ENVIRONMENTAL REGULATION
OFFICE OF POLLUTION PREVENTION AND PERMIT COORDINATION
NOTICE OF RULE PROPOSAL
PUBLIC NOTICE

Proposed New Rules: N.J.A.C. 7:1M-2
Proposed Amendment: N.J.A.C. 7:27-8 & 22

Take notice that the NJ Department of Environmental Protection is proposing regulations for participation in the Gold Track tier of the Silver and Gold Track Program for Environmental Performance and amendments to N.J.A.C. 7:27-8, Permits and Certificates for Minor Facilities (and Major Facilities Without an Operating Permit) and N.J.A.C. 7:27-22, Operating Permits. A statement of the substance of the proposal follows: The proposed rules establish the requirements and procedures for participation in the Gold Track tier of the Silver and Gold Track Program for Environmental Performance. This Program is based on achieving environmental excellence through commitments and accountability beyond standard regulatory requirements. The Silver and Gold Track Program consists of three tiers: Silver Track, Silver Track II, and Gold Track. The goal of Gold Track is to foster the continued development and implementation of creative approaches to achieving more efficient and effective environmental performance. Gold Track, once implemented, would be the top performance tier of NJDEP's Silver and Gold Track Program for Environmental Performance. New Jersey's goal in creating this tiered system is to encourage environmentally progressive companies to commit to further reductions in emissions and to adopt environmentally sustainable practices beyond those currently required by federal or State law. In initiating the Gold Track program, NJDEP is pursuing environmental improvements, including but not limited to: reductions of releases of criteria and hazardous air pollutants, carbon dioxide and other greenhouse gases; promoting enhanced management of hazardous wastes; utilization of environmental management systems; water conservation, stormwater management, and an increase in a facility's accountability and communication with the general public and local communities. In return for meeting the stringent entry requirements and environmental commitments of Gold Track, participating facilities would receive certain air pollution control, hazardous waste and water regulatory flexibilities. The Gold Track Program will be limited to no more than nine participants.

The proposal is scheduled to be published in the New Jersey Register dated February 4, 2002. A copy of the proposal is available from the Office of Pollution Prevention and Permit Coordination's web site, <http://www.state.nj.us/dep/opppc/> or by contacting the rule manager, Michael DiGiore at 609-292-3600. Be advised that there may be a fee for obtaining a copy of the proposal from some sources.

ENVIRONMENTAL PLANNING AND SCIENCE

AIR QUALITY PLANNING

NOTICE OF RULE PROPOSAL AND PROPOSED REVISIONS

TO THE STATE IMPLEMENTATION PLANS FOR CARBON MONOXIDE AND OZONE

Emission Statements, N.J.A.C. 7:27-21, and the New Jersey State Implementation Plans for Carbon Monoxide and Ozone

PUBLIC NOTICE

Take notice that the New Jersey Department of Environmental Protection is proposing new rules and amendments at N.J.A.C. 7:27-21, Emission Statements. These amendments address a "Clean Air" commitment in New Jersey's Environmental Performance Partnership Agreement (Fiscal Years 2002-2004) with USEPA to expand the Department's air emission inventories and revise the State Implementation Plan for Carbon Monoxide and Ozone. Proposed rule amendments to sections 7:27-21.5 (e) and (f) address ozone related emissions and are proposed to be incorporated in the State's Ozone SIP. Sections 7:27-21.5 (e) and (f) address carbon monoxide related emissions and are proposed to be incorporated in the State's Carbon Monoxide SIP.

The emission reporting requirements at N.J.A.C. 7:27-21, Emission Statements, would be expanded to phase in emissions reporting of 36 toxic air contaminants as well as the greenhouse gases carbon dioxide and methane; add Federal reporting requirements for fine particulates and ammonia; and would make the rule consistent with the Department's 1999 Emission Statement Guidance Document and any revisions thereto. The proposed amendments also would revise terms and definitions to make them consistent with the same terms and definitions found in the Air Pollution Control Code, N.J.A.C. 7:27, and the New Jersey Air Pollution Control Act, N.J.S.A. 26:2C-1 et seq.

The Department is seeking comment from the public on the content of the proposal and the proposed SIP Revisions. Written and/or oral testimony will be received at the public hearing which will be held on:

ADOPTED AMENDMENTS: N.J.A.C. 7:27-3, N.J.A.C. 7:27-8, N.J.A.C. 7:27-22

The Department of Environmental Protection held a public hearing on October 23, 2001, on proposed amendments and new rules to N.J.A.C. 7:27-3, N.J.A.C. 7:27-8, and N.J.A.C. 7:27-22. We adopted amendments to N.J.A.C. 7:27-8, our Air Preconstruction Permit Rule, to address Applicability issues. Adopted amendments represented the second part of a phased rule making which was intended to further streamline the air pollution permitting program and to make Subchapter 8 and Subchapter 22 rule language more consistent with one another. Adopted amendments to Subchapter 3 exempted emergency diesel generators located at sites regulated by the Nuclear Regulatory Commission from the Department's opacity standards (visible emissions). Adoption amendments have been published in the New Jersey Register on February 4, 2002.

NOTICE OF PUBLIC HEARING AND AVAILABILITY:

PROPOSED RULEMAKING REGARDING THE ENHANCED INSPECTION AND MAINTENANCE PROGRAM (N.J.A.C. 7:27-15 and N.J.A.C. 7:27B-5)/PROPOSED STATE IMPLEMENTATION PLAN (SIP) REVISION

The New Jersey Department of Environmental Protection (the Department) recently filed a proposal that would modify the State's enhanced I/M program. The program modifications include changing the start date for mandatory on-board diagnostic (OBD) inspections from January 1, 2001, to January 1, 2003 and establishing the framework for a "phase-in" of these inspections. Other proposed changes include continuation of the initial emission standards beyond their current end date of December 31, 2001 and the addition of a number of "interim" standards, effective January 1, 2003, in place of the current "final" standards. The proposal would also eliminate references to the evaporative pressure and purge tests and would add new OBD inspection procedures. Finally, consistent with rulemaking by the New Jersey Division of Motor Vehicles (DMV), the proposal would change the test to be used for certain vehicles registered as school buses and inspected by the DMV's school bus inspection unit. Those school buses that would have been tested biennially (every other year) with the dynamometer-based ASM5015 test would instead be tested twice a year with a 2500 rpm test. This proposal is reflected in a proposed revision to the State's Enhanced I/M Program SIP that was forwarded to the United States Environmental Protection Agency (EPA) on December 31, 2001. The proposed SIP revision also reflects that portion of the DMV's proposed school bus rulemaking relating to the emissions inspection of school buses otherwise subject to the enhanced I/M program requirements.

The Department's proposal will appear in the January 22, 2002 New Jersey Register; the DMV's proposal is scheduled for publication in February, 2002. These proposals and the proposed SIP revisions are now available for inspection, as described more fully below.

A **public hearing** concerning the proposed SIP revisions, the Department's proposal and the relevant portions of the DMV's proposal is scheduled as follows:

The SIC code 2821 is included in category ii, under the definition for "Stormwater Discharge Associated with Industrial Activity" (N.J.A.C. 7:14A-1.2), which is regulated by the Department pursuant to N.J.A.C. 7:14A-11.5(a)1ii. Chemical Services, Inc. has submitted correspondence dated September 5, 2001 from the DOL changing the facility's regulated SIC code from 2821 to 7389. This letter was submitted to the Department in a letter received December 11, 2001. The change in SIC code from 2821 to 7389 constitutes a substantial change in the facility's operations. The SIC code 7389 is not regulated under the definition "Stormwater Discharge Associated with Industrial Activity." A compliance inspection was conducted on September 26, 2001. This inspection did not indicate that the facility was regulated in accordance with any narrative criteria in the definition for "Stormwater Discharge Associated with Industrial Activity."
