NOTE—The reports for the year ending June 30, 1922, and June 30, 1923, printed in this volume, have been greatly abbreviated at the request of the State House Commission and the Department of Public Reports. It is for this reason that much of the material which appeared in former years, including illustrations, reports of city superintendents, helping teachers and others does not appear.

PART I

REPORTS OF
PRESIDENT OF STATE BOARD OF EDUCATION

AND

COMMISSIONER OF EDUCATION

For year ending June 30, 1922

REPORT OF PRESIDENT

OF

NEW JERSEY STATE BOARD OF EDUCATION

To the Senate and General Assembly of the State of New Jersey:

As required by law, I have the honor to submit herewith the Annual Report of the State Board of Education, together with important accompanying documents, for the school year from July 1, 1921, to June 30, 1922.

M. A. RICE,
President State Board of Education.

STATE OF NEW JERSEY
DEPARTMENT OF PUBLIC INSTRUCTION
TRENTON

REPORT OF
COMMISSIONER OF EDUCATION

TRENTON, December 2, 1922.

To the State Board of Education:

GENTLEMEN—In compliance with the requirements of the School Law I have the honor to submit herewith the Annual Report of the Department of Public Instruction for the school year ending June 30, 1922.

In many ways the year has been a notable one. Without exaggeration it may be said that the educational enthusiasm manifested throughout the State was greater than ever before. This is apparent everywhere in the statistical reports herewith submitted.

Because of the compliance with the Compulsory School Law the question of attendance has almost ceased to be a problem. The greatest problem throughout the State has been the furnishing of school facilities for the large numbers that are crowded into the public schools. Especially is this evident this year in the great increase in the attendance in the higher grades.

The total enrollment of pupils in all the various departments of the public schools for the year 1921-22 was 678,734. This was an increase in the day schools of 37,000 boys and girls. This increase in enrollment is equal to the total enrollment in all the schools of the counties of Hunterdon, Ocean, Salem, Sussex and Warren, and would require nearly 900 additional teachers. To instruct 678,734 pupils there were required 20,874 teachers.

The children were housed in 2,175 school buildings, an increase of 35 over the year before. All were furnished, not only with teachers, but with books, supplies and the necessary apparatus free of cost.

There were about 30,000 children transported to schools at public expense because there were no schools suitable in their own neighborhood. About one-half of this number were transported to high schools outside of their respective school districts.

The statistical tables herewith presented show many interesting things, all of which indicate the growing concern in the matter of public education. Important facts in these statistics are summarized here for the purpose of making them prominent and for the purpose of showing the enormous business that education has become in our State.

The current expenses for operating schools for the year 1921-22 amounted to \$42,856,195.63. This was an increase of \$3,777,586.55 over the previous year. Of this amount \$30,014,528.57 were expended for the salaries of teachers, superintendents, supervising principals, supervisors and principals. Salaries of janitors, engineers and firemen cost \$2,531,316.82. Salaries and expenses of attendance officers cost \$317,601.84, and fuel cost \$1,492,753.72.

The expenses of the Department of Public Instruction and the State Board of Education were \$156,102.88, which is a trifle more than a third of one per cent. of the current expenses.

Of the total number in the schools, namely, 678,734, there were 29,798 enrolled in the evening schools. Enrolled in the day schools were 330,754 boys and 318,182 girls, making a total in the day schools of 648,936.

There were 40,949 children enrolled in the kindergartens. In the first four grades, or what are commonly known as the primary schools, there was an enrollment of 294,056. The total number of pupils in grades five to eight, inclusive, was 199,596.

The total number registered in the high schools was 70,356. This was an increase of 11,212 over the year before. The high school registration for the past five years has been as follows:

1918	1919	1920	1921	1922
51,048	51,379	55,243	59,144	70,356

The total number of pupils enrolled in one-room rural schools was 16,712, a decrease of 1,023. The number in two-room schools was 15,715, an increase of 941. There was a decrease of 28 in the number of teachers in one- and two-room schools.

The average daily attendance in day schools was 517,816, an increase of 30,966. The average absence of pupils was 14 days. There was an increase of men teachers in all the schools of the State of 258, and an increase of women teachers of 832, making a total increase of 1,090 teachers.

According to the Annual Report for the last five years the total expenses of operating the schools have been as follows:

1917-18	\$21,741,295.87
1918-19	25,451,014.43
1919-20	30,854,795.53
1920-21	39,078,609.08
1921-22	42,856,195.63

SALARIES OF TEACHERS

The total amount of salaries paid day school teachers in this State, not considering superintendents, assistant superintendents or evening school teachers of any kind, was \$32,005,953.95, which includes the Teachers' Pension and Annuity Fund. This was an increase of \$3,864,553.30 over the preceding year.

The average salary per year paid to all day school teachers in the State (19,663), not including superintendents, assistant superintendents or evening school teachers of any kind, was \$1,627.72, an increase over the preceding year of \$123.31.

The following figures show the corresponding average salaries for the past five years:

<i>1918</i>	<i>1919</i>	<i>1920</i>	<i>1921</i>	<i>1922</i>
\$948.29	\$1,083.27	\$1,177.20	\$1,504.41	\$1,627.72

The average salaries paid to teachers in different kinds of schools during 1921-22 were as follows:

	<i>Men</i>	<i>Increase</i>	<i>Women</i>	<i>Increase</i>
Kindergarten			\$1,521.22	\$138.14
Grades 1 to 4	\$1,056.55	\$112.23	1,443.18	109.70
Grades 5 to 8	1,594.44	8.44	1,539.40	80.31
Junior High Schools	2,033.00	51.24	1,892.83	148.76
High Schools	2,451.57	103.25	1,866.16	163.73

NORMAL SCHOOL GRADUATES

Trenton State Normal School	241, an increase of 31 over 1920-21
Montclair State Normal School	191, an increase of 19 over 1920-21
Newark State Normal School	347, an increase of 28 over 1920-21
Total	<u>779</u> , an increase of 78 over 1920-21

VALUATION OF SCHOOL PROPERTY

The total value of school property in New Jersey is \$133,111,171.67, an increase of \$16,786,708.45.

December 2, 1922.

REGULAR MEANS OF SENDING FORTH INFORMATION TO THE SCHOOLMEN OF NEW JERSEY

1. The Education Bulletin, a monthly publication prepared under the auspices of the Department of Public Instruction of New Jersey, has been issued monthly as heretofore. There seems to be a growing interest in this periodical. Its items cover a variety of matters such as school activities, important appointments, special studies of school work, extracts from reports, and accounts of meetings of schoolmen of the State.

In some respects the Education Bulletin has been changed during this school year. Space is now given to "Educational Items" and in March a special issue entitled, "Good Health Number of the Education Bulletin" was sent out. As in the past one issue was devoted entirely to the enactments of the last session of the Legislature.

2. Important notices affecting high school work or results of special studies of high school teaching reach high school principals in a monthly circular known as the "Secondary School Letter" prepared by the assistant commissioner of education in charge of secondary education.

APPOINTMENT OF COUNTY SUPERINTENDENTS

During the year the following appointments of county superintendents were made by the Commissioner of Education and confirmed by the State Board of Education:

Atlantic County, Henry M. Cressman, September 10, 1921.
Bergen County, B. C. Wooster, September 10, 1921.
Camden County, Charles S. Albertson, September 10, 1921.
Cumberland County, J. J. Unger, March 11, 1922.
Essex County, Oliver J. Morelock, March 11, 1922.
Mercer County, Joseph M. Arnold, September 10, 1921.
Middlesex County, H. Brewster Willis, September 10, 1921.
Monmouth County, William M. Smith, May 6, 1922.
Ocean County, Charles A. Morris, April 1, 1922.
Passaic County, Edward W. Garrison, September 10, 1921.
Somerset County, Henry W. Krebs, September 10, 1921.
Sussex County, Ralph Decker, October 1, 1921.

SCHEDULE OF TEACHERS' INSTITUTES

Institutes were held in September, October and November, 1921, as follows:

Atlantic County, at Atlantic City, November 18, 1921.
Burlington County, at Mount Holly, November 4, 1921.
Camden County, at Collingswood, October 19, 1921.
Cape May County, at Wildwood, September 16 and 17, 1921.
Cumberland County, at Bridgeton, October 28 and 29, 1921.
Gloucester County, at Woodbury, October 14 and 15, 1921.
Hudson County, at West Hoboken, October 21 and 22, 1921.
Hunterdon County, at Flemington, November 10, 1921.
Monmouth County, at Long Branch, November 9, 1921.
Morris County, at Dover, November 2, 1921.
Ocean County, at Lakewood, October 21 and 22, 1921.
Salem County, at Salem, September 30 and October 1, 1921.
Somerset County, at Somerville, October 7 and 8, 1921.
Sussex County at Newton, September 23 and 24, 1921.
Warren County, at Phillipsburg, October 5, 1921.

REPORT OF STATE SUMMER SCHOOLS

PREPARED BY

WILLIAM A. ACKERMAN

Director of State Summer Schools

(Summer of 1922)

Summer schools for teacher training were in session this year under the support of the State at Ocean City, Collingswood and Newton; and partly under State support at Rutgers College. Accredited schools were located at Mount Saint Mary's College, North Plainfield; Benedictine Academy, Elizabeth; College of St. Elizabeth, Convent Station; Mount Saint Dominick Academy, Caldwell.

Altogether about two thousand students were enrolled, nearly as many as attend the three State normal schools. About four hundred of these students had not studied beyond the high school and had no teaching experience. They were beginning the process of certification. On the other hand almost an equal number were through with certification and were working for their personal satisfaction or for local credit in terms of salary increase. Apparently the intellectual character of these students does not vary materially from that of similar students elsewhere. In the results of educational tests the entering classes maintained the status of high school graduates in the Terman scale, and the experienced teachers attained a median of twenty points higher on the same scale. The range of abilities is not restricted but there were fewer scores on the lower end of the scale and more on the upper end than on the Terman record.

Under the impulse of their new function as summer normal schools all the schools sought to increase the standards of their work. In a preliminary meeting of all the faculties, a common viewpoint of the several schools was determined, as well as the special features which each should stress. It appeared wise to continue to emphasize at Ocean City advanced courses for experienced teachers as well as certain courses for teachers and supervisors of special subjects. To the school at Newton was assigned the problem of working out a typical training for rural school teaching since practically all the students in that school would likely apply themselves to the education of children in rural communities. Collingswood became a typical normal school for both urban and rural teachers drawn from the populous centers of Camden and the adjoining counties. Then the faculties were organized into groups of teachers by subjects in order that common objectives for the several classes might be adopted, and that the subject matter to be taught might be selected in harmony with these objectives. Through the continuance of these committees it is expected that a much fuller correlation will be secured for next year; and with this in mind, together with the object of securing continuity in the summer school faculties, the faculty members for next year were appointed at the close of the session. The basis on which credit was allowed was changed so that excellence of work in recitations and in examinations was

alone considered. However, credit was not given to students who were more than a few days late in entering the school or who failed to maintain a regular schedule of attendance.

Perhaps the largest single element of progress made during the session was in the kind of service rendered by the demonstration schools. At Newton the demonstration school undertook to work out a project covering the typical industries of northern New Jersey, with which were correlated all the subjects in the elementary school curriculum. To this project all the normal school classes made some contributions, by virtue of which the demonstration school became the center of the entire school. In the study of methods, students not only observed the teaching in the demonstration classes, but they prepared typical lesson plans and in groups of four or five carried their best plans to completion in practice. The demonstration school at Collingswood was visited practically every period of the day by the several normal school classes, so that very little of the work was confined to the discussion of theory but was studied and measured in classroom terms. Ocean City has the largest demonstration school, but is somewhat hindered from using it as a school center because of the distance between the high school building in which the normal school classes are largely housed, and the building in which the demonstration school is located. The same type of contact as at the other schools was made by the methods and management classes, but much remains to be done to make this not only a school of observation, but also a practice school and experiment school for those teachers in the advanced courses who are working on special investigations.

The summer schools need a re-adjustment of their demonstration school facilities. An ideal equipment would be one demonstration class for fifty students; but on the basis of one class for one hundred normal school students there should be at least two demonstration classes at Newton, three or four at Collingswood, and, because of the necessity for serving a larger number of advanced students, five or six at Ocean City. These standards can not be attained without securing from the legislature an enlarged appropriation for the summer schools.

The following tables present the essential statistics from each of the State supported schools. Statistics from Rutgers College are not available at this time.

REPORT FROM STATE BOARD OF EXAMINERS

PREPARED BY

MISS LOUISE PRECHT

Secretary of State Board of Examiners

Seven meetings of the State Board of Examiners were held during the year.

No important changes have been made in the rules concerning teachers' certificates prescribed by the State Board of Education.

Examinations for teachers' certificates were held in August, November and April. The statistics relating to these examinations accompany this report.

All special certificates (State and county)—Second Grade State Certificates, Third Grade Certificates and First Grade County Certificates—granted under the rules in force prior to July 1, 1911, may be made permanent certificates on the recommendation of the county or city superintendent under whom the applicant is teaching.

War emergency licenses for the year ending June 30, 1922, on the same terms and conditions as governed the issue of said licenses during the preceding year are renewable on recommendation of the county superintendent.

REPORT OF THE BUREAU OF CREDENTIALS

PREPARED BY

WILLIAM A. ACKERMAN

Chief of the Bureau of Academic Credentials

The Bureau of Credentials issues preliminary qualifying certificates covering the academic education required for the study and practice in New Jersey of Accountancy, Chiropody, Dentistry, Law, Medicine, Nursing, Optometry, Pharmacy, and Veterinary Medicine. By reciprocity agreement the Bureau also certifies to the States of New York and Pennsylvania preliminary records established in this State.

The Bureau recognizes two methods of establishing preliminary records: (1) by accepting credentials showing the completion of courses of study covering the required number of years in approved schools; and, (2) by giving examinations twice a year, in November and April, for those who did not meet the full requirement by study at approved secondary schools.

The extent of the business of the Bureau is indicated in the following table:

TABLE I.

<i>Type of Certificate</i>	<i>New Jersey Certificates Issued</i>	<i>Records Certified to Other States</i>	<i>Total Certificates</i>	<i>Cases Pending</i>	<i>Total Cases Under Consideration</i>
Accountancy ..	56	19	75	651	726
Chiropody	6	4	10	79	89
Dentistry	103	45	148	936	1084
Law	283	166	449	2126	2575
Medicine	220	45	265	1936	2201

Miscellaneous ..	11	18	29	322	351
Total, 1922	1179	447	1626	8245	9871
Total, 1921	969	463	1432	7981	9413
Increase	210	*16	194	264	458
Increase, per cent.	22	*3.5	13.5	3	5

While the educational standards of the State have been carefully maintained, the Bureau staff has endeavored to be helpful to applicants for certificates by advising as to the best methods of procedure in securing the required

*Decrease.

amount of preliminary education. The results of this activity are partly reflected in the fact that 22% more New Jersey certificates were issued this year than last, and that 577 applicants used the State examinations for establishing records, an increase of 105 per cent.

Credential records are on file from the year ending in June, 1902, when only the dental and law certificates were required. Table II shows the date of first certification for each profession, the number of certificates issued during the first year and the last three years, and the total number issued to date.

TABLE II.

<i>Type of Certificate</i>	<i>Year First Issued</i>	<i>Number First Year</i>	<i>1920</i>	<i>1921</i>	<i>1922</i>	<i>Total to Date</i>

SUMMARY OF STATISTICS

For the School Year Beginning July 1, 1921, and Ending
June 30, 1922.

SCHOOL TERM	1921-1922	Increase or decrease
Average time schools were maintained (A school month is 20 days)	9 mos. 9 days	1 day D
SCHOOL DISTRICTS, HOUSES, ETC.	1921-1922	Increase or decrease
School districts	506	2 I
Buildings owned	2,088	39 I
Buildings rented	87	4 D
Total school buildings	2,175	35 I
Classrooms	15,964	559 I
Buildings completed during year	40	13 I
Buildings enlarged or remodeled during year	37	10 I
One room buildings	631	2 D
Two room buildings	314	3 D
Three room buildings	68	7 I
Four room buildings	222	7 I
Five or more room buildings	940	26 I
VALUATION OF SCHOOL PROPERTY		
Total value of school property	\$133,111,171.67	\$16,786,708.45 I
Average value of New Jersey school buildings	61,200.54	6,843.32 I
GRADUATES OF STATE NORMAL SCHOOLS		
Trenton	241	31 I
Montclair	191	19 I
Newark	347	28 I

* Not reported on per hour basis last year.

SOURCES OF INCOME.

Moneys for the support of the public schools were derived from various sources, as follows:

1. Income of State School Fund,	\$300,000.00
Apportioned to counties on basis of days' attendance.	
2. Appropriation by Legislature from State Funds for General Purposes,	665,532.33
3. Appropriation by Legislature from Railroad Tax for General Purposes,	3,283,879.14
4. Appropriation by Legislature from Other Sources,	183,503.63
5. Appropriation from State Railroad Tax,	2,751,416.27
Apportioned to counties on basis of ratables.	
6. State School Tax,	9,000,548.21
90% apportioned to counties on basis of ratables; 10% apportioned to counties arbitrarily by State Board.	
7. Interest on Surplus Revenue Fund,	27,838.89
Apportioned to districts by county superintendents on general plan.	
8. Local Appropriations,	41,809,503.66
Used for current expenses, buildings and repairing, etc.	
9. Other Sources,	2,062,331.35
Appropriated for special purposes.	

SCHOOL PROPERTIES.

The reported valuation of school properties increased during the year from \$116,000,000 to \$133,111,171. Reported valuations for the past ten years are in round numbers, as follows:

1913.....	\$53,000,000	1918.....	\$79,000,000
1914.....	58,000,000	1919.....	83,000,000
1915.....	64,000,000	1920.....	102,000,000
1916.....	69,000,000	1921.....	116,000,000
1917.....	74,000,000	1922.....	133,000,000

It will be seen from these figures how great has been the increase in the valuations of school properties during the last ten years.

CHIEF DISBURSEMENTS FOR THE LAST FIVE YEARS

	1918	1919	1920	1921	1922	Increase or decrease	
Salaries of teachers	\$15,785,310.12	\$18,487,036.04	\$20,916,549.51	\$28,141,400.65	\$32,005,953.95	\$3,864,553.30	I
Operation of school plant, including janitors' services	2,779,047.66	3,267,910.58	3,709,351.42	4,474,729.78	4,771,746.65	297,016.87	I
Maintenance of school plant	957,625.02	1,137,692.30	1,478,169.94	1,874,910.82	2,464,301.33	589,390.51	I
Purchase of land and erection of buildings.....	5,440,048.39	2,772,218.06	5,467,458.29	12,464,293.89	14,279,157.00	1,814,863.11	I
Transportation of pupils to other districts and within the district	529,527.27	655,882.72	781,259.14	1,015,285.76	1,082,120.39	66,834.63	I
Medical inspection	284,703.56	320,717.11	410,003.38	513,901.48	589,514.67	75,613.19	I
Manual training	741,146.64	*787,212.14	*975,542.59	*1,104,659.68	*1,265,473.35	160,813.67	I
Vocational training	276,226.01	*252,339.41	*331,395.97	*419,119.66	*382,172.81	36,946.85	D

* Salaries included in this figure also in the first item.

STATISTICS ABOUT ENROLLMENT, ABSENCE, TEACHERS AND SALARIES COVER- ING A PERIOD OF FIVE YEARS

	1918	1919	1920	1921	1922	Increase or decrease

PART IV.

REPORTS OF ASSISTANT COMMISSIONERS AND PHYSICAL TRAINING DIRECTOR

For year ending June 30, 1922

Report of

Roy L. Shaffer, Assistant Commissioner of Education in charge of Elementary Education

Lambert L. Jackson, Assistant Commissioner of Education in charge of Secondary Education

Wesley A. O'Leary, Assistant Commissioner of Education in charge of Vocational Education, Manual Training and Continuation Schools.
(Printed as a separate document.)

Charles J. Strahan, Deputy-Assistant Commissioner of Education in charge of Controversies and Disputes

George R. Seikel, Director of Physical Training and Hygiene

REPORT ON ELEMENTARY EDUCATION

PREPARED BY

ROY L. SHAFER,

Assistant Commissioner in Charge of Elementary Education.

*Honorable John Enright,
Commissioner of Education,
Trenton, New Jersey:*

DEAR SIR—In compliance with the regulations of the Department of Public Instruction, I have the honor to submit to you my first annual report of the work of the Assistant Commissioner of Education in Charge of Elementary Instruction. The report covers the work that has been done from August 1, 1921, to June 30, 1922.

After a careful study of my duties as laid down by you, I began to formulate objectives which are necessary in order that the office may be of greatest help to the State and to the children of the State, and so that there might be definite policies, which would serve as guides in the supervision of the educational activities of the schools. These objectives or policies are so important to this department and to those who are working with us for the advancement of education that I deem it important to state them as an introduction to this report.

1. To teach health as a thing to be achieved, not only in the urban school, but also in the country school. There should be stimulated and developed a health consciousness, so that the people of our State will establish a standard of fundamental health essentials and strive to attain this standard.

2. To develop a working knowledge of the duties and privileges of citizenship. In a democracy our first duty must be the making of good citizens.

3. To stimulate interest in self-expression—the expression of the individual's own experiences—his own thoughts, his own feelings, his own way of looking at things; the development of the use of a more meaningful language.

SUPERVISION

Because the State department is removed from the actual work of teaching and because the State subsidizes education, this department can best function through supervision. Supervision has come into the field of education as most other things, on broad general ideas and theories. The chief duty of supervisors is to make the work more specific and more definite. The first objective for supervision is to set forth a body of principles that may be accepted as guides in establishing programs of work for the elementary schools. This objective must be built up on a foundation of accepted principles. Among them are the following:

1. That teachers should grow in skill through teaching.
2. That supervision to be worthwhile must be constructive.
3. That, whenever necessary to criticise negatively, the criticism must be given in detail, so that the natural antagonism between teacher and supervisor will be reduced to a minimum.
4. That supervisors should improve in skill and technique through supervision.
5. That the work of supervision may become more efficient, the supervisors should meet frequently in conferences or group meetings, to confer on policies which should be changed, whenever they are out of harmony with the common practices in education.
6. That supervision must be optimistic.
7. That supervision make special use of teachers with marked ability by having them give demonstration lessons, assist in making lesson plans, programs of study, and lead discussions at conferences, etc.
8. That supervision keep constantly in mind a slogan, as, "Better teaching, better schools."

ELEMENTARY EDUCATION

The elementary schools include all the instruction given from the kindergarten through the eighth grade. Because the urban schools have as their heads men and women of good educational qualification, most of my visiting time has been spent in the rural schools of the State. The rural school will be discussed as a special topic of this report.

During the year the normal school authorities have registered with the State Board of Education a complaint that the students they were receiving were not properly trained. Since these authorities did not give constructive suggestions for the improvement of pupils, I am suggesting what I think will help the elementary school in its effort to turn over to the high school a better trained product.

GRADE GOALS

We, in the elementary school, need to know the achievement of each grade. We are not able to state clearly what degree of proficiency is expected, nor can we tell when a child has the expected degree of proficiency. Such thoughts lead to the following questions: What methods of approach do topics distinguish fifth grade teaching from second grade teaching? What attitudes make a child a typical fifth grade pupil, but make him to some extent mal-adjusted in the sixth or seventh grade? What degree of ability to study, what resources in the application of principles to concrete situations, what types of thinking are regarded as appropriate to the different grade levels? If we confine ourselves to subject matter, shall we expect every child to have the same degree of mental ability? If not, how may we determine the mental ability of children? We find it difficult to learn just how well a child is expected to write in any particular grade, how well he should read, etc.

The time must soon come when children who are passed from grade to grade, from elementary to high school, and from high school to college, shall not be graduated with certificates of promotion expressed in meaningless terms, but these should state specifically what the student knows, and what he

can do. To my mind it means that we should at least establish in our public schools a minimum of work for each grade, and that certain definite results of teaching should be expected.

CLASSIFICATION

This course of procedure will lead into the field of educational classification. In this field we will need to look to the psychologist for advice. In our State we are fortunate to have a psychologist of more than ordinary ability. Dr. Edgar A. Doll, Psychologist of the Department of Institutions and Agencies, has had a rich experience in classifying children at the Vineland Training School and in the State departments. He has also conducted studies at Princeton University, which studies have received public approbation. He also made a classification of the recruits of New Jersey during the last war. Dr. Doll has classified all children with respect to their mental levels into three groups, as follows: academic or verbal-minded children, industrial- or mechanical-minded children, and social-minded children. A certain per cent. of all children are verbal-minded children, able to learn readily from books, able to think in an orderly sequence, and able to remember that which they have learned. Another portion of our children are mechanical-minded; able to do rather than to learn; able to construct, rather than theorize. The others are social-minded. These do not take readily to books nor to the mechanics, but excel in ability to get along with their fellows. It must not be forgotten that these mental levels overlap each other. There is no distinct line of demarcation between them. Nevertheless, if there are such types, and we believe there are, it is most inefficient to have a course of study strictly academic or strictly verbal for all children. But rather we should determine the types and arrange our courses of study to meet the needs, interests and capacities of all the children, in so far as it is possible.

The best scientific aid at our disposal for finding mental differences is standard testing. One needs but look around in the world about him to see the results of science to be convinced of the value of a scientific method.

The growth of the movement in education to test children scientifically has been rapid. Many States have established special departments of research, whose duty it is to apply science to their work. During the latter part of the year, a committee appointed by you has been at work, investigating the value of standard tests. This committee has found a great need for unifying and guiding this movement in New Jersey. We hope that much good will result. By the time of the next report definite results should have been accomplished.

RURAL SCHOOLS

It is difficult to define the term rural school. But it needs to be defined so that we can look at the problem from the same viewpoint. When rural schools are referred to in this report, it means a school in the open country, composed of one or two rooms. This definition will hold true except where schools are consolidated, and thus have more than two rooms.

New Jersey is fortunate to have a body of rural school supervisors—the helping teachers. These helping teachers, which now number 33, in cooperation

with the county superintendents, have made unusual progress in rural school supervision. They have improved the type of teaching in their schools; they have stimulated teachers to take an interest in the boys and girls in the schools; they have interested the community in the schools; they have been leaders in the parent-teacher association; they have met with other community organizations and encouraged interest in the schools. In fact, the helping teacher has done a superior piece of work both in the schoolroom and in the community.

Below you will find a table which will show the type, kind and amount of work that is being done by the helping teacher.

TABLE I.
HELPING TEACHERS.

COUNTY	Name of Helping Teacher	Number of One-room Schools Supervised.	Number of Two-room Schools Supervised.	Number of Schools of More Than Two Rooms Supervised.	Number of Buildings Supervised.	Number Teachers Supervised.	Number of Inexperienced Teachers.	Number Teachers with Experience, But New to the School.	Number of Pupils Enrolled.	Number of Eighth Grade Pupils.
Atlantic	Cora Schaible	15	6	7	28	57	11	6	1,500	111

* Resigned.

This table shows that 357 teachers of one-room schools come directly under the influence of the helping teacher. This is 55% of the one-room schools in the State of New Jersey. One hundred and twenty-nine two-room school teachers also come under this influence. This is 40% of our two-room schools.

Two hundred and sixty teachers without experience at the beginning of last year received help from these helping teachers. It would be difficult to estimate the value of the assistance given to these inexperienced teachers, most of whom are immature in age and worldly experience, and need guidance. Forty-one thousand eight hundred and ten pupils received the benefit of this double influence of teacher and helping teacher.

We need more helping teachers to aid and assist the rural teacher.

The teacher in the last analysis is the most potent factor in the school. The schools are what the teachers make them. I see no good reason why the people of the open country should not have as good a teacher as the people of the urban or city schools. It is impossible for our normal schools to train enough teachers to fill the positions of the urban and city schools; hence, the rural school must accept the untrained teacher.

COUNTY INSTITUTES

During the school year 1921-22 county institutes were held in fifteen counties. Some of these were one day in length, but a majority were of two days' duration. Because of the economic situation it was deemed advisable where the institutes were two days in length, to have one of these days a Saturday institute. Though the institutes were held on Saturdays, the percentage of attendance of teachers was high. This reflects credit to the teachers of the State, especially when there is taken into account the fact that tradition holds that Saturday should be a free day for teachers.

The general work of the institute centered around questions of importance in modern pedagogy. Several innovations were brought to the institutes last year. Among them, I name community singing. This kind of song service received special attention. There is nothing that so unifies a group as singing, and unification is necessary in order to create an interest in so heterogeneous a group as all the teachers in the county. Another innovation was a solo rendered at each session of the institute by singers of ability, selected from special talent within the State. This proved to be not only entertainment, but something that carried over into the work of the schools much needed inspiration. Mr. Lester A. Palmer, Assistant Director of Physical Training, ably rendered solos at many of the county institutes.

Another most effective innovation was that of demonstration teaching introduced at the institute held in Ocean County. In the morning, after an inspirational address, the institute was divided into groups, according to a prearranged plan. Groups of teachers went to a demonstration of actual teaching. A good teacher was selected from the county. The teacher brought with her the class of pupils whom he regularly taught, and taught an actual lesson for the group of teachers assembled. The meeting was in charge of a master, selected from the departments of practice of the State Normal Schools. In the afternoon, this same group gathered together and discussed the lesson from many viewpoints.

CONFERENCES

The conferences of the year included the supervisory meetings which were held at Atlantic City, December 8 and 9, 1921; New Brunswick, January 12 and 13, 1922; and Newark, January 19 and 20, 1922. The aim of the department was to make the meeting democratic, so that each of the persons in attendance would gain power by actually doing something himself. The program below is typical:

MEETING OF THE COUNTY AND CITY SUPERINTENDENTS,
SUPERVISING PRINCIPALS AND HELPING TEACHERS FOR
MERCER, HUNTERDON, SOMERSET, UNION, MIDDLESEX,
MONMOUTH AND OCEAN COUNTIES, ON THURSDAY
AND FRIDAY, JANUARY 12 AND 13, 1922

KIRKPATRICK CHAPEL, RUTGERS COLLEGE, NEW BRUNSWICK

Thursday, January 12—Forenoon

- 10:30—Community Singing, directed by Mr. H. Brewster Willis, County Superintendent, Middlesex County.
10:45—The Socialized Recitation in the High School. Presentation, Mr. Frederick Emmons, Superintendent of Schools, Elizabeth. Discussion, Mr. T. Lattimer Brooks, Superintendent of Schools, Somerville, and Mr. Wm. M. Smith, Superintendent of Schools, Freehold.
11:30—General Discussion.
12:00—State Summer Schools, Dr. W. A. Ackerman, Director of State Summer Schools.

Afternoon

- 2:00—Musical Appreciation, Piano Solo, Mr. Henry C. Krebs, County Superintendent, Somerset County.
2:10—Address, Hon. John Enright, Commissioner of Education.
2:30—High Spots in Our Educational Practice:
(a) Hunterdon County, Mr. Hoffman and three others;
(b) Mercer County, Mr. Arnold and three others;
(c) Middlesex County, Mr. Willis and three others;
(d) Monmouth County, Mr. Strahan and three others;
(e) Ocean County, Mr. Morris and three others;
(f) Somerset County, Mr. Krebs and three others;
(g) Union County, Dr. Johnson and three others.
General Discussion.

Evening

- 6:00—Dinner and Entertainment, by the Teachers Club of New Brunswick.

Friday, January 13—Forenoon

- 9:15—Intelligence Tests from a Diagnostic Viewpoint:
(a) The Diagnosis, Mr. Ira T. Chapman, Superintendent of Schools, New Brunswick;

(b) Difficulties in Applying a Diagnosis:

1. From a Rural Viewpoint, Miss Georgiene Dismant, Helping Teacher, Somerset County;
2. From an Urban Viewpoint, Mr. A. G. Woodfield, Supervising Principal, Hillside Township, Union County.

10:00—"Mental Levels," Dr. Edgar A. Doll, Psychologist, Division of Rehabilitation.

10:30—General Discussion.

11:00—Coordination of Public and School Libraries, Miss Sara Askew, Public Library Commission.

11:30—A Library for Practical Use, Mr. S. G. Winans, Supervising Principal, Middletown Township.

11:45—General Discussion.

The county and city superintendents, supervising principals and helping teachers of seven counties were invited to each meeting. These were largely attended and many phases of modern educational theory and practice were discussed.

AMERICANIZATION

It gave me pleasure during the year to visit all of the evening classes for the foreign-born. My interest in this work has been stimulated by our census statistics, which show that in our country there are 13,000,000 foreign born, 3,000,000 of whom cannot speak English, or have no conception of our governmental ideals. New Jersey has more than its share of these people.

Americanization—to give to the term its most comprehensive meaning—is the great business of making good American citizens, the business of acquainting everyone who lives on our shores with both the physical and spiritual America, to the end that this acquaintance may result in loyalty to our institutions and ideals, and the habit of living the life of good citizens. To accomplish this end, public education must bring every citizen to a realization of what Americanism really is, of the things that a good citizen believes in, and swears by and loves. And further, school people must analyze and interpret Americanism in terms that touch the life of the average man. This means more than a schooling. It is true that in a measure it is a school problem, but it must also be a problem of our daily lives. It must be a matter of prevention of exploitation, of good housing, of clean milk for babies, of adequate wages, of good industrial conditions, of a spirit of neighborliness. Everything that touches the immigrant's life is an instrument which makes him a better American or the reverse. Surely the Americanism that we like to think about is not static, but dynamic, ever changing, ever growing.

My study of the problem during the year has led me to think in terms of improvement, and I am convinced that the following five things are necessary to make effective the great movement of Americanization:

1. The vital interest and support of the whole State.
2. Leadership.
3. An intelligent coordination of community agencies, under State control and guidance.

4. Good teachers (not teachers trained to teach children but teachers who understand the adult, teachers who can approach the problem upon the psychology of these people, their customs and beliefs).

5. Adequate friends.

The next decade must witness a strong educational drive in the field of Americanization or else we, the people of this great democracy, must pay the bill by suffering.

HEALTH

We are passing through an era known as the age of science. During the past century science has devoted much time and has succeeded in elevating to a high degree of efficiency those things of a mechanical nature. No one would hesitate to say the mechanical world is nearly perfect, and it has been brought about by the application of science. Science has also been studying and formulating laws in other directions, and one of these interests every human being; and that is the study of biology. Biology has to do with the life of all animals, including the highest type—the human being. One of the most interesting results of the biologist is that we, as humans, do not live as long as we should, and that this is due to our manner of living.

During the year, we have been making a drive to improve health conditions among our school children. By carefully applying the suggestions of science, infant mortality has been reduced, certain diseases have been reduced among our population, and the average age of mortality has been increased. I can conceive of no greater service to the children of the State than that we can so guide their habits of living so as to increase their length of life. Our drive has followed the course usually suggested by physicians—the careful practice of the fundamental habits of good living, viz., (1) that children should be given the proper foods; (2) that children should keep clean; (3) that children should take regularly the proper amount of sleep; (4) that children should have plenty of exercise; (5) that children should breathe fresh, pure air. We have also directed the people to look to correction of bodily defects, which are so easily corrected when we are children. New Jersey is making progress in health education, and some time in the future we hope that our population may live to the age of Methuselah, and that each day of their lives may be happy.

EFFICIENCY TESTS

The efficiency tests for the highest elementary grade were prepared by a committee composed of the Assistant Commissioner of Education in Charge of Elementary Instruction; Mr. J. J. Unger, Cumberland County; Mr. Oliver J. Morelock, Essex County; Mr. Charles A. Morris, Ocean County; Mr. Robert G. Sanford, Warren County. I wish to express my thanks to the members of the committee for their valuable help in the preparation of the tests.

The efficiency tests are not prepared for the purpose of determining promotion, but for the purpose of testing the efficiency of the instruction of the elementary schools. It seems to be difficult to impress this fact upon the minds of the school people of the State. In nearly all of the school districts of the State, excepting the larger cities, they are used, partially, as a basis of promotion. This fact makes their preparation a difficult matter. The results

of these tests should give to the State a general idea of the character of the work of the elementary schools, and should convey to the teachers of the State an idea of the type of work that should be presented. Until some means of testing with the above purposes in view is given, this examination will be more or less inefficient.

It is contrary to the best pedagogy to promote pupils by examinations. A pupil's promotion may be more safely left to the good judgment of the teacher, and should have as its basis the progress of the child in attaining certain fundamental facts and in attaining the ability to think clearly. It is also contrary to the spirit of the law, which directs the State department to give efficiency examinations to the highest elementary grade.

There is no part of the school problems which needs so much attention as that of promotion of pupils. All pupils should be promoted who are making constant and sufficient progress. If all our schools were ideally graded, if our attendance laws were enforced, if our teaching were ideal, and if our courses of study were prepared to meet the needs of our pupils, there would be no retardation. The saddest thought that has come to us in education is that the country over not more than 40% of our children reach the end of the eighth grade, and not over 10% reach the end of the high school. In a democracy every child must be educated so that he may be fit to rule, should he be called upon to do so, and surely we would not like to think of a ruler without at least a high school education.

Respectfully submitted,

ROY L. SHAFFER,

Assistant Commissioner of Education.

REPORT ON SECONDARY OR HIGH SCHOOL EDUCATION

PREPARED BY

LAMBERT L. JACKSON,

Assistant Commissioner In Charge of Secondary Education.

June 30, 1922.

*Commissioner of Education,
Department of Public Instruction,
State House, Trenton, New Jersey:*

DEAR SIR—In compliance with your request, I respectfully submit the following report for the year ending June 30, 1922. The data contained herein are compiled from the reports of all approved public secondary schools of the State, and these reports are on file in this department.

The statistical matter is arranged in tabular form similar to previous practice, so that comparisons from year to year may easily be made.

TABLE I

COMPARATIVE STATISTICS BY TOTALS

	1918	1919	1920	1921	1922	Incr.	Decr.
Approved four-year high schools..	137	138	137	137	139	2	0
Registered three-year high schools	11	11	10	8	8	0	0
Registered two-year high schools.	9	8	8	7	6	0	1
Registered one-year high schools.	2	1	1	0	1	1	0
Total registration in high schools	51,048	51,379	55,243	62,457	73,469	11,012	0
Pupils attending schools in adjoining districts	9,020	9,270	10,339	12,549	14,314	1,765	0
Total school enrollment of the State	561,825	571,434	591,798	612,277	648,936	36,659	0
High school teachers—							
Men	714	698	736	706	922	216	0
Women	1,295	1,379	1,289	1,528	1,690	162	0
Total	2,009	2,077	2,025	2,234	2,612	378	0

This table shows that there are 139 approved four-year public high schools in the State; 8 three-year schools; 6 two-year schools, and 1 one-year school.

During the past year Garfield and Egg Harbor City have been made four-year high schools.

The increase of 11,012 in the total registration, or 18% over last year, following as it does a 13% increase the year before, can mean only one thing—the increasing popularity of the high school. A much larger percentage of the pupils completing the elementary school are each year entering the high school. This rapid growth more than keeps pace with the increase of facilities so that the schools are still crowded in many districts.

However, a substantial building program is under way, thirty-two districts having planned increased high school facilities during the past year at a total cost of nearly \$10,000,000. Several districts are delayed because they have reached their bonding limit, and no solution to the problem has been found. The medium-sized schools, 300-700 pupils, are better housed than the larger schools. The most serious congestion is in the larger centers, such as Jersey City, Paterson, Newark, Trenton and Camden. In such districts the solution is the erection of junior high schools and all of the above named cities, except Paterson, are committed to this plan.

The increase of 1765 in the number of tuition pupils shows the continued faith of the rural population in secondary education. The county superintendents and helping teachers are not only improving the instruction in the rural schools but they are establishing strict standards of promotion from the elementary to the high schools. One convincing evidence that neither the rural nor the urban pupils are being too freely admitted to the high school is the fact that the persistence of the high school group is increasing rather than decreasing.

During the past year the number of teachers has increased 17% while the registration of pupils has increased 18%. The average number of pupils per teacher is now 28.5, the highest number in the history of secondary education in New Jersey.

The average salary for men teachers in the high schools of the State in 1922 was \$2,451.57; for women teachers in the high schools \$1,866.16. The corresponding salaries for 1921 were \$2,525 and \$1,737.

TABLE II

TOTAL ENROLLMENT BY CLASSES OF SCHOOLS

GRADE IX					
	1918	1919	1920	1921	1922
Four-year schools	21,171	22,034	24,297	26,868	31,484
Three-year schools	184	216	363	201	398
Two-year schools	159	276	137	295	193
One-year schools	150	30	106	0	28
Total	21,764	22,556	24,903	27,364	32,103
GRADE X					
	1918	1919	1920	1921	1922
Four-year schools	13,263	12,827	14,223	16,142	19,108
Three-year schools	120	135	175	85	275
Two-year schools	14	156	134	109	147
One-year schools	0	0	0	0	0
Total	13,497	13,118	14,532	16,336	19,530

GRADE XI					
	1918	1919	1920	1921	1922
Four-year schools	8,787	8,648	9,469	10,354	12,573
Three-year schools	78	93	106	58	105
Two-year schools	0	0	0	0	0
One-year schools	0	0	0	0	0
Total	8,865	8,739	9,575	10,412	12,678

GRADE XII					
	1918	1919	1920	1921	1922
Four-year schools	6,922	6,956	7,150	8,189	9,076
Three-year schools	0	0	0	0	0
Two-year schools	0	0	0	0	0
One-year schools	0	0	0	0	0
Total	6,922	6,956	7,150	8,189	9,076
Four-year schools		P. G.	83	156	82
Grand total	51,048	51,379	55,243	62,457	73,469

It appears from the table that the two-year and three-year schools contribute little to the four-year schools. The State is fortunate in having less than 2% of its pupils in attendance upon partial high schools. No more should be established, except in those localities where rapid growth insures the development of good four-year schools. If there is anything more difficult to rear than the human infant it is the small high school.

TABLE III

PERSISTENCE OF CLASSES OF 1920, 1921 AND 1922 COMPARED

	<i>Enrollment</i>	<i>Per cent.</i> 1922	<i>Per cent.</i> 1921	<i>Per cent.</i> 1920
1919, Grade IX,	22,556	100	100	100
1920, Grade X,	14,532	64.4	60.3	56.5
1921, Grade XI,	10,412	46.1	44.0	38.7
1922, Grade XII	9,076	40.2	37.6	30.1

By comparing the 1922 column of this table with the 1921 and 1920 columns the conclusion is inevitable, namely, that the holding power of the high school has materially increased during the past three years. The persistence of attendance in high schools for more than a generation has varied so little, that the proportion 100%, 60%, 40%, 30% has become a standard for expressing the parts of any given class that persisted in the successive years of the

high school. The above table, however, indicates that this deadlock is at last broken.

Persistence is a better measure of holding power than withdrawal, because among the withdrawals are many who leave perforce and not because they cannot do successfully the work required in the school courses.

TABLE IV

PERCENTAGE OF ENROLLMENT BY GRADES

	1918	1919	1920	1921	1922
Grade IX	42.6	43.87	45.08	43.81	43.69
Grade X	26.4	25.57	26.32	26.14	26.58
Grade XI	17.3	17.01	17.33	16.67	17.25
Grade XII	12.8	13.54	13.09	13.36	11.10

Table IV shows the distribution by grades of the pupils in each of the last five years.

TABLE V

ENROLLMENT BY COUNTIES OF HIGH SCHOOL BOYS

	1921	1922	<i>Incr.</i>	<i>Decr.</i>
Atlantic	930	1,065	135	0
Bergen	2,333	2,706	373	0
Burlington	571	729	158	0
Camden	1,315	1,728	413	0
Cape May	292	335	43	0
Cumberland	847	903	56	0
Essex	6,881	7,726	845	0
Gloucester	492	568	76	0
Hudson	4,994	6,034	1,040	0
Hunterdon	316	369	53	0
Mercer	1,142	1,421	279	0
Middlesex	989	1,221	232	0
Monmouth	1,505	1,705	200	0
Morris	1,004	1,195	191	0
Ocean	322	375	53	0
Passaic	2,436	3,133	697	0
Salem	291	390	99	0
Somerset	424	522	98	0
Sussex	214	248	34	0
Union	2,235	2,737	502	0
Warren	411	497	86	0
	29,944	35,607	5,663	0

Table V was prepared to indicate the vocational tendencies of boys in secondary schools; but there is no material difference between the increase in

attendance in the industrial sections and that in the agricultural sections. The increase follows practically that of the increase in total enrollment with a few narrow variations.

TABLE VI

DISTRIBUTION OF GRADUATES PROPOSING TO ENTER HIGHER INSTITUTIONS

	1918	1919	1920	1921	1922
Colleges	1,080	1,399	1,485	1,761	2,026
Technical Schools	202	544	284	332	283
Normal Schools	1,028	768	820	887	1,202
Law Schools	67	43	64	46	77
Medical Schools	37	51	51	66	68
Dental Schools	75	48	74	38	53
Other Higher Institutions.	253	279	848	423	377
Total	2,742	3,132	3,626	3,553	4,086
Total Graduates	6,633	5,685	6,119	6,879	7,362
Percentage of graduates proposing to go on for additional study	43.3	55.0	59.2	51.7	55.5

Table VI bears out the general impression that approximately 50% of the high school graduates pursue further study in higher institutions. The general tendency is toward an increase in this proportion.

SPECIAL PERIODIC STUDIES

In accordance with the plan established in 1916 to report the registration of pupils by subjects every five years instead of annually, the following table was prepared showing the registration of pupils in the Social Sciences in 1918 and 1922.

TABLE VII

ENROLLMENT IN THE SOCIAL SCIENCES IN 1921-1922.

	Grade IX.		Grade X.		Grade XI.		Grade XII.		Total.
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	
Ancient history	3,106	2,637	855	903	0	0	0	0	7,501
Early European history	991	1,775	935	1,050	196	412	0	0	5,359
Medieval and modern history	143	192	1,683	1,736	1,260	1,489	0	0	6,503
General history	0	0	0	0	4	7	0	0	11
English history	5	3	26	70	45	92	43	50	354
U. S. history and problems in									
American democracy	0	0	0	0	464	622	3,822	4,727	9,635
Economics	0	0	7	21	126	134	528	718	1,534
Community civics	11,320	11,062	510	504	0	0	0	0	23,396
Industrial history	138	147	314	259	0	108	46	33	1,044
Political geography	0	0	0	0	0	0	1	13	14
Total	31,519		8,873		4,959		9,981		55,331
Per cent. of grade registration	98.1		45.4		39.1		109		75.1

ENROLLMENT IN THE SOCIAL SCIENCES IN 1917-1918.

	Grade IX.		Grade X.		Grade XI.		Grade XII.		Total.
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	
Ancient history	3,629	3,716	744	1,026	0	0	0	0	9,115
Medieval and modern history	0	0	1,021	1,249	352	567	0	5	3,194
English history	0	0	136	120	641	997	0	0	1,894
U. S. history and civics	0	0	34	61	297	449	2,137	2,640	5,618
Economics	0	0	0	0	127	188	400	808	1,563
Community civics	145	224	0	0	0	0	0	0	369
Industrial history	295	317	151	129	169	85	0	0	1,146
Total	8,326		4,576		3,972		6,025		22,899
Per cent. of grade registration	38.2		33.9		44.8		87		44.8

The percentages in the above tables must be taken only as approximately indicating the changes since 1917-1918 because community civics and problems in American democracy have been made required subjects since that date; and, furthermore, there is an overlapping where pupils take more than one social science in the same year. After taking these factors into account, however, it is apparent that the social sciences are not receiving as much attention in those grades and subjects not controlled by State requirements. The total number studying continental history, ancient, medieval or modern, is practically the same proportion of the total high school enrollment as the corresponding number was of the enrollment five years ago. The popularity of ancient history has fallen considerably and that of early European has risen. English history as a separate study has decreased from 1894 to 334, while the enrollment of the schools has increased over 40%. Economics as a separate subject has not kept pace with enrollment and the same is true of industrial history. We have great need of more social science in our schools as soon as it is better organized and made available for high school teaching.

ENROLLMENT IN THE NATURAL SCIENCES IN 1921-1922.

	Grade IX.		Grade X.		Grade XI.		Grade XII.		Total.
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	
Physiography	1,039	833	99	81	4	1	0	0	2,067
General science	7,575	6,867	57	62	8	20	0	0	14,589
Biology	539	384	3,600	3,158	0	0	0	0	7,681
Botany	0	0	195	160	32	41	18	5	451
Zoology	0	0	161	119	29	41	18	9	377
Physiology	0	0	0	0	12	48	88	110	258
Physics	0	0	0	0	3,452	1,654	600	316	6,022
Chemistry	0	0	0	0	1,070	570	2,369	1,362	5,371
Total	17,237		7,692		6,982		4,985		36,806
Per cent. of grade registration	53.6		39.0		55.0		53.9		50.1

ENROLLMENT IN THE NATURAL SCIENCES IN 1917-1918.

	—Grade IX.—		—Grade X.—		—Grade XI.—		—Grade XII.—		Total.
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	
Physical geography	439	407	137	109	0	0	0	0	1,092
General science	4,340	4,166	0	0	0	0	0	0	8,506
Biology	360	502	1,320	1,811	0	0	159	210	4,362
Botany	0	0	165	257	0	0	0	0	422
Zoology	0	0	145	192	3	16	0	0	356
Physiology	72	87	10	6	0	0	0	0	175
Physics	0	0	0	0	2,102	1,747	316	352	4,517
Chemistry	0	0	0	0	763	722	1,489	1,349	4,323
Total	10,373		4,152		5,353		3,875		23,753
Per cent. of grade registration	47.6		30.7		60.3		56.0		46.7

It appears from the above tables that the high school courses in natural sciences as a group of studies are only a trifle more popular than they were five years ago. The enrollment in physical geography, general science, and biology has increased nearly twice as fast as the total high school enrollment, while the enrollment in physics and chemistry has increased only half as fast as the total enrollment. Botany and zoology have stood still in the midst of school growth. This is doubtless due to the increased popularity of biology. Physiology still drags on without its companions hygiene and sanitation. We are in great need of a continuous, well-arranged course in science covering four years of work and functioning in health instruction.

STATE HIGH SCHOOL CONFERENCE AT NEW BRUNSWICK

The fifth meeting of the State High School Conference was held at New Brunswick, October 27, 28. All sessions were crowded to the capacity of the audience rooms. Over 1,500 teachers and school officials registered at headquarters. A larger number of local boards of education than ever before released high school teachers to attend the Friday sessions of the Conference. Atlantic City closed its high school and sent its 60 high school teachers for both Friday and Saturday.

The whole of Friday was given over to problems of high school administration. At the morning session committee reports were received on the following topics:

"Educational Guidance"—Committee, Mr. H. W. Dutch, Montclair; Mr. A. D. Arnold, Passaic; Mr. R. E. Files, East Orange; Mr. I. B. Somerville, Ridgewood.

"High School Records"—Committee, Mr. A. S. Davis, Englewood; Mr. F. A. Brick, Bayonne; Mr. E. V. Walton, Roselle.

"High School Annual Report"—Committee, Mr. F. E. Pierce, Elizabeth; Mr. F. A. Brick, Bayonne; Mr. W. E. Stearns, Newark.

"Quality Credit"—Committee, Mr. C. A. Philhower, Westfield; Mr. Lindsey Best, Plainfield; Mr. J. H. Bosshart, South Orange.

"Ninth Grade Promotions"—Committee, Mr. A. H. Flake, West Hoboken; Mr. F. S. Woolson, Haddon Heights; Mr. W. B. Davis, Madison.

"The Core of the High School Curricula"—Committee, Mr. F. R. North, Paterson; Dr. W. A. Wetzel, Trenton; Mr. F. A. Brick, Bayonne; Mr. E. S. Stover, Bloomfield; Mr. C. A. Woodworth, West New York.

Dr. Edward S. Evenden, of Teachers' College, closed the morning session with an address on "The Financial Program for Schools."

At the afternoon session, conducted by the State High School Principals' Association, speakers, representing the teachers of the various departments of high school work, presented their views on the possibilities of co-operation between teachers and school executives.

The following departments were represented:

Mathematics—Address, "The Aims in Teaching Science and Mathematics," Mr. Merton C. Leonard, Dickinson High School, Jersey City.

Language—Address, "Problems of the Teachers of Language and Literature," Dr. Maud Thompson, Miss Beard's School, Orange.

Library—Address, "School Library Problems," Miss Helen J. Wolfs, South Side High School, Newark.

Vocational and Arts—Address, "Progress in Vocational and Manual Arts Education," Mr. James E. Dougan, Assistant Superintendent of Schools, Newark.

Social Science—Address, "The Place of Social Science in the Curriculum," Dr. D. C. Knowlton, Lincoln School, New York City.

The program following the evening banquet was designed to focus the work of the conference. The entire program of the two-day conference was framed to emphasize the social significance of the core subjects in the high school curriculum and the importance of a better plan of educational guidance.

Hon. John Enright, State Commissioner of Education, sketched this objective in bold relief, referring to the essential factors of Health, Language, Civics and Vocations, of which the first three constitute the common core of instruction. He then introduced President Arthur E. Morgan, of Antioch College, who explained how his college required every student to choose a vocational objective and how the college assisted the student to realize his ambition. Supplementing the idea of Social Science, Mr. Harold O. Rugg, of Teachers College, presented the significance of the reorganization of the Social Sciences.

On Saturday morning Mr. Hamilton Holt described in a masterly way the work of the League of Nations. Whatever anyone present may have thought of America's attitude toward the League, he could not fail to be informed and inspired by the significant facts dispassionately presented by Mr. Holt. It was a strong climax to a program designed to bring out the necessity of social studies in any scheme of democratic education.

The remainder of Saturday was devoted entirely to the meetings of the associations of teachers of various subjects:

Association of Teachers of Social Sciences—President, Prof. S. B. Howe, Newark.

Association of Teachers of English—President, Miss Margaret Coult, Newark.

Association of Teachers of Physical Education—President, Mr. Walter Short, Trenton.

Association of Teachers of Science—President, Miss Pauline McDowell, Elizabeth.

Association of Teachers of Commercial Education—President, Mr. F. C. Meredith, Montclair.

Association of Teachers of Classical Languages—President, Dr. Maud Thompson, Orange.

Association of Teachers of Public Speaking—President, Mrs. E. Hamilton Hurd, Elizabeth.

Association of Teachers of Vocational Arts—President, Mr. Arthur F. Hopper, Plainfield.

Association of Teachers of Agriculture—President, Mr. W. B. McDougall, Pleasantville.

Association of Teachers of Mathematics—President, Mr. P. W. Averill, Elizabeth.

Association of Teachers of Music—President, Miss Catherine M. Zisgen, Trenton.

Association of Teachers of Modern Languages—President, Alanson G. Alden, Newark.

Association of School Libraries—President, Miss Helen J. Wolfs, Newark.

Among the notable speakers heard at the association meetings were:

Dr. David B. Corson
Supt. of Schools
Newark, N. J.

Dr. J. Lynn Barnard
Director of Social Studies
Dept. of Public Instruction, Pennsylvania

Prof. John A. Fitch
The New York School of Social Work
Address—"The Problems of American Democracy"

Mr. Edwin Greenlaw
Kenan Professor of English
University of North Carolina
Address—"A New Attitude Toward the Study of Literature in the High School"

Mr. L. H. Minton
General Ceramics Company
Metuchen, N. J.
Address—"The Ceramic Industry in New Jersey"

Dr. Edgar F. Smith
President of the American Chemical Society
Address—"The Teaching of Chemistry"

Mr. William Chauncey Langdon
American Telephone Company
Address—"Dr. Alexander Graham Bell and his Work in the Development of the Telephone"

Mr. Earl R. Glenn
Lincoln School
New York

Paper—"What Constitutes a Standardized Test in Science"

Dr. Jean Broadhurst
Professor of Biology
Teachers College

Address—"Broadening the Personal Hygiene Course"

Mr. Walter S. Morgan, C. P. A. (Mass.)
Morgan & Morgan
Certified Public Accountants

Address—"The Business of Business Education"

Miss Alice T. Coseo
Metropolitan Museum of Art
New York City

Address—"Teaching the Classics in a Museum"

Mr. Harvey M. Dann
Barringer High School
Newark, N. J.

Address—"The Curriculum As It Might Be With Reference to Latin"

Mrs. Ida S. Harrington
Specialist on Home Management
Extension Dept., State Agricultural College

Address—"Home Making a Fine Art"

Dr. Jacob G. Lipman
Director of Experiment Stations

Address—"New Jersey Agriculture of To-day"

Prof. James Fleming Hosc
Teachers' College
New York

Address—"School Libraries and the Teaching of Literature"

Mr. R. H. Rinenburgh
Peddie Institute
Peddie Institute

Paper—"Some Aims in the Teaching of Mathematics"

Mr. R. Arratia
Columbia University

Address—"Spanish-American Universities and Their Ideals"

In reporting the work of the High School Conference I take the opportunity to express the appreciation felt by the State Department of the splendid co-operation of the State University at New Brunswick in making this conference of service to the teachers of the State.

The co-operation of the various State associations of high school teachers has made this conference the most helpful meeting of the year for the inter-

ests of secondary education. It is to be hoped that school boards and school officials will make it possible for every teacher who may so desire, to attend all of the sessions of this conference.

INTERSCHOLASTIC DEBATING CONTESTS

The Rutgers Interscholastic Debating Committee has presented the following report for the year 1921-1922:

"The Rutgers Interscholastic Debating League, during the year 1921-1922 contained 104 schools, of which 95 were in the State of New Jersey. While this number was slightly less than the preceding year, the decrease is accounted for partly by the cessation of the efforts of the committee to expand in the Northern Hudson Valley in New York State and partly by the disordered internal conditions which prevailed in many of the high schools of New Jersey, these conditions making the participation of many schools impossible.

The withdrawal of two schools from the League, Trenton and Plainfield, have a special significance, since these schools have withdrawn for the purpose of attempting to devise a new and improved form of debating. Although the withdrawal of these schools has been a loss to the League, the committee feels that the loss is compensated by the fact that any results obtained in these experiments will be for the advancement of debating. And the committee also feels gratified in the conviction that Rutgers Interscholastic Debating has been largely instrumental in bringing about this awakened interest in debating.

The annual conference of the League which was held at Rutgers on January 7, 1922, had a larger attendance than any previous conference. At this conference the By-Laws of the League were revised, the subjects for debate were chosen and the schools grouped for the semi-final and final debates.

The debates, which were held on March 24 and April 28, were on the following propositions: *Resolved*, That the United States Government should immediately grant independence to the Philippines; *Resolved*, That the great powers should reduce land and naval armament to a point providing only for the policing of their own territories; *Resolved*, That the United States cancel the War Debt of her Allies as part of her contribution to the cost of the World War, and *Resolved*, That the use of the Injunction should be abolished in labor disputes. The Philippine question was used in forty-four debates, the Armament question in fourteen, the War Debts question in seven and the Injunction question in three.

Almost without exception the debates were attended by large and enthusiastic audiences, intense interest being shown by not only the debaters but also their supporters. Most of the debates were conducted according to our usual quadrangular arrangement, but two groups used the triangular method, each school putting out two teams.

The most significant problem that has confronted the officers of the Interscholastic League during the past year, and one that has confronted them for several years, is the problem of adequate judges for the debates. These interscholastic debates are coming to occupy a position of ever-increasing importance in the programs of the schools and in the minds of the pupils, and when a debate is lost through a wrong decision by incompetent

judges, as is too often the case, it is a source of keen disappointment and discouragement to both the coach and the debaters. In order to alleviate this condition, the committee is this year working on a Manual for Judges, by means of which it hopes in another year to establish a definite and uniform basis of debate judging throughout the whole league. In this way both the team and the judges can better understand the true standards of debate judging.

As a second remedy for the situation, the committee has begun, through the medium of the Philoclean Society of Rutgers College, to train college men in the art of debate judging. Certain selected upper classmen are sent out to judge debates when the schools ask for them. When these men graduate from college they will be listed with the committee and will constitute an ever-increasing reservoir of trained judges, from which the schools can select.

Interest in debating as a means of training students in the secondary schools to think for themselves seems to be increasing and attempts are constantly being made to remove the defects which still exist in modern academic debating. Debating as a part of the education of the youth of our land is proving itself well worth its cost in time and energy, for no matter how much is taught in our schools in the way of facts, unless the student is trained in the use and application of these facts in the grave problems which will soon face him as a citizen, the facts are of little value. The citizen of to-day is faced by profound and intricate problems, the solution of which requires training in those things which debating gives, namely, discrimination between sound and fallacious argument, clarification of issues and sound, systematic reasoning."

HIGH SCHOOL LIBRARIES

An examination of the libraries of the State high schools revealed the fact that many of the smaller schools had practically no working libraries of the reference type. Several others were obtaining good service from public libraries, as far as books on literature is concerned, but were not supplied with reference materials. Recognizing the seriousness of this need and believing that an academic high school without a library is as poor as a science department without a laboratory, the High School Division has, during the year, issued several bulletins on library facilities. One of these bulletins dealt with the initial equipment of a high school library and contained the following list of books, which list was compiled in co-operation with Miss Sarah Askew, of the State Library Commission.

BASIC REFERENCE COLLECTION FOR HIGH SCHOOLS

BOOKS FOR FIRST PURCHASE

(Get latest edition of each)

(Prices given are only approximate.)

Baker, E. A.—Guide to historical fiction. Macm.	\$8.50
New international encyclopedia. Dodd. 24v.	148.20
or	
World Book. 10v.	55.00

Ward, G. O.—Suggestive outlines and methods for teaching the use of the library. (Useful reference ser.) Faxon.	1.50
New international year book. Dodd.	6.00
Bulfinch, T.—Age of fable and Age of chivalry. (These two and Legends of Charlemagne complete in 1 vol. rev. & enl.) Crowell.	3.00
Gayley, C. M.—Classic myths in English literature and in art. Ginn.	1.92
Guerber, H. A.—Myths of Greece and Rome. Amer. Bk. Co.	1.40
U. S.—Statistical abstract. Supt. of Documents, Washington, D. C.	
U. S.—Statistical abstract of foreign countries. Supt. of Documents.	
U. S.—Statesman's year book.	
U. S. Congress—Official Congressional Directory	.35
(Or free from Congressman.)	
Robert, J. T.—Primer of Parliamentary law. Doubleday.	1.00
Bliss & Binder—New encyclopedia of social reform. Funk.	7.50
Holt, L. H.—Introduction to the study of government. Macm.	2.50
Franc, A.—Use your government. Dutton.	2.00
(Describes U. S. documents and how to get them.)	
Haskin, F. H.—American government. Lippincott.	1.00
McLaughlin & Hart—Cyc. of American government. 3v. Appleton.	24.00
Gowin, E. B. & Wheatley, W. A.—Occupations: a textbook in vocational guidance. Ginn.	1.48
Filene, C.—Careers for women. Houghton.	4.00
Braddy, Nella—Young folks encyclopedia of etiquette. Doubleday.	1.50
Chambers, Robert—Book of days. 2v. Lipp.	8.50
Crabb—English synonyms. Harper.	1.25
Webster, N.—New international dictionary. Merriam.	16.00
Gasc—Library French and English dictionary. '98. Holt.	4.00
or	
Clifton & Grimaux—French and English dictionary. 2v. '12. Stechert.	8.00
or	
Spiers, A. & Surene, G.—French & Eng. pronouncing dict. Appleton.	
Cajori—History of mathematics.	4.00
Jordan & Kellogg—Animal life. Appleton.	2.00
Matthews, S.—Field book of American wild flowers. Putnam.	3.00
Champlin—Young folks' cyclopedia of common things. Holt.	3.00
Hopkins, A. A., ed.—Scientific American cyc. of formulas. Munn. ..	5.50
Bailey, L. H.—Encyc. of American agriculture. 4v. Macm.	30.00
(If there is an agricultural course.)	
Bailey, L. H.—Standard cyc. of horticulture. 6v. Macm.ea.	8.00
(If there is an agricultural course.)	
Gardner, E. H.—Effective business letters. Sch. ed. Ronald.	2.00
Bancroft, J. H. & Pulvermacher—Handbook of athletic games. Macm. .	2.00
Warner, C. D.—Library of the world's best literature. 31v. Can be picked up second-hand for approximately	22.50
Stevenson, B. E.—Home book of verse. Holt.	12.50
Granger—Index to poetry and recitations. McClurg.	10.00
Palgrave—Golden treasury.	
Baker, G. P. & Huntington, H. B.—Principles of argumentation. Ginn. .	2.00

COMMISSIONER OF EDUCATION.

SCHOLARSHIPS

The scholarship, offered annually by the Colorado School of Mines, was awarded this year to Mr. William Robinson, of Salem High School, on the basis of scholarship. There were only two applicants in 1922 as against five in 1921. The following persons have previously qualified for this scholarship:

Mr. Bryant Rogers, of the Montclair High School	1917
Mr. Justin Shearn, of the Roselle Park High School	1918
Mr. Halliday McKay, of the Plainfield High School	1919
Mr. Lewis Height, of the Ocean Grove High School	1920
Mr. Charles Oscar Kohl, of the Ridgewood High School	1921

BULLETINS

An attempt was made this year to issue by bulletins only those instructions peculiar to the high school and to use the general publication of the department for issuing matters of general interest. Accordingly, the following topics were treated in the Secondary School Letters of 1921-1922:

Credits for Approved Courses in Music,
 Announcement of Fourth Annual High School Conference,
 Standard Reference Books for High School Libraries,
 Correlation of Community Civics and General Science,
 Recent Bulletins and Monographs That May Be of Use in High School Work,
 List of Commencement Speakers,
 New Law Affecting High School Secret Organizations,
 Standards for High School Libraries.

The following facts taken from the study made of the elementary subjects enforced and reviewed in the high schools may have permanent value:

"There are 27 high schools out of a total of 137, which are operating normal school curricula conforming to the suggestions circulated by the New Jersey normal schools. The list includes the larger cities—Newark, Jersey City, Bayonne, Atlantic City, Elizabeth, Trenton, Passaic and several middle-sized districts like Plainfield, Montclair, Ridgewood, Asbury Park, Harrison and Perth Amboy. The majority of the 110 remaining schools are small and have neither the number nor the facilities to justify separate curricula leading to normal schools. Since only 9%, or one high school graduate out of every eleven, go to normal schools, it is apparent that the candidates for entrance to the normal schools, although numerous in the aggregate, are very thinly scattered over the central and southern portions of the State.

In reference to the review work done in Arithmetic and Geography, the following table shows the schools giving these subjects: the total enrollment of each school; the fourth year enrollment, which is the year in which these subjects are reviewed; the enrollment in each subject, and the percentage which this enrollment is of the total senior class. These 27 schools represent one-third of the total enrollment of the approved high schools of the State.

	Total Enrollment.	4th Year Enrollment.	Number Taking Arithmetic.	Review Geography.	Per Cent. Based on 4th Year Enroll- ment.	
					Arith.	Geog.
Trenton	1,302	258	51	..	20%	
Bayonne	1,382	288	27	32	9%	11%
Vineland	507	71	14	14	29%	20%
Asbury Park	770	90	..	15		17%
Mount Holly	327	31	22	..	70%	
Atlantic City	1,957	237	14	14	6%	6%
East Rutherford	243	17	12	..	90%	
Elizabeth	1,980	808	30	19	3¾%	2½%
Hoboken	882	94	16	..	17%	
Harrison	170	21	3	..	14%	
Ridgewood	725	110	26	26	22%	22%
Pemberton	124	15	2	2	13%	13%

Totals	20,220	3,866	439	306	11%	8%

The above table shows that 25 out of the 27 of these schools are teaching Review of Arithmetic to from 1 to 100 per cent. of their senior pupils, and that the total number of seniors taking Review of Arithmetic is 11 per cent. of the total of the senior classes. Also 19 of these schools out of the 27 are teaching Review of Geography, and the total number of seniors taking this subject is 8 per cent. of the total of the senior class.

In reference to Commercial Arithmetic, 60 schools, or one-half of the 120 reporting, give Commercial Arithmetic in the first year of the curriculum. The proportion of the pupils taking this subject ranges from 15 per cent. to 65 per cent. The number of first year pupils taking Commercial Arithmetic is 38 per cent. of the total of the freshman classes. That is, about three-eighths of all of the pupils in our State high schools take a freshman course in Commercial Arithmetic of five periods per week for 38 weeks.

In reference to English Composition it is the custom to assign one period per week to this subject throughout the four years of the high school. The introduction of the project method, however, has tended to increase the time devoted to composition.

In reference to Spelling, 78 schools out of 120 reporting, give separate periods to spelling. The periods average from thirty to forty minutes each and occur once each week. Thirty-six of these 78 schools give this spelling

SCHOOL REPORT.

work throughout each of the four years; 14 give it in the first year only, and 28 continue it for two or three years. The remaining one-third of the State high schools teach the subject only incidentally in connection with English Composition. The above data show in detail what is done directly to review and enforce the teaching of the elementary school subjects.

The following table shows the list of high school subjects that contribute directly to this end, as well as those which do so indirectly:

THOSE WHICH CONTRIBUTE DIRECTLY

Subjects.	Time.
Review of Elementary Arithmetic.....	Equivalent of $\frac{1}{2}$ yr. 5 periods per wk.
Review of Elementary Geography	" " $\frac{1}{2}$ yr. 5 " " "

SCHOOL VISITATION

It is physically impossible to visit the work of some 2,000 high school teachers, conducting nearly 10,000 classes; but it is possible to visit each high school annually and to examine the departments needing particular attention. I have visited once each of the 154 public high schools during the past year and have visited more than once for special work 26 of them. I have also inspected 12 private schools, 3 of which have been registered by the State Board of Education this year.

Besides the supervision of instruction and administration, I filled 24 periods of instruction at the county institutes and made 25 public addresses, including 2 dedications and 4 commencements. In co-operation with the elementary and business divisions I have conferred with 16 boards of education with reference to school facilities. In most cases this required a careful canvass of attendance and distribution of pupils, location and condition of school buildings, as well as of financial conditions.

CURRICULA

There is a tendency among the smaller schools to offer a greater variety of courses corresponding more nearly to the needs of the different classes of children. A few of the larger schools have discontinued the short courses introduced during the war. As a result of these conditions many curricula have been revised. Three schools have added another year of work, making an extension of their curricula necessary. In all 57 curricula have been reorganized and approved by the State Board during the year.

Next to classroom instruction nothing affects the efficiency of the school more than the administration of the curricula. Accordingly, the schools are required to submit rules for this purpose and these are scrutinized before approval as rigidly as are the curricula themselves. The ultimate test of courses of study and their administration is the effect upon the pupils, and this can be fairly determined by their school records. Such records come to the State Department whenever pupils wish to transfer from one school to another within the State or from New Jersey to another State. The High School Division has evaluated and validated 2,252 of these certificates during the past year, a sufficient number to obtain much valuable information on the operation of our system.

REVISION OF RULES

The State Board of Education made changes to the following effect in the rules governing approved public high schools:

1. Pupils preparing to enter normal schools are advised, but not required, to review elementary arithmetic, geography and history in the high schools.
2. Half-year courses may be offered for advanced credit in approved summer high schools.
3. The four-year commercial curricula of the private high schools already having approved academic curricula may be submitted to the department for approval.

TUITION PUPILS

While the total number of tuition pupils, 14,314, is relatively small, these pupils raise serious problems of administration. When high schools are comparatively small, tuition pupils are welcomed as a financial aid; but as soon as facilities become crowded boards of education are tempted to refuse schooling to outside patrons. Congestion of this kind has occurred in several districts this year, the most aggravated case being that of Hackensack. It is evident that there is increasing need for a central authority with full power to regulate the attendance of tuition pupils. This authority should have power to designate the high school or schools which the pupils of any district shall attend and to fix the tuition that may be charged for the services rendered.

NEEDS IN SECONDARY EDUCATION

1. More classrooms in the large cities for high school purposes.—Satisfactory work cannot be done with part-time attendance. The great centers

like Jersey City, Newark, Trenton and Camden are farther behind in adequate provision for their high schools than are the poorer and less concentrated areas of population.

2. Improvement in the teaching force.—There are now enough teachers to go around; but many of them are not trained either during professional preparation or during service. The boards of education which pay the larger salaries get trained teachers, hence the poorest schools continue to employ the inexperienced teachers. I, accordingly, recommend that no approved high school shall employ more than 50 per cent. of inexperienced teachers on its staff at one time.

3. Emphasis in administration should be laid upon the basic factors of secondary education. There are four essential departments of high school work, from which every pupil should benefit:

Instruction and training in

1. Health
2. English
3. Civics
4. Vocations

The first three of these should constitute the common core of high school education.

4. More statistical studies of high school results.—The least function that a State Educational Department can perform is to act as a clearing house for the schools, but as far as the Secondary School Division is concerned, it is not doing this much. We need a Research Bureau of Statistical Division in the Department of Public Instruction for the study and interpretation of school efforts and results. At present we depend largely upon committees for what is done, and, while their work deserves much credit and the spirit of co-operation much praise, it is not fair to ask school men burdened with their local duties to make State-wide investigation nor to formulate educational material for State-wide use.

The High School Division has had the courteous support of all other Divisions of the Department and the hearty co-operation of the schoolmen of the State. It is a pleasure to work with this splendid body of public servants, and I believe the results will be valuable to the schools.

Respectfully submitted,

L. L. JACKSON,

Assistant Commissioner of Education.

REPORT ON PHYSICAL TRAINING

PREPARED BY

GEORGE R. SEIKEL

Director of Physical Training and Hygiene

PHYSICAL EDUCATION

Physical Education in the State of New Jersey has become an established fact, and the extensive provisions for it show how generally and thoroughly it is appreciated.

It is now established that the dependence of thought upon organic conditions is so intimate and absolute that they can only be considered as unity. Man, as a problem of study, is simply an organism of varied powers and activities; and the bodily organism is in reality the first and fundamental thing to be considered. Mental life and bodily life are manifestations of the same organism, growing together, fluctuating together, declining together. They depend upon common laws.

Modern educational theory rightly ascribes a large place to the body in the development of a well-rounded and effective personality. It recognizes the interdependence and the organic unity of mind and body and emphasizes the need of cultivating them together in order that both may attain the highest degree of excellence. The most significant feature of modern education, the re-discovery of the body and its relation to mentality allows us to draw the following conclusions:

1. That physical, mental and moral education are essentially and vitally connected.
2. That each is indispensable to the perfection of the others.
3. That they are indispensable to the highest welfare of the entire personality.
4. That high grade mental efficiency and superior moral quality are dependent upon physical integrity.
5. That "not a feeling can arise, not a thought pass, without a set of concurring bodily processes."

6. That the road to the highest intellectual development is through early physiological training of the senses and rational care of the body.

Important as physical education is in itself, however, and in its influence upon intellectual growth and emotional life, it is vastly more important when its effect upon morality is taken into consideration. Inasmuch as the moral experiences of an individual are the most vital, the caring for the physical welfare of the school child culminates and finds its highest sanction in its bearing upon its moral development. Such care and training of the body as secures to the individual maximum health, freshness of vigor, and pleasure in effort, tends to stimulate his thinking, chasten his purposes, strengthen his will, and improve his conduct.

HYGIENE

Evidently we may call the present age the Age of Hygiene—hygiene, the science of human health. It is most significant because in many times ten thousand ways it effects the well-being of humanity, and is sure to remain permanently and co-extensively with human life. The ancient goddess of Hygeia has now returned to earth, not as a mythical or mystical divinity presiding over the health of man, but in the form of definite, organized and practical science that is leading mankind toward healthier, happier and more effective lives.

Human values have been raised. The spirit of democracy has found that the individual is a creature of vast value if he is properly conserved. It sees that a very large part of his conservation rests upon his freedom from disease, and so health begins to be regarded not as an asset, but as an obligation.

Good health is the most important thing in this world, not only for its own sake but for the larger reason that the full and complete measure of the success of every human enterprise depends upon the quality and endurance of the health that supports it. The measure of success depends upon the sort of health that backs up an enterprise whether it is mental, moral or physical.

VISITS TO SCHOOLS

Observing the physical activities and the hygiene programmes in schools in all parts of the State the following conclusions were drawn:

I-III Grades—That the gymnastic material, with few exceptions in the third grade, is absolutely informal, that is as it should be for children under eight years of age. The material consists of story plays, song plays, games, rhythms, folk dances, marching songs, mimetics, dramatized stories, and imaginary plays. Teachers strive to have children play together in groups, to curb the too aggressive and to encourage the timid, to foster the social instinct. The rhythmic work (moderate yet prolonged enough for hygienic effects) is a factor in giving the child his chance for self-expression. In mimetics there is informally taught the form of definite activities; activities out of the child's life—his every day happenings. The wealth of new material which has been added to these grades has resulted in a greater progress than in the succeeding division of grades.

Health habits are established and not by explanations and reasons. Children's habits of life during this period ought to be largely automatic and they ought to learn them mostly by imitation and constant repetition. The teaching of these habits under my observation was mainly of a type that taught *how* rather than *why*, just as the aim of moral education is to train us to do the right thing at the right moment without having to think.

IV-VIII Grades—A part of the physical training material in these grades is more of a formal nature, being divided into corrective, educational, hygienic, and recreative exercises. Folk dances play an important part and are met with as exhibition and competitive numbers in public demonstrations and county field days. Here is a field for improvement and progress depending upon available time. With the teaching of a dance, there ought to be added the teaching of folk-lore and folk-life which would add to the general knowledge of the child. Games receive special attention, for under proper direction and supervision the child develops skill and body control, loyalty, truthfulness, honesty, and certain social values, as co-operation and self-sacrifice

as a resultant of the game, which in itself was an end and satisfying to boy and girl.

Hygiene now intensifies its daily personal program, and the general inspection at intervals; and knowledge of good food, fresh air, and cleanliness of environment is insisted upon. The teacher now relates each and every part of her instruction to the daily life of the pupil. The intensive effort on the part of the school nurses and teachers has brought about a veritable revolution, for where formerly children were found attending school in an indescribable condition of uncleanness, such children are rarely met with even in the worst neighborhoods. The effect of remedial measures during school life is seen in the further approach to a higher standard in teeth, nutrition, vision and personal hygiene.

IX to XII Grades—Physical training in these grades falls short of our desired goal. In too many schools the fag end of the curriculum is given to physical education and hygiene; the basement is its home too often. The gymnasium is too often assigned to an odd space left after provision has been made for study rooms. Again, there are too many schools where the classes are too large to be efficiently taught by one teacher. There is a lack, even a loss, of personal contact which is so necessary between teacher and pupil in these grades. We also find a moderate amount of systematic instruction in hygiene, and much of it does not intimately relate itself to the lives which the pupils are now living. We have reached the point where certain phases of instruction should not be given by a lecture system to a large group of pupils collectively. The classes for health activities and health instruction, in respect to size, are in too many cases arranged in the reversed order. Obstacles there are, but it is essential that the subject be examined in its large aspects, and then accommodations made for particular conditions.

COUNTY INSTITUTES

At these meetings it is possible for us to bring to the notice of all teachers the aims of the department. Not only did the trend of our argument lead to the demand for an education of the body of the child, but how essential it was for the advanced

years of life. This led to a discussion of health habits of teachers. At times these teachers profited by class demonstrations, for in this manner they were better able to comprehend the material which is found in our State manual.

PARENT-TEACHER ASSOCIATIONS

In Parent-Teacher Associations, health information was the main topic. In view of the recognition that children when first entering school have multiple physical defects which might have been prevented, it is necessary to carry the campaign of health education to the parents of the individual child. The prevention of communicable diseases and their sequelæ, the proper nutrition of the child, and the establishment of all those habits of personal hygiene so important to the general health depend upon the effective delivery of definite information to all parents. In furthering this work the Parent-Teacher Associations hold a strategic position, not only because they most readily may influence other parents, but because they best may create a general demand from all parents that the local board of health shall provide a program which will include instruction in the prevention of disease and defects during the first six years of the life of the child. Few communities make provision for this kind of instruction.

SUMMER SCHOOLS

In these schools the teachers have an opportunity to become better acquainted with the requirements of the syllabus, to receive new material, and an opportunity to grasp the spirit of the work which is so essential to its success. That the latter if possible, as all those who attend know and those who observe can see is due to the able teachers in whose hands this work is placed. This is primarily due to Dr. F. W. Maroney, (State Director of Physical Education and Hygiene, 1918-1921) whose own untiring effort, and enthusiasm, is the guiding spirit. The men and women he appointed to assist him and direct the work in other schools are the best that can be found in our State.

NEW JERSEY INTERSCHOLASTIC ATHLETIC ASSOCIATION

As an honorary member of this Association it has been my pleasure to meet with them on several occasions. This organiza-

tion recognizes that as long as youth is youth it wants to measure itself with others to test its strength, its courage, and its endurance. On the playing field the spirit of citizenship is won. Civics as taught in schools is a useful but not a particularly inspiring subject; as lived on the field, it becomes part of the personality of the player. The members of this organization define athletics—with G. Stanley Hall—as a school of honor. Honor ought to be the very religion of the athletic field. Having been endowed with executive, legislative and judicial powers it has been able to bring organized athletics for the secondary schools to the present degree of efficiency and cleanliness. The net result is that school athletics in New Jersey are on a very high plane; players and public alike being protected against those vicious factors which are all too common elsewhere.

COUNTY FIELD DAYS

Many and attractive were the field and fete days this year. The demonstrations were attractive and the competition keen. It is the best method, perhaps in which to bring to the attention of the public at large, the many and various activities of child life and education as developed and taught in these days when the State is providing in a large measure for that margin of neuromuscular training, not otherwise provided for, which is necessary for the health and development of the physical, mental and social qualities which are required for human efficiency in the large, complete and successful living.

NORMAL SCHOOLS

The need for physical training for normal school students is fully recognized. As the profession which they have selected is necessarily a sedentary one, it is of high importance that they should partake of physical activities. It was emphasized that their course should strengthen them to bear the particular kind of worries and strains which the profession of teaching requires of them later on. Secondly, that the training must be real normal work. In other words it must fit the student to carry on similar activities into the public schools.

NEW JERSEY PHYSICAL EDUCATION ASSOCIATION

This is an organization of teachers, directors and supervisors of physical training and hygiene who meet once each year (December) in some designated city to observe the work of the department of physical education in that city. Every phase of physical education is brought to their attention for observation for learning, for criticism.

It seemed advisable for me to visit the larger cities, the first year to become acquainted with the problems of the high schools, and to meet as many of the directors and teachers in the departments of physical training as possible. With them I have discussed the need of the following: That when high school students exercise, an attempt should be made there and then to interest them in the science of the body; when muscles are brought into action they should be taught the physiology of exercise; that physical training is not merely a school subject, but a hand-maid of physics, chemistry and biology; and also, that in the teaching of hygiene they be made aware of the facts that ignorant and superstitious peoples still believe in the punishment theory. (God's wrath in the form of sickness), and that intelligent and well educated people constantly live below their best (frequently sacrifice health in pursuit of selfish unworthy ends).

Mr. Lester A. Palmer has ably assisted me wherever needed, and has devoted most of his time in visiting smaller communities, to observe the physical training and hygiene programs and report on the same. Where advisable he has called meetings for teachers discussing problems, and conducting demonstration classes.

Miss Katherine Markham was appointed as an assistant in February, and to her was assigned the field of rural schools. From the reports of the county superintendents and the helping teachers her appointment has met with popular approval. Besides her visits to the rural schools she has addressed meetings of teachers, held conferences, observed teaching and taught classes.

REPORTS OF
PRESIDENT OF STATE BOARD OF EDUCATION
AND
COMMISSIONER OF EDUCATION

For Year Ending June 30, 1923

REPORT OF PRESIDENT
OF
NEW JERSEY STATE BOARD OF EDUCATION

To the Senate and General Assembly of the State of New Jersey:

As required by law, I have the honor to submit herewith the Annual Report of the State Board of Education, together with important accompanying documents, for the school year from July 1, 1922, to June 30, 1923.

M. A. RICE,
President State Board of Education.

STATE OF NEW JERSEY
DEPARTMENT OF PUBLIC INSTRUCTION
TRENTON

REPORT OF
COMMISSIONER OF EDUCATION

TRENTON, December 1, 1923.

To the State Board of Education:

GENTLEMEN—In compliance with the requirements of the School Law I have the honor to submit herewith the Annual Report of the Department of Public Instruction for the school year ending June 30, 1923.

The year 1922-1923 has been one in which things pertaining to the schools were not only enthusiastically supported by the people, but has in many ways shown an advancement.

Figures in the statistical report in almost every instance show evidences of progress. Intense interest in educational concerns all through the State is in keeping with the good record of New Jersey pertaining to its schools. While the burden of maintaining the schools is a great one, yet when the results are considered it has been generally met with splendid confidence.

In this particular part of the report I am giving a summary of the statistics in a way that there can be shown at a glance what a great problem it is to educate all the children of the State between the ages of 5 and 18.

The total enrollment of pupils in all the various departments of the public schools for the year 1922-1923 was 693,342. This includes evening schools. This was an increase in the day schools of 19,000 boys and girls. To instruct 693,342 pupils were required 21,644 teachers.

The children were housed in 2,191 school buildings, an increase of 16 over the year before. All were furnished, not only with teachers, but with books, supplies and the necessary apparatus free of cost.

There were about 36,544 children transported to schools at public expense because there were no schools suitable in their own neighborhood. Of this number there were transported to high schools outside of their respective school districts 12,856 pupils.

The statistical tables herewith presented show many interesting things, all of which indicate the growing concern in the matter of public education. Important facts in these statistics are summarized here for the purpose of making them prominent and for the purpose of showing the enormous business that education has become in our State.

The current expenses for operating schools for the year 1922-1923, amounted to \$46,196,028.09. This was an increase of \$3,239,832.46 over the previous year. Of this amount \$33,602,299.47 were expended for the salaries of teachers, superintendents, supervising principals, supervisors and principals. This does not include deductions made for the Teachers' Pension and Annuity Fund. Salaries of janitors, engineers and firemen cost \$2,673,650.88. Salaries and expenses of attendance officers cost \$334,816.78, and fuel cost \$1,600,862.59.

The expenses of the Department of Public Instruction and the State Board of Education were \$155,578.57, which is a trifle more than a third of one per cent. of the current expenses.

Of the total number in the schools, namely, 693,342, there were 24,951 enrolled in the evening schools. Enrolled in the day schools were 340,410 boys and 327,981 girls, making a total in the day schools of 668,391.

There were 42,036 children enrolled in the kindergartens. In the first four grades, or what are commonly known as the primary schools, there was an enrollment of 301,479. The total number of pupils in grades five to eight, inclusive, was 207,109.

The total number registered in the high schools was 78,216. This was an increase of 7,860 over the year before. The high school registration for the past five years has been as follows:

1919	1920	1921	1922	1923
51,379	55,243	59,144	70,356	78,216

The total number of pupils enrolled in one-room rural schools was 15,394, a decrease of 1,318. The number in two-room schools was 16,044, an increase of 329. There was a decrease of 34 in the number of teachers in one- and two-room schools.

The average daily attendance in day schools was 534,294, an increase of 16,478. The average absence of pupils was 15 days.

There was an increase of men teachers in all the schools of the State of 156, and an increase of women teachers of 614, making a total increase of 770 teachers.

According to the Annual Report for the last five years the total expenses of operating the schools have been as follows:

1918-19,	\$25,451,014.43
1919-20,	30,854,795.53
1920-21,	39,078,609.08
1921-22,	42,856,195.63
1922-23,	46,196,028.09

SALARIES OF TEACHERS

The total amount of salaries paid day school teachers in this State, not considering superintendents, assistant superintendents or evening school teachers of any kind, was \$34,805,655.08, which includes the deductions made for the Teachers' Pension and Annuity Fund. This was an increase of \$2,799,701.13 over the preceding year.

The average salary per year paid to all day school teachers (20,480), not including superintendents, assistant superintendents or evening school teachers of any kind, was \$1,699.50, an increase over the preceding year of \$71.78.

The following figures show the corresponding average salaries for the past five years:

1919	1920	1921	1922	1923
\$1,083.27	\$1,177.20	\$1,504.41	\$1,627.72	\$1,699.50

The average salaries paid to teachers in different kinds of schools during 1922-1923 were as follows:

SCHOOL REPORT.

	<i>Men</i>	<i>Increase</i>	<i>Women</i>	<i>Increase</i>
Kindergarten,			\$1,573.26	\$ 52.04
Grades 1 to 4,	\$ 976.25	\$80.30 (Decrease)	1,477.56	34.38
Grades 5 to 8,	1,664.62	70.18	1,616.33	76.93
Junior High Schools,	2,106.88	73.88	2,029.85	137.02
High Schools,	2,509.99	58.42	1,955.49	89.33

NORMAL SCHOOL GRADUATES

Trenton State Normal School,	284, an increase of	43 over 1921-22
Montclair State Normal School,	218, an increase of	27 over 1921-22
Newark State Normal School,	461, an increase of	114 over 1921-22

Total, 963, an increase of 184 over 1921-22

VALUATION OF SCHOOL PROPERTY

The total value of school property in New Jersey is \$151,796,-312.20, an increase of \$18.685,140.53.

MEANS OF SENDING FORTH INFORMATION TO THE SCHOOLMEN
OF NEW JERSEY

For the first time a Physical Training Bulletin was sent forth by the State Director of Physical Training and Hygiene. It contained helpful suggestions for those under his supervision.

The monthly Secondary School Letter, issued as in other years by the assistant commissioner in charge of secondary education, gave important information for high school principals.

On February 17, 1923, a meeting was held in Newark at the State Normal School to consider the alleged "fads and frills" in the public school curricula. A complete account of this meeting, including the papers read and the statements made, was printed in a pamphlet entitled "Report of a Public Conference on the School Curriculum of New Jersey."

In the administration of the office of the Commissioner of Education of this State, it was found necessary to secure, in understandable form, the exact conditions relative to the business activities of boards of education and their employees, in each school district in New Jersey, both as to the accounting and

business systems and the actual school building conditions. The results of these findings were collected by the business division of the Department of Public Instruction and printed under the following titles:

Survey of Accounting and Business Systems of School Districts.
Survey of School Buildings.

Some of the outstanding articles that appeared in the monthly periodical, the Education Bulletin, published by the Department of Public Instruction, are as follows:

Essentials in Education.....	September, 1922
Mental Classification of Pupils.....	Entire issue for October, 1922
The Core of High School Instruction.....	November, 1922
Examinations for Entrance to New Jersey State Normal Schools	November, 1922
New Requirements for Bonding Proceedings.....	November, 1922
Report of Commissioner of Education for 1921-1922.....	December, 1922
Objectives of Modern Education with Regard to Vocations....	December, 1922
The Success and Failure of Ninth Grade Pupils.....	January, 1923
The Problems of the "Misfits" in High Schools.....	February, 1923
Meeting Held to Consider the Alleged "Fads and Frills" in the Public School Curricula.....	March, 1923
Decisions in Regard to Vaccination Law.....	March, 1923
Facts About School Revenue.....	April, 1923
Legislative Number.....	May, 1923
Means of Increasing Pupil Effort.....	June, 1923

APPOINTMENTS OF COUNTY SUPERINTENDENTS

During the year the following appointments of county superintendents were made by the Commissioner of Education and confirmed by the State Board of Education:

Burlington County, Louis J. Kaser, December 2, 1922.
Cape May County, Edwin R. Brunyate, July 1, 1922.
Gloucester County, Daniel T. Steelman, December 2, 1922.
Hunterdon County, Jason S. Hoffman, January 6, 1923.
Morris County, J. Howard Hulsart, June 27, 1923.
Salem County, Henry C. Dixon, January 6, 1923.
Union County, A. L. Johnson, February 7, 1923.
Warren County, Robert G. Sanford, February 7, 1923.

SCHEDULE OF TEACHERS' INSTITUTES

Institutes were held in September, October and November, 1922, as follows:

(One-Day Session)

Sussex County, at Newton, September 25, 1922.

Morris County, at Morristown, September 27, 1922.

Hudson County, at Union Hill, September 29, 1922.

Conference of County Superintendents and Helping Teachers, at Trenton, October 2 and 3, 1922.

Mercer County, at Trenton, October 4, 1922.

Monmouth County, at Long Branch, October 6, 1922.

Somerset County, at Somerville, October 9, 1922.

Warren County, at Phillipsburg, October 11, 1922.

Hunterdon County, at Flemington, October 13, 1922.

Cape May County, at Cape May City, October 16, 1922.

Camden County, at Collingswood, October 18, 1922.

Atlantic County, at Atlantic City, October 20, 1922.

Burlington County, at Burlington, October 23, 1922.

Ocean County, at Lakewood, October 25, 1922.

State High School Conference, at Rutgers College, October 27 and 28, 1922.

Salem County, at Salem, October 30, 1922.

Gloucester County, at Woodbury, November 1, 1922.

Cumberland County, at Bridgeton, November 3, 1922.

REPORT OF STATE SUMMER SCHOOLS

PREPARED BY

WILLIAM A. ACKERMAN,

*Director of State Summer Schools**(Summer of 1923)*

The State Summer Schools at Ocean City, Glassboro and Newton began the session this year on July 2 and closed on August 4, covering a period of five weeks, six days a week. At Glassboro the attractions of the new normal school equipment and the facility of railroad transportation from points in Cape May and Cumberland Counties and points between Camden and Atlantic City drew an enrollment that entirely surpassed all expectations. While some of these students came from the district formerly contributing to Ocean City, the latter school maintained its enrollment of last year as did also the Newton School, which serves particularly the northern counties of the State.

To the list of accredited schools at New Brunswick, Plainfield, Convent Station, Elizabeth and Caldwell was added a sixth school at Lodi.

Entrance examinations in English grammar, composition, spelling and arithmetic were given in June under conditions identical with those required for normal school entrance. These examinations were later disregarded, except for those students who desire normal school credit, under the interpretation that the examinations were not required by the rules of the State Board of Examiners. The results of the examinations were not materially different from those at the normal schools. Ninety-seven per cent. of all applicants who took the examinations secured credit in spelling, eighty-seven per cent. in English grammar and composition and eighty-one per cent. in arithmetic. On the required average of seventy per cent. or more, seventy-four per cent. of the applicants secured credit. These results are somewhat affected by the fact that many who had passed teachers' examinations in one or more of these subjects, and who would undoubtedly have

secured satisfactory records, were exempt from the entrance examinations.

Records established at the summer schools are applied directly to teacher certificate credit, and, when desired, to normal school credit. The difficulty is recognized of making accurate measurements of student work in so short a period of time, but special attention was given to this problem by all the faculties, and in at least one school a conscious effort was made to evaluate for each student the personal qualifications that enter into success in teaching.

The average crediting results at all the schools were remarkably uniform although a wide variance was found among the several instructors and in the different subjects. Lack of credit may result from any one of the following causes:

(a) That some students are compelled to drop subjects before the close of the session;

(b) That a considerable number of those who do not desire credit, but who work for personal benefit only and whose work has been entirely satisfactory, do not care to take the final examinations, and

(c) That some fail to do satisfactory work.

The following is a summary of the results obtained at the three State summer schools and at Rutgers College:

RECORDS OF FIRST AND SECOND YEAR STUDENTS WORKING IN LIMITED
ELEMENTARY CERTIFICATE SUBJECTS

	<i>Ocean City Glassboro</i>		<i>Rutgers Newton College</i>	
Total number of subject registrations..	408	571	287	618
Per cent. of incomplete records	2	3	3	1
Per cent. of failures	3	7	7	5
Per cent. of credits secured	95	90	90	94

RECORDS OF EXPERIENCED TEACHERS WORKING IN PERMANENT ELEMENTARY
CERTIFICATE SUBJECTS

	<i>Ocean City Glassboro</i>		<i>Rutgers Newton College</i>	
Total number subject registrations ..	431	359	193	352
Per cent. of incomplete records.....	7	5	8	6
Per cent. of failures	2	4	5	4
Per cent. of credits secured	91	91	91	90

REPORT OF THE STATE BOARD OF EXAMINERS

PREPARED BY

MISS LOUISE PRECHT

Secretary of State Board of Examiners

Seven meetings of the State Board of Examiners were held during the year.

No important changes have been made in the rules concerning teachers' certificates prescribed by the State Board of Education.

Examinations for teachers' certificates were held in August, November and April. The statistics relating to these examinations accompany this report.

All special certificates (State and County)—Second Grand State Certificates, Third Grade State Certificates and First Grade County Certificates—granted under the rules in force prior to July 1, 1911, may be made permanent certificates on the recommendation of the county or city superintendent under whom the applicant is teaching.

War emergency licenses in force June 30, 1922, may be renewed for one year, but cannot be renewed thereafter.

Graduates of New Jersey city training schools which have been approved by the State Board of Education may be granted Limited Elementary Certificates. Such graduates who are the holders of Limited Elementary Certificates may be granted permanent Elementary Certificates after three years' experience in teaching on the recommendation of the superintendent of schools of the school district in which said graduate has taught, or of the superintendent of schools of the county in which said school district is located.

SUMMARY OF STATISTICS

For the School Year Beginning July 1, 1922, and Ending
June 30, 1923.

SCHOOL TERM	1922-1923	Increase or decrease
Average time schools were maintained (A school month is 20 days)	9 mos. 9 days	
SCHOOL DISTRICTS, HOUSES, ETC.	1922-1923	Increase or decrease
School districts	507	1 I
Buildings owned	2,108	20 I
Buildings rented	83	4 D
Total school buildings	2,191	16 I
Classrooms	16,767	903 I
Buildings completed during year	46	6 I
Buildings enlarged or remodeled during year	51	14 I
One room buildings	591	40 D
Two room buildings	326	12 I
Three room buildings	65	3 D
Four room buildings	241	19 I
Five or more room buildings	968	28 I
VALUATION OF SCHOOL PROPERTY		
Total value of school property	\$151,796,312.20	\$18,685,140.53 I
Average value of New Jersey school buildings	69,281.74	8,081.20 I
GRADUATES OF STATE NORMAL SCHOOLS		
Brenton	284	43 I
Montclair	218	27 I
Newark	461	14 I

SOURCES OF INCOME.

Moneys for the support of the public schools were derived from various sources, as follows:

1. Income from State School Fund,.....	\$400,000.00
Apportioned to counties on basis of days' attendance.	
2. Appropriation by Legislature from State Funds for General Purposes,.....	10,306.00
3. Appropriation by Legislature from Railroad Tax for General Purposes,.....	4,646,497.51
4. Appropriation by Legislature from Other Sources,	165,335.72
5. Appropriation from State Railroad Tax,....	3,338,741.87
Apportioned to counties on basis of ratables.	
6. State School Tax,.....	9,771,469.02
90% apportioned to counties on basis of ratables;	
10% apportioned to counties arbitrarily by State Board.	
7. Interest on Surplus Revenue Fund,.....	28,072.01
Apportioned to districts by county superintendents on general plan.	
8. Local Appropriations,	49,471,561.44
Used for current expenses, buildings and repairing, etc.	
9. Other Sources,	2,169,322.69
Appropriated for special purposes.	

SCHOOL PROPERTIES.

The reported valuation of school properties increased during the year from \$133,111,171 to \$151,796,312. Reported valuations for the past ten years are in round numbers, as follows:

1914.....	\$58,000,000	1919.....	\$83,000,000
1915.....	64,000,000	1920.....	102,000,000
1916.....	69,000,000	1921.....	116,000,000
1917.....	74,000,000	1922.....	133,000,000
1918.....	79,000,000	1923.....	151,000,000

It will be seen from these figures how great has been the increase in the valuations of school properties during the last ten

CHIEF DISBURSEMENTS FOR THE LAST FIVE YEARS

COMMISSIONER OF EDUCATION.

GRAPH OF CURRENT EXPENSES FOR EDUCATION

July 1, 1922, to June 30, 1923.

COMPARISON OF THE STATE ADMINISTRATION EXPENSES WITH THE CURRENT EXPENSES OF THE SCHOOLS OF THE STATE

July 1, 1922, to June 30, 1923.

State Administration of the Schools	\$155,578.57
Current Expenses of the Schools	46,196,028.09
	$\frac{1}{3}$ of 1%
	99 $\frac{2}{3}$ %

ANALYSIS OF STATE ADMINISTRATION EXPENSES

State Board of Education Expenses	2,688.74
Salaries	109,272.51
Operation	23,582.38
Miscellaneous	20,034.94
Total	\$155,578.57

ANALYSIS OF CURRENT EXPENSES

Salaries, Superintendents, Principals and Teachers	\$32,448,589.57
Operation of school plant	5,101,279.53
Maintenance of school plant (includes apparatus)	2,645,636.42
Administrative expenses of school districts.....	1,535,040.33
Supplies, summer school expenses	1,654,442.72
Transportation expense	1,187,607.21
Textbooks	961,599.69
Medical inspection, supplies, and expenses.....	661,832.62
Total	\$46,196,028.09

PART III

SECTION A

FINANCIAL AND OTHER STATISTICS BY COUNTIES

For the year ending June 30, 1923.

PART III

TABLE OF CONTENTS FOR FINANCIAL STATISTICS BY COUNTIES

SECTION A

- District Taxes Ordered for School Year Beginning July 1, 1922. Table 1.
- Current Expense from State and County Funds. Table 2.
- Manual and Industrial Training Funds. Table 3.
- Funds for Evening Schools for Foreign-Born Residents. Table 4.
- Vocational School Funds. Table 5.
- Funds for Continuation Schools and Classes. Table 6.
- Funds for School Libraries and Apparatus. Table 7.
- Funds for Redemption of and Interest on Bonds. Table 8.
- Funds for Payments of and Interest on Notes Authorized by a Vote of the District or Other Evidences of Indebtedness (exclusive of bonds). Table 9.
- Funds for Outhouses and Water Closets. Table 10.
- Funds for Repairing, Refurnishing and Leasing School Buildings. Table 11.
- Funds for Purchase of Land and Erecting, Enlarging, Remodeling, Refurnishing and Equipping School Buildings. Table 12.
- Summary of Receipts and Expenditures for All School Purposes. Table 13.
- Distribution of Operating Expenses for All School Districts. Table 14.
- Cost of Education Per Pupil (day schools only). Table 15.
- Statement of School Indebtedness. Table 16.

SCHOOL BUILDINGS

- School Buildings Owned and Rented (value of property, number of buildings, etc.). Table 17.
- Number of Classrooms (day schools only). Table 18.

TEACHERS

- Teachers Employed and Salaries Paid. Table 19.
- Summary of Teachers Employed. Table 20.
- Classification of Teachers in Day Schools According to Salaries. Table 21.
- Professional Training of Teachers. Table 22.

PUPILS.

- Enrollment in Day Schools by Grades. Table 23.
- Ages of Pupils Enrolled in Day Schools. Table 24.
- Regular Day School Attendance. Table 25.
- Pupils for Whom Tuition or Transportation is Paid and Received. Table 26.

MISCELLANEOUS

- Evening Schools (number of teachers, attendance, etc.). Table 27.
- Special Evening Schools. Table 28.
- Day Vocational and Continuation Schools and Classes. Table 29.
- Summer Schools. Table 30.
- Colored Day Schools. Table 31.
- Financial and Statistical Report for County Vocational Schools. Table 32.
- Teachers and Enrollment in County Vocational Schools. Table 33.
- Apportionment of Reserve Fund for Year Beginning July 1, 1922. Table 34.
- Apportionment of School Moneys for Year Beginning July 1, 1922. Table 35.

SECTION B

- Attendance by Counties and Districts.

REPORTS OF ASSISTANT COMMISSIONERS AND
PHYSICAL TRAINING DIRECTOR

For year ending June 30, 1923

Report of

Lambert L. Jackson, Assistant Commissioner of Education in charge of
Secondary Education

Roy L. Shaffer, Assistant Commissioner of Education in charge of Ele-
mentary Education

Wesley A. O'Leary, Assistant Commissioner of Education in charge of
Vocational Education, Manual Training and Continuation Schools.
(Printed as a separate document.)

Charles J. Strahan, Deputy-Assistant Commissioner of Education in charge
of Controversies and Disputes

George R. Seikel, Director of Physical Training and Hygiene

REPORT ON SECONDARY OR HIGH SCHOOL EDUCATION

PREPARED BY

LAMBERT L. JACKSON,

Assistant Commissioner In Charge of Secondary Education.

June 30, 1923.

*The Commissioner of Education,
Department of Public Instruction,
State House, Trenton, New Jersey:*

DEAR SIR—In compliance with your request, I respectfully submit the following report for the year ending June 30, 1923. The statistical data contained herein are compiled from the annual reports of all of the approved secondary public schools of the State, and these reports are on file in this department.

LIST OF HIGH SCHOOLS WITH ENROLLMENTS

Four-year Schools

Atlantic City	1,956	Pemberton	164
Egg Harbor City	95	Camden	2,182
Hammonton	248	Collingswood	758

West New York	807	Penns Grove	284
Clinton	85	Salem	396
Flemington	284	Woodstown	228
Hampton	66	Bernardsville	238
High Bridge	124	Bound Brook	323
Lambertville	303	North Plainfield	230
Hightstown	174	Somerville	400
Hopewell	129	Hamburg	122
Princeton	349	Newton	403
Trenton	2,589	Sussex	88
Jamesburg	104	Cranford	243
Metuchen	152	Elizabeth	2,364
New Brunswick	1,226	Linden	205
Perth Amboy	841	Plainfield	1,158
South Amboy	131	Rahway	375
South River	158	Roselle	255
Woodbridge	266	Roselle Park	355
Asbury Park	872	Summit	483
Atlantic Highlands	100	Union	115
Freehold	442	Westfield	520
Keyport	190	Belvidere	201
Leonardo	320	Blairstown	69
Long Branch	753	Hackettstown	228
Manasquan	243	Phillipsburg	559
Matawan	167	Washington	172

Three-year Schools.

Merchantville	83	Mendham Boro	45
Newport	44	Hillside	144
Swedesboro	99	Oxford	30
Long Valley	32		

Two-year Schools

Mays Landing	38	Allentown	43
Tenaflly	169	Rumson	32
Frenchtown	29		

One-year Schools

Carteret	50	Mountain Lakes	13
----------------	----	----------------------	----

The following tables of statistics are arranged in the same way as in previous reports so that comparison from year to year may easily be made.

TABLE I

COMPARATIVE STATISTICS BY TOTALS

	1919	1920	1921	1922	1923	Incr.	Decr.
Approved four-year high schools..	138	137	137	139	142	3	..
Registered three-year high schools	11	10	8	8	7	..	1
Registered two-year high schools.	8	8	7	6	5	..	1
Registered one-year high schools.	1	1	0	1	2	1	..
Total registration in high schools	51,379	55,243	62,457	73,469	81,205	7,736	..
Pupils attending schools in ad- joining districts	9,270	10,339	12,549	14,314	15,976	1,662	..
Total school enrollment of the State	571,434	591,798	612,277	648,936	66,391	19,455	..
High school teachers—							
Men	698	736	706	922	1,020	98	..
Women	1,379	1,289	1,328	1,690	1,690	150	..
Total	2,077	2,025	2,234	2,612	2,800	248	..

There are now 137 districts maintaining approved four-year public high schools in this State; 7 three-year schools; 5 two-year schools and 2 one-year schools.

The district of Newark maintains four senior high schools and Jersey City two, and Paterson two.

The district of Pitman, Gloucester County, will open a two-year high school September, 1923.

There are eight districts maintaining approved junior high schools. These districts are:

Montclair
Moorestown
New Brunswick
North Plainfield

Princeton
Red Bank
South Amboy
Trenton

The district of Franklin will open a junior high school September, 1923, under the law of 1923 establishing junior high schools in districts not maintaining senior high schools.

The increase in total registration over last year is 7,736 or 10.5%. The percentages of increase for the last five years, that is since the close of the World War, are 0.6%, 7.5%, 13%, 18%, 10.5%. With readjustment accomplished and industry revived it is probable that the peak of abnormally increasing registration in high schools has been reached.

Building programs have nearly overtaken the growth in attendance. There are now few high school pupils on *part time* except in the cities of Newark, Trenton, Bayonne, Jersey City and Paterson, and funds have been voted to provide proper facilities in these districts.

The 1923 Legislature raised the bonding limit of third class cities from 6% to 9%, thus enabling some of the smaller cities to enlarge their school plants.

Although the effect of the continuation school has been to increase high school attendance, the growing attention to educational guidance will tend to offset this influence. Pupils who are destined to become apprentices to the trades are being encouraged to complete their day-school attendance at 16 years of age.

The enrollment per teacher is still creeping up, in spite of the small classes unavoidable in the smaller schools, until the average number, 29 per teacher, is the highest in the history of New Jersey high schools. This is more than twice the average number of pupils per teacher in the approved private schools.

The average salary for men teachers in the high schools of the State in 1923 was \$2,509.99. For women teachers in the high schools \$1,955.49. The corresponding salaries for 1922 were \$2,451.57 and \$1,866.16.

TABLE II

GRADE IX

TOTAL ENROLLMENT OF SCHOOLS BY CLASSES

	1919	1920	1921	1922	1923
Four-year schools	22,034	24,297	26,869	31,484	33,065
Three-year schools	216	363	201	398	210
Two-year schools	276	137	295	193	188
One-year schools	30	106	0	28	63
Total	22,556	24,903	27,364	32,103	33,526

GRADE X

	1919	1920	1921	1922	1923
Four-year schools	12,827	14,223	16,142	19,108	21,666
Three-year schools	135	175	85	275	155
Two-year schools	156	134	109	147	123
One-year schools	0	0	0	0	0
Total	13,118	14,532	16,336	19,530	21,944

GRADE XI

	1919	1920	1921	1922	1923
Four-year schools	8,648	9,469	10,354	12,573	14,641
Three-year schools	93	106	58	105	112
Two-year schools	0	0	0	0	0
One-year schools	0	0	0	0	0
Total	8,739	9,575	10,412	12,678	14,753

GRADE XII

	1919	1920	1921	1922	1923
Four-year schools	6,956	7,150	8,189	9,076	10,899
Three-year schools	0	0	0	0	0
Two-year schools	0	0	0	0	0
One-year schools	0	0	0	0	0
Total	6,956	7,150	8,189	9,076	10,899
Four-year schools	P. G.	83	156	82	83
Grand total	51,379	55,243	62,457	73,469	81,205

There are only eight partial high schools in the State that will remain partial high schools for some time. Thus the small high schools with two or three exceptions have been reduced to the minimum number in New Jersey.

TABLE III

PERSISTENCE OF CLASSES 1920, 1921, 1922 AND 1923 COMPARED

	<i>Enrollment</i>	<i>Per cent.</i> 1923	<i>Per cent.</i> 1922	<i>Per cent.</i> 1921	<i>Per cent.</i> 1920
1920, Grade IX	24,903	100	100	100	100
1921, Grade X	16,336	65.6	64.4	60.3	56.5
1922, Grade XI	12,678	50.5	46.1	44.0	38.7
1923, Grade XII	10,899	50.9	40.2	37.6	30.1

This tendency for a larger proportion of pupils to persist through the four-year courses is a favorable symptom, because, if it results from greater prosperity, it signifies a disposition to invest more in education. If it is the result of greater effort, then it means that the schools are more efficient, and, if it results from a more flexible and adaptable curriculum, then the schools are rendering the public a greater service.

TABLE IV

PERCENTAGE OF ENROLLMENT BY GRADES

	1919	1920	1921	1922	1923
Grade IX	43.87	45.08	43.81	43.69	41.29
Grade X	25.57	26.32	26.14	26.58	27.02
Grade XI	17.01	17.33	16.67	17.25	18.17
Grade XII	13.54	13.09	13.36	11.10	13.52

This table shows that from year to year, on the average, the whole high school population is distributed among the four years of the course approximately in the proportion of: 1st year, 43; 2d year, 27; 3d year, 17; 4th year, 13.

TABLE V

DISTRIBUTION OF GRADUATES PROPOSING TO ENTER HIGHER INSTITUTIONS

	1919	1920	1921	1922	1923
Colleges	1,399	1,485	1,761	2,026	2,040
Technical Schools	544	284	332	283	279
Normal Schools	768	820	887	1,202	1,508
Law Schools	43	64	46	77	130
Medical Schools	51	51	66	68	81
Dental Schools	48	74	38	53	68
Other Higher Institutions.	279	848	423	377	563
Total	3,132	3,626	3,553	4,086	4,669
Total Number of Graduates	5,685	6,119	6,879	7,362	8,709
Percentage of graduates proposing to go on for additional study	55.	59.2	51.7	55.5	53.6

Table V bears out the general impression that approximately 50% of the high school graduates pursue further study in higher institutions. The general tendency is toward an increase in this proportion.

SPECIAL PERIODIC STUDIES

In accordance with the plan established in 1916 to report the registration of pupils by subjects every five years instead of annually, the following table was prepared showing the registration of pupils in mathematics in 1919 and 1923:

TABLE VI

ENROLLMENT IN MATHEMATICS IN 1922-1923

	(Grade IX.)		(Grade X.)		(Grade XI.)		(Grade XII.)		Total.
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	
Algebra	13,495	10,646	1,762	1,442	2,968	1,919	684	330	33,246
Plane Geometry	158	144	6,531	4,994	1,696	1,092	133	101	14,849
Solid Geometry				2	741	115	1,129	269	2,196
Plane Trigonometry					50	7	1,343	307	1,707
Commercial Arithmetic	1,301	2,092	150	240	24	58	29	122	4,010
Total	27,836		16,121		8,670		4,387		56,014
Percentage of grade registra- tion	83.0		68.9		58.7		39.9		68.9

ENROLLMENT IN MATHEMATICS IN 1918-1919

<i>Grades</i>	<i>IX</i>	<i>X</i>	<i>XI</i>	<i>XII</i>	<i>Total</i>
Algebra					17,917
Boys	7,180	756	1,355	493	
Girls	6,381	555	1,012	185	
Plane Geometry					8,173
Boys		3,567	614	119	
Girls		3,346	482	45	
Solid Geometry					1,487
Boys			369	821	
Girls			132	165	
Plane Trigonometry					1,606
Boys			460	903	
Girls			8	235	
Commercial Arithmetic					2,241
Boys	609	189	2	17	
Girls	1,125	276	5	18	
Total	15,295	8,689	4,439	3,001	31,424

Percentage of Grade Registration.. 67.9 66.3 50.8 44.8 61.2

It is obvious from the percentages in the above tables that the proportion of high school pupils taking mathematical courses is increasing. Not only is the whole number proportionately larger but so is the number taking each subject with the exception of solid geometry and trigonometry.

The following table shows the comparison subject by subject for the five-year period 1918-1923:

<i>Subject</i>	<i>Percentage of</i>	<i>Percentage of</i>
	<i>Total Enrollment</i>	<i>Total Enrollment</i>
	<i>1918</i>	<i>1923</i>
Algebra	35	40.9
Plane Geometry	16	18
Solid Geometry	2.9	2.7
Plane Trigonometry	3.1	2.1
Commercial Arithmetic	4.3	4.9

The subject of algebra is taught in all four years because algebra I is a first year subject and also a second year subject when general mathematics is taught in the first year. Algebra II is a third year subject and algebra for college entrance review is a fourth year subject.

Plane geometry is both a second year and third year subject.

Commercial arithmetic is a first year and a second year subject. The number of pupils reported as taking commercial arithmetic in the third year is due probably to repeaters. Those recorded under the fourth year are taking commercial arithmetic as review work in preparation for examination to enter the normal schools.

STATE HIGH SCHOOL CONFERENCE AT NEW BRUNSWICK

The fifth meeting of the State High School Conference was held at New Brunswick, October 27, 28. All sessions were crowded to the capacity of the audience rooms. Over 1,500 teachers and school officials registered at headquarters. A larger number of local boards of education than ever before released high school teachers to attend the Friday sessions of the conference. Atlantic City closed its high school and sent its sixty high school teachers for both Friday and Saturday.

The whole of Friday was given over to problems of high school administration. At the morning session committee reports were received on the following topics:

"Educational Guidance"

Committee { Mr. H. W. Dutch, Montclair
 { Mr. A. D. Arnold, Passaic.
 { Mr. R. E. Files, East Orange
 { Mr. I. B. Somerville, Ridgewood

"High School Records"

Committee { Mr. A. S. Davis, Englewood
 { Mr. F. A. Brick, Bayonne
 { Mr. E. V. Walton, Roselle

"High School Annual Report"

Committee { Mr. F. E. Pierce, Elizabeth
 { Mr. F. A. Brick, Bayonne
 { Mr. W. E. Stearns, Newark

"Quality Credit"

Committee { Mr. C. A. Philhower, Westfield
Mr. Lindsey Best, Plainfield
Mr. J. H. Bosshart, South Orange

"Ninth Grade Promotions"

Committee { Mr. A. H. Flake, West Hoboken
Mr. F. S. Woolson, Haddon Heights
Mr. W. B. Davis, Madison

"The Core of the High School Curricula"

Committee { Mr. F. R. North, Paterson
Dr. W. A. Wetzel, Trenton
Mr. F. A. Brick, Bayonne
Mr. E. S. Stover, Bloomfield
Mr. C. A. Woodworth, West New York

Dr. Edward S. Evenden, of Teachers College, closed the morning session with an address on "The Financial Program for Schools."

At the afternoon session, conducted by the State High School Principals' Association, speakers, representing the teachers of the various departments of high school work, presented their views on the possibilities of co-operation between teachers and school executives.

The following departments were represented:

Mathematics

Address—"The Aims in Teaching Science and Mathematics"

Mr. Merton G. Leonard, Dickinson High School, Jersey City

Language

Address—"Problems of the Teachers of Language and Literature"

Dr. Maud Thompson, Miss Beard's School, Orange

Library

Address—"School Library Problems"

Miss Helen J. Wolfs, South Side High School, Newark

Vocational and Arts

Address—"Progress in Vocational and Manual Arts Education"

Mr. James E. Dougan, Assistant Superintendent of Schools, Newark

Social Science

Address—"The Place of Social Science in the Curriculum"

Dr. D. C. Knowlton, Lincoln School, New York City

The program following the evening banquet was designed to focus the work of the conference. The entire program of the two-day conference was framed to emphasize the social significance of the core subjects in the high school curriculum and the importance of a better plan of educational guidance.

Honorable John Enright, State Commissioner of Education, sketched this objective in bold relief, referring to the essential factors of health, language, civics and vocations, of which the first three constitute the common core of instruction. He then introduced President Arthur E. Morgan, of Antioch College, who explained how his college required every student to choose a

vocational objective and how the college assisted the student to realize his ambition. Supplementing the idea of social science, Mr. Harold O. Rugg, of Teachers College, presented the significance of the reorganization of the social sciences.

On Saturday morning, Mr. Hamilton Holt described, in a masterly way, the work of the League of Nations. Whatever anyone present may have thought of America's attitude toward the League, he could not fail to be informed and inspired by the significant facts dispassionately presented by Mr. Holt. It was a strong climax to a program designed to bring out the necessity of social studies in any scheme of democratic education.

The remainder of Saturday was devoted entirely to the meetings of the associations of teachers of various subjects:

- Association of Teachers of Social Sciences
President, Prof. S. B. Howe, Newark
- Association of Teachers of English
President, Miss Margaret Coult, Newark
- Association of Teachers of Physical Education
President, Mr. Walter Short, Trenton
- Association of Teachers of Science
President, Miss Pauline McDowell, Elizabeth
- Association of Teachers of Commercial Education
President, Mr. F. C. Meredith, Montclair
- Association of Teachers of Public Speaking
President, Mrs. E. Hamilton Hurd, Elizabeth
- Association of Teachers of Classical Languages
President, Dr. Maud Thompson, Orange
- Association of Teachers of Vocational Arts
President, Mr. Arthur F. Hopper, Plainfield
- Association of Teachers of Agriculture
President, Mr. W. B. McDougall, Pleasantville
- Association of Teachers of Mathematics
President, Mr. P. W. Averill, Elizabeth
- Association of Teachers of Music
President, Miss Catherine M. Zisgen, Trenton
- Association of Teachers of Modern Languages
President, Mr. Alanson G. Alden
- Association of School Libraries
President, Miss Helen J. Wolfs, Newark

Among the notable speakers heard at the association meetings were:

- Dr. David B. Corson,
Superintendent of Schools, Newark, New Jersey.
- Dr. J. Lynn Barnard,
Director of Social Studies, Department of Public Instruction, Pennsylvania.
- Prof. John A. Fitch,
The New York School of Social Work.

Address—"The Problems of American Democracy."

Mr. Edwin Greenlaw,

Kenan Professor of English, University of North Carolina.

Address—"A New Attitude Toward the Study of Literature in the High School."

Mr. L. H. Minton,

General Ceramics Company, Metuchen, New Jersey.

Address—"The Ceramic Industry in New Jersey."

Dr. Edgar F. Smith,

President of the American Chemical Society.

Address—"The Teaching of Chemistry."

Mr. William Chauncey Langdon,

American Telephone Company.

Address—"Dr. Alexander Graham Bell and His Work in the Development of the Telephone."

Mr. Earl R. Glenn,

Lincoln School, New York.

Paper—"What Constitutes a Standardized Test in Science."

Dr. Jean Broadhurst,

Professor of Biology, Teachers College.

Address—"Broadening the Personal Hygiene Course."

Mr. Walter S. Morgan, C. P. A. (Mass.),

Morgan and Morgan, Certified Public Accountants.

Address—"The Business of Business Education."

Miss Alice T. Coseo,

Metropolitan Museum of Art, New York City.

Address—"Teaching the Classics in a Museum."

Mr. Harvey M. Dann,

Barringer High School, Newark, New Jersey.

Address—"The Curriculum As It Might Be with Reference to Latin."

Mrs. Ida S. Harrington,

Specialist on Home Management, Extension Department, State Agricultural College.

Address—"Home Making a Fine Art."

Dr. Jacob G. Lipman,

Director of Experiment Stations.

Address—"New Jersey Agriculture of To-day."

Prof. James Fleming Hosie,

Teachers College, New York.

Address—"School Libraries and the Teaching of Literature."

Mr. R. H. Rinenburgh,

Peddie Institute, New Jersey.

Paper—"Some Aims in the Teaching of Mathematics."

Mr. R. Arratia,

Columbia University.

Address—"Spanish-American Universities and Their Ideals."

In reporting the work of the High School Conference, I take the opportunity to express the appreciation felt by the State Department for the splendid co-

operation of the State University at New Brunswick in making this conference of service to the teachers of the State.

The co-operation of the various State associations of high school teachers has made this conference the most helpful meeting of the year for the interests of secondary education. It is to be hoped that school boards and school officials will make it possible for every teacher who may so desire, to attend all of the sessions of this conference.

INTERSCHOLASTIC DEBATING CONTESTS.

The Rutgers Interscholastic Debating Committee has presented the following report for the year 1922-23:

The ninth series of interscholastic debates, held under the auspices of the Philoclean Literary Society of Rutgers College, again proved their value in the educational system of New Jersey. They carried out, as in former years, the purposes for which they were started, namely, to encourage the art of debating as a school activity; to develop in our secondary schools an active competition along literary lines; and to promote among our secondary schools an intelligent and vital interest in questions of a civic nature.

The work commenced with the holding of the ninth annual conference of high school delegates on January 6, 1923, at Rutgers College. Two hundred and eighty delegates came from one hundred and four schools. Ninety of these schools were in New Jersey, the remainder being in New York.

The conference adopted the by-laws, arranged groupings, and selected the following questions for debate: Resolved, That in view of the economic distress in Europe, the United States should cancel at least 50 per cent. of the war debts of the allies; and Resolved, That the merchant marine of the United States should be subsidized by the Federal Government.

After the conference, dinner was served in the dining-room of the New Jersey College for Women. Dean Mabel S. Douglas welcomed the delegates. Addresses were made by Prof. Alfred P. Haake, of the Economics Department of Rutgers College; Mr. Marmaduke Potter, a Rhodes Scholar from Rutgers; Mr. Arthur R. Dayton, Rutgers '20, and General Secretary R. W. Voorhees.

The schools grouped themselves according to size and relationships with other schools into 23 groups of four, and four groups of three. Each school in these latter groups was represented by two teams, thus effecting a triangular debate. The total number of debates held was 67. The semi-final debates were held on March 23, and the final debates to determine the group champion on April 27.

The work of the League was carried on as usual by a committee of the Philoclean Literary Society, under the direction of Mr. Ralph W. Voorhees, of New Brunswick, who, as one of the founders, was the student chairman of the first two committees and has since acted as general secretary. Mr. Voorhees was assisted by Mr. Theodore Brinkerhoff, of the New Brunswick Theological Seminary. An advisory board, composed of high school principals continued, as in the past, to render, in behalf of the conference, ultimate supervision. The members of the Board for 1922-23 were: Mr. Willard L. Lowery, Chairman, New Brunswick High School; Mr. Ralph S. Files, East

Orange High School; Mr. Charles S. Huff, Asbury Park High School; Mr. Harry W. Moore, High Bridge High School; and Mr. H. W. Weidner, Vineland High School.

An innovation which it is believed has proved of some value in the direction of standardizing debate methods and debate judging throughout the League was a Judge's Guide, prepared by Mr. Brinkerhoff, for the use of coaches and judges.

HIGH SCHOOL LIBRARIES

Last year as a result of our proposed *first purchase* list of \$500 worth of reference books, many boards of education made special appropriations. School officials also found ways of augmenting these funds, so that the small high school libraries were considerably strengthened. This year to stimulate further this most desirable movement this department issued a *second purchase* list.

SCHOLARSHIPS

The scholarship, offered annually by the Colorado School of Mines, was awarded this year to Mr. Robert Rolando, of Paterson High School, on the basis of scholarship. There was only one applicant in 1923 as against two in 1922. The following persons have previously qualified for this scholarship:

- Mr. Bryant Rogers, Montclair High School, 1917.
- Mr. Justin Shearn, Roselle Park High School, 1918.
- Mr. Halliday McKay, Plainfield High School, 1919.
- Mr. Lewis Height, Ocean Grove High School, 1920.
- Mr. Charles Oscar Kohl, Ridgewood High School, 1921.
- Mr. William Robinson, Salem High School, 1922.

BULLETINS

It was necessary to revise the *High School Manual* to conform to the recent edition of New Jersey School Law and to modernize curricula materials. Twenty-five hundred copies were printed.

In addition to the articles on secondary school subjects published in the Education Bulletin, sent out by Department of Public Instruction, the high school division has issued a monthly secondary school letter. These letters, besides carrying current announcements, have contained studies made by the department or secured from expert school men for the purpose. The following subjects have been treated during the year:

1. Statistical Studies—

- A. Growth of the State high schools during the past ten years, average salaries, average number of pupils per teacher and the number of teachers from 1921-1922.
- B. Holding power of the high school.
- C. Proportion of graduates entering higher institutions.
- D. Average age of pupils entering high schools.
- E. The number of pupil hours taught by teachers of various high school subjects.

2. Quality credits.

3. High school records.

4. Means of increasing pupil effort.

On account of the stress now being placed upon the economic use of school funds, I am giving below the study made by this department to determine how fully the time of high school teachers is employed.

THE NUMBER OF PUPIL HOURS TAUGHT BY TEACHERS OF VARIOUS HIGH SCHOOL SUBJECTS

A study of teacher load is a timely investigation because the Association of Colleges and Secondary Schools of the Middle States and Maryland is about to vote on a set of standards for the approval of high schools in its territory, which list tends to serve as a basis for certification of pupils to colleges not requiring entrance examinations, and those standards propose 30 pupils per teacher, or 750 pupils per week as the maximum load. The study is timely for the further reason that boards of education are asking if teachers are employed to the best advantage in relation to the cost of education.

As a result of a compilation taken from the schedules of all of the high schools of the State, there is here submitted the load in pupil hours of 1,467 high school teachers of the State. These records are reduced to 9 intervals for convenience, sufficiently small to determine the approximate median load. Furthermore, since we have taken at random selections of well over 50% of all the high school teachers in the State, the results may be taken to have State-wide significance.

The tabulation shows that there were in the New Jersey High Schools in 1922 and 1923:

339	representative teachers of <i>English</i> with a median load of
693	pupil hours per week
239	representative teachers of <i>Mathematics</i> with a median load of
703	pupil hours per week
217	representative teachers of <i>Science</i> with a median load of
659	pupil hours per week
94	representative teachers of <i>Latin</i> with a median load of
561	pupil hours per week
155	representative teachers of <i>History</i> with a median load of
698	pupil hours per week
213	representative teachers of <i>Modern Language</i> with a median load of
631	pupil hours per week
210	representative teachers of <i>Commercial Subjects</i> with a median load of
631	pupil hours per week
1467	representative teachers of the above seven subjects with a median load of
660	pupil hours per week

The range of teacher load generally recognized for academic subjects in high schools throughout the country is optimum 625, and maximum 750 pupil hours per week.

Grand Total, 1467	17	48	165	262	409	326	199	27	14
	Median 660							Above opt.	35
								Below max.	90

28% of teachers have load above maximum

- Notes:* 1. The records of many teachers were excluded where their work was divided among several subjects.
2. The records of teachers teaching two or more subjects were included and recorded under one of the subjects, if such inclusion did not tend to discredit any other subject involved.
3. Typewriting was included among the business subjects.
4. Teaching principals were excluded, also heads of departments with supervision, also all part-time teachers.
5. No gymnasium or study hall groups were included in determining academic load.

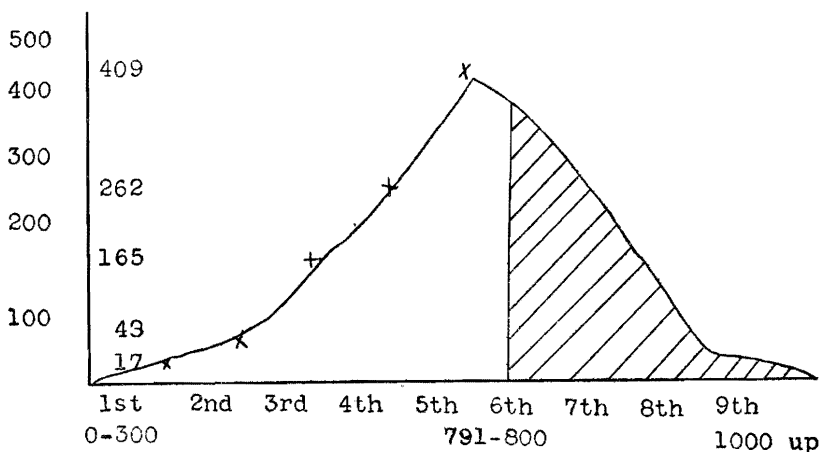

A striking fact shown by these results is the wide range of teacher load in every subject. Improvement in school organization would, undoubtedly, reduce both the number of teachers having small loads, *i. e.*, from 200-500 pupil hours, as well as the number of teachers carrying excessive loads, *i. e.*, from 800-1100 pupil hours.

It is evident from a study of the schedules that too many of our schools are operating small classes, that is, classes from 4 to 15 pupils each. Industrial classes are generally of minimum size, even on the 50% basis.

The following table shows the greatest and the least load in the State as reported under each subject:

<i>Subject</i>	<i>Minimum</i>	<i>Maximum</i>
English	...	
Mathematics	...	1285
Science	155	1015
Latin	190	
History	260	1110
Modern Language	265	1035
Commercial Subjects	150	1040

The shaded portion of the graph given below shows the range of the teacher overload.

It is obvious from the above graph showing the distribution of teacher load for the teachers of all academic subjects, that the schools as now organized are not wasting teachers' time on the average. The excess of load more than makes up for the deficiency in load. It is a more equitable distribution that is needed.

SCHOOL VISITATION

During the school year I have visited each of the 156 high schools. Committee meetings and special programs have required my presence in twenty-five of these schools on other occasions. I have also inspected ten private schools, three of which have been registered by the State Board of Education.

Besides the regular visitations I have served on the program of twelve county institutions, and made thirty public addresses, including one at dedication and six at commencements. In cooperation with other divisions of the department I have visited six boards of education and collaborated in making investigations and reports.

CURRICULA AND CREDENTIALS

The rapid growth of the schools makes possible the diversification of the curriculum in a greater and greater number of schools. This requires new curricula and courses of study and the revision of many current ones.

Besides organizing courses for the new schools started this year, I have revised thirty-two curricula which have been approved by the State Board.

There is an ever-increasing number of pupils transferring from school to school or from State to State. This is shown by the number of certificates or credentials submitted to this department for validation. I have passed upon 2395 of these certificates during the year, which is twice as many as were issued five years ago.

TUITION PUPILS

As the new school buildings for high school purposes become available the facilities for tuition pupils increase. Next year will see the whole 15,000 of these pupils fairly well provided for. The policy providing that districts receiving such pupils may charge the full per capita cost of their instruction including a 5% interest charge on the plant, is making districts more willing to provide room for tuition pupils. And the forty-dollar allowance per pupil to the sending district is helping to lighten the tuition burden.

RECOMMENDATIONS

In addition to increased facilities which are especially needed in the large cities I recommend that this department use its influence to:

1. Raise the standard in the smaller high schools. Insist on more serious work from all pupils.
2. Place more emphasis on the social sciences.
3. Lay more stress on health instruction.
4. Diminish the attention paid to modern languages, if necessary to emphasize the core of the curriculum.
5. Assign inexperienced teachers to the more mechanical courses and the mature and experienced teachers to the core subjects.

In concluding this report I wish to acknowledge the hearty cooperation of the other divisions of the department and also of the schoolmen of the State. The spirit of service pervades the public schools.

Respectfully submitted,

L. L. JACKSON,

Assistant Commissioner of Education.

REPORT ON ELEMENTARY EDUCATION

PREPARED BY

ROY L. SHAFFER,

Assistant Commissioner in Charge of Elementary Education.

*Honorable John Enright,
Commissioner of Education,
Trenton, New Jersey.*

DEAR SIR:

I respectfully submit to you the annual report of the Department of Elementary Instruction for the year ending June 30, 1923.

The most important function of the Department of Elementary Instruction is that the quality of teaching and the quality of supervision of the schools of the State be improved. That this objective may be reached it is necessary that this department have definite policies and that it be enabled to carry these to their final conclusion. In the report last year, I stated the policies in detail. Consequently, I shall not reenumerate them in this report, but state that the policies as outlined have been adhered to, and have been kept as criteria to guide me in my duties.

These duties embrace the following activities:

1. School inspections and supervision of instruction.
2. Group meetings and conferences with superintendents, helping teachers, supervising principals, principals and teachers.
3. County institutes.
4. Demonstration teaching.
5. Community groups.
6. Evening classes for the foreign-born.

That the work of the department might be made more effective and more efficient four phases of activities of the educational process have received special attention.

1. The physical health program.
2. The mental health program.
3. Work of county superintendents and helping teachers.
4. Efficiency tests.

The problem of education has grown so rapidly, has become so complex, and the cost has increased so much in money and energy during the past decade, that it seems if its effectiveness is to be increased accordingly, that business principles must be applied to the activities in which we are engaged. Accepting this as dogmatic, the work of the year has been planned on such a basis.

Every industry has for its objective a major product, and often many minor or by-products. Education has for its aim the development of able and competent citizens. This aim includes both the major and minor products.

In many of the statements issued from your office, you have defined education to mean good health, good citizenship, and good English. Believing these to be the product of a good system of education, this department has encouraged and emphasized those strands of instruction which promote better health, insure good citizens, and guarantee the use of a better means of self expression.

SCHOOL, INSPECTION AND SUPERVISION OF INSTRUCTION

(1) Although inspection of schools and the supervision of instruction have little in common, they are discussed in the same paragraph, because the actual school visits are the only opportunity which the assistant commissioner has for noting the physical condition of the building as well as the type of instruction. The work of supervision if it be done effectively should include a follow-up visit. This is practically impossible in our State, which has approximately 15,000 elementary teachers. Necessarily, the visits to schools must include a dual objective. In the matter of supervision an attempt is made to guide and stimulate the teacher by an optimistic leadership. The good supervisor expects the teacher to do difficult tasks. An optimistic and humane bearing have a wonderful effect in stimulating teachers to do their utmost.

GROUP MEETINGS OF ADMINISTRATIVE OFFICIALS

(2) There are in the State 39 city superintendents, 21 county superintendents, 33 helping teachers, and approximately 200 (approved and unapproved) supervising principals. This department has direct contact with all of these officials in the administration and supervision of the elementary schools. It is an educational axiom that if State supervision is to be of real value, it should concern itself with the work of these officials. Consequently, an immediate objective is that supervision of instruction can be accomplished best by working for good teaching and good supervision through the executive and administrative offices.

During the year three general meetings of city superintendents and supervising principals were held as directed by the school law. The aim of these meetings was to discuss school affairs and ways and means of promoting a thorough and efficient system of education. There were also held as required by law meetings of the county superintendents and helping teachers. During the year it was my duty to meet in conferences with practically all of the principals of schools in the various counties. I feel that whenever an opportunity affords, a conference of the round table type strengthens and unifies the work of our school officials.

COUNTY INSTITUTES

(3) At the county institutes an opportunity was afforded to come in contact with many teachers. Usually there was a meeting of primary teachers in the morning and the grammar grade teachers in the afternoon. This is the only opportunity afforded for a meeting of the teachers of the entire county. These county meetings help the teacher to a sympathetic understanding of the State and county viewpoint of the educational problem. By arranging definite and specific programs for these groups, I have felt that great good resulted.

DEMONSTRATION TEACHING

(4) During the year there has been an increase of the demonstration of lessons under actual conditions. These lessons were taught by a good teacher selected from the local group. This has proven an effective manner of introducing modern methods. I heartily advocate this method of reaching the teachers. It embodies the principle of learning to do by doing; it makes additional use of the teachers with marked ability; and it gives to the group who observe the confidence necessary to try the methods employed. Since the demonstration method is being more and more employed by big business firms, I advocate its use for the improvement of the business of education. It should be used especially in those districts which employ teachers of little training and little experience.

COMMUNITY GROUPS

(5) I have given unstintingly of my time to speak to groups of parents and others interested in the schools. Most of these meetings were held under the auspices of the local parent-teacher associations. These associations are organized for the purpose of cooperating with the schools. The members of the groups are always interested in school affairs. In the past few years they have spread to nearly all the communities within the State. Statistics show that in proportion to population the parent-teacher associations of New Jersey rank second in membership of all the States. These people are unselfishly interested in their schools, and there is no doubt that wherever an active association is working you will find improved school conditions.

EVENING CLASSES FOR THE FOREIGN-BORN

(6) During the year, I visited each of the evening classes for the foreign-born, which are organized under the law and require visitation by a member of the department appointed by the Commissioner of Education.

One of the first essentials in qualifying for citizenship is the ability to speak English. Volume III, Census Report for 1920, shows that there are in New Jersey 73,409 foreign-born people who are unable to speak English. So long as these people do not have an opportunity to learn our language, just so long is our boast of equality of opportunity an unrealized ideal. There should be more classes for the foreign-born, and these should be so organized that foreign-born women could attend. The instruction in our evening classes for foreign-born is largely done by day school teachers. These teachers have had little or no training or experience with the adult. One of the surest ways of improving the teaching of the evening classes would be to require teachers to reach a standard, which should be based on adult education. Surely the need for a thoughtful attention to the education of our foreign-born population in the State is great.

EMPHASIZED EDUCATIONAL ACTIVITIES

BETTER PHYSICAL HEALTH

(1) The department has recognized the growth of the movement for better health of all our people. No movement looking to the welfare of a

people has ever had a more rapid growth. To illustrate that better health is the common thought of people, I refer you to the number of columns allotted in our daily press, and the amount of space taken up in advertising which discuss the health of the people. Both of these industries depend upon the common thought for their success. Physicians unhesitatingly tell us that during the period of growth of the individual defects must be cured, and the stamina increased if the adult is to enjoy good health. Acting on the common thought of people and the advice of the medical profession, educators have become interested in the health of children. So that the teachers of the State might have a health conscience, and also might train the children under their care in the habits of good living, a preliminary health bulletin has been prepared. This bulletin outlines the objectives of a good teacher, the ideals of the teacher, the hygiene of the classroom, the psychology of health teaching, cooperation of home and the school, and suggested outlines for the teaching of health habits. The bulletin is filled with suggestions which should aid the teacher, and a notable bibliography is referred to. Both the outlines and the references should be of great value in the teaching of health in our schools.

The department has also endeavored to cooperate with the agencies that have the health of the individual uppermost in their minds. I have given of my time whenever asked, and have cooperated fully with the State Board of Education through its Health and Housing Committee—Mrs. Edward L. Katzenbach, Chairman.

BETTER MENTAL HEALTH

(2) Another educational movement with a rapid growth is the movement looking forward to the understanding and classification of the pupils of our schools. This is called educational measurement. It comprehends either the measurement of intelligence or the measurement of the achievement of pupils or both of these factors.

The committee appointed by the Commissioner of Education at the request of the county superintendents and helping teachers decided to measure scientifically the general level of ability and achievement of the fifth grade pupils of the State. A notice, stating the problem and the contemplated method of solving it, was sent to all school administrators and their cooperation solicited. The response was nearly 100%. This committee then devised the New Jersey Composite Test, which was given to 48,000 fifth grade pupils. The test was composed of two parts or two examinations, which covered the subject matter within the content of reading, language and arithmetic and a list of questions involving the knowledge of the environment of children. The tests when given were corrected and returned to the State House. The Business Division of the Department of Public Instruction rechecked, retoted and codified the papers. These results were then transferred to Hollerith cards from which a thorough analysis is being made.

To determine the validity of the standardization of the tests, the Business Division chose three samples of 1,000 cases each. They made a comparison of these three standardizations and found that only a very slight difference existed between them. Consequently, the samples were combined into one sample of 3,000 cases. This standardization is given below.

**PERCENTILE STANDARDIZATION, NEW JERSEY COMPOSITE TEST
STATE-WIDE SAMPLE**

3,000 Entering Fifth Grade Children

Percentile	Total Tests 1—13 Score	Total Intelligence Tests 1—7 Score	Total Achieve. Tests 2—13 Score	Verbal Intelligence Tests 1—3 Score	Nonverbal Intelligence Tests 1—7 Score	Reading Achieve. Tests 8—10 Score	Arithmetic Achieve. Tests 11—13 Score	Percentile
5	70	30	35	6	18	11	18	5
10	80	36	40	9	22	15	21	10
15	88	40	44	11	24	17	23	15
20	94	43	47	13	26	19	24	20
25	98	46	50	15	28	21	25	25
30	104	50	52	17	30	24	27	30
35	108	52	55	19	31	25	28	35
40	113	54	57	20	33	27	29	40
45	117	57	59	22	34	28	..	45
50	122	60	61	23	35	30	30	50
55	126	63	62	25	37	31	31	55
60	130	66	64	26	39	33	32	60
65	134	69	66	28	41	34	33	65
70	138	72	68	30	42	36	34	70
75	142	75	70	32	44	37	35	75
80	148	79	72	34	47	39	36	80
85	156	84	75	37	49	42	37	85
90	164	89	79	40	53	45	38	90
95	180	98	83	46	59	48	40	95

The percentile standardization of the tests gives no real proof of the value of the tests as measures of intelligence or of school achievement. Indications of such proofs, however, have been obtained from a number of minor studies made upon the results.

COUNTY	NAME OF HELP- ING TEACHER	Number of one-room schools supervised.	Number of two-room schools supervised.	Number of three or more room schools supervised.	Number of buildings supervised.	Number of inexperienced teachers.	Number of teachers with experience but new to district.	Total number of teachers supervised.	Total number of pupils enrolled.	Total number of eighth grade pupils enrolled.

Total		347	133	147	627	295	238	1,303	43,532	2,924

This table shows that 347 teachers of one-room schools and 133 two-room school teachers came directly under the influence of the helping teacher.

There were 295 teachers without experience who were supervised by these helping teachers. And 238 teachers with experience, but new to the district, also received the direct attention of the helping teacher. It would be difficult to estimate the value of the assistance given to the inexperienced, most of whom are immature in age and worldly experience and need guidance. The benefit of this double influence of teacher and helping teacher was given to 43,532.

More helping teachers are needed to aid and assist the rural teacher.

The teacher in the last analysis is the most potent factor in the school. The schools are what the teachers make them. There is no reason why the people of the open country should not have as good teachers as the people of the city schools. It is impossible for our normal schools to train enough

teachers to fill the positions of all our schools. Hence, the rural school will be obliged to accept the untrained teacher. But the situation can be helped by the addition of more helping teachers.

EFFICIENCY TESTS

Below will be found two tables which show the results of the eighth grade efficiency tests for January, and May and June, 1923. The assistant commissioner had the assistance, in preparing these tests, of a committee composed of the following county and city superintendents: Mr. Unger, of Cumberland County; Mr. Morelock, of Essex County; Mr. Morris, of Ocean County; Mr. Sanford, of Warren County; and Mr. Philhower, of Westfield. I wish to express my thanks and appreciation to these men for their work. They all gave their time and effort that these questions might meet the varied viewpoints of the teachers of the State.

**SUMMARY OF STATE EXAMINATION FOR PUPILS IN THE HIGHEST ELEMENTARY GRADE
JANUARY, 1923**

In closing this report, I shall mention what I think should be some of the next steps taken by this department.

Along with the program of health should go some definite and concrete information looking to the safety of the individual. We are living in an age of high powered machinery, the age when labor saving devices are being highly developed, the age in which speed predominates. We have gas and electricity used in the homes, the streets are cluttered with automobiles, and on every hand is some powerful device of which man must stand in awe. The hazard from fire is growing, and could be made less disastrous by teaching children the habit of carefulness. It would seem that the teaching of habits and knowledge of safety would result in the saving of great suffering and in preventing a serious loss of human life.

The public is being aroused to a lack of courtesy which exists among our young people, so much so that business firms are offering additional compensation, promotion, and other prizes to their employees who show themselves courteous and who devise workable plans for the training of others in courtesy. Consequently, I think that there should be some definite training in the form of a course in manners. Such a course is being adopted by Public School No. 15, New York City.

These suggestions have to do with the by-products of education, but seem to be worth careful consideration, so that these worthy attributes of character

and personality be made available to our school children. Surely good manners help to make good citizens. To-day, as never before, democracy is placing emphasis upon the fact that education must be so organized that it will develop good citizens. I hold it to be the duty of the State educational system to accept the responsibility.

Very truly yours,

ROY L. SHAFFER,

Assistant Commissioner of Education.

REPORT
ON
INDUSTRIAL AND AGRICULTURAL EDUCATION

BY
WESLEY A. O'LEARY,

and Continuation Schools.*

(PRINTED AS A SEPARATE DOCUMENT)

DECISIONS*

PREPARED BY

CHARLES J. STRAHAN,

*Deputy-Assistant Commissioner of Education in charge of Controversies and
Disputes.*

* Deleted from the reports for 1922 and 1923 by the order of the Commissioner of Public Reports, Mr. John J. McGowan.

Many of these decisions will appear in a subsequent edition of the School Law.

REPORT ON PHYSICAL TRAINING.

PREPARED BY

DR. GEORGE R. SEIKEL

Director of Physical Training and Hygiene.

HEALTH

The past two years have been banner years in health instruction and health activities in the schools throughout the State. Never before has the positive health idea occupied such a prominent position in the minds of the school authorities and teachers, and in order to retain this interest it behooves them to exert their best efforts in the continuance of the promotion of health and happiness.

The reason why examinations should be made of our school children and why they are beneficial are so obvious that hardly any argument for them is necessary. The medical inspectors consider essential such examinations as "a thorough medical appraisal of the human system to detect physical and mental impairments and faulty habits of hygiene" and, "a systematically arranged record of facts pertaining to the individual to serve as a stimulus and guide for his improvement."

As the first care of education should be the preservation and improvement of health and the securing of the highest organic efficiency possible to the individual it is fitting that the information gained, by physical and medical examinations should be furnished to the home, and through the home the attention of the family physician or of a medical specialist should be directed to conditions about which there may be question. The interest in school hygiene is unprejudiced, unselfish, and directed always and solely toward the welfare of the child, and so the motive of the school cannot be misjudged, and performs an important service to society by advising the home with reference to a more rational care of the child outside of the school. The taking out of all sorts of tonsils, adenoids, and teeth and many, many other things may still leave a child with negative health, and it follows that we must have a foundation upon which we are to build our health education program. In the past two years the emphasis has been placed upon training rather than merely informing the individual so that the acquired knowledge was translated into habits of living.

The health of the adult under certain conditions may be justifiably sacrificed to other ends, but the health of the growing child should be sacrificed to nothing. If the latter be so, then more attention must be given to school hygiene, for the entire environment of the school and its adaptability to the pupil and its effect upon health can not be overlooked. It is obviously unfair to require a child to occupy a seat likely to produce body deformities, or to study in a light that may impair vision. And so with ventilation, heating,

and general sanitary conditions. The community should realize, however, that it is of little value to discover defects unless provision is made to remedy them when they are found.

PHYSICAL TRAINING

Physical training is preventive medicine in action. It has for its purpose the development of the functional power of the child to the highest level consistent with the most successful training of its intellect; it should meet the needs of the weak who require it most, as well as of the strong. It is graded for various ages and its progress is determined by tests and measures of development, strength, agility, endurance and ability to do. The next forward step in physical training will be to divide the children into three classes: (1) the physically normal; (2) the subnormal, those underweight and understrength; (3) the abnormal, those with distorted posture and carriage, heart lesions, hernia, diseased joints, marked flat feet. The children included in the first two divisions will be under the instruction of the teacher of physical training, while those of the third class will require a teacher who has been specially prepared for this type of work.

It is fitting here to say a word in answer to those who have ever been conservative when new activities with new aims were to be introduced into the curriculum; those who ever exalted the mind and had contempt for the physical. Have they failed to realize that the old physical education of the home and the community has broken down and that it is necessary to organize it as a school function? That the school must include the values inherent in the nature of physical training? These values are not given in the same degree by any other kind of activity in child life; yet they are part of the total aims or objectives of education. Therefore the objectives of physical education must be stated on a background of education as a whole, from five standpoints:

A. The first and immediate objective of physical education is the organization of child life as expressed in big muscle activities. The organization of child life is the first aim of any phase of education controlling a national activity.

B. The second point of view in considering objectives is social adjustment. Social adjustment is the remote objective of education. The physical training activities develop a great range of powers which gradually establish the capacity for the specific activities of adjustment. They are the developmental foundation of adult efficiency in any phase of adjustment.

C. The third standpoint in considering objectives is the development of latent powers or capacities. The development of personal capacity is the mediate objective of education. Children go through a long period of growth, engage in a vast variety of activities, and thus develop latent capacities. The activities bring about a development of the instinct mechanisms, the development of the intellectual mechanisms, the development of the organic mechanisms.

D. The fourth point of view in considering objectives is social standards. Standards are the idealizing objectives of education. Society has created and

is still creating criteria for judging every phase of human behavior and every trait in development or in adjustment. Physical education has objectives in three great groups of standards—morals, manners, and health; as also the technical standards like posture and carriage.

E. The fifth point of view in considering objectives is the control of health conditions. This health control, as an objective of the school, is quite in contrast to educational objectives. It is the protective and preventive function of the school. Its purpose is to free the educational process from handicapping influences.

The growth in numbers of special teachers in physical training proves that there is a need for specially prepared teacher for a special subject in education.

PLAY AND ATHLETICS

Play is the serious business of childhood. Play in a broad way ministers to the development of the personality as well as to the physique of the child, and yields him valuable training both of body and of mind. Great as may be the importance of play from the practical standpoint of health and work, when we come to the side of personal development we come to the real heart of the matter. If we are to consider play as a means only of providing good times for children or solving problems of institutional discipline or training, we have failed to catch its full significance. Through play the child's soul can unfold. Through it alone can he find an adequate outlet for his emotions. Just as the child has instinctive desires for food, shelter and motion, satisfaction of which will prove the determining factors in his physical growth, so he has other instincts, such as rhythm, imitation, construction, conflict, loyalty; through the guidance of these instincts we are able to train him in good habits. Instincts are not the only factors in behavior. Human instincts do not act blindly. While pointing the way, they do not forbid reason to choose the path. Our educational administration must find more time for the development of this form of education, and supply opportunities in the form of equipment as well as play space.

The development in athletics needs no comment. The growth was foreseen and the value recognized. For the adolescent there is a wide field of pleasurable emotional states. There is the conflict of daring and fear in feats, the pleasure in accomplishment and success, the pleasure and pride in overcoming difficulties and encountering risk with all its emotional tension, the pleasure of enduring hardships and suppressing of pain, the pleasure in mastery of self, the inspiration of being a cause. Our athletics has for some years created a sort of autocracy, it being granted to those best fitted and who least needed the exercise. The values inherent in the various forms of activity had been recognized but not democratically applied. To break away from the old order and to give to each boy in the high schools an equal opportunity there was instituted a State-wide athletic efficiency contest last May. The tests consisted of four events: 100-yard dash, running broad jump, running high jump, and bar vault. Seventy-three high schools responded to the call and the results were most gratifying. The present aim

of the department is to provide the girls in the high schools with a like opportunity, every girl to contribute her share to a total, in tests commensurate with their abilities. This beginning, it is hoped, will lead to a reorganization of all athletic competitions in the schools, especially in team games, so that every boy and girl will be able to participate in all games, sports, and athletic contests, and receive the mental and physical training and education resulting from them.
