# Peter is no joke

Many a prosperous farmer has laughed at Peter Tumbledown, when it was really Peter that had made him prosperous.

"You give me some pretty hard whacks over Peter's shoulders," writes a Western subscriber to the FARM JOURNAL, "but my wife says that we never would have had the fine farm and home and the bank account that we have today, if it had not been for Peter Tumbledown."

It seems as if Peter himself could never be reformed, but he has reformed lots of other farmers, and made them successful and prosperous.

Get the FARM JOURNAL habit, and you will soon drop the Tumbledown habit. *You can't stick to both.*

FARM JOURNAL ("cream, not skim-milk") is 36 years old, and has over 750,000 paid subscribers, more than any other farm paper. Its four million readers (known as "Our Folks") are the most intelligent and prosperous country people in the world, and are always saying that FARM JOURNAL helped to make them so. It is clean, practical, brief, "boiled down," full of gumption, fun and sunshine. It preaches kindness, order, thrift, comfort and happiness. "Our Folks" have tight roofs and fences, gates that swing free, sound horses, big apples, well-dressed wives and children, and money in bank. Their potatoes are the largest, their milk tests the highest, their hogs weigh the most, their fruit brings the best prices. Farmers everywhere are finding this out, and naturally want the FARM JOURNAL.

Send a dollar to-day, and you get this great little paper for FIVE YEARS

## CAMDEN COUNTY

PHILADELPHIA'S GREAT TRUCK GARDEN AND EGG STOREHOUSE.

**T**HE publishers of the FARM JOURNAL maintain that we all need to know more of our own home counties and the neighbors who are right around us.

Did you ever have the experience of going to a great city like Boston or New York and hearing from people there something about the importance of your own county that you never knew before?

This farm directory is published for the people of Camden county, in the belief that it will reveal to them many things of great interest and value about the farms and farming interests of their own county.

Camden county has a total area of 222 square miles, and a population, according to the last census, of 142,029, which gives 640 persons to the square mile. Gloucester county has 115 persons to the mile. The difference is accounted for by Camden city.

Of the total land area of about 142,080 acres in the county, 64,933 acres, about 45 per cent., is in farms.

There are in the county 1,244 farms, their average size being 52 acres.

According to the census of 1910, the value of all farm property in the county, including land, buildings, implements, domestic animals, poultry, etc., is \$8,484,263. This gives an average of \$6,820 per farm.

Of the men operating these 1,244 farms, 889, or 71 per cent., are native Americans, and 335, or 27 per cent., are foreign born; 20 are colored.

Of the 1,244 farms in the county, 865, or 70 per cent., are operated by their owners, and 356, or 29 per cent., by tenants. Of the tenant farmers, 58 per cent. pay cash rent, and 27 per cent. work on shares.

Of the 865 farms operated by their owners, 374, or 43 per cent., are reported as free from mortgage debt, and 470, or 54 per cent., bearing mortgages.

The chief crops of Camden county, exclusive of garden truck, are corn and potatoes. The latest census report gives the crop of corn for one year as 260,952 bushels, of white potatoes as 323,372 bushels, and of sweet potatoes as 214,045 bushels.

Camden county stands high in the value of farms and farm products, it is decidedly progressive in farming methods, and as a natural result is one of the most prosperous farming counties of South Jersey. One evidence of this is the fact that the FARM JOURNAL has a circulation in the county of over 1,250, which is more than one subscriber to every farm in the county. This, we believe, exceeds the circulation outside of Camden city of any other paper published.

There is no better index of the intelligence of farmers than the extent to which the standard agricultural papers are read by them.

The prosperity of Camden county farmers is further shown by the character of their houses, buildings and farm equipment. The pictures in this book show this in the most graphic way, and will be found of deep interest to readers both within and without the county.

"THE BANK FOR EVERYBODY." Deposits by mail promptly acknowledged. SECURITY TRUST CO., Camden, N. J.

# IRON AGE FARM, GARDEN and ORCHARD TOOLS

have been made in Gloucester Co., New Jersey, for more than three-fourths of a century, by men who have also been practical farmers and gardeners. At the present time, the Vice-President and the General Manager each own large farms on which they use modern machinery of all kinds,

including Iron Age tools, many of which are developed in that way. They are trade-marked tools and widely advertised in all parts of the world—they are known as "standard" in their line—to be depended on for the work claimed for them. Are not these the kind that you aim to use? Don't go away from home to buy good machines—the makers are handy to get at when you want a new machine quick or some needed repairs and they are always here.

One seed piece in every hill and one only.

100 per cent. Potato Planter

No. 155 for heavy conditions

No. 233 D 100 Gallon Power Sprayer built in unit

Pivot Wheel Steel Frame Riding Cultivator

No. 190 Horizontal Barrel Sprayer One among many similar tools.

No. 6 Hill and Drill Seeder, Double and Single Wheel Hoe

## THE POTATO MACHINES INCLUDE

100 PER CENT. PLANTER (Improved Robbins). RIDING CULTIVATORS, Pivot or Fixed Wheel. One Row or Two. TRACTION SPRAYERS, 4 and 6 Row. RIDGERS, blade or disc (very helpful at digging time). DIGGERS, 4 styles, to meet any conditions that a Digger can take care of.

## THE SPRAYERS

BUCKET SPRAYERS, with or without bucket. KNAPSACK, galvanized or brass. HORIZONTAL, 20 gallon Barrel Sprayer, mounted. HORIZONTAL, 50 gallon Barrel Sprayer, ready for use in any wagon, cart, etc.

VERTICAL BARREL SPRAY PUMPS, with or without barrel and mounted if wanted. 50, 100, 150 or 250 GALLON POWER SPRAYERS, mounted on skids or trucks, in any combination needed. TRACTION SPRAYERS, in many combinations.

## POWER PUMPS

Single or Double Acting, one or two horse.

## GASOLINE ENGINES

1 to 5 H. P. Air-Cooled. 2 to 5 H. P. Combination Hopper or Air-Cooled.

Garden Wheel Hoes, Drills and Fertilizer Distributors. One Horse Harrows, Horse Hoes and Cultivators. Hay Rakes. Trucker's Variety Planters, Row Makers, Row Markers, Ridgers, etc. Orchard Cultivators, 2 H. Walking Cultivators, etc.

Get our advertising matter, full set, or covering any machine. We want to serve our neighbors at least, and serve them as well as we know how.

"THE BANK FOR EVERYBODY." Deposits by mail promptly acknowledged. SECURITY TRUST CO., Camden, N. J.

ESPECIALLY BUT NOT EXCLUSIVELY FOR USE IN SPRING

- No. 1—The leading brand for Tobacco in the South.
- No. 2—A Potato special and favorite truckers' brand, North and South.
- No. 3—Used extensively by the large Southern planters for Cotton.
- No. 4—Specially recommended for Corn.

FOR USE AT ALL SEASONS SPRING, SUMMER AND AUTUMN

- No. 5—Greatest of all truckers' brands, North and South.
- No. 6—Good for everything, at all seasons, including Grains.
- No. 7—For late vegetables, fruits and roots; also, for Grass.
- No. 8—A favorite "general use" phosphate; much used on Grain.

ESPECIALLY BUT NOT EXCLUSIVELY FOR USE IN AUTUMN

- No. 9—The original raw bone superphosphate of lime in America.
- No. 10—Universally applied to Wheat and Grass; an old standard.
- No. 11—First favored in Maryland—now in many States as well.
- No. 12—Our lowest-priced complete fertilizer for general use.

## SPRAYING FORMULAS

**FUNGICIDES.**—Bordeaux mixture is made by taking three pounds of sulphate of copper, four pounds of quicklime, fifty gallons of water. To dissolve the copper sulphate, put it into a coarse cloth bag and suspend the bag in a receptacle partly filled with water. Next, slake the lime in a tub, and strain the milk of lime thus obtained into another receptacle. Now get some one to help you, and with buckets, *simultaneously* pour the two liquids into the spraying barrel or tank. Lastly, add sufficient water to make fifty gallons. It is safe to use this full-strength Bordeaux on almost all foliage—except, perhaps, on extra tender things, such as watermelon vines, peach trees, etc. For these it is wiser to use a half-strength mixture.

**FORMALIN.**—This is also called formaldehyde, and may be purchased at drug stores. Its principal use is to treat seed potatoes to prevent "scab." Soak the whole seed for two hours in a mixture of one-half pint formalin and fifteen gallons of cold water; dry the seed, cut, and plant in ground that has not recently grown potatoes.

**BORDEAUX COMBINED WITH INSECT POISON.**—By adding one-quarter pound of Paris green to each fifty gallons of Bordeaux, the mixture becomes a combined fungicide and insecticide. Or, instead of Paris green, add about two pounds of arsenate of lead. The advantages of arsenate of lead over Paris green are, first, it is not apt to burn foliage even if used in rather excessive quantities; and, second, it "sticks" to the foliage, etc., better and longer.

**INSECTICIDES.—ARSENATE OF LEAD.**—This is the best insecticide for chewing insects, and is for sale by seedsmen. Use about two pounds in fifty gallons of water.

**WHITE HELLEBORE.**—This, if fresh,

may be used instead of Paris green in some cases—worms on currant and gooseberry bushes, for instance. (It is not such a powerful poison as the arsenites, and would not do so well for tough insects such as potato-bugs.) Steep two ounces in one gallon of hot water, and use as a spray.

**FOR SUCKING INSECTS.**—Now we come to another class of insecticides, suited to insects which suck a plant's juice but do not chew. Arsenic will not kill such pests; therefore we must resort to solutions which kill by *contact*.

**KEROSENE EMULSION.**—One-half pound of hard or one quart of soft soap; kerosene, two gallons; boiling soft water, one gallon. If hard soap is used, slice it fine and dissolve it in water by boiling; add the boiling solution (away from the fire) to the kerosene, and stir or violently churn for from five to eight minutes, until the mixture assumes a creamy consistency. If a spray pump is at hand, pump the mixture back upon itself with considerable force for about five minutes. Keep this as a stock. *It must be further diluted with water before using.* One part of emulsion to fifteen parts of water, is about right for lice.

**CARBOLIC ACID EMULSION.**—Made by dissolving one pound of hard soap or one quart of soft soap in a gallon of boiling water, to which one pint of *crude* carbolic acid is added, the whole being stirred into an emulsion. One part of this is added to about thirty-five parts of water and poured around the bases of the plants, about four ounces per plant at each application, beginning when the plants are set out and repeated every week or ten days until the last of May. Used to fight maggots.

**WHALE-OIL SOAP SOLUTION.**—Dissolve one pound of whale-oil soap in a gallon

of hot water, and dilute with about six gallons of cold water. This is a good application for aphid (lice) on trees or plants. For oyster-shell or scurvy scale use this spray in May or June or when the tiny scale lice are moving about on the bark.

**TOBACCO TEA.**—Place five pounds of tobacco stems in a water-tight vessel, and cover them with three gallons of hot water. Allow to stand several hours; dilute the liquor by adding about seven gallons of water. Strain and apply. Good for lice.

**LIME-SULPHUR MIXTURE.**—Slake twenty-two pounds of fresh lump lime in the vessel in which the mixture is to be boiled, using only enough water to cover the lime. Add seventeen pounds of sulphur (flowers or powdered), having previously mixed it in a paste with water. Then boil the mixture for about an hour in about ten gallons of water, using an iron but not a copper vessel. Next add enough more water to make, in all, fifty gallons. Strain through wire sieve or netting, and apply while mixture is still warm. A good, high-pressure pump is essential to satisfactory work. Coat every particle of the tree. This is the standard San Jose scale remedy, although some orchardists prefer to use the soluble oil sprays now on the market.

**PYRETHRUM, OR PERSIAN INSECT POWDER.**—It may be dusted on with a powder bellows when the plants are wet; or one ounce of it may be steeped in one gallon of hot water, and sprayed on the plants at any time. It is often used on flowers, in greenhouses, on vegetables, etc.

**BISULPHIDE OF CARBON.**—This is used to kill weevils in beans and peas, etc. It comes in liquid form and may be had of druggists. When exposed to the air it quickly vaporizes into a poisonous and explosive gas which is heavier than air and which will destroy all insect life. (Caution.—Do not inhale the vapor, and allow no lights near.)

Tobacco stems, tobacco dust, kainit, soot, freshly-slaked lime, dust, etc., are often used as insect *preventives*—in the soil around plants to keep away grubs, worms and maggots, or dusted on to discourage the visits of cucumber bugs, etc. (Note.—The first four are excellent fertilizers as well as insect preventives.)

Crows and blackbirds frequently pull up planted corn. The best preventive is to tar the seed, as follows: Put the seed into a pail and pour on enough warm water to cover it. Add a teaspoonful of coal-tar to a peck, and stir well. Throw the seed out on a sieve or in a basket to drain, and then stir in a few handfuls of land plaster (gypsum), or air-slaked lime.

**A NEW FUNGICIDE.**—Some orchardists are now using the following self-boiled lime-sulphur spray, instead of Bordeaux, claiming that it is less liable to spot or burn fruit and foliage: Put eight pounds of unslaked lump lime in a barrel; add enough water to cover. When the lime begins to heat, throw in eight pounds of flowers of sulphur. Constantly stir and gradually pour on more water until the lime is all slaked; then add the rest of the water to cool the mixture. About fifty gallons of water, in all, are required. Strain. Two pounds of arsenate of lead may be added, if desired, to the finished mixture, which then becomes a combined fungicide *and* insecticide, and may be used in the same manner as advised for Bordeaux-arsenate of lead. (Special note.—The self-boiled mixture is *not* the same as the lime-sulphur advised for San Jose scale, which is too strong for trees in foliage.)

If you do not care to bother with making spraying mixtures at home, they can be purchased, already prepared, of seedsmen. For only a few trees or plants, the extra cost of these factory mixtures is not great.

SPRAYING CALENDAR

PLANT	FIRST APPLICATION	SECOND APPLICATION
APPLE ..... (Scab, rot, rust, codling moth, bud moth, tent caterpillar, canker worm, curculio, etc.)	When buds are swelling, but before they open, Bordeaux.	If canker worms are abundant just before blossoms open, Bordeaux-arsenical mixture.
ASPARAGUS ..... (Rust, beetles.)	Cut off all shoots below surface regularly until about July 1st.	After cutting ceases, let the shoots grow and spray them with Bordeaux-arsenical mixture.
BEAN ..... (Anthracnose, leaf blight, weevil, etc.)	Treat the seed before planting with bisulphide of carbon. (See remarks.) When third leaf expands, Bordeaux.	10 days later, Bordeaux.
CABBAGE ..... (Worms, lice, maggots, etc.)	Pyrethrum or insect powder.	7-10 days later, repeat.
CELERY ..... (Blight, rot, leaf spot, rust, caterpillars.)	Half strength Bordeaux on young plants in hotbed or seedbed.	Bordeaux, after plants are transplanted to field. (Pyrethrum for caterpillars if necessary.)
CHERRY ..... (Rot, aphid, slug, curculio, black knot, leaf blight, or spot, etc.)	As buds are breaking, Bordeaux; when aphid appear, tobacco solution or kerosene emulsion.	When blossoms drop, Bordeaux-arsenical mixture.
CURRANT ..... GOOSEBERRY ..... (Worms, leaf blight.)	At first appearance of worms, hellebore.	10 days later, hellebore. Bordeaux if leaf blight is feared.
GRAPE ..... (Fungous diseases, Rose bugs, lice, flea, beetle, leaf hopper, etc.)	In spring, when buds swell, Bordeaux.	Just before flowers unfold, Bordeaux-arsenical mixture.
MELONS ..... CUCUMBERS ..... (Mildew, rot, blight, striped bugs, lice, flea beetle, etc.)	Bordeaux, when vines begin to run.	10-14 days repeat. (Note: Always use half strength Bordeaux on watermelon vines.)
PEACH ..... (Rot, mildew, leaf curl, curculio, etc.)	As the buds swell, Bordeaux.	When fruit has set, repeat. Jar trees for curculio.
PEAR AND QUINCE .... (Leaf blight, scab, psylla, codling moth, blister mite, slugs, etc.)	As buds are swelling, Bordeaux.	Just before blossoms open, Bordeaux. Kerosene emulsion when leaves open for psylla, if needed.
PLUM ..... (Curculio, black knot, leaf blight, brown rot, etc.)	When buds are swelling, Bordeaux.	When blossoms have fallen, Bordeaux-arsenical mixture. Begin to jar trees for curculio.
POTATO ..... (Flea beetle, Colorado beetle, blight rot, etc.)	Spray with Paris green and Bordeaux when about 4 in. high.	Repeat before insects become numerous.
TOMATO ..... (Rot, blight, etc.)	When plants are 6 in. high, Bordeaux.	Repeat in 10-14 days. (Fruit can be wiped if disfigured by Bordeaux.)

NOTE.—For San Jose scale on trees and shrubs, spray with the lime-sulphur mixture in autumn after leaves fall, or (preferably) in early spring, before buds start. The lime-sulphur

SPRAYING CALENDAR

THIRD APPLICATION.	FOURTH APPLICATION.	REMARKS.
When blossoms have fallen. Bordeaux-arsenical mixture.	8-12 days later, Bordeaux - arsenical mixture.	For aphid (lice) use one of the lice remedies mentioned elsewhere. Dig out borers from tree trunks with knife and wire. For oyster-shell scale, use whale-oil soap spray in June.
2-3 weeks later, Bordeaux-arsenical mixture.	Repeat in 2-3 weeks.	Mow vines close to ground when they are killed by frost, burn them, and apply a mulch of stable manure.
14 days later, Bordeaux.	14 days later, Bordeaux.	For weevils: Put seed in tight box, put a cloth over seed, pour bisulphide of carbon on it, put lid on and keep closed for 48 hours. Use 1 oz. to 4 bus. of seed.
7-10 days later, repeat.	Repeat every 10-14 days until crop is gathered.	Root maggots: Pour carbolic acid emulsion around stem of plants. Club root: Rotate crops; apply lime to soil; burn refuse; treat seed with formalin before planting.
14 days later, repeat.	14 days later, repeat.	Rot or rust is often caused by hilling up with earth in hot weather. Use boards for summer crop. Pithy stalks are due to poor seed; or lack of moisture.
10-14 days, Bordeaux.	Hellebore, if a second brood of slugs appear.	Black knot: Dark fungous-looking bunches or knots on limbs. Cut off and burn whenever seen.
10-14 days, repeat, if necessary.	2 to 4 weeks later, repeat.	Cane-borers may be kept in check by cutting out and burning infested canes.
When fruit has set, Bordeaux - arsenical mixture.	2 to 4 weeks later, Bordeaux.	For lice, use any of the lice remedies. For rose bugs, use 10 pounds of arsenate of lead and one gallon of molasses in 50 gallons of water, as a spray. Or knock the bugs into pans of kerosene every day.
10-14 days, repeat.	10-14 days, repeat.	Use lice remedies for lice. For striped bugs, protect young plants with a cover of mosquito netting over each hill. Or keep vines well dusted with a mixture of air-slaked lime, tobacco dust and a little Paris green.
When fruit is one-half grown, Bordeaux.	NOTE:—It is safer always to use half-strength Bordeaux on peach foliage.	Dig out borers. Cut down and burn trees affected with "yellows."
After blossoms have fallen. Bordeaux-arsenical mixture.	8-12 days later, repeat.	Look out for "fire blight." Cut out and burn blighted branches whenever seen.
10-14 days later, repeat.	10-20 days later, Bordeaux.	Cut out black knot whenever seen.
Repeat for blight, rot and insects.	Repeat.	To prevent scabby tubers, treat the seed with formalin before planting.
Repeat in 10-14 days.		Hand-pick tomato worms.

mixture is a fungicide as well as a scale cure, and if it is used the first early Bordeaux spray may be omitted.

**PLANTING TABLE FOR VEGETABLES AND BERRIES—Continued**

VARIETY	For Horse Cultivation Have Rows	For Hoe or Wheel-Hoe Cultivation Have Rows	Distance Apart in the Row	Depth to Cover	Time to Plant in the North, Outdoors (See Foot-note)
ONION, Seed .....	2½ ft. apart	12-15 in. apart	Thin to 4 in.	½ in.	March-April
PARSLEY .....	2½ ft. apart	1 ft. apart	Thin to 6 in.	½ in.	Early April
PARSNIP .....	2½ ft. apart	1 ft. apart	Thin to 5 in.	½ in.	March-April
PEPPER, Plants .....	2½ ft. apart	2 ft. apart	20 in.		June 1
PEAS .....	3-4 ft. apart	2½-3 ft. apart	Continuous row	3-5 in.	March-April
POTATO .....	3 ft. apart	2-2½ ft. apart	12-18 in.	4 in.	Early, March-April; late, May-June
RADISH .....	2½ ft. apart	1 ft. apart	Thin to 3 in.	½ in.	March-April
RHUBARB, Plants .....	4 ft. apart	3 ft. apart	3 ft.	2 or 3 in.	March-April
RASPBERRY, Plants ....	6 ft. apart	5 ft. apart	Red, 2 ft. Black, 2½ ft.		Early spring
SPINACH .....	2½ ft. apart	1 ft. apart	Thin to 5 in.	1 in.	March-April (or fall)
SQUASH-PUMPKIN ....	8 x 8 ft. (Bush Squash 4 x 4)	Same		½ in.	May 15-20
STRAWBERRY Plants ..	4 ft. apart	3 ft. apart	15-20 in.	Have crown level with ground	April. (Pot-grown plants in August)
TOMATO, Plants .....	4 x 4 ft. apart	4 x 3 ft. apart			May 25-June 1

77

NOTE.—Planting time varies according to season and locality; dates given above are only approximate, and are based on latitude of Pennsylvania; allow about five days difference for each 100 miles north or south of this State. Do not work soil in spring while it is very wet and soggy; wait. Plants set in autumn must be well mulched with strawy manure, leaves, etc., during first winter. Successional sowings of corn, peas, etc., may be made later than the dates given.

## FARMERS' BULLETINS

Sent Free to Residents of the United States, by Department of Agriculture  
Washington, D. C., on Application.

NOTE.—Some numbers omitted are no longer published. Bulletins in this list will be sent free, so long as the supply lasts, to any resident of the United States, on application to his *Senator, Representative, or Delegate in Congress*, or to the Secretary of Agriculture, Washington, D. C. Because of the limited supply, applicants are urged to select only a few numbers, choosing those which are of special interest to them. Residents of foreign countries should apply to the Superintendent of Documents, Government Printing Office, Washington, D. C., who has these bulletins for sale. Price, 5 cents each to Canada, Cuba, and Mexico; 6 cents to other foreign countries.

# I LOSE \$50,000 A YEAR

I could have it as easy as not. Would hardly have to lift a finger to get it. Yet I let it go elsewhere.

Dozens of shady advertisers and quack medicines would pay almost any price for space in my Farm Journal if I would sell it. \$50,000 is a small estimate of the amount I could get in a year.

But, they will never get a line. And, of course, I don't really lose that money. I make more than I lose, because by taking only the best advertisements and protecting my subscribers I gain at both ends.

## YOU ARE MISSING SOMETHING

if you are not reading the Farm Journal. You can live without it, of course, but you can't live so MUCH; you can make nearly as much money, perhaps, but YOU WON'T BE SO HAPPY. Were I asked what I consider the real reason of the success of the Farm Journal, I would answer:

"It is a home builder and a home preserver; while it takes due interest in all the brute animals of the farm, advocating the best and kindest care, its heart is more with the human kind for whose comfort, happiness and contentment it ever strives; the men and women, the boys and girls, the tots; father and mother, husband and wife, son and daughter, brother and sister—all the dear farm-home folks—before the cattle, sheep and poultry, the pumpkins, oats and potatoes; its keynote, beautiful, happy, prosperous and contented rural homes, not fat hogs. Fat hogs are all right, but they do not come first."

All is crisp, concise and boiled down, with sparkles of wit here and there, and such a cheerful, happy, sunny spirit throughout, that each page is an inspiration. You would hardly believe that a farm paper could be made so entertaining and readable. It is unlike any other periodical in the world.

**S**end me ONE DOLLAR to-day, and get this famous little paper for FIVE YEARS

ADDRESS

**WILMER ATKINSON, Editor Farm Journal**  
WASHINGTON SQUARE, PHILADELPHIA

# Three Good Ideas to Every Ten Words

I BEGAN editing the Farm Journal 36 years ago on the theory that time was almighty scarce. That what people needed was a paper that to'd when they needed to know, and was quick about it.

That's the kind of paper I edited then, and I edit it now the same way, only more so.

Honestly, you have no idea what can be done in the way of boiling down, shortening, condensing, and getting to the heart of the matter, if you have not read my Farm Journal; 35 years of it have taught me something. My smallest issue, 32 pages, has a lot more in than 132 pages of some papers I have read. Why, I believe some editors will not average more than one idea to 1,000 (and not much of an idea at that sometimes). My aim is three good ideas to every 10 words, and for ~~it~~ I can make it! We don't hit it always, but ~~you~~, the average is pretty fair; pretty fair.

I do not know how many read my paper, but I have to fight to keep it until I read it myself. I have seen the Farm Journal in eight or ten more houses in my neighborhood, with my name on the title page. One family numbers fifteen and they all read the Farm Journal. C. W. H. Cedro, Wash.

We think your little paper is all right, because it has no tobacco, liquor or quack medicine advertisements in its columns. Its pages are so clean that we are not afraid to let the children read them, and wish all papers were as clean. (I receive thousands of such letters.) Mrs. G. H. Becket, Ridgeway, Wis.

## YOU ARE MISSING SOMETHING

*if you are not reading the Farm Journal. You can live without it, of course, but you can't live so MUCH; you can make nearly as much money, perhaps, but YOU WON'T BE SO HAPPY.*
