	510	388	426

You Are Viewing an Archived Copy from the New Jersey State Library

1902-1903	612	418	432
1903-1904	227	212	487
1904-1905	262	231	428
1905-1906	178	153	415
1906-1907	234	216	431
Totals	4,056	3,086	3,973

In considering the work of the Bureau for the past ten years 3,086 registered teachers have been placed in positions at the average salary of $458.00 per year, which has resulted in a net saving to the teachers placed of $42,401.64, which they would have been obliged to pay in commissions to a professional teachers' agency. 4,056 teachers were registered which resulted in a saving to them of 20,280 in registration fees, which they would have paid a regular teachers' agency. In all, the services of the Bureau has resulted in a total saving of $62,681.64 in registration fees and commissions which these teachers would have been obliged to pay regular teachers' agencies which are all located outside of the State of New Jersey.

During these ten years the Bureau of Information for Teachers and School Officers has been maintained at a total expense to the State of $1,000 for salary and postage and compared with the amount saved in money to the teachers this expenditure has been entirely justified.

The work of the Bureau not only assists teachers to secure positions, and boards of education to secure competent teachers, but places its services on call for the benefit of school teachers desiring information in their respective lines of work.

The manager of the Bureau is indebted for valuable assistance rendered in promoting the interests of the Bureau to the State Superintendent of Public Instruction, C. J. Baxter; the Principal of the State Normal School, James M. Green; the County Superintendents of Public Instruction and the various school officers and teachers of the State.

Report

OF THE

Approval of School House Plans

To the State Board of Education, 1906-1907.

(379)

You Are Viewing an Archived Copy from the New Jersey State Library

Report of the Approval of School House Plans.

To the Honorable Members of the State Board of Education:

GENTLEMEN:—The provisions of the State School Law in reference to the approval of School House plans (Sections 129, 130 and 131 of Article 10) have been rigidly enforced in reference to the examination and approval of all plans and specifications submitted to the Department for inspection; but there being no provision made for the payment of expenses in the inspection of the buildings during construction, and when completed the intent of the Law is not carried out to its fullest extent. At the present time there is no restraint upon architects changing the approved plans after they leave this office, and information has been received that such a procedure has been customary in certain localities.

During the present year an effort will be made to thoroughly investigate all information regarding the non-compliance of the State School Law in reference to school buildings.

Plans and specifications are submitted to the Department of Public Instruction in duplicate, one for approval or disapproval and the other for filling purposes. It has been found necessary to file a duplicate set of plan and specification for approval or disapproval in the Department for future reference, and in case of disapproval of the plans a copy of the blue prints and specifications of the revised plans must also be filed with the original.

The State Architect who examines the plans and specifications and reports their approval or disapproval to this Department has the following recommendations to make in reference to the changes in the present Law as to the construction of school buildings:

"A definite regulation should be incorporated in laws providing for the proper number and location of toilet facilities. Ventilation of all water closets located in basement should be entirely separate from general ventilating system, and no sanitary appliance except such as are regularly and sufficiently flushed with water should be allowed placed inside the walls of any school building.

You Are Viewing an Archived Copy from the New Jersey State Library

All floors of such apartments should be absolutely impervious to moisture of all kinds.

The law should be made very explicit about the construction of stairs.

At present the Department of Public Instruction has no way of keeping track of buildings erected, as to whether they are built according to law or not, in fact school houses are now built at times without plans being filed at the office. One or more inspectors would probably remedy this defect if the law was changed to give them the proper authority."

It is to be hoped that the Legislature will deem it wise to enact an amendment to the sections of the law above referred to, which will sufficiently cover the defects as found by the State Architect as they are very important to the health and safety of our public school children.

Following is a list of plans and specifications by districts which have been approved or disapproved during the year commencing November 1st, 1906, and ending October 31, 1907:

ATLANTIC COUNTY.

Absecon Highlands—
One room frame building.
Disapproved 9, 17, 1907.

Pleasantville—
Four room addition to present school.
Approved 7, 12, 1907.

Hammonton—
One room addition to Oakdale school.
Disapproved 6, 19, 1907.
Approved 6, 19, 1907.

Linwood—
Four room brick building.
Disapproved.

BERGEN COUNTY.

New Barbadoes Township—
Hackensack—Fairmont avenue school.
Eleven room brick building.
Approved 10, 18, 1907.

You Are Viewing an Archived Copy from the New Jersey State Library

New Barbadoes Township—
Hackensack—Broadway school.
Twenty room brick building.
Approved 10, 18, 1907.

Borough of Cresskill—
Five room brick building.
Approved 8, 27, 1907.

Park Ridge—
Twelve room brick building.
Disapproved 8, 5, 1907.
Approved 8, 14, 1907.

Little Ferry—
Six room addition to present school.
Approved 6, 26, 1907.

Harrington Township—North Vale School—
Five room frame building.
Disapproved 6, 24, 1907.
Disapproved 7, 29, 1907.
Approved 8, 26, 1907.

Wallington—
Six room brick addition.
Approved 6, 19, 1907.

Wood Ridge—
Five room brick addition to present school.
Approved 9, 16, 1907.

Oakland—
Four room brick building.
Approved 5, 31, 1907.

Lodi Borough—Passaic street school—
Ten room brick building.
Approved 2, 6, 1907.

BURLINGTON COUNTY.

Northampton Township—Mount Holly school—
Two room brick building.
Disapproved 9, 10, 1907.
Disapproved 9, 17, 1907.
Approved 10, 3, 1907.

Florence—
Eight room brick addition.
Approved 6, 18, 1907.
Medford Township—
Two room frame addition.
Disapproved 4, 10, 1907.
Disapproved 4, 30, 1907.
Approved 5, 6, 1907.

CAMDEN COUNTY.

Gloucester City—Hunter school—
Four room brick building.
Approved 12, 26, 1906.
Gloucester City—High school—
Ten room brick building.
Approved 3, 4, 1907.
Centre Township—
Four room brick building.
Disapproved 10, 4, 1907.
Approved 10, 15, 1907.
Centre Township—
Four room concrete building.
Disapproved 10, 3, 1907.
Haddon Heights Borough—
Four room brick addition.
Disapproved 8, 5, 1907.
Approved 8, 13, 1907.
Clementon Township—Laurel Springs school—
Stone and brick addition.
Approved 5, 20, 1907.
Winslow Township—
Two room frame building.
Disapproved 6, 21, 1907.
Approved 7, 12, 1907.
Merchantville—
Four room frame building.
Disapproved 5, 31, 1907.
Approved 7, 25, 1907.

You Are Viewing an Archived Copy from the New Jersey State Library

Audubon—
Four room frame addition.
Approved 5, 8, 1907.
Waterford Township—Roseville school—
One room frame building.
Approved 4, 30, 1907.
Camden City—First Ward—
Twelve room brick building.
Approved 2, 25, 1907.
Camden City—Seventh Ward—
Twelve room brick building.
Approved 2, 25, 1907.
Camden City—Eighth Ward—
Eight room brick building.
Approved 2, 25, 1907.
Camden City—Eleventh Ward—
Twelve room brick building.
Approved 2, 25, 1907.
Waterford Township—Rosedale school—
One room frame building.
Disapproved 11, 30, 1906.

CAPE MAY COUNTY.

Anglesea—
Four room brick building.
Approved 8, 22, 1907.
Holly Beach—
Four room frame addition.
Disapproved 6, 13, 1907.
Approved 6, 20, 1907.

CUMBERLAND COUNTY.

Deerfield Township—Carmel school—
One room frame addition.
Approved 7, 5, 1907.
Landis Township—School No. 6—
Two room brick addition.
Disapproved 1, 30, 1907.
Approved 3, 1, 1907.

Report of the Board of Trustees

OF THE

Teachers' Retirement Fund,

For the Year Ending June 30, 1907.

You Are Viewing an Archived Copy from the New Jersey State Library

Teachers' Retirement Fund.

Report of the Board of Trustees of the Teachers' Retirement Fund of the State of New Jersey for the fiscal year 1906-1907.

Presented by the Secretary at "The Annual Convention of the Teachers' Retirement Fund," held in the State House, Trenton, New Jersey, at twelve o'clock, noon, on Saturday, September 28th, 1907.

September 28th, 1907.

To the members of the Teachers' Retirement Fund of the state of New Jersey:

In compliance with the law, I have the honor to submit the report of the Board of Trustees of the Teachers' Retirement Fund for the fiscal year which ended June 30th, 1907. As provided in the Retirement Fund Act of 1906, the members of the Fund assembled in the State House, Trenton, at 12 o'clock, noon, on Saturday, September 29th, 1906, and nominated five members of the Fund who upon the presentation of their names to the Governor, were appointed by him to the Board of Trustees as follows:

TEACHER TRUSTEES.

Addison B. Poland.....Newark, for a term of 2 years.
James E. Bryan.....Camden, for a term or 3 years.
Thomas M. White.....Trenton, for a term of 1 year.
Georgia Beers Crater,.....Newark, for a term of 4 years.
Elizabeth A. Allen.....Hoboken, for a term of 4 years.

The Governor, in accordance with the law, also chose and appointed the following three persons who are not teachers:

You Are Viewing an Archived Copy from the New Jersey State Library

NON TEACHER TRUSTEES.

Mrs. Frances O. Seeley.....Bridgeton, for a term of 3 years.
William R. Codington.....Plainfield, for a term of 2 years.
Addison P. Rosenkrans.....Paterson, for a term of 1 year.

Mrs. Seeley, on October 19th, 1906, resigned her office as a member of the Board, because other duties made it impossible for her to attend the meetings. The vacancy thus created was filled for the unexpired term by the Governor who appointed Mrs. Isabel Craven, of Salem. Hon. Charles J. Baxter, the State Superintendent of Public Instruction is, by virture of his office, a member of the Board of Trustees, and the treasurer of the State of New Jersey, ex-officio, treasurer of the Teachers' Retirement Fund.

OFFICERS.

The Board met and organized on Saturday, October 13th, 1906, by electing the following officers:

President .....Mr. Baxter.
Vice-President .....Mr. Codington.
Secretary .....Miss Allen.

The Board of Trustees as thus constituted held seven meetings and granted annuities to 38 of the 40 teachers who were retired during the fiscal year which ended June 30th, 1907; two annuities having been declared in that year by the retiring Board. Of the 40 annuities granted last year, 23 were passed under the provisions of the Act of 1906; the remaining 17 were declared under the provisions of the Act of 1907, which went into effect May 7th, 1907,

BUSINESS OF FISCAL YEAR 1906-1907.

In brief, the business transacted in the fiscal year which ended June 30th, 1907, was as follows: Annuities granted, 40; value $14,918.60; average, $372.96. Annuities paid, $35,624.55. Decedents, 5; value of their annuities, $2,110.00. Rebates, 13; value, $117.14. Receipts, $39,353.34. Disbursements, $36,393.83. Membership gain, 400.

To June 30th, 1907, a total of one hundred and sixty-eight annuities had been granted, and $150,244.35 paid on account thereof;

You Are Viewing an Archived Copy from the New Jersey State Library

thirty-one annuitants had died; the Fund liability for the fiscal year 1907-1908 to the 137 annuities in force June 30th, 1907, was $45,177.88, and on the same date 13 applications for annuity, aggregating 5,819.48, awaited the decision of the Board. The State Treasurer reported assets (investment and cash) amounting to $93,608.72.

Complete statistical tables are appended to this report.

TREASURER'S REPORT.

To economize time, I shall read a condensation of the report of the State Treasurer for the fiscal year which ended June 30, 1907, which report appears in full in this paper.

ASSETS.

The following is the condition of the Fund at the close of business, June 30, 1907:

Investments	$78,500 00
Balance in bank, Investment Account.....	2,248 57
Balance in bank, General Account.....	12,860 15
	$93,608 72

(Signed) DAN. S. VOORHEES,

Treasurer.

The item of expense in the Treasurer's report ($652.14) refers only to those expenses that were chargeable to the Retirement Fund prior to November 1st, 1906, at which time the Annual State Appropriation of $1,500 became available, $1,000 of which was appropriated to the State Treasurer for clerical services in his office, leaving but $500 of the $1,500 appropriated by the State to meet all other expenses—printing, postage, stationery, etc.—in the Treasurer's office, as well as the entire expenses of the Board of Trustees, nine in number.

The expenses of the Trustees include traveling to and from Board meetings and to visit annuity claimants in distant parts of the State to report as to the eligibility of such applicants; doctors' fees for medical testimony as to the disability of applicants for annuity; the

You Are Viewing an Archived Copy from the New Jersey State Library

costs of stenography, typewriting, printing, postage, stationery and other expenses incident and inevitable to the collection, disbursement and investment of large sums of money. Thus, at the close of the fiscal year, there had been expended not only the $652.14 reported by the State Treasurer, but also the $1,500 appropriated by the State. Since November first, 1906, the Secretary has received no salary.

The Board of Trustees is not authorized under the law to exceed the annual appropriation, and the Act of 1907 prohibits any expenditures from the Fund except for the payment of annuities and for investment. The Board, therefore, is confronted with the unpleasant alternative of either suspending the administration of the Fund until the State furnishes money sufficient for that purpose, or of going ahead and incurring expense at their own personal risk and on their own responsibility. To relieve the situation, a Bill, Assembly No. 516, asking for an additional appropriation of $1,500 to tide affairs over to November 1st, 1907, (when the annual appropriation of $1,500 will again become available,) passed the Assembly on July 9th, without a dissenting vote, and is now in the Senate.

It may be asked why the present administration requires so much more than any previous Board of Trustees whose annual expenditures never exceeded $1,800. I will reply that the actual administrative expenses of the Fund have never been less than three thousand to thirty-five hundred dollars a year, but that the excess, so long as the costs of administration had to come out of the Retirement Fund, was paid by independent contributions from various sources, it being the aim of all concerned in the management to reduce the demands on the Fund to a minimum. The former State Treasurer, the Hon. Frank O. Briggs, reduced the charge for clerical services in his office from $1,200 to $600 a year (this charge is now $1,000). The State Board of Education bore the expenses of the three Trustees who, by the terms of the previous law, were appointees of the State Board. Mr. Baxter bore his own expenses. This left practically only the expenses of three teacher-trustees to be provided for. Besides, it has heretofore been the privilege of the Retirement Fund Department of the New Jersey State Teachers' Association and of the Secretary herself, to bear the major share of the costs of stenography, typewriting, postage, printing, stationery, office rent, etc., that properly belonged to the legitimate expenses of the Board of Trustees. The "Department," also, by means of bazaars, entertain-

You Are Viewing an Archived Copy from the New Jersey State Library

ments, excursions, etc., raised a large part of the $93,000 assets reported by the State Treasurer. The "Department" has not been active since the enactment of the Retirement Fund Laws of 1906 and 1907, so this source of supply has not been enjoyed by the Fund, and here it may be very properly remarked that the teachers, after furnishing a fund of such incalculable benefit to the schools of the State, ought never to have been called on for a cent for administrative expenses.

The work exacted in administration grows daily greater; the Board of Trustees is now composed of nine members instead of seven, as formerly; the clerical services in the Treasurer's office now cost $1,000 a year; this leaves but $500 (not enough to pay a competent typewriter) to meet the various expenses in the Treasury Department, and the expenses of the Board, including travel, doctors' fees, postage, printing, stationery, Secretary's salary, etc.

COMMITTEE ON REVISION OF THE RETIREMENT FUND LAW.

Pursuant to a resolution passed by the members of the Fund at their Annual Meeting of 1906, the President of the Board of Trustees, Mr. Baxter, who was Chairman of the meeting, appointed the following Committee on Revision of the Retirement Fund Law:

Mr. J. Brognard Betts, Assistant State Superintendent of Public Instruction; Prof. Byron C. Mathews, of Newark; Superintendent Ebenezer Mackey, of Trenton; Mr. Thomas J. Bissell, of Newark, and Miss Elizabeth A. Allen, of Hoboken.

The bill prepared by this committee, known as Senate Bill No. 253, was the result of many meetings, careful discussion, and earnest work. It was introduced in the Legislature by Senator Wakelee on March 12th, 1907, passed Senate and Assembly, and was approved by Governor Stokes, May 7th, 1907. It is this Amendment of the Retirement Fund Law of 1906, that we popularly designate as "The Act of 1907," and under the provisions of which this "Convention of the Retirement Fund" meets here to-day.

BENEFITS CONFERRED BY ACT OF 1907.

The Board would direct the attention of members and teachers to the special benefits conferred by the Retirement Fund Act of 1907, not conferred under any previous statute. They are as follows:

I. Benefits are increased; burdens are lightened.

You Are Viewing an Archived Copy from the New Jersey State Library

II. Annuities are three-fifths, instead of one-half, of the average annual salary for the last five years of teaching; maximum annuity, $650; minimum annuity, $250.

III. Dues unpaid at time of retirement may be made up in a lump sum, or the annuity may be credited toward such payment until the full amount due the Fund is satisfied, after which annuity payments begin and go on free and clear.

IV. Annuities begin to accrue from the date they are granted, instead of, as formerly, at the beginning of the next quarter.

V. The annuity is relieved of the one per cent. tax to the Fund, exacted by previous statutes.

VI. Members who cease teaching and afterward return to the vocation may resume membership in the Fund and be credited with past payments of dues.

VII. The Annual Meeting in September, at the State House in Trenton, is a meeting of delegates to be elected by the members of the Fund in the several counties at a meeting to be called by the respective County Superintendents.

STATE SUPERINTENDENT BAXTER ON FUTURE OF FUND.

In the preface to a "Circular of Information" issued under date of May 16th, 1907, by the Board of Trustees to the members of the Teachers' Retirement Fund and to the Public and State School Teachers of New Jersey, President Baxter says:

"Whatever the enterprise, the days of development have always proved the most difficult and precarious. This is the period of wavering and reluctant support and of doubtful friends, but when experience has devised a basis of organization that invites and justifies general confidence, then brighter skies look down upon it, and progress and prosperity are assured. This, in brief, is the history of the New Jersey Teachers' Retirement Fund.

"By means of four revisions, each an improvement upon the Act next preceding, features of equity and stability have been incorporated in the Teachers' Retirement Fund law which augur well for the future.

"The Act of 1907 makes any person who shall be eligible to membership in the Fund, and who shall, on and after the first of January, 1908, receive his or her first appointment to any position connected with the New Jersey school system, a member of said Fund. This provision will command a membership and consequent increase of

You Are Viewing an Archived Copy from the New Jersey State Library

income which, we confidently believe, will enable the Fund to meet all future obligations.

"During the school year of 1905-1906 each of 2,326 of our teachers taught for the first time in the position then held, and 993 of this number were without previous experience. Therefore, the 1,333 who had had previous experience must have been made up from those who, during the said year, had come from other States, or had changed from one position to another within the State.

"If the present Teachers' Retirement Fund law had then been in force, 1,200 is a very conservative estimate of the number of teachers who would have been subject to compulsory membership, and $10,600 a still lower estimate of the first addition that such membership would have made to the income of the Fund ($450x1,200x.02= $10,600). The average salary of the said 1,200 teachers was certainly not less than $450 per annum, and the per cent. reserved from many salaries would have been more than two per cent. (The actual average salary of all teachers employed in the State during the school year 1905-1906 was $593.71.)

"Many teachers are coming to New Jersey because our salaries, though low, are more liberal than those paid in adjoining states, and these slight deductions will not deter them. Others who have chosen teaching as their life work, and whose services are the most desirable, will wish to join our teaching force, because we have, by the easiest method and with the least possible outlay, made a reliable provision for the days of waning powers."

It will be noted that Mr. Baxter's lowest estimate of the annual increase in the Fund's income after January 1st, 1908, resulting from the operation of the so-called "Compulsory Clause" is $10,600 a year. Add to this the cheering fact that salaries have gone up, are going up, and will continue to go up, and, with the rise of salaries, a corresponding and proportionate increase in the annual income of the Retirement Fund, and we cannot but feel that the future stability of the Teachers' Retirement Fund is at last absolutely assured.

At the same time, just here it is well to remind the teachers of New Jersey that this "assured increase" is still a prospective one; while the growing demands upon the Fund are immediate and imperative; that this "stability," so assured, is the "future" stability of the Fund. The "Promised Land" is in sight, but there is a good year's journey ahead before the Fund gets to that self-recruiting

You Are Viewing an Archived Copy from the New Jersey State Library

basis which is the main guarantee of its future security. To explain: The compulsory feature in the law, while technically going into effect "on and after January 1st, 1908," will make no appreciable addition to the Fund's membership and income until some time after September, 1908, because very few new teachers are appointed during the latter half of the school year. On the other hand, the effect of the "District Half-pay Pension Law" induces claims to mature, and causes applications for retirement and annuity to be presented to the Board that still would have been long-deferred were the applicants not eligible to both annuity and pension.

While announcing with the greatest pleasure that the time has been extended to January 1st, 1909, in which members of the Fund under former Acts may take advantage of the provisions of the Act of 1907, and teachers employed in the State prior to January 1st, 1908, may join the Fund and become eligible to an annuity of three-fifths, instead of one-half, of average annual salary for their last five years of service, the Board of Trustees at the same time earnestly hopes that the 6,000 teachers of New Jersey who have not yet joined the Fund and the 1,200 members who have not yet "transferred" will not wait till the expiration of the full time limit to do so, but that they will become members now, when by so doing they will strengthen the Fund at a time when the Fund most needs their financial support in order to carry on without impediment or delay its noble educational and philanthropic work.

In view of the uncertainties of life and health, it is quite certain that, to many, such voluntary assistance rendered now will prove in years to come to have been "Bread cast upon the waters."

All members of the Fund, including those members who accepted the provisions of the Act of 1906 with its higher scale of dues, must, in order to be eligible to the benefits of the Law of 1907, file with both the Board of Trustees of the Teachers' Retirement Fund and their own Board formal notifications of their acceptance of this year's Act. This they must do on or before January 1st, 1909. It were wise, and helpful to the Fund, for them to do so now. Forms for such notification have been prepared by the Board and may be procured from the Secretary on application.

MEMBERSHIP CERTIFICATES.

In reply to letters of inquiry concerning Membership Certificates, the Board authorizes the Secretary to state that a new Membership

You Are Viewing an Archived Copy from the New Jersey State Library

Certificate has been ordered for the members who accepted, and for teachers and members who shall accept, the provisions of the Retirement Fund Law calling for the higher rates of dues, and conferring corresponding additional benefits. This new Certificate is not yet ready, but it will be issued in good time. The printing of the new form was delayed pending the enactment of Senate Bill No. 253, which became law on May 7th. It is important to have the new Membership Certificates conform with Retirement Fund legislation to date.

MEMBERSHIP.

The Fund's experience in New Jersey seems to demonstrate conclusively that no purely-voluntary plan of Teachers' Pensions is likely to succeed. A co-operative scheme cannot succeed without co-operation—and steady, continual and continuing co-operation. That the teachers in the required numbers, during the past eleven years, have failed to give the Retirement Fund such co-operation may be seen in the following table showing the variations in membership increase.

MEMBERSHIP-GAINS.

June 11, 1896	Members	2,510
February 11, 1898	Members	2,073—Loss of 437
June 1, 1898	Gain of	158
April 18, 1899	Gain of	126
June 30, 1899	Gain of	21
June 30, 1900	Gain of	244
June 30, 1901	Gain of	141
June 30, 1902	Gain of	443
June 30, 1903	Gain of	657
June 30, 1904	Gain of	99
June 30, 1905	Gain of	76
June 30, 1906	Gain of	55
June 30, 1907	Gain of	400

The total number of teachers who have joined the Fund since its beginning, in 1896, to date, as listed in the Secretary's office, is 4,278, of whom the State Treasurer reports 700 as being non-paying members, which number includes the members that have been retired

on annuity, those that have removed from the State, those that have ceased teaching, and those that are deceased; the rest are among the "strayed and the lost." Seventeen hundred members have accepted the higher dues and increased benefits of the Acts of 1906 and 1907.

The Fund has lost many members through the failure of District Clerks to deduct and remit dues when notified by teachers to do so, as well as by the negligence of members themselves in not notifying their District Clerks of the fact of their membership in the Fund. All of these points are fully covered by Sections 219, 222 and 223 of the Law, and it is expected that both teachers and school officials will, in future, comply with the Law.

MEMBERSHIP AND DELEGATES BY COUNTIES.

Membership and Delegates, listed by counties, are as follows:

	Members.	Delegates.
Atlantic	31	1
Bergen	95	1
Burlington	100	1
Camden	398	4
Cape May	15	1
Cumberland	140	1
Essex	705	7

In conclusion, it is hoped that all members who have not already done so, will voluntarily and promptly file their acceptance of the Act of 1907; for, although membership is self-recruiting on and after January 1st, 1908, it would be gracious to meet the on-coming members "more than half way," with the voluntary membership strong, and a permanent principal (surplus fund) unimpaired; not taking "burdens" to the teachers of the future, but bearing a "gift in our hands," viz.: An annuity system within reach of every public school teacher in New Jersey, an accumulated Permanent Endowment, and a membership that shall attest the esprit de corps of New Jersey's Public School Teachers.

The statistical tables and recapitulation follow:

RECAPITULATION TO JUNE 30, 1907.

The Public School Teachers' Retirement Fund of the State of New Jersey became a part of the public school system by virtue of a Law enacted March 11, 1896, and six times re-enacted. The first annuity was granted December 3, 1897. The number and value of annuities granted in the various years, together with the number and value of deceases, and the number and value of the annuities in force at the close of each fiscal year will be found in the following table:

Year.	Number and value of annuities granted.	Deceased.	Number and value of annuities in force at end of each fiscal year.
1897-1898	8— $2,697 00	1— $250 00	7— $2,447 00
1898-1899	10— 3,043 50	.....	17— 5,490 50
1899-1900	12— 3,194 25	1— 250 00	29— 8,434 75
1900-1901	12— 3,852 50	5— 1,466 25	25— 10,821 00
1901-1902	10— 3,105 00	3— 897 50	42— 13,028 50
1902-1903	17— 5,904 40	5— 1,915 00	54— 17,017 90
1903-1904	18— 5,682 70	4— 1,425 00	68— 21,275 60
1904-1905	19— 6,533 00	4— 1,241 00	83— 26,567 60
1905-1906	22— 7,221 50	3— 1,025 00	102— 32,764 10
1906-1907	40— 14,918 60	5— 2,110 00	137— 45,572 70
